NOV-16-07 FRI 4:48 PM KOLKER LAW OFFICE FAX NO. 16053978497

SOUTH DAKOTA SEED CERTIFICATION STANDARDS

Millet (Proso and Foxtail)

Seed Certification Standards (Self-Pollinated Species)

I. Application and Amplification of General Certification Standards

The General Seed Certification Standards are amplified as follows to apply to millet. Eligibility requirements: only the Foundation and Registered seed classes are eligible for recertification. The Certified class is not eligible to be recertified except in the case of an older variety for which Foundation seed is not being maintained.

II. Land Requirements

No other variety of millet may have been grown on the field the previous year except a crop of the same variety which was inspected and passed for certification.

III. Field Standards

A. Fields producing a class of Certified seed will be inspected before harvest when the seed begins to mature and/or take on color.

B. Isolation

A field shall be separated by a strip of ground adequate to prevent mechanical mixtures. The strip may be either mowed, uncropped or planted to some crop other than the kind being Certified.

C. Unit of Certification

The field shall be considered the unit of certification and a portion of a field can be accepted for certification provided that portion of the field meets the isolation requirements stated in B above.

D. Specific Requirements

Factor	Foundation	Registered	Certified
---------------	-------------------	-------------------	------------------

Other varieties (maximum)	1:3,000	1:2,000	1:1,000
Inseparable other crops (maximum)*	1:10,000	1:10,000	1:2,000
Noxious weeds whose seed is inseparable (maximum)**	None	None	None

* Inseparable other crops shall include crop plants, the seed of which cannot be thoroughly removed by usual methods of conditioning.

** Noxious weeds are designated by the certifying agency. Refer to Number 23 on the Standard's Home Page.

VI. Seed Standards

Factor	Foundation	Registered	Certified
Pure seed (minimum)	98.00%	98.00%	98.00%
Inert matter (maximum)	2.00%	2.00%	2.00%
Weed seed (maximum)	.05%	.25%	.25%
Noxious weed seed (maximum)	None	None	None
Total other crop seed (maximum)	.01%	.02%	.04%
Other varieties (maximum)	.05%	.10%	.20%
Other kinds (maximum)	.005%	.01%	.02%
Germination (minimum)	80.00%	80.00%	80.00%

Variety of seed is not indicated.
Pure seed includes all seed of the kind analyzed.
Crop seed includes all seed of other crop plants.
Inert matter includes broken seeds of one-half size or less, dirt, chaff, etc.
Germination includes only those seeds which sprout and produce normal seedlings.
Hard seeds are those seeds which, while not dead, have a hard seed coat that is impervious to water and did not sprout.

Any test results appearing on this report were performed by examiners that were NOT CERTIFIED SEED TECHNOLOGISTS.

The results mentioned on this report CANNOT BE USED FOR TAG, LABEL OR CERTIFICATION.

REMARKS

Noxious Weed Seeds	Number per oz. or lb.	Weed Seeds	Number per lb.
None		None	
Other Crop Seeds	Number per lb.		
None			

Pure live seed (P.L.S.) $\left(\frac{\text{pure seed \%} \times \text{germination \%}}{100} \right)$ 87.07%
