2-2 South Dakota Data Request

Were the capacity and energy savings associated with the 2014 furnace rebates included in the benefit/cost tests provided in the 2015 annual report? If so, please provide justification for including those capacity and energy savings benefits when it appears the cost of those furnaces were removed from the residential gas budget.

Response:

No; 82 units, 13,069.56 therms, 169.94 Peak therms, \$124,684.55 in incremental costs and \$49,200 in incentives were removed from the calendar year source output for cost effectiveness to account for the furnaces being credited to 2014 in the previous filing.
