

Condition 15. Construction agreement

Our copy says: Water pumping may be allowed but must get with Mike Sibson before pumping. No one contacted Mike to get permission to pump the water. The construction company went ahead and did what they wanted.

Another breach of the agreement.

Rocks pushed into clay they were covered with topsoil.

According to our construction agreement all rocks were to be hauled away. These were not.

Why sign an agreement if our requests are not followed?

Mike and Sue Sibson Farm

Howard, SD

According to our construction agreement all rock were to be hauled off our property. This pile of rock was buried not hauled away.

Our agreement was breached. We have contacted Sarah Metcalf and she is to get back to us. This happened September 30,2009. It seems to take along time to resolve issues.

Condition 18. Rock excavation from the trench may be used to backfill the trench only to the top of the existing bedrock profile.All other rock shall be considered construction debris.

After 1.30 of rain equipment tearing up wetland area.
