Subject: [EXT] CO2 PIPELINE DOCKET #HP22-002

This email is in regards to the Pipeline Siting Info Guide, docket #HP22-002. I support the counties who did stand with its citizens interest despite threats of law suites, financial incentives, or personal agendas in regards to these CO2 pipelines. County commissioners have a duty to place ordinances to protect its citizens safety just as the PUC does!

My husband, Dennis Haven, and I started farming with nothing and nothing was given to us.. We worked hard every day and sometime all night long to buy land that I own today (my husband passed away two and a half years ago from Covid}. I don't want foreign investors coming in and taking my land that we worked so hard for just so they can line their pockets, besides the safety concerns. I received a summons from SCS Carbon Transport, LLC and this is costing lawyer fees. I am firmly against these pipelines!! I pray the PUC stands with South Dakota farmers that are against these pipelines!!
