Cody,

First I would like to thank you and your colleagues for your time and consideration for my request for a Grain Buyers' License. Please know, I do not take this lightly but am instead very committed to teaming up closely with my son, Jeremy, to making FGM Storage & Arbitrage a company that not only can we be proud of, but South Dakota can be proud of also. Our mission is to provide the services to the producer and buyer that are sustainable, profitable, and add value to the community. I feel strongly that as Jeremy leads the grain side of the business and I lead the managerial side along with having an Advisory Board, the company will be successful and one that folks are proud to associate with and conduct business with. I believe with strong ethics, hard work, dedication and commitment our business model will continue to evolve to where it is a seamless system. Both the producer and the buyer, need a one stop shop, and I believe we can be that.

If I can provide any additional information, please let me know and/or if it would be best to sit down together to discuss further if you choose. Again thank you for your time and please feel free to reach me at 605-354-4975 or by email. Jeremy will be dropping off the packet with the additional information that was better to provide you outside of an email. I copied the questions out of all 3 emails from your office and have answered below.

Best Regards,

Jan
