Date of Response: June 02, 2025

Responding Witness: : Amber Grenier, Manager, Regulatory Economics, 218-739-8728

---

Data Request:

Should the proposed tariff include the definition of “specific thermal storage technology” requested above? Please explain why or why not.

Attachments: 0

Response:

No. The “specific thermal storage technology” mentioned in the proposed tariff refers to a large-scale thermal technology that stores energy specifically when a wind energy center or solar generation facility generates electricity. It is only this characteristic of the technology that is important for the purposes of the tariff.
