

August 2, 2023

Dear Public Utilities Commissioners;

Please Deny the permit for the Navigator Pipeline. This is a taking of private property but not for public use. This pipeline is for private, corporate profit by a foreign-owned company.

The safety concerns are horrendous! How can you allow them to do this to our people? People & animals living in the vicinity of these pipelines will live in constant danger of sudden death by suffocation. (Emergency vehicles will be disabled due to lack of oxygen.)

Property values in the area of these pipelines will drop like a rock. Far from bringing economic prosperity to the state, these pipelines will disincentivize economic growth, (except for the corporations and ~~the~~ opportunists benefiting handsomely from promoting the pipelines.)

Please stop this disaster from happening in South Dakota!
