Re: Docket NG11-03
Manufactured Gas Plant remediation update pursuant to paragraph 3E of Settlement Stipulation

Dear Ms. Mehlhaff:

NorthWestern is providing you with an electronic file (NG11-03 2023 update) which tracks clean-up costs and recoveries related to the Aberdeen MGP site during 2022. NorthWestern incurred \$344,737 of remediation costs and recovered \$2,208,698 from customers during 2022. We also received a rate order in Docket NG21-009 which allowed us to refund back to customers a portion of the over collected position. We refunded \$1,827,077 back to customers in 2022, and that refund will continue through November 30, 2023 per the rate order received in NG22-009. We have a cumulative over collected position of \$591,549 as of December 31, 2022. We track our MGP remediation costs and amounts recovered from customers, and apply a 7.79% carrying charge to the under or over collected position at the end of each month. As stated in paragraph 3E of the Settlement Stipulation of Docket NG11-03, NorthWestern will provide this report to you each calendar year before January 31.

We are also providing you a copy of the projected cash flows for remediation work for years 2023 through 2027. NorthWestern will continue working cooperatively with the South Dakota Department of Environment and Natural Resources in order to proceed with a site management strategy that meets regulatory expectations and is conducted in a technically efficient manner.

Please feel free to contact me at (605) 978-2960 if you have any questions.

Sincerely,

Jeff Berzina
Controller
NorthWestern Energy
