**Subject:** [EXT] CO2 gas lines

Hope you are well. You have a lot on your plate as commissioner lately.

I am negative on the CO2 pipelines for a few reasons.

1. Against how the pipelines are abusing the rights and concerns of landowners and local authorities rights to regulate what goes on on their property and area of responsibility.
2. CO2 in concentrated form is toxic (deadly) and will fill up low areas if released. I saw that in slaughter plants that used CO2 to stun hogs.
3. Concerned about sustainability of the CO2 industry when or if government policies becomes rational about carbon.

Thank and God Bless,  
Regg
