Subject: Keystone pipeline

Auto forwarded by a Rule

To whom it may concern:

The proposed pipeline that would

run through Western SD would support energy technology of the past and not of the future.

There are multiple and exciting opportunities for our state to develop new & cleaner energy and supply jobs for our area. SD lags in so many other ways. Our family would like to see this change. This change will not occur by supporting the outdated ways of dirty energy.

Thank you,

Jennifer Lena (age 14)
