Kloucek Asks for Pause in Northwestern Energy Merger with Black Hills Power and Light

For immediate release: For more info call [REDACTED] email [REDACTED]

Today Frank Kloucek offered both written and oral testimony at the ad hoc hearing for the Black Hills Power and Light buyout of Northwestern Energy.

“Concerns about job layoffs consumer service, investor return on investment, data centers energy impacts, monopolization of energy supplier, possible transparency issues, price increases and much more are at the heart of this request,” said Frank Kloucek of Scotland.

“Enough is enough. Lets take a slow methodical approach on these hearings with more input from consumers and the general public for the good of all South Dakotans,” concluded Frank.
