Juno Beach, FL 33401

Lead Project Manager in renewable energy development with experience advancing utility-scale wind and energy storage projects. Expert in siting strategy, permitting, stakeholder engagement, and cross-functional leadership. Proven ability to manage complex projects from early-stage development through late-stage development while balancing technical, economic, and community factors.

## PROFESSIONAL EXPERIENCE

---

NextEra Energy Resources – Lead Project Manager

Jan. 2023 - Present

- Lead development of utility-scale renewable projects including wind and battery energy storage systems (BESS).
- Direct site selection and layout optimization, integrating environmental, engineering, and land constraints to maximize project viability and performance.
- Direct site selection and layout optimization, integrating environmental, engineering, and land constraints to maximize project viability and performance.
- Lead stakeholder engagement efforts, building and maintaining relationships with landowners, regulatory agencies, and local governing bodies.
- Represent projects in public forums, including county commission meetings, hearings, and community outreach events, effectively communicating technical, economic, and community impacts
- Coordinate cross-functional teams spanning engineering, environmental, legal, commercial, and finance to achieve development milestones.
- Evaluate project feasibility and risk, including capital costs, schedule, interconnection, and regulatory considerations to inform strategic decisions.
- Adapt development strategies in response to evolving regulations and market conditions, ensuring projects remain competitive and executable.

Total Package Landscaping, Supervisor

2015 – Dec. 2023

- Directed day-to-day operations and coordinated field teams, ensuring efficient project execution and adherence to timelines
- Resolved operational challenges and unforeseen issues in real time, implementing practical solutions to maintain project schedules and quality
- Optimized workflows and task allocation, improving productivity and operational efficiency across multiple job sites
- Advised clients on property maintenance strategies and future project planning, enhancing long-term customer satisfaction and retention
- Recruited, trained, and mentored employees, strengthening workforce capability and maintaining high performance standards

## **Education**

---

**Florida Atlantic University, Boca Raton, FL**  
Bachelor of Business Administration, Finance

December 2021

**Palm Beach State College, Palm Beach Gardens**  
Associate of Arts

Summer 2018

## **SKILLS**

---

- Renewable Energy Development (Wind, BESS, Solar)
- Permitting & Regulatory Strategy
- Project Management
- Stakeholder Engagement
- Site Selection & Constraints Analysis
- Financial & Feasibility Analysis
