Subject: [EXT] Philip Wind Project

Dear Sir,

I am writing to oppose the issuing of a permit to construct wind generators in Haakon county. This area is a diversified farming and ranching community, and the proposed 700 wind generators would adversely affect our way of life.

Wind generators kill millions of birds annually, they are noisy, they do not make money over the long haul, they are unsightly during the day, they litter the night view with never-ending red flashing lights, and they are toxic to both produce & dispose of.

I urge you to deny a permit for such a project, there are better methods to produce electricity to meet South Dakota's needs.

Kind regards,
Victor Limacher
