1-9 **South Dakota Data Request**

Does MidAmerican plan to include furnaces, ground source heat pumps, and additional lighting programs through 2017? If so, is MidAmerican requesting these programs and budget amounts be included for the years 2015 through 2017, in addition to 2014?

**Response:**

If the SDPUC approves the inclusion of furnaces and ground source heat pumps in the residential equipment program for the 2014 plan year, MidAmerican intends to continue to offer these measures through the entirety of the 2013-2018 plan. MidAmerican has not determined an appropriate budget for these measures past 2014 but will do so if the SDPUC approves the 2014 inclusion of these measures and will ask the SDPUC to approve those budgets in next year's reconciliation process.

MidAmerican notes that nonresidential furnaces and lighting are already a part of the approved plan and the additional funding MidAmerican is requesting for 2014 may not necessarily carry on past 2014. MidAmerican is not asking for additional funding for these programs beyond 2014 at this time.
