Subject: [EXT] Concerning Excel energy price hike

I find a 17% increase right down mean. They should get no more than 2%. Lets work for the people that voted for you! They are all ready for this year reporting a 6.88% increase profits year-over-year and 8 billion is a good chunk of cash. With that and the increase they already have received it makes their inflation go away! That's better than we get to do! In times like these you don't kill the cow that is providing the milk!
