Thank you for your response..

My full address is [REDACTED] Sioux Falls, SD. 57106

If further corrections are needed,, please let me know!

Good morning,

I want to respectfully request you do not go along with Navigator's request to invalidate Minnehaha and Moody County's Ordinances.

There is so much information out there that makes it very scary to see this project go forward without a serious, long look into things that could possibly go wrong and the affects it would have on anyone or thing nearby the pipeline. I personally would not want to sign off on something this big without being 100% sure there was no risk to anyone close by. It also seems there are better and more effective things/ways CO2 can be used without a pipeline. This is not the time to rush, but rather to research, study, gather information. Don't be bullied into a decision that could be a disaster in more ways than one to those along the pipeline.

Please, please, please consider carefully and prayerfully, before you decide. Asking you to stand with your citizens and not accept this request to invalidate.

Dawn Moulton
