Subject: [EXT] Objection to BH Electric rate changes

Good evening,

I am a resident in Belle Fourche and would be affected by BH Electric's proposed rate hike. My electric service and delivery charges are already more than I pay in electric consumption each month and the proposed rate change would make that ratio even more heinous. Why does it cost more to connect to a line than the electricity I consume in my 100% electric home? How is such a disproportionate charge burden considered acceptable?

Please find my information below to join the Richard Bell filing:
