Phone: 563-333-8630

**South Dakota Data Request**

4-2) Please provide a projected impact to the gas residential ECR factor and the impact to an average residential gas customer's total bill that would result due to the budget increase.

**Response:**

Please see "Attachment 4-2 SD Exhibit C(G) Gas 2014".

Page 1 of this exhibit shows the impact on the current EECR factor due to the budget increase if the proposed increase is to be recovered starting in December 2014 through the current reconciliation period of March 2015. Page 2 shows the increase to an average residential gas customer's total bill due to the budget increase from December 2014-March 2015. The total average customer increase over the four month period is \$4.18. As an alternative, MidAmerican could include the increase with the 2015 reconciliation and spread the customer increase out over 12-months, which would be a \$.35 monthly impact on customer bills.
