Subject: [EXT] electric price request

As a customer of N.E.W. that is retired I'm concerned about the price increase they have requested. Also I would like to see something done to encourage home installed solar systems, most notably the reimbursement rate offered by N.W.E. , I believe it should be more inline with the rate that Minn. uses. North West only reimburses at their wholesale purchase price, that doesn't do much to encourage home installs.

Thank you,
Roger Stunes
