You as elected officials need to stand up for the people who elected you to your position. The pipeline is not wanted in our area and I don't understand why when landowners say no that these billion dollar companies can still get there way. This pipeline does nothing for the landowners it will effect all it will do is make billions of dollars for these big companies. None of which have a clue to what this will do to the land for 10+ years ,in which i grow my crops on. I don't understand why it is so hard for you the puc to understand what is wrong with this situation.
