On November 2, 2026, we filed a request with the South Dakota Public Utilities Commission (SDPUC) to update the Transmission Cost Recovery Rider charges reflected in the Transmission Cost Recovery line on your bill. The proposal would increase charges for Large General Service, Controlled Service, and Lighting, and decrease charges for All Other Services, including Residential Service customers. If approved, the change would take effect for electricity use beginning March 1, 2027.

To view the filing, visit https://puc.sd.gov/Dockets/Electric/2026.

Customers may join with 24 others to file written objection to this update and to request that the SDPUC suspend the rate and hold a public hearing on the filing.
