The proposed power plant northeast of Toronto SD would be approx 1.25 miles east of my acreage on 192nd st !! I did not move to the nice quiet SD country living to be invaded and exposed to all the noise, lights, and disgusting landscape we are creating in Deuel County !! I can hear the power plant that is 6 miles from my acreage already, so one only a little over a mile from my acreage I will definitely hear and see all the lights that are on 24/7 !! I already put up with the windtower noise, flashing lights, and the great shadow flicker that comes in my east windows, and the ugly landscape it creates !! I'm also disgusted that our legislators that were elected to represent us are pushing to give the multi million dollar companies tax breaks to come build here !! How many small businesses get this same tax deal ?? We are a rural agricultural community not an industrial park for every big company to come take advantage of us to build here !! I sure hope our small community voices are heard We DO NOT WANT ANY MORE OF THIS TYPE OF DEVELOPMENT COMING TO OUR AREA !! THANKS CHRISTIAN VIZECKY [REDACTED] Brandt SD 57218
