RE: Docket HP22-001

Dear Commissioners Fiegen, Nelson & Hanson,

I'm writing to you today to ask that you NOT allow the CO2 pipeline project to move forward in South Dakota.

Reasons include protecting our South Dakota landowners from Eminent Domain Abuse. When permission wasn't granted to survey their property - it was done anyway. They are not following the no trespass laws; Summit Carbon has then threatened lawsuits.

Also, pipeline safety is a huge concern. According to a Summit spokesperson: "the long-standing technology is reliable and proven to be safe for landowners and communities". What about the effects of the pipeline explosion on people and the environment in Satarlia, Mississippi on February 22, 2020?

What are the benefits of the proposed pipeline? If the purpose of the CO2 pipeline is to frack more oil in the process called "enhanced oil recovery," how is this a climate solution when it is used to drill for more oil?

Who are all the investors of this company? Why are many of them not made public?

Please do not allow this pipeline process to move forward in South Dakota.

Respectfully,
Ken H. Beck
