PID: 1970

To Whom it may concern:

Listed below are the reasons we are opposed to the 765 power line running through our property in Deuel County, Glenwood township, section 28.

We are not convinced that studies of 765 lines have been thorough enough to rule out adverse effects on livestock and people. This would be reckless to proceed with a line of this size. Concern for fencing and construction work under the 765 would be troublesome and uncomfortable. Virtual fencing and GPS farming equipment would also be very concerning.

We aerial spray because the pasture topography is to rough for ground spraying. Spraying is very necessary for weed control or our pasture would be taken over by leafy spurge and other weeds.

Compensation offered for damages would need to be an annual payment as inflation and change in economy occurs. Compensation that has been offered is bare minimum. Value of land will decrease drastically.

This 765 power line would totally ruin the aesthetics of our property.

Sincerely,

Val Gene Johnson
