Ms. Schuller,

This is in response to your email to the Public Utilities Commission regarding the proposed SCS Carbon Transport LLC CO₂ Pipeline, docket [HP22-001](#).

The commission received a siting permit application for this pipeline project on Feb. 7, 2022, resulting in the opening of this docket. The docket is receiving a detailed review of the proposed project by the commission. This began with March 22-25 public input meetings hosted by the commission along the pipeline's route as required by law.

You will learn more as further project information will be requested by the commissioners and staff, filed in the online docket, and be publicly available during the months ahead. I encourage you to follow this docket as it is processed and new information is posted. Many issues raised will be addressed by commission staff working with other state agencies and industry expert witnesses.

The [Information Guide to Siting Pipelines](#), posted on the commission website's home page and in the docket, further explains the commission's processing of such a docket, including the relevant state laws and rules. As you will see, this full research, review and action process is limited to one year by law, unless a motion requesting extension is filed by the project's applicant and granted by the commission.

Thank you for reaching out. Your email and this response will be posted under Comments and Responses in the online docket.

Chris Nelson, Chairman
South Dakota Public Utilities Commission
