Subject: [EXT] Navigator Co2 pipeline ordinance

Sd PUC,

I below is my information.

I have concerns if the county or township ordinances are ignored by the pipelines Navigator and Summit Carbon Solutions. Each county is different by geological and residential requirements. The local counties are just putting these in place to protect the local residents. The county should not be sued for trying to protect its peoples rights. If these pipeline companies want to sue counties for trying to protect they are not businesses we want into the county at all.

Respectful
Steve Malsom
