Data Request:

Refer to the Petition, pages 1 and 8. The Company proposes that load served under these rates would be excluded from Otter Tail Power's E2 allocation factor. Is Otter Tail proposing the Commission approve the E2 allocation methodology in this docket, or in a future rate case?

Response:

Otter Tail Power plans to file a similar tariff and E2 allocation methodology request in its Minnesota and North Dakota jurisdictions. The Company requests the South Dakota Commission approve the removal of load served under the TMEP rider from Otter Tail Power's E2 allocation factor contingent upon receiving approval in all three jurisdictions. The application of the E2 allocation methodology would occur in a future rate case.
