Dear South Dakota PUC

RE: A11m T110H R48W, Docket EL26-026, Poweron Project

No Powerlines

There are so many other environmental things we can't control. Why would we install something we can that potentially causes serious illnesses & diseases. This project runs thru some very productive farm land that has been in families for over a century. There are known issues the cause issues for people & animals that are in near vicinity of the lines.

Yes, maybe the money is nice but is worth health & livelihood to our descendants and to people currently living in this area. Will it be enough to cover the lost productivity and land values as we go forward. Will the money be enough to allow our kids to make a living farming.

There is already so much chaos in our country, the federal government why would we want to create chaos in our own county?

This area is the home to many families that have been farming this ground for over a century. We need to stick together now and say 'NO Powerlines' and protect what our forefathers established many years ago so their descendents have something important them continue on for many generations to come.

Thank for your time and I hope you do the right thing so this land can be prosperous and allow continued healthy community.

Thank you
Lynnette Jung
