I was very dismayed to read an article on kelolamd.com posted 4/7/26 about Black Hills Energy's request to your entity for permanent confidentiality regarding CSRE Properties South Dakota. Such a request is unreasonable and seems to run counter to the purpose of your organization. Please act responsibly on behalf of the people of South Dakota and its resources, and deny this request. South Dakota residents should be privy to all information about proposals for data centers, and companies proposing them should be required to provide all details related to the project.
