Subject: Re: [EXT] FW: EL24-020 Proposed South Deuel Wind Project | Notice of Opposition

Public Utilities Commission,

Please receive this as our official notice of opposition to the South Deuel Wind Project, EL24-020 a project of Deuel Harvest Wind Energy South LLC. We reside within the project boundaries but are not a project participant.

We are concerned the construction of these wind towers will drastically decrease our property value as well as our quality of life. The towers destroy the beauty of the landscape, create noise pollution and have the potential of causing shadow and flicker. The impacts of shadow and flicker can dramatically impact the comfort of our home -causing lifestyle changes, increased expenses to block/cover windows - as well as how we utilize our outdoor property.

Additionally, we are concerned with how the wind towers affect wildlife, disrupting their nesting, flight and migration patterns. In turn this affects wildlife hunting opportunities and potentially ends generational traditions of hunting and enjoying the outdoors.

Finally, we are also concerned about the community conflict projects like this can cause, dividing neighbors.

Again, please consider this our official notice of opposition to South Deuel Wind, a project of Deuel Harvest Wind Energy South LLC.

Sincerely,

Tony Quail and Jennifer Quail
