Ms. Anderson,

This is in response to your message to the South Dakota Public Utilities Commission regarding the proposed Navigator Heartland Greenway, LLC's CO₂ Pipeline, docket [HP22-002](#).

The commission received a siting permit application for this pipeline project on Sept. 27, 2022, resulting in the opening of this docket. The docket is receiving a detailed review of the proposed project by the commission. This will begin with public input meetings hosted by the commission along the pipeline's route, as required by law. The notice with the dates and locations of these meetings will be posted in the docket.

You will learn more as further project information is requested by the commissioners and staff, filed in the online docket, and publicly available during the months ahead. I encourage you to follow this docket as it is processed and new information is posted. Many issues will be addressed by commission staff working with other state agencies and industry expert witnesses.

The [Information Guide to Siting Pipelines](#) posted on the commission website home page further explains the commission's processing of such a docket, including the relevant state laws and rules.

Thank you for reaching out to share your views. Your email and this response will be posted under Comments and Responses in the online docket.

Chris Nelson, Chairman
South Dakota Public Utilities Commission
