Subject: Release for New Service from Douglas Electric.

I am requesting to have a new service installed in Hutchinson County through Douglas Electric. My new house will sit in Hutchinson County, but Douglas Electric has an overhead line that is 1,400 feet from where my new house will sit.

Douglas service will cost \$350 flat fee for new service charge, and the first 350' of line extension is at no cost and beyond that there is a \$3.50 per foot charge. Depending on where we want to set the transformer, we will be about 1400' by rough measurement from Google Earth. The estimated contribution in aid for Douglas Electric will be \$4,025.00.

Thanks,

Craig Bialas
