IN THE MATTER OF THE PETITION  
OF KENNEBEC TELEPHONE COM-  
PANY FOR SUSPENSION OR MODIFI-  
CATION OF § 251(b)(2) OF THE COM-  
MUNICATIONS ACT OF 1934 AS  
AMENDED

Docket No. \_\_\_\_\_

### I. INTRODUCTION

Pursuant to Section 251(f)(2) of the Communications Act of 1934, as amended (“the Act”), 47 U.S.C. § 251(f)(2) and South Dakota Codified Laws SDCL § 49-31-80, Kennebec Telephone Company (“Kennebec”) hereby respectfully petitions the South Dakota Public Utilities Commission (the “Commission”) for a suspension or modification of Section 251(b)(2) of the Act.

Section 251(b)(2) states that all local exchange carriers (“LECs”) have “[t]he duty to provide, to the extent technically feasible, number portability in accordance with requirements prescribed by the Federal Communications Commission (the “FCC”).<sup>1</sup> Previously, the FCC established rules to implement local number portability (LNP) by wireline carriers.<sup>2</sup> Portability between wireline carriers was limited to the LEC rate center. In a Memorandum Opinion and Order (the “Order”) and Further Notice of Proposed Rulemaking (the “FNPRM”) released on November 10, 2003, the FCC found that LECs also must implement LNP to allow porting to wireless carriers, even when the wireless carrier

<sup>1</sup> 47 U.S.C. §251(b)(2).

<sup>2</sup> 47 C.F.R. § 52.20 - § 52.33.

does not have interconnection with the LEC or telephone numbers in the affected rate center. In the FNPRM, the FCC asks how LNP can be implemented when there is a “mismatch” in rate centers from a wireless carrier to a wireline carrier and if the current porting interval should be reduced for intermodal porting.

## **II. BACKGROUND**

In support of this petition for suspension or modification of the Order, Kennebec respectfully submits that:

1. Kennebec is a South Dakota corporation with its principal office located at 220 South Main Street, Kennebec, South Dakota 57544. Petitioner is engaged in the provision of general telecommunications services in the State of South Dakota subject to the jurisdiction of this Commission. Kennebec currently provides basic local exchange service in two exchanges and, as of December 1, 2003, had 766 access lines in service.

2. Kennebec has received requests to deploy LNP from Cellco Partnership (dba Verizon Wireless) and Western Wireless Corporation (dba CellularOne). Neither carrier has a point of interconnection or telephone numbers in Kennebec’s rate centers.

3. Kennebec is a rural telephone company as defined in 47 U.S.C. § 153(37) and provides telephone exchange service, including exchange access, to fewer than 50,000 access lines, and serves a study area of fewer than 100,000 access lines. Section 251(f)(2) of the Act allows a rural local exchange carrier with fewer than two percent (2%) of the subscriber lines installed in the aggregate nationwide, (as of December 2002,

approximately 188 million local telephone lines)<sup>3</sup> to petition a state commission for a suspension or modification of the application of a requirement provided by 47 U.S.C. § 251(b) and (c).

4. According to the provisions of 47 U.S.C. § 251(f)(2) and SDCL § 49-31-80, the Commission shall grant a petition for suspension or modification to the extent that, and for such duration as, the Commission determines that such suspension or modification:

(A) is necessary:

- (i) to avoid a significant adverse economic impact on users of telecommunications services generally;
- (ii) to avoid imposing a requirement that is unduly economically burdensome; or
- (iii) to avoid imposing a requirement that is technically infeasible; and

(B) is consistent with the public interest, convenience, and necessity.

5. Pursuant to the above, the Commission must grant a petition for suspension or modification if the Commission finds that any one of the three criteria set forth in sub-part (A) of this statutory section is established and further finds that the suspension or modification is consistent with the public interest, convenience and necessity.

6. Section 251(f)(2) of the Act requires the Commission to take final action on this Petition within 180 days after receipt. Pending such action, pursuant to both federal and state law, the Commission is given express authorization to “suspend or stay enforcement of the requirement or requirements to which the petition applies with respect to the petitioning carrier or carriers.” 47 U.S.C. § 251(f)(2) and SDCL 49-31-80. The pro-

---

<sup>3</sup> See “Federal Communications Commission Releases Study on Telephone Trends”, FCC News Release (rel. Aug. 7, 2003).

visions of ARSD § 20:10:32:39 reference the Commission's authority under state statute and specifically contemplate that the Commission may grant a "temporary stay" of the "obligations the carrier seeks to suspend or modify" while its proceedings are pending. Suspension of enforcement while the petition is pending allows for rational public policy decision-making. In addition, future FCC Orders regarding wireless-to-wireline LNP addressing issues described in the FNPRM will allow the Commission and Kennebec to assess the full impact (economic and technical) of implementing LNP.

7. The Order does not address issues relating to the routing of calls to ported numbers in those cases in which no direct connections exist between carriers. In light of current routing arrangements, Kennebec contends that it is infeasible to complete such calls on a local, seven-digit dialed basis because Kennebec routes calls terminating outside its service territory, including calls to wireless carriers, to interexchange carriers. In addition, when the Commission considers the initial and ongoing costs of LNP, Kennebec believes the Commission will determine that such costs create an adverse economic impact on telecommunications users and a requirement that is unduly economically burdensome. The economic impact may be even more detrimental to Kennebec or its end users if the FCC shortens the porting interval and/or forces LECs to absorb additional network costs as contemplated by the FCC in its FNPRM. Absent full consideration of the aforementioned issues, Kennebec contends that it is not consistent with the public interest, convenience and necessity to expend the significant investment necessary to deploy LNP. Granting of this petition will permit the Commission to ensure that the public in-

terest, convenience and necessity are not undermined as a result of unanswered implementation issues associated with the provision of LNP.

### **III. ARGUMENT**

#### **A. LNP Will Cause Significant Adverse Economic Impact on Users of Kennebec's Telecommunications Services.**

8. Section 251(f)(2) of the Act provides this Commission with the authority to ensure that the uncertain state of federal law, with respect to LNP, does not have a significant adverse economic impact on users of telecommunications services in the State of South Dakota. The Act vests this Commission with authority to balance the requests for LNP with the potential economic harm to telecommunication users. It is the Commission's responsibility to determine whether implementation of LNP by Kennebec would impose a significant adverse economic impact on telecommunication users in the Kennebec service area.

9. Kennebec requests suspension of the LNP requirement in Section 251(b)(2) of the Act because, as shown in Exhibit 1, implementation of LNP would impose a significant adverse economic impact on users of telecommunications services generally. FCC rules allow recovery of certain LNP costs from carriers or from end users through a monthly surcharge imposed over a five-year recovery period.<sup>4</sup> Certain costs associated with LNP cannot be recovered through the end user LNP surcharge or carrier charges. These costs must be recovered, if at all, through the LEC's general rates and charges.

---

<sup>4</sup> 47.C.F.R. § 52.33.

10. Kennebec estimates that the increase in a subscriber's local service cost that would result from LNP implementation would equal \$5.70 per month for five years,<sup>5</sup> an increase of over 35% based upon the current residential rate of \$16.00 per line per month. This estimated increase in the local service cost does not include any cost associated with the provision of transporting calls to ported numbers outside of Kennebec's local service areas. Kennebec estimates that if it is required to absorb transport costs to wireless carriers whose point of interconnection is located somewhere outside of Kennebec's service area, the total increase in a subscriber's local service cost would equal \$13.32 per month for five years,<sup>6</sup> an increase of 83% over the current monthly residential rate of \$16.00 per line. This cost recovery will have a significant adverse economic impact on users of telecommunications service in Kennebec's service area.

11. Additional unknown costs of LNP could increase the financial burden. The costs as set forth in Exhibit 1 do not include any cost associated with reducing the porting interval as contemplated by the FCC in its FNPRM. Such reductions of the porting interval may require Kennebec to make significant changes to its operations thereby increasing the cost to provide LNP.<sup>7</sup> The costs as set forth in Exhibit 1 do not include other costs that may be imposed on Kennebec as a result of other rulings by the FCC in its FNPRM. The FCC has sought comment on how to facilitate wireless-to-wireline porting where there is a mismatch between the rate center associated with the wireless num-

---

<sup>5</sup> The Applicant is reviewing these cost estimates and reserves the right to amend these estimates in the future.

<sup>6</sup> The FCC stated in footnote 75 of the Order, that a dispute as to which carrier is responsible for transport costs when the routing point for the wireless carrier's switch is located outside the wireline local calling area in which the number is rated does not provide a reason to delay porting from wireline to wireless carriers.

<sup>7</sup> FNPRM, para 45.

ber and the rate center in which the wireline carrier seeks to serve the customer.<sup>8</sup> The FCC sought comment on the extent to which wireline carriers should absorb the cost of allowing the customer with a number ported from a wireless carrier to maintain the same local calling area that the customer has with the wireless service provider. The FCC further sought comment on the procedural, technical, financial, and regulatory implications of any such approach. These proposals would also increase the cost of LNP, however, it is not clear to what extent.

12. Thus, until the FCC has released a final Order regarding the issues in its FNPRM, Kennebec is unable to make a determination of its total costs to implement and to provide LNP and is unable to determine the total economic impact on the users of telecommunications service in its service area.

#### **B. LNP Would Be Unduly Economically Burdensome for Kennebec**

13. Implementation of wireline-to-wireless LNP, under the current guidance provided by the FCC, will be unduly economically burdensome for Kennebec. Any cost not recovered through the end-user LNP charge or carrier charge may have to be borne by Kennebec. Granting Kennebec a suspension of the requirements of 47 U.S.C. § 251(b)(2) pursuant to Section 251(f)(2) of the Act will avoid the imposition of a requirement upon Kennebec that is unduly economically burdensome.

14. The estimated costs of LNP, set forth in Exhibit 1, are presented on a per line basis. However, there is no certainty that LNP costs will be paid by current Kennebec subscribers. For example, there are potential issues concerning which costs will be borne directly by the customer and which costs will be borne by Kennebec. Further,

---

<sup>8</sup> Id at para 42.

based upon the substantial increase in the cost per line per month caused by LNP, there is no guarantee that all such costs would ultimately be passed on to the end-user in the form of a rate increase. The potential costs that may be incurred by Kennebec would be unduly economically burdensome.

15. As shown, LNP implementation could result in the assessment of a new LNP surcharge on Kennebec's telephone subscribers and could increase local rates. These actions would make Kennebec's service offering less competitive with the services provided by wireless carriers. Wireless carriers already enjoy a number of competitive advantages over wireline carriers. For example, because of their FCC licensed service areas, wireless carriers have larger local calling areas, larger service territories, and more potential customers to absorb the cost of LNP. By increasing the cost of service, LNP would make wireline service even less competitive with wireless service.

16. If the costs were assigned completely to the Kennebec subscribers, the large size of the surcharge may cause a segment of the Kennebec customers to discontinue service. The reduction in line count would not allow for the full recovery of LNP costs, causing a negative impact on Kennebec's revenue and laying the foundation for an ever-escalating burden on the remaining network users to fund common network costs.

17. Pursuant to the FCC's Order, although wireline carriers have been ordered to port numbers to wireless carriers when the wireless carrier has no point of interconnection or numbers in the LEC's rate centers, the FCC does not require wireless carriers to port numbers under the same circumstances to wireline carriers. Thus the current porting

requirement is a one-way requirement – Kennebec can lose customers through porting to the wireless carriers, but it cannot gain customers from them.

18. In light of these implementation costs and the unresolved issues still pending before the FCC, the Commission’s suspension of the requirement on Kennebec to provide wireline-to-wireless LNP is consistent with Section 251(f)(2)(A)(ii) of the Act.

### **C. LNP is Currently Infeasible.**

19. Although the FCC stated in the Order that it found no persuasive evidence in the record indicating that significant technical difficulties exist that would prohibit a wireline carrier from porting a number to a wireless carrier that does not have a point of interconnection in the same rate center as the ported number, the FCC delayed its decision regarding the routing of calls to ported numbers where no direct connections existed until its decision in the *Sprint Petition*.<sup>9</sup> The FCC recognized that issues exist with respect to call routing in those instances of porting numbers from a wireline carrier to a wireless carrier where no direct connection exists between the carriers. The FCC however, made no determination as to the proper routing of such calls.<sup>10</sup>

20. The current technical issues with wireline-to-wireless LNP implementation will lead to user confusion. If a Kennebec telephone number is ported to a wireless carrier, a Kennebec end user originating a local exchange service call to the ported number will continue to dial such number on a seven-digit basis. The Kennebec switch will perform a database dip and determine that the number has been ported to a wireless carrier. The switch will search for a trunk over which to route the call. If a direct trunk

---

<sup>9</sup> *In the Matter of Sprint Corp. Petition for Declaratory Ruling Regarding the Routing and Rating of traffic by ILECs*, CC-Docket 01-92, Petition of Sprint, May 9, 2002 (“Sprint Petition”).

group has not been established with the wireless provider, the switch will be unable to find a trunk for such routing. In such a case, the party placing the call will likely receive a message that the call cannot be completed as dialed, or a message instructing the party to redial using 1+ the area code. Confusion among telephone users will occur since calls, dialed on a seven-digit basis prior to the number being ported, may be required to be dialed on a 1+ toll basis for which a toll charged is assessed by the calling party's preferred interexchange carrier.

21. Since Kennebec is an Incumbent Local Exchange Carrier, it does not carry local traffic to points of interconnection beyond its local exchange. In those exchanges where a wireless provider has not deployed a direct facility and does not have a point of interconnection within that exchange, it is infeasible for Kennebec to route a call to the wireless provider on a local, seven digit-dialed basis because Kennebec routes calls terminating outside its service territory to interexchange carriers.

**D. Suspension of the Requirement to Implement LNP Is Consistent With The Public Interest, Convenience, and Necessity.**

22. The standard of public interest, convenience, and necessity consists of an evaluation of the benefit that consumers will receive from LNP compared to the costs of implementation and use. Central to this evaluation is the level of demand that exists for LNP in Kennebec's service area and the costs of implementation and use.

23. As of the date of this filing, no Kennebec customer has ever made an inquiry to Kennebec regarding LNP. No public benefit will be derived from LNP absent demand for such service in Kennebec's service area. Even if some level of LNP demand

---

<sup>10</sup> Order, para. 40.

develops in the future, Kennebec contends the costs that would be incurred by all subscribers and Kennebec to implement and maintain LNP would not be consistent with the public interest, convenience and necessity.

24. Notwithstanding the costs of LNP implementation, absence of demand for such service and in light of the routing issues that exist regarding such implementation, Kennebec has received LNP requests from wireless carriers that have not deployed direct connection facilities to Kennebec's exchanges. Without the proper infrastructure in place to route a call to a ported number on a seven-digit basis, calls cannot be completed as dialed. The porting of numbers from Kennebec to wireless carriers that do not have direct connections with Kennebec will not benefit consumers of telecommunications since, as described above, calls will not be completed as dialed. For this further reason, granting of the requested suspension is consistent with the public interest, convenience and necessity.

25. The rating, routing and consumer confusion issues associated with wireline-to-wireless portability as currently ordered by the FCC are contrary to the public interest.

26. In its FNPRM, the FCC sought comment on whether the benefits associated with offering wireless-to-wireline porting would outweigh the costs associated with making the necessary upgrades. The FCC also sought comment on the expected demand for wireless-to-wireline porting. The FCC did not seek comment on whether the benefits associated with offering wireline-to-wireless porting would outweigh the costs nor did it seek comment on the expected level of demand. The Commission, pursuant to Section

251(f)(2)(B) may make such determination. Kennebec recommends that the Commission, after reviewing the costs associated with making the necessary upgrades along with the expected level of demand should conclude that suspending the requirement to implement wireline-to-wireless LNP is consistent with the public interest, convenience, and necessity.

## V. CONCLUSION

27. As demonstrated, Kennebec has met the criteria set forth in 47 U.S.C. § 251(f)(2)(A), and the suspension requested in this proceeding is consistent with the public interest, convenience and necessity requirement set forth in 47 U.S.C. § 251(f)(2)(B). Accordingly, the Commission must grant the petition for suspension or modification.

28. Kennebec requests suspension of the LNP requirement until there is evidence of demand for LNP, and the per-line cost of LNP is reduced. At a minimum, suspension should be granted until six months following the FCC's full and final disposition of the issues associated with the porting interval and the routing of calls between wireline and wireless providers, at which time Kennebec may need to seek further § 251(f)(2) relief based upon the economic impact of these decisions.

29. Kennebec also requests immediate suspension of the § 251 (b)(2) requirement pending the Commission's consideration of this request until six months following this Commission's decision. Immediate suspension is necessary so that Kennebec does not have to start incurring LNP implementation costs until after the Commission acts on this Petition.

WHEREFORE, Kennebec respectfully requests the Commission to:

(A) Issue an interim order that suspends any obligation that may exist for Kennebec to provide LNP until six months after entry of a final order herein;

(B) Issue a final order that grants a permanent suspension for Kennebec's obligation to implement LNP until conditions are met as described herein; and

(C) Grant Kennebec such other and further relief that may be proper.

Dated this 12<sup>th</sup> day of February, 2004.

Access Lines excluding Lifeline		735
LNP cost per line per month excluding transport (5)	\$ 4.96	\$ 5.70
LNP cost per line per month including transport (5)	\$ 11.58	\$ 13.32

(1) Cost required to analyze and modify existing processes and systems in order to receive and process a request for porting.

(2) Other internal costs include reviewing porting agreements with wireless carriers, completing trading partner profile requests from wireless carriers, completing contracts with the SOA and NPAC, and developing and filing tariffs and documentation for the LNP end-user surcharge and local rate increases.

(3) Service Order Administration (SOA) provides the functionality to interface the LEC's order and provisioning systems in order to update the Number Portability Administration Center (NPAC) for access by all other carriers. Through the use of a SOA, a company is able to submit porting information to the NPAC.

(4) Transport costs will be incurred if the FCC requires LECs to install and absorb the cost of facilities to wireless carriers in order to route calls to ported numbers on a seven-digit dialed basis.

(5) Total costs do not include system changes required to shorten the porting interval or expanding a LEC's local calling area as contemplated by the FCC in its FNPRM.

**TC04-025      In the Matter of the Petition of Kennebec Telephone Company for Suspension or Modification of 47 U.S.C. Section 251(b)(2) of the Communications Act of 1934 as Amended.**

On February 12, 2004, Kennebec Telephone Company (Kennebec) filed a petition seeking suspension or modification of its requirement to implement local number portability (LNP) pursuant to Section 251(b)(2) of the Telecommunications Act of 1996. According to Kennebec, it has received requests to deploy LNP from Cellco Partnership d/b/a Verizon Wireless and from Western Wireless Corporation d/b/a CellularOne. Kennebec states that it is a small telephone company that serves less than two percent of the nation's subscriber lines installed in the aggregate nationwide, therefore under Section 251(f)(2) Kennebec may petition the Commission for suspension or modification of its obligation to implement LNP within six months of a request to deploy LNP. Kennebec "requests the Commission to (1) issue an interim order that suspends any obligation that may exist for Kennebec to provide LNP until six months after entry of a final order herein; (2) issue a final order that grants a permanent suspension for Kennebec's obligation to implement LNP until conditions are met as described herein; and (3) grant Kennebec such other and further relief that may be proper."

Initial Comments Due: 03/08/04

**TC04-028 In the Matter of the Filing for Approval of a Reciprocal Interconnection, Transport and Termination Agreement between WWC License, LLC and Western Telephone Company.**

On February 17, 2004, the Commission received a Filing for Approval of a Reciprocal Interconnection, Transport and Termination Agreement between WWC License, LLC and Western Telephone Company. According to the parties, the Agreement is a negotiated agreement between the parties for the purpose of putting in place an arrangement for the mutual exchange and reciprocal compensation of telecommunications traffic in accordance with Section 251(b)(5) of the Telecommunications Act of 1996. Any party wishing to comment on the Agreement may do so by filing written comments with the Commission and the parties to the agreement no later than March 8, 2004. Parties to the agreement may file written responses to the comments no later than twenty days after the service of the initial comments.

**TC04-029 In the Matter of the Application of Southwestern Bell Communications Services Inc. d/b/a SBC Long Distance for a Certificate of Authority to Provide Local Exchange Services in South Dakota.**

On February 18, 2004, Southwestern Bell Communications Services Inc. d/b/a SBC Long Distance filed an application for a Certificate of Authority to provide Telecommunications Services in South Dakota. Southwestern Bell Communications Services intends to provide resold and facilities-based local exchange and exchange access services throughout the area in the State of South Dakota currently served by Qwest Corporation. The applicant's services, include, but are not limited to basic local exchange service, custom calling features, CLASS services and data services. The applicant also proposes to provide exchange access services to interconnecting carriers.

**TC04-030 In the Matter of Qwest Corporation's Modification to Exhibit B to the Statement of Generally Available Terms and Conditions.**

On February 18, 2004, Qwest Corporation filed an Updated Exhibit B, the Performance Indicator Definitions (PIDs) to the Statement of Generally Available Terms and Conditions (SGAT). Qwest modified Exhibit B for administrative changes, corrected PO-16, Timely Release Notifications, and updated certain subparts to GA-1, Gateway Availability -- IMA-GUI. Qwest requests that the Commission permit the amended Exhibit B to go into effect no longer than 60 days after submission in accordance with 47 U.S.C. Section 252(f)(3). Qwest further requests that the Commission deem this revised Exhibit B to modify the SGAT and existing interconnection agreements that currently contain the PIDs as an exhibit.

**TC04-034 In the Matter of the Request for a Confidentiality Determination in Accordance with ARSD 20:10:01:42.**

On February 18, 2004, the Commission received a request from staff for a confidentiality determination in accordance with ARSD 20:10:01:42. According to the request, staff is attempting to make claims on the bond proceeds of S&S Communications (S&S). In order to make these claims, staff must provide information to the bonding companies which has been filed as confidential. S&S refuses to permit the release of information filed as confidential to any bonding company that does not sign a confidentiality agreement. The companies have provided staff with Indemnity Agreements signed by S&S which they claim gives them a right to see the information. Neither company has signed the confidentiality agreement. Staff has requested that the Commission make a determination that the information should not be treated as confidential on the basis that the information was not filed in compliance with the provisions of ARSD 20:10:01:41, S&S cannot meet the burden established in ARSD 20:10:01:43 and that the Indemnity Agreements that S&S signed with the bonding companies constitute a waiver of confidentiality as to those companies.

Docket No. TC 04-025

**PETITION TO INTERVENE**

In the Matter of the Petition of Kennebec Telephone Company for Suspension or Modification of § 251(b)(2) of the Communications Act of 1934 as Amended

Pursuant to ARSD 20:10:01:15.02, WWC License LLC, doing business as CellularOne, (hereinafter "Western Wireless"), petitions to intervene in Docket TC 04-025 for the following reasons:

1. Western Wireless is a cellular service provider in areas served by Kennebec Telephone Company, (hereinafter "Kennebec"), who has requested suspension on its local number portability obligations at issue in this proceeding. Western Wireless sent Kennebec a bonafide request ("BFR") to implement local number portability on November 18, 2004 and Kennebec responded on November 21, 2004, implicitly acknowledging its obligation to implement local number portability by the May 24, 2004 deadline. Rural consumers are increasingly choosing wireless service for their telecommunications needs and may choose to port their wireline number to Western Wireless upon the implementation of number portability as mandated by the Federal Communications Commission. Western Wireless has direct and personal interest in this proceeding and therefore its Petition for Intervention should be granted.
2. Local number portability by Kennebec is feasible and appropriate and no suspension of providing LNP should be allowed.
3. To suspend the obligations of Kennebec to deploy local number portability would be against public interest.

4. Western Wireless also contests Kennebec's request for immediate suspension of local number portability requirements and requests that the Commission, at a minimum, establish an expedited procedural schedule that would determine the factual and legal support for a decision on the merits of Kennebec's request for local number portability suspension.

5. Western Wireless is entitled to be granted intervention in this docket pursuant to ARSD 20:10:01:15.05 as the outcome of this proceeding will have an impact on Western Wireless and will affect Western Wireless, because, as noted even in the Kennebec's filing, Western Wireless has requested Kennebec deploy local number portability.

WHEREFORE, Western Wireless respectfully requests:

1. That its Petition to Intervene be granted;
2. That Kennebec's request for immediate suspension be denied; and
3. That Kennebec's request to suspend deploying LNP be denied.

Dated this 4 day of March, 2004.

SOUTH DAKOTA PUBLIC  
UTILITIES COMMISSION  
DOCKET TC04-025  
PETITION TO INTERVENE

**SDTA Petition for Intervention**

The South Dakota Telecommunications Association ("SDTA") hereby petitions the Commission for intervention in the above captioned proceeding pursuant to SDCL 1-26-17.1 and ARSD §§ 20:10:01:15.02, 20:10:01:15.03 and 20:10:01:15.05. In support hereof, SDTA states as follows:

1. Kennebec Telephone Company (hereinafter referenced as "Kennebec") on or about February 12, 2004, filed with this Commission pursuant to 47 U.S.C. § 251(f)(2) and SDCL § 49-31-80 a petition seeking a suspension or modification of the Local Number Portability ("LNP") requirement set forth in 47 U.S.C. § 251(b)(2) and LNP requirements established by the FCC in its *Memorandum Opinion and Order and Further Notice of Proposed Rulemaking*, released in CC Docket No. 95-116 on November 10, 2003 (FCC 03-284).

2. As noted in the Kennebec Petition, Kennebec is a rural telephone company as defined in 47 U.S.C. § 153(37) and currently provides basic local exchange service in two exchanges in South Dakota, serving a total of 766 access lines. Pursuant to 47 U.S.C. § 251(f)(2), any rural local exchange carrier serving fewer than two percent (2%) of the Nation's subscriber line installed in the aggregate nationwide may petition the State Commission for a suspension or modification of any of the interconnection obligations set forth in 47 U.S.C. §§ 251(b) and/or 251(c). According to the provisions of 47 U.S.C. 251(f)(2) and SDCL 49-31-80, this

Commission shall grant a petition of suspension or modification to the extent that, and for such duration as the State Commission determines that such suspension or modification –

- (A) is necessary:
  - (i) to avoid a significant adverse economic impact on users of telecommunications services generally;
  - (ii) to avoid imposing a requirement that is unduly economically burdensome; or
  - (iii) to avoid imposing a requirement that is technically infeasible; and
- (B) is consistent with the public interest, convenience, and necessity.

3. Pursuant to the above, the Commission must grant a petition for suspension or modification if the Commission finds that any of the three criteria set forth in sub-part (A) of this statutory section is established and further finds that the suspension or modification is consistent with the public interest, convenience and necessity.

4. Kennebec has to date received received two LNP implementation requests, one from Cellco Partnership (dba Verizon Wireless) and another from Western Wireless Corporation (dba Cellular One). Neither of these carriers has a point of interconnection or telephone numbers within Kennebec's wire or rate centers.

5. SDTA is an incorporated organization representing the interests of numerous cooperative, independent and municipal telephone companies operating throughout the State of South Dakota. Its membership includes not only the Kennebec Telephone Company, but also many other rural telephone companies operating in the State that have also recently received requests for LNP implementation from other telecommunications carriers.

6. SDTA seeks intervention in this proceeding based on the direct interests of Kennebec Telephone Company, as the petitioning party in this proceeding, and also based on the likelihood that determinations made by the Commission in this matter will impact future similar proceedings to be initiated by other SDTA member companies. Accordingly, SDTA has an interest in this proceeding and seeks intervention herein.

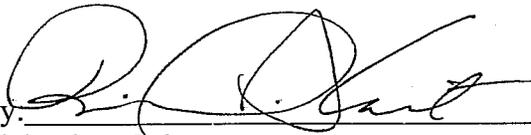

7. SDTA supports the Kennebec request for suspension or modification of the federal LNP requirements for all those reasons set forth in Kennebec's Petition filed in this matter, and strongly urges the Commission to grant the relief requested.

8. Based on all of the foregoing, SDTA seeks intervening party status in this proceeding.

Dated this 5th day of March , 2004.

Respectfully submitted:

THE SOUTH DAKOTA  
TELECOMMUNICATIONS ASSOCIATION

By:   
Richard D. Coit  
Executive Director and General Counsel

OF THE STATE OF SOUTH DAKOTA**

<b>IN THE MATTER OF THE PETITION OF )</b>	<b>ORDER GRANTING</b>
<b>KENNEBEC TELEPHONE COMPANY FOR )</b>	<b>INTERVENTION</b>
<b>SUSPENSION OR MODIFICATION OF 47 )</b>	
<b>U.S.C. § 251(B)(2) OF THE COMMUNICATIONS )</b>	<b>TC04-025</b>
<b>ACT OF 1934 AS AMENDED )</b>	

On February 12, 2004, Kennebec Telephone Company (Kennebec) filed a petition seeking suspension or modification of its requirement to implement local number portability (LNP) pursuant to Section 251(b)(2) of the Telecommunications Act of 1996. According to Kennebec, it has received requests to deploy LNP from Cellco Partnership d/b/a Verizon Wireless and from Western Wireless Corporation d/b/a CellularOne. Kennebec states that it is a small telephone company that serves less than two percent of the nation's subscriber lines installed in the aggregate nationwide, therefore under Section 251(f)(2) Kennebec may petition the Commission for suspension or modification of its obligation to implement LNP within six months of a request to deploy LNP. Kennebec "requests the Commission to (1) issue an interim order that suspends any obligation that may exist for Kennebec to provide LNP until six months after entry of a final order herein; (2) issue a final order that grants a permanent suspension for Kennebec's obligation to implement LNP until conditions are met as described herein; and (3) grant Kennebec such other and further relief that may be proper."

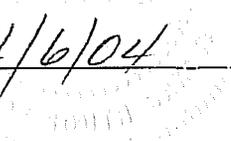

On February 19, 2004, the Commission electronically transmitted notice of the filing and the intervention deadline of March 5, 2004, to interested individuals and entities. WWC License LLC d/b/a CellularOne (Western Wireless) filed to intervene on March 4, 2004. The South Dakota Telecommunications Association (SDTA) filed to intervene on March 5, 2004.

The Commission has jurisdiction in this matter pursuant to SDCL Chapters 1-26 and 49-31 and ARSD 20:10:01:15.05.

At a regularly scheduled meeting of March 23, 2004, the Commission found that the Petitions to Intervene were timely filed and demonstrated good cause to grant intervention. It is therefore

ORDERED, that the Petitions to Intervene of Western Wireless and SDTA are hereby granted.

Dated at Pierre, South Dakota, this 5<sup>th</sup> day of April, 2004.

RE: Petition of Kennebec Telephone Company for Suspension of Intermodal Local Number Portability Obligations TC04-025  
Petition of Santel Comm. Cooperative, Inc. for Suspension of Intermodal Local Number Portability Obligations TC04-038

Dear Ms. Bonrud:

It is my understanding that the above matters were noticed on the Addendum sent out Friday for the Commission meeting of tomorrow so there could be discussion on what standard may be imposed in determining whether interim suspension would be granted. This letter is an attempt to provide a quick summary of the position WWC License LLC (Western Wireless) contends would be the appropriate standard. I apologize for the lateness of this letter, but, as you are aware, the addendum was only sent out Friday morning and I became aware of the issue when talking to John Smith in a telephone conversation at about noon on Friday. To make forwarding this filing easier, I have also emailed it to you.

Neither federal law nor South Dakota law definitively establishes the standards that apply to a rural carrier's petition for interim suspension of Local Number Portability under SDCL §49-31-80 or 47 U.S.C. 251(f). The body of law that most closely resembles a request for interim relief is that law surrounding injunctive relief. The South Dakota Supreme Court has adopted standards for injunctive relief hearings. Dacy v. Gors, 471 NW2d 576, 579 (S.D. 1991). Under this line of authority, the following standards apply to requests for interim relief from statutory obligations pending a full hearing on the merits.

1. Threat of irreparable harm to the movant;
2. The state of the balance between the time and the injury that granting the injunction will inflict on other parties;
3. The probability that movant will succeed on the merits; and
4. The public interest.

GUNDERSON, PALMER, GOODSSELL & NELSON, LLP

Pam Bonrud  
April 5, 2004  
Page 2

Id.

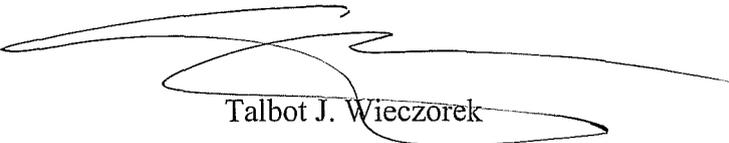

In such proceedings, evidence is required and generally some type of hearing is held. Western Wireless would not see this hearing as being a full hearing on all issues, but simply a hearing where the movants, in this case, Santel and Kennebec, would have to make an evidentiary showing regarding the four factors set forth above.

Although the FCC has not set forth any specific standards with respect to these hearings, a review of the FCC standards with respect to petitions for stays confirms the fact that the FCC adopts a very similar standard as the South Dakota Supreme Court has adopted with respect to preliminary injunctions. See In the Matter of Telephone Number Portability, United States Telecom Association and CenturyTel of Colorado, Inc., Joint Petition for Stay Pending Judicial Review, CC Docket No. 95-116 (Nov. 20, 2003). Moreover, while federal law did not set forth what standard should be applied in granting interim relief, it cannot be disputed that the burden of proof for any relief under 47 U.S.C. 251(f) falls upon the rural telephone companies seeking such relief. 47 C.F.R. § 51.405(a).

The burden to show that interim relief should be granted must fall on the rural telephone companies seeking that relief. The preliminary injunction case law in South Dakota and similar case law in federal agency decisions provides a readily available framework to make a determination of whether interim relief should be granted pending a full hearing on all issues. Because of this, Western Wireless believes this standard should be used in determining whether the interim relief requested by Santel Communications and Kennebec Telephone should be granted.

Please contact me if you have any additional questions.

Sincerely,

Talbot J. Wiczorek

**BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA**

<b>IN THE MATTER OF THE PETITION OF</b>	)	<b>ORDER GRANTING INTERIM</b>
<b>KENNEBEC TELEPHONE COMPANY FOR</b>	)	<b>SUSPENSION PENDING</b>
<b>SUSPENSION OR MODIFICATION OF 47</b>	)	<b>FINAL DECISION</b>
<b>U.S.C. § 251(B)(2) OF THE COMMUNICATIONS</b>	)	
<b>ACT OF 1934 AS AMENDED</b>	)	<b>TC04-025</b>

On February 12, 2004, Kennebec Telephone Company (Kennebec) filed a petition seeking suspension or modification of its requirement to implement local number portability (LNP) pursuant to Section 251(b)(2) of the Telecommunications Act of 1996. According to Kennebec, it has received requests to deploy LNP from Cellco Partnership d/b/a Verizon Wireless and from Western Wireless Corporation d/b/a CellularOne. Kennebec states that it is a small telephone company that serves less than two percent of the nation's subscriber lines installed in the aggregate nationwide, therefore under Section 251(f)(2) Kennebec may petition the Commission for suspension or modification of its obligation to implement LNP within six months of a request to deploy LNP. Kennebec "requests the Commission to (1) issue an interim order that suspends any obligation that may exist for Kennebec to provide LNP until six months after entry of a final order herein; (2) issue a final order that grants a permanent suspension for Kennebec's obligation to implement LNP until conditions are met as described herein; and (3) grant Kennebec such other and further relief that may be proper."

On February 19, 2004, the Commission electronically transmitted notice of the filing and the intervention deadline of March 5, 2004, to interested individuals and entities. WWC License LLC d/b/a CellularOne (Western Wireless) filed to intervene on March 4, 2004, and the South Dakota Telecommunications Association (SDTA) filed to intervene on March 5, 2004. At a regularly scheduled meeting of March 23, 2004, the Commission granted intervention to Western Wireless and SDTA.

The Commission has jurisdiction in this matter pursuant to SDCL Chapters 1-26 and 49-31.

At a regularly scheduled meeting of April 6, 2004, the Commission heard arguments from Kennebec, Western Wireless and SDTA regarding Kennebec's request for an order granting interim suspension. Pursuant to 47 U.S.C. Section 251(f)(2) of the Telecommunications Act of 1996 and SDCL 49-31-80, the Commission voted to grant the request for an interim suspension order pending final decision. It is therefore

**ORDERED**, that the request for an interim suspension order pending final decision is hereby granted.

Dated at Pierre, South Dakota, this 19<sup>th</sup> day of April, 2004.

**CERTIFICATE OF SERVICE**

The undersigned hereby certifies that this document has been served today upon all parties of record in this docket, as listed on the docket service list, by facsimile or by first class mail, in properly addressed envelopes, with charges prepaid thereon.

**BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA**

<b>IN THE MATTER OF THE PETITION OF</b>	<b>)</b>	<b>ORDER FOR AND NOTICE</b>
<b>KENNEBEC TELEPHONE COMPANY FOR</b>	<b>)</b>	<b>OF PROCEDURAL</b>
<b>SUSPENSION OR MODIFICATION OF 47</b>	<b>)</b>	<b>SCHEDULE AND HEARING</b>
<b>U.S.C. § 251(B)(2) OF THE COMMUNICATIONS</b>	<b>)</b>	<b>AND OF INTENT TO TAKE</b>
<b>ACT OF 1934 AS AMENDED</b>	<b>)</b>	<b>JUDICIAL NOTICE</b>
	<b>)</b>	<b>TC04-025</b>

On February 12, 2004, Kennebec Telephone Company (Kennebec or Petitioner) filed a petition pursuant to 47 U.S.C. Section 251(f)(2) and SDCL 49-31-80 seeking suspension or modification of its requirement to implement local number portability (LNP) pursuant to Section 251(b)(2) of the Telecommunications Act of 1996. The petition requests the Commission to (1) issue a final order that grants a permanent suspension for Kennebec's obligation to implement LNP until conditions are met as described in the petition; and (2) grant Kennebec such other and further relief that may be proper. On April 5, 2004, the Commission issued an order granting intervention to WWC License LLC d/b/a CellularOne and the South Dakota Telecommunications Association. On April 19, 2004, the Commission issued an order granting Kennebec's request for interim suspension of its obligation to implement LNP pending final decision pursuant to 47 U.S.C. Section 251(f)(2) of the Telecommunications Act of 1996 and SDCL 49-31-80.

The Commission has jurisdiction in this matter pursuant to SDCL 49-31-80, Section 251(f)(2) of the Telecommunications Act of 1996, 47 U.S.C. Section 251(f)(2), and ARSD 20:10:32:39.

**Procedural Schedule**

The due dates for pre-filing of testimony are as follows (all dates 2004):

May 14	Petitioner's direct testimony and exhibits
May 28	Intervenors' and Staff's reply testimony and exhibits
June 14	Petitioner's rebuttal testimony and exhibits

The schedule for discovery is as follows (all dates 2004):

April 28	General interrogatories, document requests and other general discovery requests by all parties
May 11	Responses to general discovery requests by all parties
May 18	Supplemental discovery requests by intervenors and Staff following Petitioner's pre-filed testimony
May 24	Petitioner's responses to supplemental discovery requests
June 3	Supplemental discovery requests by Petitioner following intervenors' and Staff's pre-filed testimony

June 10           Intervenors' and Staff's responses to Petitioner's supplemental discovery requests

**Judicial Notice**

The Commission hereby gives notice pursuant to SDCL 1-26-19(3) that it intends to take judicial notice of the fact that Petitioner is a local exchange carrier with fewer than 2 percent of the Nation's subscriber lines installed in the aggregate nationwide. Any party objecting to this taking of judicial notice shall serve notice of such objection on the Commission and the parties prior to the hearing.

**Notice of Hearing**

A hearing will be held beginning at 10:00 A.M. on June 21, 2004, and continuing at 9:00 A.M. on June 22 - 25 and on June 28 - July 2, 2004, in the Second Floor Conference Room of the Soldiers and Sailors War Memorial Building (across Capitol Avenue from the Capitol Building), Pierre, South Dakota, on this matter and the other pending dockets in which the petitioners have requested suspensions of LNP requirements. To the extent that the issues and the witnesses and documentary evidence are materially identical in more than one LNP suspension docket, the parties are encouraged to present such common evidence in a consolidated manner that will minimize repetition and opposing parties are encouraged to reasonably stipulate to such consolidated presentation of evidence. The hearing will commence on June 21, with consideration of Midcontinent Communications' Motion to Compel, Docket No. TC03-192. Following the hearing on this related docket, the remaining dockets will be heard in docket number order except to the extent that the parties otherwise agree or the Commission shall otherwise order, either prior to or during the hearing. Petition of Santel Communications Cooperative, Inc., Docket No. TC04-038, will be heard on July 1, 2004.

As provided in SDCL 49-31-80 and 47 U.S.C. Section 251(f)(2), the issues at the hearing will be:

- (i) whether and the extent to which the suspension of LNP requirements requested by Petitioner
  - (a) is necessary:
    - (1) To avoid a significant adverse economic impact on users of telecommunications services generally;
    - (2) To avoid imposing a requirement that is unduly economically burdensome; or
    - (3) To avoid imposing a requirement that is technically infeasible; and
  - (b) is consistent with the public interest, convenience, and necessity;
- (ii) if a suspension is found to be justified, what the duration of the suspension should be; and
- (iii) whether any other relief should be granted.

The hearing will be an adversary proceeding conducted pursuant to SDCL Chapter 1-26. All parties have the right to be present and to be represented by an attorney. These rights and other due process rights will be forfeited if not exercised at the hearing. If a party or its representative fails to appear at the time and place set for the hearing, the Final Decision may be based solely on the testimony and evidence provided, if any, during the hearing or a Final Decision may be issued by default pursuant to SDCL 1-26-20. After the hearing, the Commission will consider all evidence and testimony that was presented at the hearing. The Commission will then enter Findings of Fact, Conclusions of Law, and a Final Decision. As a result of the hearing, the Commission may either grant or deny the request of Petitioner to suspend the requirement of 47 U.S.C Section 251(b)(2) that it provide local number portability to requesting carriers and, if so, for what duration and subject to what conditions. The Commission's Final Decision may be appealed to the state Circuit Court and the state Supreme Court as provided by law. It is therefore

ORDERED, that the parties shall comply with the procedural schedule and discovery schedule set forth above; and it is

FURTHER ORDERED, that a hearing shall be held at the time and place specified above on the issue of whether Petitioner's request to suspend its local number portability obligations under 47 U.S.C Section 251(b)(2) should be granted and, if so, for what duration and whether other relief should be granted.

Pursuant to the Americans with Disabilities Act, this hearing is being held in a physically accessible location. Please contact the Public Utilities Commission at 1-800-332-1782 at least 48 hours prior to the hearing if you have special needs so arrangements can be made to accommodate you.

Dated at Pierre, South Dakota, this 4th day of May, 2004.

<b>CERTIFICATE OF SERVICE</b>
The undersigned hereby certifies that this document has been served today upon all parties of record in this docket, as listed on the docket service list, by facsimile or by first class mail, in properly addressed envelopes, with charges prepaid thereon.

RECEIVED

MAY 14 2004

SOUTH DAKOTA PUBLIC  
UTILITIES COMMISSION

May 14, 2004

Ms. Pamela Bonrud, Executive Director  
South Dakota Public Utilities Commission  
500 East Capitol Ave.  
State Capitol Building  
Pierre, SD 57501

RE: Petitions for Suspension and/or Modification of LNP, Dockets TC04-025, 038, 044, 045, 046, 047, 048, 049, 050, 051, 052, 053, 054, 055, 056, 060, 061, 062, 077, 084, and TC04-085.

Dear Ms. Bonrud:

Enclosed you will find for filing in the above referenced Dockets, the prefiled Direct Testimony of witness Steven E. Watkins. This testimony is filed on behalf of SDTA and also is filed on behalf of each of the below listed rural local exchange carriers, as part of their prefiled testimony.

- TC04-025 – Kennebec Telephone Company
- TC04-038 – Santel Communications Cooperative
- TC04-044 – Sioux Valley Telephone Company
- TC04-045 – Golden West Telecommunications Cooperative  
Vivian Telephone Company  
Kadoka Telephone Company
- TC04-046 - Armour Independent Telephone Company  
Bridgewater-Canistota Independent Telephone Company  
Union Telephone Company
- TC04-047 - Brookings Municipal Utilities d/b/a Swiftel Communications
- TC04-048 - Beresford Municipal Telephone Company
- TC04-049 - McCook Cooperative Telephone Company
- TC04-050 - Valley Telecommunications Cooperative Association, Inc.
- TC04-051 - City of Faith Telephone Company
- TC04-052 - Midstate Communications Inc.
- TC04-053 - Western Telephone Company
- TC04-054 - Interstate Telecommunications Cooperative
- TC04-055 - Alliance Communications Cooperative, Inc.  
Splitrock Properties, Inc.

- TC04-056 - RC Communications, Inc.  
Roberts County Telephone Cooperative Association
- TC04-060 - Venture Communications Cooperative
- TC04-061 - West River Cooperative Telephone Company
- TC04-062 - Stockholm-Strandburg Telephone Company
- TC04-077 - James Valley Cooperative Telephone Company
- TC04-084 - Tri-County Telcom, Inc.
- TC04-085 - Cheyenne River Sioux Tribe Telephone Authority

You will also find enclosed a certificate of service verifying service of this document, by USPS, on counsel for the other intervening parties.

Thank you for your assistance in filing and distributing these documents.

Sincerely,

A handwritten signature in black ink, appearing to read "R. D. Coit". The signature is fluid and cursive, with the first name "Richard" and last name "Coit" clearly distinguishable.

Richard D. Coit  
Executive Director and General Counsel  
SDTA

**DIRECT TESTIMONY OF**

**STEVEN E. WATKINS**

**Submitted on behalf of above Rural Local Exchange Carriers and  
the South Dakota Telecommunications Association (May 14, 2004)**

1 **I. INTRODUCTION**

2 **Q1: Please state your name, business address and telephone number.**

3 **A:** My name is Steven E. Watkins. My business address is 2120 L Street, N.W.,  
4 Suite 520, Washington, D.C., 20037. My business phone number is (202) 296-9054.

5 **Q2: What is your current position?**

6 **A:** I am Special Telecommunications Management Consultant to the Washington, D.  
7 C. law firm of Kraskin, Moorman & Cosson, LLC, which provides legal and consulting  
8 services to telecommunications companies.

9 **Q3: What are your duties and responsibilities at Kraskin, Moorman & Cosson, LLC?**

10 **A:** I provide telecommunications management consulting services and regulatory  
11 assistance to smaller local exchange carriers ("LECs") and other smaller firms providing  
12 telecommunications and related services in more rural areas. My work involves assisting  
13 client LECs and related entities in their analysis of regulatory requirements and industry  
14 matters requiring specialty expertise; negotiating, arranging and administering connecting  
15 carrier arrangements; and more recently assisting clients in complying with the rules and  
16 regulations arising from the passage of the Telecommunications Act of 1996 (the "Act").  
17 On behalf of over one hundred and fifty (150) other smaller independent local exchange  
18 carriers, I am involved in regulatory proceedings in several other states examining a large  
19 number of issues with respect to the manner in which the Act should be implemented in  
20 those states. Prior to joining Kraskin, Moorman & Cosson, I was the senior policy  
21 analyst for the National Telephone Cooperative Association ("NTCA"), a trade  
22 association whose membership consists of approximately 500 small and rural telephone

1 companies. While with NTCA, I was responsible for evaluating the then proposed  
2 Telecommunications Act, the implementation of the Act by the Federal Communications  
3 Commission (“FCC”) and was largely involved in the association's efforts with respect to  
4 the advocacy of provisions addressing the issues specifically related to rural companies  
5 and their customers.

6 **Q4: Have you prepared and attached further information regarding your background**  
7 **and experience?**

8 **A:** Yes, this information is included in Attachment A following my testimony.

9 **Q5: What is Local Number Portability?**

10 **A:** Local Number Portability (“LNP”) is defined in Section 153 of the Act as:

11  
12 The term “number portability” means the ability of users of telecommunications  
13 services to retain, at the same location, existing telecommunications numbers  
14 without impairment of quality, reliability, or convenience when switching from  
15 one telecommunications carrier to another.

16  
17 This type of number portability is referred to as “Service Provider Portability.”

18 **Q6: What is meant by intermodal porting?**

19 **A:** The term is meant to signify LNP where the number is ported from its prior use by  
20 a wireline telephone company in the provision of “plain old telephone service” (“POTS”)  
21 at a fixed location within a specific geographic area to use by a mobile customer of a  
22 wireless carrier in the provision of mobile service, and vice versa.

23 **Q7: What is meant by intramodal porting?**

1   **A:**           This term means LNP where a number is ported from wireline carrier to another,  
2           or where a number is ported from one wireless carrier to another, but not when a number  
3           is ported between two different types of carriers; *i.e.* wireline or wireless.

4   **Q8: Is number porting a “function” or a “service?”**

5   **A:**           It relates to a functional capability of a carrier. It is the capability of a carrier to  
6           identify the carrier that is providing service to an end user with a specific number. When  
7           calls are placed to numbers that may have been ported (*i.e.*, the numbers may be used by  
8           more than one service provider to provide service to end users), number portability is the  
9           function of querying a database to determine the identity of the carrier that is serving the  
10          end user using the specific number in question. Once the identity of the carrier is  
11          determined using number portability hardware and software, a carrier must also determine  
12          how a call may and will be switched, routed, and completed. Therefore, number  
13          portability involves multiple functions – the identification of which carrier is serving the  
14          end user being called and the completion of the call.

15  
16   **II.   PURPOSE OF THIS TESTIMONY**

17   **Q9: On whose behalf are you testifying?**

18   **A:**           I am testifying on behalf of the rural local exchange carriers that are the  
19          petitioning parties in dockets captioned above (to be referred to as the “Petitioners”) and  
20          the South Dakota Telecommunications Association.

21   **Q10: What is the purpose of your testimony?**

22   **A:**           My testimony addresses whether grant of the Petitions filed by the Petitioners  
23          seeking suspension of LNP requirements pursuant to Section 251(f)(2) of the

1 Communications Act of 1934, as amended (“Act”) is in the public interest and consistent  
2 with the criteria regarding economic burdens and feasibility.

3 Consistent with 47 U.S.C. § 251(f)(2)(A)(I), grant of the petitions is necessary to  
4 avoid a significant adverse economic impact on the end users of the Petitioners. As will  
5 be demonstrated, the cost to implement LNP in the rural exchanges of the Petitioners is  
6 significant and would lead to explicit surcharges and other potential rate increases to the  
7 rural users beyond that which would be balanced with any benefit to be derived by the  
8 small number, if any, of users that may actually seek to port their wireline service  
9 telephone numbers. Accordingly, suspension of the LNP requirements would avoid these  
10 burdens consistent with the public interest, convenience, and necessity. *See* 47 U.S.C. §  
11 251(f)(2)(B).

12 Consistent with 47 U.S.C. §§ 251(f)(2)(A)(ii) and (iii) of the Act, grant of the  
13 suspensions is also necessary to avoid the imposition of undue economic burdens and  
14 technically infeasible requirements on the petitioners. My testimony provides  
15 background information that sets forth the sequence of events and unresolved issues at  
16 the FCC regarding LNP. Given the specific network and operational characteristics of the  
17 Petitioners, the LNP requirement, if not suspended, would subject the Petitioners to  
18 adverse economic conditions, unnecessary economic burdens and harm, and potentially  
19 technically infeasible requirements. Accordingly, suspension of the LNP requirements  
20 would be consistent with the public interest, convenience, and necessity in that it would  
21 avoid unnecessary attempts to deploy LNP under conditions that would subject the  
22 Petitioners to undue economic burdens and uncertain and infeasible requirements. *See* 47  
23 U.S.C. § 251(f)(2)(B).

1           Therefore, the interests of all parties, including the Petitioners, their customers,  
2           and policymakers, would be better served by the grant of the suspension requests until  
3           such time as there is a balanced policy result consistent with the public interest. Under  
4           current conditions, there would be no such policy balance between the substantial costs  
5           that would be imposed on the public and the potential benefits of LNP in the rural areas  
6           of South Dakota. Suspension of the LNP requirements is also consistent with sound  
7           public policy because it would assure that the public interest would be examined properly  
8           only after all of the relevant implementation issues have been resolved.

9  
10   **III.   RELIEF REQUESTED**

11   **Q11:  What relief is appropriate for the Petitioners?**

12   **A:**           The Commission should extend the current interim suspension of the LNP  
13           requirements for the Petitioners until the conditions confronting the Petitioners, as  
14           explained in this Testimony, have changed such that the per-line cost of LNP is more  
15           reasonable compared to whatever demand, if any, may exist.  These factors should be  
16           reviewed in light of the criteria set forth in Section 251(b)(2) of the Act.

17           In any event, any consideration under the criteria of Section 251(b)(2) cannot  
18           occur until after the issues pending before the Courts and the FCC related to the apparent  
19           directives contained in the FCC’s November 10, 2003 Order on LNP (“*Nov. 10 Order*”)  
20           are fully resolved, including any further and final disposition of the remaining rulemaking  
21           issues and the resolution of the routing issues that the FCC explicitly has left to be  
22           resolved later.

23           Regardless of any future consideration, the Petitioners would need sufficient time

1 after the issues are resolved and circumstances may have changed to acquire and install  
2 the necessary hardware and software and to implement the necessary administrative  
3 processes and business relationships that would be necessary to commence LNP.

4 This relief would avoid the potential waste of resources in an attempt to  
5 implement what are currently a confusing, incomplete and inconsistent set of apparent  
6 requirements that cannot be implemented in any rational manner given the status of the  
7 Petitioners' and the wireless carriers' networks. Without suspension, the Petitioners  
8 would find themselves in the untenable position of attempting to implement some  
9 uncertain service and porting method that may require them to incur costs that may go  
10 unrecovered and may subject their subscribers to much higher basic rates. Moreover, as  
11 explained in this testimony, without suspension, customers may receive bills for calls that  
12 they do not expect; some calls may not be completed to their final destination; and there  
13 will be ensuing customer confusion.

1 **IV. BALANCING COSTS AND POTENTIAL BENEFITS WITH THE PUBLIC**  
2 **INTEREST**

3 **Q12: What should the “public interest” determination entail?**

4 **A:** The determination of the “public interest” should involve an evaluation of the  
5 costs of LNP implementation and operation compared to the benefits that LNP  
6 implementation would present for consumers.

7

8 **A. THE COSTS OF LNP ARE SUBSTANTIAL.**

9 **Q13: Are the costs of LNP significant?**

10 **A:** Yes. There are significant costs associated with implementing LNP including the  
11 cost of upgrading switches, accessing the various LNP databases, modifying company  
12 processes and training company employees.

13 **Q14: Who would bear the cost of implementing LNP if the Petitioners were required to**  
14 **do so?**

15 **A:** The subscribers of the Petitioners will bear the costs of LNP either through an  
16 FCC allowed LNP surcharge or through general increases in basic rates. Petitioners may  
17 also be forced to bear some of the cost of implementing LNP to the extent that such cost  
18 may not be recovered from subscribers or other carriers.

19 **Q15: But, did not the FCC establish a cost recovery mechanism for the Petitioners?**

20 **A:** Yes, but that does not address the surcharge and cost recovery burden that would  
21 be placed on the rural users and does not address whether that result would be consistent  
22 with the public interest. These charges would be assessed to all of the Petitioners’ end

1 users regardless of whether any of these end users desire to port numbers to wireless  
2 carriers. The testimony and data provided in this proceeding regarding costs and the  
3 resulting rate implications supports the conclusion that the subscribers of the rural  
4 Petitioners would be shouldering significant rate increases to recover these costs,  
5 regardless of whether any or just a few customers actually port their numbers. This cost  
6 recovery burden would not be balanced with any possible public interest objective given  
7 the lack of demand for LNP and the surcharges that would be imposed to recover the  
8 substantial costs of LNP implementation.

9 **Q16: Are the surcharges and potential basic rate increases to recover the costs of LNP**  
10 **consistent with cost causer principles?**

11 **A:** No. There is an extreme irony here. The very few customers that may want to  
12 port their wireline number from Petitioners to another carrier's service, such as a wireless  
13 carrier's service, will no longer be customers of the Petitioners. The vast majority of  
14 Petitioners' end users that remain will shoulder the charges and costs to the benefit of  
15 only a handful of users that are no longer customers of the LEC. The vast majority of  
16 customers that do not want to port will be forced to foot the bill for the very few that do.

17 **Q17: Will the Petitioners be able to add new customers by porting wireless carriers'**  
18 **customers to the Petitioners' service?**

19 **A:** For the most part, no. The manner in which the FCC put in place intermodal  
20 porting, inconsistent with the reports from the industry workgroup that had been charged  
21 with examining the intermodal issues, means that there is an extreme disparity between  
22 wireline-to-wireless opportunities to port versus wireless-to-wireline. Therefore, for the  
23 most part, Petitioners will be able to lose customers if LNP is implemented, but will not

1 be able to get others back. The necessary methods and rules to allow wireless-to-wireline  
2 porting that would be competitively fair are the subject of a further rulemaking  
3 proceeding before the FCC with no apparent resolution of the geographic disparity issues  
4 that are at the root of the issues. See *Nov. 10 Order* at para. 41-44. In the meantime, a  
5 competitively unfair version of intermodal LNP is in place.

6  
7 **B. THERE IS A LACK OF DEMAND FOR PORTING.**

8 **Q18: Will consumers benefit from the implementation of LNP by Petitioners?**

9 **A:** Central to the evaluation of whether consumers will benefit from the  
10 implementation of LNP is the level of demand that exists for LNP in Petitioners' service  
11 areas. It is my understanding that the Petitioners have not received any inquiries or  
12 requests for LNP. In addition with respect to intermodal portability, in those areas where  
13 intermodal LNP has already been implemented, there appears to be very little demand  
14 from wireline customers to port their numbers to wireless carriers. Rather, the vast  
15 majority of wireless ports appear to be from one wireless carrier to another.

16 **Q19: Does the experience thus far with intermodal LNP have any bearing on the public  
17 interest evaluation?**

18 **A:** Yes. Based on readily available information, the demand for wireline-to-wireless  
19 porting for the non-rural, large local exchange carriers has been small. For example,  
20 according to a March 30, 2004 Press Release from the FCC, for the period between  
21 November 24, 2003 and March 25, 2004, there were 6,640 informal complaints received  
22 regarding wireless LNP. The FCC notes that "most of the complaints concern alleged  
23 delays in porting numbers from one wireless carrier to another" and that a "much smaller

1 number of complaints, estimated at just under ten percent of the total, involve alleged  
2 delays in porting numbers from wireline carriers to wireless carriers.” In any event, the  
3 small relative percentage of complaints is likely due to the small number of wireline-to-  
4 wireless ports. Neustar reports that 95% of wireless ports have been from one wireless  
5 carrier to another and only 5% of wireless ports were between wireline and wireless  
6 carriers. *See Communications Daily, NARUC Notebook, Vol. 24, No. 46, March 9, 2004*  
7 at p. 4.

8 Further, I can also report that the February 9, 2004 online edition of *RCR Wireless*  
9 *News* indicated that there had not been much demand for wireline-to-wireless porting as  
10 may have been initially anticipated. The online publication referenced a consumer survey  
11 report compiled by CFM Direct that found that very few telecommunications customers  
12 have switched their wireline phone numbers to wireless. The article quoted Barry  
13 Barnett, executive vice president of CFM Direct, as stating: “Phone portability should  
14 have enticed more landline users to switch to wireless, and although the data we have  
15 doesn’t look at pre-teens, the owners of landline phones are primarily adults. We don’t  
16 see adults making the shift.”

17 While these anecdotes are representative of the experience in the more urban, top  
18 100 MSAs, I would expect the interest in rural areas to be even less. Wireless service is  
19 less ubiquitous in rural areas, and landline users would be more reluctant to abandon  
20 dependable wireline service for a wireless service of less certainty. Generally, for  
21 obvious reasons, users do not abandon their wireline service, in any event, upon their first  
22 use of wireless service in rural areas.

23 Therefore, as a result of the very limited perceived demand for intermodal LNP

1 experienced to date, the significant and higher costs for the smaller carriers, let alone the  
2 technical and operational hurdles and unresolved issues, requiring the Petitioners to rush  
3 to support LNP for intermodal purposes at this point lacks a balanced public interest  
4 benefit. The public interest demands a balanced and thoughtful approach here, which the  
5 grant of the suspension request will allow.

6 **Q20: Can you explain why there is relatively little demand for intermodal LNP?**

7 **A:** Yes. In my opinion, the nature of wireless service in the rural areas of  
8 states like South Dakota is such that the public does not recognize wireless service as an  
9 absolute substitute for wireline service. The quality of service, dependability, and service  
10 record of wireline service makes it the reliable source that rural customers want and  
11 depend on as their fundamental service. On the other hand, as I expect the Commission is  
12 aware from its own experience here in South Dakota, wireless service is not as  
13 ubiquitous, lacks predictable capacity and quality of service, has a lower probability of  
14 call completion, and suffers from dropped calls. All of these factors mean that rural users  
15 who must depend on quality, reliable service due to their remote locations are not going  
16 to abandon their wireline service and convert to mobile service for actual use in their rural  
17 communities. Their demand for wireless service is more for its mobile capability, and  
18 this mobile capability is in addition to their fundamental need for a reliable wireline  
19 phone. For these reasons, mobile wireless service is a complementary service, not a  
20 replacement.

21 Therefore, while some customers may try wireless service, decide that it is  
22 dependable enough, and subsequently drop their wireline service, they do not do so in a  
23 single step, and do not do so with the need to port numbers. In other words, where a

1 customer drops wireline service, it does so without the need to port a number. More  
2 likely, the number of wireline subscribers that will drop wireline service in rural areas and  
3 replace it solely with wireless service would be expected to be very small.

4 My conclusions about lack of demand for wireline-wireless LNP are consistent  
5 with the FCC's own analysis and statements. In July 2003, the FCC concluded that even  
6 though there continues to be increased interest in wireless service:

7  
8 only a small percent of wireless customers use their wireless phones as their only  
9 phone, and that relatively few wireless customers have "cut the cord" in the sense  
10 of canceling their subscription to wireline telephone service.

11  
12 *Eighth Report, In the Matter of Implementation of Section 6002(b) of the Omnibus*  
13 *Budget Reconciliation Act of 1993 Annual Report and Analysis of Competitive Market*  
14 *Conditions With Respect to Commercial Mobile Services, released July 14, 2003, at para.*  
15 *102.*

16 Moreover, the FCC concluded in August 2003 that:

17  
18 . . . despite evidence demonstrating that narrowband local services are widely  
19 available through [Commercial Mobile Radio Service or "CMRS"] providers,  
20 wireless is not yet a suitable substitute for local circuit switching. In particular,  
21 only about three to five percent of CMRS subscribers use their service as a  
22 replacement for primary fixed voice wireline service . . . . Lastly, the record  
23 demonstrates that wireless CMRS connections in general do not yet equal

1 traditional landline facilities in their quality and their ability to handle data traffic.

6 *Telecommunications Act of 1996; and Deployment of Wireline Service Offering*  
7 *Advanced Telecommunications Capability, CC Docket Nos. 01-338, 96-98, and 98-147,*  
8 *FCC 03-36, released August 21, 2003, at para. 445.*

9 Finally, consistent with these FCC findings, a 2004 Policy Bulletin of the Phoenix  
10 Center for Advanced Legal & Economic Public Policy Studies entitled “Fixed-Mobile  
11 ‘Intermodal’ Competition in Telecommunications: Fact or Fiction?” also comes to the  
12 same conclusions. *See* [www.phoenix-center.org/PolicyBulletin/PCPB10Final.doc](http://www.phoenix-center.org/PolicyBulletin/PCPB10Final.doc). While  
13 the fundamental discussion in the Policy Bulletin is related to the extent of competition  
14 with Bell Operating Companies, the bulletin concludes at p. 1 that wireline and wireless  
15 telephone services are not “close enough substitutes to be effective intermodal  
16 competitors” and at p. 2 that “even though there may be exceptions, consumers generally  
17 do not consider the two services as sufficiently good substitutes . . . .”

18 For all of these reasons, the complementary nature of wireless service means that  
19 very few, if any, wireline customers will want to take the single step, at the same time, of  
20 abandoning wireline service, porting their number to wireless, and take a chance that they  
21 will depend on wireless service. Accordingly, it is not in the public interest for society,  
22 and particularly the rural subscribers of the Petitioners, to incur the cost of implementing  
23 LNP and to divert the limited resources of the Petitioners which are already challenged by

1 their service to sparsely populated areas and relatively lower income customers, for such  
2 small, if any, demand and such a speculative and abstract objective.

3 **Q21: Do the benefits of LNP justify the cost in the cases before the Commission?**

4 **A:** No. Because the facts show that there is little or no demand for LNP, the  
5 significant costs of LNP cannot be justified.

6  
7 **V. OTHER UNRESOLVED IMPLEMENTATION ISSUES RELATED TO THE**  
8 **PUBLIC INTEREST EVALUATION.**

9 **Q22: Are there additional reasons why LNP is not in the public interest?**

10 **A:** Yes. There are other unresolved issues associated with the ultimate routing of  
11 calls to telephone numbers ported to wireless carriers that are relevant to the evaluation  
12 here. Moreover, in the *Nov. 10 Order*, the FCC asked for further comment on whether  
13 the porting interval should be reduced and on how to implement wireless to wireline  
14 LNP. The resolution of these issues is unknown, the manner in which each will be  
15 resolved will further affect the Petitioners and their end users and could require  
16 Petitioners to incur additional costs in connection with LNP. Accordingly, the resolution  
17 of these issues could further impact the LNP cost/benefit analysis.

18 **Q23: Did the FCC's *Nov. 10 Order* on intermodal number portability reconcile the facts of**  
19 **rural LECs with the requirement to provide intermodal LNP when there is no**  
20 **service arrangement with the wireless carrier "in the same location?"**

21 **A:** No. The FCC's *Nov. 10 Order* is, at best, incomplete in that it fails to address  
22 with clarity and completeness the fact that there may be no wireless carrier arrangements

1 in place “at the same location” (which is the situation confronting most of the  
2 Petitioners), the obvious “location portability” aspect of mobile service, or the remaining  
3 rate center disparity issues articulated by the industry workgroup discussed below. Many  
4 of the FCC’s statements in its recent orders on number portability with respect to service  
5 locations of wireline LECs, rate center areas, the geographic scope of the operations and  
6 service offerings of wireless carriers, and mobile users are inexplicably inconsistent with  
7 the facts confronting the Petitioners, previous FCC conclusions, and existing regulation.

8  
9 **A. ROUTING ISSUES**

10 **Q24: Do the unresolved and uncertain aspects of the intermodal number portability**  
11 **requirements cause real world implementation consequences for the Petitioners?**

12 **A:** Yes. The *Nov. 10 Order* does not automatically create service arrangements  
13 between the Petitioners and the wireless carriers. The *Nov. 10 Order* does not clearly  
14 answer questions about the manner in which calls to ported numbers of mobile users will  
15 be treated from a service definition basis, how such calls will be transported to locations  
16 beyond the LECs’ service territories, and over what facilities these calls will be routed.

17 **Q25: What are the so-called “routing” issues?**

18 **A:** Foremost, the wireless carrier to which the number may be ported may not have  
19 any existing service arrangements with the wireline LEC in the specific geographic area  
20 where the wireline LEC provides service using that number (*i.e.*, in the geographic area  
21 that constitutes “the same location”). Accordingly, even if the carriers knew that the  
22 number had been ported to a wireless or wireline carrier providing service in another  
23 location, there would not be any trunking arrangement in place (other than handing off

1 the calls to interexchange carriers) to complete the call. No LEC, including the  
2 Petitioners, has network arrangements for the delivery of local exchange service calls to,  
3 and the exchange of telecommunications with, carriers that operate at distant locations  
4 beyond the LEC's actual service area in which local exchange service calls originate, and  
5 there is no requirement for LECs to establish such extraordinary arrangements. LECs  
6 have no obligation to provide at the request of a wireless carrier, at additional cost and  
7 expense to the LEC, some extraordinary form of local exchange service calling beyond  
8 that which the LEC provides for any other local exchange service call.

9 **Q26: Would you provide an explanation of some of the uncertain aspects of the FCC's**  
10 ***Nov. 10 Order* with respect to so-called "routing" issues?**

11 **A:** The *Nov. 10 Order* neglects to address specific operational and network  
12 characteristics of the smaller LECs such as the Petitioners. In this regard, I note the  
13 statement of the FCC in a subsequent November 20, 2003 Order on number portability  
14 denying a petition challenging the decision:

15  
16 . . . [P]etitioners assert that there is no established method for routing and billing  
17 calls ported outside of the local exchange. We note that today, in the absence of  
18 wireline-to-wireless LNP, calls are routed outside of local exchanges and routed  
19 and billed correctly.

20  
21 What the FCC fails to understand in this statement is that calls routed outside of the  
22 Petitioners' local exchanges are routed to interexchange carriers (IXCs). Therefore, they  
23 are routed and billed correctly as interexchange calls. The Petitioners do not have any

1 obligation to provision local exchange carrier services that involve transport  
2 responsibility or network functions beyond their own networks or beyond their incumbent  
3 LEC service areas. Consequently, if the FCC means to presume that calls outside of the  
4 local exchanges are routed and billed correctly as local calls, the FCC's statement  
5 contained in the second sentence is simply not correct.

6 Furthermore, it is well settled that LECs' interconnection obligations only pertain  
7 to their own networks, not to other carriers' networks or to networks in areas beyond their  
8 own LEC service areas. While the FCC has generally acknowledged a limitation on a  
9 Bell company to route calls no further than to a LATA boundary, the FCC's *Nov. 10*  
10 *Order* apparently failed also to recognize that the Petitioners are physically and  
11 technically limited to transporting traffic to points of interconnection on their existing  
12 network that are no further than their existing service territory boundaries. It is my  
13 understanding that some companies may have extended their access facilities outside their  
14 local networks to provide centralized access services, but these circumstances are  
15 exceptional and, in any event, the LECs are compensated for their provision of access  
16 services to other carriers. For the Petitioners, telecommunications services provided to  
17 end users that involve transport responsibility to interconnection points with other  
18 carriers' networks at points beyond a Petitioner's limited service area and network  
19 generally are provided by IXCs, not by the Petitioner LECs. The involvement of the  
20 Petitioners in such calls is limited to the provision of network functions within their own  
21 networks. As such, for calls destined to points "outside of the local exchange," the IXC  
22 chosen by the end user is responsible for the transport and network functions for the  
23 transmission of the call beyond the Petitioner's network. Accordingly, calls destined to

1 interconnection points beyond the local exchange and service area of a Petitioner are both  
2 “routed” and “rated” by the customer’s chosen IXC.

3 The wireline LEC that may originate calls to a number that has been ported to a  
4 wireless carrier cannot unilaterally provision local calling to this number where there are  
5 no arrangements established with the wireless carrier. Just as the introduction of an EAS  
6 route involves the establishment of interconnection and network and business  
7 arrangements between two carriers, the ability to exchange local exchange service calls  
8 with a wireless carrier also necessitates interconnection and the establishment of the  
9 necessary terms and conditions under which traffic may be exchanged. Interconnection  
10 occurs as the result of a request and the mutual development of terms and conditions  
11 between the carriers for such interconnection. Just as the establishment of an EAS route  
12 does not occur in the absence of negotiation and agreement regarding the network  
13 arrangements and the exchange of traffic, interconnection with a wireless carrier is not a  
14 spontaneous event. The mere deployment of a NPA-NXX, the association of a rate  
15 center point with a specific NPA-NXX, and/or the porting of a wireline telephone number  
16 to a wireless carrier does not automatically establish interconnection or any expectation  
17 that calls can or will be originated as a “local exchange service” call or that calls can be  
18 completed on such basis.

19 **Q27: Do the Petitioners typically have in place direct interconnection arrangements or**  
20 **other service arrangements with all potential wireless carriers that could port**  
21 **numbers?**

22 **A:** No. This is in contrast to Bell companies which typically do have some form of  
23 interconnection and physical trunking arrangements in place with most, if not all, of the

1 wireless carriers that will seek number portability. Quite possibly that would explain  
2 some of the incorrect assumptions which are the apparent basis for some of the FCC's  
3 statements in its *Nov. 10 Order*. These assumptions are apparently the result of assuming  
4 that the experience and operations of the Petitioners are comparable to that of Bell  
5 companies.

6 **Q28: What will be the consequences when a wireline number is ported to a wireless**  
7 **carrier that has no direct interconnection arrangement or other service**  
8 **arrangement in place with the wireline LEC?**

9 **A:** The unresolved issues and the fact that no service arrangement may exist with the  
10 wireless carrier means that there will be carrier and customer confusion. Where there is  
11 no service arrangement between a Petitioner and the wireless carrier to which a number  
12 may have been ported, there will be no trunk over which the LEC could direct local  
13 exchange service calls to the wireless carrier if that is the service that the LEC seeks to  
14 provide to its wireline customers. The Petitioners have only one available option for the  
15 completion of such calls. In such instances, the caller attempting to place a call would  
16 receive a message with the instructions that the call cannot be completed as dialed and  
17 must be completed using an interexchange carrier by dialing 1 plus the 10-digit number.  
18 If the customer dials the ported number in this manner, the LEC would hand such call off  
19 to the interexchange carrier chosen by the originating user, the service is provided by the  
20 interexchange carrier, the routing of the call would be determined by the interexchange  
21 carrier, and the end user would be assessed a toll charge by that interexchange carrier.

22 **Q29: Did the FCC say anything else concerning the routing of calls to wireless carriers in**  
23 **the Nov. 10 Order?**

1    **A:**            Yes. The FCC stated that the routing of calls between wireline and wireless  
2                    carriers did not need to be resolved in the LNP docket and, instead, it would be addressed  
3                    in the context of a Declaratory Ruling request filed by Sprint still pending before the  
4                    FCC.

5  
6                    . . . We make no determination, however, with respect to the routing of ported  
7                    numbers . . . . [T]he rating and routing issues raised by the rural wireline  
8                    carriers have been raised in the context of non-porting numbers and are before the  
9                    [FCC] in other proceedings. Therefore, without prejudging the outcome of any  
10                   other proceeding, we decline to address these issues at this time as they relate to  
11                   intermodal LNP.

12  
13                   *Nov. 10 Order*, para. 40, footnotes omitted.

14  
15                   **B.        OTHER UNRESOLVED AND UNEXPLAINED ISSUES**

16    **Q30: Why is it necessary to discuss the background and sequence of events leading to the**  
17                    **FCC's *Nov. 10 Order*?**

18    **A:**            As I will explain below, the apparent directives in the FCC's *Nov. 10 Order* have  
19                    not been logically explained, are not consistent with the FCC's own conclusions and  
20                    procedural approach, and leave implementation issues unresolved for the Petitioners. The  
21                    conclusions to be drawn from the FCC's *Nov. 10 Order* are still not clear.

22  
23

1                   1.     **BACKGROUND: NUMBER PORTABILITY CONCEPTS**

2     **Q31: Are there other “types” of number portability other than Service Provider**  
3     **Portability that you discussed earlier in this testimony?**

4     **A:**           Conceptually, yes. The FCC has defined a type of number portability called  
5                   “Location Number Portability.” As explained earlier in this Testimony, Service Provider  
6                   Portability is the ability of users of telecommunications services to retain, at the same  
7                   location, existing telecommunications numbers when switching from one local service  
8                   provider to another. In contrast, Location Number Portability is the ability of a  
9                   telecommunications service user to retain her or his same telephone number when  
10                  moving from one physical location to another.

11   **Q32: Is Location Number Portability part of the definition of the Act?**

12   **A:**           As reflected above, the Act defines “number portability” as the ability for  
13                  customers to retain, at the same location, their existing numbers when switching carriers.  
14                  The definition contained in the Act is consistent with only the Service Provider Number  
15                  Portability definition that the FCC has adopted.

16   **Q33: Has the FCC adopted requirements for Location Portability?**

17   **A:**           No. Location Number Portability involves geographic and other implementation  
18                  issues that go beyond those associated with Service Provider Number Portability. With  
19                  location portability, there is no longer a relationship between the NPA-NXX of the  
20                  telephone number and the geographic area in which an end user obtains service using that  
21                  telephone number. Because carriers’ services are based on specific geographic areas and  
22                  because carriers currently provision service and switch calls based on NPA-NXXs, the  
23                  “porting” of a number within a particular NPA-NXX to a different geographic area means

1 that carriers are unable, with current technology, to determine the proper service  
2 treatment of calls.

3  
4 **2. SERVICE “AT THE SAME LOCATION” ISSUES**

5 **Q34: Can you provide an example of the inability to determine the service treatment of**  
6 **calls?**

7 A: Yes. For example, under current technical capabilities, a carrier would not know  
8 whether a call to a location ported number is to a location that is included within the local  
9 calling area services offered by the LEC to its end users (such as the local exchange and  
10 Extended Area Service (“EAS”) arrangements) or whether the call is to a distant location  
11 that would be an interexchange call subject to provision by the end user’s preferred  
12 interexchange carrier (“IXC”). In the former example, if the call would be between two  
13 end users physically located within the local calling area, the call is treated as a local  
14 exchange service call. In the latter example of a toll call originated in one of the  
15 Petitioners’ service areas, the call is subject to equal access treatment (*i.e.*, the call is  
16 routed to the end user’s presubscribed long distance carrier) and is subject to the terms of  
17 either intrastate or interstate access tariffs, and the rate for the call is determined by the  
18 end user’s chosen IXC. However, because of the real-world, real-time incapability to  
19 know the locations of the two end users involved in the call, implementing any form of  
20 Location Number Portability would wreak havoc on the telephone companies and the end  
21 users they serve unless and until some new and costly network capability could be  
22 developed to determine the location of end users on a real-time basis. Absent this real-  
23 time capability, end users would not be able to know what charges they are incurring and

1 the LECs would not know how to recover their costs related to the call. It is for all of  
2 these reasons the FCC has not required that LECs implement Location Number  
3 Portability at this time.

4 **Q35: Did the FCC conclude that porting numbers from wireline carriers to wireless**  
5 **carriers for use on a mobile basis across the country constitutes location portability?**

6 **A:** No. But the FCC did not explain the illogical consequences of that apparent  
7 conclusion, and those aspects of its orders are the reason why the entire industry has been  
8 left to “scratch its head” with regard to the meaning to attach to the FCC’s statements.  
9 The FCC simply stated its conclusion that porting numbers to a wireless carrier which  
10 allows the wireless carrier to provide service on a mobile basis to customers that move  
11 across the country does not mean that the service is provided beyond “the same location”  
12 and therefore does not, in the FCC’s view, constitute location portability. However, the  
13 FCC failed to explain rationally how the porting of a telephone number for use by a  
14 mobile wireless service user constitutes retention of its use “at the same location.” In any  
15 event, the statement about location portability cannot be reconciled with the facts, and the  
16 FCC did not provide the necessary guidance as to how to reconcile this illogical statement  
17 with the current network realities. When a number is ported for mobile wireless carrier  
18 use, not only will a wireless carrier use that number to provide service to a mobile user  
19 “moving from one physical location to another” -- the exact definition that the FCC  
20 prescribed for the concept of location portability -- but more problematic is that, for the  
21 Petitioners, the number could be ported to a wireless carrier that does not have any  
22 service presence or any interconnection arrangement in the local exchange area associated  
23 with the NPA-NXX number prior to its being ported.

1           As is obvious, the FCC's unsubstantiated statement is contrary, without sufficient  
2 explanation, to the plain language of the Act, and leaves open the unreasonable  
3 possibilities that (1) a number may be ported to a wireless carrier that has no presence,  
4 whatsoever, in the area that constitutes "at the same location;" (2) the wireless carrier can  
5 now port that number for use at many different locations, perhaps across the entire nation,  
6 well beyond the "same service location;" and (3) the wireline LECs operating in "the  
7 same location" have no arrangement, whatsoever, with the wireless carrier to which the  
8 number has been ported in that "same location." Accordingly, the FCC's orders  
9 completely neglect, without sufficient explanation, these circumstances and facts that  
10 render the concept "at the same location" meaningless and the conclusions in the *Nov. 10*  
11 *Order* illogical.

12 **Q36: Are there any issues that arise as a result of wireless carriers using the ported**  
13 **number on a mobile basis?**

14 **A:**           Yes. Despite the simple and unexplained statement by the FCC to the contrary, a  
15 telephone number currently used by a wireline end user at a fixed location that is  
16 subsequently ported to a wireless carrier to be used on a mobile basis automatically  
17 involves the use of that telephone number when moving from one physical location to  
18 another (unless the wireless user intends to fix the location of her or his wireless phone).  
19           The mobile user may not only use the number when moving from one location to another  
20 within the original exchange area, but likely will use the number in a much wider  
21 geographic area including, for most wireless carriers, the ability to place and receive calls  
22 at locations throughout the entire country. Furthermore, the wireless user may  
23 subsequently take his or her wireless phone and move to another state and use that

1 telephone number on a full time basis in that other state. As such, the porting of  
2 telephone numbers from wireline use to wireless mobile use automatically presents both  
3 location portability and service provider portability issues. In the reverse, a mobile user  
4 with a telephone number associated with a rate center area in another state (or at some  
5 distance away from the wireline LEC but within the same state) can nevertheless use his  
6 or her mobile phone in the wireline LEC's local rate center area, but the LEC cannot port  
7 that number from the wireless carrier to the wireline LEC's use. This is the disparate  
8 competitive situation that the FCC's illogical requirements present which is also the  
9 reason why the industry group charged with studying and making recommendations about  
10 intermodal porting has never recommended that it be adopted specifically because of this  
11 geographic disparity issue.

12  
13 **3. THERE HAS BEEN NO RECOMMENDATION FOR**  
14 **INTERMODAL LNP.**

15 **Q37: Prior to the FCC's *Nov. 10 Order*, were the obligations of the Petitioners clear with**  
16 **respect to intermodal porting of a number to a wireless carrier?**

17 **A:** No. The rulemaking process that the FCC put in place to resolve the issues  
18 associated with the disparity in geographic service areas between wireline and wireless  
19 carriers that arise under intermodal porting is still open and the issues are still unresolved.  
20 There had been no recommendation or proposal as to how to resolve all of the  
21 geographic disparity issues associated with intermodal porting.

22 **Q38: What is the rulemaking process that the FCC announced that it would use to**  
23 **examine and adopt rules for wireline-wireless number portability?**

1    **A:**           The FCC recognized in its July 2, 1996 number portability decision that there are  
2           complex definition and implementation issues with respect to wireline-wireless number  
3           portability as compared to wireline-wireline number portability. These complex issues  
4           arose because of the fundamental geographic differences between mobile wireless service  
5           areas and wireline service areas. Accordingly, the FCC did not adopt requirements for  
6           wireless-wireline number portability at the same time as it adopted the initial rules for  
7           wireline-wireline number portability. Instead, in its August 18, 1997 decision, the FCC  
8           decided that it would assign the more difficult wireless-wireline issues to an expert  
9           industry workgroup (the North American Numbering Council or “NANC”) with the  
10          intent that the workgroup would study these issues, develop consensus on solutions, and  
11          then make “recommendations” to the FCC as to how to resolve the outstanding issues.  
12          The FCC’s process, then, involves the development of recommendations by the NANC,  
13          followed by FCC notice of such recommendations, and the allowance of sufficient time  
14          and opportunity for the industry to study the recommendations and comment prior to any  
15          such recommendations becoming a regulatory rule.

16    **Q39: Did the FCC alter this process in its *Nov. 10 Order*?**

17    **A:**           No.

18    **Q40: Has there been a recommendation from the industry expert workgroup regarding**  
19          **porting between wireless carriers and wireline carriers?**

20    **A:**           No, and that is at the heart of the problem here. There has been no explicit  
21          recommendation from the industry workgroup that states the manner in which the  
22          geographic disparity issues arising from intermodal porting would be solved. There have  
23          been reports which attempt to explain the unresolved geographic disparity issues related

1 to porting between wireless and wireline carriers. For example, the NANC reported in  
2 both 1999 and 2000, the last two reports that I am aware of on these issues, that the  
3 industry could not reach consensus on a resolution of the rate center area disparity issues,  
4 and no recommendation on intermodal porting was offered. Nowhere can one find an  
5 explicit and complete recommendation as to how the industry group proposed to solve all  
6 of the disparate geographic, definition, and operational issues necessary to implement  
7 wireline-wireless number portability consistent with the statutory requirements.

8 To add further confusion and uncertainty to this process, the geographic disparity  
9 issues were originally related to Location Number Portability, not Service Provider  
10 Number Portability. Based on my review of the reports, it appears that early in their  
11 deliberations the industry workgroup concluded that if and when Location Number  
12 Portability is implemented, the location porting of a number must nevertheless be limited  
13 to service within the same rate center. This condition of confining portability to the same  
14 rate center area was relevant solely to Location Number Portability, not Service Provider  
15 Number Portability. However, the rate center area disparity issue has been inexplicably  
16 confused, and the condition of confinement of portability to the same rate center area  
17 somehow, over time and without clear explanation, apparently became part of the Service  
18 Provider Number Portability considerations, despite the fact that this form of portability is  
19 already defined by statute to be “at the same location.”

20 **Q41: Based on your understanding of the NANC recommendations made to date, is there**  
21 **one that you can point to that resolves the issues that you have identified regarding**  
22 **intermodal porting?**

23 **A:** No. Regardless of the confusing course, one cannot find a clear recommendation

1 from the NANC as to how to reconcile these outstanding intermodal porting issues  
2 (whether for location or service provider portability), much less any document or  
3 proposals that constitutes a clear proposal for comment. The facts are: (1) the disparity in  
4 the geographic aspects of wireline and wireless service still remain; (2) when a number is  
5 ported to a mobile user, the wireless carrier that is the new service provider may not have  
6 any intercarrier network interconnection or service arrangements in place in the original  
7 rate center area; (3) the mobile user will most certainly use that number when moving  
8 from one location to another; and (4) in all likelihood, the mobile user will use that  
9 telephone number in a different rate center than the rate center with which it was  
10 originally associated. “At the same location” has been rendered meaningless without  
11 proper explanation.

12 **Q42: What conclusions can you draw as a result of this sequence of events?**

13 **A:** The Petitioners had no reason to expect that intermodal number portability,  
14 inconsistent with the general understanding of the statute, existing regulation, and the  
15 status of industry workgroup efforts, was yet required.

16 **Q43: What has been the response of the LEC industry to the FCC’s action?**

17 **A:** It is not surprising that the industry has responded with Court action challenging  
18 the *Nov. 10 Order*.

19 **Q44: What is the status of these proceedings?**

20 **A:** All of these matters await substantive action.

21 **Q45: Why are all of these uncertainties relevant to the instant requests for suspension?**

22 **A:** Because the uncertainties raise the distinct specter that the Petitioners will be  
23 making human and economic investments and expending real work resources all in an

1 effort to make a good faith effort to implement LNP when their requirements are unclear.

2 Magnifying this problem, my understanding is that no, or very few, wireline customers of  
3 the Petitioners have requested to port a number for wireless use. The real world concern  
4 is that these costs could be incurred and would be reflected in end user rates without any  
5 real purpose or potential benefit that would be afforded to customers. Moreover, after  
6 these issues are resolved, Petitioners may find that they would be required to modify their  
7 previous implementation activity at additional cost.

8 The requested relief would preclude the potential waste of resources in an attempt  
9 to implement what are currently a confusing, incomplete and inconsistent set of apparent  
10 requirements. As such, the requested relief is fully consistent with the public interest and  
11 would recognize the infeasibility of the Petitioners moving forward with efforts based on  
12 unknown and ambiguous FCC directives. The requested action would also avoid the  
13 significant adverse economic impact on the Petitioners' end users and undue economic  
14 burden that will result from an attempt to comply under these uncertain conditions.

15 Without suspension, the Petitioners would find themselves in the untenable  
16 position of attempting to implement some way in which numbers would be ported to  
17 wireless carriers. However, in such case, as explained in this testimony, some calls may  
18 not be completed to their final destination, there will be ensuing customer confusion,  
19 customers may receive bills for calls that they do not expect, and the Petitioners will incur  
20 costs that may go unrecovered.

21

22

23

1                   **4. LACK OF ANY LOGICAL APPLICATION OF THE “RATE CENTER**  
2                   **AREA” CONCEPT TO MOBILE USERS.**

3   **Q46: Do you agree that it appears that much of the discussion and apparent directives of**  
4           **the FCC depend on so-called rate center areas?**

5   **A:**            Yes.

6   **Q47: What is a rate center area?**

7   **A:**            A rate center area is a specific geographic area. Telephone number codes (NPA-  
8            NXXs) are assigned and associated with rate center areas with the assumption that these  
9            numbers will be used to provide service exclusively within that rate center area (except in  
10           the case of wireless carrier mobile users). However, the fact that wireless carriers may  
11           not use the NPA-NXX to provide mobile service to the end user in the same rate center  
12           area with which the NPA-NXX is associated for wireline service (and similarly a wireless  
13           carrier may use a specific NPA-NXX associated with one specific rate center area to  
14           provide mobile service in a different wireline rate center area) is at the crux of the  
15           geographical rate center area disparity issue between wireless carriers and wireline  
16           carriers that has not been resolved.

17                Within a rate center area, there is a designated rate center point (vertical and  
18                horizontal coordinates) that carriers may use to calculate airline miles between any two  
19                rate center points. The rate center point is a geographic point that is intended to be the  
20                representative point for the entire rate center area for purposes of mileage calculation.

21                The concept of “rate center areas” was developed originally for purposes of  
22                calculating charges for interexchange services where the rates were based on mileage.  
23                Almost no calling services today depend on mileage. Some carriers’ billing and service

1 administrative processes depend on industry databases (the “Local Exchange Routing  
2 Guide” or “LERG”) that associate NPA-NXX telephone numbers with specific rate center  
3 areas. However, many small LECs have no need for such reliance and do not necessarily  
4 utilize such database tools because they provision their own local exchange carrier  
5 services on an individual case basis, based on specific geographic areas included within  
6 their local calling area and the establishment of unique physical trunking between those  
7 geographic areas.

8 To add to the confusion, the FCC has attempted to extend the use of the word  
9 “rate” (with respect to a call) beyond its original meaning, apparently now to mean the  
10 determination by a LEC of whether a call is within the definition of what the LEC offers  
11 and provides as local exchange service, or whether the call is not. The determination of  
12 whether a call, when dialed, is a local exchange service call or an interexchange service  
13 call is simply a service definition determination, not rating. As explained in this  
14 testimony, the determination of whether a call is a local exchange service call or an  
15 interexchange service call is based on the location of the calling and called parties. Under  
16 the traditional use of the word, the Petitioners do not generally “rate” local exchange  
17 service calls, at all. These calls are part of an unlimited service for which no “rating” is  
18 necessary or applied. Rating was originally a concept relevant only to interexchange  
19 services, and the rate center points (V&H) were used to determine the “rate” for the call.  
20 But interexchange services are no longer rated based on mileage, the only “rating” that  
21 takes place for interexchange service calls is in the determination of whether the  
22 interexchange service call is intrastate or interstate in nature, based on the V&H  
23 coordinates of the called and calling parties, and the duration of the call.

1 **Q48: Are LECs required to rely on rate center information of other carriers contained in**  
2 **industry databases in their provisioning of intrastate local exchange carrier**  
3 **services?**

4 **A:** No. I am aware of no federal regulatory requirement which requires LECs,  
5 including the Petitioners, to utilize LERG data that associates a specific NPA-NXX with  
6 a specific rate center area as the sole means to determine the scope of local exchange  
7 services to be offered to their own customers. Of particular note, as explained below,  
8 even the FCC has concluded that this information is generally meaningless with respect to  
9 mobile wireless service. The industry's NPA-NXX assignment guidelines, endorsed by  
10 the FCC, which include the administrative processes for the association of a rate center  
11 area with an NPA-NXX code, also recognize that not all carriers utilize this information  
12 for the definition and billing of services. Many small LECs do not depend solely, nor are  
13 they required to do so, on the unsupervised information that other carriers submit for  
14 inclusion in the industry database as the means to provision their local exchange services.  
15 These LECs may, however, refer to this information as a tool to identify other carriers  
16 and their apparent operations.

17 In summary, I am unaware of any federal regulatory requirement that carriers must  
18 determine the jurisdiction of a call, or must provision specific local exchange carrier  
19 services, based on rate center points that other carriers associate with NPA-NXXs. In  
20 fact, the FCC has concluded previously that the telephone number does not determine the  
21 jurisdiction of a call when the calling and called parties' locations do not relate to the  
22 geographic area associated with the NPA-NXX. The FCC has used the example of  
23 callers in the multi-state area surrounding the District of Columbia to illustrate this fact.

1 Because wireless carrier mobile users often cross state lines and are mobile, a cellular  
2 customer with a telephone number associated with Richmond, Virginia may travel to  
3 Baltimore, Maryland. A call between the mobile user in Baltimore and, for example, a  
4 wireline end user in Alexandria, Virginia might appear to be an intrastate call “placed  
5 from a Virginia telephone number to another Virginia telephone number, but would in  
6 fact be interstate . . . .” 11 FCC Rcd 5020, 5073, *In the Matter of Interconnection*  
7 *Between Local Exchange Carriers and Commercial Mobile Radio Service Providers, and*  
8 *Equal Access and Interconnection Obligations Pertaining to Commercial Mobile Radio*  
9 *Service Providers*, CC Docket Nos. 95-185 and 94-54, (1996) at para. 112, underlining  
10 added. Similarly, while a call between a wireline end user in Richmond to the mobile  
11 user in Baltimore might also appear to be an intrastate call because the call is placed from  
12 a Virginia telephone number to another number that also appears to be associated with  
13 Virginia, but this call would also in fact be an interstate call. When one end of the call is  
14 in Maryland and the other is in Virginia, the call is interstate. The telephone numbers  
15 assigned to the users do not determine the jurisdiction.

16 **Q49: Does the concept of a rate center area and its association with an NPA-NXX make**  
17 **sense with respect to telephone numbers assigned to mobile users of wireless**  
18 **carriers?**

19 **A:** No. It is nonsensical to associate a specific geographic area to a user that, by  
20 definition, is expected to be, and most likely will be, mobile across large areas, including  
21 potentially across the entire nation. The telephone number does not determine the  
22 location of the mobile user. For jurisdictional determinations, the actual physical  
23 location of the mobile user determines whether a call is intrastate or interstate. For

1 interconnection purposes, *i.e.* to determine whether a call is within a Major Trading Area  
2 (“MTA”) or between two MTAs (*i.e.*, intraMTA or interMTA), the location of the cell  
3 site serving the mobile user at the beginning of the call is used as the surrogate for the  
4 actual geographic service location of the mobile user, not the telephone number. I am not  
5 aware of any FCC regulation that requires that the location of a mobile user be based on  
6 the telephone number or NPA-NXX used by that mobile user.

7 **Q50: Do others share your views about the lack of any geographic relationship between**  
8 **rate center areas and mobile users?**

9 **A:** Yes. My views are exactly consistent with the FCC’s conclusions. In its October  
10 7, 2003 number portability order related to wireless-wireless porting, the FCC concluded  
11 (at para. 22) that “[b]ecause wireless service is *spectrum-based and mobile in nature,*  
12 *wireless carriers do not utilize or depend on the wireline rate center structure to provide*  
13 *service:* wireless licensing and service areas are typically much larger than wireline rate  
14 center boundaries, and wireless carriers typically charge their subscribers based on  
15 minutes of use rather than location or distance.” (emphasis added). The FCC’s  
16 conclusion confirms that the specific geographic areas known as rate center areas for  
17 wireline LECs have no relevance to the services offered to, or provided to, the typical  
18 mobile user of the large wireless carriers.

19 **Q51: You discuss intermodal LNP at great lengths. Does that mean that there are no**  
20 **obstacles or burdens associated with intramodal LNP?**

21 **A:** No. For most small and rural LECs, it is intermodal porting brought on by the  
22 FCC’s *Nov. 10 Order* that has precipitated the need for the suspension request by the  
23 Petitioners. However, implementing LNP for intramodal porting would present similar

1 cost burdens and potential imbalance between benefits and costs with similar public  
2 interest implications. Furthermore, there are still those unresolved issues yet to be  
3 decided such as the porting interval that would impact implementation of intramodal  
4 porting the same as for intermodal porting.

5  
6 **V. CONCLUSION**

7 **Q52: What conclusions do you draw from your discussion of LNP?**

8 **A:** Even if the unexplained and uncertain issues discussed in this Testimony were to  
9 be resolved properly, the costs of implementing LNP in the rural Petitioners' exchanges  
10 would unjustly burden the rural customers with higher rates to support a capability that  
11 would benefit only a few, if any, customers that may want to port their number. Further,  
12 with respect to wireless LNP, the evidence is that there would be little, if any, demand by  
13 rural customers to abandon wireline service and completely substitute wireless service.  
14 The costs to deploy number portability are significant and would burden unnecessarily the  
15 customers of the Petitioners without any clear or balanced public interest benefit. Given  
16 these circumstances, the Petitioners should not be forced to incur substantial costs, to  
17 redirect their limited resources into otherwise unnecessary or misguided efforts in an  
18 attempt to comply with a confusing and incomplete set of apparent requirements, and  
19 burden their rural users with rate increases for only speculative, if any, benefits. Such a  
20 result would not be consistent with the public interest.

21 With respect to the incomplete and unexplained aspects of the FCC's *Nov. 10*  
22 *Order*, the Petitioners are placed in an untenable position – although carriers are required  
23 to implement LNP if there is a request, the implementation requirements are incomplete

1 and subject to change and. Further, with respect to intermodal LNP, the implementation  
2 requirements (a) have not been properly established or logically explained; (b) are based  
3 on assumptions that are inconsistent with the experience and operations of the Petitioners;  
4 and/or (c) are inconsistent with the facts and existing regulations. Accordingly, these  
5 shortcomings make the fulfillment of intermodal LNP infeasible and unduly economically  
6 burdensome under uncertain terms. The Petitioners continue to have concerns about the  
7 routing and completion of calls to intermodal ported numbers, the resulting confusion on  
8 the part of customers about how to complete calls and the charges for such calls, and the  
9 ensuing customer dissatisfaction with the Petitioners, as well as with federal and state  
10 regulators, created by this state of uncertainty. Any attempt to implement LNP under  
11 these circumstances would result in the imposition of undue economic burdens on the  
12 Petitioners and their customers -- a result not consistent with the public interest.

13           The interests of all of the parties -- the Petitioners, their customers, and the  
14 Commission -- will be better served by the grant of a suspension until such time as the  
15 demand for LNP and the costs are balanced consistent with a rational public interest  
16 determination and the apparent requirements can be satisfied in an orderly and thoughtful  
17 manner. If the Petitioners are required to implement counter-productive, uncertain, or  
18 infeasible requirements, customers will ultimately bear the harm in the form of greater  
19 costs and a redirection of carriers' resources away from more valuable and worthy efforts.  
20 The implementation and network issues associated with number portability in the rural  
21 areas served by the Petitioners are real and should be addressed in the interest of the  
22 overall public, not just with respect to the interests of a very few customers and wireless  
23 carriers that may want wireline-wireless number portability at the otherwise greater

1 expense to the vast majority of users. Grant of the suspension would serve an overall  
2 and balanced consideration of the public interest.

3 For the reasons set forth in this testimony, implementation of LNP pursuant to the  
4 FCC's apparent directives would result in economic harm in the form of unnecessary  
5 resource burdens on the Petitioners and their customers in the form of higher costs and  
6 rates, undue economic burdens for the small LECs potentially affected by the uncertain  
7 directives, and an apparent requirement for service provision that is not technically  
8 feasible under current conditions. Each one of these conclusions provides a more than  
9 sufficient basis for suspension of the LNP requirements consistent with the relief  
10 requested by the Petitioners. Suspension of the LNP requirements will avoid the adverse  
11 economic impacts set forth in Section 251(f)(2)(A) of the Act, will avoid technically  
12 infeasible requirements, and would be consistent with the Section 251(f)(2)(B) public  
13 interest, convenience, and necessity criteria.

14 These conclusions provide a more than sufficient basis for suspension of the  
15 requirements under the conditions and time frames requested by the Petitioners.

16 **Q53: Does this end your testimony?**

17 **A:** Yes.

## SUMMARY OF WORK EXPERIENCE AND EDUCATION

**Steven E. Watkins**

**May 2004**

My entire 28-year career has been devoted to service to smaller, independent telecommunications firms that primarily serve the small-town and rural areas of the United States.

I have been a consultant with the firm of Kraskin, Lesse & Cosson, LLC since June, 1996. The firm concentrates its practice in providing professional services to small telecommunications carriers. My work at Kraskin, Lesse & Cosson, LLC, has involved assisting smaller, rural, independent local exchange carriers ("LECs") and competitive local exchange carriers ("CLECs") in their analysis of a number of regulatory and industry issues, many of which have arisen with the passage of the Telecommunications Act of 1996. I am involved in regulatory proceedings in several states and before the Federal Communications Commission on behalf of small LECs. These proceedings are examining the manner in which the Act should be implemented. My involvement specifically focuses on those provisions most affecting smaller LECs.

I have over the last seven years instructed smaller, independent LECs and CLECs on the specific details of the implementation of the Act including universal service mechanisms, interconnection requirements, and cost recovery. On behalf of clients in several states, I have analyzed draft interconnection agreements and conducted interconnection negotiations and arbitrations pursuant to the 1996 Act.

For 12 years prior to joining Kraskin, Lesse & Cosson, LLC, I held the position of Senior Industry Specialist with the Legal and Industry Division of the National Telephone Cooperative Association ("NTCA") in Washington, D.C. In my position at NTCA, I represented several hundred small and rural local exchange carrier member companies on a wide array of regulatory, economic, and operational issues. My work involved research, analysis, formulation of policy, and expert advice to member companies on industry issues affecting small and rural telephone companies.

My association work involved extensive evaluation of regulatory policy, analysis of the effects of policy on smaller LECs and their rural customers, preparation of formal written pleadings in response to FCC rulemakings and other proceedings, weekly contributions to association publications, representation of the membership on a large number of industry committees and task forces, and liaison with other telecom associations, regulators, other government agencies, and other industry members. I also attended, participated in and presented seminars and workshops to the membership and other industry groups too numerous to list here.

For those not familiar with NTCA, it is a national trade association of approximately 500 small, locally-owned and operated rural telecommunications

providers dedicated to improving the quality of life in rural communities through advanced telecommunications. The Association advocates the interests of the membership before legislative, regulatory, judicial, and other organizations and industry bodies.

Prior to my work at NTCA, I worked for over eight years with the consulting firm of John Staurulakis, Inc., located in Seabrook, Maryland. I reached a senior level position supervising a cost separations group providing an array of management and analytical services to over 150 small local exchange carrier clients. The firm was primarily involved in the preparation of jurisdictional cost studies, access rate development, access and exchange tariffs, traffic analysis, property records, regulatory research and educational seminars.

For over ten years during my career, I served on the National Exchange Carrier Association's ("NECA") Industry Task Force charged with reviewing and making recommendations regarding the interstate average schedule cost settlements system. For about as many years, I also served in a similar role on NECA's Universal Service Fund ("USF") industry task force.

I graduated from Western Maryland College in 1974 with a Bachelor of Arts degree in physics. As previously stated, I have also attended industry seminars too numerous to list on a myriad of industry subjects over the years.

During my career representing small telecommunications firms, I estimate that I have prepared formal written pleadings for submission to the Federal Communications Commission on behalf of NTCA member and Kraskin, Lesse & Cosson client LECs in over two hundred proceedings. I have also contributed written comments in many state proceedings on behalf of Kraskin, Lesse & Cosson client LECs. I have provided testimony in proceedings before the Georgia, Pennsylvania, Indiana, Kentucky, Missouri, Nebraska, Minnesota, Montana, Tennessee, Kansas, South Carolina, New Mexico, West Virginia, and Louisiana public service commissions. Finally, I have testified before the Federal-State Joint Board examining jurisdictional separations changes.

## CERTIFICATE OF SERVICE

I hereby certify that an original and ten (10) copies of the foregoing Direct Testimony of Steven E. Watkins was were hand-delivered to the South Dakota PUC on May 14, 2004, directed to the attention of:

Pam Bonrud  
Executive Director  
South Dakota Public Utilities Commission  
500 East Capitol Avenue  
Pierre, SD 57501

A copy was sent by U.S.P.S. First Class Mail to:

Talbot Wieczorek  
Gunderson Palmer Goodsell Nelson  
440 Mount Rushmore Road  
Rapid City, SD 57701

David Gerdes  
May, Adam, Gerdes & Thompson  
P.O. Box 160  
Pierre, SD 57501

Dated this 14th day of May, 2004.

---

Richard D. Coit, General Counsel  
South Dakota Telecommunications Association  
PO Box 57 – 320 East Capitol Avenue  
Pierre, SD 57501-0057

MAY 17 2004

OF THE STATE OF SOUTH DAKOTA

SOUTH DAKOTA PUBLIC  
UTILITIES COMMISSION

IN THE MATTER OF THE PETITION  
OF KENNEBEC TELEPHONE COM-  
PANY FOR SUSPENSION OR MODIFI-  
CATION OF § 251(b)(2) OF THE COM-  
MUNICATIONS ACT OF 1934 AS  
AMENDED

Docket No. TC04-025

**DIRECT TESTIMONY OF DAN DAVIS  
ON BEHALF OF KENNEBEC TELEPHONE COMPANY  
REGARDING COMPANY-SPECIFIC COST DATA**

May 14, 2004

1 A. The process that was used to compile and develop the cost per line in Exhibit 2 is  
2 described on pages four through six in my “companion” testimony.

3 **Q6. What was the source of the data?**

4 A. The data was derived from the books, financial records and managers of the  
5 RLEC. Data was also obtained from switch vendors, engineering consultants, tar-  
6 iffs, service order administration service bureaus, the number portability admini-  
7 stration center, a number portability database provider, and my professional ex-  
8 perience.

9 **Q7. What was the purpose of obtaining that particular data?**

10 A. To assist me in preparing an estimate of the costs to implement LNP for the  
11 RLEC.

12 **Q8. Is this the type of data that experts in your field would ordinarily review in  
13 formulating an opinion concerning the costs of LNP?**

14 A. Yes.

15 **Q9. What use did you make of the data after you received it from the RLEC?**

16 A. I have explained the use of the data on page six of my “companion” testimony.

17 **Q10. Have you reached an opinion with a reasonable degree of professional cer-  
18 tainty as to the total non-recurring costs, excluding transport, to implement  
19 LNP that you have calculated for the RLEC that will be recovered over a 5-  
20 year recovery period through an end user surcharge?**

21 A. Yes. My opinion is that the total non-recurring costs, excluding transport, is  
22 \$98,569.00. Such costs were amortized over a recovery period of 60 months us-

1 ing a rate of return of 11.25%. The total nonrecurring costs per month, excluding  
2 transport, amortized over five years is \$2,155.00.

3 **Q11. Have you reached an opinion with a reasonable degree of professional cer-**  
4 **tainty as to the total recurring costs, excluding transport, to implement LNP**  
5 **that you have calculated for the RLEC and that will be recovered from end**  
6 **users on an ongoing monthly charge basis?**

7 A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$381.00 per  
8 month.

9 **Q12. Have you reached an opinion with a reasonable degree of professional cer-**  
10 **tainty as to the total cost, excluding transport, per line per month that would**  
11 **be charged to end-users if LNP were to be implemented by the RLEC?**

12 A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding  
13 the total nonrecurring costs per month amortized over five years to the total recur-  
14 ring costs per month, both amounts excluding transport costs, and dividing this  
15 sum by the RLEC's total access lines. Surcharge and taxes were then applied to  
16 this quotient. The resulting cost per line per month was calculated to be \$3.97.

17 **Q13. Have you reached an opinion with a reasonable degree of professional cer-**  
18 **tainty as to the total LNP costs and the monthly amount recovered from each**  
19 **end-user if the FCC determines that transport costs should be included in the**  
20 **LNP costs recovered from end-users?**

21 A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring  
22 costs, including transport costs, surcharges and taxes, were calculated to be

1           \$7,404.00 per month. The resulting LNP cost per line, per month, including  
2 transport, was calculated to be \$11.58.

3 **Q14. If FCC determines that transport costs should not be included in the end-**  
4 **user surcharge, will the transport cost still be incurred and who will pay**  
5 **these costs?**

6 A. Transport costs will have to be incurred to transport calls outside of the RLEC's  
7 service area. If the cost is not recovered through an end-user surcharge, and if  
8 these costs are not recovered from the wireless carrier, then the only party to pay  
9 these costs would be the RLEC.

10 **Q15. Is it your opinion that the calculations that you have just described fairly and**  
11 **reasonably describe the non-recurring and recurring costs for the RLEC to**  
12 **implement LNP and the end user charges to recover such costs?**

13 A. Yes.

14 **Q16. Does this conclude your testimony?**

15 A. Yes, it does.

16

**Kennebec Telephone Company**  
**Total Estimated LNP Non-recurring and Recurring Costs**

		With Surcharges/ Taxes
<b>LNP Non-recurring Costs</b>		
Switch Upgrade Costs	\$ 47,979	
Internal Business Procedure Changes (1)	\$ 20,426	
Intercarrier Testing	\$ 4,088	
Other Internal Costs (2)	\$ 25,061	
LNP Query set up	\$ 190	
SOA Non-recurring set up charge (3)	\$ -	
Customer Notification Costs	\$ 825	
Total Non-recurring Costs excluding transport	\$ 98,569	
Non recurring transport charges (4)	\$ 1,401	
Total Non-recurring Costs including transport	\$ 99,970	
<b>LNP Monthly Recurring Costs</b>		
SOA Monthly Charge	\$ 90	
LNP Query Costs per month	\$ 150	
Other Recurring Costs	\$ 141	
Total Recurring Monthly Costs excluding Transport	\$ 381	
Transport	\$ 4,837	
Total Recurring Monthly Costs including Transport	\$ 5,218	
<b>Monthly Cost Calculations per line</b>		
Total Nonrecurring cost per month excluding transport amortized over five years	\$ 2,155	
Total Nonrecurring cost per month including transport amortized over five years	\$ 2,186	
Total cost per month excluding transport	\$ 2,536	
Total cost per month including transport	\$ 7,404	
Access Lines excluding Lifeline	735	
LNP cost per line per month excluding transport (5)	\$ 3.45	\$ 3.97
LNP cost per line per month including transport (5)	\$ 10.07	\$ 11.58

(1) Cost required to analyze and modify existing processes and systems in order to receive and process a request for porting.

(2) Other internal costs include reviewing porting agreements with wireless carriers, completing trading partner profile requests from wireless carriers, completing contracts with the SOA and NPAC, and developing and filing tariffs and documentation for the LNP end-user surcharge and local rate increases.

(3) Service Order Administration (SOA) provides the functionality to interface the LEC's order and provisioning systems in order to update the Number Portability Administration Center (NPAC) for access by all other carriers. Through the use of a SOA, a company is able to submit porting information to the NPAC.

(4) Transport costs will be incurred if the FCC requires LECs to install and absorb the cost of facilities to wireless carriers in order to route calls to ported numbers on a seven-digit dialed basis.

(5) Total costs do not include system changes required to shorten the porting interval or expanding a LEC's local calling area as contemplated by the FCC in its FNPRM.

**Q: Please state your name and business address.**

A: My name is Rod Bowar, and my business address is P.O. Box 158, 220 South Main, Kennebec, SD 57544. My business telephone number is (605) 869-2220.

**Q: By whom are you employed and in what capacity?**

A. I am the General Manager of Kennebec Telephone Company (“Kennebec”). Kennebec is a rural independent local exchange carrier that provides local exchange, exchange access and other telecommunications services to subscribers within its South Dakota service area, which includes the exchanges of Kennebec and Presho. As of December 31, 2003, Kennebec provided service to 751 total access lines, 31 of which receive Lifeline service.

**Q: On whose behalf are you presenting testimony?**

A: I am presenting testimony on behalf of Kennebec.

**Q: What is the purpose of your testimony in this proceeding?**

A. The purpose of my testimony is to explain how the implementation of wireline-to-wireless local number portability (“LNP”) would impact the consumers of Kennebec. Specifically, I will review the results of a survey that was conducted for Kennebec, which indicates that the overwhelming majority of our customers do not want wireline-to-wireless LNP at any price. I will also provide demographic information on Kennebec’s customers such as age and income distributions. This information further indicates the adverse economic impact that would occur on Kennebec’s customers if wireline-to-wireless LNP were to be implemented.

1 **Q. Please describe how you gathered information regarding the opinions of**  
2 **Kennebec's consumers about the implementation of wireline-to-wireless**  
3 **LNP.**

4 A. Kennebec commissioned TELEC Consulting Resources, Inc. to conduct a survey  
5 of its consumers. The survey was developed, administered, and analyzed by Ms.  
6 Sue Vanicek. Ms. Vanicek has conducted numerous surveys on telecommunica-  
7 tions issues in her position as a Senior Consultant at TELEC Consulting Re-  
8 sources, Inc., as well as in her previous employment at Lincoln Telephone/Aliant  
9 Communications. I worked with Ms. Vanicek throughout the process, including  
10 discussing the information we would want to collect in a survey, and approving  
11 the questionnaire prior to its distribution.

12 **Q. How was the survey conducted?**

13 A. A questionnaire was mailed to each of Kennebec's residential and business cus-  
14 tomers during January, 2004. A total of 575 surveys were mailed, and 208 sur-  
15 veys were returned, for a response rate of 36 percent. A postage-paid return enve-  
16 lope was included with the questionnaire, so that consumers would incur no costs  
17 in completing the survey. The survey explained how wireline-to-wireless LNP  
18 would function, and that consumers would pay a monthly surcharge for five years  
19 so that Kennebec could recover the costs of LNP implementation if it were of-  
20 fered.

21 **Q. How reliable is the survey?**

22 A. Ms. Vanicek indicated that based on the number of returned surveys out of the to-  
23 tal mailed, the margin of error for this survey is  $\pm$  4.3 percent at the 95 percent

1 level of confidence. This means that if the survey were conducted 100 times, 95  
2 out of 100 times the results would be within  $\pm$  4.3 percent of the results generated  
3 by this survey.

4 **Q. How willing are consumers to pay an LNP surcharge in order to have wire-**  
5 **line-to-wireless LNP available to them?**

6 A. Only about one-fifth of Kennebec's customers (21.4 percent) said that they would  
7 be willing to pay a surcharge of \$0.50 per month for LNP. When asked if they  
8 would be willing to pay a surcharge of \$1.00 per month, the proportion dropped to  
9 11.8 percent, or about one in ten customers. When asked if they would be willing  
10 to pay a surcharge of \$2.00 per month, the proportion dropped to 2.6 percent, or  
11 about one in forty customers. Only 1.6 percent of Kennebec's customers said  
12 they would be willing to pay a surcharge of \$3.00 per month for LNP.

13 **Q. What other information did the survey reveal?**

14 A. About three-quarters of the survey respondents (73.4 percent) said they have a  
15 wireless telephone. Therefore, if the South Dakota Public Utilities Commission  
16 ("Commission") ordered Kennebec to provide wireline-to-wireless LNP, about  
17 one-fourth of Kennebec's customers would be paying a charge for a feature they  
18 would never use, because they do not own a wireless phone to which they could  
19 port their landline telephone number.

20 **Q. What types of comments did Kennebec's consumers make on wireline-to-**  
21 **wireless LNP?**

22 A. At the end of the survey we asked consumers to provide any written comments  
23 they wished to make on wireline-to-wireless LNP. There were three common

1 themes in the responses. One theme was that Kennebec's customers do not want  
2 to pay for a service that they would not use. A second common theme was that  
3 wireless service was poor or nonexistent in many of the areas served by Kenne-  
4 bec. A third theme contained in the comments was that customers thought rates  
5 were high enough and did not want to see any rate increases.

6 **Q. Do you have any other observations on the comments you received from**  
7 **Kennebec's consumers?**

8 A. Yes. I understand that the Federal Communications Commission ("FCC") has  
9 stated that wireline-to-wireless LNP is a benefit to consumers. However, com-  
10 ments we received included responses such as "THIS IS GOV. SHORTSIGHT-  
11 EDNESS" and "stupid." I think these comments indicate that not all consumers  
12 agree with the FCC that wireline-to-wireless LNP is beneficial.

13 **Q. Have any subscribers requested LNP from your company?**

14 A. No, we have had no subscriber requests for LNP.

15 **Q. Have any wireline carriers requested LNP from your company?**

16 A. No, we have received no requests for LNP from wireline carriers.

17 **Q. Have any wireless carriers submitted requests for LNP?**

18 A. Yes.

19 **Q. How much time would be required for your company to provide LNP,**  
20 **if ordered by the Commission?**

21 A. Kennebec has not completed a specific implementation time line yet, but  
22 Implementation takes a considerable amount of time.

1 **Q. Please describe what demographic information reveals about Kennebec's**  
2 **customers.**

3 A. The areas served by Kennebec are composed of consumers who are older and  
4 have lower incomes than the nation as a whole. For example, one in five resi-  
5 dents (20.4 percent) of Kennebec and Presho are 65 or older as of the 2000 Cen-  
6 sus of Population. This compares to about one in eight people (12.4 percent) in  
7 the United States in that same age group. About three in ten households (28.3  
8 percent) in Kennebec and Presho have incomes of less than \$20,000 per year, ac-  
9 cording to the 2000 Census. This compares with about two in ten households  
10 (22.1 percent) in the United States in that same range of income.

11 **Q. What does this demographic data indicate in terms of the impact of a possi-**  
12 **ble LNP surcharge and/or other rate increases to recover the cost of LNP**  
13 **implementation on Kennebec's customers?**

14 A. Many elderly households are on fixed incomes. Because Kennebec serves a  
15 greater proportion of elderly than the national average, an LNP surcharge or other  
16 rate increases to recover the cost of LNP implementation could cause a greater  
17 burden on Kennebec's customers than occurs in the nation as a whole. This same  
18 statement regarding the burden on Kennebec's customers is also true with regard  
19 to income. Because Kennebec serves a greater proportion of households with low  
20 incomes than the nation as a whole, the burden imposed by an LNP surcharge or  
21 other rate increases related to LNP implementation will cause a greater burden on  
22 Kennebec's consumers.

1 **Q. Based on the survey results, the lack of requests for LNP, and the demo-**  
2 **graphic data for Kennebec, what do you expect your customer's reaction**  
3 **would be to any new LNP fees that might be added to their bills?**

4 A. Based on the combination of the vast majority of customers stating they do not  
5 want to pay an LNP surcharge, the customer comments indicating that they do not  
6 want to pay for a service that they will not use, the lack of customer requests for  
7 LNP, and the data demonstrating that Kennebec serves more elderly and low-  
8 income customers than the nationwide average, I would expect a very negative  
9 reaction from customers to the addition of charges on their bill to pay for LNP.

10 **Q. Based on the survey data and demographic data, what is your conclusion**  
11 **generally about the impact of the implementation of wireline-to-wireless**  
12 **LNP on Kennebec's customers.**

13 A. I believe that requiring Kennebec to implement wireline-to-wireless LNP would  
14 result in an adverse economic impact on Kennebec's customers. This is one of  
15 the factors to be considered in a petition for a suspension or modification of Sec-  
16 tion 251(b)(2) of the Telecommunications Act of 1996, as discussed in Mr. Wat-  
17 kins' testimony. As I explained, the vast majority of consumers in Kennebec's  
18 service area do not want to pay an LNP surcharge of \$0.50 or more. Further-  
19 more, Kennebec serves a greater proportion of the population that is older and  
20 has lower incomes than the national average, making any LNP surcharge and  
21 other costs that may be passed on to consumers an even greater burden.

22 **Q. How should the Commission proceed in this matter?**

1 A. As demonstrated in my testimony and the testimony of Messrs. Watkins, Davis,  
2 and Bullock, Kennebec has met the criteria set forth in 47 U.S.C. Section  
3 251(f)(2)(A). In addition, the suspension requested in this proceeding is consis-  
4 tent with the public interest, convenience and necessity requirement set forth in 47  
5 U.S.C. Section 251(f)(2)(B) as is more specifically addressed in Mr. Watkins' tes-  
6 timony. Therefore, I believe Kennebec has met its burden of proof under 47  
7 U.S.C. Section 251(f)(2), and the Commission should grant Kennebec's petition  
8 for suspension or modification.

9 Kennebec requests suspension of the LNP requirement until there is evidence of  
10 reasonable demand for LNP, and until the per-line cost of LNP is reduced. At a  
11 minimum suspension should be granted until six months following the FCC's full  
12 and final disposition of the issues associated with the porting interval and the  
13 routing of calls between wireline and wireless providers, at which time Kennebec  
14 may need to seek further Section 251(f)(2) relief based upon the economic impact  
15 of these decisions.

16 **Q. Does this conclude your testimony?**

17 A. Yes, it does.

**DIRECT TESTIMONY OF DAN DAVIS  
ON BEHALF OF THE ABOVE-NAMED COMPANIES**

**May 14, 2004**

1 **Introduction**

2  
3 A. Witness Background

4  
5 Q. **Please State your Name, Employer, Business Address and Telephone Num-**  
6 **ber.**

7  
8 A. My name is Dan Davis. I am employed with TELEC Consulting Resources Inc.  
9 My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln, Nebraska,  
10 68508.

11 Q. **On whose behalf are you testifying?**

12  
13 A. I am testifying on behalf of the Companies identified in the caption above which I  
14 will refer to as the "RLECs". Each of the RLECs provides local telephone ex-  
15 change service and exchange access services in rural areas of South Dakota.  
16 Each of the RLECs is engaged in the provision of general telecommunications  
17 services in the State of South Dakota.

18 Q. **What is your current position?**

19  
20 A. I am a senior consultant at TELEC Consulting.

21  
22 Q. **What are your duties and responsibilities at TELEC Consulting Resources?**

23  
24 A. I am responsible for consulting with clients regarding regulatory, financial and  
25 interconnection issues.

26 Q. **What was your professional experience prior to your current position?**

27  
28 A. I have worked in the telecommunications industry for 19 years. Prior to my posi-  
29 tion with TELEC, I worked at Aliant Communications (later merged with ALL-  
30 TEL) as the Regulatory/Financial manager of its Nebraska CLEC operation. Prior

1 to that I worked for Aliant Communications in the areas of Regulatory Policy and  
2 Separations and Access.

3 Q. **What is your educational background?**

4  
5 A. I have a Master's degree in Finance and a Bachelor's degree in Business from the  
6 University of Nebraska.

7 Q. **What is the purpose of your testimony?**

8  
9 A. The purpose of my testimony is to support the applications filed pursuant to Sec-  
10 tion 251(f)(2) of the Telecommunications Act of 1934 as amended ("the Act")  
11 and South Dakota Codified Laws SDCL § 49-31-80, by each of the RLECs. Spe-  
12 cifically, I will address the costs developed by each of the RLECs' personnel and  
13 TELECOM that were identified as costs that would be incurred for the provision of  
14 LNP. These costs serve as support for each of the RLECs' contention that a sus-  
15 pension or modification of the FCC's wireline-to-wireless LNP requirement is  
16 necessary pursuant to Section 251(f)(2)(A)(i) of the Act, to avoid a significant  
17 adverse economic impact on telecommunications users generally, or pursuant to  
18 Section 251(f)(2)(A)(ii) to avoid imposing a requirement that is unduly economi-  
19 cally burdensome.

20 Q. **Will you please explain your professional experience that was used in assist-**  
21 **ing the RLECs to develop their costs?**

22  
23 A. Yes, I will. As I stated earlier, I previously held the position of CLEC Regula-  
24 tory/Finance Manager for Aliant Communications' start-up CLEC operation. As  
25 the CLEC Regulatory/Finance Manager, I was involved in many of the CLEC's  
26 implementation activities, including LNP. Although I was not directly responsi-

1 ble for the implementation of LNP, I was responsible for interfacing with the  
2 Qwest Wholesale Management team on issues relating to LNP. In addition, I had  
3 the responsibility of tracking the costs of the CLEC's customer support operations  
4 and network management, where the direct responsibility for LNP implementa-  
5 tion resided.

6 As part of the CLEC implementation team, I attended a Qwest training session on  
7 LNP. As part of the training session, I toured the Qwest service facilities where  
8 local service request forms ("LSRs") and firm order confirmation forms ("FOCs")  
9 were processed. At that time, the Qwest automated IMA system was in develop-  
10 ment, thus Qwest was processing many LSRs and FOCs through their systems  
11 manually. Many of the RLECs would process LSRs and FOCs through their sys-  
12 tems manually if LNP were required to be implemented.

13 As the regulatory manager and as a consultant, I have negotiated many intercon-  
14 nection agreements and have completed documentation required by service order  
15 administrators ("SOAs") and Neustar. In addition, I have compiled data neces-  
16 sary to file tariffs at both the state and federal levels.

17 Q. **Will you please explain the process used to compile and develop the cost per**  
18 **line in Exhibit 2 as compiled for each of the RLECs?**

19  
20 A. Yes, I will. After the FCC released its November 10, 2003 Order on wireline to  
21 wireless LNP, personnel representing each of the RLECs and TELECOM Consulting  
22 personnel began an in-depth analysis of new processes which would be required  
23 for RLEC's to implement LNP and costs that would have to be incurred to im-  
24 plement LNP. We specifically discussed and analyzed administrative require-

1           ments such as registering with the Number Portability Administration Center  
2           (“NPAC”), SOAs and service bureau options, technical interfaces with the service  
3           bureau, provisioning processes, switch upgrades, query services, cost recovery  
4           and LNP end user charges and tariff filing requirements. In addition, we analyzed  
5           other requirements necessary to implement wireline to wireless LNP based upon  
6           the FCC’s November 10, 2003 Order.

7    **Q.    Will you please explain the information that TELEC requested the RLECs to**  
8    **review, analyze, and compile regarding the implementation of LNP?**

9  
10   **A.**    Yes, I will. TELEC specifically requested for each RLEC to obtain a price quote  
11           from its switch vendor for LNP capability (including installation) in each switch.  
12           Estimated costs of implementing LNP, such as switch translation changes and ad-  
13           ditional signaling links, were requested.    In addition, TELEC requested that each  
14           RLEC analyze in detail the modifications to its internal processes that would be  
15           required as a result of LNP implementation and the costs of those modifications.  
16           Specifically, each RLEC was to analyze the requirements necessary to develop in-  
17           ternal provisioning processes that would allow the company to process an order  
18           for LEC-to-wireless LNP interfaces. TELEC provided each RLEC with an initial  
19           list of issues and types of costs to consider. TELEC also requested for each com-  
20           pany to estimate how many hours executive and general management would  
21           spend in reviewing the November 10, 2003 Order, researching the implications of  
22           LNP, and attending seminars and conference calls that specifically addressed or  
23           would address LNP. TELEC requested that each company also estimate the costs  
24           that would be incurred to notify customers of any LNP end-user surcharge. Fi-

1 nally, TELEC requested that each RLEC develop the cost that would be required  
2 to transport calls to each wireless provider's point of interconnection within the  
3 LATA in which each end-office is located. I will address each of these compo-  
4 nents in my explanation of Exhibit 2.

5 Q. **Will you please identify the processes for which TELEC analyzed and devel-**  
6 **oped costs on behalf of the RLECs?**

7  
8 A. Yes, I will. TELEC reviewed SOA service bureau options and the cost incurred  
9 for connectivity to the service bureau and the estimated monthly costs for each in-  
10 terface option. TELEC determined the pricing for LNP query service including  
11 the one-time implementation fee and the per query charge based upon pricing  
12 provided by a query service provider. TELEC provided input on the number of  
13 hours required for negotiating and establishing inter-company porting agreements,  
14 completing trading partner profile requests, establishing and finalizing contracts  
15 with a SOA and with the NPAC, and the time and cost to file tariffs with the FCC.  
16 TELEC also estimated the time and costs for inter-carrier testing, the monthly  
17 costs of processing porting requests, and customer notification cost if it was not  
18 provided by the company. I will explain each of these components in my expla-  
19 nation of Exhibit 2.

20 Q. **Will you please explain what was done with the information that was com-**  
21 **plied?**

22  
23 A. Yes, I will. After all of the data was compiled, the costs that were developed  
24 were entered onto an Excel spreadsheet under specific non-recurring and recur-  
25 ring cost categories. The total non-recurring costs and the total recurring costs

1 were calculated which were then used to calculate a total cost per access line.  
2 This information formed the basis for Exhibit 1 that was filed with each of the  
3 RLEC's Petitions. Since that time, I have performed a more thorough analysis of  
4 these costs, taking into account, additional data that I received from the RLECs  
5 and from providers of LNP services. This further analysis is reflected in the re-  
6 sults shown on Exhibit 2.

7 Q. **Will you please explain what costs are represented by the line item entitled**  
8 **“Switch Upgrade Costs” on the page titled “Exhibit 2” attached to each of**  
9 **the RLECs’ applications?**

10  
11 A. Yes. In general, switch upgrade costs are those that are incurred that allow a  
12 switch to launch a query to the number portability database over the SS7 network  
13 to determine whether a telephone number has been ported and the Location Rout-  
14 ing Number (“LRN”) for the switch that serves the ported number. Switch up-  
15 grade costs also include any costs that are required to update switch translation  
16 tables that will associate the LRN of the new service provider’s switch or Point of  
17 Interconnection (“POI”) with the trunk group number for outgoing traffic to that  
18 service provider. When the response comes back from the database query with  
19 the LRN, the routing table will cause the call to be routed down the appropriate  
20 trunk group for call completion.

21 Q. **Will you please explain what costs are represented on the line item on Ex-**  
22 **hibit 2 entitled “Internal Business Procedure Changes”?**

23  
24 A. Yes, I will. These are costs associated with modifying the internal processes that  
25 the RLECs, use to enable the processing of a request for porting a number. The  
26 nine slides, obtained from Neustar and EasyPorting.com and attached to this tes-

1 timony as Exhibit A, are useful to review to obtain an understanding of LNP op-  
2 erations flows. Once an understanding of the LNP operations flows had been ac-  
3 quired by the RLECs, each was able to review their current operations flows and  
4 determine the modifications that would be required for LNP.

5 Page N1 shows the main process flow commencing with an end-user contacting  
6 the new service provider. The new service provider contacts the old service pro-  
7 vider by sending an LSR. The old service provider validates the information on  
8 the LSR. The old service provider communicates with the new service provider  
9 by sending an FOC. Both the old service provider and the new service provider  
10 contact their SOA. The old service provider enters data obtained from the LSR  
11 onto a web interface with the SOA. Assuming there are no conflicts or that the  
12 end user does not change his or her mind, on the due date, the Number Portability  
13 Administration Center or "NPAC" downloads all of the information into the  
14 number portability databases and the order should then complete. These obvi-  
15 ously are very complicated processes, particularly for rural companies that have  
16 limited resources.

17 Page N2 shows the detailed LNP flow that most carriers must take into considera-  
18 tion in planning modifications to internal processes. Page N3, which is a subpart  
19 of Page N1, shows the exchange of the LSR and FOC between the wireline and  
20 wireless provider. Page N4, which is a subpart of Page N1, shows the exchange  
21 of information between the wireline provider and wireless provider with the SOA  
22 or with the NPAC. Page N5 demonstrates how a port is activated without the un-

1 conditional 10 digit trigger. Page N6 demonstrates how a port is activated with  
2 the unconditional 10 digit trigger. Page N7 demonstrates the process flow if there  
3 is a conflict between the old service provider and the new service provider. This  
4 conflict may be caused by incomplete or incorrect data entered on the LSR or it  
5 may be caused by inconsistent data provided to the NPAC by either the new or  
6 old service provider. Page N8 demonstrates the process when an end-user  
7 changes his or her mind and requests that the porting order be cancelled. Page N9  
8 is a continuation of Page N8 . This page also demonstrates the process flow when  
9 the order has been cancelled but in this case, a cancellation notification message  
10 was not provided to the NPAC from the new service provider. Both the new ser-  
11 vice provider and the old service provider must take the appropriate actions re-  
12 lated to internal work orders in order in to resolve the conflict and cancel the or-  
13 der.

14 LNP requires the creation or modification of internal business processes or proce-  
15 dures. The costs included on the line entitled "Internal Business Procedure  
16 Changes" captures the cost to create a process to enable the RLEC to process an  
17 LSR and FOC. Additional activities and costs included on this line of Exhibit 2  
18 are costs involved in researching the changes that need to occur to communicate  
19 with the SOA's service bureau and/or the NPAC and the cost of the actual modi-  
20 fications. Additional costs in this category include training customer service per-  
21 sonnel, researching and complying with industry LSR and FOC standards, chang-  
22 ing and adding service order screens, changing and adding plant management sys-

1           tems for disconnects based upon LSR information, and researching methods to  
2           inventory ported numbers. The costs also include those associated with research-  
3           ing possible communications changes to PSAPs, reviewing different porting ap-  
4           plications between simple and complex ports, researching interfaces with regional  
5           databases, establishing reports that may be required by the Commission or FCC,  
6           and costs of putting the end-user charge on the monthly bill. These are other  
7           types of activities and costs that are included in the category.

8    Q.    **Will you please explain what costs are represented on the line item on Ex-**  
9           **hibit 2 entitled “Intercarrier Testing”?**

10  
11   A.    Yes, I will. The costs included with this subcategory are those costs incurred to  
12           test all of the porting processes prior to processing the first porting request and to  
13           trouble shoot any problems that may occur during the initial phases of LNP im-  
14           plementation. As previously demonstrated, LNP involves many new and compli-  
15           cated processes which must be tested prior to implementation to ensure that orders  
16           for porting will be completed either successfully or with a minimal amount of  
17           failures. All of the process flows described in pages N1 through N10 of Exhibit B  
18           must be tested, including canceled orders and orders when the end-user returns to  
19           the original service provider. The West Coast NPAC Region OPI Testing Sub-  
20           committee identified seven key elements associated with inter-company testing  
21           that commence after carriers have developed and tested their internal processes.  
22           The key elements identified are :

- 23           1. Contact Test Partner, 60 days prior to test.
- 24           2. Logical Test Planning, 60 days prior to test start.

- 1           3. Physical Test Planning, 45 days prior to test start.
- 2           4. Final test preparation.
- 3           5. Begin testing by exchanging LSR and FOC information.
- 4           6. Evaluate test results.
- 5           7. Commence commercial porting.

6           These process flows have caused problems for even the larger wireless carriers in  
7           implementing wireless-to-wireless LNP. For example, in a letter to the FCC re-  
8           garding LNP implementation<sup>1</sup>, AT&T Wireless stated that “while AWS con-  
9           ducted intercarrier testing, including bilateral and round robin systems testing, the  
10          other carrier’s clearinghouse vendor implemented its systems based on a differing  
11          interpretation of industry guidelines and suffered periodic outages during the  
12          critical last weeks of testing that hampered adequate testing.” AT&T further  
13          stated in the same letter that “Despite all of these efforts to implement and prepare  
14          for a smooth transition to LNP, the implementation of LNP has not been without  
15          problems for AWS as well as the wireless industry as a whole. LNP is a major  
16          undertaking of great complexity that affects nearly every aspect of carriers’ sys-  
17          tems; this complexity is compounded by the fact that various carriers’ systems  
18          need to interface and communicate with each other seamlessly during a com-  
19          pressed period of time for porting to work smoothly.” I believe AT&T’s experi-  
20          ence demonstrates the complexities of LNP and the need for adequate testing

---

<sup>1</sup> Letter from Douglas I. Brandon, Vice President, External Affairs & Law, AT&T Wireless, addressed to John B. Muleta, Chief, Wireless Telecommunications Bureau, Federal Communications Commission, December 10, 2003.

1 weeks prior to the first porting possibility. It should also be noted that given the  
2 size of each of the RLECs, testing and its related costs would be a significant bur-  
3 den.

4 Q. **Will you please explain what costs are represented on the line item on Ex-**  
5 **hibit 2 entitled “Other Internal Costs”?**

6  
7 A. Yes. The costs that are included in this subcategory are regulatory, consulting,  
8 and legal costs. These are costs that are incurred to negotiate and establish  
9 agreements with NPAC and the SOA, query service entities and service providers  
10 requesting LNP. Also included in this sub-category are costs associated with  
11 completing intercarrier porting forms and trading partner profile forms; establish-  
12 ing, writing and filing a tariff with the FCC for the end-user charge; and compa-  
13 nies’ management on LNP implementation.

14 Q. **Will you please explain what costs are represented on the line entitled “LNP**  
15 **Query set up”?**

16  
17 A. Yes, I will. This is a one time charge that a third party data base provider assesses  
18 on a per point code basis in order to obtain connection with the number portability  
19 databases.

20 Q. **Will you please explain what costs are represented on the line item on Ex-**  
21 **hibit 2 entitled “SOA Non-recurring set-up charge”?**

22  
23 A. Yes, I will. This is a charge that is assessed by the SOA service bureau as a one-  
24 time charge that allows the RLEC to set-up and access the SOA service bureau’s  
25 web interface. An RLEC would enter data received from a wireless carrier onto a  
26 screen accessed through the web. The information entered will ultimately be used  
27 to update the master database with information on the ported number. Once the

1 RLEC receives an LSR from a wireless carrier, the RLEC would enter data from  
2 the LSR, such as the customer's name, address, and due date onto the screen. If  
3 all of the data is correct on the LSR and the data has been entered onto the screen  
4 correctly and assuming the customer does not change his or her mind and cancel  
5 the order, the SOA service bureau will send an "activate" message to the NPAC  
6 on the due date, and the master database is updated with the new record.

7 Although TELEC used the low cost provider in calculating the cost on Exhibit 2,  
8 it is important to note that there could be legitimate business reasons why a com-  
9 pany may choose to use a full-scale service bureau.

10 Q. **Will you please explain the costs that are represented by the line item on Ex-**  
11 **hibit 2 entitled "Customer Notification Costs"?**

12  
13 A. Yes. These are costs that will be incurred to notify and educate customers of the  
14 end-user surcharge that will be assessed on their monthly bill as well as any other  
15 line item on the bill that may increase as the result of LNP implementation.

16 Q. **Will you please explain what costs are represented on the line item on Ex-**  
17 **hibit 2 entitled "Non-recurring transport charges"?**

18  
19 A. Yes, I will. These are the non-recurring costs associated with establishing DS1  
20 trunk groups to each wireless provider's POI in each LATA. If a wireless carrier  
21 has not established a direct connection within an RLEC exchange in which it re-  
22 quests LNP the facilities would need to be provisioned to ensure that the proper  
23 routing and completion of calls to ported numbers occur.

24 Q. **Why are these costs included in the cost analysis?**  
25

1 A. Costs to transport ported calls to a wireless carrier's POI have been included in  
2 our analyses to demonstrate the potential impact that transport costs would have  
3 on the RLECs' end-users if the RLEC must arrange for the transport to accom-  
4 modate LNP.

5 Q. **Will you please explain the costs that are represented on the line item on Ex-**  
6 **hibit 2 entitled "Transport"?**

7  
8 A. Yes. This is the monthly cost of DS1s that would be incurred to provision trans-  
9 port facilities to wireless service providers if the RLECs must provide transport  
10 services outside of their exchange areas. DS1 services have previously been de-  
11 scribed under the line item entitled "Non-recurring transport charges".

12 Q. **Will you please explain the costs that are represented on the line item on Ex-**  
13 **hibit 2 entitled "SOA Monthly Charge"?**

14  
15 A. Yes, I will. This is the monthly cost assessed by a SOA service bureau for access-  
16 ing the SOA's web interface to enter the porting information received from a  
17 wireless carrier on an LSR. SOA services were previously described under the  
18 description entitled "SOA non-recurring set-up charge".

19 Q. **Will you please explain the costs that are represented on the line item on Ex-**  
20 **hibit 2 entitled "LNP Query Costs per month"?**

21  
22 A. Yes, I will. This is the cost that would be assessed by a third party database pro-  
23 vider for the RLEC to query its database to determine if the number has been  
24 ported and, if so, the appropriate LRN to which the call should be routed. This  
25 cost is assessed either on a per-query basis, or in a flat monthly amount if the  
26 number of queries does not reach a minimum level each month.

1 Q. **Will you please explain the costs that are represented on the line item on Ex-**  
2 **hibit 2 entitled “Other Recurring Costs”?**

3  
4 A. Yes, I will. These are the costs that are associated with RLEC personnel process-  
5 ing an LNP order and disconnecting the end-user.

6 Q. **Will you please explain how the “Monthly Cost calculations per line”**  
7 **amounts were calculated?**

8  
9 A. Yes I will. There are four lines of cost derived under the heading “Monthly Cost  
10 Calculations per line”. The first line involves the calculation of the total nonrecur-  
11 ring cost per line per month excluding the cost of transport. The cost on this line  
12 is calculated by amortizing the amount on the line titled “Total Non-recurring  
13 Costs excluding transport” over a 60-month period at the current rate of return of  
14 11.25% as prescribed pursuant to Part 65 of the FCC rules.

15 The second line involves the calculation of the total nonrecurring cost per line per  
16 month including the cost of transport. The cost on this line is calculated by amor-  
17 tizing the amount on the line titled “Total Non-recurring Costs including trans-  
18 port” over a 60-month period at the current rate of return of 11.25% as prescribed  
19 pursuant to Part 65 of the FCC rules.

20 The third line involves the calculation of the total cost per line excluding trans-  
21 port. The cost on this line is calculated by adding the amount as shown on the  
22 “Total Nonrecurring cost per month excluding transport” line with the amount as  
23 shown on the “Total Recurring Monthly Cost excluding Transport” line.

24 The fourth line involves the calculation of the total cost per line including trans-  
25 port. The cost on this line is calculated by adding the amount as shown on the

1 "Total Nonrecurring cost per month including transport" line with the amount as  
2 shown on the "Total Recurring Monthly Cost including Transport" line.

3 Q. **Will you please explain how the LNP cost per line per month is calculated?**

4 A. Yes, I will. The total cost per month excluding transport is divided by the access  
5 lines to derive the LNP cost per line per month excluding transport amount. The  
6 total cost per month including transport is divided by the access lines to derive the  
7 LNP cost per line per month including transport amount.

8 Q. **Has the FCC created a mechanism for carriers to recover carrier-specific  
9 costs directly related to providing LNP from end-users?**

10  
11 A. Yes, it has. The FCC in its Third Report and Order on LNP allowed, but did not  
12 require, incumbent LECs to recover their carrier-specific costs directly related to  
13 providing number portability through a federal charge on end-users.<sup>2</sup> The FCC  
14 determined that incumbent LECs should pro rate the monthly LNP charge over  
15 five years by setting a rate at which the present value of the revenue recovered by  
16 the charge equals the present value of the cost being recovered.<sup>3</sup> The FCC found  
17 that carriers should use a discount rate equal to the rate of return on investment  
18 that the FCC has authorized for regulated interstate access services pursuant to  
19 Part 65 of the FCC rules. Any remaining costs must be recovered through existing  
20 mechanisms available for recovery of general costs.<sup>4</sup>

---

<sup>2</sup> *In the Matter of Telephone Number Portability*, CC Docket 95-116, RM 8535, *Third Report and Order*, Released May 12, 1998, at paragraph 135.

<sup>3</sup> *Id.* at paragraph 143.

<sup>4</sup> *Ibid.*

1 In addition, the FCC found that after a carrier establishes its level end-user charge  
2 in the tariff review process, the FCC would not anticipate that the carrier could  
3 raise the charge during the five-year period unless it could show that the end-user  
4 charge was not reasonable based upon the information available at the time it was  
5 initially set.<sup>5</sup>

6 Q. **If carrier is restricted in its ability to change the LNP tariff charge during 5**  
7 **year period, does this impact how carrier implements LNP?**

8  
9 A. Yes, it does. A carrier can not recover any increase in cost it incurs in the future  
10 through the LNP surcharge once the charge has been approved by the FCC. If a  
11 carrier tries to minimize its cost to implement LNP, it risks exposure to any future  
12 increase in cost. Thus, in order to reduce its exposure to this risk, a carrier may  
13 implement LNP using service providers or systems that may not, in all cases, be  
14 the low cost provider or product.

15 Q. **Has the FCC created a standard that carriers must follow in demonstrating**  
16 **that costs are eligible for recovery through the federal charges recovery**  
17 **mechanism?**

18  
19 A. Yes, it has. In a Memorandum Opinion and Order, the FCC's Common Carrier  
20 Bureau adopted a "but for" test used to identify carrier-specific costs directly re-  
21 lated to LNP. Under this test, costs are eligible for recovery in the FCC LNP end-  
22 user surcharge if they satisfy the following two requirements: (1) the costs would

---

<sup>5</sup> Id. at paragraph 144.

1 not have been incurred by the carrier “but for” the implementation of LNP; and  
2 (2) the costs were incurred “for the provision of” LNP.<sup>6</sup>

3 Q. **Do you believe that all of the costs on Exhibit 2, other than transport costs,**  
4 **are recoverable from the FCC’s LNP end-user charge based upon the stan-**  
5 **dard created by the FCC?**

6  
7 A. I believe that all of the costs as represented on Exhibit 2, with the exception of  
8 surcharges and taxes, meet the standard created by the FCC.

9 Q. **Why is the cost of transport included on Exhibit 2 and does the cost for**  
10 **transport meet the standard created by the FCC?**

11  
12 A. Each of the RLECs has included transport costs to provide full accounting of  
13 costs that may be incurred to implement LNP. It is not clear if the transport cost  
14 can be recovered from end-users through the LNP surcharge, pursuant to the  
15 FCC’s rules.

16 Q. **If some of the costs that are incurred as a consequence of LNP but not recov-**  
17 **ered from the FCC’s end-user surcharge, is it reasonable to include any such**  
18 **costs as part of the total cost on Exhibit 2?**

19  
20 A. Yes. In order to determine the economic impact on end-users, all of the potential  
21 increases in cost that may ultimately be passed on to users must be determined.  
22 These potential costs may be passed through to the users in forms that are in addi-  
23 tion to the FCC’s LNP end-user surcharge.

24 Q. **If the total costs are not allowed to be recovered through the FCC’s end user**  
25 **surcharge, how would the costs excluded from the FCC’s end user surcharge**  
26 **be recovered?**  
27

---

<sup>6</sup> *Telephone Number Portability Cost Classification Proceeding*, CC Docket No. 95-116, RM 8535, *Memo-*  
*randum Opinion and Order*, 13 FCC Rcd, 24495, 24500, Adopted December 14, 1998, at paragraph 10.

1 A. Those costs incurred but excluded from the FCC's end-user surcharge would have  
2 to be passed on to end-users, most likely as an increase in the monthly local rate.  
3 If the costs could not be passed onto the end-user, the RLEC would be forced to  
4 absorb these costs.

5 Q. **The FCC has issued a FNPRM seeking comment on whether it should reduce**  
6 **the current four business day porting interval for intermodal porting. What**  
7 **would happen to the costs on Exhibit 2 if the FCC ultimately rules that the**  
8 **porting interval should be shortened?**  
9

10 A. Although none of the RLECs have quantified the costs to shorten the porting in-  
11 terval, there is consensus within the LEC industry that reducing the porting inter-  
12 val for intermodal porting would significantly increase the costs associated with  
13 implementing wireless number portability. USTA informed the FCC that a reduc-  
14 tion in the porting interval for LECs would require LECs to reconfigure their net-  
15 works at a substantial cost. According to USTA, significant changes to ILECs'  
16 operational support systems and other systems would be required at a substantial  
17 cost.<sup>7</sup> According to Qwest, material changes to the current four-day porting inter-  
18 val would require substantial investment, costs and resources, both system and  
19 human, which would ultimately be recovered from consumers.<sup>8</sup> BellSouth con-  
20 tends that shortening the porting timeframe for intermodal porting would increase  
21 the costs associated with implementing number portability. Requiring carriers of

<sup>7</sup> *In the Matter of Telephone Number Portability*, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, Comments of the United States Telecom Association, CC-Docket No. 95-116, January 20, 2004, at page 6.

<sup>8</sup> *In the Matter of Telephone Number Portability*, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, Comments of Qwest Corporation, CC-Docket No. 95-116, January 20, 2004, at pages 7-8.

1 different sizes and utilizing different systems to undergo extensive modifications  
2 to shorten the porting interval would be a significant financial commitment, which  
3 would necessitate appropriate cost recovery

4 Q. **Why is it important for the Commission to take the cost of a shortened port-**  
5 **ing interval into account?**

6  
7 A. The RLECs contend that the cost that would be incurred to reduce the porting in-  
8 terval could be significant. According to the Office of Advocacy, U.S. Small  
9 Business Administration, large wireline carriers estimate that the costs of recon-  
10 figuration could exceed \$100 million and the Office of Advocacy presumes the  
11 costs for small wireline carriers would be proportional.<sup>9</sup> The Commission cannot  
12 assess the potential total economic impact of LNP on end users without knowing  
13 whether the FCC will shorten the porting interval and if it does, what it may cost  
14 for the RLECs to meet the requirements.

15 Q. **Do you believe that the costs as determined in Exhibit 2 will create a signifi-**  
16 **cant adverse economic impact on users of telecommunication services if LNP**  
17 **is implemented?**

18  
19 A. Yes, it would be a very significant impact on customers. I contend that when the  
20 Commission considers the initial and on-going costs of LNP, the Commission will  
21 determine that such costs create a significant adverse economic impact on users of  
22 telecommunications services. FCC rules allow recovery of certain LNP costs  
23 from carriers or from end users through a monthly surcharge imposed over a five-

---

<sup>9</sup> *In the Matter of Telephone Number Portability*, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, Reply Comments of the Office of Advocacy, U.S. Small Business Administration on the Further Notice of Proposed Rulemaking and Initial Regulatory Flexibility Analysis, CC Docket No. 95-116, February 4, 2004, at page 9.

1 year recovery period.<sup>10</sup> Certain costs associated with LNP cannot be recovered  
2 through the end user LNP surcharge or carrier charges. These costs must be re-  
3 covered, if at all, through the LEC's general rates and charges.

4 These costs will be imposed on end-users who have not requested LNP, but not  
5 on the cost causer. This estimated increase in the local service cost do not include  
6 any cost associated with the provision of transporting calls to ported numbers out-  
7 side of RLEC's local service areas. This cost recovery will have a significant ad-  
8 verse economic impact on users of telecommunications service in the RLEC's  
9 service area.

10 Additional unknown costs of LNP could increase the financial burden. The costs  
11 as set forth in Exhibit 2 do not include any cost associated with reducing the port-  
12 ing interval as contemplated by the FCC in its FNPRM. Such reductions of the  
13 porting interval may require the RLECs to make significant changes to its opera-  
14 tions thereby increasing the cost to provide LNP.<sup>11</sup>

15 **Q. Could the implementation of LNP be unduly economically burdensome for**  
16 **the RLECs?**

17  
18 **A.** Yes, implementation of LNP will be unduly economically burdensome for the  
19 RLECs. Any costs not recovered through the end-user LNP charge or carrier  
20 charge may have to be borne by the RLECs.

---

<sup>10</sup> 47.C.F.R. § 52.33.

<sup>11</sup> FNPRM, para 45.

1 The estimated costs of LNP, set forth in Exhibit 2, are presented on a per-line ba-  
2 sis. However, there is no certainty that all of the LNP costs will be paid by cur-  
3 rent subscribers of each of the RLECs. As discussed previously in my testimony,  
4 there are potential issues concerning which costs will be borne directly by the cus-  
5 tomer and which costs will be borne by the RLECs. Further, based upon the sub-  
6 stantial increase in the cost per line per month caused by LNP, there is no guaran-  
7 tee that all such costs would ultimately be passed on to the end-user in the form of  
8 a rate increase. The potential costs that may be incurred by the RLECs would be  
9 unduly economically burdensome.

10 As shown, LNP implementation could result in the assessment of a new LNP sur-  
11 charge on the RLECs' telephone subscribers and could increase local rates. These  
12 actions would make the RLECs' service offering less competitive with the ser-  
13 vices provided by wireless carriers. Wireless carriers already enjoy a number of  
14 competitive advantages over wireline carriers. For example, because of their FCC  
15 licensed service areas, wireless carriers have larger local calling areas, larger ser-  
16 vice territories, and more potential customers to absorb the cost of LNP. By in-  
17 creasing the cost of service, LNP would make wireline service less competitive  
18 with wireless service.

19 If all of the LNP costs were assigned completely to the RLECs' subscribers, in-  
20 cluding the cost of transport and the cost of systems upgrades to reduce the port-  
21 ing interval, the large size of the surcharge may cause a segment of the RLECs'  
22 customers to discontinue service. The reduction in line count would not allow for

1 the full recovery of LNP costs, causing a negative impact on the RLECs' revenue,  
2 and would lay the foundation for an ever-escalating burden on the remaining  
3 RLEC subscribers to fund common network costs.

4 Q. **Does this conclude your testimony?**

5 A. Yes, it does.

**Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

A. My name is Ron Williams. My business address is 3650 131st Avenue South East, Bellevue, Washington 98006.

**Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

A. I am employed as Director – InterCarrier Relations by Western Wireless Corporation. My duties and responsibilities include developing effective and economic interconnection and operational relationships with other telecommunications carriers, including the establishment of local number portability (“LNP”) arrangements and interconnection agreements. I work with other departments within Western Wireless to assess company interconnection and LNP needs and interface with carriers to ensure arrangements are in place to meet the operational objectives of the company.

**Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND.**

A. I have a BA in Accounting and a BA in Economics from University of Washington. I also have a MBA from Seattle University.

**Q. FOR WHOM ARE YOU TESTIFYING IN THIS PROCEEDING?**

A. I am testifying on behalf of WWC License L.L.C. ("Western Wireless"), which provides commercial mobile radio services ("CMRS") in the state of South Dakota.

**Q. WHAT IS YOUR PROFESSIONAL EXPERIENCE IN THE FIELD OF TELECOMMUNICATIONS?**

A. I have ten years experience working for GTE (now Verizon), including six years in telephone operations and business development, and four years in cellular operations. I also have two years experience in start-up CLEC operations with FairPoint Communications. Since August 1999, I have worked for Western Wireless, first as

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 the Director of CLEC operations and, more recently, in my current position in  
2 Industry Relations and as a project lead for implementation of LNP and  
3 interconnection with other carriers.

4 **Q. HAVE YOU TESTIFIED BEFORE ON BEHALF OF WESTERN WIRELESS?**

5 A. Yes, I have testified as the Company's witness in interconnection arbitration  
6 proceedings in Oklahoma and Utah. I have prefiled testimony in a South Dakota  
7 arbitration that was settled prior to hearings. And, recently, I have testified in LNP  
8 suspension matters in New Mexico and Missouri.

9 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

10 A. The purpose of my testimony is to challenge the Petitioners' request for suspension or  
11 modification of federally mandated number portability obligations. My testimony  
12 will address the following issues:

- 13       ▪ **What are the obligations of Petitioners' to implement LNP and what are**  
14       **the standards for granting relief?**
- 15       ▪ **Are there any real operational or technical roadblocks to Petitioners'**  
16       **implementation of number portability as required by FCC rules?**
- 17       ▪ **Is there any evidence of undue economic burden associated with**  
18       **Petitioners' implementation of local number portability?**
- 19       ▪ **What is the economic impact of delaying Petitioners' implementation of**  
20       **number portability?**
- 21       ▪ **Do Petitioners' make a valid claim that LNP in their service area is not in**  
22       **the public interest?**

23 My testimony addresses the standards that should apply in resolving these Petitions  
24 and presents the positions of Western Wireless on the issues identified above. For  
25 each of the issues, I will identify the applicable standard, establish the facts relevant

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 to a determination, and recommend to the South Dakota Public Utilities Commission  
2 ("Commission") an appropriate resolution.

3 **Q. DO YOU HAVE ANY BACKGROUND OR FAMILIARITY WITH WESTERN WIRELESS'**  
4 **SYSTEM IN SOUTH DAKOTA AND ANY FAMILIARITY WITH THE PETITIONERS'**  
5 **SYSTEMS IN THE STATE?**

6 A. Yes. I have been actively involved in negotiation of interconnection agreements with  
7 most, if not all, of the Petitioners in this case on behalf of Western Wireless.

8 **Q. IS THERE A JURISDICTION ISSUE REGARDING WAIVERS TO LNP**  
9 **IMPLEMENTATION?**

10 A. I cannot give a legal opinion, but I do believe there is an issue as to whether  
11 jurisdiction for LNP implementation waivers is in the FCC or state commissions. It is  
12 my understanding that the FCC's intermodal porting order requires rural ILECs to file  
13 any requests for waiver or extension with the FCC, not individual state commissions.  
14 The FCC asserted jurisdiction over all issues related to CMRS number portability by  
15 citing its authority under Sections 1, 2, 4(i) and 332 of the Communications Act.<sup>1</sup> I  
16 know that many rural ILECs applied to the FCC for a waiver, and the waiver was  
17 granted in January this year. I am attaching the FCC order on rural intermodal LNP  
18 implementation as Exhibit Williams' Direct -1. The instant case before the South  
19 Dakota Commission raises the same issues that have been addressed by the FCC  
20 under its jurisdiction.

21 **Q. HAS THE FCC RECENTLY DECIDED ANY OTHER RURAL LNP IMPLEMENTATION**  
22 **WAIVER OR SUSPENSION REQUESTS?**

---

<sup>1</sup> *First Report and Order and Further Notice of Proposed Rulemaking*, 11 FCC Rcd 8352, ¶ 155 (1996); *see also* *Mem. Op. and Order and Further Notice of Proposed Rulemaking*, ¶ 8, CC Docket No. 95-116, FCC 03-284 (rel. Nov. 10, 2003) ("*Intermodal Porting Order*")

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. Yes. Within the last couple of weeks the FCC issued two orders denying LNP  
2 implementation suspensions for rural wireless and rural wireline carriers. In an order  
3 released May 10, 2004 the FCC denied waiver and extension requests for three rural  
4 wireless carriers who had claimed they did not receive sufficient notice to implement  
5 and their rural status constituted special circumstances.<sup>2</sup> Similarly, on May 13, 2004  
6 the FCC denied a waiver petition for temporary suspension made by North-Eastern  
7 Pennsylvania Telephone Company (NEP); a rural LEC with eight exchanges.<sup>3</sup> NEP  
8 is planning to implement LNP in conjunction with a switch replacement and argued  
9 that “it did not anticipate that intermodal porting would be an “imminent”  
10 requirement until the Commission’s Intermodal LNP Order released in November  
11 2003.” NEP also stated that service feature issues arose during implementation  
12 planning that would mean that NEP would not meet the May 24, 2004 deadline for  
13 LNP implementation. In denying NEP request, the FCC responded:

14 “We are not persuaded by NEP’s claims that special circumstances exist  
15 warranting a waiver of the May 24, 2004 porting deadline in order to  
16 accommodate NEP’s switch delivery and deployment schedule, and  
17 provide additional time to resolve any service feature issues. We find  
18 that NEP has not presented “extraordinary circumstances beyond its  
19 control in order to obtain an extension of time.” NEP has not shown that

<sup>2</sup> In the Matter of Numbering Resource Optimization and Telephone Number Portability, Petitions of Advantage Cellular Systems, Inc., Corr Wireless Communications, LLC, and Plateau Telecommunications, Inc. for Limited Waiver and Extension of Porting and Pooling Obligations, CC Docket No. 99-200, 95-116, FCC 04-1291 (released May 10, 2004).

<sup>3</sup> Exhibit Williams’ Direct -2: In the Matter of Telephone Number Portability, Petitions of The North-Eastern Pennsylvania Telephone Company for Temporary Waiver of its Porting Obligations, CC Docket No. 95-116, FCC 04-1312 (released May 13, 2004).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 challenges it may face are different from those faced by similarly  
2 situated carriers who are able to comply. Generalized references to  
3 limited resources and implementation problems do not constitute  
4 substantial, credible evidence justifying an exemption from the porting  
5 requirements. NEP has known since 1996 that it would need to support  
6 LNP within six months of a request from a competing carrier. Although  
7 wireless LNP was delayed, all carriers have been on notice since July  
8 2002 that wireless and intermodal LNP would become available  
9 beginning in November 2003. Thus, NEP has had sufficient time to  
10 follow through with these mandates and prepare for LNP.”<sup>4</sup>

11 In this situation, which is very similar to the instant petitions, the FCC decision  
12 delivered a clear and consistent message: The standards are very high for obtaining a  
13 waiver of LNP obligations, the onus is on individual carriers to do all in their power  
14 to meet the obligations, and difficulties which are similar to those faced by other  
15 carriers do not constitute special circumstances worthy of any suspension. LNP is an  
16 FCC mandate and it is clear the FCC expects enforcement of its implementation.

17 **II. WHAT IS THE OBLIGATION OF PETITIONERS TO IMPLEMENT LNP**  
18 **AND WHAT ARE THE STANDARDS FOR GRANTING RELIEF?**

19 Q. ARE PETITIONERS UNDER AN AFFIRMATIVE OBLIGATION TO  
20 IMPLEMENT LNP?

21 A. Yes. All LECs have known since 1996 that they would be required to provide LNP.  
22 Section 251(b)(3) of the Communications Act of 1934, as amended (“Act”), requires  
23 all LECs to provide LNP.<sup>5</sup> In its rules implementing the LNP requirements of the  
24 Act, the FCC recognized that the public interest would be served by requiring carriers

---

<sup>4</sup> See supra ¶10

<sup>5</sup> 47 U.S.C. § 251(b)(3).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 to implement LNP in all areas, but conditioned the requirement to implement LNP in  
2 rural areas on a carrier receiving a bona fide request (“BFR”) from another carrier.<sup>6</sup>

3 **Q. DID WESTERN WIRELESS SEND A BFR TO ANY OF THE PETITIONERS REQUESTING**  
4 **THE IMPLEMENTATION OF LNP?**

5 A. Yes. In November 2003 Western Wireless sent all but three of the Petitioners,  
6 Western, Splitrock Properties and Tri-County, a BFR to implement LNP.<sup>7</sup> Western  
7 Wireless’ lawful request to implement LNP provided these carriers with more than 6  
8 months notice to deploy Local Number Portability. These telcos waited 4 months to  
9 seek a suspension of their LNP obligations, hopeful that this tactic would result in  
10 delay of their legal obligations.

11 **Q. WHAT IS THE STANDARD FOR GRANTING THE PETITIONERS’ REQUEST FOR A**  
12 **SUSPENSION OF THEIR LNP OBLIGATIONS?**

13 A. Congress established a very high standard to be met for a LEC to obtain a suspension  
14 of its LNP obligations. Section 251(f)(2) of the Act permits state commissions to  
15 suspend a carrier’s LNP obligations only:

16 to the extent that, and for such duration as, the State commission  
17 determines that such suspension or modification —  
18 (A) is necessary: (i) to avoid significant adverse impact on users of  
19 telecommunications services generally; (ii) to avoid imposing a  
20 requirement that is unduly economically burdensome; or (iii) to  
21 avoid imposing a requirement that is technically infeasible; and  
22 (B) is consistent with the public interest, convenience, and  
23 necessity.<sup>8</sup>  
24

---

<sup>6</sup> 47 C.F.R. § 52.26.

<sup>7</sup> Exhibit Williams’ Direct -3

<sup>8</sup> 47 U.S.C. § 251(f)(2).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 “Congress intended exemption, suspension, or modification of the section 251  
2 requirements to be the exception rather than the rule.... We believe that Congress did  
3 not intend to insulate smaller or rural LECs from competition.”<sup>9</sup>

4 **Q. IF CONGRESS DID NOT INTEND TO INSULATE RURAL TELEPHONE COMPANIES**  
5 **FROM COMPETITION, THEN HOW SHOULD THIS COMMISSION DETERMINE**  
6 **WHETHER OR NOT TO SUSPEND THE PETITIONERS’ LNP OBLIGATIONS?**

7 A. Each Petitioner bears the burden of demonstrating that it meets the statutory standard  
8 for a suspension of its LNP obligations. Although Section 251(f) of the Act provides  
9 that rural carriers may obtain a suspension of their LNP obligations, the FCC has  
10 concluded that a suspension is only appropriate under unique and compelling  
11 circumstances:

12 Thus, we believe that, in order to justify continued exemption once a  
13 bona fide request has been made, or to justify suspension or  
14 modification of the Commission’s section 251 requirements, a LEC  
15 must offer evidence that application of those requirements would be  
16 likely to cause undue economic burdens beyond the economic burdens  
17 typically associated with efficient competitive entry. State  
18 commissions will need to decide on a case-by-case basis whether such  
19 a showing has been made.<sup>10</sup>

20 **Q. IN THE ABSENCE OF THE IMPLEMENTATION DELAY ALREADY GRANTED TO**  
21 **RURAL LECs BY THE FCC, WHAT ARE THE PREVAILING GUIDELINES FOR**  
22 **IMPLEMENTATION OF LNP AND HOW DO THEY RELATE TO THE PETITIONERS’**  
23 **SITUATION?**

24 From the exhibits provided with the Petitions, it is apparent that most ILEC networks  
25 require only switch software upgrades and table translations to make them LNP  
26 capable. The FCC produced guidelines that suggest this type of upgrade can be

---

<sup>9</sup> *Implementation of the Local Competition Provisions in the Telecommunications Act of 1996*, First Report & Order, 11 F.C.C.R. 15499, 16118 (1996) (“*LNP First Report and Order*”).

<sup>10</sup> *LNP First Report and Order* at 16118.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 completed within 60 days. Local Number Portability requirements were established  
2 for all LECs in Section 251(b)(3) of the Telecom Act in 1996<sup>11</sup>. Specific to the  
3 Petitioners in this case, the FCC conditioned the requirement to implement LNP in  
4 rural areas on a carrier receiving a BFR from another carrier.<sup>12</sup> While a rural carrier  
5 has six months from receipt of a BFR to implement LNP, the FCC guidelines for  
6 switch preparation indicate a much shorter time may be necessary:<sup>13</sup>

7 After the deadline for deployment of number portability in an MSA in  
8 the 100 largest MSAs, according to the deployment schedule set forth  
9 in the appendix to this part, a LEC must deploy number portability in  
10 that MSA in additional switches upon request within the following  
11 time frames:

- 12 (A) For remote switches supported by a host switch equipped for  
13 portability (“Equipped Remote Switches”), within 30 days;  
14 (B) For switches that require software but not hardware changes to  
15 provide portability (“Hardware Capable Switches”), within 60  
16 days;  
17 (C) For switches that require hardware changes to provide  
18 portability (“Capable Switches Requiring Hardware”), within  
19 180 days;  
20 (D) For switches not capable of portability that must be replaced  
21 (“Non Capable Switches), within 180 days.

22 The language in the Act is clear: While LNP proceeded by decree for the majority of  
23 telephone subscribers, number portability would be triggered by a Bona Fide Request  
24 process in the rest of the country. Further, the BFR process established an  
25 implementation interval (maximum) of 180 days.

<sup>11</sup> 47 U.S.C. § 251(b)(3).

<sup>12</sup> 47 C.F.R. § 52.23(c).

<sup>13</sup> 47 C.F.R. § 52.23(b)(2)(iv).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 The FCC reiterated this rule with respect to intermodal LNP on November 10, 2003

2 (Attached as Exhibit Williams' Direct -4):

3 "Therefore for wireline carriers operating in areas outside of the 100  
4 largest MSAs, we hereby waive, until May 24, 2004, the requirement  
5 that these carriers port numbers to wireless carriers that do not have a  
6 point of interconnection or numbering resources in the rate center  
7 where the customer's wireline number is provisioned."<sup>14</sup>

8 Then, again, on January 16, 2004 the FCC spelled out the date that the  
9 implementation of LNP should occur for the Petitioner in this docket:

10 "Accordingly, IT IS ORDERED that, pursuant to authority contained  
11 in sections 1, 4(i), 251, and 332 of the Communications Act of 1934,  
12 as amended, 47 U.S.C. §§ 151, 154(i), 251, 332, we GRANT a limited  
13 waiver of the wireline-to-wireless porting requirement, until May 24,  
14 2004, for local exchange carriers with fewer than two percent of the  
15 nation's subscriber lines in the aggregate nationwide that operate in the  
16 top 100 Metropolitan Statistical Areas and have not received a request  
17 for local number porting from either a wireline carrier prior to May 24,  
18 2003 or a wireless carrier that has a point of interconnection or  
19 numbering resources in the rate center where the customer's wireline  
20 number is provisioned."<sup>15</sup>

21 There is nothing vague or indefinite about the LNP obligations imposed on the  
22 Petitioners. This eventuality has been foreseeable for the eight years since the  
23 Telecom Act was passed in February 1996. The specific expectations of Western  
24 Wireless' porting interest have been known for more than 6 months since eighteen of

<sup>14</sup> In the Matter of Telephone Number Portability, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, CC Docket No. 95-116, FCC 03-284 at 29 (rel. November 10, 2003). (*Intermodal Porting Order*)

<sup>15</sup> In the Matter of Telephone Number Portability, Small LEC Petitions for relief of the intermodal porting deadline of November 24, 2004, CC Docket No. 95-116,, FCC 04-12 at 12 (rel. January 16, 2004) (See Exhibit Williams' Direct -1)

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1       them received BFRs from Western Wireless. The FCC released its *Intermodal*  
2       *Porting Order* more than 6 months ago. With all this advance public notice it is  
3       inconceivable that the Petitioners would not be prepared to implement LNP. Clearly,  
4       the time that has already been provided to these Petitioners should have been  
5       sufficient time to meet their obligations.

6       **Q. SHOULD THE FACT THAT MANY SIMILARLY SITUATED LECS ARE NOT SEEKING A**  
7       **DELAY OR SUSPENSION OF LNP IMPLEMENTATION MERIT CONSIDERATION IN**  
8       **THIS PROCEEDING?**

9       A. Yes. The decision by many other independent telcos to prepare for implementation  
10       rather than seek a delay or suspension is clear evidence that the implementation of  
11       number portability by the May 24, 2004 deadline was achievable. Similarly situated  
12       rural LECs with similar switch equipment are implementing LNP. My staff and I  
13       have been in contact with many LECs in our serving area to work through questions  
14       or concerns in support of their specific implementation efforts.

15       **Q. HAVE OTHER STATE COMMISSIONS RULED ON LEC LNP SUSPENSION REQUESTS?**

16       A. Yes. I am not familiar with all state commissions, but I do understand that the  
17       Pennsylvania Commission concluded that “rural residents have as much right to  
18       competitive choices as their more numerous urban counterparts” and that as a result,  
19       rural LEC suspension Petitioners “must present competent evidence that such relief is  
20       necessary under Section 251(f)(2).”<sup>16</sup> In response to requests for suspension of LNP

---

<sup>16</sup> *Petition of Rural and Small Incumbent Local Exchange Carriers for Commission Action Pursuant to Section 251(f)(2) and 253(b) of the Telecommunications Act of 1996*, Docket Nos. P-00971177 and P-00971188, 1997 Pa. PUC LEXIS 146 at ¶44 (Pennsylvania Public Utility Commission, July 10, 1997).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 obligations, several state commissions have rejected rural LEC technical and/or  
2 financial arguments in support of their LNP suspension requests.<sup>17</sup> Notably, the  
3 Michigan Public Service Commission denied LNP suspension to two small rural  
4 LECs stating:

5 “The Commission is unconvinced that the burdens will  
6 disproportionately affect the Petitioners as compared with other  
7 carriers. Indeed, the Petitioners have been on notice since 1996 to  
8 prepare for implementation of LNP and replacement of new switches  
9 should have been completed prior to the implementation date .... Any  
10 deferment of the FCC’s number portability requirements beyond that  
11 time [May 24, 2004] would be anti-competitive and anti-consumer.”<sup>18</sup>

12 Although the Petitioners have sought relief from number portability requirements  
13 through this proceeding, there is no reason why the competitive choice, enabled by  
14 number portability, and already available to most people in South Dakota, should be  
15 delayed for the Petitioners’ customers.

16 **Q. HAVE OTHER STATES DEALT WITH LNP SUSPENSION PETITIONS IN A DIFFERENT**  
17 **MANNER?**

---

<sup>17</sup> See, e.g., *Petition by the Alliance of North Carolina Independent Telephone Companies for Limited Modification of the Requirement to Provide Number Portability, Order Dismissing Petition Without Prejudice*, Docket No. P-100, Sub 133r (North Carolina Utilities Comm’n, Oct. 7, 2003)(LNP suspension petition dismissed for failure to meet burden of proof); *Iowa Telecommunications Services*, Docket No. SPU-02-18 (SPU-02-19), 2003 Iowa PUC LEXIS 141 (Iowa Utilities Board, April 15, 2003)(LNP suspension petition denied for failure to meet burden of proof); *In the matter of the application of Waldron Telephone Company and Ogden Telephone Company for temporary suspension of wireline to wireless number portability obligations pursuant to §251(f)(2) of the federal Telecommunications Act of 1996, as amended*. Opinion and Order in Case Nos. U-13956 and U-13958). (Michigan Public Service Commission, February 12, 2004.

<sup>18</sup> In the matter of the application of Waldron Telephone Company and Ogden Telephone Company for temporary suspension of wireline to wireless number portability obligations pursuant to 251(j)(2) of the Federal Telecommunications Act of 1996 as amended. (Opinion and Order in Case Nos. U-13956 and U-13958.) (Michigan Public Service Commission, February 12, 2004.)

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. Yes. Texas is a good example. The Texas Commission Staff was actively involved  
2 in negotiating with rural telephone companies to shorten or withdraw their suspension  
3 requests. The Staff was successful in resolving all ten original petitions<sup>19</sup> but not  
4 before they submitted the following testimony in the docket:

5 “I recommend the denial of the petitions of Valor and KTC to suspend  
6 implementation until March 15, 2005 of the FCC’s Intermodal Order ...  
7 I have determined that the Companies have failed to provide sufficient  
8 information and demonstrate the stated factors pursuant to FTA  
9 §251(f)(2) to justify an extension ... The Companies further failed to  
10 demonstrate that implementation of intermodal LNP prior to March 15,  
11 2005 would be inconsistent with the public interest, convenience and  
12 necessity of Texas customers. I further conclude that the Companies  
13 have failed to take steps to comply with the Intermodal Order in a timely  
14 manner after receiving bona fide requests (BFR) for intermodal porting.  
15 As a consequence I recommend that the Companies be held accountable  
16 for non-compliance with FTA § 251(f)(2), if they are not LNP capable  
17 by May 24, 2004. Thus, the Companies would be subject to applicable  
18 FCC enforcement proceedings and/or state commission enforcement  
19 action, if applicable.<sup>20</sup>

20 **III. ARE THERE ANY REAL OPERATIONAL OR TECHNICAL ROADBLOCKS**  
21 **TO THE PETITIONERS’ IMPLEMENTATION OF NUMBER**  
22 **PORTABILITY AS REQUIRED BY FCC RULES?**

23 **Q. WHAT HAVE THE PETITIONERS’ IDENTIFIED AS ROADBLOCKS TO THE IMPLEMENTATION OF**  
24 **NUMBER PORTABILITY?**

25 A. In their Petitions and through discovery responses, the Petitioners have identified only  
26 a few technical or feasibility issue in the implementation of local number portability:

---

<sup>19</sup> See Texas SOAH Docket No 473-04-3034 PUC Docket 29278 “Petition of Wes-Tex Telephone Cooperative, Inc. et al, for Suspension of Wireless Number Portability Implementation”

<sup>20</sup> Prefiled Direct Testimony of Stephen Mendoza, Telecommunications Division, Public Utility Commission of Texas in the matter of *Petition of Wes-Tex Telephone Cooperative, Inc. et al, for Suspension of Wireless Number Portability Implementation* SOAH Docket No. 473-04-3034, PUC Docket No. 29278, April 30, 2004. p 4 lines 5-21 and P 5 lines 1-8.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

- 1           ▪ The deadlines imposed for LNP implementation do not provide enough  
2           time to implement number portability under the FCC rules.
- 3           ▪ Routing local traffic to numbers that have been ported to wireless carriers  
4           (which has been mischaracterized as ‘location portability’) when there is  
5           no direct connection between the Petitioner network and the wireless  
6           carrier.
- 7           ▪ Uncertainty associated with obligations of intermodal LNP

8   **Q. DO THESE REPRESENT REAL BARRIERS TO COMPLETING IMPLEMENTATION OF**  
9   **NUMBER PORTABILITY OBLIGATIONS BY MAY 24, 2004?**

10   A. No. The Petitioners have introduced these challenges, which are faced by all carriers  
11   (wireline and wireless, urban and rural) implementing number portability, and have  
12   characterized them as impossible to overcome, “technically infeasible”, and/or  
13   representing “a potential waste of resources ...”. This is simply not the case.

14   **Q. WHAT ABOUT THE TECHNICALLY INFEASIBLE CLAIM?**

15   A. Other rural telephone companies do not concur in this: In recent testimony  
16   concerning an LNP suspension petition in New Mexico, Steven D. Metts, a witness  
17   co-sponsored by the New Mexico Exchange Carriers Group made the following  
18   responsive statement<sup>21</sup>:

19           Q. “Is it your contention that suspension of the FCC requirements is based  
20           upon technological incapability for any of your companies?”

21           A. “No.”

22           Some of the Petitioner’s also concur that the implementation of LNP is not infeasible.  
23           Beresford Telephone, in response to Western’s Discovery Request 9 made this  
24           statement when asked about the feasibility of routing calls to ported numbers when

---

<sup>21</sup> New Mexico Case No. 04-00017-UT, Hearing Transcript Day 1, p 51 lines 10-13, April 6, 2004

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 there is no direct connection between carriers: "...it is not "technically infeasible" to  
2 route such a call".

3 **Q. DOES THE INTERMODAL PORTING OF NUMBERS ORDERED BY THE FCC CONSTITUTE LOCATION**  
4 **PORTABILITY?**

5 A. No, it is not location portability. The intermodal number portability ordered by the  
6 FCC enables, for example, a residential LEC customer to substitute wireless service  
7 for LEC service at the same location where that customer receives landline service.  
8 This constitutes number portability, not location portability. Mr. Watkins' testimony  
9 exaggerates the circumstances but, in the end, concedes the FCC has already  
10 addressed this in the Intermodal Porting Order.<sup>22</sup>

11 **Q. WHAT ABOUT PETITIONERS' CONCERN REGARDING THE ROUTING OF TRAFFIC TO TELEPHONE**  
12 **NUMBERS THAT HAVE BEEN PORTED TO WIRELESS CARRIERS?**

13 A. The Petitioners imply that routing local traffic originating on their networks and  
14 destined for a number ported to a wireless carrier is a difficult and unprecedented  
15 requirement. This is not the case. There are economical ways to accomplish this at a  
16 small fraction of what the Petitioners claim for "transport" costs.

17 **Q. WHY ARE THE PETITIONERS RAISING A CONCERN REGARDING INTERMODAL PORTING AND THEIR**  
18 **LOCAL ROUTING OBLIGATIONS?**

19 A. Under some circumstances, when there is no physical interconnection between a LEC  
20 and a wireless carrier, the LEC will need to route a call to a ported number to the  
21 serving tandem. This is no different than the manner in which wireless carriers  
22 terminate calls to many LEC exchanges in South Dakota today.

23 **Q. WHAT WOULD HAPPEN IF THIS TYPE OF ROUTING OF LOCAL CALLS DID NOT OCCUR?**

---

<sup>22</sup> Watkins' Direct p24 lines 5-7.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. A call that was local before a number ported would either not be completed or would  
2 be required to be dialed as a toll call after the number was ported. Imagine a scenario  
3 where your neighbor had to dial toll to reach your telephone number just because you  
4 changed your service provider. It would make no sense.

5 **Q. IS THIS TYPE OF SEPARATE RATING AND ROUTING OF TRAFFIC A NEW PRACTICE?**

6 A. No. This practice is permitted under industry guidelines associated with the  
7 assignment of telephone numbers by the North American Numbering Plan  
8 Administrator (NANPA)<sup>23</sup>. In fact, Western Wireless has several implementations of  
9 this throughout its service area.

10 **Q. ARE THE PETITIONERS CONCERNS ABOUT THE UNCERTAINTY OF FUTURE FCC RULES ON LNP ANY**  
11 **DIFFERENT THAN THOSE FACED BY OTHER CARRIERS THAT ARE ALREADY IMPLEMENTING LNP?**

12 A. No. While there is some uncertainty in what the FCC will do in the future regarding  
13 compensation matters, there is no uncertainty about the rating and routing obligations  
14 relative to LNP. All carriers face these same hurdles: The rating of calls to a ported  
15 number must remain as they were prior to the number being ported. And, it is the  
16 originating carrier's responsibility to properly route traffic to a ported number. The  
17 FCC didn't mandate a method to accomplish these obligations because there is not  
18 just one way to overcome these hurdles.

---

<sup>23</sup> The Central Office Code (NXX) Administration Guidelines (COAG), published by the Alliance for Telecommunications Industry Solutions on behalf of the Industry Number Committee, permit a carrier to receive a rate center number assignment and designate a routing point for calls to those numbers that is outside the rate center to which they are assigned.

TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS

1           **IV. IS THERE ANY EVIDENCE OF UNDUE ECONOMIC BURDEN**  
2           **ASSOCIATED WITH PETITIONERS IMPLEMENTATION OF LOCAL NUMBER**  
3           **PORTABILITY?**

4           **Q. WHAT IS THE STANDARD FOR ESTABLISHING AN “UNDUE ECONOMIC BURDEN”?**

5           A. Section 251(f)(2) permits the Commission to suspend a LEC’s LNP obligation if such  
6           action is “necessary to avoid imposing a requirement that is unduly economically  
7           burdensome.”<sup>24</sup> The Ohio Commission has held that the statutory phrase, “unduly  
8           economically burdensome,” means economic burdens “beyond the economic burdens  
9           typically associated with efficient competitive entry.”<sup>25</sup> The facts contained in the  
10          Petitions do not meet the standard that would lead one to conclude the economic  
11          burden exceeds that ‘typically associated with efficient competitive entry.’

12          **Q. HAVE YOU HAD ANY EXPERIENCE IN DEALING WITH THE REAL LIFE COSTS OF**  
13          **LNP IMPLEMENTATION?**

14          A. Yes I have had experience implementing LNP on Western Wireless’ own network.  
15          This entailed the upgrading of switches, intergrating systems, implementing the LNP  
16          with a CLEC and providing for SOA and LNP queries. I worked on these issues from  
17          an operational, technical, and cost aspect.

18          **Q. ARE THE LNP COST PROJECTIONS IN THE PETITIONS A REASONABLE APPROXIMATION OF THE**  
19          **COSTS OF IMPLEMENTING LNP FOR THE PETITIONERS?**

20          A. The cost projections provided by the Petitioners grossly overstate the implementation  
21          and operational costs of LNP. Both non-recurring ‘start-up’ and monthly recurring

---

<sup>24</sup> 47 U.S.C. § 251(f)(2)(A)(ii).

<sup>25</sup> *Western Reserve Petition* at 13.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 costs have been over estimated by the Petitioners; in some cases producing costs  
2 many times a realistic projection.

3 **Q. PLEASE PROVIDE EXAMPLES OF THE OVERSTATEMENT OF CLAIMED LNP IMPLEMENTATION COSTS.**

4 A. Although cost over-statements occur with most Petitioners in many cost categories,  
5 based on evidence provided to date, overstatements of non-recurring LNP  
6 implementation costs occur in the category “Other Internal Costs”. In this category,  
7 the Petitioners have included costs to deal with “porting contracts” and costs related  
8 to the development of “Inter-carrier Porting Forms”. These costs are grossly  
9 overstated and, perhaps, should not be included at all: Contracts are not required for  
10 porting between carriers and there are standard industry ‘porting’ forms available to  
11 any carrier for a nominal fee. Some Petitioners have included fees for “SOA Non-  
12 recurring set up charge” or non-recurring “Service Order Administration” when  
13 estimated port volumes provide no justification for an automated SOA interface.  
14 Unfortunately, many of the Petitioners have not provided sufficient information in  
15 response to interrogatories to address the validity of switch upgrade cost claims at this  
16 time. They have instead claimed the cost information is confidential and have refused  
17 to provide it even though Western Wireless has executed a “confidentiality  
18 agreement.”

19 **Q. PLEASE PROVIDE AN EXAMPLE OF THE OVERSTATEMENT OF CLAIMED LNP RECURRING COSTS.**

20 A. Many categories of recurring costs are overstated. These include: “SOA Monthly  
21 Charge” estimates that are based on a vendor quote for an automated interface with a  
22 high minimum monthly charge, “Other Recurring Costs” that are overstated based on  
23 Petitioner’s own estimate of port volume, “Switch Maintenance Costs” which are not

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 justified in relation to LNP, "Business Procedure" and porting process costs for  
2 testing, verification, translations, and administrative which appear to be overstated  
3 and redundant, and Marketing/Informational Flyer costs which are not justified on a  
4 recurring basis.

5 **Q. CAN YOU PROVIDE A SPECIFIC EXAMPLE OF OVERSTATED SOA COSTS?**

6 A. Yes. For example, Beresford Telephone has claimed a non-recurring charge of  
7 \$1,800 and a monthly recurring charge of \$1,200 for Service Order Administration  
8 (SOA) functionality. Beresford is claiming a total first year cost of \$30,600 for SOA.  
9 In response to discovery, Beresford estimated 24 ports per year. Beresford can utilize  
10 the Number Portability Administration Center (NPAC) Help Desk to perform the  
11 SOA function for these 24 ports for a total of \$360. Beresford has overstated first  
12 year SOA costs by more than 80 fold. This single cost overstatement results in an  
13 almost a dollar (\$.85) of claimed LNP cost per line per month. Most of the other  
14 Petitioners have similarly forecasted low porting volumes that do not justify an  
15 automated SOA interface and high minimum monthly recurring charges.

16 **Q. WHAT ABOUT PETITIONER CLAIMS FOR 'TRANSPORT' COSTS?**

17 A. In every instance that I have reviewed, the Petitioner has identified the most  
18 inefficient means of routing traffic to ported numbers as the basis for formulating  
19 start-up and recurring costs. The approach taken by the Petitioners produces costs  
20 that may be as high as 400 times the cost that an efficient operator would incur to  
21 accomplish their routing obligations for similar traffic. For example, West River  
22 Cooperative Telephone assumes the installation of more than 30 T1 circuits to route  
23 traffic in the first year of LNP implementation. West River also estimated 12

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 customers will port each year. Assuming these porting customers to have average  
2 incoming call characteristics, Western Wireless estimates the cost of routing traffic to  
3 these ported numbers to be \$1,120 for the year including non-recurring charges.  
4 West River estimates these same costs to be more than \$467,000.

5 **Q. DO YOU HAVE ANY OTHER COMMENTS ON PROPOSED LNP 'TRANSPORT' COST RECOVERY?**

6 A. Yes. It is unclear that any of the costs included in this line item are recoverable under  
7 the FCC's rules pertaining to recovery via a line-item surcharge on local  
8 telecommunications customers. I believe the FCC views that it is the originating  
9 carrier's responsibility to deliver local traffic for termination and that the costs  
10 associated with fulfilling that responsibility are not a number portability cost.

11 **Q. HAVE YOU PREPARED ALTERNATIVE LNP COST ESTIMATES FOR THE PETITIONERS?**

12 A. Yes. Based on my experience with interconnection and with number portability, I  
13 have attached Exhibit Williams' Direct 5 which reflects the modifications to  
14 Petitioner costs consistent with my testimony.

15 **Q. I NOTE THAT WILLIAMS' DIRECT -5 IS BROKEN INTO TWO PAGES, ONE MARKED**  
16 **AS 5A AND ONE MARKED AS 5B. COULD YOU EXPLAIN THE DIFFERENCES ON**  
17 **THESE TWO PAGES?**

18 A: When the Petitioners in this case provided cost summaries, they did so in two  
19 separate formats. To assist in comparing the costs estimated on 5A and 5B with the  
20 Petitioner cost submissions, we maintained the two distinct formats and presented the  
21 revised estimates.

22 **Q. IN PREPARING WILLIAMS' DIRECT -5, WHAT INFORMATION DID YOU USE?**

23 A. For the most part, I used the same numbers as those being presented by the

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 Petitioners. However, I have changed certain values to more reasonable and realistic  
2 amounts in those areas I have discussed in my testimony. These changes are based on  
3 my experience and also some of the other cost information the Petitioners submitted.  
4 Any number that I corrected in the cost estimate is highlighted on the exhibit for ease  
5 of comparison. In some cases I eliminated a cost. For example, I eliminated the  
6 switch maintenance cost because these costs already exist for the switches now being  
7 used and the fact that the new switch to be put in will be LNP compatible does not  
8 result in additional increase in these costs.

9 **Q. YOU MENTIONED EARLIER IN YOUR TESTIMONY THAT IN EVERY INSTANCE THAT**  
10 **YOU HAVE REVIEWED IN THESE FILINGS THE PETITIONERS HAVE IDENTIFIED**  
11 **THE MOST INEFFICIENT MEANS OF ROUTING TRAFFIC TO PORTED NUMBERS AS A**  
12 **BASIS FOR THEIR LNP COST ESTIMATES. HOW IS IT INEFFICIENT?**

13 A. The routing methods proposed by the Petitioners are inefficient in that they make  
14 little or no utilization of existing equipment and shared facilities currently used to  
15 exchange calls with other carriers. A more efficient and less costly mechanism for  
16 establishing routing for LNP is illustrated in Exhibit Williams' Direct - 6.

17 **Q. WHAT IS YOUR RECOMMENDATION ON PETITIONERS' CLAIMS THAT THE COST OF LNP**  
18 **IMPLEMENTATION IS UNDULY BURDENSOME?**

19 A. The bar has been set very high for granting an exception on the basis of the costs of  
20 implementing local number portability. The Petitioner cost exhibits include inflated  
21 costs that don't stand-up to scrutiny. The Petitioners have failed to demonstrate their  
22 costs are unduly burdensome. Neither have they demonstrated that their costs are any  
23 different than other rural wireless and wireline carriers that are or have implemented  
24 number portability.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 LNP investments the opportunity to leverage that investment in Petitioner serving  
2 areas.

3 **Q. DO THE PETITIONERS' HAVE LNP ROUTING OBLIGATIONS THAT TRANSCEND ANY SUSPENSION OF**  
4 **INTERMODAL LNP IMPLEMENTATION?**

5 A. Yes they do. In a Notice of Apparent Liability for Forfeiture, released by the Chief,  
6 Enforcement Bureau of the FCC, the FCC maintains that:

7           Regardless of the status of a carrier's obligations to provide number  
8           portability, all carriers have the duty to route calls to ported numbers.  
9           In other words, carriers must ensure that their call routing procedures  
10          do not result in dropped calls to ported numbers."<sup>26</sup>

11 Granting any further delay to these Petitioners would seem to exacerbate their  
12 problem with respect to routing obligations. Many of the Petitioners provide service  
13 in local calling areas that are common to a Qwest rate center (e.g., James Valley's  
14 Frederick and Mellett exchanges have a local calling area shared with Qwest's  
15 Aberdeen rate center) that will have number portability implemented on or before  
16 May 24, 2004. In the event a number is ported in the Aberdeen rate center, the FCC  
17 has made it clear that a carrier is still obligated to route calls to ported numbers.

18 **Q. DOES THE FACT THAT THE PETITIONERS ARE NOT IMPLEMENTING LNP LIMIT**  
19 **WIRELESS TO WIRELESS NUMBER PORTABILITY?**

20 A. Yes. Since the beginning of the wireless industry, wireless carriers have used number  
21 assigned to them by LECs. These numbers appear in industry routing guides as if  
22 they were affiliated with the LEC switch instead of the wireless carrier's switch. In  
23 these instances, a wireless customer cannot port their wireless number to another

---

<sup>26</sup> In the Matter of CenturyTel, Inc., CenturyTel of Washington, Inc., CenturyTel of Cowiche, Inc., and CenturyTel of Inter Island, Inc. Apparent Liability for Forfeiture, DA 04-1304, Released May 13, 2004, ¶ 4.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 wireless provider unless the LEC is LNP compliant and participates in the port. In  
2 South Dakota, there are at least five thousand Western Wireless numbers that would  
3 fall into this category and other wireless carriers in South Dakota would also likely  
4 have as many numbers that would fall subject to this problem.

5 **VI. DO PETITIONERS MAKE A VALID CLAIM THAT LNP IS NOT IN THE**  
6 **PUBLIC INTEREST IN THEIR SERVICE AREAS?**

7 **Q. DO THE PETITIONERS' CLAIMS OF LACK OF DEMAND FOR NUMBER PORTABILITY RING TRUE?**

8 A. No. The fact is, number portability has proven to be an enabler of competition  
9 wherever it has been implemented. That is the case here in South Dakota. Qwest has  
10 experienced a substantial loss of customers to competitors since the advent of number  
11 portability. There is, however, a difference in what the FCC has ordered to happen on  
12 May 24, 2004. Instead of just adding more competitors to South Dakota's urban  
13 markets, intermodal LNP enables wireless carriers to compete effectively for  
14 customers in areas that have not previously been exposed to competition.

15 **Q. HAS THE FCC MADE ANY RECENT COMMENTS WITH RESPECT TO THE PUBLIC INTEREST AND THE**  
16 **IMPLEMENTATION OF LNP IN RURAL AREAS?**

17 A. Yes. On May 6, 2004, K. Dane Snowden, Chief of the Consumer & Governmental  
18 Affairs Bureau, issued a letter to the President of NARUC. The letter asked NARUC  
19 to encourage state commissions to ensure that waivers are only granted "where  
20 carriers demonstrate undue economic burden or technological infeasibility and, in  
21 reference to the waiver obligations of Section 251(f) of the Act:

22 "strictly apply that statutory standard so that rights of consumers  
23 are protected. I encourage the State commissions to ensure that  
24 carriers seeking waivers demonstrate that they are on a path to

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 compliance so that customers of these carriers will not be forever  
2 denied the rights their fellow consumers enjoy.”<sup>27</sup>

3 **Q. IS THERE ANY REASON WHY THE COMPETITIVE CHOICE, ENABLED BY NUMBER PORTABILITY, AND**  
4 **ALREADY AVAILABLE TO MOST SOUTH DAKOTANS, SHOULD BE DELAYED FOR THE CUSTOMERS OF**  
5 **THESE PETITIONERS?**

6 A. No.

7 **Q. ARE THERE ANY INDUSTRY PROJECTIONS FOR THE POTENTIAL OF SUBSTITUTION OF WIRELINE**  
8 **SERVICE BY WIRELESS?**

9 A. Yes, many industry watchers are projecting that intermodal number portability will  
10 open the door to increased competition and accelerated substitution of wireless for  
11 wireline services. Here are some excerpts of a Cato Industry report summarizing the  
12 impact of wireless substitution<sup>28</sup>: “Wired Magazine recently reported that roughly  
13 3% of homes have dropped their landlines and 8% are expected to follow suit in the  
14 next five years.” “A more recent study by PriMetrica, Inc. suggested that roughly  
15 half of U.S. households would be willing to dump wireline for cellular ...”. “And  
16 now comes the number portability decision, which adds more fuel to the VoIP and  
17 wireless substitution fire. I think it will certainly increase the move toward  
18 substituting wireless for wire-line phones’ notes Rebecca Arbogast, an analyst with  
19 Legg Mason.” Finally, common sense tells us that demand for a service greatly  
20 increases once the service becomes available.

21 **Q. HAS WESTERN WIRELESS MADE THE INVESTMENTS NECESSARY TO PROVIDE LNP IN SOUTH**  
22 **DAKOTA?**

---

<sup>27</sup> Attached is Exhibit Williams’ Direct - 7, a copy of the correspondence from the Bureau Chief of the FCC Consumer & Governmental Affairs Bureau to the President of NARUC.

<sup>28</sup> “Number Portability Adds to Wireline Telecom Sector’s Perfect Storm,” Adam Thierer, Director of Telecommunication Studies, Cato Institute, Issue 66, November 20, 2003.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. Yes. We have upgraded our network, implemented new processes, systems, and  
2 hired supporting resources to implement LNP in South Dakota. In other words, we  
3 have absorbed the costs of implementing LNP under our FCC obligations. Further,  
4 we believe it is unfair that carriers who we compete with, that are similarly obligated,  
5 would be exempted from their obligations and thereby limit our ability to recoup the  
6 LNP investments we have made by restricting our opportunity to leverage those  
7 investments in a competitive marketplace.

8 **Q. HAVE THE PETITIONERS MET THE PUBLIC INTEREST STANDARD FOR GRANT OF A SUSPENSION OF**  
9 **LNP OBLIGATIONS?**

10 A. No. The public interest would not be served by suspending these Petitioners' LNP  
11 obligations. Section 251(f)(2) of the Act requires the Commission to determine that  
12 suspension of a carrier's LNP obligations would be "consistent with the public  
13 interest, convenience, and necessity."<sup>29</sup> The provision of LNP by LECs is a critical  
14 component of a competitive local telephone market. Rural consumers are  
15 increasingly choosing wireless service for their telecommunications needs and may  
16 choose to port their wireline number to Western Wireless upon the implementation of  
17 number portability as mandated by the Federal Communications Commission. The  
18 FCC has observed that the inability of customers to retain their telephone numbers  
19 when changing local service providers hampers the development of local competition:

20 Section 251(b)(2) removes a significant barrier to completion by  
21 ensuring that consumers can change carriers without forfeiting their  
22 existing telephone numbers.<sup>30</sup>

---

<sup>29</sup> 47 U.S.C. § 251(f)(2)(B).

<sup>30</sup> Third LNP Order, 13 FCC Rcd 11701, 11702-04 ¶¶ 3-4 (1998)

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 The fact is, number portability has proven to be an enabler of competition wherever it  
2 has been implemented. The bona fide request process for local number portability  
3 has led to an opportunity for increased competition in rural South Dakota markets on  
4 May 24, 2004, (i.e., the ability of a wireless carrier to compete for service in areas  
5 that have not previously been exposed to competition). The implementation of LNP  
6 is intended to serve the important public interests of improved choice and competition  
7 for consumers.

8 **Q. IS THE PETITIONERS' THREAT OF "CUSTOMER CONFUSION"<sup>31</sup> AMONG TELEPHONE USERS A**  
9 **REALISTIC CONCERN?**

10 **A.** Only if the Petitioners' are not required to meet their routing obligations as an  
11 originator of local telecommunications traffic. The Petitioners' threat of misrouting  
12 calls to ported numbers as toll calls is in clear violation of the FCC's rules:

13 "a wireless carrier porting-in a wireline number is required to maintain  
14 the number's original rate center designation following the port. As a  
15 result, calls to the ported number will continue to be rated in the same  
16 fashion as they were prior to the port."<sup>32</sup>

17 This is consistent with the Telecom Act's definition of LNP:

18 "The ability of users of telecommunications services to retain, at the  
19 same location, existing telecommunications numbers *without*

---

<sup>31</sup> See, for example, Petitioner TC04-045 by Golden West Telecommunications Cooperative, et al, ¶ 20: "The current technical issues with wireline-to-wireless LNP implementation will lead to customer confusion ... The switch will search for a trunk over which to route the call. If a direct trunk group has not been established ... the party placing the call will likely receive a message that the call cannot be complete as dialed or a message instructing the party to redial using 1+ the area code. Confusion among telephone users will occur ..." And See Steven E. Watkins Direct Testimony, p 7 lls 10-13.

<sup>32</sup> Intermodal Porting Order at ¶ 27.

DOCKET TC04-025 et al

TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS

1           *impairment of quality, reliability, or convenience* when switching  
2           from one telecommunications carrier to another.”<sup>33</sup> [Emphasis added]

3   **Q.**    **ARE THE PETITIONERS’ CLAIMS CONSISTENT WITH FCC POLICY?**

4    A.    No. The Petitioners claim they need additional guidance prior to implementing LNP.  
5           Additional guidance is not necessary. Granting the Petitioners’ delay is at odds with  
6           FCC policy and the interests of rural consumers who, like their urban counterparts,  
7           have the expectation of legal right under the Communications Act to port their  
8           numbers to new carriers should they so desire. Tactics to further delay intermodal  
9           LNP will be a disservice to consumers in each of the Petitioners’ own service areas.

10 **Q.**    **IS THERE EVIDENCE THAT THE PETITIONERS ARE NOT ACTING IN GOOD FAITH WITH RESPECT TO**  
11 **FCC OBLIGATIONS TO IMPLEMENT LOCAL NUMBER PORTABILITY?**

12 A.    Yes. It is clear from the Petitioners’ response to discovery that few are moving  
13           forward with LNP implementation. All the Petitioners have ‘considered’ some of the  
14           ramifications of LNP and most have ‘reviewed’ and ‘discussed’, but very few have  
15           actually implemented any element of LNP. The fact that most of the Petitioners have  
16           not prepared their network for the implementation of competition through LNP or  
17           their business processes and, apparently, have not budgeted for LNP implementation  
18           in 2004 (even though they received bona fide requests for implementation in 2003)  
19           does not constitute undue economic burden. Neglect of, disregard for, or mis-  
20           management relative to FCC rules should not be used as basis for granting any delay  
21           or suspension of number portability obligations.

22 **Q.**    **WHAT STANCE HAS THE FCC STAFF TAKEN WITH RESPECT TO PETITIONERS’ POSITIONS?**

---

<sup>33</sup> 47 U.S.C. § 153(30)

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. Speaking at a forum on LNP issues, Wireless Bureau Assistant Chief David Firth said  
2 that the volume of actual number porting would not be the measure of success, but  
3 giving customers the option to port was most important. He indicated that carriers  
4 outside of the 100 largest MSA's should be testing and preparing for the May 24,  
5 2004 LNP deadline. Responding to questions, Mr. Firth indicated that rating and  
6 routing issues between carriers are not porting issues and are therefore not a valid  
7 reason for refusing to port.<sup>34</sup>

8 **VII. CONCLUSION**

9 **Q. PLEASE SUMMARIZE YOUR TESTIMONY.**

10 Petitioners have not provided evidence or otherwise demonstrated that there is any  
11 technical constraint to the implementation of local number portability by May 24,  
12 2004. Petitioners have not met the standard that would lead one to conclude the  
13 economic burden exceeds that "typically associated with efficient competitive entry."  
14 Nor have Petitioners demonstrated that the implementation of number portability  
15 would conflict with the public interest and the competitive choice guidelines set by  
16 the FCC and this Commission.

17 The Commission should reject Petitioner arguments for delayed  
18 implementation, deny the suspensions, and force the Petitioners to face the  
19 consequences of their LNP preparations or lack thereof.

20 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

21 A. Yes, it does.

Telephone Number Portability ) CC Docket No. 95-116  
 )

ORDER

Adopted: January 13, 2004

Released: January 16, 2004

By the Commission:

I. INTRODUCTION

1. In this order, we grant a limited waiver of the wireline-to-wireless porting requirement for certain local exchange carriers with fewer than two percent of the nation’s subscriber lines in the aggregate nationwide (Two Percent Carriers)<sup>1</sup> that operate in the top 100 Metropolitan Statistical Areas (MSAs).<sup>2</sup> Specifically, we grant Two Percent Carriers that meet the conditions described in this order a waiver until May 24, 2004, to comply with the wireline-to-wireless porting requirement. The waiver applies to all Two Percent Carriers operating within the top 100 MSAs that had not received a request for local number porting from either a wireline carrier prior to May 24, 2003, or a wireless carrier that has a point of interconnection or numbering resources in the rate center where the customer’s wireline number is provisioned (Covered Carriers). To the extent that a Two Percent Carrier operating within the top 100 MSAs does not meet these qualifications, it must comply with the requirements for wireline-to-wireless porting to date.

II. BACKGROUND

2. *Intermodal Portability.* Section 251(b) of the Communications Act of 1934, as amended (the Act) requires local exchange carriers (LECs) to provide local number portability (LNP), to the extent technically feasible, in accordance with requirements prescribed by the Commission.<sup>3</sup> Although the Act excludes Commercial Mobile Radio Service (CMRS) providers from the definition of local exchange carrier, and therefore from the section 251(b) obligation to provide number portability, the Commission has extended number portability requirements to CMRS providers.<sup>4</sup> The Commission determined that

<sup>1</sup> See 47 U.S.C. § 251(f)(2).

<sup>2</sup> The Commission received several petitions from small LECs operating in the top 100 MSAs for relief of the intermodal porting deadline of November 24, 2003. See Appendix A.

<sup>3</sup> 47 U.S.C. § 251(b)(2). Under the Act and the Commission’s rules, local number portability is defined as “the ability of users of telecommunications services to retain, at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another.” 47 U.S.C. § 153(30); 47 C.F.R. §52.21(k).

<sup>4</sup> Telephone Number Portability, CC Docket No. 95-116, First Report and Order and Further Notice of Proposed Rulemaking, 11 FCC Rcd 8352, 8431, paras. 152-53 (1996) (*First Report and Order*). The Commission indicated that it had independent authority under sections 1, 2, 4(i), and 332 of the Communications Act of 1934, as amended, to require CMRS carriers to provide number portability. *Id.* at para. 153. See 47 U.S.C. §§ 1, 2, 4(i), and 332.

implementation of wireless LNP, which would enable wireless subscribers to keep their phone numbers when changing carriers, would enhance competition between wireless carriers as well as promote competition between wireless and wireline carriers.<sup>5</sup>

3. After extending the wireless LNP deadline on several occasions, the Commission established November 24, 2003 as the date in which wireless carriers in the top 100 MSAs must be capable of wireless-to-wireless and wireless-to-wireline porting and wireline carriers must be capable of wireline-to-wireless porting. On November 10, 2003, we released a Memorandum Opinion and Order and Further Notice of Proposed Rule Making (*Intermodal Order*) further clarifying certain aspects of intermodal porting.<sup>6</sup> In the order, we recognized that many wireline carriers operating outside of the top 100 MSAs may require some additional time to prepare for implementation of intermodal portability.<sup>7</sup> Therefore, we waived, until May 24, 2004, the requirement that wireline carriers operating outside the top 100 MSAs port numbers to wireless carriers that do not have a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned.<sup>8</sup>

4. *Petitions.* As the November 24, 2003 deadline approached, we received a number of petitions for waiver of the intermodal porting requirement (Waiver Petitions) from small LECs operating in the top 100 MSAs (Petitioners).<sup>9</sup> Nearly all of the Petitioners describe themselves as small telephone companies and assert that they are more similarly situated to LECs operating outside the top 100 MSAs than the large carriers operating within the top 100 MSAs.<sup>10</sup> In support of this claim, many of the Petitioners note that the intermodal porting requests that they received from CMRS providers were their first requests for any type of porting.<sup>11</sup> Because they had not previously received requests from other wireline carriers to make their systems LNP-capable, the Petitioners argue that they were at a technological disadvantage compared to most, if not all, of the larger LECs in their MSAs, which had already upgraded their systems to provide wireline-to-wireline porting. Therefore, the Petitioners request additional time to comply with the intermodal porting requirements, many requesting the same period given to LECs operating outside the top 100 MSAs.<sup>12</sup>

5. On November 21, 2003, the Independent Telephone and Telecommunications Alliance, the National Telecommunications Cooperation Association, and the Organization for the Promotion and Advancement of Small Telecommunications Companies (Joint Petitioners) filed an Emergency Joint Petition for Stay and Clarification (Joint Petition) requesting that the Commission stay application of the

<sup>5</sup> *First Report and Order* at 8434-36, paras. 157-160.

<sup>6</sup> Telephone Number Portability, CC Docket No. 95-116, Memorandum Opinion and Order and Further Notice of Proposed Rulemaking, FCC 03-284 (rel. Nov. 10, 2003) (*Intermodal Order*).

<sup>7</sup> *Intermodal Order* at para. 29.

<sup>8</sup> *Id.*

<sup>9</sup> See Appendix A. Sprint Corporation (Sprint) filed oppositions to five of these petitions and comments in support of one of the petitions. See Appendix B. Additionally, Northeast Florida and Valley filed reply comments to Sprint's oppositions to their petitions. *Id.*

<sup>10</sup> See, e.g., Northeast Florida Petition at 3; Yadkin Valley Petition at 2; OTELCO Petition at 2; MoKan Petition at 3.

<sup>11</sup> See, e.g., MoKan Petition at 4; Northeast Florida at 4; United Petition at 2-3; Blountsville Petition at 3-4.

<sup>12</sup> A number of the Petitioners also claim that it was unclear, until the November 10, 2003 *Intermodal Order*, whether they would have had to act on the requests from CMRS providers that do not have points of interconnection or numbering resources in the rate centers where the customers' wireline numbers are provisioned. These Petitioners state that, because the clarification occurred only two weeks before the November 24 deadline, it would be technologically and operationally impossible to become intermodal porting capable by November 24, even with the carriers taking reasonable efforts and acting in good faith.

*Intermodal Order* with respect to Two Percent Carriers until the Commission reconsiders and/or clarifies certain aspects of that decision.<sup>13</sup> Specifically, the Joint Petitioners assert that it is technically infeasible for Two Percent Carriers to comply with the November 24, 2003 deadline,<sup>14</sup> and that the interests of all the parties involved in the port request, including the consumer, will benefit from additional time for Two Percent Carriers to face the operational and network hurdles that must be overcome to achieve a smooth transition.<sup>15</sup> Moreover, the Joint Petitioners argue that Two Percent Carriers need additional time to become capable of wireline-to-wireless porting because many of them had never been requested to support wireline-to-wireline porting and were uncertain of their intermodal porting obligations until the release of the *Intermodal Order* two weeks before the November 24, 2003.<sup>16</sup>

6. *Waiver Standard.* The Commission may, on its own motion, waive its rules when good cause is demonstrated.<sup>17</sup> The Commission may exercise its discretion to waive a rule where the particular facts make strict compliance inconsistent with the public interest.<sup>18</sup> In doing so, the Commission may take into account considerations of hardship, equity, or more effective implementation of overall policy on an individual basis.<sup>19</sup> Commission rules are presumed valid, however, and an applicant for waiver bears a heavy burden.<sup>20</sup> Waiver of the Commission's rules is therefore appropriate only if special circumstances warrant a deviation from the general rule, and such a deviation will serve the public interest.<sup>21</sup>

### III. DISCUSSION

7. We find that good cause exists to grant a waiver of the wireline-to-wireless porting requirement for Covered Carriers until May 24, 2004. Special circumstances exist for Covered Carriers because of the technological and operational limitations they face in implementing the necessary modifications to provide wireline-to-wireless porting. We also find that this additional time is consistent with the public interest. Therefore, we grant the Waiver Petitions and the Joint Petition, in part, to the extent consistent with this order, and otherwise deny them.

8. *Special Circumstances.* We find that special circumstances warrant a limited deviation from the November 24, 2003 deadline for Covered Carriers. Specifically, we recognize that the Covered Carriers' networks have technological limitations that cannot be resolved immediately to comply with the wireline-to-wireless porting requirement. The Joint Petitioners and most of the Petitioners assert that, unlike the large carriers serving within the Top 100 MSAs, a number of Two Percent Carriers in those markets had not received requests from other wireline carriers for wireline-to-wireline porting prior to

<sup>21</sup> *Id.* at 1159.

May 24, 2003.<sup>22</sup> As a result, in order to offer intermodal portability to their subscribers, these smaller carriers must acquire the hardware and software necessary to provide porting, make the necessary network upgrades, and ensure that their upgraded networks work reliably and accurately.<sup>23</sup> Some of the Petitioners also assert that Two Percent Carriers often lack the experience and technical experience with number porting to quickly implement the necessary upgrades to their systems to ensure accurate porting.<sup>24</sup> Accordingly, we conclude that special circumstances exist to grant Two Percent Carriers who have not previously upgraded their systems to support LNP a limited amount of additional time to overcome the technological obstacles they face to successfully meet a request for wireline-to-wireless porting.<sup>25</sup> Such relief is also consistent with the relief we granted, in the *Intermodal Order*, to similarly situated wireline carriers operating outside the top 100 MSAs.<sup>26</sup>

9. *Public Interest.* We likewise find that the additional time is in the public interest for Covered Carriers to become capable of providing wireline-to-wireless porting. While we continue to deem rapid implementation of number portability to be in the public interest, we also believe it to be just as important that carriers implement and test the necessary system modifications to ensure reliability, accuracy, and efficiency in the porting process.<sup>27</sup> As we found with the waiver granted to wireline carriers outside the top 100 MSAs, a transition period for Covered Carriers will help ensure a smooth transition and provide Covered Carriers sufficient time to make necessary modifications to their systems.<sup>28</sup>

10. We also agree with the Petitioners that consumers will not likely be adversely impacted by the grant of an additional six months to these carriers. According to the Petitioners, many Two Percent Carriers had not received requests or even inquiries from their customers concerning their ability to port their wireline numbers,<sup>29</sup> and some carriers have devised temporary solutions to allow at least some of their customers to port their wireline numbers if they so desire.<sup>30</sup> Therefore, we anticipate that few customers will be adversely impacted by this limited waiver.

---

<sup>22</sup> See, e.g., MoKan Petition at 4; OTELCO Petition at 4, 8; Northeast Petition at 4; Blountsville Petition at 4, 9; Warwick Valley Petition at 4, 9; United Petition at 2-3, 7; YCOM Petition at 3, 8; Rio Virgin Petition at 3, 7; Egyptian Petition at 3, 8; Cascade Utilities Petition at 3, 7-8; and Laurel Highland Petition at 3, 7-8. See also Joint Petition at 7.

<sup>23</sup> See, e.g., Full Service Petition at 2. We note, however, that additional time is not necessary for Two Percent Carriers inside the top 100 MSAs that received a request to port a subscriber's number to another wireline carrier before May 24, 2003. These carriers would already have had to become LNP capable as of November 24, 2003, and therefore, would only need to make accommodations to provide wireline-to-wireless porting. Likewise, carriers would not need additional time for switches that are already LNP capable.

<sup>24</sup> See, e.g., MoKan Petition at 5; Northeast Florida at 5.

<sup>25</sup> See, e.g., MoKan Petition at 5; Northeast Florida at 5. In response to Sprint's oppositions, we note that Two Percent Carriers that were LNP capable as of November 24, 2003, or otherwise received a request from a wireless carrier that has a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned, must continue to comply with the current requirements for wireline-to-wireless porting.

<sup>26</sup> *Intermodal Order* at para. 29.

<sup>27</sup> Joint Petition at 4, 18. See also MoKan Petition at 7 ("Without appropriate testing, there will be delays and errors in porting numbers, which is not in the best interest of the consumer or either carrier involved with the port.").

<sup>28</sup> *Intermodal Order* at para. 29.

<sup>29</sup> See, e.g., MoKan Petition at 6, Northeast Florida at 6.

<sup>30</sup> See, e.g., Full Service Petition at 3 (moving some of its customers from the outdated switch to UNE-P service which allows for number portability until a new switch that supports number portability is installed).

11. We disagree with Sprint's claim that such a waiver would relieve Covered Carriers of their obligations to provide wireline-to-wireless porting.<sup>31</sup> Rather the relief granted in this Order merely gives Covered Carriers additional time to overcome the technological and operations hurdles that large carriers in the top 100 MSAs did not face. Moreover, the waiver will not adversely impact rural customers because of its limited nature.

#### IV. ORDERING CLAUSE

12. Accordingly, IT IS ORDERED that, pursuant to authority contained in sections 1, 4(i), 251, and 332 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 251, 332, we GRANT a limited waiver of the wireline-to-wireless porting requirement, until May 24, 2004, for local exchange carriers with fewer than two percent of the nation's subscriber lines in the aggregate nationwide that operate in the top 100 Metropolitan Statistical Areas and have not received a request for local number porting from either a wireline carrier prior to May 24, 2003 or a wireless carrier that has a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned.

13. IT IS FURTHER ORDERED, pursuant to authority contained in sections 1, 4(i), 251, and 332 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 251, 332, that the petitions listed in Appendix A to this Order ARE GRANTED IN PART AND DENIED IN PART, to the extent provided herein.

ORDER

Adopted: May 12, 2004

Released: May 13, 2004

By the Deputy Chief, Wireline Competition Bureau:

I. INTRODUCTION

1. In this Order, we deny the petition filed by The North-Eastern Pennsylvania Telephone Company (NEP) seeking an extension of the May 24, 2004 deadline for implementing local number portability (LNP or porting).<sup>1</sup> We find that NEP has not demonstrated that special circumstances warrant a waiver or that such an extension is in the public interest. We will not, however, enforce NEP's LNP obligations until sixty days after the release of this Order to provide NEP with an opportunity to make arrangements to come into compliance with its LNP obligations.

II. BACKGROUND

2. *Local Number Portability.* Section 251(b) of the Communications Act of 1934, as amended, (Act)<sup>2</sup> mandates local exchange carriers (LECs) to provide LNP in accordance with the requirements outlined by the Commission.<sup>3</sup> The Commission, in the *Number Portability First Report and Order*, established the parameters for LNP and required commercial mobile radio service (CMRS or wireless)

<sup>1</sup> See Petition of The North-Eastern Pennsylvania Telephone Company Petition for Waiver of Section 52.23(b) of the Commission's Rules, filed March 23, 2004 (NEP Petition). The NEP petition was placed on public notice on March 26, 2004. See *Wireline Competition Bureau Seeks Comment on the Petition of The North-Eastern Pennsylvania Telephone Company for Temporary Waiver of the Commission's Number Portability Requirements*, Public Notice, CC Docket No. 95-116, DA 04-798 (rel. March 26, 2004). Comments were filed by Cellular Telecommunications & Internet Association (CTIA), Dobson Communications Corporation (Dobson), Nextel Communications, Inc. (Nextel) and Verizon Wireless (Verizon), and reply comments were filed by National Telecommunications Cooperative Association (NTCA), NEP, and T-Mobile USA, Inc. (T-Mobile).

<sup>2</sup> 47 U.S.C. §§ 151-174.

<sup>3</sup> 47 U.S.C. §251(b).

providers to become LNP-capable pursuant to sections 1, 2, 4(i), and 332 of the Act.<sup>4</sup> In doing so, the Commission concluded that the public interest is served by making LNP available across different technologies and thereby promoting competition between CMRS service providers and wireline carriers.<sup>5</sup> Initially, CMRS providers were required to become LNP-capable by June 30, 1999.<sup>6</sup> The Commission subsequently extended this deadline, and required CMRS carriers operating in the top 100 Metropolitan Statistical Areas (MSAs) to provide number portability upon request by another carrier by November 24, 2003.<sup>7</sup> CMRS carriers operating outside the top 100 MSAs must become LNP-capable within six months of a request or by May 24, 2003, whichever is later.<sup>8</sup> On November 10, 2003, the Commission concluded that, as of November 24, 2003, LECs must port numbers to wireless carriers where the requesting wireless carrier's "coverage area" overlaps the geographic location of the rate center in which the customer's wireline number is provisioned, provided that the porting-in carrier maintains the number's original rate center designation following the port.<sup>9</sup> The Commission, however, granted wireline carriers operating in areas outside of the 100 largest MSAs, in certain circumstances, a waiver until May 24, 2004 of the requirement to port numbers to wireless carriers.<sup>10</sup> The Commission later granted certain LECs with fewer than two percent of the nation's subscriber lines in the aggregate nationwide (Two Percent Carriers) that operate in the top 100 MSAs a limited waiver of the wireline-to-wireless porting requirement.<sup>11</sup>

3. *NEP's Request for Waiver.* NEP is a rural incumbent LEC providing service in Northeast Pennsylvania.<sup>12</sup> NEP represents that it decided, in 2001, to upgrade its switch network and sought

FCC*, No. 02-1264 (D.C. Cir. June 6, 2003) (Dismissing in part and denying in part CTIA's appeal of the Commission's decision in the *Verizon Wireless LNP Forbearance Order*). CMRS carriers were required to be LNP-capable by November 24, 2003 if requests from other carriers were received by February 24, 2003. *Verizon Wireless LNP Forbearance Order*, 17 FCC Rcd at 14985-86. The *Verizon Wireless LNP Forbearance Order* also lays out the history of the CMRS carriers' LNP deadline extensions. *See also, Western Wireless Limited, Conditional Petition for Waiver of Local Number Portability and Thousands-Block Number Pooling Obligations*, CC Docket Nos. 95-116 and 99-200, Order, 18 FCC Rcd 24692 (Wireline Comp. Bur. 2003) (*Western Wireless Order*).

<sup>8</sup> *Verizon Wireless LNP Forbearance Order*, 17 FCC Rcd at 14986.

<sup>9</sup> *See Telephone Number Portability, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues*, CC Docket No. 95-116, Memorandum Opinion and Order and Further Notice of Proposed Rulemaking, 18 FCC Rcd 23697, 23706-07 (2003) (*Intermodal LNP Order*).

<sup>10</sup> *Id.*

<sup>11</sup> *Telephone Number Portability*, Order, 19 FCC Rcd 875 (2004).

<sup>12</sup> NEP's existing switch network consists of eight exchanges. These exchanges include the Union Dale, Harford, New Milford, Jackson, Thompson, Pleasant Mount, Clifford, and Forest City exchanges. *See NEP Petition* at 2, 5.

informal quotes from various switch equipment manufacturers at that time.<sup>13</sup> NEP subsequently concluded that it would be more efficient and economical to replace its existing switches with software based switch (“soft switch”) technology.<sup>14</sup> Accordingly, in March 2003, NEP sought formal quotes and proposals from several switch manufacturers for soft switches.<sup>15</sup> In September 2003, NEP contracted with Taqua, Inc. (Taqua) to purchase eight soft switches to be installed on a phased-in basis, beginning on May 1, 2004 and ending on December 31, 2005.<sup>16</sup> However, according to NEP, certain service feature implementation issues need to be resolved before the first switch can be put into service.<sup>17</sup> NEP requests a waiver to provide additional time to accommodate the deployment schedule for its eight exchanges and to resolve the implementation issues.<sup>18</sup>

4. NEP contends good cause exists for granting an extension of the May 24, 2004 porting implementation deadline.<sup>19</sup> Specifically, NEP maintains that it has been planning and implementing network upgrades since 2001 to address expected network capability requirements.<sup>20</sup> NEP argues that it did not anticipate that intermodal porting<sup>21</sup> would be an “imminent requirement” until the Commission’s *Intermodal LNP Order* released in November 2003.<sup>22</sup> Upon release of the order, NEP contends that it immediately reviewed its number portability plans with Taqua.<sup>23</sup> NEP maintains that, while working with Taqua to resolve certain service feature issues, it became apparent to NEP that it will be unable to meet the May 24, 2004 implementation deadline for all of its switches.<sup>24</sup> Further, NEP states that it will provide the Commission with quarterly progress reports and updates to the deployment schedule, including solutions that will allow NEP to advance its deployment schedule and number portability.<sup>25</sup>

<sup>13</sup> *Id.* at 2.

<sup>14</sup> *Id.*

<sup>15</sup> *Id.* at 3.

<sup>16</sup> *Id.* at 3, 5.

<sup>17</sup> *Id.* at 3.

<sup>18</sup> *See id.* at 5. NEP’s projected switch in-service date for its eight exchanges is as follows: (1) Union Dale - May 1, 2004; Harford - June 30, 2004; New Milford - September 30, 2004; Jackson - December 31, 2004; Thompson - March 31, 2005; Pleasant Mount - June 30, 2005; Clifford - September 30, 2005; and Forest City - December 31, 2005. *Id.* NEP notes, however, that this deployment schedule is dependent on Taqua’s resolution of service feature problems and the successful deployment of LNP. *Id.*

<sup>19</sup> *Id.* at 1; NEP Reply Comments at 1-2.

<sup>20</sup> NEP Petition at 2-3.

<sup>21</sup> Intermodal porting is porting between wireline and wireless service providers.

<sup>22</sup> *Id.* at 4.

<sup>23</sup> *Id.*

<sup>24</sup> *Id.* at 5.

<sup>25</sup> *Id.* at 6.

5. CTIA, Dobson, Nextel, Verizon, and T-Mobile oppose granting NEP's waiver.<sup>26</sup> They argue that NEP has not demonstrated through substantial, credible evidence that special circumstances justify a waiver of the Commission's LNP rules.<sup>27</sup> They also contend that the public interest would not be served if such waiver is granted.<sup>28</sup> Specifically, they argue that grant of NEP's waiver would undermine the Commission's goal of promoting competition and cause customer confusion.<sup>29</sup>

6. One commenter, NTCA, supports NEP's petition.<sup>30</sup> NTCA maintains that, because NEP is moving toward full compliance with its LNP obligations, the Commission should provide NEP with a temporary waiver.<sup>31</sup> NTCA contends that large carriers, such as Nextel and Verizon, fail to take into account the financial, technical, and staffing realities of small LECs.<sup>32</sup> According to NTCA, it would have been financially irresponsible for NEP to upgrade its equipment prior to having a firm obligation to do so.<sup>33</sup>

7. *Waiver Standard*. The Commission's rules may be waived when good cause is demonstrated.<sup>34</sup> The Commission may exercise its discretion to waive a rule where the particular facts make strict compliance inconsistent with the public interest.<sup>35</sup> In doing so, the Commission may take into account considerations of hardship, equity, or more effective implementation of overall policy on an individual basis.<sup>36</sup> Commission rules are presumed valid, however, and an applicant for waiver bears a heavy burden.<sup>37</sup> Waiver of the Commission's rules is therefore appropriate only if special circumstances warrant a deviation from the general rule, and such a deviation will serve the public interest.<sup>38</sup>

8. In seeking an extension of the LNP deployment deadline, a carrier must provide substantial, credible evidence to support its contention that it is unable to comply with the deployment schedule.<sup>39</sup> A request for an extension of a deadline must be filed with the Commission at least sixty days in advance of the deadline.<sup>40</sup>

### III. DISCUSSION

9. We find that NEP has not demonstrated good cause to justify waiving the May 24, 2004 porting deadline. In particular, we agree with those commenters who argue that NEP has not shown through substantial, credible evidence that special circumstances warrant an extension of the porting deadline until December 31, 2005 and that postponing porting as requested will serve the public interest.<sup>41</sup> We decline, however, to enforce NEP's LNP obligations for sixty days following the release of this Order.

10. *Special Circumstances.* We are not persuaded by NEP's claims that special circumstances exist warranting a waiver of the May 24, 2004 porting deadline in order to accommodate NEP's switch delivery and deployment schedule, and provide additional time to resolve any service feature issues. We find that NEP has not presented "extraordinary circumstances beyond its control in order to obtain an extension of time."<sup>42</sup> Rather, NEP consciously made a business decision to upgrade its switches on a certain schedule.<sup>43</sup> NEP has not shown that challenges it may face are different from those faced by similarly situated carriers who are able to comply.<sup>44</sup> Generalized references to limited resources and implementation problems do not constitute substantial, credible evidence justifying an exemption from the porting requirements. NEP has known since 1996 that it would need to support LNP within six months of a request from a competing carrier.<sup>45</sup> Although wireless LNP was delayed, all carriers have been on notice since July 2002 that wireless and intermodal LNP would become available beginning in November 2003.<sup>46</sup> Thus, NEP has had sufficient time to follow through with these mandates and prepare for LNP.<sup>47</sup>

<sup>43</sup> *See supra* ¶ 3.

<sup>44</sup> *See Western Wireless Order*, 18 FCC Rcd at 24696, ¶ 10 (in denying a waiver request to extend the thousands-block number pooling and LNP deadlines, the Bureau found that "Western ha[d] not demonstrated that it will sustain costs that are different from, or burdensome than, the costs of similarly situated Tier II wireless carriers").

<sup>45</sup> *See Number Portability First Report and Order*, 11 FCC Rcd 8352; *Telephone Number Portability*, First Memorandum Opinion and Order on Reconsideration, 12 FCC Rcd 7236, 7273-75, ¶¶ 60-66 (1997) (*Number Portability Reconsideration Order*).

<sup>46</sup> *See Verizon Wireless LNP Forbearance Order*, 17 FCC Rcd 14972.

<sup>47</sup> *See Western Wireless Order*, 18 FCC Rcd at 24697-98, ¶ 13.  
(continued....)

11. *Public Interest.* We also conclude that an extension of the porting deadline until December 31, 2005 would not serve the public interest because it would unduly delay the benefits of number portability to the public and could cause customer confusion. Portability has promoted, and will continue to promote, competition, especially in underserved areas, by allowing consumers to move to carriers that better serve consumers' needs without having to make the difficult choice to give up their numbers.<sup>48</sup> Thus, we find that the public interest would be served by implementing porting as soon as possible.

12. Furthermore, NEP should have considered the porting requirements, set out by the Commission long ago, when it contracted with vendors to install necessary upgrades. Accordingly, we conclude that granting NEP's request to extend the porting deadline would be inconsistent with the Commission's policy to promote competition, consumer choice, and efficient number use. We therefore deny NEP's request for a waiver of the May 24, 2004 porting implementation deadline.

13. Although we are not persuaded that a waiver of the porting requirements until December 31, 2005 is justified, we decline to enforce NEP's LNP obligations for sixty days following the release of this Order.<sup>49</sup> We find that some limited time to allow NEP to make the necessary preparations to implement LNP is reasonable to ensure compliance with our rules.<sup>50</sup> Non-enforcement for sixty days will also help to avoid any network disruptions, maximize trouble-free operation of LNP, and ensure that customers' requests for services will not be delayed due to carriers' difficulty in obtaining numbering resources.<sup>51</sup>

Appendix B - Initial Regulatory Flexibility Analysis

## I. INTRODUCTION

1. In this order, we provide guidance to the industry on local number portability (LNP) issues relating to porting between wireless and wireline carriers (intermodal porting). First, in response to a Petition for Declaratory Ruling filed on January 23, 2003, by the Cellular Telecommunications and Internet Association (CTIA), we clarify that nothing in the Commission’s rules limits porting between wireline and wireless carriers to require the wireless carrier to have a physical point of interconnection<sup>1</sup> or numbering resources in the rate center where the number is assigned. We find that porting from a wireline carrier to a wireless carrier is required where the requesting wireless carrier’s “coverage area” overlaps the geographic location in which the customer’s wireline number is provisioned, provided that the porting-in carrier maintains the number’s original rate center designation following the port. The wireless “coverage area” is the area in which wireless service can be received from the wireless carrier. In addition, in response to a subsequent CTIA petition, we clarify that wireline carriers may not require wireless carriers to enter into interconnection agreements as a precondition to porting between the carriers. We also decline to adopt a mandatory porting interval for wireline-to-wireless ports at the present time, but we seek comment on the issue as noted below.

2. In the accompanying Further Notice of Proposed Rulemaking (Further Notice), we seek comment on how to facilitate wireless-to-wireline porting if the rate center associated with the wireless number is different from the rate center in which the wireline carrier seeks to serve the customer. In addition, we seek comment on whether we should require carriers to reduce the length of the porting interval for ports between wireless and wireline carriers.

## II. BACKGROUND

### A. Statutory and Regulatory Background

3. Section 251(b) of the Communications Act of 1934, as amended (the Act) requires local exchange carriers (LECs) to provide local number portability, to the extent technically feasible, in accordance with requirements prescribed by the Commission.<sup>2</sup> Under the Act and the Commission’s rules, local number portability is defined as “the ability of users of telecommunications services to retain,

<sup>1</sup> Referred to hereinafter as “point of interconnection.”

<sup>2</sup> 47 U.S.C. § 251(b)(2).

at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another.”<sup>3</sup>

4. The Commission released the Local Number Portability *First Report and Order* in 1996, which promulgated rules and deployment schedules for the implementation of number portability.<sup>4</sup> The Commission highlighted the critical policy goals underlying the LNP requirement, indicating that “the ability of end users to retain their telephone numbers when changing service providers gives customers flexibility in the quality, price, and variety of telecommunications services they can choose to purchase.”<sup>5</sup> The Commission found that “number portability promotes competition between telecommunications service providers by, among other things, allowing customers to respond to price and service changes without changing their telephone numbers.”<sup>6</sup>

5. The Commission adopted broad porting requirements, noting that “as a practical matter, [the porting obligation] requires LECs to provide number portability to other telecommunications carriers providing local exchange or exchange access service within the same MSA.”<sup>7</sup> In addition, the Commission noted the section 251(b) requires LECs to port numbers to wireless carriers. The Commission stated that “section 251(b) requires local exchange carriers to provide number portability to all telecommunications carriers, and thus to Commercial Mobile Radio Service (CMRS) providers as well as wireline service providers.”<sup>8</sup>

6. The Commission adopted rules implementing the LNP requirements. Section 52.21(k) of the rules defines number portability to mean “the ability of users of telecommunications services to retain, at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another.”<sup>9</sup> Section 52.23(b)(1) provides that “all local exchange carriers (LECs) must provide a long-term database method for number portability in the 100 largest Metropolitan Statistical Areas (MSAs) by December 31, 1998 ... in switches for which another carrier has made a specific request for the provision of number portability ...”<sup>10</sup> Finally, Section 52.23(b)(2)(i) of the Commission rules provides that “any wireline carrier that is certified ... to provide local exchange service, or any licensed CMRS provider, must be permitted to make a request for the provision of number portability.”<sup>11</sup>

7. In 1997, in the Local Number Portability *Second Report and Order*, the Commission adopted recommendations from the North American Numbering Council (NANC) for the implementation of

<sup>11</sup> 47 C.F.R. § 52.23(b)(2)(i).

wireline-to-wireline number portability.<sup>12</sup> Under the guidelines developed by the NANC, porting between LECs was limited to carriers with facilities or numbering resources in the same rate center to accommodate technical limitations associated with the proper rating of wireline calls.<sup>13</sup> The NANC guidelines made no recommendations regarding limitations on intermodal porting.

8. Although the Act excludes CMRS providers from the definition of local exchange carrier, and therefore from the section 251(b) obligation to provide number portability, the Commission has extended number portability requirements to CMRS providers.<sup>14</sup> In the Local Number Portability *First Report and Order*, the Commission indicated that it had independent authority under sections 1, 2, 4(i), and 332 of the Communications Act of 1934, as amended, to require CMRS carriers to provide number portability.<sup>15</sup> The Commission noted that “sections 2 and 332(c)(1) of the Act give the Commission authority to regulate commercial mobile radio service operators as common carriers ...”<sup>16</sup> Noting that section 1 of the Act requires the Commission to make available to people of the United States, a rapid, efficient, nation-wide and world-wide wire and radio communication service, the Commission stated that its interest in number portability “is bolstered by the potential deployment of different number portability solutions across the country, which would significantly impact the provision of interstate telecommunications services.”<sup>17</sup> Section 4(i) of the Act grants the Commission authority to “perform any and all acts, make such rules and regulations, and issue such orders, not inconsistent with [the Communications Act of 1934, as amended] as may be necessary in the execution of its functions.”<sup>18</sup> The Commission concluded that “the public interest is served by requiring the provision of number portability by CMRS providers because number portability will promote competition between providers of local telephone services and thereby promote competition between providers of interstate access services.”<sup>19</sup>

9. The Commission determined that implementation of wireless LNP, which would enable wireless subscribers to keep their phone numbers when changing carriers, would enhance competition between wireless carriers as well as promote competition between wireless and wireline carriers.<sup>20</sup> The

<sup>20</sup> *Id.* at 8434-36, paras. 157-160.

Commission noted that “service provider portability will encourage CMRS-wireline competition, creating incentives for carriers to reduce prices for telecommunications services and to invest in innovative technologies, and enhancing flexibility for users of telecommunications services.”<sup>21</sup> Commission rules reflecting the wireless LNP requirement provide that, by the implementation deadline, “all covered CMRS providers must provide a long-term database method for number portability ... in switches for which another carrier has made a request for the provision of LNP.”<sup>22</sup>

10. In the Local Number Portability *Second Report and Order*, after adopting NANC guidelines applicable to wireline-to-wireline porting, the Commission directed the NANC to develop standards and procedures necessary to provide for wireless carriers’ participation in local number portability.<sup>23</sup> The Commission indicated its expectation that changes to LNP processes would need to be made to accommodate porting to wireless carriers. The Commission noted that “the industry, under the auspices of NANC, will probably need to make modifications to local number portability standards and processes as it gains experience in implementing number portability and obtains additional information about incorporating CMRS providers into a long-term number portability solution and interconnecting CMRS providers with wireline carriers already implementing their number portability obligations.”<sup>24</sup> In addition, the Commission noted that the NANC would have to consider issues of particular concern to wireless carriers, including how to account for differences between service area boundaries for wireline versus wireless services.<sup>25</sup>

11. In 1998, the NANC submitted a report on the integration of wireless and wireline number portability from its Local Number Portability Administration (LNPA) Working Group to the Common Carrier Bureau (now known as the Wireline Competition Bureau).<sup>26</sup> The report discussed technical issues associated with wireless-to-wireline porting. The report noted that differences between the local serving areas of wireless and wireline carriers affected the porting capabilities of each type of carrier, making it infeasible for some wireline carriers to port-in numbers from wireless subscribers. The report explained that because wireline service is fixed to a specific location the subscriber’s telephone number is limited to use within the rate center within which it is assigned.<sup>27</sup> By contrast, the report noted, because wireless service is mobile and not fixed to a specific location, while the wireless subscriber’s number is associated with a specific geographic rate center, the wireless service is not limited to use within that rate center.<sup>28</sup> As a result of these differences, the report indicated that, if a wireless subscriber seeks to port his or her number to a wireline carrier, but the subscriber’s NPA-NXX is outside of the wireline rate center where the subscriber is located, the wireline carrier may not be able to receive the ported number.<sup>29</sup> The NANC did not reach consensus on a solution to this issue, and reported that this lack of symmetry, referred to as

<sup>28</sup> *Id.*

<sup>29</sup> *Id.*

“rate center disparity,” raises questions by some carriers about competitive neutrality.<sup>30</sup> The Common Carrier Bureau sought comment on the NANC report.<sup>31</sup>

12. The NANC submitted a second report on the integration of wireless and wireline number portability to the Commission in 1999,<sup>32</sup> and a third report in 2000,<sup>33</sup> both focusing on porting interval issues. The second report provided an analysis of the wireline porting interval and considered alternatives to reduce the porting interval for ports between wireless and wireline carriers.<sup>34</sup> The report recommended that each potential alternative be thoroughly developed and investigated.<sup>35</sup> The third report again analyzed the elements of the wireline porting interval and examined whether the length of the porting interval for both intermodal ports and wireline-to-wireline ports could be reduced.<sup>36</sup> The NANC determined that the wireline porting interval should not be reduced, but it was unable to reach a consensus on an intermodal porting interval.<sup>37</sup> Accordingly, we seek comment on the appropriate interval for intermodal porting.<sup>38</sup>

### **B. Outstanding Petitions for Declaratory Ruling**

13. On January 23, 2003, CTIA filed a petition requesting that the Commission issue a declaratory ruling that wireline carriers have an obligation to port their customers’ telephone numbers to wireless carriers whose service areas overlap the wireline rate center that is associated with the number.<sup>39</sup> In its petition, CTIA claims that some LECs have narrowly construed their LNP obligations with regard to wireless carriers, taking the position that portability is only required where the wireless carrier receiving the number already has a point of presence or numbering resources in the wireline rate center.<sup>40</sup> CTIA urges the Commission to confirm that wireline carriers have an obligation to port to wireless carriers when their respective service areas overlap. CTIA notes that, in several of its decisions, the Commission has found that LNP is necessary to promote competition between the wireless and wireline

<sup>40</sup> *Id.* at 3.

industries. CTIA argues that, without Commission action to resolve the deadlock over the rate center disparity issue, the reality of wireline-to-wireless porting will be at risk because many wireline subscribers will be unable to port their numbers to wireless carriers that serve their areas.<sup>41</sup>

14. CTIA also requests that the Commission confirm that a wireline carrier's obligation to port numbers to a wireless carrier can be based on a service-level porting agreement between the carriers, and does not require an interconnection agreement. According to CTIA, number portability requires only that a carrier release a customer's number to another carrier and assign the number to the new carrier in the Number Portability Administration Center (NPAC) database, which is queried solely to identify the carrier that can terminate calls to the customer.<sup>42</sup>

15. The majority of wireless carriers submitting comments support CTIA's request for declaratory ruling. They agree with CTIA that, without Commission action to resolve the rate center issue, the majority of wireline customers will be prevented from porting their number to a wireless carrier.<sup>43</sup> They call for the Commission to reject any proposal that would restrict porting to rate centers where a wireless carrier has already obtained numbers, contending that such a limitation would be inconsistent with the competitive objectives of intermodal LNP and would waste numbering resources.<sup>44</sup>

16. Wireline carriers generally oppose CTIA's petition.<sup>45</sup> Some argue that requiring LECs to port to carriers who do not have a point of interconnection or numbering resources in the same rate center in which the number is assigned would give wireless carriers an unfair competitive advantage over wireline carriers.<sup>46</sup> LECs argue that, in contrast to wireless carriers who have flexibility in establishing their service areas and rates, wireline carriers are governed by state regulations. Under the state regulatory regime, they rate and route local and toll calls based on wireline rate centers. Consequently, LECs contend, wireline service providers do not have the same opportunity that wireless carriers have to offer number portability where the rate center in which the number is assigned does not match the rate center in which the LEC seeks to serve the customer.<sup>47</sup> Others argue that CTIA's petition would amount to a system of location portability rather than service provider portability, causing customer confusion over

<sup>45</sup> Centurytel, Fred Williams & Associates, the Independent Alliance, the Michigan Exchange Carriers Association, NECA and NTCA, the Nebraska Rural Independent Companies, OPASTCO, SBC, TCA, USTA, and Valor Communications all filed comments opposing CTIA's January 23<sup>rd</sup> petition.

<sup>46</sup> *See, e.g.*, Centurytel Comments on CTIA's January 23<sup>rd</sup> Petition at 5-6; Fred Williams & Associates Comments on CTIA's January 23<sup>rd</sup> Petition at 8; SBC Comments on CTIA's January 23<sup>rd</sup> Petition at 1; Letter from Cronan O'Connell, Vice President-Federal Regulatory, Qwest to Marlene H. Dortch, Secretary, FCC, CC Docket No. 95-116 (filed Oct. 9, 2003) (Qwest Oct. 9<sup>th</sup> *Ex Parte*); and Letter from Kathleen B. Levitz, Vice President-Federal Regulatory, BellSouth to Marlene H. Dortch, Secretary, FCC, CC Docket No. 95-116 (filed Sept. 9, 2003) (BellSouth Sept. 9<sup>th</sup> *Ex Parte*).

<sup>47</sup> *See, e.g.*, Letter from James C. Smith, Senior Vice President, SBC Telecommunications, Inc. to Michael K. Powell, Chairman, FCC, CC Docket No. 95-116 (filed Aug. 29, 2003) (SBC Aug. 29<sup>th</sup> *Ex Parte*); and BellSouth Sept. 9<sup>th</sup> *Ex Parte*.

the rating of calls.<sup>48</sup> Several LECs also argue that the Commission may not permit intermodal porting outside of wireline rate center boundaries without first issuing a Notice of Proposed Rulemaking.<sup>49</sup> Several rural LECs argue that requiring porting between wireline and wireless carriers where the wireless carriers do not have a point of interconnection in the same rate center as the ported number would raise intercarrier compensation issues, as wireline carriers would be required to transport calls to ported numbers through points of interconnection outside of rural LEC serving areas.<sup>50</sup>

17. On May 13, 2003, CTIA filed a second Petition for Declaratory Ruling. In its petition, CTIA argues that, in addition to the rate center issue that was the subject of its January petition, there are additional LNP implementation issues that have not been resolved by industry consensus and therefore must be addressed by the Commission.<sup>51</sup> Specifically, CTIA requests that the Commission rule on the appropriate length of the porting interval, the necessity of interconnection agreements, a dispute between BellSouth and Sprint concerning the ability of carriers to designate different routing and rating points, definition of the largest 100 Metropolitan Statistical Areas (MSAs), the bona fide request requirement, and whether carriers must support nationwide roaming for customers with ported numbers.

18. On October 7, 2003, we released a Memorandum Opinion and Order addressing carrier requests for clarification of wireless-wireless porting issues.<sup>52</sup> In response to CTIA's May 13<sup>th</sup> petition as well as a Petition for Declaratory Ruling/Application for Review, we concluded that wireless carriers may not impose "business rules" on their customers that purport to restrict carriers' obligations to port numbers upon receipt of a valid request to do so. In addition, we clarified that wireless-to-wireless porting does not require the wireless carrier receiving the number to be directly interconnected with the wireless carrier that gives up the number or to have numbering resources in the rate center associated with the ported number. We clarified that, although wireless carriers may voluntarily negotiate interconnection agreements with one another, such agreements are not required for wireless-to-wireless porting. We confirmed also that, in cases where wireless carriers are unable to reach agreement regarding the terms and conditions of porting, all such carriers must port numbers upon receipt of a valid request from another carrier, with no conditions.

19. We encouraged wireless carriers to complete "simple" ports within the industry-established two and one half hour porting interval and found that no action was necessary regarding the porting of numbers served by Type 1 interconnection because carriers are migrating these numbers to switches served by Type 2 interconnection or are otherwise developing solutions.<sup>53</sup> Finally, we reiterated the requirement that wireless carriers support roaming nationwide for customers with pooled and ported

<sup>53</sup> Type 1 numbers reside in an end office of a LEC and are assigned to a Type 1 interconnection group, which connects the wireless carrier's switch and the LEC's end office switch. Type 2 numbers reside in a wireless carrier's switch and are assigned to a Type 2 interconnection group, which connects the wireless carrier's switch and a LEC access tandem switch or end office switch.

numbers, and we addressed outstanding petitions for waiver of the roaming requirement. We indicated our intention to address issues related to intermodal porting in a separate order.<sup>54</sup>

### III. ORDER

#### A. Wireline-to-Wireless Porting

20. *Background.* In its January 23<sup>rd</sup> Petition, CTIA requests that the Commission clarify that the LNP rules require wireline carriers to port numbers to any wireless carrier whose service area overlaps the wireline carrier's rate center that is associated with the ported number.<sup>55</sup> CTIA claims that, absent such a clarification, a majority of wireline customers will not be able to port their phone number to the wireless carrier of their choice because wireless carriers typically have a point of interconnection or numbering resources in only a fraction of the wireline rate centers in their service areas.<sup>56</sup> Citing prior Commission decisions, CTIA notes that the Commission has cited intermodal competition as a basis for imposing LNP requirements on wireless carriers.<sup>57</sup> CTIA argues that the Commission's objectives with respect to intermodal competition cannot be realized without prompt action.

21. *Discussion.* The Act and the Commission's rules impose broad porting obligations on LECs. Section 251(b) of the Act provides that all local exchange carriers "have the duty to provide, to the extent technically feasible, number portability in accordance with requirements prescribed by the Commission."<sup>58</sup> The Act defines number portability as "the ability of users of telecommunications services to retain, at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another."<sup>59</sup> In implementing these requirements in the Local Number Portability *First Report and Order*, the Commission determined that LECs were required to provide portability to all other telecommunications carriers, including CMRS service providers, providing local exchange or exchange access service within the same MSA.<sup>60</sup> The Commission's rules reflect these requirements, requiring LECs to offer number portability in switches for which another carrier made a request for number portability and providing that all carriers, including CMRS service providers must be permitted to make requests for number portability.<sup>61</sup>

---

<sup>54</sup> Remaining issues from CTIA's January 23<sup>rd</sup> and May 13<sup>th</sup> petitions pertaining to intermodal porting are addressed in this order. Additional issues from CTIA's May 13<sup>th</sup> petition, including the implication of the porting interval for E911, the definition of the 100 largest MSAs, and the bona fide request requirement have been addressed separately. See Letter from John B. Muleta, Chief, Wireless telecommunications Bureau, to John T. Scott, III, Vice President and Deputy General Counsel, Verizon Wireless and Michael F. Altschul, Senior Vice President, General Counsel, CTIA, CC Docket No. 95-116, DA 03-2190, dated July 3, 2003. See also, Numbering Resource Optimization, *Fourth Report and Order and Fourth Further Notice of Proposed Rulemaking*, CC Docket Nos. 99-200 and 95-116 (rel. June 18, 2003).

<sup>55</sup> January 23<sup>rd</sup> Petition at 3.

<sup>56</sup> *Id.* at 18.

<sup>57</sup> *Id.* at 12-16.

<sup>58</sup> 47 U.S.C. § 251(b).

<sup>59</sup> 47 U.S.C. § 153(30).

<sup>60</sup> *First Report and Order* at 8393, 8431, paras. 77 and 152.

<sup>61</sup> 47 C.F.R. § 52.23(b)(1), (b)(2)(i).

22. We conclude that, as of November 24, 2003, LECs must port numbers to wireless carriers where the requesting wireless carrier's "coverage area" overlaps the geographic location of the rate center in which the customer's wireline number is provisioned, provided that the porting-in carrier maintains the number's original rate center designation following the port.<sup>62</sup> Permitting intermodal porting in this manner is consistent with the requirement that carriers support their customers' ability to port numbers while remaining at the same location. For purposes of this discussion, the wireless "coverage area" is the area in which wireless service can be received from the wireless carrier. Permitting wireline-to-wireless porting under these conditions will provide customers the option of porting their wireline number to any wireless carrier that offers service at the same location. We also reaffirm that wireless carriers must port numbers to wireline carriers within the number's originating rate center. With respect to wireless-to-wireline porting, however, because of the limitations on wireline carriers' networks ability to port-in numbers from distant rate centers, we will hold neither the wireline nor the wireless carriers liable for failing to port under these conditions. Rather, we seek comment on this issue in the Further Notice below.

23. We make our determinations based on several factors. First, as stated above, under the Act and the Commission's rules, wireline carriers must port numbers to other telecommunications carriers, to the extent that it is technically feasible to do so, in accordance with regulations prescribed by the Commission.<sup>63</sup> There is no persuasive evidence in the record indicating that there are significant technical difficulties that would prevent a wireline carrier from porting a number to a wireless carrier that does not have a point of interconnection or numbering resources in the same rate center as the ported number. Accordingly, the plain text of the Act and the Commission's rules, requiring LECs to provide number portability applies. In fact, several LECs acknowledge that there is no technical obstacle to porting wireline numbers to wireless carriers whose point of interconnection is outside of the rate center of the ported numbers.<sup>64</sup> Moreover, at least two LECs, Verizon and Sprint, have already established agreements with their wireless affiliates that specifically provide for intermodal porting.<sup>65</sup> In addition, BellSouth indicates in its comments that it has no intention of preventing customers from porting their telephone numbers to wireless carriers upon the customers' requests – regardless of whether or not the

---

<sup>62</sup> We anticipate that a minimal amount of identifying information will be transmitted from the wireless carrier to the LEC when a customer seeks to port. For example, carriers may choose to verify the zip code of the porting-out wireline customer in their validation procedures.

<sup>63</sup> 47 U.S.C. § 251(b)(2), 47 C.F.R. § 52.23.

<sup>64</sup> See BellSouth Comments on CTIA's January 23<sup>rd</sup> Petition at 3; and USTA Comments on CTIA's January 23<sup>rd</sup> Petition at 7-8.

Several interexchange carriers (IXCs) have brought to the Commission's attention a problem IXCs face in identifying whether a customer has switched carriers. This problem can result in customers receiving erroneous bills from IXCs after they have switched local or interexchange carriers, and could also be a problem when customers port from a wireline carrier to a wireless carrier. While we do not address this issue in the instant order, we have sought comment on carrier petitions regarding this matter. See Pleading Cycle Established for Comments on Petition for Declaratory Ruling and/or Rulemaking, filed by Americatel Corporation, and for Comments on Joint Petition for Rulemaking to Implement Mandatory Minimum Customer Account Record Exchange Obligations on All Local and Interexchange Carriers, filed by AT&T Corp., Sprint Corp., and WorldCom, Inc., CG Docket No. 02-386, *Public Notice*, 17 FCC Rcd 25535 (2002).

<sup>65</sup> "Verizon and Verizon Wireless Reach Barrier-Free Porting Agreement in Advance of November 24 Deadline," Press Release from Verizon Wireless dated Sept. 22, 2003, available at <http://news.vzw.com/news/2003/09/pr2003-09-22.html>; and "Sprint Wireless Local Number Portability Plans on Track, on Schedule for November Deadline," Press Release from Sprint dated Oct. 1, 2003, available at [Sprint.com](http://Sprint.com).

carriers' service areas overlap.<sup>66</sup> Accordingly, BellSouth states, number portability can still occur despite the "rate center disparity" issue. We note that, to the extent that LECs assert an inability to port numbers to wireless carriers under the circumstances described herein, they bear the burden of demonstrating with specific evidence that porting to a wireless carrier without a point of interconnection or numbering resources in the same rate center to which the ported number is assigned is not technically feasible pursuant to our rules.

24. Second, neither the Commission's LNP rules nor any of the LNP orders have required wireless carriers to have points of interconnection or numbering resources in the same rate center as the assigned number for wireline-to-wireless porting. In the Local Number Portability *Second Report and Order*, the Commission adopted NANC recommendations regarding several specific aspects of number portability implementation, including technical and operational standards for the provision of number portability by wireline carriers.<sup>67</sup> In this context, the Commission adopted the NANC recommendations concerning the boundaries applicable to wireline-to-wireline porting. Specifically, the Commission adopted NANC recommendations limiting the scope of ports to wireline carriers based on wireline carriers' inability to receive numbers from foreign rate centers.<sup>68</sup>

25. In this order, we address a different issue, wireline-to-wireless porting. The NANC recommendations that were the subject of the *Second Report and Order* included a boundary for wireline-to-wireline porting, but were silent regarding wireline-to-wireless porting issues. In adopting the NANC recommendations, the Commission specifically recognized that the NANC had not included recommendations regarding wireless carriers' participation in number portability and that modifications to existing standards and procedures would probably need to be made as the industry obtained additional information about incorporating CMRS service providers into a long-term number portability solution and interconnecting CMRS carriers with wireline carriers already implementing number portability.<sup>69</sup> However, while the Commission noted that NANC should consider intermodal porting issues of concern to wireless carriers, it did not impose limits on wireline-to-wireless porting while NANC considered these issues, nor did it give up its inherent authority to interpret the statute and rules with respect to the obligation of wireline carriers to port numbers to wireless carriers. Accordingly, we find that in light of the fact that the Commission has never adopted any limits regarding wireline-to-wireless number portability, as of November 24, 2003, LECs must port numbers to wireless carriers where the requesting wireless carrier's coverage area overlaps the geographic location of the rate center to which the number is assigned.<sup>70</sup>

---

<sup>66</sup> See BellSouth Comments on CTIA's January 23<sup>rd</sup> Petition at 3. In recent ex parte filings, BellSouth argues that the Commission cannot proceed to require intermodal porting until it addresses the issues arising from the differences in network architecture, operational support systems, and regulatory requirements that distinguish wireline carriers from wireless carriers. See, e.g., BellSouth Sept. 9<sup>th</sup> *Ex Parte*.

<sup>67</sup> See *Second Report and Order*. Subsequent NANC reports address technical issues associated with wireless-to-wireline porting. In the Further Notice, we seek comment on these technical feasibility issues.

<sup>68</sup> North American Numbering Council Local Number Portability Selection Working Group Final Report and Recommendation to the FCC, Appendix D at 6 (rel. April 25, 1997). This report is available at [www.fc.gov/wcb/tapd/nanc/lnpastuf.html](http://www.fc.gov/wcb/tapd/nanc/lnpastuf.html).

<sup>69</sup> *Second Report and Order* 12 FCC Red at 12333-34.

<sup>70</sup> Similarly, wireless-to-wireline porting is required, as of November 24, 2003, where the requesting carrier's coverage area overlaps the geographic location of the rate center to which the number is assigned

26. We reject the argument advanced by certain wireline carriers,<sup>71</sup> that requiring LECs to port to a wireless carrier that does not have a point of interconnection or numbering resources in the same rate center as the ported number would constitute a new obligation imposed without proper notice. In fact, the requirement that LECs port numbers to wireless carriers is not a new rule. Citing the D.C. Circuit's decision in the *Sprint* case specifying the distinction between clarifications of existing rules and new rulemakings subject to APA procedures, Qwest, for example, argues that the permitting wireline-to-wireless porting in the manner outlined above would change LECs' existing porting obligations.<sup>72</sup> As described earlier, however, section 251(b) of the Act and the Commission's Local Number Portability *First Report and Order* impose broad porting obligations on wireline carriers. Specifically, these authorities require wireline carriers to provide portability to all other telecommunications carriers, including wireless service providers. While the Commission decision in the Local Number Portability *Second Report and Order* limited the scope of wireline carriers' porting obligation with respect to the boundary for wireline-to-wireline porting, the Commission, as noted above, has never established limits with respect to wireline carriers' obligation to port to wireless carriers. The clarifications we make in this order interpret wireline carriers' existing obligation to port numbers to wireless carriers. Therefore, these clarifications comply with the requirements of the Administrative Procedure Act as well as the D.C. Circuit's decision in the *Sprint* case.

27. We also reject the argument made by some LECs that the scope of wireline-to-wireless porting should be limited because wireline carriers may not be able to offer portability to certain wireless subscribers.<sup>73</sup> As discussed above, under the Act and the Commission's rules, wireline carriers must port numbers to other telecommunications carriers, to the extent technically feasible. The fact that there may be technical obstacles that could prevent some other types of porting does not justify denying wireline consumers the benefit of being able to port their wireline numbers to wireless carriers. Each type of service offers its own advantages and disadvantages (e.g., wireless service offers mobility and larger calling areas, but also the potential for dropped calls) and wireline customers will consider these attributes in determining whether or not to port their number. In our view, it would not be appropriate to prevent wireline customers from taking advantage of the mobility or the larger local calling areas associated with wireless service simply because wireline carriers cannot currently accommodate all potential requests from customers with wireless service to port their numbers to a wireline service provider. Evidence from the record shows that limiting wireline-to-wireless porting to rate centers where a wireless carrier has a point of interconnection or numbering resources would deprive the majority of wireline consumers of the ability to port their number to a wireless carrier.<sup>74</sup> With such limited intermodal porting, the competitive benefits we seek to promote through the porting requirements may not be fully achieved. The focus of the porting rules is on promoting competition, rather than protecting individual competitors. To the extent that wireline carriers may have fewer opportunities to win customers through porting, this disparity results from the wireline network architecture and state regulatory requirements, rather than Commission rules.

28. We conclude that porting from a wireline to a wireless carrier that does not have a point of interconnection or numbering resources in the same rate center as the ported number does not, in and of itself, constitute location portability, because the rating of calls to the ported number stays the same. As stated above, a wireless carrier porting-in a wireline number is required to maintain the number's original rate center designation following the port. As a result, calls to the ported number will continue to be rated

<sup>71</sup> See, e.g., Letter from Gary Lytle, Qwest to Marlene H. Dortch, Secretary, FCC (filed Oct. 17, 2003) (Qwest Oct. 17<sup>th</sup> *Ex Parte*); and SBC Aug. 29 *Ex Parte*.

<sup>72</sup> Qwest Oct. 17<sup>th</sup> *Ex Parte* at 11. See *Sprint Corp. v. FCC*, 315 F. 3d 369 (D.C. Cir. 2003).

<sup>73</sup> See, e.g., SBC Aug. 29<sup>th</sup> *Ex Parte* and BellSouth Sept. 9<sup>th</sup> *Ex Parte*.

<sup>74</sup> January 23<sup>rd</sup> Petition at 6.

in the same fashion as they were prior to the port. As to the routing of calls to ported numbers, it should be no different than if the wireless carrier had assigned the customer a new number rated to that rate center.<sup>75</sup>

29. Some wireline carriers contend that they lack the technical capability to support wireline-to-wireless porting in the manner outlined above, and that they need time to make technical modifications to their systems. We emphasize that our holding in this order requires wireline carriers to support wireline-to-wireless porting in accordance with this order by November 24, 2003, unless they can provide specific evidence demonstrating that doing so is not technically feasible pursuant to our rules.<sup>76</sup> We expect carriers that need to make technical modifications to do so forthwith, as the record indicates that major system modifications are not required and that several wireline carriers have already announced their technical readiness to port numbers to wireless carriers without regard to rate centers.<sup>77</sup> We recognize, however, that many wireline carriers outside the top 100 MSAs may require some additional time to prepare for implementation of intermodal portability. In addition we note that wireless carriers outside the top 100 MSAs are not required to provide LNP prior to May 24, 2004, and accordingly are unlikely to seek to port numbers from wireline carriers prior to that date. Therefore for wireline carriers operating in areas outside of the 100 largest MSAs, we hereby waive, until May 24, 2004, the requirement that these carriers port numbers to wireless carriers that do not have a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned. We find that this transition period will help ensure a smooth transition for carriers operating outside of the 100 largest MSAs and provide them with sufficient time to make necessary modifications to their systems.

30. Carriers inside the 100 largest MSAs (or outside the 100 largest MSAs, after the transition period) may file petitions for waiver of their obligation to port numbers to wireless carriers, if they can provide substantial, credible evidence that there are special circumstances that warrant departure from existing rules.<sup>78</sup> We note that several wireline carriers have already filed requests for waiver.<sup>79</sup> We will

---

<sup>75</sup> As noted in paras. 39-40 below, there is a dispute as to which carrier is responsible for transport costs when the routing point for the wireless carrier's switch is located outside the wireline local calling area in which the number is rated. See Sprint Petition for Declaratory Ruling. The existence of this dispute over transport costs does not, however, provide a reason to delay or limit the availability of porting from wireline to wireless carriers.

We recognize that the Act limits wireline carriers' ability to route calls outside of Local Access Transport Area (LATA) boundaries. See 47 U.S.C. § 272. See also, Application by SBC Communications, Inc., Southwestern Bell Telephone, and Southwestern Bell Communications, Inc. d/b/a Southwestern Bell Long Distance Pursuant to Section 271 of the Telecommunications Act of 1996 to Provide In-Region, InterLATA Services in Texas, *Memorandum Opinion and Order*, 15 FCC Rcd 18354 (2000). Accordingly, we clarify that our ruling is limited to porting within the LATA where the wireless carrier's point of interconnection is located, and does not require or contemplate porting outside of LATA boundaries.

<sup>76</sup> 47 U.S.C. § 251(b). We anticipate that, as a general matter, enforcement issues regarding both wireless-wireless and wireless-wireline local number portability at this time are likely to be better addressed in the context of Section 208 formal compliant proceedings or related mediations as opposed to FCC-initiated forfeiture proceedings. In this connection, we note that a violation of our number portability rules would constitute an unjust and unreasonably practice under section 201(b) of the Act.

<sup>77</sup> We note that Verizon has already announced its intention to port numbers without regard to rate centers. See "Verizon and Verizon Wireless Reach Barrier-Free Porting Agreement in Advance of November 24 Deadline," Press Release from Verizon Wireless dated Sept. 22, 2003, available at <http://news.vzw.com/news/2003/09/pr2003-09-22.html>.

<sup>78</sup> 47 C.F.R. § 1.3, 52.25(e). See also *WAIT Radio v. FCC*, 418 F.2d 1153, 1158 (D.C. Cir. 1969), *cert. denied*, 409 U.S. 1027 (1972).

consider these requests separately, and our decision in this order is without prejudice to any potential disposition of these requests.

## B. Interconnection Agreements

31. *Background.* In its January 23<sup>rd</sup> petition, CTIA requests that the Commission confirm that a wireline carrier's obligation to port numbers to a wireless carrier requires only that a carrier release a customer's number to another carrier and assign the number to the new carrier in the Number Portability Administration Center (NPAC) database, which is queried solely to identify the carrier that can terminate calls to the customer. From a practical perspective, CTIA contends, such porting can be based on a service-level porting agreement between carriers, and does not require direct interconnection or an interconnection agreement. Moreover, CTIA argues, because the Commission imposed number portability requirements on wireless carriers pursuant to its authority under sections 1, 2, 4(i), and 332 of the Act, and outside the scope of sections 251 and 252, number portability between wireline and wireless carriers is governed by a different regime than number portability between wireline carriers and is subject to the Commission's unique jurisdiction over wireless carriers.<sup>80</sup>

32. A number of wireless carriers agree with CTIA, arguing that requiring wireless carriers to establish interconnection agreements with wireline carriers from whom they sought to port numbers would delay LNP implementation.<sup>81</sup> Several wireline carriers, however, assert that interconnection agreements for porting are necessary.<sup>82</sup> SBC, for example, argues that under sections 251 and 252 of the Act, LECs must establish interconnection agreements for porting.<sup>83</sup> SBC contends that interconnection agreements guarantee parties their right to negotiate, provide a means of resolving disputes, and allow public scrutiny of agreements.<sup>84</sup> In addition, some LECs argue that, without interconnection agreements, they have no means to ensure that they will receive adequate compensation for transporting and terminating traffic to wireless carriers.

33. Other LECs, on the other hand, disagree that interconnection agreements are a necessary precondition to intermodal porting. Verizon contends that intermodal porting is not a Section 251 requirement and is therefore not necessary to incorporate wireless-wireline porting into Section 251 agreements.<sup>85</sup> AT&T questions whether either service level agreements or interconnection agreements are necessary, contending that because such little information needs to be exchanged between carriers for porting, less formal arrangements may be sufficient.<sup>86</sup> Sprint argues that interconnection agreements are

<sup>86</sup> AT&T Reply Comments on CTIA's May 13<sup>th</sup> Petition at 7-8.

not required for LNP because whether or not a customer ports a number from one carrier to another has nothing to do with the interconnection arrangements two carriers use for the exchange of traffic.<sup>87</sup> Several LECs urge the Commission to let carriers determine on their own what type of agreement to use to facilitate porting.<sup>88</sup>

34. *Discussion.* We find that wireless carriers need not enter into section 251 interconnection agreements with wireline carriers solely for the purpose of porting numbers. We note that the intermodal porting obligation is also based on the Commission's authority under sections 1, 2, 4(i) and 332 of the Act. Sprint argues that interconnection agreements are not required to implement every section 251 obligation.<sup>89</sup> Sprint also claims that because porting involves a limited exchange of data (e.g., carriers need only share basic contact and technical information sufficient to allow porting functionality and customer verification to be established), interconnection agreements should not be required here.<sup>90</sup> We agree with Sprint that wireline carriers should be required to port numbers to wireless carriers without necessarily entering into an interconnection agreement because this obligation can be discharged with a minimal exchange of information. We thus find that wireline carriers may not unilaterally require interconnection agreements prior to intermodal porting. Moreover, to avoid any confusion about the applicability of section 252 to any arrangement between wireline and wireless carriers solely for the purpose of porting numbers, we forbear from these requirements as set forth below.

35. To the extent that the *Qwest Declaratory Ruling Order* could be interpreted to require any agreement pertaining solely to wireline-to-wireless porting to be filed as an interconnection agreement with a state commission pursuant to sections 251 and 252 of the Act, we forbear from those requirements. First, we conclude that interconnection agreements are not necessary to prevent unjust or unreasonable charges or practices by wireless carriers with respect to porting. The wireless industry is characterized by a high level of competition between carriers. Although states do not regulate the prices that wireless carriers charge, the prices for wireless service have declined steadily over the last several years.<sup>91</sup> No evidence suggests that requiring interconnection agreements for intermodal porting is necessary for this trend to continue.

36. For similar reasons, we find that interconnection agreements for intermodal porting are not necessary for the protection of consumers.<sup>92</sup> The intermodal LNP requirement is intended to benefit

---

<sup>87</sup> Letter from Luisa L. Lancetti, Vice President, PCS Regulatory Affairs, Sprint to John Rogovin, General Counsel, FCC (filed Sept. 22, 2003).

<sup>89</sup> See note 87.

<sup>90</sup> Sprint's profile information exchange process is an example of the type of contact and technical information that would trigger an obligation to port. See, Letter from Luisa L. Lancetti, Vice President PCS Regulatory Affairs, Sprint Corp. to John B. Muleta, Chief, Wireless Telecommunications Bureau (filed Sept. 23, 2003); and Letter from Luisa L. Lancetti, Vice President, PCS Regulatory Affairs, Sprint Corp. to John B. Muleta, Chief, Wireless Telecommunications Bureau and William Maher, Chief, Wireline Competition Bureau (filed August 8, 2003).

<sup>91</sup> Implementation of Section 6002(b) of the Omnibus Reconciliation Act of 1993, Annual Report and Analysis of Competitive Market Conditions with Respect to Commercial Mobile Services, *Eighth Report*, FCC 03-150, at 45 (rel. July 14, 2003).

<sup>92</sup> Certain LECs have expressed concern that without interconnection agreements between LECs and CMRS carriers, calls to ported numbers may be dropped, because NPAC queries may not be performed for customers who have ported their numbers from a LEC to a CMRS carrier. See Letter from Mary J. Sisak, Counsel for Centurytel, Inc. to Marlene H. Dortch, Secretary, FCC (filed Oct. 23, 2003). We do not find these concerns to be justified,

consumers by promoting competition between the wireless and wireline industries and creating incentives for carriers to provide new service offerings, reduced prices, and higher quality services. Requiring interconnection agreements for the purpose of intermodal porting could undermine the benefits of LNP to consumers by preventing or delaying implementation of intermodal porting. We also do not believe that the state regulatory oversight mechanism provided by Section 251 is necessary to protect consumers in this limited instance.

37. Finally, we conclude that forbearance is consistent with the public interest. Number portability, by itself, does not create new obligations with regard to exchange of traffic between the carriers involved in the port. Instead, porting involves a limited exchange of data between carriers to carry out the port. Sprint, for example, notes that to accomplish porting, carriers need only exchange basic contact information and connectivity details, after which the port can be rapidly accomplished.<sup>93</sup> Given the limited data exchange and the short time period required to port, we conclude that interconnection agreements approved under section 251 are unnecessary. In view of these factors, we conclude that it is appropriate to forbear from requiring interconnection agreements for intermodal porting.

### C. The Porting Interval

38. CTIA requests that the Commission require wireline carriers to reduce the length of the porting interval, or the amount of time it takes two carriers to complete the process of porting a number, for ports from wireline to wireless carriers.<sup>94</sup> Currently, the wireline-to-wireline porting interval is four business days.<sup>95</sup> The wireline porting interval was adopted by the NANC in its Architecture and Administrative Plan for Local Number Portability, which was approved by the Commission.<sup>96</sup> Upon subsequent review of the porting interval, the NANC agreed that the four business day porting interval for wireline-to-wireline porting should not be reduced; it did not specify a porting interval for intermodal porting.<sup>97</sup> The current porting interval for wireless-to-wireless ports is two and one half hours.<sup>98</sup> We decline to require wireline carriers to follow a shorter porting interval for intermodal ports at this time. Instead, we will seek comment on this issue in the Further Notice. We note that, while we seek comment on whether to reduce the length of the wireline porting interval, the current four business day porting

---

however, because the Commission's rules require carriers to correctly route calls to ported numbers. *See* Telephone Number Portability, CC Docket No. 95-116, *First Memorandum Opinion and Order on Reconsideration*, 12 FCC Rcd 7236, 7307-08, paras. 125-126.

<sup>94</sup> May 13<sup>th</sup> Petition at 7.

<sup>95</sup> Wireline carriers are required to complete the LSR/FOC exchange within 24 hours and complete the port within three business days thereafter. *See* North American Numbering Council Local Number Portability Selection Working Group Final Report and Recommendation to the FCC, Appendix E (rel. April 25, 1997).

<sup>96</sup> *Second Report and Order*, 12 FCC Rcd 12281 (1997)

<sup>97</sup> Letter from John R. Hoffman, NANC Chair to Dorothy Attwood, Chief, Common Carrier Bureau, (filed Nov. 29, 2000).

<sup>98</sup> *See* North American Numbering Council Local Number Portability Administration Working Group Report on Wireless Wireline Integration, May 8, 1998, CC Docket No. 95-116 (filed May 18, 1998) (First Report on Wireless Wireline Integration); North American Numbering Council Wireless Number Portability Subcommittee Report on Wireless Number Portability Technical, Operational, and Implementation Requirements Phase II, CC Docket No. 95-116 (filed Sept. 26, 2000); ATIS Operations and Billing Forum, Wireless Inter-carrier Communications: Interface Specification for Local Number Portability, Version 2, at § 2 p. 6 (Jan. 2003).

interval represents the outer limit of what we would consider to be a reasonable amount of time in which wireline carriers may complete ports. We note also that whatever porting interval affiliated wireline and wireless service providers offer within their corporate family must also be made available to unaffiliated service providers.<sup>99</sup>

#### **D. Impact of Designating Different Routing and Rating Points on LNP**

39. CTIA asks the Commission to resolve the intercarrier dispute between BellSouth and Sprint as it affects the rating and routing of calls to ported numbers.<sup>100</sup> CTIA contends that, although the dispute largely concerns matters of intercarrier compensation, to the extent LECs argue that they need not differentiate between rating and routing points for local calls, intermodal porting may not be available to consumers.<sup>101</sup> To ensure that permitting porting beyond wireline rate center boundaries does not cause customer confusion with respect to charges for calls, we clarify that ported numbers must remain rated to their original rate center. We note, however, that the routing will change when a number is ported. Indeed, several wireline carriers have expressed concern about the transport costs associated with routing calls to ported numbers. The National Exchange Carrier Association (NECA) and National Telecommunications Cooperative Association (NTCA), for example, argue in their joint comments, that when wireless carriers establish a point of interconnection outside of a rural LEC's serving area, a disproportionate burden is placed on rural LECs to transport originating calls to the interconnection points.<sup>102</sup> They argue that requiring wireline carriers to port telephone numbers to out-of-service area points of interconnection could create an even bigger burden. Other carriers point out, however, that issues associated with the rating and routing of calls to ported numbers are the same as issues associated with rating and routing of calls to all wireless numbers.<sup>103</sup>

40. We recognize the concerns of these carriers, but find that they are outside the scope of this order. As noted above, our declaratory ruling with respect to wireline-to-wireless porting is limited to ported numbers that remain rated in their original rate centers. We make no determination, however, with respect to the routing of ported numbers, because the requirements of our LNP rules do not vary depending on how calls to the number will be routed after the port occurs. Moreover, as CTIA notes, the rating and routing issues raised by the rural wireline carriers have been raised in the context of non-ported numbers and are before the Commission in other proceedings.<sup>104</sup> Therefore, without prejudging the outcome of any other proceeding, we decline to address these issues at this time as they relate to intermodal LNP.

### **IV. FURTHER NOTICE OF PROPOSED RULEMAKING**

#### **A. Wireless-to-Wireline Porting**

41. *Background.* As noted above, some LECs argue that allowing wireless carriers to port numbers wherever their coverage area overlaps the rate center in which the number is assigned would

---

<sup>99</sup> 47 U.S.C. §§ 201(b) and 202(a).

<sup>100</sup> May 13<sup>th</sup> Petition at 25-26.

<sup>101</sup> *Id.*

<sup>102</sup> NECA and NTCA Comments on CTIA's January 23<sup>rd</sup> Petition at 6.

<sup>103</sup> BellSouth Comments on CTIA's May 13<sup>th</sup> Petition at 11-12.

<sup>104</sup> *See, e.g.* In the Matter of Sprint Petition for Declaratory Ruling, Obligation of Incumbent LECs to Load Numbering Resources Lawfully Acquired and to Honor Routing and Rating Points Designated by Interconnecting Carriers, Sprint Petition for Declaratory Ruling, CC Docket No. 01-92 (filed July 18, 2002).

give wireless service providers an unfair competitive advantage over wireline carriers.<sup>105</sup> They contend that while this may facilitate widespread wireline-to-wireless porting, wireless-to-wireline porting can only occur in cases where the wireless customer is physically located in the wireline rate center associated with the phone number.<sup>106</sup> If the customer's physical location is outside the rate center associated with the number, porting the number to a wireline telephone at the customer's location could result in calls to and from that number being rated as toll calls. As a result, the LECs assert, they are effectively precluded from offering wireless-to-wireline porting to those wireless subscribers who are not located in the wireline rate center associated with their wireless numbers.<sup>107</sup> Furthermore, the LECs contend that for them to offer wireless-to-wireline porting in this context would require significant and costly operational changes.<sup>108</sup> Qwest, for example, argues that if the Commission were to make the Local Access Transport Area (LATA) or Numbering Plan Area (NPA) the relevant geographic area for porting, LECs would be required to upgrade switches, increase trunking, and rework billing and provisioning systems.<sup>109</sup>

42. *Discussion.* We seek comment on how to facilitate wireless-to-wireline porting where there is a mismatch between the rate center associated with the wireless number and the rate center in which the wireline carrier seeks to serve the customer. Some wireline commenters contend that requiring porting between wireline and wireless carriers where the wireless carrier does not have a point of interconnection or numbering resources in the rate center creates a competitive disparity because wireline carriers would not have the same flexibility to offer porting to wireless customers whose numbers are not associated with the wireline rate center. We seek comment on the technical impediments associated with requiring wireless-to-wireline LNP when the location of the wireline facilities serving the customer requesting the port is not in the rate center where the wireless number is assigned. We seek comment on whether technical impediments exist to such an extent as to make wireless-to-wireline porting under such circumstances technically infeasible. Commenters that contend there are technical implications should specifically describe them, including any upgrades to switches, network facilities, or operational support systems that would be necessary. Commenters should also provide detailed information on the magnitude of the cost of such upgrades along with documentation of the estimated costs. We also seek comment on whether the benefits associated with offering wireless-to-wireline porting would outweigh the costs associated with making any necessary upgrades. We seek comment on the expected demand for wireless-to-wireline porting. We note that wireline customers who decide to port their numbers to wireless carriers are able to port their numbers back to wireline carriers if they choose, because the numbers remain associated with their original rate centers.

43. In addition to technical factors, we seek comment on whether there are regulatory requirements that prevent wireline carriers from porting wireless numbers when the rate center associated with the number and the customer's physical location do not match. Commenters that suggest such obstacles exist and result in a competitive disadvantage should submit proposals to address these impediments, as well as consider the collateral effect on other regulatory objectives as a result of these proposals. We note that wireline carriers are not able to port a number to another wireline carrier if the rate center associated with the number does not match the rate center associated with the customer's

---

<sup>105</sup> See, e.g., Centurytel Comments on CTIA's January 23<sup>rd</sup> Petition at 5-6; Fred Williams & Associates Comments on CTIA's January 23<sup>rd</sup> Petition at 8; and SBC Comments on CTIA's January 23<sup>rd</sup> Petition at 1.

<sup>106</sup> See, e.g., Qwest Oct. 9<sup>th</sup> *Ex Parte*; and Letter from Herschel L. Abbott, Jr., Vice President-Government Affairs, BellSouth to Michael K. Powell, Chairman, FCC (filed Oct. 14, 2003).

<sup>107</sup> *Id.*

<sup>108</sup> See Letter from Cronan O'Connell, Vice President-Federal Regulatory, Qwest to Marlene H. Dortch, Secretary, FCC (filed July 24, 2003) at 4-5 (Qwest July 24<sup>th</sup> *Ex Parte*); and SBC Aug. 29<sup>th</sup> *Ex Parte*.

<sup>109</sup> See Qwest July 24<sup>th</sup> *Ex Parte* at 4-5.

physical location. We seek comment on whether wireless and wireline numbers should be treated differently in this regard. We also seek comment on whether there are any potential adverse impacts to consumers resulting from wireless-to-wireline porting where the rate center associated with the wireless number is different from the rate center in which the wireline carrier seeks to serve the customer.

44. In addition, we seek comment on whether there are other competitive issues that could affect our LNP requirements. For example, to the extent that wireless-to-wireline porting may raise issues regarding the rating of calls to and from the ported number when the rate center of the ported number and the physical location of the customer do not match, we seek comment on the extent to which wireline carriers should absorb the cost of allowing the customer with a number ported from a wireless carrier to maintain the same local calling area that the customer had with the wireless service provider. Alternatively, we seek comment on the extent to which wireline carriers can serve customers with numbers ported from wireless carriers on a Foreign Exchange (FX) or virtual FX basis.<sup>110</sup> A third option is for wireline carriers to seek rate design and rate center changes at the state level to establish larger wireline local calling areas. We seek comment on the procedural, technical, financial, and regulatory implications of each of these approaches. We also seek comment on the viability of each of these approaches and whether there are any alternative approaches to consider.

## B. Porting Interval

45. *Background.* Over the past several years, the NANC has studied the wireline porting interval and reviewed options for reducing the length of the interval for simple ports.<sup>111</sup> In the Third Report on Wireless/Wireline Integration, the Local Number Portability Administration Working Group analyzed the elements of the wireline porting interval and investigated how reducing the length of the interval for simple ports would affect carriers' operations.<sup>112</sup> The report noted that reducing the porting interval would require wireline carriers to make significant changes to their operations. First, reducing the porting interval would require wireline carriers to automate and make uniform the Local Service Request (LSR)/Local Service Request Confirmation (LSC) Firm Order Confirmation (FOC) process.<sup>113</sup> In addition, the report indicated that wireline carriers would likely have to eliminate or adjust their batch processing operations. The report noted that a change from batch processing to real time data processing would require in-depth system analysis of all business processes that use batch processing systems.<sup>114</sup> Based on its analysis of these and other challenges, the working group concluded that because most wireline carriers already found their processes and systems challenged to meet the current porting interval it was not feasible to reduce the length of the wireline porting interval for simple ports.<sup>115</sup>

46. Because of the number and complexity of changes that would be required in the porting process for wireline carriers, the NANC was not able to reach consensus on reducing the porting interval

---

<sup>110</sup> T-Mobile Comments on CTIA's January 23<sup>rd</sup> Petition at 11.

<sup>111</sup> See Second Report on Wireless Wireline Integration; Third Report on Wireless Wireline Integration.

<sup>112</sup> See Third Report on Wireless Wireline Integration. Simple ports are defined as those ports that: do not involve unbundled network elements, involve an account for a single line (porting a single line from a multi-line account is not a simple port), do not include complex switch translations (e.g., Centrex or Plexar, ISDN, AIN services, remote call forwarding, multiple services on the loop), may include CLASS features such as Caller ID, and do not include a reseller. All other ports are considered "complex" ports. *Id.* at 6.

<sup>113</sup> *Id.* at 13.

<sup>114</sup> *Id.* at 13-14.

<sup>115</sup> *Id.* at 14.

to accommodate intermodal porting.<sup>116</sup> The wireless industry expressed concern that the wireline four business day porting interval does not fit within its business model.<sup>117</sup> In order to accommodate the wireless business model, the NANC attempted to shorten the porting interval for wireline-to-wireless ports by developing a process that will allow the wireless carrier to activate the port before the wireline carrier activates the disconnect in the Number Portability Administration Center (NPAC). This process results in a situation referred to as a “mixed service” condition, whereby the customer can make calls on both the wireline and wireless phones before the port is completed. The NANC reported that this mixed service condition can result in misdirected callbacks in an emergency situation.<sup>118</sup> That is, for example, if the emergency operator attempts to callback a person that made a call from the wireless phone, the call may be routed to the wireline phone. The NANC consulted with the National Emergency Number Association and concluded that, while the mixed service condition is not desirable, the incidence of such is low and would not impede intermodal porting.<sup>119</sup>

47. LECs contend that their current porting interval cannot be reduced readily for intermodal porting, because it is necessary to support the complex systems and procedures of wireline carriers.<sup>120</sup> SBC, for example, explains that the current porting interval not only ensures that the porting out carrier correctly ports a number to the porting in carrier, but also that these carriers accurately update other systems, including E911, billing, and maintenance.<sup>121</sup> Qwest notes that wireline carriers have longer porting intervals due to differences in network and system configurations.<sup>122</sup> Qwest indicates that wireline carriers are often constrained by the provisioning of physical facilities (e.g., loops) to serve customers.<sup>123</sup> Moreover, LECs contend, reducing the length of the current wireline porting interval would require them to make changes to many of their systems and would involve significant expense.<sup>124</sup>

48. Wireless carriers argue that a reduced intermodal porting interval would encourage more consumers to use porting by eliminating confusion about the porting process.<sup>125</sup> They argue that a reduced porting interval is technically achievable and that wireline carriers should be required to make the

<sup>121</sup> SBC Aug. 29<sup>th</sup> *Ex Parte*.

<sup>122</sup> Qwest Comments on CTIA’s May 13<sup>th</sup> Petition at 7.

<sup>123</sup> *Id.*

<sup>124</sup> *Id.* at 5.

<sup>125</sup> *See, e.g.,* AT&T Wireless Comments on CTIA’s May 13<sup>th</sup> Petition at 3-6; Sprint Comments on CTIA’s May 13<sup>th</sup> Petition at 6-12; and T-Mobile Comments on CTIA’s May 13<sup>th</sup> Petition at 7-9.

necessary changes to their systems. At least one wireless carrier recognizes, however, that significant changes to LEC systems may be required to achieve reduced porting intervals.<sup>126</sup>

49. *Discussion.* Reducing the porting interval could benefit consumers by making it quicker for consumers to port their numbers. To that end, wireless carriers intend to complete intramodal wireless ports within two and one-half hours.<sup>127</sup> There, however, may be technical or practical impediments to requiring wireline carriers to achieve shorter porting intervals for intermodal porting. We seek comment on whether we should reduce the current wireline four business day porting interval for intermodal porting. If so, what porting interval should we adopt? Commenters proposing a shorter porting interval should specify what adjustments should be made to the LNP process flows developed by the NANC.<sup>128</sup> For example, the wireline NANC LNP Process Flows establish that the FOC must be finalized within 24 hours of receiving the port request.<sup>129</sup> Specific time periods are also established for other steps within the porting process that may require adjustment in the event that a shorter porting interval is adopted.

50. We also seek comment on whether adjustments to the NPAC processes, including interfaces and porting triggers, would be required.<sup>130</sup> In addition, we seek comment on the risks, if any, associated with reducing the porting interval for intermodal porting. We seek comment on an appropriate transition period in the event a shorter porting interval is adopted, during which time carriers can modify and test their systems and procedures.

51. We seek input from the NANC on reducing the interval for intermodal porting. The NANC recommendation should include corresponding updates to the NANC LNP process flows and any recommendations on an appropriate transition period. The NANC should provide its recommendations promptly as we intend to review the record and address this issue expeditiously.

## V. PROCEDURAL MATTERS

### A. Initial Regulatory Flexibility Analysis

52. As required by the Regulatory Flexibility Act, *see* 5 U.S.C. § 603, the Commission has prepared an Initial Regulatory Flexibility Analysis (“IRFA”) of the possible significant economic impact on small entities of the proposals suggested in the *Further Notice*. The IRFA is set forth in Appendix B. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments filed in response to the *Further Notice*, and must have a separate and distinct heading designating them as responses to the IRFA.

---

<sup>126</sup> See Sprint Comments on CTIA’s May 13<sup>th</sup> Petition.

<sup>127</sup> See First Report on Wireless Wireline Integration; North American Numbering Council Wireless Number Portability Subcommittee Report on Wireless Number Portability Technical, Operational, and Implementation Requirements Phase II, CC Docket No. 95-116 (filed Sept. 26, 2000); and ATIS Operations and Billing Forum, Wireless Intercarrier Communications: Interface Specification for Local Number Portability, Version 2, at § 2 p. 6 (Jan. 2003).

<sup>128</sup> See Local Number Portability Selection Working Group Final Report and Recommendation to the FCC (rel. April 25, 1997).

<sup>129</sup> FOC, or Firm Order Confirmation refers to the response the old service provider sends to the new service provider upon receiving the new service provider’s request to port a number, setting a due time and date for the port. See Local Number Portability Selection Working Group Final Report and Recommendation to the FCC (rel. April 25, 1997).

<sup>130</sup> The NPAC, administered by NeuStar, operates and maintains the centralized databases associated with LNP. Interaction with the NPAC is required for all porting transactions.

## B. Paperwork Reduction Analysis

53. This *Further Notice* contains no new or revised information collections.

## C. Ex Parte Presentations

54. This is a permit-but-disclose notice and comment rule making proceeding. Members of the public are advised that ex parte presentations are permitted, provided they are disclosed under the Commission's Rules.<sup>131</sup>

## D. Comment Dates

55. Pursuant to Sections 1.415 and 1.419 of the Commission's Rules, 47 C.F.R. §§ 1.415 and 1.419, interested parties may file comments on or before twenty (20) days from the date of publication of this *Further Notice* in the Federal Register and reply comments thirty (30) days from the date of publication of this *Further Notice* in the Federal Register. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS) or by filing paper copies.

56. Comments filed through the ECFS can be sent as an electronic file via the Internet to <http://www.fcc.gov/e-file/ecfs.html>. Generally, only one copy of an electronic submission must be filed. If multiple docket or rulemaking numbers appear in the caption of this proceeding, however, commenters must transmit one electronic copy of the comments to each docket or rule making number referenced in the caption. In completing the transmittal screen, commenters should include their full name, U.S. Postal Service mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by Internet e-mail. To get filing instructions for e-mail comments, commenters should send an E-mail to [ecfs@fcc.gov](mailto:ecfs@fcc.gov), and should including the following words in the body of the message, "get form <your e-mail address>." A sample form and directions will be sent in reply.

57. Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rule making number appear in the caption of this proceeding, commenters must submit two additional copies for each additional docket or rule making number. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail (although we continue to experience delays in receiving U.S. Postal Service mail). The Commission's contractor, Natek, Inc., will receive hand-delivered or messenger-delivered paper filings for the Commission's Secretary at 236 Massachusetts Avenue, N.E., Suite 110, Washington, DC 20002. The filing hours at this location are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building. Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743. U.S. Postal Service first-class mail, Express Mail, and Priority Mail should be addressed to 445 12th Street, SW, Washington, DC 20554. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center of the Federal Communications Commission, Room TW-A306, 445 12th Street, S.W., Washington, D.C. 20554.

58. Parties who choose to file by paper should also submit their comments on diskette. These diskettes should be submitted to the Commission's Secretary, Marlene H. Dortch, Office of the Secretary, Federal Communications Commission. The Commission's contractor, Natek, Inc., will receive hand-delivered or messenger-delivered diskette filings for the Commission's Secretary at 236 Massachusetts Avenue, N.E., Suite 110, Washington, DC 20002. The filing hours at this location are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be

<sup>131</sup> See generally 47 C.F.R. §§ 1.1202, 1.1203, 1.1206(a).

disposed of before entering the building. Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743. U.S. Postal Service first-class mail, Express Mail, and Priority Mail should be addressed to: 445 12th Street, SW, Washington, DC 20554. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission. Such a submission should be on a 3.5-inch diskette formatted in an IBM compatible format using Word for Windows or compatible software. The diskette should be accompanied by a cover letter and should be submitted in "read only" mode. The diskette should be clearly labeled with the commenter's name, the docket number of this proceeding, type of pleading (comment or reply comment), date of submission, and the name of the electronic file on the diskette. The label should also include the following phrase "Disk Copy - Not an Original." Each diskette should contain only one party's pleading, preferably in a single electronic file. In addition, commenters must send diskette copies to the Commission's copy contractor, Qualex International, Portals II, 445 12th Street, S.W., Room CY-B402, Washington, D.C. 20554.

59. Accessible formats (computer diskettes, large print, audio recording and Braille) are available to persons with disabilities by contacting Brian Millin, of the Consumer & Governmental Affairs Bureau, at (202)418-7426, TTY (202) 418-7365, or at [bmillin@fcc.gov](mailto:bmillin@fcc.gov). This Further Notice can be downloaded in ASCII Text format at: <http://www.fcc.gov/wtb>.

#### **E. Further Information**

60. For further information concerning this Further Notice of Proposed Rulemaking, contact: Jennifer Salhus, Attorney Advisor, Policy Division, Wireless Telecommunications Bureau, at (202) 418-1310 (voice) or (202) 418-1169 (TTY) or Pam Slipakoff, Attorney Advisor, Telecommunications Access Policy Division, Wireline Competition Bureau at (202) 418-1500 (voice) or (202) 418-0484 (TTY).

#### **VI. ORDERING CLAUSES**

61. Accordingly, IT IS ORDERED THAT, pursuant to sections 4(i) and 10 of the Communications Act of 1934, as amended, 47 U.S.C. sections 154(i) and 160, the Petitions for Declaratory Ruling filed by CTIA on January 23, 2003, and May 13, 2003, are GRANTED to the extent stated herein.

62. IT IS FURTHER ORDERED that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, SHALL SEND a copy of this Notice, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

FEDERAL COMMUNICATIONS COMMISSION

Marlene H. Dortch

## APPENDIX B

**Initial Regulatory Flexibility Analysis  
Further Notice of Proposed Rulemaking  
CC Docket No. 95-116**

1. As required by the Regulatory Flexibility Act, as amended (RFA),<sup>132</sup> the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this Further Notice of Proposed Rulemaking (Further Notice), CC Docket No. 95-116. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the Further Notice. The Commission will send a copy of the Further Notice, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration. *See* 5 U.S.C. § 603(a). In addition, the Further Notice and IRFA (or summaries thereof) will be published in the *Federal Register*.<sup>133</sup>

**A. Need for, and Objectives of, the Proposed Rules**

2. The Further Notice seeks comment on how to facilitate wireless-to-wireline porting where the rate center associated with the wireless number and the rate center in which the wireline carrier seeks to serve the customer do not match. The Further Notice also seeks comment on whether the Commission should reduce the current four-business day porting interval for intermodal porting.

**B. Legal Basis for Proposed Rules**

3. The proposed action is authorized under Section 52.23 of the Commission's rules, 47 C.F.R. § 52.23, and in Sections 1, 3, 4(i), 201, 202, 251 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 153, 154(i), 201-202, and 251.

**C. Description and Estimate of the Number of Small Entities To Which the Proposed Rules Will Apply**

4. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted.<sup>134</sup> The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."<sup>135</sup> In addition, the term "small business" has the same meaning as the term "small business concern" under Section 3 of the Small Business Act.<sup>136</sup> Under the Small Business Act, a "small business concern" is one that: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established

---

<sup>132</sup> *See* 5 U.S.C. § 603. The RFA, *see* 5 U.S.C. §§ 601-612, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Pub. L. No. 104-121, Title II, 110 Stat. 857 (1996).

<sup>133</sup> *See* 5 U.S.C. § 603(a)

<sup>134</sup> *See* 5 U.S.C. § 603(b)(3).

<sup>135</sup> 5 U.S.C. § 601(6).

<sup>136</sup> 5 U.S.C. § 601(3) (incorporating by reference the definition of "small business concern" in the Small Business Act, 15 U.S.C. § 632). Pursuant to 5 U.S.C. § 601(3), the statutory definition of a small business applies "unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the Federal Register."

by the Small Business Administration (SBA).<sup>137</sup> A small organization is generally "any not-for-profit enterprise which is independently owned and operated and is not dominant in its field."<sup>138</sup> Nationwide, as of 1992, there were approximately 275,801 small organizations.<sup>139</sup>

**5. Incumbent Local Exchange Carriers.** We have included small incumbent local exchange carriers LECs in this RFA analysis. As noted above, a "small business" under the RFA is one that, *inter alia*, meets the pertinent small business size standard (e.g., a telephone communications business having 1,500 or fewer employees), and "is not dominant in its field of operation."<sup>140</sup> The SBA's Office of Advocacy contends that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not "national" in scope.<sup>141</sup> We have therefore included small incumbent LECs in this RFA analysis, although we emphasize that this RFA action has no effect on the Commission's analyses and determinations in other, non-RFA contexts. According to the FCC's *Telephone Trends Report* data, 1,337 incumbent local exchange carriers reported that they were engaged in the provision of local exchange services.<sup>142</sup> Of these 1,337 carriers, an estimated 1,032 have 1,500 or fewer employees and 305 have more than 1,500 employees.<sup>143</sup>

**6. Competitive Local Exchange Carriers.** Neither the Commission nor the SBA has developed a specific small business size standard for providers of competitive local exchange services. The closest applicable size standard under the SBA rules is for Wired Telecommunications Carriers. Under that standard, such a business is small if it has 1,500 or fewer employees.<sup>144</sup> According to the FCC's *Telephone Trends Report* data, 609 companies reported that they were engaged in the provision of either competitive access provider services or competitive local exchange carrier services.<sup>145</sup> Of these 609 companies, an estimated 458 have 1,500 or fewer employees and 151 have more than 1,500 employees.<sup>146</sup>

**7. Wireless Service Providers.** The SBA has developed a size standard for small businesses within the two separate categories of Cellular and Other Wireless Telecommunications or Paging. Under

<sup>138</sup> *Id.* § 601(4).

<sup>139</sup> Department of Commerce, U.S. Bureau of the Census, 1992 Economic Census, Table 6 (special tabulation of data under contract to Office of Advocacy of the U.S. Small Business Administration).

<sup>140</sup> 5 U.S.C. § 601(3).

<sup>141</sup> See Letter from Jere W. Glover, Chief Counsel for Advocacy, SBA, to Chairman William E. Kennard, FCC (May 27, 1999). The Small Business Act contains a definition of "small business concern," which the RFA incorporates into its own definition of "small business." See 5 U.S.C. § 632(a) (Small Business Act); 5 U.S.C. 601(3) (RFA). SBA regulations interpret "small business concern" to include the concept of dominance on a national basis. 13 C.F.R. § 121.102(b).

<sup>142</sup> FCC, Wireline Competition Bureau, Industry Analysis and Technology Division, *Trends in Telephone Service*, at Table 5.3, p 5-5 (Aug. 2003) (*Telephone Trends Report*).

<sup>143</sup> *Id.*

<sup>144</sup> 13 C.F.R. § 121.201, NAICS code 513310.

<sup>145</sup> Telephone Trends Report, Table 5.3.

<sup>146</sup> *Id.*

that standard, such a business is small if it has 1,500 or fewer employees.<sup>147</sup> According to the FCC's *Telephone Trends Report* data, 719 companies reported that they were engaged in the provision of wireless telephony.<sup>148</sup> Of these 719 companies, an estimated 294 have 1,500 or fewer employees and 425 have more than 1,500 employees.

#### **D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities.**

8. To address concerns regarding wireline carriers' ability to compete for wireless customers through porting, future rules may change wireline porting guidelines. In addition, future rules may require wireline carriers to reduce the length of the current wireline porting interval for ports to wireless carriers. These potential changes may impose new obligations and costs on carriers.<sup>149</sup> Commenters should discuss whether such changes would pose an unreasonable burden on any group of carriers, including small entity carriers.

#### **E. Steps Taken to Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered**

9. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.<sup>150</sup>

10. The Further Notice reflects the Commission's concern about the implications of its regulatory requirements on small entities. Particularly, the Further Notice seeks comment on the concern that wireline carriers, including small wireline carriers, have expressed that permitting wireless carriers to port numbers wherever their rate center overlaps the rate center in which the number is assigned would give wireless carriers an unfair competitive advantage over wireline carriers. Wireline carriers contend that while permitting porting outside of wireline rate center boundaries may facilitate widespread wireline-to-wireless porting, wireless-to-wireline porting can only occur in cases where the wireless customer is physically located in the wireline rate center associated with the phone number. If the customer's physical location is outside the rate center associated with the number, porting the number to a wireline telephone at the customer's location could result in calls to and from that number being rated as toll calls. As a result, LECs assert, they are effectively precluded from offering wireless-to-wireline porting to those wireless subscribers who are not located in the wireline rate center associated with their wireless numbers.

11. The Further Notice seeks comment on how to facilitate wireless-to-wireline porting when the location of the wireline facilities serving the customer requesting the port is not in the rate center where the wireless number is assigned. The Further Notice seeks comment on whether there are technical or regulatory obstacles that prevent wireline carriers from porting-in wireless numbers when the rate center associated with the number and the customer's physical location do not match. The Further Notice

---

<sup>147</sup> 13 C.F.R. § 121.201, NAICS code 513322.

<sup>148</sup> Telephone Trends Report, Table 5.3.

<sup>149</sup> See e.g., Further Notice, paras. 41, 48-49.

<sup>150</sup> See 5 U.S.C. § 603.

asks commenters that contend that such obstacles exist and result in a competitive disadvantage to submit proposals to mitigate these obstacles.

12. In addition, the Further Notice seeks comment on alternative methods to facilitate wireless-to-wireline porting. To the extent that wireless-to-wireline porting may raise issues regarding the rating of calls to and from the ported number when the rate center of the ported number and the physical location of the customer do not match, the Further Notice seeks comment on the extent to which wireline carriers should absorb the cost of allowing the customers with a number ported from a wireless carrier to maintain the same local calling area that the customer had with the wireless service provider. Alternatively, the Further Notice seeks comment about whether wireline carriers may serve customers with numbers ported from wireless carriers on a Foreign Exchange (FX) or Virtual FX basis. The Further Notice seeks comment on the procedural, technical, and regulatory implications of each of these approaches. These questions provide an excellent opportunity for small entity commenters and others concerned with small entity issues to describe their concerns and propose alternative approaches.

13. The Further Notice also seeks comment about whether the Commission should require wireline carriers to reduce the length of the current wireline porting interval for ports to wireless carriers. The Further Notice analyzes the current wireline porting interval and seeks comment about whether there are technical or practical impediments to requiring wireline carriers to achieve shorter porting intervals for intermodal porting. The Further Notice recognizes that, if a reduced porting interval was adopted, carriers may need additional time to modify and test their systems and procedures. Accordingly, the Further Notice seeks comment on an appropriate transition period in the event a shorter porting interval is adopted.

14. Throughout the Further Notice, the Commission emphasizes in its request for comment, the individual impacts on carriers as well as the critical competition goals at the core of this proceeding. The Commission will consider all of the alternatives contained not only in the Further Notice, but also in the resultant comments, particularly those relating to minimizing the effect on small businesses.

**F. Federal Rules that Overlap, Duplicate, or Conflict with the Proposed Rules**

15. None.

**SEPARATE STATEMENT OF  
CHAIRMAN MICHAEL K. POWELL**

Re: *In re Telephone Number Portability; CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues; CC Docket No. 95-116*

As of today it's easier than ever to cut the cord. By firmly endorsing a customer's right to untether themselves from the wireline network – and take their telephone number with them – we act to eliminate impediments to competition between wireless and wireline services. Seamless wireline-to-wireless porting is another landmark on the path to full fledged facilities-based competition.

Our action promises significant consumer benefits for wireline and wireless customers. I have heard the concerns expressed by some wireline providers that wireline network architectures and state-imposed rate centers complicate number portability. This proceeding has undoubtedly focused the Commission's attention on these issues. State regulators have long been champions of local number portability and I appreciate their support. I look forward, however, to working with my colleagues in the states to remove additional barriers to inter-modal local number portability such as the difficulty of some providers to consolidate rate centers to more accurately match wireless carrier service areas.

In the end, the consumer benefits associated with inter-modal LNP convince me that the time for Commission action is now. No doubt there will be some bumps in the road to implementation, but I trust that carriers will use their best efforts to ensure consumers have the highest quality experience possible. I look forward to the Commission's November 24<sup>th</sup> trigger for this obligation and to working with my colleagues to ensure that full wireline to wireless portability is a reality for all consumers everywhere.

**SEPARATE STATEMENT OF  
COMMISSIONER KATHLEEN Q. ABERNATHY**

*Re: Telephone Number Portability – CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, CC Docket No. 95-116*

This Order removes the final roadblocks to implementing wireline-to-wireless number portability, which is an important step in facilitating intermodal competition. The Commission mandated local number portability (LNP) within and across the wireline and wireless platforms, where technically feasible, with the goal of maximizing consumer choice. As of November 24, 2003, this goal will become a reality: Most consumers who seek to switch wireless providers or to move from a local exchange carrier to a wireless carrier will be able to retain their existing telephone numbers. While I expressed sympathy in the past to arguments that the November 24 deadline was premature, our present focus must be on implementation, and the foregoing Order provides much-needed clarity regarding the parties' obligations.

I recognize that wireline network architecture and state rating requirements will prevent many (if not most) consumers from porting wireless numbers to wireline carriers. Although, in the short term, wireline carriers will have more limited opportunities to benefit from intermodal LNP than wireless carriers will, I was simply not willing to block consumers from taking advantage of the porting opportunities that are technologically feasible today. I am hopeful that existing obstacles to wireless-to-wireline porting will be addressed as expeditiously as possible through technological upgrades and, where necessary, state regulatory changes.

Finally, I am pleased that the Commission is stepping up its consumer outreach efforts on the issues of wireless and intermodal LNP. To this end, I commend the recent proactive efforts of the Wireless Telecommunications Bureau and the Consumer and Government Bureau to educate the public about our LNP rules. I am also pleased with the recent efforts of industry to reach out to consumers so that they understand what number-porting opportunities are available to them. For consumers to benefit from our expanded LNP regime, it is imperative for them to have sufficient information to make the most appropriate choices for themselves.

**SEPARATE STATEMENT OF  
COMMISSIONER MICHAEL J. COPPS**

Re: *Telephone Number Portability CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues (CC Docket No. 95-116)*

With today's action, consumers are assured that intermodal telephone number portability will begin, at last, to become a reality later this month. After numerous delays, consumers are on the verge of enjoying the significant new ability to take their current telephone numbers with them when they switch between carriers and technologies. This gives consumers much sought-after flexibility and it provides further competitive stimulus to telephone industry competition. This makes it a win-win situation for consumers and businesses alike.

It was some seven years ago, in the 1996 Act, when Congress recognized that the ability of consumers to retain their phone numbers when switching providers would facilitate the development of competition. Congress instructed us to get this job done and to use "technical feasibility" as our guide in making sure the vision became reality. This we have labored mightily to do. As a result, American consumers will be able to take their digits with them, unimpeded by the hassle, loss of identity and attendant expenses that until now have accompanied switching between service providers and technologies.

The bulk of the problems accompanying the challenge of porting numbers are behind us now. A very limited few remain and these are the subject of the Further Notice of Proposed Rulemaking also approved today. I am confident that these can be handled expeditiously if all interested parties work together. Similarly, any minor implementation problems that develop should be amenable to swift and cooperative corrective actions. It has taken considerable cooperation to bring us to this important point, and I believe consumer support for porting will encourage all parties to reach quick resolution of the few remaining challenges.

Finally, it is difficult to see how we are ever going to have true intermodal competition in the telephone industry apart from initiatives like the one we embark on today. Intermodal competition always receives strong rhetorical support. Today it gets some action, too.

**SEPARATE STATEMENT OF  
COMMISSIONER KEVIN J. MARTIN**

*Re: Telephone Number Portability, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, Memorandum Opinion and Order and Further Notice of Proposed Rulemaking, CC Docket No. 95-116*

I am pleased to support this item because it provides important consumer benefits by promoting competition in the wireline telephone market. One of the primary reasons I supported wireless local number portability is the additional competition it is likely to encourage in the wireline market. *See* Press Statement of Commissioner Kevin J. Martin on the Commission's Decision on Verizon's Petition for Permanent Forbearance from Wireless Local Number Portability Rules (July 16, 2002). As I stated last year, the ability to transfer a wireline phone number to a wireless phone is an important part of ensuring that competition with wireline phones continues to grow. I am glad that today the full Commission agrees.

I am disappointed, however, that the Commission was not able to provide this guidance until weeks before the LNP requirement is scheduled to take effect. The Commission has an obligation to minimize the burdens our regulations place on carriers, and I wish we had provided the guidance in this Order considerably sooner.

Finally, I recognize that LNP – although very important for consumers – places real burdens on the carriers, particularly the small and rural carriers. Accordingly, I support the decision to waive our full porting requirements until May 24, 2004, for wireline carriers operating in areas outside of the largest 100 MSAs. I am also pleased that we emphasize that those wireline carriers may file waiver requests if they need additional time.

**SEPARATE STATEMENT OF  
COMMISSIONER JONATHAN S. ADELSTEIN**

*Re: In re Telephone Number Portability; CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues; CC Docket No. 95-116*

I am pleased to support this Order because it clarifies that our rules and policies provide for enhanced number portability opportunities for American consumers. Specifically, we enable consumers to port their wireline telephone numbers to local wireless service providers. We also affirm that wireless carriers are required to port telephone numbers to wireline carriers but recognize that wireline carriers are only able to receive those numbers from wireless carriers on a limited basis. Finally, we rightly seek comment on how to deal with these limitations and further facilitate wireless-to-wireline porting.

I believe that our decision is consistent with Section 251(b) of the Communications Act, which requires local exchange carriers (LECs) to provide local number portability to the extent technically feasible. However, I do recognize that there may be certain limitations on the ability of the nations' smallest LECs to technically provide local number portability. In this regard, I am extremely pleased we made the decision to waive until May 24, 2004, the requirement of LECs operating in areas outside of the largest 100 MSAs to port numbers to wireless carriers that do not have a point of interconnection or numbering resource in the rate center where the LEC customer's wireline number is provisioned.

I recognize that there may be other compelling circumstances that make it disproportionately difficult for these same LECs to provide full number portability. Consequently, I am pleased we agreed to the language in the item recognizing that those wireline carriers may need to file additional waivers of our LNP requirement.

I remain concerned, however, that today's clarification of our LNP rules and obligations will exacerbate the so-called "rating and routing" problem for wireless calls that are rated local, but are in fact carried outside of wireline rate centers. While I appreciate the language in the Order that clarifies that ported numbers must remain rated to the original rate center, the rating and routing issue continues to remain unresolved for rural wireline carriers as well as neighboring LECs and the wireless carriers whose calls are being carried. I believe that we must redouble our efforts to resolve this critical intercarrier compensation issue as quickly and comprehensively as possible.

Finally, I take very seriously the concerns of those wireline carriers that have argued wireline-to-wireless number portability should be limited pending the resolution of issues associated with full wireless-to-wireline porting. While I do not believe that these concerns outweigh the very significant benefits to American consumers that our clarification provides today, I do want to highlight my keen interest in working both with industry and the Chairman and my fellow Commissioners on solutions to address this inequity. The Commission should constantly strive to level the proverbial playing field, and the situation presented by our LNP rules and policies should not be any different.

Federal Communications Commission  
Consumer & Governmental Affairs Bureau  
Office of The Bureau Chief

06 May 2004

Via MAIL and FASCIMILE

The Honorable Stan Wise  
Commissioner, Georgia Public Service Commission  
President, National Association of Regulatory Utility Commissioners  
244 Washington Street, S.W.  
Atlanta, GA 30334

Dear Stan:

I want to express my deep appreciation for the efforts of National Association of Regulatory Utility Commissioners (NARUC) and its members in making the initial deployment of wireless number portability such a success. Since November 24, 2003, more than three million consumers have been able to choose a new wireless carrier or switch between a wireless and wireline carrier without having to sacrifice their telephone number. As you know, after May 24, 2004, consumers outside of the top markets will possess the power to make the same choice. In light of the approaching opportunity for *all* American consumers to take their phone numbers with them, I wanted to write you out of concern about certain rural wireline carriers' requests for waivers of their porting obligations that are pending in many states.

When considering requests to waive these important, consumer-friendly obligations, states should remain mindful of the tremendous customer benefits that porting generates. I know that NARUC and the FCC agree that the ability of wireless and wireline consumers to port their numbers remains central to producing competition, choice, lower costs, and increased innovation. These benefits are particularly important in rural areas where competition may be less robust than in more urban markets.

It is with those policies in mind that I hope that you, in your capacity as NARUC's president, will encourage state commissions to hold carriers that seek waivers of their porting obligations to the appropriate standard of review. At this point, I understand that many rural wireline carriers have sought waivers of their obligations, and that, in some cases, waivers have been granted. Of course, states have jurisdiction to waive porting obligations for certain rural telephone companies under Section 251(f) of the Telecommunications Act of 1996, where carriers demonstrate undue economic burden or technological infeasibility. I think we can agree that the State commissions should strictly apply that statutory standard so that the rights of consumers are protected. I encourage the State commissions to ensure that carriers seeking waivers demonstrate that they are on a path to compliance so that customers of these

carriers will not be forever denied the rights their fellow consumers enjoy. If relief were to be granted in the absence of extraordinary circumstances, or for indefinite periods, it would be a setback for rural consumers. It should be noted that some of the same carriers that now seek to have their porting obligations waived have long known that they would, absent a demonstration of undue burden, be required to provide porting to both wireline and wireless carriers.

As we approach the May 24, 2004 deadline for nationwide local number portability deployment, the FCC looks forward to working with NARUC and the State Commissions to make sure that the interests of the American consumer are protected. Because of the publicity regarding the nationwide implementation of wireless and intermodal LNP, consumers in all markets will expect to receive its benefits. Where it is deemed appropriate to grant relief, it is important that consumers be educated so that they can make informed decisions as to their telephone service.

I would be happy to discuss this issue further with you or any of your members in the coming weeks.

Sincerely yours,

A handwritten signature in black ink, appearing to read "K. Dane Snowden", with a long horizontal flourish extending to the right.

K. Dane Snowden  
Chief  
Consumer & Governmental Affairs Bureau

## NECA FILINGS

### NECA TARIFF FCC NO. 5

#### Transmittal No. 1018

3/17/2004 - NECA filed Transmittal No. 1018, revising its Tariff F.C.C. No. 5 to become effective April 1, 2004. This filing makes additions and miscellaneous changes to the listings of companies in the Title Pages, Optional Rate Plan Availability, DSL Access Services Availability and Federal Universal Service Charge sections.

### NECA TARIFF FCC NO. 5

#### Transmittal No. 1019

3/17/2004 - NECA filed Transmittal No. 1019, revising its Tariff F.C.C. No. 5 to become effective April 1, 2004. This filing adds Commonwealth Telephone Company to the list of companies applying Local Number Portability (LNP) End User Charges.

### NECA TARIFF FCC NO. 5

#### Transmittal No. 1020

3/17/2004 - NECA filed Transmittal No. 1020, revising its Tariff F.C.C. No. 5 to become effective April 1, 2004. This filing modifies NECA's Asynchronous Transfer Mode Cell Relay Access (ATM-CRS) and Digital Subscriber Line Access (DSL) Services. Specifically, this filing: 1) reduces the monthly rates for most existing ATM-CRS Port speeds, 2) introduces a third discount commitment level under the DSL Access Services Discount Pricing Arrangement, 3) introduces a non-chargeable optional function associated with ATM-CRS Ports enabling customers to transport Internet Protocol packets over the Telephone Company's network, and 4) removes the local exchange service copper-only requirement for ADSL and SDSL Access Services.

## FCC RELEASES

### LNP

#### **Order, CC Docket No. 95-116, DA 04-726**

3/17/2004 - The FCC has granted the requests of Cellular Telecommunications and Internet Association, Cingular Wireless, LLC, AT&T Wireless Services, Inc. and ALLTEL Communications, Inc. to withdraw their petition for a rulemaking asking the FCC to rescind the rule requiring commercial mobile radio service (CMRS) providers to provide local number portability.

### SECTION 272

#### **Report and Order, CC Docket Nos. 03-228, 96-149, 98-141, 96-149 and 01-337, FCC 04-54**

3/17/2004 - The FCC issued a Report and Order removing prohibition against sharing by BOCs and their section 272 affiliates of operating, installation, and maintenance (OI&M) functions. The Commission concluded that it should retain the prohibition against joint ownership by BOCs and their section 272 affiliates of switching and transmission facilities, or the land and buildings on which such facilities are located. The Commission dismissed as moot petitions filed by SBC and BellSouth, pursuant to section 10 of the Act, seeking forbearance from the OI&M sharing prohibition. The Commission also granted SBC's request for modification of the SBC/Ameritech Merger Order conditions related to OI&M services to the extent that these merger conditions are incorporated into the conditions of the SBC Advanced Services Forbearance Order

## INDUSTRY FILINGS

### USF

#### **Ex Parte, CC Docket Nos. 96-45, 98-171, 90-571, 92-237, 99-200, 95-116 and 98-170**

3/16/2004 - Representatives of Microsoft met with Commissioners Adelstein, Abernathy, Copps and Martin and their staff members to explain that policy makers should keep in mind that regulations adopted to suit the PSTN might not translate well into an IP-centric Framework. In terms of Universal Service funding mechanisms, Microsoft believes that either a numbers-based or connections-based approach would be better than today's mechanism, but should be considered only as an interim step.

### UNBUNDLED NETWORK ELEMENTS

#### **Ex Parte, CC Docket Nos. 01-338, 96-98 and 98-147**

3/17/2004 - In a letter to Commissioner Copps, Earthlink submitted a letter to explain its position on reconsideration of the line sharing unbundled network element rules in light of the D.C. Circuit Court's recent decision in *USTA v. FCC*. Earthlink states that line splitting is not a functional substitute for line sharing, nor is it a long-term competitive alternative to line sharing.

## FEDERAL REGISTER

### BIENNIAL REVIEW

#### **Notice, WC Docket No. 02-313, FCC 03-337, FR Doc 04-5657**

03/18/04 – The Commission has published a notice in the Federal Register setting the comment dates for its inquiry on whether certain rules should be repealed or modified because they are no longer necessary in the public interest. **Comments are due April 19, 2004. Reply Comments are due May 3, 2004.**

## OTHER NEWS

Speaking at a CITA forum on LNP issues, Wireless Bureau Assistant Chief David Firth said that the volume of actual number porting would not be the measure of success, but giving customers the option to port was most important. He indicated that carriers outside of the 100 largest MSA's should be testing and preparing for the May 24, 2004 LNP deadline and that the Commission would not be very sympathetic to last minute waiver requests. He said that the Bureau in its orders has resolved most of the implementation issues. However, if there were still a lack of clarity on certain issues, such as overlapping boundaries, after May 24 the Bureau would consider issuing further guidelines. Responding to questions, he indicated that rating and routing issues between carriers are not porting issues and are therefore not a valid reason for refusing to port. He said that if carriers are experiencing problems with non-compliance by certain carriers, those are enforcement issues and need to be called to the Commission's attention.

The Western Governors Association has sent a letter to Congressional leaders asking them to urge Congress to examine the current Universal Service Fund distribution formula for non-rural carriers, which serve both rural and non-rural areas. The Governors asked Congress to help remedy the imbalance in the distribution of funds. <http://www.westgov.org/wga/testim/usf-ltr3-17-04.pdf>

**INTERVENOR'S MOTION TO COMPEL  
DISCOVERY OR IN THE ALTERNATIVE  
TO STRIKE PETITIONERS' PRE-FILED  
TESTIMONY REGARDING COSTS**

COMES now Intervenor Western Wireless, LLC, by and through its attorney, Talbot J. Wieczorek of Gunderson, Palmer, Goodsell & Nelson, and hereby moves the Court pursuant to SDCL §§15-6-26(a), 15-6-33 and 15-6-34 for an order compelling Petitioners to provide discovery to First Information Requests of Western Wireless. This motion has been raised for the following reason. Intervenor has requested certain cost information directly related to Petitioners' economic burden assertions. Specifically, Interrogatories numbered 4(a)(i); 4(a)(ii); 5(a)(iv); 5(a)(v); 5(a)(vi); 5(a)(vii); 5(a)(xiv); 5(a)(xv); 5(a)(xvi); 13(g); 16(a); 18; 19; 21; and Request for Production No. 3. All Petitioners asserted confidentiality as the basis for not disclosing the responsive information.

Thereafter, Western Wireless, LLC executed a Confidentiality Agreement covering the information requested. *See* Confidentiality Agreement attached as hereto as Exhibit 1. On May 21, 2004, Western Wireless, LLC provided each of the Petitioners with the Confidentiality Agreement and requested that Petitioners provide the confidential documents previously withheld. *See* correspondence from Intervenor's attorney, Talbot J. Wieczorek dated May 21,

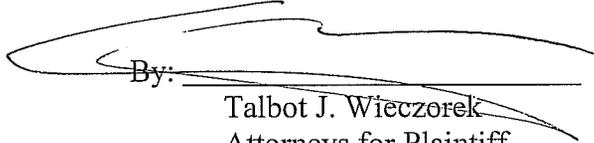

2004, attached hereto as Exhibit 2. Petitioners have not supplemented their responses nor provided the requested information in any subsequently served information requests.

A brief citing Intervenor's arguments and supporting authorities is attached and incorporated herein by this reference.

WHEREFORE, Intervenor requests the Commission order Petitioners to comply with the aforementioned First Information Requests of Intervenor Western Wireless or, in the alternative, the Commission strike all cost testimony submitted by Petitioners regarding their costs.

Dated this 11 day of June, 2004.

Cooperative (Venture); West River Cooperative Telephone Company (West River); Stockholm-Strandburg Telephone Company (Stockholm); Tri-County Telcom, Inc. (Tri-County) and Cheyenne River Sioux Tribe Telephone Authority (CRST), will execute this Agreement on behalf of said companies. Jeffrey D. Larson, counsel for Santel Communications (Santel), will execute this Agreement on behalf of Santel. Richard J. Helsper, counsel for Brookings Municipal Utilities d/b/a Swiftel Communications (Brookings), will execute this Agreement on behalf of Brookings. James Cremer, counsel for James Valley Cooperative Telephone Company (James Valley), will execute this Agreement on behalf of James Valley. David Gerdes, counsel for Midcontinent Communications (Midcontinent), will execute this Agreement on behalf of Midcontinent. Richard Coit, counsel for South Dakota Telecommunications Association (SDTA), will execute this Agreement on behalf of SDTA. The information to be covered hereunder will include all matters served on the parties or filed with the Commission in the above docket.

Accordingly, it is agreed:

1. All documents, data, information, studies and other matters filed with the Commission or served on a party that are claimed by a party to be trade secret, privileged or confidential in nature shall be furnished pursuant to the terms of this Agreement, and shall be treated by all persons accorded access thereto pursuant to this Agreement as constituting trade secret, confidential or privileged commercial and financial information (hereinafter referred to as "Confidential Information"), and shall neither be used nor disclosed except for the purposes of this proceeding, and solely in accordance with this Agreement. Any information provided identifying an equipment vendor with cost information produced by a party will be deemed confidential.

2. All Confidential Information made available pursuant to this Agreement shall be given to counsel for the parties, and shall not be used or disclosed except for the purposes of this proceeding; provided however, that access to any specific Confidential Information may be authorized by said counsel, solely for the purpose of this proceeding, to consultants or employees of any party to this Agreement, if said person has signed an agreement, attached as Exhibit A, to be bound by the terms and conditions of this Agreement. Counsel shall furnish copies to comply and be bound by the terms of this Agreement to counsel for the other party.

3. Confidential Information will be marked as such when delivered to counsel.

4. In the event that the parties hereto are unable to agree that certain documents, data, information, studies or other matters constitute trade secret, confidential or privileged commercial and financial information, the party objecting to the trade secret claim shall forthwith submit the said matters to the Commission for its review pursuant to this Agreement and in accordance with its administrative rules.

5. All written information filed by the parties in this docket that has been designated as Confidential Information, if filed with the Commission by any party, will be presented to the Commission, as Confidential Information protected by A.R.S.D. 20:10:01:41 and withheld from inspection by any person not bound by the terms of this Agreement, unless such Confidential Information is released from the restrictions of this Agreement, either through agreement of the parties or, after notice to the parties and hearing, pursuant to an Order of the Commission and/or final order of a court having jurisdiction,

6. All persons who may be entitled to receive, or who are afforded access to, any Confidential Information by reason of this Agreement shall neither use nor disclose the Confidential Information for purposes of business or competition, or any purpose other than the

purposes of preparation for and conduct of this proceeding, and then solely as contemplated herein, and shall take those precautions that are necessary to keep the Confidential Information secure and in accordance with the purposes and intent of this Agreement.

7. The parties hereto affected by the terms of this Agreement further retain the right to question, challenge, and object to the admissibility of any and all data, information, studies and other matters furnished under the terms of this Agreement in response to interrogatories, requests for information or cross examination on the grounds of relevancy or materiality,

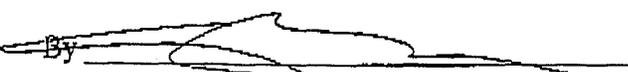

8. This Agreement shall in no way constitute any waiver of the rights of any party herein to contest any assertion of finding of trade secrets, confidentiality or privilege, and to appeal any such determination of the Commission or such assertion by a party.

9. Upon completion of the proceeding, including any administrative or judicial review thereof, all Confidential Information, whether the original or any duplication or copy thereof, furnished under the terms of this Agreement, shall be returned to the party furnishing such Confidential Information upon request or destroyed. Confidential Information made part of the record in this proceeding shall remain in the possession of the Commission.

10. The provisions of this Agreement are specifically intended to apply to data or information supplied by or from any party to this proceeding, and to any non-party that supplies documents pursuant to process issued by this Commission.

11. This Agreement shall be effective immediately and apply to any confidential information provided to date.

RE: Local Number Portability Obligations  
GPGN File No. 5925.040157

Dear Counsel:

All of you have withheld documents claiming confidentiality. In any case, when I began receiving all of your discovery and testimony and you withheld documentation claiming confidentiality, I talked to Ms. Rogers and agreed to revise the Confidentiality Agreement a number of us have used previously in the latest ETC filing made by WWC License LLC.

I executed that Monday and faxed it to all of you and I also emailed that to you. When I faxed it to you, I requested you immediately provide me the confidential documents that you have withheld given the fact that I need to file testimony next week and I need the confidential documents to make sure my testimony appropriately responds to all issues. I have not received any of the confidential documents from any of you since then.

In reviewing the discovery, the following confidential documents have been withheld by the following parties:

Same for 4(a)(ii); 5(a)(xiv); 5(a)(xv); 5(a)(xvi).  
Answer to Interrogatory No. 13(g) and (h) – information obtained pursuant to NDAs.  
Response to Request for Production No. 2 and 3 – documents obtained pursuant to NDAs.

If your objection was that the information was confidential or proprietary, please immediately provide these documents by email if you have them in electronic format, by fax if you do not have them in an electronic format and by Next Day Delivery.

Every Petitioner has objected to providing cost information, claiming they signed a nondisclosure agreement with vendors. With the execution of the Confidentiality Agreement, the cost information should also be provided even though a nondisclosure has been signed. I have no objection if you redact the names of the vendors from the names of the cost information when you provide it. At least one company has expressed a concern that if the information is provided in electronic format, there may be formulas that are subject to a nondisclosure agreement. In those cases, simply provide me the paper copy.

As to the testimony, I have noted that I did not receive all confidential documents. By way of example, in the testimony of Tom Bullock, I did not receive Exhibit 1. I am still reviewing the testimony. However, I would ask that if you withheld any documents as part of the testimony claiming confidentiality, that you provide them to me based on my executed Confidentiality and Protective Agreement.

GUNDERSON, PALMER, GOODSSELL & NELSON, LLP

All Counsel

Page 6

If anyone contends that they still cannot provide this cost information, let me know so we can bring the matter before the Commission as, quite frankly, I do not see how Petitioners can meet their burden without providing the raw cost information.

Sincerely,

Talbot J. Wiczorek

**BRIEF IN SUPPORT OF INTERVENOR'S  
MOTION TO COMPEL DISCOVERY OR IN  
THE ALTERNATIVE TO STRIKE  
PETITIONER'S PRE-FILED TESTIMONY  
REGARDING COSTS**

Intervenor, WWC Wireless, LLC, by and through its attorney, Talbot J. Wieczorek, of Gunderson, Palmer, Goodsell & Nelson, LLP, hereby submits this brief in support of its Motion to Compel Discovery or In The Alternative To Strike Petitioner's Pre-file Testimony Regarding Costs.

**FACTS**

On April 29, 2004, Intervenor Western Wireless, LLC, served upon all Petitioners Information Requests. All Petitioners responded to several of the aforementioned requests by asserting that the information requested would not be produced as it was subject to nondisclosure agreements. After receiving Petitioners responses which asserted confidentiality as the basis for not disclosing pertinent information, Western Wireless, LLC executed a Confidentiality Agreement covering the same information. *See* Confidentiality Agreement attached as Exhibit 1.

Upon execution of the agreement, Western Wireless, LLC requested that Petitioners provide the confidential documents that were previously withheld. *See* May 21, 2004 correspondence attached herein as Exhibit 2. Western Wireless, LLC requested immediate

production as this information is necessary to ensure that the proffered testimony addresses all issues. Id. Petitioners have never responded to this May 21 letter. Nor has the information been provided in conjunction with any subsequently served information requests.

To illustrate, the subject requests and respective responses follow.

### **INTERROGATORIES AND REQUESTS FOR PRODUCTION BASED ON PREVIOUSLY SERVED DISCOVERY REQUESTS**

All Petitioners were asked to provide the following and responded as follows:

4. Provide the following information relative to the development of the recurring cost estimate in your petition:
  - a. Explain in detail the methodology and inputs used to develop the recurring cost estimate made in your petition.

RESPONSE: Petitioner estimated the monthly recurring costs as follows:

- i. Recurring Service Order Administration (“SOA”): Cost estimates were based on a compilation of SOA services price lists from firms providing automated SOA services. **The estimated prices were obtained pursuant to nondisclosure agreements (“NDA”) and therefore Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from vendors to provide information subject to the confidentiality rules of the Commission. As Petitioner has not entered into any contracts for SOA services, firm pricing cannot be provided.
  - ii. Recurring LNP Query Costs Per Month: Estimates were based on the assumption that Petitioner would be assessed the monthly minimum for this service based upon the database provider’s contract for query service. **The estimated process were obtained pursuant to NDAs, and therefore Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from vendor(s) to provide the requested information subject to the confidentiality rules of the Commission. As Petitioner has not entered into any contracts for SOA services, firm pricing cannot be provided.
5. Provide the following information relative to the development of the non-recurring cost estimate made in your petition:  
Explain in detail the methodology and inputs used to develop the non-recurring cost estimate made in your petition.

RESPONSE: Petitioner estimated the non-recurring costs as follows:

- (iv) Non-Recurring Service Order Administration Cost Estimates were based on a compilation of SOA services price lists from firms providing automated SOA services. The cost estimate represents the anticipated start-up costs to utilize automated services to update the LNP databases. **The sample pricing scenarios were obtained, by Petitioner's consultant, under NDAs and, therefore, Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from the vendors to provide the information subject to the confidentiality rules of the Commission. As the Petitioner has not entered into any contracts for SOA service, firm pricing cannot be provided.
- (v) Non-recurring LNP Query Set Up: Non-recurring LNP Query set-up cost estimates were based on a compilation of SOA services price lists from firms providing automated SOA services. The cost estimate includes estimated startup costs levied by the SOA provider to utilize its services and dip its data base. **The estimated prices were obtained pursuant to nondisclosure agreements and therefore Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from vendors to provide the information subject to the confidentiality rules of the Commission. As Petitioner has not entered into any contracts for SOA services, firm pricing cannot be provided.
- (vi) SOA Non-recurring Set Up Charge: Costs for set-up charge were included. Non-recurring SOA set up cost estimates were based on a compilation of SOA services price lists from firms providing automated SOA services. The cost estimate includes estimated startup costs levied by the SOA provider to utilize its services and dip its data base. **The estimated prices were obtained pursuant to nondisclosure agreements and therefore Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from vendors to provide the information subject to the confidentiality rules of the Commission. As Petitioner has not entered into any contracts for SOA services, firm pricing cannot be provided.
- (vii) Non-Recurring Connection Costs with LNP Database Estimates were based on a compilation of SOA services price lists from several firms providing automated SOA services. **The cost estimate represents the anticipated start-up costs levied by the SOA provider to access their database. Generally, these non-recurring costs are driven by the number of SS7 Point Codes or OCNs. The sample pricing scenarios were obtained under NDA from Syniverse and Verisign. As the Petitioner**

**has not entered into any contracts with these or any SOA entities, firm pricing cannot be provided.**

- (xiv) Non-Recurring Service Order Administration Cost Estimates were based on a compilation of SOA services price lists from firms providing automated SOA services. The cost estimate represents the anticipated start-up costs to utilize automated services to update the LNP databases. **The sample pricing scenarios were obtained under NDAs and, therefore, Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from the vendors to provide the information subject to the confidentiality rules of the Commission. As the Petitioner has not entered into any contracts for SOA service, firm pricing cannot be provided.
  - (xv) Non-Recurring LNP Query Cost Estimates were based on a compilation of SOA services price lists from firms providing automated SOA services. The cost estimate represents the anticipated start-up costs to utilize SOA services to dip the database. **The estimated prices were obtained pursuant to NDAs and, therefore, Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from the vendors to provide the information subject to the confidentiality rules of the Commission. As the Petitioner has not entered into any contracts for SOA services, firm pricing cannot be provided.
  - (xvi) Non-recurring Connection Costs with LNP Database Estimates were based on a compilation of SOA services price lists from firms providing automated SOA services. The cost estimate represents the anticipated start-up costs to access the database. Generally, these non-recurring costs are driven by the number of SS7 Point Codes or OCNs. **The estimated prices were obtained under NDAs and therefore Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from the vendors to provide the information subject to the confidentiality rules of the Commission. As the Petitioner has not entered into any contracts for SOA service, firm pricing cannot be provided.
13. (g) For the monthly recurring “Service Order Administration” cost, explain the specific nature of the cost including vendor name, fixed and variable cost components, and forecasted transaction volumes.

RESPONSE: The Petitioner has not chosen a Service Order Administrator (SOA) vendor. The Petitioner is considering vendors with automated SOA processes. Typically, SOA charges include startup charges and monthly recurring usage charges with a minimum monthly usage fee. **SOA information was obtained by Petitioner’s consultant, pursuant to**

**NDAs and, therefore, Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from the vendors to provide the information subject to the confidentiality rules of the Commission.

- (h) For the monthly recurring “LNP Queries” cost, explain the specific nature of the cost including vendor name, fixed and variable cost, and forecasted transaction volumes.

RESPONSE: The Petitioner has not chosen a Service Order Administrator (SOA) vendor. The Petitioner is considering vendors with automated SOA processes. Typically, SOA charges include a monthly recurring LNP query charge with a minimum monthly charge. The actual monthly recurring fees are driven by LNP query volumes. The Petitioner is assuming all originating local calls will be dipped. The Petitioner is assuming that each access line will originate approximately seven (7) to eight (8) calls per day. At this volume, the Petitioner estimates that the LNP query charges will exceed the minimum monthly amount. **SOA information was obtained, by Petitioner’s consultant, pursuant to NDAs and, therefore, Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from the vendors to provide the information subject to the confidentiality rules of the Commission.

16. Regarding Exhibit 1 “Total Estimated LNP Non-recurring and Recurring Costs”:

- (a) For the “SOA Monthly Charge”, identify the specific nature of the cost including vendor name, fixed and variable cost components, and forecasted transaction volume. Also state whether this is the most cost efficient method you are aware of to implement SOA functionality for the volume of ports in your forecast.

RESPONSE:

- (a) Petitioner has not chosen a Service Order Administrator (SOA) vendor. Petitioner is considering vendors with automated SOA processes. Typically, SOA charges include startup charges and monthly recurring usage charges with a minimum monthly usage fee. **SOA information was obtained pursuant to NDAs and therefore Petitioner cannot provide the requested information at this time.** Petitioner will seek permission from the vendors to provide the information subject to the confidentiality rules of the Commission. At the time of preparation of Exhibit 1, Petitioner was aware of only these SOA estimates. As Petitioner continues to explore the cost factor, Petitioner has found that there may be less costly methods and is currently exploring them.

18. What is the gross switch investment, accumulated depreciation, and net book value of your existing switches?

RESPONSE:

Response withheld as proprietary and confidential information

19. Identify all capital investments made in your switching equipment in the 2001, 2002, 2003 and to date in 2004.

RESPONSE:

Response withheld as proprietary and confidential information.

21. Explain how funds received for Local Switching Support from the High Cost Fund are used by your company and why they shouldn't be used to offset the cost of local number portability so that your services are "reasonably comparable to those services provided in urban areas. . ."

RESPONSE:

Petitioner objects to this question as calling for information that is not relevant to the current proceedings. Response withheld as proprietary and confidential information.

REQUEST FOR PRODUCTION #3:

Provide any vendor quotes you have obtained for any of the following claimed LNP costs:

- Switch Upgrade Costs
- LNP Query Costs
- LNP Software Features
- Technical Implementation and Testing
- Marketing/Informational Flyer
- Additional Vendor Fees
- Billings/Customer Care Software Upgrades
- SOA Non-Recurring Setup Charge
- SOA Monthly Charge
- Translations
- Service Order Administration
- Additional Software Features
- Feature Activation

RESPONSE: **The documents in response to this request were obtained pursuant to NDAs and therefore Petitioner cannot provide them.** Petitioner will seek permission from the vendors to provide the responsive documents subject to the confidentiality rules of the Commission.

## ARGUMENT

SDCL § 15-6-26(a) permits a party to seek discovery by written interrogatories under SDCL § 15-6-33, and request for production of documents under SDCL § 15-6-34. SDCL § 15-6-26(b) sets the general scope of discovery. “Unless otherwise limited by order of the court,” a party may seek disclosure of, “any matter, not privileged, which is relevant to the subject matter in the pending action,” whether admissible or not. Id.

Moreover, the scope of discovery is to be broadly construed. Kaarup v. St. Paul Fire and Marine Ins. Co., 436 N.W.2d 17, 19 (S.D. 1989). “A broad construction of the discovery rules is necessary to satisfy the three distinct purposes of discovery: (1) narrow the issues; (2) obtain evidence for use at trial; (3) secure information that may lead to admissible evidence at trial.” Id., *citing* 8 C. Wright and A. Miller, Federal Practice and Procedure, § 2001 (1970).

. . . the deposition-discovery rules are to be accorded a broad and liberal treatment. No longer can the time-honored cry of “fishing expedition” serve to preclude a party from inquiring into the facts underlying his opponent’s case. Mutual knowledge of all the relevant facts gathered by both parties is essential to proper litigation. To that end, either party may compel the other to disgorge whatever facts he has in his possession. The deposition-discovery procedure simply advances the stage at which the disclosure can be compelled from the time of trial to the period preceding it, thus reducing the possibility of surprise. But discovery, like all matters of procedure, has ultimate and necessary boundaries.

Kaarup, 436 N.W.2d at 20. Under this broad discovery purview, unless privileged, all relevant matters are discoverable. Id. Intervenor Western Wireless, LLC submits that the information requested both through interrogatories and requests for production of documents is properly subject to discovery.

The information requested is directly relevant to the issues pending before the Commission. Petitioners have requested a suspension or modification of the requirements found under 47 U.S.C. §§ 251(f) and 251(c). South Dakota Codified Law § 49-31-80 grants the

Commission the authority to authorize a suspension or modification of any of the requirements of 47 U.S.C. §§ 251(f) and 251(c). It specifically states,

Suspension or modification to carrier with small service area. Consistent with 47 U.S.C. § 251(f)(2) as of January 1, 1998, the commission may grant a suspension or modification of any of the interconnection or other requirements set forth in 47 U.S.C. §§ 251(b) and 251(c), as of January 1, 1998, to any local exchange carrier which serves fewer than two percent of the nation's subscriber lines installed in the aggregate nationwide. Any such carrier shall petition the commission for the suspension or modification. The commission shall grant the petition to the extent that, and for such duration as, the commission determines that the requested suspension or modification is consistent with the public interest, convenience, and necessity and is necessary:

- (1) To avoid a significant adverse economic impact on users of telecommunications services generally;
- (2) To avoid imposing a requirement that is unduly economically burdensome; or
- (3) To avoid imposing a requirement that is technically infeasible.

The commission may suspend enforcement of the requirement or requirements identified in the petition pending final action on the requested suspension or modification.

The Eighth Circuit Court of Appeals has succinctly stated that the plain meaning of the aforementioned statutes, "...requires the party making the request to prove that the request meets the three prerequisites...." Iowa Utilities Board v. Federal Communications Commission (Iowa II), 219 F.3d 744, 762 (8th Cir. 2000), *reversed in part on other grounds by*, Verizon Communications, Inc. v. Fed'l Communications Comm'n, 535 U.S. 467 (2002).

As a result, Petitioners bear the burden of demonstrating a significant adverse economic impact or undue economic burden. Id. Petitioners have refused to produce the economic information upon which they relied in support of these claims. *See* above Responses to Information Requests. Petitioners' basis for their production denial has since been cured by Intervenor Western Wireless, LLC's execution of the Confidentiality Agreement. *See* Exhibit 1.

Intervenors are entitled to this information under the broad gambit of the discovery rules governing this matter. Kaarup, 436 N.W.2d at 20. Therefore, Intervenors respectfully request the Commission compel Petitioners production of the information requested.

In the alternative, Intervenors request that should Petitioners fail to product information which supports their claims of significant adverse economic impact or undue economic burden, that the Commission strike Petitioners pre-file testimony regarding costs.

Petitioners bear the burden of demonstrating and establishing the economic basis which would justify a suspension or modification. Iowa 2, 219 F.3d at 762. If Petitioners are allowed to assert economic burdens without demonstrating the information that they have relied upon to establish such burdens, Intervenor is left in a position where it is unable to thoroughly evaluate the basis of the Petitioners' assertions. Allowing Petitioners to assert an economic burden without demonstrating any proof of that burden would allow for their unjust ability of presenting financial information with no credible basis. Without affording Intervenor an opportunity to review and cross-examine regarding the basis for the economic burden assertions, renders Intervenor completely unable to refute the ultimate issue in this matter. Therefore, Intervenor requests that should Petitioners fail to produce the information which supports their claims of economic burdens, of any pre-filed testimony be stricken as speculative without support.

In conclusion, Intervenor respectfully requests this Court compel Petitioners' production of the information which would satisfy the aforementioned interrogatories and requests for production. Production of this information is appropriate because it is directly relevant to the ultimate issue in this matter. In the alternative, should Petitioners fail to produce the requested information, then Intervenor respectfully requests that this Court strike any pre-filed testimony regarding economic burdens as unfounded.

Dated this 61 day of June, 2004.

RE: Petitions for Suspension and/or Modification of LNP, Dockets TC04-025, 038, 044, 045, 046, 047, 048, 049, 050, 051, 052, 053, 054, 055, 056, 060, 061, 062, 077, 084, and TC04-085.

Dear Ms. Bonrud:

Enclosed you will find for filing in the above referenced Dockets, the prefiled Rebuttal Testimony of witness Steven E. Watkins. This testimony is filed on behalf of SDTA and also is filed on behalf of each of the below listed rural local exchange carriers, as part of their prefiled testimony.

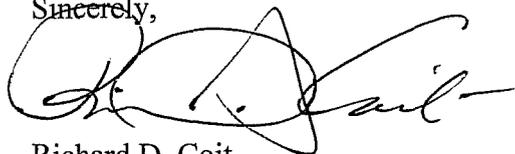

- TC04-025 – Kennebec Telephone Company
- TC04-038 – Santel Communications Cooperative
- TC04-044 – Sioux Valley Telephone Company
- TC04-045 – Golden West Telecommunications Cooperative  
Vivian Telephone Company  
Kadoka Telephone Company
- TC04-046 - Armour Independent Telephone Company  
Bridgewater-Canistota Independent Telephone Company  
Union Telephone Company
- TC04-047 - Brookings Municipal Utilities d/b/a Swiftel Communications
- TC04-048 - Beresford Municipal Telephone Company
- TC04-049 - McCook Cooperative Telephone Company
- TC04-050 - Valley Telecommunications Cooperative Association, Inc.
- TC04-051 - City of Faith Telephone Company
- TC04-052 - Midstate Communications Inc.
- TC04-053 - Western Telephone Company
- TC04-054 - Interstate Telecommunications Cooperative
- TC04-055 - Alliance Communications Cooperative, Inc.  
Splitrock Properties, Inc.

- TC04-056 - RC Communications, Inc.  
Roberts County Telephone Cooperative Association
- TC04-060 - Venture Communications Cooperative
- TC04-061 - West River Cooperative Telephone Company
- TC04-062 - Stockholm-Strandburg Telephone Company
- TC04-077 - James Valley Cooperative Telephone Company
- TC04-084 - Tri-County Telcom, Inc.
- TC04-085 - Cheyenne River Sioux Tribe Telephone Authority

You will also find enclosed a certificate of service verifying service of this document on counsel for the other intervening parties.

Thank you for your assistance in filing and distributing these documents.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard D. Coit", written in a cursive style.

REBUTTAL TESTIMONY OF

STEVEN E. WATKINS

Submitted on behalf of above Rural Local Exchange Carriers and  
the South Dakota Telecommunications Association

June 14, 2004

1 Q1: **Please state your name, business address and telephone number.**

2 A: My name is Steven E. Watkins. My business address is 2120 L Street, N.W., Suite 520,  
3 Washington, D.C. 20037. My business telephone number is (202) 296-9054.

4 Q2: **On whose behalf are you testifying?**

5 A: I am testifying on behalf of the rural local exchange carriers that are the petitioning par-  
6 ties in dockets captioned above (to be referred to as the "Petitioners") and the South  
7 Dakota Telecommunications Association.

8 Q3: **Have you previously submitted testimony in these proceedings?**

9 A: Yes. I submitted direct testimony on May 14, 2004 in these dockets (to be referred to as  
10 "Watkins Direct").

11 Q4: **What is the purpose of your Rebuttal Testimony?**

12 A: The primary purpose of this Rebuttal Testimony is to respond to the Direct Testimony  
13 filed by Ron Williams on behalf of Western Wireless.

14 Q5: **Do you have any initial comments relative to these dockets?**

15 A: Yes. Only one wireless carrier filed testimony in these proceedings, even though there  
16 must be other wireless carriers operating in South Dakota.

17 Q6: **To what do you attribute this lack of interest in LNP in South Dakota by wireless  
18 carriers other than Western Wireless?**

19 A: The fact that other wireless carriers have decided not to participate in this proceeding and  
20 not to submit testimony is consistent with the general observations and conclusions in my  
21 Direct Testimony that there are few, if any, wireline end users in rural South Dakota that  
22 actually want to abandon, or would abandon, their wireline service and port their wireline  
23 number for use solely in connection with wireless service. There is no real demand for

1 intermodal porting in rural South Dakota and the lack of participation is more evidence of  
2 that fact. As such, the other wireless carriers seem to accept and to understand that de-  
3 mand for intermodal LNP would be non-existent or small in rural South Dakota areas,  
4 and therefore have apparently concluded that spending their time and resources attempt-  
5 ing to force, merely on principle, an unnecessary LNP requirement on rural LECs would  
6 lack a business purpose.

7 Similarly, I would like to add that Western Wireless has also previously con-  
8 cluded in comments filed with the Federal Communications Commission (“FCC”) that  
9 “LNP is unnecessary to further competition.” Reply Comments of Western Wireless  
10 filed October 21, 2001, in WT Docket No. 01-184 at pp. 2-5 (a proceeding in which Ver-  
11 izon Wireless was seeking partial forbearance of LNP requirements). Western Wireless  
12 noted that, as a provider of conventional cellular and wireless local loop services, “West-  
13 ern is making significant inroads competing against wireline service providers -- without  
14 offering LNP.” *Id.* Western Wireless went on to state that “there is no evidence to sug-  
15 gest that the inability of CMRS customers to port their numbers is an impediment to  
16 changing service providers.” *Id.* at p. 5.

17 **Q7: Do you have any initial comments about Mr. Williams' direct testimony?**

18 **A: Yes. Mr. Williams' testimony is simply incorrect on several points and, therefore, his**  
19 **discussion would be misleading if accepted without review:**

20 ■ Mr. Williams confuses a waiver request before the FCC pursuant to the FCC's local  
21 number portability (“LNP”) rules in contrast to a suspension proceeding before a state  
22 commission pursuant to the broad protections that Congress provided in Section 251(f)(2)  
23 of the Act for small telephone companies and their rural customers.

1 ■ In reviewing what Mr. Williams considers to be the standards for review pursuant to a  
2 Section 251(f)(2) proceeding, Mr. Williams incorrectly references discussion by the FCC  
3 that the Courts have rendered inapplicable. The Courts have concluded that the conclu-  
4 sions contained in Mr. Williams' discussion are contrary to the protections Congress set  
5 forth in the Act.

6 ■ Mr. Williams questions whether there are LNP routing issues, but then presents incon-  
7 sistent testimony that illustrates the same unresolved issues that I set forth in my direct  
8 testimony regarding some new routing arrangement that would have to be established af-  
9 ter a number is ported. The FCC's confusing statements cannot be reconciled with the  
10 facts that I will explain more fully in this Rebuttal Testimony.

11 ■ Mr. Williams discussion of routing issues is, in reality, merely an attempt to impose  
12 extraordinary and unfair transport obligations on the rural LECs far beyond those that ac-  
13 tually apply. The comments of Western Wireless have more to do with burdening the  
14 rural LECs with transport than with any interest in LNP. This may also explain why  
15 Western Wireless is the sole wireless carrier participating in this proceeding.

16 **Q8: Are there any relevant issues that are missing from Mr. Williams Direct Testimony?**

17 **A:** Yes. Any discussion of the subject of the adverse economic impact on customers (the  
18 first suspension criterion in Section 251(f)(2) of the Act) in South Dakota is glaringly ab-  
19 sent from his testimony. While Mr. Williams discusses the economic burden on the  
20 Petitioners, he fails to address the adverse economic impact on users of telecommunica-  
21 tions services in rural areas of South Dakota. *See* 47 U.S.C. § 251(f)(2)(A)(I) His  
22 testimony completely disregards the significant adverse economic impact on users in jux-  
23 taposition to the absence of demand or any potential benefit of implementation of LNP in

1 rural areas of South Dakota.

2 **Q9: How have you organized the remainder of your Rebuttal Testimony?**

3 **A:** For ease of review by the Commission and the parties, the remainder of my Rebuttal Tes-  
4 timony will follow, to the extent that is possible, the order of issues presented in Mr.  
5 Williams' testimony.

6 **Q10: Do you have any comments regarding Mr. Williams' discussion at p. 3 of a "juris-**  
7 **diction issue regarding waivers to LNP Implementation?"**

8 **A:** Mr. Williams' conclusions are incorrect in his response on p. 3 of his Direct Testimony.  
9 First, Mr. Williams discusses waiver requests before the Federal Communications Com-  
10 mission, not suspension requests before a state commission. (He then cites Section 332  
11 of the Act to suggest some authority, but Section 332 provides authority for the FCC to  
12 establish physical, direct connections with local exchange carriers for wireless carriers,  
13 irrelevant to the issues in this proceeding).

14 With respect to a suspension request, there is no question that this Commission  
15 possesses jurisdiction pursuant to Section 251(f)(2) of the Communications Act of 1934,  
16 as amended ("Act"). Section 251(f)(2) relates to requests to state commissions for sus-  
17 pension or modification of requirements in Section 251(b) and (c) of the Act, including  
18 the LNP requirement. Mr. Williams spends several pages, beginning on p. 6, discussing  
19 the criteria in the Act regarding Section 251(f)(2) proceedings.

20 In contrast, the FCC's narrow waiver request rules are intended only to address  
21 situations where there are circumstances beyond the control of a carrier that require some  
22 delay in implementation of LNP. Those set of waiver considerations are completely  
23 separate and unrelated to the considerations set forth in Section 251(f)(2) of the Act.

1 Pursuant to Section 251(f)(2), the Petitioners seek a suspension or modification,  
2 not an FCC waiver, as is clearly their right under this statutory provision, and such re-  
3 quests are clearly a matter to be filed with and resolved by state commissions, not the  
4 FCC. Moreover, the Petitioners have not sought waiver of any Section 251(b)(2) re-  
5 quirement, so the use of this word by Mr. Williams is both incorrect and misleading.

6 Contrary to Mr. Williams' suggestion that the FCC "asserted jurisdiction," there  
7 is no opportunity for the FCC to assert its jurisdiction in a Section 251(f)(2) matter, and  
8 the FCC has previously and specifically recognized state commissions' authority to grant  
9 suspensions from implementation of LNP. In 1997, the FCC specifically cited, in an  
10 LNP order, Section 251(f)(2) and noted that if state commissions exercise their authority  
11 to suspend, "eligible LECs will have sufficient time to obtain any appropriate Section  
12 251(f)(2) relief as provided by the statute." *In the Matter of Telephone Number Portabil-*  
13 *ity, First Memorandum Opinion and Order on Reconsideration*, 12 FCC Rcd 7236 (1997)  
14 (*"Number Portability Reconsideration"*) at 7302-03. There has been no reversal of this  
15 state commission authority.

16 **Q11: On pages 4-5 and 10-11 of his Direct Testimony, Mr. Williams notes LNP suspen-**  
17 **sion activity in other states. What comment do you have regarding this activity in**  
18 **other states?**

19 **A: Based upon information published by Neustar (dated May 20, 2004), there is LNP sus-**  
20 **pension activity in at least 35 states. The status of that activity in each state is different**  
21 **and is based on the facts and circumstances of the carriers in those states and the specific**  
22 **requests of those carriers. In any event, the majority of those states that have pending**  
23 **suspension requests have granted some relief to the rural LECs seeking suspension.**

1 While an exact count is difficult, on May 20, 2004, there appeared to be 28 states in  
2 which requests are still pending or some form of the requests had been granted. Never-  
3 theless, it appears that 18 of the 35 states have granted either a specific suspension or an  
4 interim suspension while the matter is further studied. Far from Mr. Williams attempted  
5 portrayal, the majority of the states have found merit in suspending LNP obligations for  
6 the smaller LECs. And for those states that may have denied the requests, it is not sur-  
7 prising that the state commissions in such states may have been misled by the FCC's less  
8 than adequate handling of its confusing LNP orders or the consequences of the unre-  
9 solved issues.

10 In any event, the activity in other states is based on the specific circumstances of  
11 those states. I would urge the Commission and the parties to focus on the policy, facts,  
12 public interest, and impact on consumers as it relates to LNP suspension in South Dakota.  
13 This Commission is in the best position to review these facts as they relate to the rural  
14 users in South Dakota, and the Commission is in the best position to determine the public  
15 interest with respect to those users.

16 **Q12: On page 4 of his testimony, Mr. Williams notes FCC action regarding North-**  
17 **Eastern Pennsylvania Telephone Company (“NEP”). What relevance does this ac-**  
18 **tion at the FCC have with respect to a state suspension proceeding?**

19 **A: None. The facts and circumstances of the NEP matter are unrelated to those related to a**  
20 **suspension request or the issues related to the South Dakota Petitioners. As I already ex-**  
21 **plained above, an FCC waiver matter is very much different from one that will review the**  
22 **criteria in the Act under Section 251(f)(2). The NEP matter was a request for temporary**  
23 **waiver before the FCC; NEP is implementing LNP; NEP needed more time as a result of**

1 the failure by its equipment manufacturer to deliver necessary functionalities associated  
2 with new soft switch installations. While the FCC did not grant the waiver request, it  
3 nevertheless gave NEP additional time to get in order the necessary hardware and soft-  
4 ware with its equipment manufacturer. In any event, it was not a suspension request  
5 pursuant to Section 251(f)(2) of the Act.

6 **Q13: On page 10 of his direct testimony, Mr. Williams notes a statement by the Pennsyl-**  
7 **vania Commission. Do you have any comment?**

8 **A:** Yes. What Mr. Williams fails to point out is that the Pennsylvania Commission, in the  
9 proceedings cited by Mr. Williams, granted suspension of certain Section 251(b) and (c)  
10 interconnection requirements for a large number of small LECs in Pennsylvania contrary  
11 to that which is implied by the testimony of Mr. Williams.

12 **Q14: What is your reaction to Mr. Williams' statement at p. 5 that "all LECs have known**  
13 **since 1996 that they would be required to provide LNP"?**

14 **A:** Even if this observation were true, it is not relevant to these proceedings because Section  
15 251(f)(2) of the Act gives the Petitioners the right to file suspension petitions and it im-  
16 poses no time constraints on when such suspension petitions must be filed. In any event,  
17 I disagree with the implication. Although the Act contains an LNP provision, there was  
18 no LNP requirement until the FCC developed implementation rules (notwithstanding the  
19 fact that these rules are still incomplete). Further, for carriers outside of the top 100  
20 MSAs, such as the Petitioners, there was no LNP requirement until the Petitioners re-  
21 ceived a specific request for LNP. Thus, Petitioners could not know that they might be  
22 required to implement LNP until they were asked to do so.

23 Even once various wireless carriers like Western Wireless requested LNP, it was

1 not at all clear that the requests complied with the FCC's rules. In fact, it took the FCC  
2 eleven months to "clarify" the meaning of its rules after the wireless carriers admitted un-  
3 certainty. It is difficult to understand how Western Wireless can argue that the  
4 Petitioners should have known in 1996 that they had an obligation to port numbers to  
5 wireless carriers when no wireless carrier had made a request for number portability until  
6 2003 and the FCC needed eleven months to "clarify" the obligation that Western Wire-  
7 less contends is so apparent.

8 Moreover, a factual review of the record before the FCC demonstrates that no one  
9 could have anticipated the FCC would reach the novel conclusions reflected in the *Nov.*  
10 *10 Order*. Many very difficult issues associated with intermodal porting have been iden-  
11 tified and studied by both the FCC and the industry working group selected by the FCC  
12 and, even currently, there has been no proposal or recommendation to resolve these in-  
13 termodal porting issues. Consequently, there could not have been any reasonable  
14 expectation that the FCC would disregard the record and its own announced process and  
15 order intermodal LNP as described in the *Nov. 10 Order*.

16 I will address additional aspects of the *Nov. 10 Order* later in this Rebuttal Testi-  
17 mony and explain why the Order represents a significant departure from the FCC's  
18 previously announced approach to the establishment of new requirements and how some  
19 of the FCC's statements make no sense when compared with the facts. I devote several  
20 pages of my Direct Testimony to the background of the sequence of events and/or lack of  
21 action that led to the *Nov. 10 Order* and explain why no one could have anticipated the  
22 FCC's action. Watkins Direct at pp. 15-35.

23 Q15: **On pp. 6-7 of his Direct Testimony, Mr. Williams sets forth his view of the standards**

1 Congress intended for a Section 251(f)(2) proceeding and sets forth the FCC's de-  
2 scription of the meaning of "undue economic burden." Are his views correct?

3 A: No. Mr. Williams has misstated applicable law. The FCC attempted to invoke an im-  
4 proper interpretation of what is meant by "undue economic burden," and the Courts have  
5 subsequently vacated the applicable FCC Rule relating to this subject.

6 Mr. Williams at p. 7, lines 1-3 and line 12-19, cites the FCC discussion in its *First*  
7 *Report and Order* of the narrow criteria that the FCC sought to apply with respect to the  
8 evaluation of Section 251(f)(1) exemptions and Section 251(f)(2) suspension and modifi-  
9 cation requests and the FCC's attempt to confine the definition of undue economic  
10 burdens. As the Courts have concluded, the FCC attempted improperly to narrow the ex-  
11 emption, suspension, and modification provisions of Section 251(f) of the Act by  
12 adopting Section 51.405 of its Rules. The FCC's conclusions and Section 51.405 of its  
13 rules were subsequently vacated. The statements of the FCC cited by Mr. Williams are in  
14 the section of the *First Report and Order* that has been completely invalidated by the  
15 Courts.

16 On July 18, 2000, on remand from the United States Supreme Court, the United  
17 States Court of Appeals for the Eighth Circuit issued its opinion in *Iowa Utilities Board*  
18 *v. Federal Communications Commission*, 219 F.3d 744(8<sup>th</sup> Cir. 2000) ("*IUB IP*"), which,  
19 *inter alia*, vacated Section 51.405(a), (c) and (d) of the FCC's rules.

20 *IUB II* establishes that the proper standard for determining whether compliance  
21 with Section 251(b) or (c) would result in imposing a requirement that is unduly eco-  
22 nomically burdensome includes "the full economic burden on the ILEC of meeting the  
23 request that must be assessed by the state commission" and not just that which is "beyond

1 the economic burden that is typically associated with efficient competitive entry." 219  
2 F.3d at 761 The Court emphasized that "undue economic burden" is just one of three al-  
3 ternative bases on which suspension or modification may be granted under § 251(f)(2) --  
4 the others being adverse economic impact on users and technical infeasibility.

5 **Q16: How does this Eighth Circuit Court of Appeals decision support the Petitioners' po-**  
6 **sitions with respect to their request for suspension of LNP?**

7 **A:** According to the Court, the FCC attempted unlawfully to limit the interpretation of "un-  
8 duly economically burdensome," and, therefore, the FCC had "impermissibly weakened  
9 the broad protection Congress granted to small and rural telephone companies." 219 F.3d  
10 at 761. In no uncertain terms, the Court concluded that the FCC's interpretation (as re-  
11 flected in the references Mr. Williams has provided) frustrated the policy underlying the  
12 statute and stated "[t]here can be no doubt that it is an economic burden on an ILEC to  
13 provide what Congress has directed it to provide to new competitors in § 251(b) or §  
14 251(c)." *Id.*

15 **Q17: Mr. Williams, at pp. 12-15 of his Direct Testimony, questions the infeasible opera-**  
16 **tional and technical implementation obstacles that would be encountered by the**  
17 **Petitioners. Do you have any comment?**

18 **A:** Yes. I will let the factual record speak for itself because it fully demonstrates the obsta-  
19 cles confronting carriers regarding potential routing of calls to ported numbers where  
20 there is no interconnection or other business arrangement in place.

21 **Q18: On page 14, the testimony of Mr. Williams may suggest that you are confused about**  
22 **the differences between Service Provider Portability and Location Portability, and**  
23 **what the FCC has ordered. Are you confused?**

1 A: No. Although additional issues remain before the FCC and before the Courts regarding  
2 the arbitrary aspects of the FCC's orders related to the FCC's own definition of Service  
3 Provider Portability compared to Location Portability, my testimony has emphasized the  
4 unresolved issues and inconsistencies in the FCC's order related solely to Service Pro-  
5 vider Portability. Even Mr. Williams's words (on p. 14), about what Service Provider  
6 Portability means, further illustrates my point. Mr. Williams concedes that the statutory  
7 and FCC rule definition of Service Provider Portability is the substitution of service using  
8 the same number "at the same location where the customer receives landline service."  
9 Without debating the fact that a number ported to a mobile user of wireless service auto-  
10 matically means that the customer will most certainly not use the same number for  
11 service "at the same location where the customer receives landline service," the "at the  
12 same location" statutory and rule criterion is rendered unreasonably meaningless where  
13 the wireless carrier neither has a presence, nor an interconnection arrangement over  
14 which calls can be routed, in the rate center area that constitutes "at the same location."  
15 My testimony centers on the "at the same location" issue within the original rate center  
16 area. There are many additional issues, beyond this proceeding and the scope of my tes-  
17 timony, regarding what meaning to apply with respect to Location Portability.

18 Q19: **Mr. Williams questions whether there are really routing issue problems. Did the**  
19 **industry workgroup ever discuss problems associated with routing issues?**

20 A: Yes, the industry workgroup acknowledged and listed the same problems that the FCC  
21 has failed to recognize and address in the *Nov. 10 Order*. See also Watkins Direct at p.  
22 15-21.

23 A thorough review of the workgroup reports reveals very interesting observations

1 and conclusions consistent with my Direct Testimony about the fact that intermodal port-  
2 ing would not be feasible if there are no business and network interconnection  
3 arrangements in place with the relevant wireless carrier in the local area that constitutes  
4 “at the same location.” I want to emphasize that the “at the same location” criterion is  
5 part of the statutory requirement and the FCC’s own definition of Service Provider Port-  
6 ability that forms the LNP requirement.

7 In a Report from the North American Number Council (“NANC”) submitted by  
8 its Chairman to the FCC on May 18, 1998 (“1998 NANC Report”), the group reported  
9 and explained unresolved intermodal LNP issues (Section 3 on page 6):<sup>1</sup>

10 SECTION 3 WIRELESS WIRELINE INTEGRATION ISSUES

11 3.1 Rate Center Issue

12 3.1.1 Issue: Differences exist between the local serving areas of  
13 wireless and wireline carriers. These differences impact Service Provider  
14 Portability with respect to porting both to and from the wireline and wire-  
15 less service providers. . . .

16 The 1998 Report concludes (on p. 7) that consensus could not be reached on a so-  
17 lution to the Rate Center Issue. (And subsequent reports in 1999 and 2000 have  
18 concluded the issue is still open.)

19 This 1998 Report also includes, as an Appendix D, a Background Paper that dis-  
20 cusses some of the same issues related to the rate center disparity issue between wireless  
21

---

<sup>1</sup> See letter from Alan C Hasselwander, Chair, North American Numbering Council, dated May 18, 1998, to Mr. A. Richard Metzger, Jr., Chief, Common Carrier Bureau, Federal Communications Commission. The various reports and white papers are attached to Mr. Hasselwander’s May 18 letter. All of the NANC reports to be referenced in this rebuttal testimony can be found on the FCC’s website by going to “Search” and then to “Search for Filed Comments.” These NANC reports are attached to the Petition for Declaratory Ruling filed by CTIA on January 23, 2003 in CC Docket No. 95-116 addressing LNP. By entering the docket number

1 and wireline operations. As I concluded in my Direct Testimony, there are technical  
2 infeasibility implications for intermodal porting where there is no presence by the wire-  
3 less

1 carrier in the area that constitutes “at the same location” because there is no network or  
2 business arrangement in place for the routing of calls. Most notably, as far back as 1998,  
3 the NANC realized these same issues and obstacles and reported them to the FCC:

### 4 3.0 Limitations on the Scope of Service Provider Portability

5  
6 Due to the need to ensure proper rating and routing of calls, the NANC  
7 LNPA Architecture Task Force agreed that service provider portability was lim-  
8 ited to moves within an ILEC rate center. Section 7.3 of the NANC LNP  
9 Architecture & Administrative Plan report which has been adopted by the FCC,  
10 states, “portability is technically limited to rate center/rate district boundaries of  
11 the incumbent LEC . . . .

12  
13 1998 NANC Report, Appendix D - Rate Center Issue, Section 3.0, Limitations on the  
14 Scope of Service Provider Portability at p. 34, underlining added.

15 At p. 35 of the Appendix D Background Paper, the report notes four possible sce-  
16 narios -- two for wireline-to-wireless porting and two for wireless-to-wireline porting.  
17 For the first two wireline-to-wireless porting scenarios, the Background Information pa-  
18 per concludes in both cases that:

19 Porting would be permissible as long as the wireless service provider has  
20 established an interconnect agreement for calls to the wireless telephone number

21 . . . . .

22 [Underlining added]

23 The Background Paper goes on to explain that some of the scenarios described for wire-  
24 less-to-wireline porting would not be permissible, and this accounts for the competitive  
25 disparity that the FCC’s *Nov. 10 Order* has allowed.

26 Finally, the Background Paper at p. 35 summarizes exactly the same kind of tech-  
27 nical infeasibility issues related to routing that I set forth in my Direct Testimony, namely  
28 that LNP is only possible where there is a business and network interconnection ar-  
29 rangement in place with the relevant wireless carrier within the relevant rate center area:

1 The above examples provide only a small sample of potential porting scenarios.  
2 If all of the potential scenarios were examined, the following patterns would  
3 emerge:  
4

5 Porting from a wireline service provider to a wireless service provider  
6 [“WSP”] is permitted as long as the subscriber’s initial rate center is within the  
7 WSP service area and the WSP has established interconnection/business arrange-  
8 ments for calls to wireless numbers in that rate center . . . .  
9

10 Porting from a wireless service provider to a wireline service provider is  
11 *only* allowed when the subscriber’s physical location is within the wireline rate  
12 center associated with the wireless NPA-NXX.  
13 [Underlining added]

14 The latter statement above is the realization that porting in the wireless-to-  
15 wireline direction is limited by the rate center disparity issue and this limitation leads to  
16 disparity in competitive opportunities. The former underlined statement above that inter-  
17 connection and business arrangements are prerequisites to permit porting is a conclusion  
18 that the FCC refuses to acknowledge, yet is a fact. In subsequent reports, NANC repeat-  
19 edly stated that there had been no consensus on rate center disparity issues and no  
20 recommendation on a technical or competitively fair approach to remedy the reported ob-  
21 stacles. In the last report that I can identify, the NANC lists the Rate Center Issue as an  
22 “Open Issue” and states that the reader should review the 1998 and 1999 reports for de-  
23 tails about the issue (the same discussion from the 1998 report that I have set forth above)  
24 and that “[n]o resolution of this issue has occurred.”

25 **Q20: Are these conclusions by the FCC’s expert industry work group consistent with**  
26 **your testimony?**

27 **A: Yes. Where there is no interconnection/business arrangement with a wireless carrier to**  
28 **which a number may be ported, the Petitioners have no established network or business**  
29 **arrangement to route calls; therefore, porting is not “permitted” as the work group prop-**

1 erly concluded. Furthermore, the Petitioners have no statutory right or other ability to  
2 force wireless carriers to enter into proper “interconnection/business arrangements.” Ac-  
3 cordingly, contrary to Mr. Williams’ claims, the technical obstacles that I have outlined  
4 in the testimony are real.

5 A wireline LEC that may originate a call to a number of another carrier cannot  
6 unilaterally provision a calling service where there is no interconnection/business ar-  
7 rangement with the other carrier. Just as the introduction of an Extended Area Service  
8 (“EAS”) route between two incumbent LECs involves the establishment of interconnec-  
9 tion facilities and business arrangements between the two carriers, the ability of a LEC to  
10 exchange local exchange service calls with a wireless carrier also necessitates intercon-  
11 nection and the establishment of the necessary terms and conditions under which the  
12 traffic will be exchanged. Interconnection occurs as the result of a request by a carrier  
13 other than an incumbent LEC and is dependent on the mutual development of terms and  
14 conditions between the carriers for such interconnection. These obvious conclusions are  
15 embodied in the conclusion of the NANC work group.

16 **Q21: Mr. Williams at p. 20 and his Exhibit 6 diagrams claim that the Petitioners should**  
17 **provision network and/or create new arrangements for the delivery of local calls to**  
18 **some interconnection point beyond the Petitioners’ networks. Do the local competi-**  
19 **tion interconnection rules, or any other regulation, require the Petitioners to**  
20 **provision local services to distant points beyond their own networks?**

21 **A:** No. Mr. Williams’ statements are misleading and contrary to the interconnection re-  
22 quirements in the Act. Further, as admitted by Western Wireless in response to  
23 Interrogatory 7.b., attached hereto as Exhibit 1, Mr. Williams’ statements are contrary to

1 the interconnection agreements recently negotiated between Western Wireless and Peti-  
2 tioners.

3 For several reasons, the Petitioners are not required to provision services beyond  
4 their own networks, to purchase services from other carriers, or to deliver local exchange  
5 carrier service calls to points of interconnection beyond the Petitioners' own networks:

6 ■ The interconnection obligations established under the Act apply with respect to the  
7 service area of the incumbent LEC, not the service area of some other LEC:

8 For purposes of this section, the term 'incumbent local exchange carrier'  
9 means, with respect to an area, the local exchange carrier that (A) on the date of  
10 enactment of the Telecommunications Act of 1996, provided telephone exchange  
11 service in such area . . . .

12 47 U.S.C. § 251(h), (underlining added)

13 ■ It has long been established that the Act does not require an incumbent LEC to provi-  
14 sion, at the request of another carrier, some form of interconnection arrangement that is  
15 superior or extraordinary to that which the LEC provisions for itself. The LEC's obliga-  
16 tions are only to provide interconnection arrangements that are at least equal to those that  
17 the LEC provides for itself and its own service, not superior. However, the suggestion by  
18 Mr. Williams that a Petitioner could be required to provision local exchange carrier ser-  
19 vices with transport to some distant point, or to purchase services from some other carrier  
20 for transport of traffic beyond the Petitioner's network (*e.g.*, from Qwest to transport traf-  
21 fic to the Qwest tandem), would represent just such extraordinary arrangement not  
22 required of the Petitioners. While an incumbent LEC may, at the incumbent LEC's sole  
23 discretion, voluntarily agree to extraordinary arrangements, the LEC would not do so

1 unless the carrier requesting such extraordinary arrangement is prepared to compensate  
2 the incumbent LEC or be responsible for the extraordinary costs for any such superior ar-  
3 rangement.

4 In the same *IUB II* cited above, the Eighth Circuit Court of Appeals reaffirmed its  
5 earlier conclusion, not affected by the Supreme Court's remand, that the FCC had unlaw-  
6 fully adopted and attempted to impose interconnection requirements on incumbent LECs  
7 that would have resulted in superior arrangements to that which the incumbent LEC pro-  
8 vides for itself. It is now well established that an incumbent LEC is not required to  
9 provision some superior form of interconnection service arrangement at the request of  
10 another carrier, but that is Mr. Williams' suggestion. The Court concluded that "the su-  
11 perior quality rules violate the plain language of the Act." The Court concluded that the  
12 standard of "at least equal in quality" does not mean "superior quality" and "[n]othing in  
13 the statute requires the ILECs to provide superior quality interconnection to its competi-  
14 tors." 219 F.3d at 757-758.

15 It is noteworthy here also to point out that under the invalidated superior quality  
16 rule that the FCC had originally adopted, even the FCC in imposing the unlawful re-  
17 quirement to provide some superior form of interconnection had nevertheless also  
18 concluded that the LEC should be paid for the extraordinary costs associated with the su-  
19 perior interconnection arrangement. Pursuant to Mr. Williams' suggestion, not only  
20 would Western Wireless require a superior quality interconnection from the Petitioners,  
21 he would also do so without compensation for the extraordinary costs.

22 ■ The FCC's own interconnection rules addressing the exchange of traffic subject to the  
23 so-called reciprocal compensation requirements envision only that traffic exchange take

1 place at an “interconnection point” on the network of the incumbent LEC, not at an inter-  
2 connection point on some other carrier’s network. “Incumbent LECs are required to  
3 provide interconnection to CMRS providers who request it for the transmission and rout-  
4 ing of telephone exchange service or exchange access, under the plain language of  
5 section 251(c)(2).” (underlining added) In the Matter of Implementation of the Local  
6 Competition Provisions in the Telecommunications Act of 1996, *First Report and Order*,  
7 11 FCC Rcd. 15499 at para. 1015. *See also, Id.* at paras. 181-185. Moreover, Sections  
8 251(c)(2)(A)-(C) of the Act states:

9 (2) Interconnection.-- The duty to provide, for the facilities and equipment  
10 of any requesting telecommunications carrier, interconnection with the local ex-  
11 change carrier’s network-- (A) for the transmission and routing of telephone  
12 exchange service and exchange access; (B) at any technically feasible point  
13 within the carrier’s network; (C) that is at least equal in quality to that provided  
14 by the local exchange carrier to itself or to any subsidiary, affiliate, or any other  
15 party to which the carrier provides interconnection . . . (underlining added)

16 Therefore, it is Western Wireless’s obligation to provision its own network or ar-  
17 range for the use of some other carrier’s facilities outside of the incumbent LEC’s  
18 network as the means to establish that “interconnection point” on the network of the in-  
19 cumbent LEC.

20 ■ LECs such as the Petitioners generally do not offer or provide any local exchange call-  
21 ing service to their own customers that would involve transport to distant locations as  
22 suggested by Mr. Williams. Calls which involve transport to distant locations beyond the  
23 networks of the Petitioners are provided by interexchange carriers (“IXCs”), and these

1 calling services are not local exchange carrier services. The Act does not require the Pe-  
2 tioners to begin to offer some new and extraordinary form of local calling to their own  
3 customers. The involvement of the Petitioners in such calls is simply the provision of ac-  
4 cess services to IXCs that are the service providers to the end users.

5 Accordingly, there can be no expectation that Petitioners must transport local ex-  
6 change service traffic to some distant point when the Petitioners have no statutory or  
7 regulatory interconnection obligation to do so. Whether Mr. Williams' suggestion to the  
8 contrary (or the presumption embodied in the FCC's confusing statements in its recent  
9 orders) equates to a request that is infeasible because it is premised on the fulfillment of  
10 a network arrangement that does not exist and for which there is no legal requirement, or  
11 a request that imposes undue economic burden on the Petitioners because it would re-  
12 quire some extraordinary superior arrangement, it does not really matter because either  
13 potential outcome is sufficient to warrant suspension under Section 251(f)(2)(A) of the  
14 Act. Either condition is sufficient, on its own, under Section 251(f)(2).

15 **Q22: At page 20 of his Direct Testimony, Mr. Williams questions whether LNP costs**  
16 **would impose an undue economic burden on the Petitioners. What response do you**  
17 **have to his comments?**

18 **A:** With respect to the economic burden on the Petitioners, while some costs associated with  
19 LNP implementation may be recovered through a surcharge imposed on their own cus-  
20 tomers, there will be other costs incurred by the Petitioners beyond those costs that  
21 qualify for the surcharge treatment. And, if an improper form of LNP were imposed on  
22 the Petitioners, one that would impose some extraordinary form of interconnection with a  
23 requirement to incur transport costs to some distant point, there would be additional costs

1 associated with an attempt to comply with the directives and the provisioning of the ex-  
2 traordinary network and other business arrangements. The potential costs to transport  
3 traffic to some distant point are potentially unbounded.

4 Mr. Williams fails to acknowledge the significant adverse economic impact any  
5 of this would impose on the rural subscribers in South Dakota.

6 **Q23: On p. 22 of his Direct Testimony, Mr. Williams notes routing issues, potentially**  
7 **similar to those that you have discussed above, associated with a Notice of Apparent**  
8 **Liability (“NAL”) issued by the Enforcement Bureau of the FCC against Century-**  
9 **Tel of Washington. What is your response?**

10 **A:** I note that the NAL is not a final decision. Further, although all of the facts are not clear  
11 from the NAL, it is clear that CenturyTel had not received a suspension or interim sus-  
12 pension of the LNP requirement from the state commission. For these reasons, it is not  
13 clear to what extent, if any, this case may apply to other LECs, like the Petitioners.  
14 What is clear, however, is that the proper routing of calls, including in the LNP environ-  
15 ment, requires the carriers involved to establish interconnection and business  
16 relationships.

17 As I explained above, the Petitioners have no obligation to provision interconnec-  
18 tion to distant points beyond that at which the Petitioners provision any other local  
19 exchange service calls; the Petitioners have no obligation to put in place some superior  
20 form of interconnection service for the benefit of some other carrier that has not re-  
21 quested interconnection; and the Petitioners, in any event, cannot resolve these routing  
22 issues unilaterally because the Act states that interconnection terms and conditions are es-  
23 tablished by a carrier’s request to an incumbent.

1 Q24: **On pp. 22-23, Mr. Williams states that if Petitioners do not implement LNP it will**  
2 **limit wireless to wireless LNP because wireless carriers use numbers assigned by**  
3 **LECs. How do you respond?**

4 A: Mr. Williams admits in his answer to Interrogatory 19. that Western Wireless is not re-  
5 quired to use numbers assigned by LECs and that it can obtain its own numbers and not  
6 use those assigned by LECs.

7 Q25: **On pp. 23-24 Mr. Williams notes that the FCC’s Consumer and Governmental Af-**  
8 **fairs Bureau submitted a letter to NARUC addressing issues associated with**  
9 **requests for suspension before State commissions. Do you have any comment?**

10 A: Yes. A thorough review of the Snowden letter finds that the actual substance is suppor-  
11 tive of the grant of the Petitioners’ suspension requests. The letter simply asks the  
12 President of NARUC to remind state commissions to apply the “appropriate standard of  
13 review” to requests under Section 251(f) of the Act. The Petitioners have already dem-  
14 onstrated that grant of their requests is fully consistent with those standards, even beyond  
15 the standards required by the Act and beyond that which the Eighth Circuit Court of Ap-  
16 peals has confirmed and clarified.

17 The Snowden letter limits its suggestions regarding proper review to include only  
18 the “undue economic burden and technical infeasibility” criteria. Just as Mr. Williams  
19 has neglected to address the adverse impact on customers that LNP implementation  
20 would impose, Mr. Snowden also omits these considerations.

21 Q26: **On page 24, Mr. Williams suggests that there are likely to be greater numbers of**  
22 **customers switching to wireless service. Do you have any comment about his state-**  
23 **ments?**

1 A: Yes. First, Mr. Williams references Mr. Thierer's speculative CATO report that was pre-  
2 pared even before implementation of intermodal LNP in the top 100 MSAs had begun.  
3 The evidence that is available since November 24, 2003 indicates that the degree of in-  
4 termodal porting from wireline to wireless, in the more urban areas, is small and less than  
5 expected. And any expected interest in rural areas, such as those served by the Petition-  
6 ers, will even be less than the already nascent level of intermodal porting in urban areas.  
7 See Watkins Direct at pp. 10-15. In a May 21, 2004 News Release, the FCC reports that  
8 since November 2003, "[o]ver 3.5 million numbers have been switched. . . . Approxi-  
9 mately 229,000 involved landline customers taking their landline number to a wireless  
10 carrier." The latter statistic represents the initial six months of intermodal LNP experi-  
11 ence in the Nation's top 100 MSAs. Clearly, the national demand for intermodal LNP in  
12 metropolitan areas has been modest.

13 **Q27: Mr. Williams complains at pp. 24-25 that Western Wireless has had to spend re-**  
14 **sources for LNP. Is this relevant?**

15 A: No. The fact that the FCC mandated that LNP be implemented by CMRS carriers is not  
16 at issue in these proceedings. Congress explicitly established the opportunity for a rural  
17 telephone company to obtain a suspension or modification in Section 251(f)(2) under the  
18 broad protections Congress intended for rural customers and carriers. Nothing in these  
19 requirements includes consideration of actions of other carriers, either voluntarily or in-  
20 voluntarily.

21 **Q28: Mr. Williams complains at p. 25 that it would be "unfair" if the Petitioners are not**  
22 **required to implement LNP because it would limit Western Wireless opportunity to**  
23 **recoup its LNP costs by porting numbers from the Petitioners. How do you re-**

1 **spond?**

2 A: Mr. Williams statement is not compelling given that LNP in the wireless-to-wireline di-  
3 rection is only required, pursuant to the *Nov. 10 Order*, in the very limited circumstance  
4 where the wireless number resides in the correct LEC rate center. The current circum-  
5 stances are more competitively fair than the disparate version of LNP that would result  
6 under the FCC's approach given the unresolved rate center disparity issues that I have  
7 discussed in my response to Question 19. At least, Western Wireless has some opportu-  
8 nity to port numbers from other wireless providers, whereas most of the Petitioners would  
9 have little or no opportunity to recoup their costs by porting-in numbers. Requiring the  
10 Petitioners to implement LNP would be even more "unfair" than the situation about  
11 which Western Wireless complains.

12 **Q29: What relevance does Mr. Williams' quote on p. 26 regarding rate centers and rout-**  
13 **ing and rating of calls have here?**

14 A: None. Mr. Williams apparently believes that the quoted FCC statement at p. 26, lines 13-  
15 16 of his Direct Testimony has a meaning different than the facts would indicate. First,  
16 the rate center associated with a telephone number does not necessarily determine the  
17 service treatment of calls. Second, even if a LEC wanted to use rate center areas as the  
18 means to define local exchange carrier services, as I have already explained above, the  
19 LEC cannot and would not treat calls to a wireless user as a local exchange service call if  
20 the LEC has no interconnection or business arrangement in place with the wireless carrier  
21 because the LEC would have had no requirement to have network trunks in place or es-  
22 tablished terms with other carriers to route such calls. Calls to users of wireless carriers  
23 where there is no established network interconnection or business arrangements in place

1 are necessarily handed off to IXC's who complete such calls to a distant point. Therefore,  
2 "rated in the same fashion" simply means that the calls to the ported number are treated  
3 as IXC calls as any other call is treated for which there is no interconnection or business  
4 arrangement in place with the wireless carrier that would allow for the routing of a call by  
5 the LEC to the wireless carrier as a local call.

6 **Q30: What concluding comments would you offer to the Commission with regard to the**  
7 **pending Requests?**

8 **A:** For all of the reasons set forth in my Direct Testimony and herein, I respectfully urge the  
9 Commission to grant the suspension requests of the Petitioners. Their requests satisfy the  
10 criteria set forth in Section 251(f)(2) of the Act and are consistent with the preservation  
11 of the public interest:

12 ■ The costs to implement LNP, wireline-wireline and wireline-wireless, would impose  
13 significant adverse economic impacts on the users of telecommunications in rural areas of  
14 South Dakota served by Petitioners.

15 ■ The FCC's *Nov. 10 Order* as well as subsequent orders and statements regarding in-  
16 termodal LNP create more problems than solutions. Intermodal LNP would impose on  
17 the Petitioners either undue economic burdens, requirements that are not technically fea-  
18 sible, or both.

19 ■ Suspension of the implementation of LNP for these Petitioners is consistent with the  
20 public interest, convenience and necessity in that the costs of LNP implementation to  
21 both telecommunications users and the Petitioners are significant and the benefits are  
22 slight as evidenced by the lack of demand for LNP among consumers in the areas served  
23 by the Petitioners in rural South Dakota.

1 Q31: **What is the scope of the modification or suspension that the Petitioners seek from**  
2 **this Commission pursuant to Section 251(f)(2)?**

3 A: Specifically, the current suspension of the FCC's LNP requirements should be extended  
4 until conditions may have changed (*i.e.*, a change in the cost related to demand) relevant  
5 to the public interest considerations that form the basis here for the Petitioners' suspen-  
6 sions. This would include suspension until the FCC and the Courts make a full and final  
7 disposition of the outstanding issues, including the porting interval and wireless to wire-  
8 line LNP requirements. Further, the Commission should confirm that the Petitioners  
9 have no obligation to transport calls beyond their service areas for purpose of LNP or any  
10 other purpose. Finally, when the issues are resolved and the public interest circumstances  
11 may have changed, the Petitioners would need sufficient time to acquire and install the  
12 necessary hardware and software and to put in place the necessary administrative proc-  
13 esses.

14 Q32: **Does this conclude your Rebuttal Testimony?**

15 A: Yes.

# **EXHIBIT 1**

---

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

---

IN THE MATTER OF THE PETITIONS  
FOR SUSPENSION OR MODIFICATION  
OF § 251(b)(2) OF THE  
COMMUNICATIONS ACT OF 1934 AS  
AMENDED

Docket No. TC04-025; TC04-038; TC04-044  
through TC04-056; TC04-060 through TC04-  
062; TC04-077; TC04-084; and TC04-085

**WWC'S RESPONSES TO  
SUPPLEMENTAL DISCOVERY  
REQUESTS OF PETITIONERS**

WWC License LLC, by and through its undersigned attorney, Talbot J. Wieczorek, of Gunderson, Palmer, Goodsell & Nelson, LLP, Rapid City, South Dakota, hereby responds to the Supplemental Discovery Requests of the Petitioners in the following dockets:

TC-04-025	Kennebec Telephone Co.
TC04-038	Santel Communications
TC04-044	Sioux Valley Telephone Co.
TC04-045	Golden West, Vivian Telephone Co and Kadoka Tele Co
TC04-046	Armour, Bridgewater-Canistota Tele Co and Union Tele Co
TC04-047	Brookings Municipal Utilities d/b/a Swiftel Communications
TC04-048	Beresford Municipal Telephone Company
TC04-049	McCook Cooperative Telephone Company
TC04-050	Valley Telecommunications Cooperative Association, Inc.
TC04-051	City of Faith Telephone Company
TC04-052	Midstate Communications, Inc.
TC04-053	Western Telephone Company
TC04-054	Interstate Telecommunications Cooperative, Inc.
TC04-055	Alliance Communications Inc. and Splitrock Properties
TC04-056	RC Communications, Inc., and Roberts County Telephone Cooperative Assn.
TC04-060	Venture Communications Cooperative
TC04-061	West River Cooperative Telephone Company
TC04-062	Stockholm-Strandburg Telephone Company
TC04-077	James Valley Cooperative Telephone Company
TC04-084	Tri-County Telcom
TC04-085	Cheyenne Sioux Tribe Telephone Authority

## II. DISCOVERY REQUESTS

### A. INTERROGATORIES

1. At page 10, lines 6-14 of Mr. Williams' testimony, he states that similarly situated LECs are not seeking a delay or suspension of LNP implementation. Identify the similarly situated LECs to which you refer and explain with specificity how they are similar to Petitioners, including information on their respective switch upgrade costs, number of lines in service and type of interconnection with wireless carriers.

**ANSWER: See Exhibit A for the list of similarly situated LECs that have implemented LNP. Further, numerous LECs throughout the country have not requested waivers of their obligation of porting numbers by May 24, 2004. In fact, some LECs in South Dakota did not apply for a waiver or extension and it was represented by Attorney Rogers that these LECs, planned on providing portability by the deadline and, therefore, were not filing for waivers or extensions. Western Wireless Corporation does not have access to specific switch upgrade costs for LEC's in our service area.**

2. At page 10, lines 16-20, and page 11, lines 1-15, you identify other state commissions that have ruled on LEC LNP suspension requests. Identify any other state commissions that have ruled on temporary or permanent LNP suspension requests of which you are aware and indicate how they have ruled.

**ANSWER: A comprehensive list of regulatory filings and decisions related to Local Number Portability can be found at [www.NECA.org](http://www.NECA.org).**

3. At page 12, lines 23-26 and page 13, lines 1-7, you state that "Petitioners have identified only a few technical or feasibility issue in the implementation of local number portability" and list three issues. Identify where each Petitioner identified the alleged issues in its Petition, testimony and discovery responses by page number and where applicable, by line number or question number.

As way of clarification, it does not appear any of the companies claim that LNP would be a requirement that is “technically infeasible” under 47 U.S.C. § 251(f)(2)(A)(iii). However, in response to interrogatory 27 of Western Wireless’ First Set of Interrogatories to the Petitioners, Petitioners either answered that there was no technical infeasibility but that implementing the portability under certain circumstances could be difficult based on the lack of rule makings or be difficult to do so using a local seven digit dialed basis. There exists testimony that has been prefiled by various Petitioners also reiterating these positions. To the extent that this interrogatory requests that every instance of every reference that any of the Petitioners’ 22 witnesses may have made to these three areas must be set forth, the interrogatory is objected to as overly broad and unduly burdensome especially in that it seeks summaries of Petitioners’ own testimony.

4. At page 14, lines 17-22, you state that “the LEC will need to route a call to a ported number to the serving tandem.”
  - a. Identify the serving tandem to which you refer.
  - b. Identify any requirement that LECs must route calls to a ported number to the serving tandem. If you are not aware of any such requirement, indicate so.
  - c. Indicate whether you contend that if the LECs route a call to a number ported to Western Wireless to the serving tandem they would also need to route calls to Western Wireless numbers that are not ported numbers to the serving tandem.

**ANSWER:**

**4.a) The Qwest LATA or local tandem to which the trunk group that delivers wireless terminating traffic is connected.**

**4.b) Pursuant to federal law and regulation, it is the LEC’s requirement to appropriately route the traffic for ported numbers. There is no specific requirement to route to a serving tandem. This is just one of several methods a carrier can use to deliver local traffic to a ported number. Typically, for low traffic volumes, tandem routing, using common or shared trunk groups, is the most cost efficient means of routing such traffic. It appears that Petitioners used the most costly way to route traffic as the basis for their cost analysis rather than considering other ways of routing.**

**4.c) Objection: How calls need to be routed for Western Wireless numbers separate and a part from LNP issues is not relevant in any of these filings and is not likely to lead to the discovery of admissible evidence.**

5. At page 15, footnote 23, you state that the Central Office Code Administration Guidelines published by the Alliance for Telecommunications Industry Solutions “permit a carrier to receive a rate center number assignment and designate a routing point for calls to those numbers that is outside the rate center to which they are assigned.” Do you contend that this requires Petitioners to route calls to a ported number to the serving tandem?

**ANSWER: This reference was provided to indicate that tandem routing practices for local calling are not new to the industry. See also response to Question 4.a.**

6. At page 15, line 6, you state that “[t]his practice is permitted under industry guidelines...”  
To what practice are you referring?

**ANSWER: The practice of identifying separate rating and routing points for NPA-NXXs and properly rating and routing traffic based on those designations.**

7. At page 3, lines 3-7, you state that you have been “actively involved in negotiation of interconnection agreements with most, if not all, of the Petitioners in this case on behalf of Western Wireless” in response to a question as to whether you have any background or familiarity with Western Wireless’ system in South Dakota and any familiarity with the Petitioners’ systems in South Dakota.
- a. Based on your familiarity with the Petitioners’ systems obtained through the interconnection agreement process, do any of the Petitioners route traffic to Western Wireless customers to the serving tandem identified in 4a?
  - b. Does Western Wireless contend that the Petitioners agreed in the interconnection agreements to route traffic to Western Wireless to the serving tandem?
  - c. Does Western Wireless contend that the FCC’s local number portability rules would require parties to an interconnection agreement to route traffic in a manner different from that to which they agreed?

**ANSWER:**

**7.a) Not at this time. Petitioners can, at any time, begin to route traffic to Western Wireless customers to the serving tandem.**

**7.b) No.**

**7.c) No, but nothing prevents Petitioners from amending, by mutual agreement, the interconnection agreements with Western Wireless.**

8. At page 16, lines 9-11, you state that “[t]he facts contained in the Petitions do not meet the standard that would lead one to conclude the economic burden exceeds that ‘typically associated with efficient competitive entry.’” Identify the facts that would meet the standard that would lead one to conclude the economic burden exceeds that typically associated with efficient competitive entry.”

**ANSWER: One method to establish this burden might include demonstration of costs that are extraordinary in comparison to other similarly situated companies that have implemented LNP. Another method may be to demonstrate that a Petitioners financial wherewithal is insufficient to sustain implementation of LNP. Adoption of any new service to the public usually entails some costs. The fact that adoption and providing of new service to the public entails a cost in and of itself would not logically lead to the conclusion that there has been any type of undue economic burden or adverse economic impact. Otherwise, any service that would add costs could be barred under such a test.**

9. At page 16, lines 12-17, you state that you have experience with SOA and LNP queries in response to a question concerning whether you have experience with the real life costs of LNP implementation.

- a. Indicate whether this means you have experience with the cost of SOA and LNP queries.
- b. If you have such experience, indicate the recurring and non-recurring cost associated with SOA and LNP queries.

**ANSWER:**

**9.a) Yes.**

**9.b) Please see Western Wireless' response to question 12 of the First Discovery Requests.**

10. At page 17, lines 11-13, you state that Petitioners have included fees for SOA non-recurring set up charge or non-recurring Service Order Administration "when estimated port volumes provide no justification for an automated SOA interface."

- a. Identify the specific Petitioners to which you refer.
- b. Indicate for each Petitioner identified in 10.a. whether you contend that the Petitioner's cost estimates for an automated SOA interface are unreasonable or whether you contend that an automated SOA cannot be justified, or both.
- c. Indicate whether Western Wireless utilizes an automated SOA.
- d. Indicate the recurring and non-recurring costs paid by Western Wireless for the SOA interface.

**ANSWER:**

**10.a) All Petitioners**

**10.b) We contend that automated SOA is not justified for the low port volume forecasts made by the Petitioners**

**10.c) Although irrelevant to the proceeding, Western does use an automated SOA interface**

**10.d) Objection, this interrogatory calls for information that is irrelevant and not likely to lead to admissible evidence.**

11. At page 17, lines 14-18, you state that "many of the Petitioners have not provided sufficient information in response to interrogatories to address the validity of switch upgrade cost claims at this time." Identify the Petitioners to which you refer.

**ANSWER: All Petitioners that have not provided actual switch vendor quotations.**

12. At page 18, lines 5-15, you state that Beresford Telephone has overstated SOA costs.

Identify all other Petitioners that you contend have overstated SOA costs.

**ANSWER: See response to 10.a.**

13. At page 18, lines 9-11, you state that Beresford can utilize the Number Portability Administration Center Help Desk to perform the SOA function for 24 ports for a total of \$360.

- a. Explain how you arrived at a cost of \$360.
- b. Is the Number Portability Administration Center Help Desk and automated SOA interface?
- c. Does Western Wireless utilize the Number Portability Administration Center Help Desk?
- d. If Western Wireless does not utilize the Number Portability Administration Center Help Desk, explain why it does not and identify the factors that resulted in Western Wireless selecting a different SOA interface.
- e. How long does it take to complete a port using the Number Portability Administration Center Help Desk?
- f. Identify the annual number of port requests that Western Wireless has projected it will make of each of the Petitioners for the years 2004 through 2010.

**ANSWER:**

**13.a) The \$360 figure was estimated by taking the number of ports and multiplying by the estimated per port line charge for SOA services (\$15).**

**13.b) No.**

13.c) Western Wireless does use the Number Portability Administration Center Help Desk in certain situations.

13.d) N/A

13.e) The transaction time for using the Number Portability Administration Center Help Desk is estimated to take less than 2 minutes.

13.f) Please see Exhibit B.

14. At page 19, lines 1-3, you state that “Western Wireless estimates the cost of routing traffic to these ported numbers to be \$1,120 for the year including non-recurring charges.” Explain with specificity how you derived this amount.

**ANSWER:** The estimate was calculated using these inputs:

- A \$400 estimated non-recurring charge for reconfiguration of existing trunk group to Qwest tandem.
- West River estimate of annual ports – 12
- Qwest toll transit rate - \$.003123
- Estimated local calls originated each day on West River network to each ported number – 6
- Estimated average length of local calls originated on West River network to ported numbers – 3.5 minutes
- Assuming a traffic volume estimate after 2.5 years of port activity
  
- The monthly recurring cost was calculated using this formula: (Annual Ports\*2.5 years)\*(local calls per day\*length of calls\*days per month)\*transit rate  
Alternatively:  $(12*2.5)*(6*3.5*30)*0.003123 = \$59.02$  per month x 12 months = \$708

*$NRC\ of\ \$400 + 12\ Months\ of\ MRC\ of\ 708 = 1^{st}\ year\ costs\ of\ \$1108$*

15. At page 19, lines 1 and 2, you state “[a]ssuming these porting customers to have average incoming call characteristics...”, identify with specificity what are the “average incoming call characteristics” to which you refer.

**ANSWER:** See input assumptions in response 14.

16. At page 19, lines 8-10, you state that you believe the FCC “views that it is the originating carrier’s responsibility to deliver local traffic for termination...”

- a. For each of the Petitioners, identify the calls to Western Wireless numbers by number and routing arrangement, for which Petitioner pays reciprocal compensation to Western Wireless.
- b. Indicate whether you contend that Petitioners would be required to pay reciprocal compensation on calls to numbers ported from the Petitioner to Western Wireless.

**ANSWER:**

**16.a) Objection, the interrogatory is irrelevant and unlikely to lead to admissible evidence and is also overly burdensome and unduly broad in that it seeks information on calling arrangements and number and routing arrangements not related to LNP. Further, each Petitioner would have this information readily available in their existing records.**

**16.b) Yes.**

17. At page 20, lines 5-8, you state that you eliminated switch maintenance cost because LNP does not result in additional increase in this cost. At Addendum D to your Answers to Interrogatories, Local Number Portability Operations Agreement, Section 7.3, states that “[e]ach Party shall monitor and perform effective maintenance through testing and the performance of proactive maintenance activities such as routine testing, development of and adherence to appropriate network trouble isolation processes and periodic review of operational elements for translations, routing and network faults.” Reconcile these two statements.

**ANSWER: Switch maintenance and routing table management should be routine practice that is not altered by Local Number Portability operations.**

18. At page 20, lines 13-15, you state that “[t]he routing methods proposed by the Petitioners are inefficient in that they make little or no utilization of existing equipment and shared facilities currently used to exchange calls with other carriers.” Identify with specificity and for each Petitioner, the “existing equipment and shared facilities currently used to exchange calls with other carriers” to which you refer.

**ANSWER: Trunk groups that currently deliver wireless and other carrier traffic to Petitioners directly from Qwest or any other common/shared trunk group that is connected to the PSTN.**

19. At page 22, lines 18-23 and page 23, lines 1-4, you state that if Petitioners do not implement LNP it will limit wireless to wireless number portability because wireless carriers use numbers assigned to them by LECs.

- a. Are you required to use numbers assigned by LECs? If you contend that you are so required, identify the requirement.
- b. Can Western Wireless obtain its own numbers and not use those assigned by LECs? If you contend that Western Wireless cannot obtain its own numbers, explain why not.

**ANSWER:**

**19.a) No, Western Wireless is not required to use numbers assigned by LECs, however, the Petitioners are required to provide them. Many of Western Wireless’ customers and other wireless customers are currently served by numbers provided by LECs.**

**19.b) Yes, but it would take months and would not resolve porting issues for existing customers.**

20. At page 23, lines 9-11, you state that “Qwest has experienced a substantial loss of customers to competitors since the advent of number portability.”

- a. Identify the basis for this statement.
- b. Identify the number of customers lost by Qwest since the advent of number portability in South Dakota.
- c. Identify the number of customers lost by Western Wireless since the advent of number portability in South Dakota.

**ANSWER:**

**20.a) This statement was based on discussions with CLEC's in South Dakota and on transit billing volume changes for Western Wireless traffic delivered to CLEC CLLIs.**

**20.b) Western Wireless does not have specific customer counts for Qwest line loss in South Dakota.**

**20.c) Objection, this interrogatory calls for information that is irrelevant and not likely to lead to admissible evidence and the question is vague. Without waiving the objection, Western Wireless answers as follows: Western Wireless has experienced people leaving Western Wireless for other wireless providers and people leaving other wireless providers and coming to Western Wireless. Further, Western Wireless has experienced people wishing to leave Western Wireless who have not been able to port their numbers because Petitioners have refused to implement LNP.**

21. At page 25, lines 3-7, you state that "it is unfair that carriers who we compete with, that are similarly obligated, would be exempted from their obligations and thereby limit our ability to recoup the LNP investments we have made by restricting our opportunity to leverage those investments in a competitive marketplace."

- a. Do you believe it would also be unfair if the Petitioners' opportunity to leverage LNP investments was restricted?
- b. Assuming the Petitioners were LNP capable, identify by Petitioner and by rate center all rate centers where Western Wireless would be required to port numbers from Western Wireless to the Petitioner.

**ANSWER:**

**21.a) To the extent that Petitioners have to abide by the same coverage and rate center rules as other carriers, Yes.**

**21.b) Western Wireless would be obligated to port numbers where the Petitioner provides service.**

22. At Exhibit 5A and 5B of your testimony, you list recurring and non-recurring transport costs for some Petitioners. For each Petitioner, explain how the recurring and non-recurring transport cost was derived. If no transport cost is listed for a Petitioner, explain why not.

**ANSWER: Non-recurring costs in Exhibit 5A and 5B are, for the most part, those costs provided by the Petitioners. Any modifications made to these costs are explained in my testimony. Recurring costs in Exhibit 5A and 5B were developed as follows:**

**SOA: Ports per year / 12 months x \$15 Neustar (NPAC) help desk fee per port.**

**LNP Query: Cost provided by Petitioners or access lines in service x six originating calls per day x 30 days x .00075 per query**

**If no transport cost is listed for a Petitioner, the Petitioner has indicated they will have no numbers ported from their network.**

23. At the conference call sponsored by the South Dakota Commission on June 1, 2004, Western Wireless stated that the testimony and exhibits of Ron Williams include “general” and “company specific” portions. Identify by page and line number the parts of Mr. Williams' testimony that are “general” and the parts that “company specific.” Also identify the Exhibits or parts thereof that are “general” and the ones that are “company specific.” For the testimony and Exhibits that are company specific, identify the company to which they apply.

**ANSWER: These terms were used in regard to comments made during that meeting that Mr. Watkins constitutes a general expert and the costs experts were considered cost company specific experts. In that regard, all the testimony of Ron Williams replying to the issues raised by Mr. Watkins should be considered general testimony applying to policy**

and other issues raised by Mr. Watkins. Regarding company specific, the cost testimony of Williams is specific for each petitioner in that it replies to the specific cost testimony submitted by each petitioner. To the extent that the cost testimony could be argued to also apply to the public interest, convenience and necessity issues, the cost analysis is presented for that matter. The same would be said for the testimony of technical difficulties in implementing LNP. Namely, the technical testimony is directed at each petitioner specifically but may also be regarded as applying to general testimony regarding implementation issues.

24. Do you contend that imposing the LNP obligations on Petitioners is not unduly economically burdensome? If your answer to the preceding interrogatory is in the affirmative, please state the following with respect to each Petitioner:

- a. State in detail each fact, matter and circumstance upon which you rely to support your answer.
- b. Identify each person having knowledge of the facts that support your answer and state the substance of their knowledge.
- c. Identify all documents upon which you rely which support you're answer.

**ANSWER: Yes.**

**24.a) Petitioners have failed in their burden to show undue economic burden in their refusal to provide their cost documents received from vendors. Refusal of the Petitioners to provide such documents makes it impossible to make a conclusion that undue economic burden exists. Further, Petitioners all have the financial ability to pay for LNP. See also responses to interrogatory 8 above.**

**24.b) Petitioners and their witnesses.**

**24.c) Discovery to date and prefiled testimony of Petitioners.**

25. On page 25, lines 1-3 of Mr. Williams' testimony, he states that "We have upgraded our network, implemented new processes, systems, and hired supporting resources to implement LNP in South Dakota. In other words, we have absorbed the costs of implementing LNP

under our FCC obligations.” Please list the cost Western Wireless has incurred for these various items in South Dakota.

**ANSWER: Objection, as this interrogatory calls for information that is not relevant or likely to lead to admissible evidence, unduly burdensome and overly broad and vague. Without waiving said objection, Western Wireless answers as follows: Such costs are not kept by State.**

## **B. DOCUMENT PRODUCTION**

1. At page 13, lines 15-21, you cite the testimony of Steven D. Metts. Provide a complete copy of Mr. Metts’ testimony that includes the cited language.

**ANSWER:**

**1) Q. “On Page 2 Line 21, beginning on 20 and 21 you state the purpose of your testimony. Is it your contention that suspension of the FCC requirements is based upon technological incapability for any of your companies?”**

**A. “No.”**

**See attached Exhibit C.**

2. Provide all documents referenced in your responses to Interrogatories 1-25.

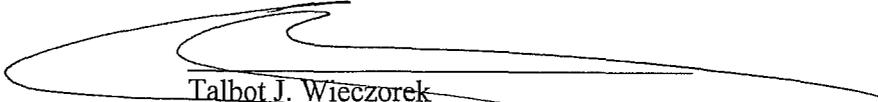

**ANSWER: Documents previously provided otherwise. Also, see attached Exhibits A, B and C.**

Dated this 11 day of June, 2004.

1 implementation.

2 Q. Do you have any sense or any feel for what  
3 the additional charges incurred by each of these  
4 companies is?

5 A. No. Those companies withdrew before we had  
6 the data request for the costs and did not submit any  
7 costs to me.

8 Q. On Page 2 Line 21, beginning on 20 and 21 you  
9 state the purpose of your testimony.

10 Is it your contention that suspension of  
11 the FCC requirements is based upon technological  
12 incapability for any of your companies?

13 A. No.

14 Q. If you would, turn to Page 5, as well.

15 A. (Witness complies.)

16 Q. When was the FCC Order -- referring to Page  
17 5, when was the FCC Order issued?

18 A. November 10th, 2003.

19 Q. So all of the NMECG members have known since  
20 then that they were going to have to be within  
21 compliance?

22 A. Yes.

23 Q. When did ENMR and ValleyTel apply for a  
24 request of waiver to the FCC?

25 A. I don't know that.

## CERTIFICATE OF SERVICE

I hereby certify that an original and ten (10) copies of the enclosed document were hand-delivered to the South Dakota PUC on June 14, 2004, directed to the attention of:

Pam Bonrud  
Executive Director  
South Dakota Public Utilities Commission  
500 East Capitol Avenue  
Pierre, SD 57501

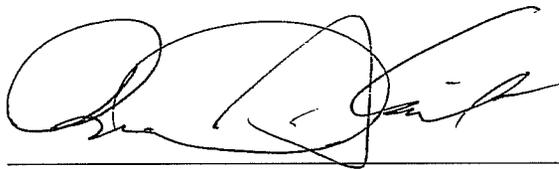

A copy was sent via e-mail and overnight Federal Express to the following individual:

Enclosures

**RECEIVED**

BEFORE THE PUBLIC UTILITIES COMMISSION

JUN 15 2004

OF THE STATE OF SOUTH DAKOTA

**SOUTH DAKOTA PUBLIC  
UTILITIES COMMISSION**

IN THE MATTER OF THE PETITION  
OF KENNEBEC TELEPHONE COM-  
PANY FOR SUSPENSION OR MODIFI-  
CATION OF § 251(b)(2) OF THE COM-  
MUNICATIONS ACT OF 1934 AS  
AMENDED

Docket No. TC04-025

REBUTTAL TESTIMONY OF

ROD BOWAR

**REBUTTAL TESTIMONY OF**

**ROD BOWAR**

**ON BEHALF OF**

**KENNEBEC TELEPHONE COMPANY**

**June 14, 2004**

1 Q. Please state your name, business name and address.

2 **A. My name is Rod Bowar. I am the General Manager of Kennebec Telephone Com-**  
3 **pany (“Kennebec”), whose address is 209 South Main, Kennebec, South Dakota**  
4 **57544.**

5 Q. What is the purpose of your testimony?

6 **A. I will provide rebuttal testimony to various statements made by Ron Williams in his**  
7 **testimony filed on May 28, 2004 on behalf of WWC License L.L.C. (Western Wire-**  
8 **less).**

9 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners “waited 4 months to seek  
10 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
11 their legal obligations.” How do you respond?

12 **A. I dispute Mr. Williams’ characterization of events as baseless and inflammatory.**  
13 **Once the FCC made it clear that wireline carriers would be required to port num-**  
14 **bers to wireless carriers in areas outside the top 100 MSAs by May 24, 2004, Ken-**  
15 **nebec took immediate steps to investigate the cost and the processes involved with**  
16 **LNP and to explore its legal options. Because Kennebec had no experience with**  
17 **LNP, it took time to gather the pertinent information and to make the decision to**  
18 **seek a suspension of the requirement from the Commission. Further, the suspension**  
19 **petition itself took time and effort to prepare because Kennebec wanted to present**  
20 **as complete a petition as possible, accompanied by cost information as complete as**  
21 **possible.**

22 Q. Do you agree with Mr. Williams’ statement at page 14, lines 19-22, in which he states  
23 that “LECs will need to route a call to a ported number to the serving tandem” and to Mr.  
24 Williams’ statement at page 15, lines 1-4 when he discusses the routing of allegedly “lo-  
25 cal calls?”

1 **A. I believe that Mr. Williams' statement is not consistent with the interconnection**  
2 **agreement signed by Kennebec and Western Wireless. Pursuant to that agreement,**  
3 **Kennebec did not agree to route traffic destined for Western Wireless to the serving**  
4 **tandem. Rather, traffic terminating to Western Wireless is routed to an interex-**  
5 **change carrier. Therefore, it appears that Western Wireless' argument really is a**  
6 **bad faith attempt to change the agreement between the parties.**

7 **Q. At page 19, lines 8-10, Mr. Williams states that it is his belief that "the FCC views that it**  
8 **is the originating carrier's responsibility to deliver local traffic for termination and that**  
9 **the costs associated with fulfilling that responsibility are not a number portability cost."**  
10 **What is your response to this statement?**

11 **A. Mr. Williams' statements are inconsistent and should be rejected. First he argues**  
12 **that Kennebec should be required to install new facilities to deliver ported calls to**  
13 **Western Wireless and then he argues that the cost of those facilities are not number**  
14 **portability costs. Further, as discussed at lines 1-6 above, Mr. Williams' suggestion**  
15 **that it is Kennebec's responsibility to deliver traffic destined to Western Wireless**  
16 **through a serving tandem is not consistent with the interconnection agreement be-**  
17 **tween Kennebec and Western Wireless.**

18 **Q. At page 20, lines 13-16, Mr. Williams states that "[t]he routing methods proposed by the**  
19 **Petitioners are inefficient in that they make little or no utilization of existing equipment**  
20 **and shared facilities currently used to exchange calls with other carriers." How do you**  
21 **respond?**

22 **A. The routing methods reflected in the cost exhibit attached to Kennebec's Petition**  
23 **are based on the current routing arrangements that Kennebec has in place with**  
24 **other carriers, namely, calls that are dialed on a local 7-digit basis are routed via di-**  
25 **rect connections. Therefore, if calls to numbers ported to a carrier are to be dialed**

1 on a local 7-digit basis, a direct connection needs to be established between the car-  
2 riers.

3 Q. Would Western Wireless' routing proposal have impacts to Kennebec beyond LNP?

4 A. Yes. It is my understanding that Western Wireless' proposal would increase Ken-  
5 nebec's costs. First, Western Wireless' proposal would require Kennebec to pay for  
6 new facilities to the tandem provider that it does not need for any purpose other  
7 than to route calls to ported numbers to wireless carriers. Second, Kennebec would  
8 most likely have to pay transit traffic charges to the tandem provider for transport-  
9 ing the traffic to the wireless carriers.

10 Q. Is there any other impact?

11 A. Yes. It appears that Western Wireless' proposal would create a regulatory arbi-  
12 trage scenario that could lead to the loss of access revenues. Today, certain calls to  
13 wireless carriers are routed to interexchange carriers. For example, if Kennebec  
14 Customer A calls Western Wireless Customer B, Kennebec Customer A incurs a toll  
15 charge. However, under Western Wireless' proposal, it is my understanding that if  
16 Kennebec Customer A calls Western Wireless Customer B who now has a number  
17 ported from Kennebec, Kennebec Customer A would be charged for a local call.  
18 Customers may be encouraged to "give up" their existing wireless numbers and ob-  
19 tain wireline numbers for the sole purpose of porting that number to avoid toll  
20 charges. This is not only a bad public policy result, but also simply a bad faith at-  
21 tempt to avoid an important contract provision upon which Western Wireless has  
22 already agreed with our company.

23 Q. Does this conclude your rebuttal testimony?

24 A. Yes.

**CERTIFICATE OF SERVICE**

The undersigned hereby certifies that she served a copy of the foregoing **REBUTTAL TESTIMONY** upon the persons herein next designated, on the date below shown, by depositing a copy thereof in the United States mail at Pierre, South Dakota, postage prepaid, in an envelope addressed to each said addressee, to-wit:

**REBUTTAL TESTIMONY OF DAN DAVIS**

**ON BEHALF OF THE ABOVE-NAMED COMPANIES**

**June 14, 2004**

1 I have attached Exhibit R1 to my rebuttal testimony that summarizes and com-  
2 pares the RLECs' cost exhibits that were filed with my May 14, 2004 testimony  
3 with the cost estimates that were filed by Mr. Williams on May 28, 2004.

4 Q. **Mr. Williams claims that the costs included in the category "Other Internal**  
5 **Costs" are overstated. (p.17:5-11) Do you agree with Mr. Williams?**

6  
7 A. No, I do not. Mr. Williams claims that the costs in this category are overstated  
8 because "the Petitioners have included costs to deal with 'Contracts for Porting'  
9 and costs related to the development of 'Inter-carrier Porting Forms'." The  
10 RLECs have included costs for porting contracts because wireless carriers, includ-  
11 ing Western Wireless, have sent Local Number Portability Operations Agree-  
12 ments to the RLECs to govern the porting of telephone numbers between the  
13 wireline and wireless networks. I have attached copies of porting agreements sent  
14 to RLECs to this rebuttal testimony marked as Exhibit R2. Thus, these costs are  
15 undeniable.

16 Mr. Williams also claims that the costs related to the development of "Inter-carrier  
17 Porting Forms" are also grossly overstated since porting forms are available to  
18 any carrier for a nominal fee. However, the costs included in this subcategory are  
19 not the costs associated with obtaining a porting form. The costs included in this  
20 subcategory are associated with obtaining the data to complete the form, complet-  
21 ing the form itself, and interacting with the wireless provider to confirm an under-  
22 standing and agreement with the information as compiled on the form. Based  
23 upon the information necessary to complete the Trading Partner Profile and port-  
24 ing questionnaires, an average of ten man-hours per Trading Partner Profile is a  
25 reasonable estimation of time required for this process. I have attached examples

1 of Trading Partner Profile forms and porting questionnaires to this rebuttal testi-  
2 mony marked as Exhibit R3.

3 Q. **Mr. Williams' states that some Petitioners have included non-recurring costs**  
4 **for an automated SOA interface (p. 17:11-13). What amount of costs did the**  
5 **RLECs use on Exhibit 2 on the line entitled "SOA Non-recurring set up**  
6 **charge" that was attached to Direct Testimony?**

7  
8 A. The RLECs did not include any non-recurring costs on the line entitled "SOA  
9 Non-recurring set-up charge" on Exhibit 2 that was attached to my direct testi-  
10 mony.

11 Q. **Mr. Williams states that Beresford has claimed a nonrecurring charge of**  
12 **\$1,800 and a monthly recurring charge of \$1,200 for Service Order Admini-**  
13 **stration. Do you believe Mr. Williams has reviewed Exhibit 2 that was at-**  
14 **tached to your direct testimony?**

15  
16 A. No, I do not. It appears that Mr. Williams' review of the RLECs cost analysis  
17 was using Exhibit 1 attached to discovery. The non-recurring cost as shown on  
18 Exhibit 2 for Beresford is zero. The recurring costs as shown on Exhibit 2 for  
19 Beresford were \$135 per month. In order to show a causal relationship between  
20 demand and costs, Beresford assumed three ports per month at an average cost of  
21 \$45 per port.

22 The RLECs, including Beresford, calculated the average cost per port assuming  
23 each port would require three contacts with the service bureau. Given the low  
24 level of demand and the resulting lack of learning plateau, communications with  
25 the service bureau can be expected to be more cumbersome than in an environ-  
26 ment where routine processing of ports occurs.

27 Q. **Mr. Williams has eliminated all costs from the line entitled "Other Recurring**  
28 **Costs." Will you please identify what costs are represented on the line item**  
29 **on Exhibit 2 entitled "Other Recurring Costs"?**

30

1 A. Yes. These are the costs associated with the RLEC personnel processing a port-  
2 ing order through multiple internal and external processes and systems. These  
3 costs would include receiving the LSR forms and reviewing the LSR for accuracy  
4 against the RLECs internal records and verifying that the LSRS are filled out in  
5 compliance with the Ordering and Billing Forum standards. If the LSRs are de-  
6 termined to be accurate and there are no conflicts for which the RLEC needs to  
7 contact the wireless provider on, the RLEC personnel can then send the new ser-  
8 vice provider a Firm Order Confirmation. Once the FOC has been sent to the new  
9 service provider, the RLEC will contact the SOA service bureau, the time that is  
10 included in the category. Internal work orders will be initiated, processed and fi-  
11 nalized in order to activate the unconditional ten digit trigger on the correct date,  
12 to test and verify calls are being properly routed to the ported number, to discon-  
13 nect the end-user and ported number from the switch, to verify that the number  
14 can not be reassigned on the switch and in the customer service records, update  
15 billing records, and complete performance measurement analysis.  
16 Based upon the multiple manual processes involved, the RLECs estimated five  
17 hours per port.

18 Q. **Do you have any other comments with regarding Mr. Williams' cost esti-**  
19 **mates?**

20  
21 A. Yes. In its reply to supplemental discovery, Western Wireless projected that each  
22 RLEC would experience porting demand. Yet, in Mr. Williams' cost exhibits, he  
23 fails to include, with the exception of Beresford, any monthly recurring costs as-  
24 sociated with porting activity. I have included porting related costs on the lines  
25 entitled "SOA Monthly Charge" and "Other Recurring Costs." In addition, if

1 Western Wireless' estimates of ports are correct as shown in Response to Inter-  
2 rogoratory 13.f., there will be fewer RLEC access lines than are shown on the cost  
3 exhibits, resulting in a higher cost per line per month. (Western Wireless' Re-  
4 sponses to Interrogatories are attached to the Rebuttal Testimony of Steven E.  
5 Watkins.)

6 Q. **Will you please explain the RLECs' rationale for using DS1 direct connec-**  
7 **tions in the cost analysis?**

8  
9 A. Yes, I will. Currently, RLECs do not route local traffic outside of their exchange  
10 boundaries. With intermodal LNP, a call to a number ported to a wireless carrier  
11 will terminate, in most cases, at a point of interconnection or switch located out-  
12 side of an RLEC exchange. If an RLEC routes a call to such a ported number  
13 over current equal access Feature Group D facilities, the customer would receive  
14 a recording instructing the customer to redial the number using one plus the NPA-  
15 NXX. To route the call as a local call would require the use of direct connections  
16 to each wireless provider.

17 In addition, the specified means provided in interconnection agreements between  
18 the RLECs and Western Wireless to route local traffic between the RLECs and  
19 Western Wireless is through the use of direct connections.

20 Q. **Mr. Williams states that it is unclear that any of the costs included in this line**  
21 **item concerning transport costs are recoverable under the FCC's rules per-**  
22 **taining to recovery via a line item surcharge on telecommunications custom-**  
23 **ers. (p. 19: 6-8) Have you addressed this issue in your direct testimony filed**  
24 **on May 14, 2004?**

25  
26 A. Yes, I have addressed transport cost recovery on pages 17 and 18 of my direct tes-  
27 timony.

1 Q. **Did Mr. Williams address whether or not the Commission should grant a**  
2 **suspension or modification of the LNP requirement as implemented by the**  
3 **FCC pursuant to Section 251(f)(2)(A)(i) (significant adverse economic impact**  
4 **on telecommunications users generally) of the Act?**  
5

6 A. No, he did not. This omission from Mr. Williams' testimony is particularly tell-  
7 ing because the costs that are associated with LNP implementation, that would be  
8 passed on to end users in the form of an FCC end user surcharge or an increase in  
9 local rates, would create a significant adverse economic impact on users, and the  
10 public interest, convenience and necessity would not be served by the implemen-  
11 tation of LNP in rural areas of South Dakota.

12 Q. **In Mr. Williams' Testimony (p. 21: 5-7), there is a claim that little or no in-**  
13 **vestment would be avoided by delaying the implementation of number port-**  
14 **ability. Do you agree?**  
15

16 A. No. LNP investment requirements may change based on the outstanding issues  
17 pending at the FCC. For example, the FCC, in its November 10, 2003 "Further  
18 Notice of Proposed Rulemaking," sought input from the North America Number-  
19 ing Council ("NANC") on reducing the porting interval for intermodal porting.  
20 The FCC also requested NANC to provide any recommendations on an appropri-  
21 ate transition period. The Intermodal Porting Interval Issue Management Group  
22 ("IMG") was formed to address these issues for the FCC. Based upon IMG's  
23 analysis, it determined that shortening the porting interval to approximately two  
24 days was the best interval based from a cost/benefit analysis. The IMG also esti-  
25 mated that the industry would need approximately 24 months to implement this  
26 proposal.<sup>1</sup>

---

<sup>1</sup> *NANC Report & Recommendation on Intermodal Porting Intervals*, Prepared for the NANC by the Intermodal Porting Interval Issue Management Group, May 3, 2004, at p. 4.

1 The IMG, in addressing rural telephone company impacts, stated that in order to  
2 support a shorter porting interval, service providers will need to change internal  
3 operating software and business practices and to implement mechanized systems  
4 and automated interfaces with other carriers. Based upon the IMG proposal, the  
5 exchange and approval of information on the local service request forms and the  
6 firm order confirmation forms would need to occur within a five-hour window in-  
7 stead of the current 24-hour window. Forms and processes used to exchange in-  
8 formation between carriers requiring manual intervention would need to be  
9 mechanized and automated to assure the five-hour standard could be met. I note  
10 that the IMG states that the FCC should recognize that this may cause economic  
11 impacts on rural telephone companies that may not be justified considering the  
12 size of the customer base and customer density.<sup>2</sup>

13 Thus, if the RLECs implement LNP before the porting interval and other ques-  
14 tions are resolved, they may utilize systems and interfaces that would have to be  
15 replaced once issues, like the porting interval, are addressed. This would, in ef-  
16 fect, result in a “double” LNP investment.

17 A suspension of the LNP requirement until after the FCC has decided the porting  
18 interval and other issues would allow RLECs to avoid the investment required to  
19 implement and modify systems and processes required under the current industry  
20 porting standard.

21 Q. **What would be the timeframe required for the RLECs to fully implement,**  
22 **test, and place LNP into commercial service, if required to do so?**  
23

---

<sup>2</sup> Id. at p. 25.

1 A. Based upon my analysis of LNP implementation, it would take the RLECs three  
2 to six months to implement LNP depending on the number of switches, whether  
3 additional hardware and/or software needs to be installed, and the availability of  
4 support personnel.

5 Q. **Does this conclude your testimony?**

6

7 A. Yes, it does.

CERTIFICATE OF SERVICE

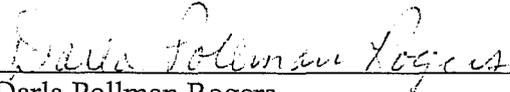

The undersigned hereby certifies that she served a copy of the foregoing **REBUTTAL TESTIMONY** upon the persons herein next designated, on the date below shown, by depositing a copy thereof in the United States mail at Pierre, South Dakota, postage prepaid, in an envelope addressed to each said addressee, to-wit:

Richard D. Coit

## Exhibit R2

## AGREEMENT

### WIRELESS-WIRELINE NUMBER PORTABILITY

by and between

Verizon Wireless

and

**Beresford Municipal Telephone Company**

THIS WIRELESS-WIRELINE NUMBER PORTABILITY SERVICE AGREEMENT ("Agreement") by and between Cellco Partnership d/b/a Verizon Wireless (a Delaware general partnership) and the Verizon Wireless Entities (collectively "Verizon Wireless"), each having an office and principal place of business at 180 Washington Valley Road, Bedminster, New Jersey 07921, and **Beresford Municipal Telephone Company**, on behalf of itself and its Affiliates (collectively "Carrier"), with offices located at 101 North 3 Rd Street, Beresford, SD 57004-1796. Verizon Wireless and Carrier may be collectively referred to as the "Parties" and individually as a "Party."

WHEREAS, the above named Parties wish to enter into an Agreement with each other and to be in compliance with the applicable rules and regulations of the Federal Communications Commission ("FCC Rules and Regulations").

WHEREAS, the Parties wish to enter into an Agreement to facilitate the ability of Customers to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement through Local Number Portability.

WHEREAS, the Parties wish to enter into an Agreement to establish practices and procedures to ensure that Customer requests to port numbers are achieved efficiently, with minimal delays, except as required to validate a port request.

THEREFORE, the Parties wish to enter into this Agreement on the following terms and conditions:

#### 1. TERM

This Agreement shall become effective in accordance with Section 34 ("Effective Date") and, except as otherwise provided in this Agreement, shall continue in full force and effect until either Party terminates the Agreement by providing notice of termination in writing to the other Party at least thirty (30) days in advance of such termination pursuant to the Notice provisions set forth in Section 18 of this Agreement. Upon termination, the Parties shall continue to provide Local Number Portability as may be required by Applicable Law.

#### 2. CIRCUMSTANCES OF DEFAULT

A Party shall be in default under this Agreement if such Party:

- 2.1 Becomes insolvent, liquidates, is adjudicated as bankrupt, makes an assignment for the benefit of creditors, invokes any provision of law for the relief of debtors, or initiates any proceeding seeking protection from its creditors; and/or

- 2.2 Violates any applicable laws, statutes, or other legal requirements with respect to this Agreement; and/or
- 2.3 Fails to perform any material term, condition, or covenant of this Agreement and such Party fails to cure such nonperformance within thirty (30) calendar days of receipt of written notice of such default from the non-defaulting Party ("Cure Period"). Upon expiration of said Cure Period, the non-defaulting Party shall have the right to seek applicable remedies under this Agreement. When a default cannot be reasonably cured within the Cure Period, the time for cure may be extended by agreement of the Parties for such period of time as may be reasonably necessary to complete such cure, provided the defaulting Party shall have proceeded promptly to cure such default and shall continue to prosecute such curing with due diligence.
- 2.4 Notices hereunder shall be given to the Notice address set forth in Section 18.

### 3. REMEDIES AND TERMINATION

- 3.1 In the event of default under this Agreement (and with respect to a default under Section 2.3, the Cure Period stated therein), the non-defaulting Party shall have the right, at its option, to suspend performance under this Agreement or to terminate this Agreement without further liability upon providing written notice of such termination to the defaulting party pursuant to the Notice provisions set forth in Section 18.
- 3.2 This Agreement may be affected by changes, modifications, orders, and rulings of regulatory bodies, including the FCC, to the extent competent jurisdiction otherwise exists. Each Party shall promptly notify the other Party in writing of any governmental action that limits, suspends, cancels, withdraws, or otherwise materially affects the notifying Party's ability to perform its obligations under this Agreement. In the event a material modification is made to the obligations of a Party set forth in this Agreement, which materially affects the obligations of a Party hereunder, then either Party may terminate this Agreement pursuant to Section 1 of this Agreement. If neither Party exercises such a right of termination, and any legislative, regulatory, judicial or other governmental decision, order, determination or action, or any change in applicable law, materially affects any material provision of this Agreement, the rights or obligations of a Party hereunder, or the ability of a Party to perform any material provision of this Agreement, the Parties shall promptly renegotiate in good faith and amend in writing this Agreement in order to make such mutually acceptable revisions to this Agreement as may be required in order to conform the Agreement to Applicable Law.
- 3.3 The rights set forth in Sections 2 and 3 of this Agreement are in addition to, and not in limitation of, any other right or remedy that a non-defaulting party may have at law or in equity.
- 3.4 Notices hereunder shall conform to the Notice provisions set forth in Section 18.

### 4. DEFINITIONS

Unless the context clearly indicates otherwise, when a term listed in these Definitions is used in the Agreement, the term shall have the meaning stated in these Definitions. A defined term intended to convey the meaning stated in these Definitions is capitalized

when used. Other terms that are capitalized, and not defined in these Definitions or elsewhere in the Agreement, shall have the meaning stated in the Act.

- 4.1 Act: The Communications Act of 1934 (47 U.S.C. 151 et. seq.), as amended.
- 4.2 Affiliate: Shall have the meaning set forth in the Act.
- 4.3 Agreement: This Agreement including all appendices attached hereto, orders by a Party that have been accepted by the other Party, future amendments, modifications and supplements made in accordance herewith.
- 4.4 Applicable Law: All effective laws, government regulations and government orders, applicable to each Party's performance of its obligations under this Agreement.
- 4.5 Assigned Telephone Number: A telephone number that is assigned to a Customer that can originate and terminate telephone calls through the Public Switched Telephone Network. An Assigned Telephone Number may be a suspended telephone number unless that telephone number was suspended for fraud but, for avoidance of doubt, will not include a telephone number that has been disconnected.
- 4.6 Commercial Mobile Radio Service ("CMRS"): Shall be as defined by the FCC.
- 4.7 Customer Proprietary Network Information ("CPNI"): Shall have the meaning set forth in Section 222 of the Act, 47 U.S.C. Section 222.
- 4.8 Customer: An end user and subscriber to the services provided by either of the Parties.
- 4.9 Customer Information: CPNI of a Customer and any other non-public, individually identifiable information about a Customer or, if applicable, the purchase by a Customer of the services or products of a Party.
- 4.10 Customer Service Records ("CSR"): The records that contain the identity, service address, rate plan or plans, and other information on the Customer.
- 4.11 Electronic Data Interface ("EDI"): A data interface for exchange of information between providers.
- 4.12 End Office: A switching entity used in performing, originating and terminating functions for calls to or from Customers. As used in this Agreement, the term End Office shall be used in reference to End Office Switches used by Carrier and other wireline carriers.
- 4.13 Intercarrier Communications Process ("ICP"): The communication process between the OSP and the NSP, which validates the Customer information and initiates and completes the port request. The ICP includes the exchange of the LSR/LR.
- 4.14 Local Number Portability ("LNP"): Shall have the meaning set forth in the Act.
- 4.15 Local Service Request ("LSR"): Forms containing information about a Customer who desires to port a telephone number to the NSP. A sample LSR and

descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG").

- 4.16 Location Routing Number ("LRN"): Ten-digit number assigned to a switch or point of interconnection used for routing calls.
- 4.17 Metropolitan Statistical Areas ("MSA"): An MSA denotes a large urban population market as designated by the U.S. government.
- 4.18 Mobile Switching Center ("MSC"): A CMRS carrier's switching entity used to perform originating, transit and terminating functions for calls to and from end users, also referred to as Mobile Telecommunications Switching Office or "MTSO."
- 4.19 New Service Provider ("NSP"): The new provider that will provide service to the Customer and to whom the Customer ports its Assigned Telephone Number.
- 4.20 Number Portability Administration Center ("NPAC"): A neutral third party center that processes porting information from and disseminates that information to telecommunication carriers. The NPAC processes the NSP subscriber port request and downloads the LRN associated with the subscriber ported telephone number to local number portability databases.
- 4.21 Old Service Provider ("OSP"): The provider providing service to the Customer at the time the Customer requests porting of the Assigned Telephone Number.
- 4.22 Verizon Wireless Entities: Any FCC-licensed entity doing business as Verizon Wireless and/or directly or indirectly controlled by Cellco Partnership.

## 5. INFORMATION

The Parties acknowledge that Customer Information may be exchanged between the Parties and may be subject to legal restrictions on its use or disclosure, including without limitation laws relating to CPNI. The Parties may only obtain and use such restricted Customer Information in accordance with applicable laws and the restrictions contained in this Agreement. Prior to initiating a port request with the OSP, the NSP shall obtain consent from the Customer that permits the OSP to release to and/or to confirm with the NSP the information about the Customer that was sought by the NSP in the port request process. The NSP shall indemnify, defend, and hold harmless the OSP from and against any liabilities, claims, or demands, including costs, and expenses (including reasonable attorneys' fees) arising from or relating to any failure on the part of the NSP to obtain from the Customer consent for the OSP to release/confirm information about the Customer that was or is sought by the NSP in the port request process.

## 6. NUMBER PORTABILITY

### 6.1 Scope

The Parties shall provide LNP on a reciprocal basis pursuant to this Agreement in accordance with FCC Rules and Regulations as may be prescribed from time to time. "Delay" or "denial" of ports between Parties shall only occur in the event a Party is unable to complete the validation of those validation elements expressly set forth in Appendix A.

### 6.2 Procedures for Providing LNP

The Parties will follow the porting intervals applicable to wireline-wireline porting more specifically described in the North American Numbering Council's Local Number Portability Administration Selection Working Group, dated April 25, 1997, Appendix E, Section 7.1, Figure 1 until such time as the FCC adopts an LNP provisioning process flow and porting intervals for Inter-Service Provider LNP applicable between wireline and wireless carriers, at which time the Parties will follow LNP provisioning process flow and porting intervals established by the FCC. In addition, the Parties agree to follow the LNP ordering procedures established at the OBF for porting of Assigned Telephone Numbers.

- 6.2.1 For purposes of this Section 6, "Party A" refers to a Party whose Customer elects to become a Customer of the other Party ("Party B") and to utilize the original telephone number(s) corresponding to the service(s) it previously received from Party A, in conjunction with the service(s) it will now receive from Party B. Upon Party B receiving authorization from the Customer in accordance with Applicable Law and sending an LNP order to Party A, Parties A and B will work together to port the Customer's telephone number(s) from Party A's network to Party B's network.
- 6.2.2 When a telephone number is ported out of the Carrier network, Carrier will remove all line-based features and calling card(s) associated with the ported number(s) from its Line Information Database ("LIDB"). Reactivation of the line-based calling card in another LIDB, if applicable, is the responsibility of Verizon Wireless or the Customer.
- 6.2.3 When a Customer's number is ported between the Parties, Carrier will follow the 911 Guidelines recommended by the National Emergency Number Association ("NENA") with regard to emergency services databases.
- 6.2.4 When Party A ports telephone numbers of its Customer to Party B and the Customer has previously secured a reservation of line numbers from Party A for possible activation at a future point, these reserved but inactive numbers may be ported along with the active numbers to be ported provided the numbers have been reserved for the Customer. Party B may request that Party A port all reserved numbers assigned to the Customer or that Party A port only those numbers listed by Party B. As long as Party B maintains reserved but inactive numbers ported for the Customer, Party A shall not reassign those numbers. Party B shall not reassign the reserved numbers to another Customer.
- 6.2.5 NXX codes shall be portable in accordance with FCC Rules and Regulations except those permitted to be designated non-portable by the same FCC Rules and Regulations. The Parties, moreover, shall ensure that all switches, whether currently owned or hereafter acquired, are upgraded to facilitate LNP to the extent required by FCC Rules and Regulations.
- 6.2.6 Numbers can be ported to and from carriers whose licensed areas overlap and where the receiving carrier has the ability to provide service, as applicable. Porting numbers under these circumstances does not require modification and/or changes to current transport agreements.

### 6.3 LNP Ordering Procedures

### 6.3.1 Numbers to be ported from Carrier to Verizon Wireless

6.3.1.1 Orders for LNP shall be submitted by VZW to Carrier using an LSR either via web GUI, FAX or EDI. Verizon Wireless shall submit LSRs to port numbers only on behalf of itself and entities for which it has authority to act.

6.3.1.2 Instructions for submitting an LSR to Carrier are available via **[TBD – identify where instructions are found]**.

### 6.3.2 Numbers to be ported from Verizon Wireless to Carrier

6.3.2.1 Orders for LNP shall be submitted by Carrier to Verizon Wireless utilizing validation information as required by Verizon Wireless and as applied to all other wireline carriers.

6.3.2.2 Instructions for submitting a validation request to Verizon Wireless will be provided via the Verizon Wireless process agreed to by the Parties.

## 6.4 Procedures for Providing LNP Through Full NXX Code Migration

When a Party has activated an entire NXX code for a single Customer and such Customer chooses to receive service from the other Party, the Parties shall follow the procedures set forth in the Industry Number Committee ("INC") Guideline 95-0407-0008 Central Office Code (NXX) Assignment Guidelines Section 7.

## 6.5 Procedures for Providing LNP Using Type 1 Numbers

Upon request of Verizon Wireless, the Parties will work together to migrate telephone numbers assigned to Type 1 trunks to the Verizon Wireless switch.

## 6.6 Procedures for Requesting LNP Capability

Either Party may submit a written request that the other Party upgrade any of its End Offices/MSCs to become LNP capable.

6.6.1 If either Party desires to have LNP capability deployed in an End Office/MSOC of the other Party that is not currently capable, the requesting Party shall issue an LNP request to the other Party. The Party receiving such request will respond to the requesting Party within ten (10) calendar days of receipt of the request with a date for which LNP will be available in the requested End Office/MSOC. The Party receiving the request shall proceed to provide for LNP in compliance with the procedures and timelines set forth in FCC Rules and Regulations.

6.6.2 The Parties will each be responsible for updating the LERG to reflect the LNP capabilities of their respective End Offices/MSOCs.

6.7 The Parties acknowledge and agree that telecommunications system interruptions or service outages may occur which may delay the processing of port requests. The Parties shall use best reasonable efforts to avoid such interruptions or outages and with respect to scheduled outages or maintenance

activities shall work with each other to schedule them so as to minimize disruptions to subscribers. Scheduled interruptions/maintenance should adhere to standard industry agreed upon maintenance windows for the NPAC.

## **7. TROUBLE, MAINTENANCE AND REPAIR**

7.1 Both Parties agree to work expeditiously to resolve any issues associated with porting a Customer between the two Parties. Before either Party reports a trouble condition, that Party must first use commercially reasonable efforts to isolate the trouble to the other Party's actions or facilities. In order to facilitate trouble reporting and resolution, the Parties shall provide the trouble reporting contact information, per Section 22 of this Agreement. It is the responsibility of each Party to maintain the accuracy of its contact information and to notify the other Party of changes and modifications.

7.2 As part of the commitments set forth in Section 7.1 of this Agreement, each Party shall monitor and perform effective maintenance through testing and the performance of proactive maintenance activities such as routine testing, development of and adherence to appropriate network trouble isolation processes and periodic review of operational elements for translations, routing and network faults.

## **8. DIRECTORY LISTINGS**

This Agreement does not govern or authorize the inclusion of listings in directories that may be published by a Party. Verizon Wireless shall not indicate on an LSR to be submitted to Carrier that it seeks for a ported number to be listed in a Carrier directory. Any listings shall be subject to separate agreement.

## **9. FRAUD**

The Parties agree to cooperate in good faith with each other to investigate, minimize, and take corrective action in cases of fraud related to number portability. Each Party assumes responsibility for all fraud related to number portability associated with its Customers and accounts. Neither Party shall bear responsibility for, and shall have no obligation to investigate or make adjustments to, the accounts of the other Party in cases of fraud by the other Party's Customers or other third parties.

## **10. COSTS**

The Parties to this Agreement will be responsible for their own costs incurred in implementing this Agreement.

## **11. USE OF TRADEMARKS**

The Parties agree that they will not use the name, service marks or trademarks of the other Party or any of its affiliated companies in any manner whatsoever without such Party's specific written consent, which consent the other Party may grant or withhold in its sole discretion. Neither Party is licensed hereunder to conduct business under any logo, trademark, service or trade name (or any derivative thereof) of the other Party. Neither Party shall issue any press release or other publicity concerning this Agreement without the prior written consent of the other Party, which consent the other Party may grant or withhold in its sole discretion. Neither Party may imply any direct or indirect affiliation with or sponsorship or endorsement of it or its services or products by the other Party. Any violation of this Section 11 shall be considered a material breach of this Agreement.

**12. COMPLIANCE WITH LAWS**

The Parties shall comply with all federal, state and local laws applicable to their performance hereunder. Neither Party shall be liable for any delay or failure in performance by it that results from requirements of Applicable Law, or acts or failures to act of any governmental entity or official.

**13. FORCE MAJEURE**

Neither Party shall be responsible for any delay or failure in performance of any part of this Agreement to the extent that such delay or failure results from causes beyond its reasonable control ("Conditions"), whether or not foreseeable by such Party. Such Conditions include, but are not limited to, acts of God, wars, revolution, civil commotion, acts of public enemy, embargo, acts of government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing or boycotts. If any such Condition occurs, the Party delayed or unable to perform ("Delayed Party"), upon giving prompt notice to the other Party, shall be excused from such performance on a day-to-day basis during the continuance of such Condition (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis during the same period); provided, however, that the Party so affected shall use commercially reasonable efforts to avoid or remove such Condition and both Parties shall proceed immediately with the performance of their obligations under this Agreement whenever such causes are removed or cease. Nothing in this Agreement shall require the non-performing Party to settle any labor dispute except as the non-performing Party, in its sole discretion, determines appropriate.

**14. ASSIGNMENT**

This Agreement or any right or interest under this Agreement may not be assigned or transferred nor may any obligation under this Agreement be delegated without the prior written consent of the other Party, which consent may not be unreasonably withheld. Any attempted assignment or delegation in violation of this Section 14 shall be void and ineffective and constitute default of this Agreement.

**15. BINDING EFFECT**

This Agreement shall inure to the benefit of, and shall be binding upon the Parties hereto and their respective successors and permitted assigns.

**16. INDEMNIFICATION**

16.1 Each Party ("Indemnifying Party") shall indemnify, defend, and hold harmless the other Party ("Indemnified Party"), the Indemnified Party's Affiliates, (for purposes of this Section 16, Affiliates shall include Verizon Wireless Entities) and the directors, officers and employees of the Indemnified Party and the Indemnified Party's Affiliates, from and against any and all liabilities, claims, demands, suits, actions, settlements, judgments, fines, penalties, injuries, damages, or losses including costs (including court costs) and expenses (including reasonable attorneys' fees) ("Claims") that arise out of bodily injury to or death of any person, or damage to, or destruction or loss of, tangible real and/or personal property of any person to the extent such injury, death, damage, destruction or loss, was proximately caused by the grossly negligent or intentionally wrongful acts or omissions of the Indemnifying Party, the Indemnifying Party's Affiliates, or the directors, officers, employees, agents, or contractors (excluding the Indemnified Party) of the Indemnifying Party or the Indemnifying Party's Affiliates, in relation

to a port request under this Agreement, including a Claim where there is (a) a claim, demand, suit or action by a person who is not a Party, (b) a settlement with, judgment by, or liability to, a person who is not a Party, or (c) a fine or penalty imposed by a person who is not a Party (collectively referred to as a "Third Party Claim").

16.2 A Party seeking to be indemnified hereunder shall follow, and the Indemnifying Party's obligations under Section 16.1 shall be conditioned on following, the Indemnification Process set forth in this Section 16.2.

16.2.1 The Indemnified Party: (a) shall provide the Indemnifying Party with prompt, written notice of any Claim after becoming aware thereof (including a statement of facts known to the Indemnified Party related to the Claim and an estimate of the amount thereof); (b) prior to taking any material action with respect to a Third Party Claim, shall consult with the Indemnifying Party as to the procedure to be followed in defending, settling, or compromising the Claim; (c) shall not consent to any settlement or compromise of a Third Party Claim without the written consent of the Indemnifying Party; (d) shall permit the Indemnifying Party to assume the defense of a Third Party Claim (including, except as provided below, the compromise or settlement thereof) at the Indemnifying Party's own cost and expense, provided, however, that the Indemnified Party shall have the right to approve the Indemnifying Party's choice of legal counsel.

16.2.2 If the Indemnified Party fails to comply with Section 16.2.1 with respect to a Claim, to the extent such failure shall have a material adverse effect upon the Indemnifying Party, the Indemnifying Party shall be relieved of its obligation to indemnify, defend and hold harmless the Indemnified Party with respect to such Claim under this Agreement.

16.2.3 Subject to 16.2.4 and 16.2.5, below, the Indemnifying Party shall have the authority to defend and settle any Third Party Claim.

16.2.4 With respect to any Third Party Claim, the Indemnified Party shall be entitled to participate with the Indemnifying Party in the defense of the Claim if the Claim requests equitable relief or other relief that could affect the rights of the Indemnified Party. In so participating, the Indemnified Party shall be entitled to employ separate counsel for the defense at the Indemnified Party's expense. The Indemnified Party shall also be entitled to participate, at its own expense, in the defense of any Claim, as to any portion of the Claim as to which it is not entitled to be indemnified, defended and held harmless by the Indemnifying Party.

16.2.5 In no event shall the Indemnifying Party settle a Third Party Claim or consent to any judgment with regard to a Third Party Claim without the prior written consent of the Indemnified Party, which shall not be unreasonably withheld, conditioned or delayed. In the event the settlement or judgment requires a contribution from or affects the rights of an Indemnified Party, the Indemnified Party shall have the right to refuse such settlement or judgment with respect to itself and, at its own cost and expense, take over the defense against the Third Party Claim, provided that in such event the Indemnifying Party shall not be responsible for, nor shall it be obligated to indemnify or hold harmless the Indemnified Party against, the Third Party Claim for any amount in excess of such refused settlement or judgment.

16.2.6 The Indemnified Party shall, in all cases, assert any and all provisions in applicable Tariffs and Customer contracts that limit liability to third persons as a bar to, or limitation on, any recovery by a third-person claimant.

16.2.7 The Indemnifying Party and the Indemnified Party shall offer each other all reasonable cooperation and assistance in the defense of any Third Party Claim.

16.3 Each Party agrees that it will not impede or bring any action against the other Party, the other Party's Affiliates, or any of the directors, officers or employees of the other Party or the other Party's Affiliates, based on any claim by any person for personal injury or death that occurs in the course or scope of employment of such person by the other Party or the other Party's Affiliate and that arises out of performance of this Agreement.

16.4 Each Party's obligations under this Section 16 shall survive expiration, cancellation or termination of this Agreement.

## 17. RELATIONSHIP OF THE PARTIES

17.1 Neither Party undertakes by this Agreement or otherwise to perform or discharge any liability or obligation of the other Party, whether regulatory or contractual, or to assume any responsibility whatsoever for the conduct of the business or operations of the other Party. The relationship of the Parties under this Agreement shall be that of independent contractors and is a non-exclusive relationship. Nothing contained in this Agreement is intended to give rise to an employment relationship, partnership or joint venture between the Parties or to impose upon the Parties any of the duties or responsibilities of employers, partners or joint venturers.

17.2 Except for provisions herein expressly authorizing a Party to act for another Party, nothing in this Agreement shall constitute a Party as a legal representative or agent of the other Party, nor shall a Party have the right or authority to assume, create or incur any liability or any obligation of any kind, express or implied, against, in the name or on behalf of the other Party unless otherwise expressly permitted by such other Party in writing, which permission may be granted or withheld by the other Party in its sole discretion.

17.3 Each Party shall have sole authority and responsibility to hire, fire, compensate, supervise, and otherwise control its employees, agents and contractors. Each Party shall be solely responsible for payment of any Social Security or other taxes that it is required by Applicable Law to pay in conjunction with its employees, agents and contractors, and for withholding and remitting to the applicable taxing authorities any taxes that it is required by Applicable Law to collect from its employees.

17.4 A Party may use a contractor of the Party (including, but not limited to, an Affiliate of the Party) to perform the Party's obligations under this Agreement, provided that a Party's use of a contractor shall not release the Party from any duty or liability to fulfill the Party's obligations under this Agreement.

## 18. NOTICES

Unless otherwise specified in this Agreement, all notices required under this Agreement shall be given in writing. All notices shall be given by personal delivery, express delivery service with next Business Day delivery, confirmed facsimile (with copy delivered by personal delivery, express delivery service with next Business Day delivery or certified mail, return receipt requested) or certified mail, return receipt requested to the person(s) specified below or to such other addresses as a Party may designate by written notice to the other Party. If sent by the United States Postal Service mail, such notices shall be deemed received on the earlier of actual receipt or five (5) business days following deposit. For the other forms of notice, notice will be deemed given as of (a) where there is personal delivery of the notice, the date of actual receipt, (b) where the notice is sent via express delivery service for next Business Day delivery, the next Business Day after the notice is sent, and (c) where the notice is sent via facsimile telecopy, if the notice is sent on a Business Day and before 5 PM in the time zone where it is received, on the date set forth on the telecopy confirmation, or if the notice is sent on a non-Business Day or if the notice is sent after 5 PM in the time zone where it is received, the next Business Day after the date set forth on the telecopy confirmation.

Notices shall be sent to:

To Verizon Wireless: Verizon Wireless  
Port Center  
300 River Rock Blvd  
Murfreesboro, TN 37128  
Attn: Port Center Director  
Fax: 1-615-372-2425

With a copy to: Verizon Wireless  
180 Washington Valley Road  
Bedminster, New Jersey 07921  
Attention: Assistant General Counsel – Procurement &  
Technology  
Fax: (908) 306-7766

If to Carrier: [provide carrier notice information]

#### 19. WAIVER

The delay or failure of either Party to enforce any of the provisions of this Agreement, or exercise in any respect any right or remedy provided for in this Agreement or at law or in equity, or to require performance of any of the provisions of this Agreement, or to exercise any option which is provided under this Agreement shall not be deemed a waiver of any such provisions, rights, remedies or options under this Agreement.

#### 20. SEVERABILITY

If any of the provisions of this Agreement shall be invalid or unenforceable, then such invalidity or unenforceability shall not invalidate or render unenforceable the entire Agreement. The entire Agreement shall be construed as if not containing the particular invalid or unenforceable provision or provisions, and the rights and obligations of the Parties shall be construed and enforced accordingly; provided, that if the invalid or unenforceable provision is a material provision of this Agreement, or the invalidity or unenforceability materially affects the rights or obligations of a Party hereunder or the ability of a Party to perform any material provision of this Agreement, the Parties shall promptly renegotiate in good faith and amend in writing this Agreement in order to make such mutually acceptable revisions to this Agreement as may be required in order to conform the Agreement to Applicable Law.

**21. LIMITATION OF LIABILITY**

Except as otherwise provided in this Agreement, neither Party shall be liable to the other Party, the other Party's Customers or to any other person in connection with the performance or nonperformance under this Agreement, including but not limited to, any claims for any indirect, incidental, consequential, special damages, including (without limitation) damages for lost profits, regardless of the form of action, whether in contract, indemnity, warranty, strict liability, or tort.

**22. ESCALATION PROCEDURES**

The Parties agree to provide each other with trouble reporting contacts and procedures via their respective web sites or other means agreed to by the Parties. In addition, the Parties agree to provide each other with escalation contacts and procedures via their respective web sites or other means agreed to by the Parties. Should a Party encounter any problems with respect to compliance with this Agreement that cannot be resolved through the trouble reporting contacts and procedures, then a Party may utilize the escalation contacts set forth in Appendix B ("Trouble Reporting General Contact Information") and the procedures set forth in Appendix C ("Carrier Escalation Procedures") and Appendix D ("Carrier Trouble Ticket Detail"). However, this Section 22 shall not operate in limitation or derogation of Sections 2 or 3 of this Agreement or the notice requirements set forth therein. In the event either Party fails to provide contact and procedures for trouble reporting and escalation, the Parties may utilize the Notice provisions set forth in Section 18.

In addition to the escalation procedures set forth in this Section 22, either Party may seek resolution of a dispute arising under this Agreement by pursuing any remedies available to it under this Agreement, at law, in equity, or otherwise, including, but not limited to, instituting an appropriate proceeding before the FCC or other regulatory body, or a court of competent jurisdiction; provided, however, that a Party pursuing any such remedy shall first notify the other Party of the dispute in writing through the Notice provisions set forth in Section 18 of this Agreement.

**23. ARTICLE HEADINGS**

The headings of the Articles are inserted for convenience of reference only and are not intended to be part of or to affect the meaning or interpretation of this Agreement.

**24. CHOICE OF LAW**

The construction, interpretation and performance of this Agreement shall be governed by and construed in accordance with the laws of the State of New York without regard to any conflicts of law principles that would require the application of the laws of any other jurisdiction.

**25. AMENDMENTS, MODIFICATIONS AND SUPPLEMENTS**

Amendments, modifications and supplements to this Agreement are allowed, provided that (a) all such amendments, modifications and supplements shall be in writing signed by authorized representatives of both Parties; and (b) all such amendments, modifications and supplements shall by reference incorporate this Agreement in its entirety and identify the specific sections or paragraphs contained herein which are amended, modified or supplemented; and (c) all such amendments, modifications and supplements shall not be construed to adversely affect vested rights or causes of action

which have accrued prior to the effective date of such amendment, modification or supplement.

**26. ENTIRE AGREEMENT**

This Agreement together with its appendices constitutes the entire agreement between the Parties and cancels all contemporaneous or prior agreements, whether written or oral, with respect to the subject matter of this Agreement.

**27. RESERVATION OF RIGHTS**

Notwithstanding anything to the contrary in this Agreement, neither Party waives, and each Party hereby expressly reserves, its rights to (a) challenge the lawfulness of this Agreement and any provision of this Agreement; (b) seek changes in this Agreement (including, but not limited to, changes in rates, charges and the porting services that must be offered) through changes in Applicable Law; and (c) challenge the lawfulness and propriety of, and to seek to change, any Applicable Law, including, but not limited to any rule, regulation, order or decision of the FCC, other regulatory body or a court of applicable jurisdiction. Nothing in this Agreement shall be deemed to limit or prejudice any position a Party has taken or may take before the FCC, any other state or federal regulatory or legislative bodies, courts of applicable jurisdiction, or industry fora. The provisions of this Section 27 shall survive the expiration, cancellation or termination of this Agreement.

**28. SURVIVAL**

The rights, liabilities and obligations of a Party for acts or omissions occurring prior to the expiration, cancellation or termination of this Agreement, the rights, liabilities and obligations of a Party under any provision of this Agreement regarding confidential information, indemnification or defense, or limitation or exclusion of liability, and the rights, liabilities and obligations of a Party under any provision of this Agreement which by its terms or nature is intended to continue beyond or to be performed after the expiration, cancellation or termination of this Agreement, shall survive the expiration, cancellation or termination of this Agreement.

**29. TERRITORY**

Verizon Wireless shall include a list of states in which its affiliates or other related entities operate and in which Verizon Wireless seeks to port Assigned Telephone Numbers with Carrier. With respect to Carrier this Agreement shall apply only to the territories in the states listed in Appendix E that are served by the Carrier affiliates listed in Appendix F. The foregoing shall not be construed to require that the porting between the Parties which is contemplated by this Agreement be memorialized by, or otherwise reduced to, an agreement under 47 U.S.C. §251 or otherwise construed to confer jurisdiction on states, including their regulatory agencies, over such porting unless otherwise conferred by Applicable Law.

**30. THIRD PARTY BENEFICIARIES**

Except as expressly set forth in this Agreement, this Agreement is for the sole benefit of the Parties and their permitted assigns, and nothing herein shall create or be construed to provide any third persons (including, but not limited to, Customers or contractors of a Party) with any rights (including, but not limited to, any third-party beneficiary rights) hereunder. Except as expressly set forth in this Agreement, a Party shall have no liability under this Agreement to the Customers of the other Party or to any other third person.

## 31. WARRANTIES

EXCEPT AS EXPRESSLY STATED IN THIS AGREEMENT, NEITHER PARTY MAKES OR RECEIVES ANY WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE SERVICES PROVIDED, OR TO BE PROVIDED, UNDER THIS AGREEMENT AND THE PARTIES DISCLAIM ANY OTHER WARRANTIES, INCLUDING BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY, WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE WARRANTIES AGAINST INFRINGEMENT, AND WARRANTIES ARISING BY TRADE CUSTOM, TRADE USAGE, COURSE OF DEALING OR PERFORMANCE, OR OTHERWISE.

## 32. INTELLECTUAL PROPERTY

- 32.1 Except as expressly stated in this Agreement, this Agreement shall not be construed as granting a license with respect to any patent, copyright, trade name, trademark, service mark, trade secret or any other intellectual property, now or hereafter owned, controlled or licensable by either Party. Except as expressly stated in this Agreement, neither Party may use any patent, copyrightable materials, trademark, trade name, trade secret or other intellectual property right, of the other Party except in accordance with the terms of a separate license agreement between the Parties granting such rights.
- 32.2 Except as stated in Section 32.4, neither Party shall have any obligation to defend, indemnify or hold harmless, or acquire any license or right for the benefit of, or owe any other obligation or have any liability to, the other Party or its Affiliates (for purposes of this Section 32.4, Affiliates shall include Verizon Wireless Entities) or Customers based on or arising from any Third Party Claim alleging or asserting that the provision or use of any service, facility, arrangement, or software by either Party under this Agreement, or the performance of any service or method, either alone or in combination with the other Party, constitutes direct, vicarious or contributory infringement or inducement to infringe, or misuse or misappropriation of any patent, copyright, trademark, trade secret, or any other proprietary or intellectual property right of any Party or third person. Each Party, however, shall offer to the other reasonable cooperation and assistance in the defense of any such claim.
- 32.3 NOTWITHSTANDING ANY OTHER PROVISION OF THIS AGREEMENT, THE PARTIES AGREE THAT NEITHER PARTY HAS MADE, AND THAT THERE DOES NOT EXIST, ANY WARRANTY, EXPRESS OR IMPLIED, THAT THE USE BY EACH PARTY OF THE OTHER'S SERVICES PROVIDED UNDER THIS AGREEMENT SHALL NOT GIVE RISE TO A CLAIM OF INFRINGEMENT, MISUSE, OR MISAPPROPRIATION OF ANY INTELLECTUAL PROPERTY RIGHT.
- 32.4 The Parties agree that the services provided hereunder shall be subject to the terms, conditions and restrictions contained in any applicable agreements (including, but not limited to software or other intellectual property license agreements) between the Parties and their respective vendors. The Parties agree to advise each other, directly or through a third party, of any such terms, conditions or restrictions that may limit a Party's use of a service provided by the other Party that is otherwise permitted by this Agreement. Upon written request of a Party, to the extent required by Applicable Law, the Party receiving such request will use its best efforts, as commercially practicable, to obtain intellectual property rights from its vendor to allow the requesting Party to use the service in the same manner as the Party receiving such request that are coextensive with its intellectual property rights, on terms and conditions that are equal in quality to

the terms and conditions under which it has obtained its intellectual property rights. The Party making such request shall reimburse the other Party for the cost of obtaining such rights.

### 33. CONFIDENTIALITY

33.1 As used in this Section 33, "Confidential Information" means the following information that is disclosed by one Party ("Disclosing Party") to the other Party ("Receiving Party") in connection with, or anticipation of, this Agreement:

33.1.1 books, records, documents and other information disclosed pursuant to this Agreement;

33.1.2 any forecasting information provided pursuant to this Agreement;

33.1.3 Customer Information (except to the extent that (a) the Customer information is published in a directory, (b) the Customer information is disclosed through or in the course of furnishing a Telecommunications Service, such as a Directory Assistance Service, Operator Service, Caller ID or similar service, or LIDB service where such disclosure is otherwise authorized by applicable agreements or law, or (c) the Customer to whom the Customer Information is related has authorized the Receiving Party to use and/or disclose the Customer Information);

33.1.4 information related to specific facilities or equipment (including, but not limited to, cable and pair information);

33.1.5 any information that is in written, graphic, electromagnetic, or other tangible form, and marked at the time of disclosure as "Confidential" or "Proprietary"; and

33.1.6 any information that is communicated orally or visually and declared to the Receiving Party at the time of disclosure, and by written notice with a statement of the information given to the Receiving Party within ten (10) days after disclosure, to be "Confidential" or "Proprietary."

Notwithstanding any other provision of this Agreement, a Party shall have the right to refuse to accept receipt of information that the other Party has identified as Confidential Information pursuant to Sections 33.1.5 and 33.1.6.

33.2 Except as otherwise provided in this Agreement, the Receiving Party shall:

33.2.1 use the Confidential Information received from the Disclosing Party only in performance of this Agreement; and

33.2.2 using the same degree of care that it uses with similar confidential information of its own (but in no case a degree of care that is less than commercially reasonable), hold Confidential Information received from the Disclosing Party in confidence and restrict disclosure of the Confidential Information solely to those of the Receiving Party's Affiliates (for purposes of this Section 33, Affiliates shall include Verizon Wireless Entities) and the directors, officers, employees, agents and contractors of the Receiving Party and the Receiving Party's Affiliates, that have a need to receive such Confidential Information in order to perform the Receiving Party's obligations under this Agreement. The Receiving

Party's Affiliates and the directors, officers, employees, agents and contractors of the Receiving Party and the Receiving Party's Affiliates, shall be required by the Receiving Party to comply with the provisions of this Section 33 in the same manner as the Receiving Party. The Receiving Party shall be liable for any failure of the Receiving Party's Affiliates or the directors, officers, employees, agents or contractors of the Receiving Party or the Receiving Party's Affiliates, to comply with the provisions of this Section 33.

- 33.3 The Receiving Party shall return or destroy all Confidential Information received from the Disclosing Party, including any copies made by the Receiving Party, within thirty (30) days after a written request by the Disclosing Party is delivered to the Receiving Party, except for (a) Confidential Information that the Receiving Party reasonably requires to perform its obligations under this Agreement, and (b) one copy for archival purposes only.
- 33.4 Unless otherwise agreed, the obligations of Sections 33.2 do not apply to information that:
- 33.4.1 was, at the time of receipt, already in the possession of or known to the Receiving Party free of any obligation of confidentiality and restriction on use;
  - 33.4.2 is or becomes publicly available or known through no wrongful act of the Receiving Party, the Receiving Party's Affiliates, or the directors, officers, employees, agents or contractors of the Receiving Party or the Receiving Party's Affiliates;
  - 33.4.3 is rightfully received from a third person having no direct or indirect obligation of confidentiality or restriction on use to the Disclosing Party with respect to such information;
  - 33.4.4 is independently developed by the Receiving Party;
  - 33.4.5 is approved for disclosure or use by written authorization of the Disclosing Party (including, but not limited to, in this Agreement); or
  - 33.4.6 is required to be disclosed by the Receiving Party pursuant to Applicable Law, provided that the Receiving Party shall have made commercially reasonable efforts to give adequate notice of the requirement to the Disclosing Party in order to enable the Disclosing Party to seek protective arrangements.
- 33.5 Notwithstanding the provisions of Sections 33.1 through 33.4, the Receiving Party may use and disclose Confidential Information received from the Disclosing Party to the extent necessary to enforce the Receiving Party's rights under this Agreement or Applicable Law. In making any such disclosure, the Receiving Party shall make reasonable efforts to preserve the confidentiality and restrict the use of the Confidential Information while it is in the possession of any person to whom it is disclosed, including, but not limited to, by requesting any governmental entity to whom the Confidential Information is disclosed to treat it as confidential and restrict its use to purposes related to the proceeding pending before it.

- 33.6 The Disclosing Party shall retain all of the Disclosing Party's right, title and interest in any Confidential Information disclosed by the Disclosing Party to the Receiving Party. Except as otherwise expressly provided in this Agreement, no license is granted by this Agreement with respect to any Confidential Information (including, but not limited to, under any patent, trademark or copyright), nor is any such license to be implied solely by virtue of the disclosure of Confidential Information.
- 33.7 The provisions of this Section 33 shall be in addition to and not in derogation of any provisions of Applicable Law, including, but not limited to, 47 U.S.C. § 222, and are not intended to constitute a waiver by a Party of any right with regard to the use, or protection of the confidentiality of, CPNI provided by Applicable Law.
- 33.8 Each Party's obligations under this Section 33 shall survive expiration, cancellation or termination of this Agreement.

**34. SIGNATURES**

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement through their authorized representatives on the date or dates below to be effective when executed by both Parties.

## LOCAL NUMBER PORTABILITY OPERATIONS AGREEMENT

This Local Number Portability Operations Agreement ("Agreement") is entered into by and between Western Wireless Corporation ("Western") and \_\_\_\_\_ ("\_\_\_\_\_"). Western and \_\_\_\_\_ are each individually a "Party" and are together the "Parties" to this Agreement.

WHEREAS, the above named Parties wish to enter into an Agreement with each other in compliance with applicable laws and regulations.

WHEREAS, the Parties wish to enter into an Agreement to facilitate the ability of Customers to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement through Local Number Portability.

WHEREAS, the Parties wish to enter into an Agreement to establish practices and procedures to ensure that Customer requests to port numbers are achieved efficiently and with minimal delays.

THEREFORE, the Parties wish to enter into this Agreement on the following terms and conditions:

### 1. DEFINITIONS

Any term not specifically defined here shall be given the meaning provided for in FCC Orders governing LNP.

- 1.1. Act: Means the Communications Act of 1934 (47 U.S.C. 151 et. seq.), as amended and interpreted in the rules and regulations of the FCC.
- 1.2. Affiliate: Means any entity, directly or indirectly, through one or more intermediaries, controlling, controlled by or under common control with a Party hereto.
- 1.3. Agreement: Means this Local Number Portability Operations Agreement, including all appendices attached hereto, future amendments, modifications and supplements made in accordance herewith.
- 1.4. CORBA is an acronym for: Common Object Request Broker Architecture.
- 1.5. Competitive Local Exchange Carrier ("CLEC") is defined in the Act.
- 1.6. Commercial Mobile Radio Service ("CMRS") is as defined in the Act.
- 1.7. Customer: An active end user and subscriber of the OSP who desires to receive service from the NSP using the same telephone number that is associated with the service(s) the subscriber receives from the OSP.
- 1.8. Customer Service Records ("CSR") are the records that contain the identity, service address, rate plan or plans, and other information on the Customer.

- 1.9. Electronic Data Interface ("EDI") is a data interface for exchange of information between providers.
- 1.10. Federal Communications Commission ("FCC"): Means the regulatory, governing body directing the activities associated with this Agreement.
- 1.11. Inter-carrier Communications Process ("ICP"): The communication process between the OSP and the NSP, which validates the customer information and initiates and completes the port request. The ICP includes the exchange of the LSR/LR.
- 1.12. Local Exchange Routing Guide ("LERG") is a Traffic and Routing Administration maintained industry table identifying switches with their assigned telephone numbers.
- 1.13. Local Number Portability ("LNP"): The ability of a Customer to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement pursuant to FCC Rules.
- 1.14. Local Response ("LR"): A form for responding to an LSR. A sample LR and descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG") of the Ordering and Billing Forum..
- 1.15. Local Service Request ("LSR"): Forms containing information about a Customer who desires to port a telephone number to the NSP. A sample LSR and descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG") of the Ordering and Billing Forum.
- 1.16. Location Routing Number ("LRN"): Ten-digit number assigned to a switch or point of interconnection used for routing calls.
- 1.17. Metropolitan Statistical Areas ("MSA"): An MSA denotes a large urban population market as designated by the U.S. government.
- 1.18. New Service Provider ("NSP"): The new provider that will provide service to Customer and to whom Customer ports its telephone number.
- 1.19. Number Portability Administration Center ("NPAC"): A neutral third party center that processes porting information from and disseminates that information to telecommunications carriers. The NPAC processes the NSP subscriber port request and downloads the LRN associated with the subscriber ported telephone number to local number portability databases.
- 1.20. Old Service Provider ("OSP"): The provider providing service to the customer at the time the customer requests porting of the MDN.
- 1.21. Rate Center: Geographic areas that utilize a common geographical point of reference for distance measurements, called a rating-point, which is defined by Vertical and Horizontal Coordinates.

1.22. Working Telephone Number: A telephone number that is assigned to a Customer that can originate and terminate telephone calls through the Public Switched Telephone Network.

## 2. PURPOSE OF AGREEMENT

The parties desire to enter into this Agreement consistent with all applicable FCC rules and regulations.

## 3. TERM

This Agreement shall become effective May 24, 2004 and, except as otherwise provided in this Agreement, shall continue in full force and effect until either Party terminates the Agreement by providing notice of termination in writing to the other Party at least sixty (60) in advance of such termination pursuant to the Notice provisions set forth in Section 19 of this Agreement. Upon termination, the Parties shall continue to provide LNP if required by applicable laws and regulations.

## 4. NUMBER PORTING

### 4.1. Scope

The Parties shall provide LNP and port Working Telephone Numbers on a reciprocal basis pursuant to this Agreement. The Parties will open all switches and associated NPA-NXXs to support number portability in the serving areas identified in Appendix A.

NXX codes shall be portable in accordance with FCC Rules and Regulations except those permitted to be designated non-portable by the same FCC Rules and Regulations.

### 4.2. Procedures for Providing LNP

- 4.2.1. The Parties shall ensure that all switches, whether currently owned or hereafter acquired, are upgraded to facilitate LNP to the extent required by FCC Rules and Regulations. The Parties shall, as required by FCC orders, disclose upon request any technical limitations that would prevent LNP in any connecting office.
- 4.2.2. The Parties will follow the LNP provisioning process flow and porting intervals recommended by the North American Numbering Council (NANC) for Inter-Service Provider LNP between wireline and wireless carriers. This includes the recommendations of the Local Number Portability Administration Work Group to adopt the Inter-Service Provider LNP Operations Flows and the same porting intervals until the FCC provides further confirmation or modification of these processes.
- 4.2.3. The Parties will follow the LNP ordering procedures established at the OBF for porting of Assigned Telephone numbers.
- 4.2.4. When a telephone number is ported out of the OSP's network, the OSP will, if applicable, remove all line based features and calling card(s) associated with the ported number(s) from its Line Information Database (LIDB). Reactivation of the line-based calling card in another LIDB, if applicable, is the responsibility of the NSP or the Customer.

- 4.2.5. When a telephone number is ported out of the OSP's network, the OSP will follow the 911 Guidelines recommended by the National Emergency Number Association ("NENA") with regard to emergency services databases.
- 4.2.6. When an OSP ports Customer telephone number(s) to the NSP, the OSP shall implement the ten-digit trigger feature where it is available. When the OSP receives the port request, the unconditional trigger shall be applied to the Customer's telephone number prior to the due date and time identified in the port request. When the unconditional trigger is not available, the Parties shall use standard NPAC concurrence procedures.
- 4.2.7. LNP Software is required to be in place and tested prior to any order submission.
- 4.2.8. Reserved numbers may be ported if there is at least one Working Telephone Number in the group.

## 5. LIMITATIONS OF SERVICE

A telephone number can only be ported to a NSP if the Rate Center associated with the NPA-NXX is within the NSP's license area or authorized service area. A telephone number can be ported from a wireline to CMRS Party if the Rate Center associated with the NPA-NXX is within the CMRS provider's license area. A telephone number can be ported from a CMRS to a wireline Party if the Rate Center associated with the NPA-NXX is within the wireline service provider's authorized service area. The Parties recognize that certain NXXs may be non-portable, including those NXXs assigned for internal testing and official use, and any NXXs required to be designated as non-portable by the rules and regulations of the FCC.

## 6. SERVICE DESCRIPTION

Ordering: Both Parties agree to follow the provisions set forth in Appendix D for the exchange of information required to port a customer and the processing of LNP orders.

- 6.1 Pre-order: The Parties agree that a NSP must obtain the affirmative consent of a Customer to authorize the porting of any Working Telephone Number(s) and the disclosure of such Customer's information between the Parties as necessary to facilitate LNP processing.
- 6.2 After receiving a request from a Customer to port telephone number(s), the New Service Provider may request the CSR of the Customer from the Old Service Provider.
- 6.3 Order: The Parties agree that a NSP must submit an order for LNP to the OSP using a 'Local Service Request' (LSR).
- 6.4 All numbers on a LSR that are requested to be ported must reside within the same LRN within an NPAC region. If a customer is requesting to port numbers from multiple LRNs within an NPAC region, a separate LSR must be submitted for all numbers in each LRN within an NPAC region.
- 6.5 Type 1 Number Porting: The Parties agree to migrate all telephone numbers assigned to Type 1 trunks to the Western Wireless mobile switching center utilizing the LNP process. The entire

block(s) of numbers associated with each Type 1 trunk will be incorporated as part of a single LSR. The Parties will work together to accomplish the Type 1 number porting within 15 days of the issuance date of the LSR.

#### Port Processing:

- 6.6 After the NSP sends a LSR to the OSP, the OSP shall determine whether Customer's information in the LSR is correct and whether the port can be completed by the requested date and time. The minimum due date and time (DD/T) intervals for all submitted LSRs is identified in Appendix D. The OSP shall, respond within the Port Request Processing intervals identified in Appendix D and shall send a response to the NSP notifying the NSP whether it can or cannot complete the port by the time requested by the NSP. If the information in the LSR is inaccurate or the port cannot be completed in the requested time, the OSP's response message shall notify the NSP that it denies the request and provide the appropriate reason codes from those listed in the Wireless Intercarrier Communications Interface Specification for Number Portability ("WICIS"), Version 2.0. All reason codes and reason code details should be associated with the respective telephone numbers in error, as applicable. The OSP should conduct a full review of each request, identifying all telephone numbers with suspected errors prior to returning an invalid response. Both parties agree to work expeditiously to resolve incorrect or conflicting information. The NSP can then make the necessary changes and send the LSR back to the OSP for verification. This process shall continue until the OSP accepts the port request and sends a confirmation to the NSP or until the OSP determines that it is incapable of completing the port request and populates the remarks field in the port request indicating this determination to the NSP. If the OSP determines that it is incapable of completing the port or if the OSP fails to respond to the WPR sent by the NSP, the NSP may contact the OSP's Porting Administration Group or Trouble Reporting Contact to ascertain the problem and determine if a remedy is possible and/or whether the NPAC process can begin.
- 6.7 The NSP shall not generate a Subscription Version Create (SV-Create) until it receives a Confirmation from the OSP indicating that the porting process may continue.
- 6.8 NPAC Process: After the OSP has confirmed that it can complete a requested port, the OSP and the NSP shall send an SV-Create regarding the port to the regional NPAC covering the Rate Center associated with the ported number's NPA-NXX. Under no circumstances is the SV-Create to be sent to the NPAC prior to receipt of a valid confirmation response unless otherwise agreed to by the Parties to this Agreement. The SV-Create must be sent for all telephone numbers on the WPR and the date and time must match the Due Date and Time on the LSR sent by the OSP. The Parties shall also update translations in their Central Office(s) from which a telephone number has been ported prior to the date on which the LERG changes become effective so that calls to the ported telephone number may be redirected to the switch of the NSP via route indexing. Mutual NPAC concurrence is required prior to completion of the service request.

After the OSP has confirmed that it can complete a requested port, the Parties shall make all reasonable efforts to complete a request within the time specified in Appendix D, or by the NSP's requested date, whichever is later. Request due date and time should be set to allow for at least the minimum processing time allowed under the guidelines. If the OSP fails to complete a

port by the time specified herein, the NSP may place the telephone number in Conflict with NPAC. If the port has not been completed during the Conflict timer parameter, the NSP can take the port out of Conflict and Activate the telephone number(s).

Deactivation:

- 6.9 Deactivation: With respect to all services and features related to the Customer ported telephone number, the OSP shall deactivate them within its Network and Billing Systems by or on the requested due date specified in the associated port request.

Return of Numbers:

- 6.10 All Working Telephone Numbers that have been ported will be released when the NSP ceases providing service to those ported numbers. Release of telephone numbers will be based on the procedures set forth in the FRS and IIS of the Number Portability Administration Center. Each telephone number will be released only after the number has been aged by the NSP for 90 days from the day that service to the telephone number was terminated. An aging interval includes any announcement treatment period, as well as blank telephone number intercept period. For disconnected numbers, the NSP will comply with the NPAC disconnect and snapback process as described in applicable publications of the North American Numbering Council.

## 7. TROUBLE, MAINTENANCE, AND REPAIR

- 7.1 Operation Support Systems: Both Parties agree to work expeditiously to resolve any issues associated with porting a customer between the two Parties. Before either Party reports a trouble condition, that Party must first use reasonable efforts to isolate the trouble to the other Party's actions or facilities. In order to facilitate trouble reporting and resolution, the Parties shall provide the trouble reporting contact information, per Appendix C. It is the responsibility of each Party to maintain the accuracy of their contact information and to notify the other Party of changes or modifications.
- 7.2 Trouble: Both Parties shall use commercially reasonable efforts to resolve and/or isolate trouble within 24 hours for single customer affecting issues. Both Parties shall use commercially reasonable efforts to resolve and/or isolate trouble within 6 hours for multiple customer affecting issues.
- 7.3 Network Maintenance: Each Party shall monitor and perform effective maintenance through testing and the performance of proactive maintenance activities such as routine testing, development of and adherence to appropriate network trouble isolation processes and periodic review of operational elements for translations, routing and network faults.
- 7.4 Modifications: Each Party will proactively test their new switch features and service offerings to ensure there are no problems.

**9. PRICING/COSTS**

The Parties to this Agreement are responsible for their own costs associated with this Agreement or the porting process, unless otherwise specified in this Agreement.

**10. TESTING**

- 10.1 Each Party shall designate a single point of contact (SPOC) to schedule and perform required tests. These tests shall be performed during a mutually agreed time frame and must conform to industry portability testing and implementation criteria in force in the NPAC region.
- 10.2 Both Parties shall be certified by the regional NPAC prior to scheduling inter-company testing of LNP.
- 10.3 Both Parties shall exchange information identified in Appendix B prior to the commencement of testing.

**11. FRAUD**

The Parties agree to cooperate in good faith with each other to investigate, minimize, and take corrective action in cases of fraud related to number portability.

**12. USE OF TRADEMARKS**

The Parties agree that they will not use the name, service marks or trademarks of the other Party or any of its affiliated companies in any manner whatsoever, without such Party's specific written consent. Neither Party is licensed hereunder to conduct business under any logo, trademark, service or trade name (or any derivative thereof) of the other Party. Neither Party shall issue any press release or other publicity concerning this Agreement without the prior consent of the other Party.

**13. COMPLIANCE WITH LAWS**

The Parties shall comply with all federal, state and local laws applicable to their performance hereunder.

**14. FORCE MAJEURE**

Neither Party shall be responsible for any delay or failure in performance of any part of this Agreement to the extent that such delay is caused by reason of acts of God, wars, revolution, civil commotion, acts of public enemy, embargo, acts of government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing or boycotts, or any other circumstances beyond the reasonable control and not involving any fault or negligence of the Delayed Party ("Condition"). If any such Condition occurs, the Party delayed or unable to perform ("Delayed Party"), upon giving prompt notice to the other Party, shall be excused from such performance on a day-to-day basis during the continuance of such Condition (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis during the same period); provided, however, that the Party so affected

shall use its best reasonable efforts to avoid or remove such Condition and both Parties shall proceed immediately with the performance of their obligations under this Agreement whenever such causes are removed or cease.

**15. ASSIGNMENT**

This Agreement may not be assigned or transferred without the prior written consent of the other Party, which consent may not be unreasonably withheld. Notwithstanding the prior sentence, no prior written consent shall be required for a Party to assign or transfer this Agreement to any subsidiary, Affiliate, parent or successor in interest, or to any entity which acquires all or substantially all of its assets and agrees to be bound by the terms and conditions of this Agreement, provided however, that the assigning Party shall notify the other Party of such assignment or transfer as soon as reasonably practical.

**16. BINDING EFFECT**

This Agreement shall inure to the benefit of, and shall be binding upon the Parties hereto and their respective successors and permitted assigns .

**17. INDEMNIFICATION**

17.1 Each Party shall indemnify and hold harmless the other from any liabilities, claims, or demands, including costs, expenses and reasonable attorney's fees ("Claims") made by third parties resulting from the negligence and/or willful misconduct of a Party, its employees and agents in the performance of this Agreement.

17.2 A Party seeking to be indemnified hereunder will provide the other Party with prompt, written notice of any Claim covered by this indemnification and will cooperate appropriately with the indemnifying Party in the defense thereof. The indemnifying Party shall not settle or compromise any such Claim or consent to the entry of any judgment without the prior written consent of each indemnified Party, such consent not to be unreasonably withheld or delayed.

**18. RELATIONSHIP OF THE PARTIES**

Neither Party undertakes by this Agreement or otherwise to perform or discharge any liability or obligation of the other Party, whether regulatory or contractual, or to assume any responsibility whatsoever for the conduct of the business or operations of the other Party. Nothing contained in this Agreement is intended to give rise to an employment relationship, partnership or joint venture between the Parties or to impose upon the Parties any of the duties or responsibilities of employers, partners or joint venturers.

**19. NOTICES**

Unless otherwise specified in this Agreement, all notices required under this Agreement shall be given in writing. All notices shall be given by personal delivery, overnight courier, confirmed facsimile or

certified mail, return receipt requested to the person(s) specified below or to such other addresses as a Party may designate by written notice to the other Party. If sent by overnight courier or by the United States Postal Service mail, such notices shall be deemed received on the earlier of actual receipt or five (5) business days following deposit.

Notices shall be sent to:

## 20. WAIVER

The waiver or failure of either Party to exercise in any respect any right provided for in this Agreement shall not be deemed a waiver of any further right under this Agreement.

## 21. SEVERABILITY

This Agreement shall be subject to all applicable federal, state and local laws, court orders, agency orders, rules and regulations of all governmental agencies and authorities. In the event this Agreement, any of the provisions of this Agreement, or any of the activities under this Agreement, are determined to be inconsistent with or contrary to any applicable federal, state or local laws, court orders, agency orders, rules, or regulations, the latter shall control and any inconsistent term or condition of this Agreement shall terminate without any additional liability attaching to either Party. If the Agreement lawfully can be continued, it is commercially practicable to do so, and the intent of the Parties can be effectuated without the stricken provision, then the Agreement shall continue as amended and the Parties agree to negotiate any such necessary amendments. If the Agreement lawfully can be continued, it is commercially practicable to do so, and the intent of the Parties can be effectuated, but only by further modification of the Agreement, the Parties may so modify the Agreement by executing an appropriate amendment to this Agreement; if the Parties choose not to so modify this Agreement, then this Agreement shall terminate without any additional liability attaching to either Party and further performance shall be excused.

## 22. Limitation of Liability

Neither Party shall be liable to the other in connection with the provision or use of services offered under this Agreement for indirect, incidental, consequential, special damages, including (without

limitation) damages for lost profits, regardless of the form of action, whether in contract, indemnity, warranty, strict liability, or tort.

## 23. ESCALATION PROCEDURES

The Parties shall agree to a single point of contact in each company who shall be notified in the event a Party encounters a post-portal issue(s) or a case of suspected breach of this agreement. This action should precede actions by a Party under Section 24 Dispute Resolution. Once a Party institutes Escalation Procedures under this Section, all Parties shall refrain for three (3) days from taking any action under Section 24. The points of contact for each Party are as follows:

For Carrier A:

(Insert Name & Address)

For Carrier B:

(Insert Name & Address)

## 24. DISPUTE RESOLUTION

### 24.1 General Provisions

- a. Without limitation of the Parties' right to bring a dispute otherwise within the jurisdiction of a regulatory agency before such agency or unless otherwise required by law, the Parties desire to resolve disputes arising out of this Agreement without litigation. Accordingly, in the event of a dispute, claim or controversy arising under this Agreement ("Dispute"), the affected Party shall resolve the Dispute as provided herein.
- b. At the written request of a Party to invoke the procedures hereunder, each Party shall appoint within five (5) days of the request a knowledgeable, responsible representative to meet and negotiate in good faith to resolve a Dispute. Parties may be represented by counsel to assist in and/or conduct such negotiations. The discussions shall be left to the discretion of the representatives. Upon agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence among the representatives for purposes of these negotiations shall be treated as confidential information developed for purposes of settlement, exempt from discovery and production, which shall not be admissible in the arbitration described below or in any lawsuit without the concurrence of all Parties. Documents identified in or provided with such communications, which are not prepared for purposes of the negotiations, are not so exempted and may, if otherwise admissible, be admitted in evidence in the arbitration or lawsuit.
- c. If the foregoing negotiations do not resolve the Dispute within sixty (60) days of the initial written request, either Party may serve upon the other Party by certified mail a written demand that the Dispute be arbitrated, specifying in reasonable detail the nature of the Dispute to be submitted to arbitration in accordance with Section 23.2, below. The demand, effective upon receipt, shall be made within a reasonable time after the Dispute, has arisen. In no event shall

the demand for arbitration be made more than one year after the underlying cause of action arises.

- d. The arbitration hearing shall commence within forty-five days after the demand for arbitration. The arbitrator shall rule on the dispute by issuing a written opinion within thirty (30) days after the close of hearings.
- e. Notwithstanding the Dispute Resolution provisions set forth in Section 23, the provisions in this Agreement addressing Severability as set forth in Section 21 and the provisions allowing for termination as set forth in Section 1.2 take precedence. If the Agreement is terminated any initial negotiations or arbitration in progress shall cease and become moot.

#### 24.2 ARBITRATION.

- a. Agreement to Arbitrate Disputes. Except as set forth in Section 23.1 above, the Parties agree that in the event of any Dispute, such Dispute shall be resolved exclusively by arbitration in accordance with the Commercial Arbitration Rules of the American Arbitration Association, and judgment upon the award rendered by the Arbitrator may be entered in any court having jurisdiction thereof. The Federal Arbitration Act, 9 U.S.C. Secs. 1-15, not state law, shall govern the arbitrability of all Disputes.
- b. Selection of Arbitrator. The Parties further agree that they will ask the American Arbitration Association administrator in the area in which LNP is being provided, to provide to each Party to the Dispute a list of five (5) proposed arbitrators qualified to decide the controversy and who are experienced in telecommunications law. Within seven (7) days of receipt of this list, each Party to the Dispute will cross off names of proposed arbitrators the Party does not wish to use, leaving at least two candidates on the list, will number the remaining names in the order of preference, and will return the annotated list to the administrator. The administrator will select an arbitrator from the modified lists of preferences. The Parties will accept the administrator's selection of the Arbitrator.
- c. Discovery. Discovery shall not be permitted in such arbitration except as allowed by the rules of AAA or such other arbitration agency selected by the Parties pursuant to Section 23.2(a), or as otherwise agreed to by the Parties.
- d. Arbitration Award or Decision. The Parties agree that the arbitrator shall have no power or authority to make awards or issue orders of any kind except as permitted by this Agreement and substantive law, and in no event shall the arbitrator have the authority to make any award that provides for punitive or exemplary damages. The arbitrator's decision shall follow the plain meaning of this Agreement and the relevant documents. The arbitrator's award shall be final and binding and may be enforced in any court of competent jurisdiction. Each Party shall bear its own costs and attorneys' fees, and shall share equally in the fees and expenses of the arbitrator.

#### 25. ARTICLE HEADINGS

The headings of the Articles are inserted for convenience of reference only and are not intended to be part of or to affect the meaning or interpretation of this Agreement.

26. CHOICE OF LAW AND JURISDICTION

The construction, interpretation and performance of this Agreement shall be governed by and construed in accordance with the laws of the state in which LNP is being provided, without regard to any conflicts of law principles that would require the application of the laws of any other jurisdiction.

27. AMENDMENTS

Amendments, modifications and supplements to this Agreement are allowed provided: (a) all such amendments, modifications and supplements shall be in writing signed by authorized representatives of both Parties, and (b) all such amendments, modifications and supplements shall by reference incorporate this Agreement in its entirety and identify the specific sections or paragraphs contained herein which are amended, modified or supplemented, and (c) all such amendments, modifications and supplements shall not be construed to adversely affect vested rights or causes of action which have accrued prior to the Effective Date of such amendment, modification or supplement.

28. ENTIRE AGREEMENT

This Agreement together with its exhibits constitutes the entire agreement between the Parties and cancels all contemporaneous or prior agreements, whether written or oral, with respect to the subject matter of this Agreement. No modifications shall be made to this Agreement unless in writing and signed by authorized representatives of the Parties.

29. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement through their authorized representatives.

## Information Required for Logging Trouble Tickets

### Sprint PCS:

- Customer name and organization.
- Full description of the issue and expected results.
- Steps to reproduce the issue and relevant data.
- All applicable issue, log, and system files.
- Any special circumstances surrounding the discovery of the issue (e.g., first occurrence or occurred after what specific event).
- Customer's business impact of problem and suggested priority for resolution.

### Trading Partner:

- Customer name and organization.
- Full description of the issue and expected results.
- Steps to reproduce the issue and relevant data.
- All applicable issue, log, and system files.
- Any special circumstances surrounding the discovery of the issue (e.g., first occurrence or occurred after what specific event).
- Customer's business impact of problem and suggested priority for resolution.

## Porting Validation Standards

Information Required for Port Validation:

### Sprint PCS:

Last Name or Business Name  
Zip Code  
SSN or Tax ID or Acct. No.  
MDN  
If corporate liable - a password or pin number.

### Trading Partner:

## Porting Business Rules Exhibit E

### Sprint PCS:

- Complex Ports – Sprint PCS will accept only single line ports. Multiline ports must be submitted as multiple single line ports.
- Resellers – Sprint PCS will accept port requests on behalf of our resellers, however all validation is based on the resellers' processes.

### Trading Partner:

- TBD

The carriers agree that information contained in this Part A is operational in nature and subject to change.

The carriers agree to make every effort to give the other carrier thirty (30) days' notice of any changes to its information pursuant to the General Contact Information set forth in Part A.

**The carriers' contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.**

**Part B – General Contact Information and  
Trouble Reporting Contact Information**

**For Verizon Wireless:**

**General Contact Information**

**Wireless-Wireline Porting:**

**Verizon Wireless Porting Center**

Hours of Operation: 24 x 7 x 365 (open all holiday's, no exceptions)  
Address: 300 River Rock Blvd.  
Murfreesboro, TN 37128  
Phone: 1-800-488-2002

**Porting Center Carrier Relations**

Contact: Associate Director of Inter-Carrier Relations  
Phone: 1-800-711-9300  
Fax: 1-615-372-2411  
Hours: 8:00am to 5:00pm (Central Time)  
E-mail: [PortCenterICR@GL.VerizonWireless.com](mailto:PortCenterICR@GL.VerizonWireless.com)

**Pre-Launch (Pre-11/24/03) Inter-Carrier Test Scheduling**

Contact: Wireline Inter-Carrier Test Coordinator  
Phone: 1-248-915-3430  
Fax: 1-248-915-3799  
E-mail: [Marie.Moore@VerizonWireless.com](mailto:Marie.Moore@VerizonWireless.com)

**Post-Launch (Post-11/24/03) Inter-Carrier Test Scheduling**

Contact: Inter-Carrier Relations  
Phone: 1-800-711-9300  
Fax: 1-615-372-2411  
E-mail: [PortCenterICR@GL.VerizonWireless.com](mailto:PortCenterICR@GL.VerizonWireless.com)

**Trouble Reporting Contact Information**

Process: The Verizon Wireless Porting Center is the initial interface for all trouble resolution activity associated with porting numbers. The Porting Center will refer issues to the appropriate internal Network or provisioning group for resolution within Verizon Wireless.

**Trouble Area:**

Note: Each carrier shall make available a Porting Administration Group or Trouble Reporting contact on a 24x7x365 basis.

The Trouble Reporting Contacts may be amended from time to time by a carrier upon providing thirty (30) days' written notice to the other at the General Contact Information set forth in this Part A.

**The carriers' contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.**

## Part C – Trouble Ticket Detail

### For Verizon Wireless:

#### Information Required For Logging Trouble Tickets\*

The following may be required for trouble reports:

- Carrier Name;
- Reporting Carrier organization;
- SPID and associated OCN(s);
- Point of Contact Name;
- Point of Contact Number;
- Porting Telephone Number/MDN;
- LRN;
- Time and Date of Port;
- Associated Error Codes;
- Description of Problem; and
- Other relevant data.

### For Wireline Carrier B:

#### Information Required For Logging Trouble Tickets\*

The following is proposed information for trouble reports:

- Carrier Name;
- Reporting Carrier organization;
- SPID and associated OCN(s);
- Point of Contact Name;
- Point of Contact Number;
- Porting Telephone Number/MDN;
- LRN;
- Time and Date of Port;
- Associated Error Codes;
- Description of Problem; and
- Other relevant data.

\*Each carrier shall make available a Porting Administration Group or Trouble Reporting contact on a 24x7x365 basis.

**The carriers contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.**

## **Part D – Porting Validation Standards**

### **For Verizon Wireless:**

#### Information Required For Post-Paid Port Validation:

1. Billing Last Name
2. Business Name if no information for Billing Name
3. Five Digit Zip Code
4. SSN/Tax ID Number
5. Account Number if no SSN or Tax ID
6. Porting Telephone Number

#### Information Required for Pre-Paid Port Validation:

1. Porting Telephone Number
2. Password/PIN

### **For Wireline Carrier B:**

#### Information Required For Post-Paid Port Validation:

#### Information Required for Pre-Paid Port Validation.

Note: Other than those mandatory data items set forth in Section 3.3.1 of the WICIS, the above shall be the only information which may be utilized by a carrier to this Trading Partner Profile to validate a port request for post-paid numbers. "Delay" or "denial" of ports between the carriers shall occur only in the event a carrier is unable to complete the validation of those validation elements expressly set forth above. Once validated, the Carriers shall be obligated to complete the porting transaction. Any variations or proposed changes in the agreed data fields noted above shall be communicated to the other carrier at the information provided in Part B.

### Porting Questionnaire with Verizon Wireless

Carrier Name:

Completed by:

Date:

1. Name of point of contact (within your company)
  - a. Phone number
  - b. Fax number
  - c. E mail address
  
2. Name of back up or secondary contact (within your company)
  - a. Phone number
  - b. Fax number
  - c. E mail address
  
3. Hours of operation
4. Observed holidays
5. Mailing address
6. Please provide the SPID(s) associated with you company.
  
7. Is your company associated with or a subsidiary of any other companies? If so, which companies and SPIDS
  
8. How should Verizon Wireless submit a port request or LSR to your company?  
Fax? Email?
  
9. What is your turnaround for port requests (3,4 or 5 days)?

10. If fax, does the company utilize TSP?
  - a. If not, please provide the fax number
  - b. If multiple SPID's are involved, do the requests go to the same fax or different numbers?
  - c. If multiple fax numbers, please provide a list with SPID and corresponding fax number.
  - d. Are different areas (or regions) covered by different SPIDs (i.e. Northeast US covered by SPID 1234, Southeast US covered by SPID 5678, etc)?
  
11. If E Mail, please provide e-mail address(es).
  - a. If multiple SPID's are involved, do the requests go to the same e-mail address of different addresses?
  - b. If multiple addresses, please provide a list with SPID and corresponding e-mail addresses.
  - c. Are different areas (or regions) covered by different SPIDs (i.e. Northeast US covered by SPID 1234, Southeast US covered by SPID 5678, etc)?
  
12. If requests are to be sent by any other method, please provide instructions in detail.
  
13. What LSOG (LSR) version does the company use?
  
14. Does the company have a template of the LSR, EUI and NP forms showing your required fields and format?
  - a. If yes, can the company provide a copy?
  - b. If not, can someone go thru a form, line by line, with us to verify properly prepared forms are submitted?
  
15. Does your company resell numbers to other carriers (type one)?
  - a. If yes:

What companies?

What are their SPIDs?

Any specific NPA-NXX?

Do you have any contact information for these companies?

- b. Does your company or has your company purchased numbers from other carriers?

16. Is the company willing to test with Verizon Wireless?

Any additional comments:

Please return completed form and any attachments to me via fax at 615-372-2382 or via e-mail at [Nilda.Penn@verizonwireless.com](mailto:Nilda.Penn@verizonwireless.com)

) TC04-077, TC04-084-085**

On May 4, 2004, the Commission issued an Order for and Notice of Procedural Schedule and Hearing and of Intent to Take Judicial Notice (Order) in this matter. The procedural history of this docket and statement of jurisdiction is set forth in the Order. The Order provided *inter alia*:

To the extent that the issues and the witnesses and documentary evidence are materially identical in more than one LNP suspension docket, the parties are encouraged to present such common evidence in a consolidated manner that will minimize repetition and opposing parties are encouraged to reasonably stipulate to such consolidated presentation of evidence. The hearing will commence on June 21, with consideration of MidContinent Communications' Motion to Compel, Docket No. TC03-192. Following the hearing on this related docket, the remaining dockets will be heard in docket number order except to the extent that the parties otherwise agree or the Commission shall otherwise order, either prior to or during the hearing. Petition of Santel Communications Cooperative, Inc., Docket No. TC04-038, will be heard on July 1, 2004.

On June 1, 2004 at 1:30 p.m., a pre-hearing scheduling conference was held by teleconference to consider further refinements to the hearing schedule following the filing of pre-filed testimony. The conference was attended by attorneys representing all parties, including commission staff. The purpose of this Order is to expand on and clarify the Order to more specifically schedule the order for consideration of case-specific evidence in the various LNP suspension dockets in order to accommodate, insofar as possible, the schedules of attorneys and witnesses, many of whom will present evidence pertaining to multiple dockets, and to conclude the hearings in time to permit the Commission to render decisions within the time period prescribed by 47 U.S.C. Section 251(f)(2) and ARSD 20:10:32:39 while yet affording a reasonable period for post-hearing briefs.

The parties having conferred through their counsel and having agreed upon a schedule to most efficiently manage the numerous LNP suspension hearings within the limited time available by law for decision, it is therefore

ORDERED, that the hearings in the LNP suspension petition dockets and Docket No. TC03-192 will be conducted in the following order except as the Commission shall otherwise order either prior to or during the hearings (all dates 2004):

June 21, 10:00 a.m.	TC03-192, Midcontinent's Motion to Compel, including any evidence common to this docket and TC04-054
June 21 following TC03-192	TC04-054, ITC
June 22, 10:30 a.m.	TC04-047, Brookings Municipal Utilities

June 23, 8:30 a.m.	TC04-062, Stockholm-Strandburg Telephone Company; TC04-060, Venture Communications Cooperative; TC04-061, West River Cooperative Telephone Company; TC04-077, James Valley Cooperative Telephone Company
June 23, p.m.	Testimony of Steven E. Watkins pertaining to all LNP suspension dockets
June 24, 8:30 a.m.	TC04-050, Valley Telecommunications Cooperative Association, Inc.; TC04-051, Faith Municipal Telephone Company; TC04-045, Golden West Telecommunications Cooperative, Inc.; TC04-044, Sioux Valley Telephone Company; TC04-046, Armour Independent Telephone Company, Bridgewater-Canistota Independent Telephone Company and Union Telephone Company
June 25, 8:30 a.m.	TC04-055, Alliance Communications Cooperative, Inc. and Splitrock Properties, Inc.; TC04-084, Tri-County Telecom, Inc.; TC04-049, McCook Cooperative Telephone Company
June 29, 8:30 a.m.	TC04-025, Kennebec Telephone Company; TC04-052, Midstate Communications, Inc.; TC04-048, Beresford Municipal Telephone Company; TC04-053, Western Telephone Company
June 30, 8:30 a.m.	TC04-085, Cheyenne River Sioux Tribe Telephone Authority; TC04-056, RC Communications, Inc. and Roberts County Telephone Cooperative Association
July 1, 8:30 a.m.	TC04--038, Santel Communications Cooperative, Inc.

Although the Commission will attempt to keep the proceedings within the above schedule, scheduling adjustments may be necessary in the event that proceedings are unable to be completed on the scheduled date or for other good cause. The Commission has scheduled Monday, June 28 as an open hearing date in the event that additional time is needed.

In order to accommodate the testimony common to several dockets and to avoid needless repetition of evidence, the transcript and hearing record for all of the LNP suspension dockets will be recorded as a single transcript and hearing record. A separate transcript and hearing record will be recorded for TC03-192.

It is therefore

ORDERED, that the schedule for the hearing in the LNP suspension dockets and in Docket No. TC03-192 shall be as set forth above; and it is further

ORDERED, that the transcript and hearing record for the LNP suspension dockets and Docket No. TC03-192 shall be recorded as set forth above.

Dated at Pierre, South Dakota, this 16th day of June, 2004.

**CERTIFICATE OF SERVICE**

The undersigned hereby certifies that this document has been served today upon all parties of record in this docket, as listed on the docket service list, by facsimile or by first class mail, in properly addressed envelopes, with charges prepaid thereon.

OF THE COMMUNICATIONS ) PETITIONERS' RESPONSE IN OPPOSITION  
ACT OF 1934 AS AMENDED ) TO INTERVENOR'S MOTION TO COMPEL  
 ) DISCOVERY OR IN THE ALTERNATIVE  
 ) TO STRIKE PETITIONERS' PRE-FILED  
 ) TESTIMONY REGARDING COSTS

COMES now Petitioners by and through their undersigned attorneys, and submit this response to Intervenor's Motion To Compel Discovery Or In The Alternative To Strike Petitioners' Pre-Filed Testimony Regarding Costs ("Motion To Compel"). Petitioners submit that the Motion To Compel should be denied in its entirety. As grounds for such denial, the Petitioners will show that the Motion itself is factually flawed, as it misrepresents discovery answers provided by certain of the Petitioners. Moreover, the principal focus of the Motion seeks the production of cost numbers and documents, all of which concern pricing for Service Order Administration ("SOA") functions with which Western Wireless has no quarrel. And, even if Western Wireless were to change its position regarding the relevancy of this information to its case, Western Wireless has not complied with the terms of the Confidentiality and Protective Agreement ("Agreement") regarding document production from non-parties.

These points will be discussed in order.

The Motion Confuses The Facts

As previously discussed, the Motion To Compel mistates the discovery responses for some Petitioners. For instance, Western Wireless' Brief in Support of its Motion To Compel

purports to represent the response of “All Petitioners” to Question 4a(i) and (ii) (Brief, p. 2). Such is not the case. The Cheyenne River Sioux Tribe, which is subject to the Motion To Compel, did not supply the response attributed to them. Additionally, the answers to interrogatory no. 5 purport to apply to all of the Petitioners. This is not correct. For instance, the answers supplied by the City of Brookings/SWIFTEL and the Cheyenne River Sioux Tribe are at variance with the answers attributed to them in Western Wireless’ Brief. Questions 13, 16, 18, 19 and 21 suffer from more egregious error, in that Western Wireless did not even propound this question to all Petitioners. For example, question 13 only was addressed to the City of Brookings, Interstate Telecommunications Cooperative, Santel and a few others. And questions 18, 19 and 21 were only addressed to the Joint Petition filed by Armour, Union and Bridgewater-Canistota.

#### The Requested Proprietary Information Is Not In Dispute

Notwithstanding the factual errors discussed above, the Motion’s principal focus concerns proprietary data (held by non-parties) about which there is no dispute. In this respect, Western Wireless’ interrogatory questions number 4, 5, 13 and 16, and Production of Documents number 3, all sought SOA pricing information and documents. These items are all the subject of its Motion To Compel and Brief In Support. In Responses to Supplemental Discovery Requests of Petitioners (“Supplemental Responses”) dated June 11, 2004, Western Wireless made clear that it was not challenging SOA pricing, rather, it challenged whether port volumes justified the use of automated SOA. See Interrogatory 10.b. and answer of Western Wireless.

Against this background, the Motion To Compel appears to be a fishing expedition. The Brief In Support is heavily freighted with the notion that the cost information sought by Western

Wireless is so important that Petitioners' cost testimony should be stricken if it is not produced. Yet plainly, this is not an issue with Western Wireless, except in the Motion To Compel itself. This is an unwarranted use of the parties' and Commission's time, and the Motion should be denied as to these SOA cost items and documents.

Western Wireless Has Not Followed The Confidentiality Agreement

Paragraph 10 of the Agreement contemplates that a "non-party" will supply documents "pursuant to process issued by the Commission." All of the SOA cost information and documents sought in the Motion To Compel are the subject of non-disclosure agreements (NDA's) between the Petitioners and third-party SOA vendors. All of these vendors have now been contacted by Petitioners, or their representatives, for permission to supply the SOA information. The vendors have refused to release such information and no process has been requested by Western Wireless from the Commission, as contemplated by the Agreement. The third party SOA vendors have the right to claim a privilege and prevent other persons from disclosing trade secrets owned by them, and if disclosure is required the order shall take such protective measures as is in the interest of the holder of the privilege and the interest of justice required. SDCL 19-13-20. Under these circumstances, particularly in view of the fact that Western Wireless has no quarrel with the SOA costs themselves, the Motion should be denied.

Interrogatory Numbers 18 and 19 Directed to Armour, Union and Bridgewater-Canistota Will Be Supplied Pursuant To The Confidentiality Agreement

Interrogatories 18 and 19 requested certain switch investment information for Armour, Union and Bridgewater-Canistota. Objections were filed based on the confidential nature of the data. Such data has now been developed and will be produced, subject to the Confidentiality Agreement. Interrogatory 21 sought an explanation as to why local switching support resources

should not be used to offset LNP implementation costs. A relevancy objection was made, because there is no connection between the universal service support and LNP rate structure regimes, and Western Wireless' Motion To Compel attempts no explanation as to this interrogatory. The only argument Western Wireless does make concerned the parties' entry into the Confidentiality Agreement, but such Agreement clearly does not erase the discovery standard, which is not met here. Accordingly, the Motion To Compel should be denied in its entirety.

RE: Western Wireless License LLC Petition for Suspension or Modification of Local Number Portability Docket Nos. TC 04-025; TC04-038; TC04-044 through TC04-056; TC04-060 through TC04-062; TC04-077; TC04-084 and TC04-085

Dear Ms. Bonrud:

Pursuant to SDCL §16-8-2.2, please find an original and ten copies of the Certification of Dean of Law School to permit Paul A. Lewis, a summer intern with Gunderson, Palmer, Goodsell & Nelson, LLP, to attend and participate in Western Wireless License LLC's upcoming hearings regarding local number portability. I checked with the Clerk of Court in Hughes County and Chris informed me I did not need to file this document with the Court.

Western Wireless License, LLC has approved Mr. Lewis' attendance and participation in the hearings.

If you need anything further at this time, please let me know.

Sincerely,

Talbot J. Wiczorek

23 Sioux Falls, South Dakota 57117,  
24 appearing on behalf of Syniverse.  
25 ALSO PRESENT (by telephone):  
Dave Robinson  
Bobbie Reyes

4  
1 CHAIRMAN SAHR: This is the hearing  
2 for the Interveners' Motion to Compel discovery or  
3 in the alternative to strike Petitioner's prefiled  
4 testimony regarding costs in Docket Nos. TC04-025,  
5 04-038, 04-044 through 04-056, 04-060 through  
6 04062, 04-077, 04-084, and 04-085. And,  
7 Mr. Wieczorek ..  
8 For those of you on the phone line we're going  
9 to ask the attorneys to approach the witness stand  
10 and the phone as well so you can hopefully hear a  
11 little bit better, and if at any point in time you  
12 need us to repeat something, please let us know.  
13 Probably the first thing I should do is take  
14 appearances on this particular Motion.  
15 MR. WIECZOREK: Talbot Wieczorek on  
16 behalf of Western Wireless, Intervener.  
17 MS. POLLMAN ROGERS: Darla Rogers on  
18 behalf of the Petitioners. And appearing with me  
19 today are co-counsel, Mary Sisak and Ben Dickens.  
20 MR. COIT: Richard Coit appearing  
21 for SDTA, one of the Interveners in the case.  
22 MS. WIEST: Rolayne Wiest appearing  
23 on behalf of staff of the Public Utilities  
24 Commission.  
25 CHAIRMAN SAHR: Thank you. On the

1 line, Mr. Welk.  
 2 MR. WELK: Yes. I'm Tom Welk, an  
 3 attorney from Sioux Falls, and I represent  
 4 Syniverse. That's S-Y-N-I-V-E-R-S-E. We are a  
 5 vendor that provided some of the pricing  
 6 information to some of the consultants who have  
 7 then provided it to some of the Petitioners  
 8 regarding some of the software fixes that would be  
 9 available regarding number portability.  
 10 And our interest here, Mr. Chairman and other  
 11 Commissioners and other attorneys, is the  
 12 protection of the information that our client has  
 13 given to the consultants who then have given it to  
 14 the independent companies.  
 15 CHAIRMAN SAHR: Thank you.  
 16 Mr. Welk, as you know, we normally have a sign-up  
 17 sheet here in Pierre, which we do have, and we've  
 18 asked the people in the room to indicate who is  
 19 present.  
 20 Would you please have your clients identify  
 21 themselves again for our record.  
 22 MR. WELK: It's Syniverse,  
 23 S-Y-N-I-V-E-R-S-E, and Dave Robinson, has he jumped  
 24 on here?  
 25 MR. ROBINSON: Yes, I'm here.

1 MR. WELK: Mr. Robinson is a manager  
 2 of public policy with Syniverse, and he would be a  
 3 corporate representative, Mr. Chairman, for the  
 4 company.  
 5 CHAIRMAN SAHR: Thank you very much.  
 6 MR. SMITH: Before we start is there  
 7 anyone else on the line? Are there any other  
 8 attorneys in the various LNP dockets on the phone?  
 9 MS. REYES: Not on the Docket. My  
 10 name is Bobbie Reyes, and I'm in-house counsel for  
 11 Syniverse Technology. I'm here in the office with  
 12 Dave Robinson in Tampa.  
 13 CHAIRMAN SAHR: Would you please  
 14 spell your name.  
 15 MS. REYES: B-O-B-B-I-E, last name  
 16 R-E-Y-E-S.  
 17 CHAIRMAN SAHR: Thank you very much.  
 18 MS. REYES: Thank you.  
 19 CHAIRMAN SAHR: Third time's the  
 20 charm.  
 21 MR. WIECZOREK: I try. I really  
 22 appreciate the Commission setting this on for this  
 23 time. You know, the LNPs have been filed and kind  
 24 of been on the fast track and been a moving target.  
 25 So as a way of background, after we did our first

1 set of Interrogatories there was quite a bit of  
 2 information objected to based on the fact they had  
 3 signed confidentiality and nondisclosure  
 4 agreements.  
 5 The quandary that put us in is most of their  
 6 numbers, their hard numbers, we didn't have any  
 7 backup information on.  
 8 We signed the confidentiality agreement. I  
 9 then followed up with a letter asking for some  
 10 response listing all the objections they had raised  
 11 and asked if they would check with their vendors as  
 12 promised in their discovery.  
 13 Finally, I filed a Motion to Compel because I  
 14 had never received a response. It came a week ago  
 15 last Friday. Since then we've also gotten the last  
 16 round of Interveners' testimony, and some of the  
 17 numbers changed yet again. So what I attempted to  
 18 do to try -- you might recall the last one we did  
 19 like this I think we were on the phone three hours.  
 20 I don't want to repeat that.  
 21 So last night I sat down with my company  
 22 people, we went through all the numbers and  
 23 everything they provided we thought we could at  
 24 least have a comfort level their numbers were hard  
 25 numbers and we could validate them. What it boiled

1 down to is I'd like to limit my Motion to Compel to  
 2 a couple of issues rather than try to deal with  
 3 every one.  
 4 And I think the easiest way to cut to it is go  
 5 to request for production number 3, which sought --  
 6 and that's where we stated in the brief on page 6  
 7 where we sought switch upgrade costs, LNP period  
 8 costs, LNP software, et cetera, those costs, the  
 9 backup information. In reviewing all the  
 10 documentation we've received, essentially for the  
 11 cost -- for the Petitioners using the cost coming  
 12 out of Nebraska, the Telec group, while we didn't  
 13 get the raw bid information, we did get enough  
 14 information within what they produced we were  
 15 comfortable we knew what they were attempting to  
 16 get, what the numbers actually were.  
 17 So but as to the Petitioners that are  
 18 affiliated with Mr. DeWitte's testimony and that's  
 19 Swiftel, Interstate, James Valley, Santel,  
 20 Stockholm, Venture, and West River, as to all of  
 21 their switch-related investment costs, we don't  
 22 have any of the bid information.  
 23 And so I would limit our Motion to the  
 24 De Witte Petitioners to get the bid information  
 25 they have for that first area of his testimony on

1 his spreadsheet that is entitled Switch-Related  
 2 Investment Costs.  
 3 And the reason this is important is if you  
 4 look at some of the other where -- some of the  
 5 information we got from the Telec groups it appears  
 6 that in their cost structure they have included --  
 7 some of the upgrades that they've included are not  
 8 required for to become LNP compliant. And it would  
 9 be inappropriate for them to try to increase costs  
 10 to drive up their bottom line dollar for nonLNP  
 11 compliant costs.  
 12 There was an issue, and in the response they  
 13 mentioned the SOA information. While it's true  
 14 they haven't provided the SOA information, you  
 15 might -- you've been through all the cost  
 16 testimony. That SOA information changed last week  
 17 when they filed their last round of testimony. We  
 18 still think their SOA information or cost  
 19 information is too high for what they really need,  
 20 but I am not going to push them having to cough up  
 21 the SOA information because I believe I can  
 22 adequately cross-examine on that issue or it can be  
 23 addressed through my witness.  
 24 So, like I said, Commission, I'm trying to cut  
 25 this down to a defined direction given the recent

1 prefiled testimony and limited as tight as that can  
 2 be, knowing we're tight for time and we've got a  
 3 long couple of weeks in front of us.  
 4 MR. DICKENS: Let me move here. You  
 5 may want to keep your seat. You and I are going to  
 6 have a conversation. I'm not exactly sure what  
 7 Mr. Wieczorek wants. You don't want the SOA  
 8 information; that is right?  
 9 MR. WIECZOREK: Based on the  
 10 modified testimony filed last week, I don't think  
 11 it's necessary at this point.  
 12 MR. DICKENS: Okay. What is it that  
 13 you need?  
 14 MR. SMITH: For the benefit of the  
 15 people on the phone, Ben Dickens is the other  
 16 attorney who is speaking.  
 17 MR. DICKENS: Thank you.  
 18 MR. WIECZOREK: I'm looking at  
 19 Mr. De Witte's supplemental or -- rebuttal  
 20 testimony, Exhibit 3A. He has a category at the  
 21 top entitled Switch-Related Investment Costs.  
 22 I would like the LNP software features, where  
 23 he got those numbers, the bid break, where he got  
 24 those numbers. The additional software feature  
 25 he's explained adequately in his testimony, but I'd

1 also like the additional features charged, the  
 2 additional vendor fees charged and the --  
 3 MR. DICKENS: These are covered by  
 4 your Interrogatory request number 3?  
 5 MR. WIECZOREK: Yes.  
 6 MR. DICKENS: Can I have a minute?  
 7 MS. WIEST: Which ones?  
 8 MR. WIECZOREK: The second item  
 9 called LNP software he explains adequately in his  
 10 testimony. He says where the number comes from,  
 11 and we can address that in cross.  
 12 MS. WIEST: Okay.  
 13 MR. DICKENS: Let me make a  
 14 suggestion that's been pointed out to me. It's  
 15 been pointed out to me that information is supplied  
 16 in Mr. De Witte's prefiled testimony. Could you  
 17 look this over and tell us if this is sufficient or  
 18 not?  
 19 MR. WIECZOREK: Yeah. Some of that  
 20 information is supplied like the LNP software.  
 21 There's a charge that he's got -- excuse me.  
 22 Additional software features. I think I misspoke.  
 23 It's the LNP software features we want the bids.  
 24 He says obtained bids, but I don't have copies of  
 25 the bids. I don't know exactly what that entails.

1 MR. DICKENS: I'm advised the bids  
 2 were oral.  
 3 MR. WIECZOREK: Well, then if they  
 4 are oral and that's going to be the representation,  
 5 like I believe I set forth in my brief, I retain  
 6 the right to argue in briefing that failure to  
 7 document their costs properly is grounds for it to  
 8 be found they can't meet their burden in these  
 9 cases, but assuming there's got to be some kind of  
 10 spec information given at some point as to what the  
 11 bids were based on.  
 12 MR. DICKENS: Well, there's as much  
 13 information as there is in Mr. Williams's rebuttal  
 14 testimony. He suffers from the same lack of  
 15 documentation.  
 16 MR. WIECZOREK: His direct?  
 17 MR. DICKENS: To the extent it's  
 18 oral and not documented, it's similar to  
 19 Mr. Williams's prefiled testimony.  
 20 MR. WIECZOREK: So the Commission  
 21 understands what we got from Telec, they had  
 22 e-mails going back and forth setting forth what the  
 23 bids were based on, essentially what tech  
 24 requirements, and I guess I would ask that those  
 25 e-mails be produced if you e-mailed them.

1 If Mr. De Witte says all he did was called  
 2 them and say ballpark this number, then I guess  
 3 there's nothing we can do.  
 4 MS. WIEST: Are we still talking  
 5 about LNP software features?  
 6 MR. WIECZOREK: I'm assuming --  
 7 MS. WIEST: Are we talking about all  
 8 four categories?  
 9 (Discussion off the record)  
 10 (A short recess is taken)  
 11 MR. SMITH: We're back on the  
 12 record. We were in recess for a few minutes here  
 13 while the attorneys attempted to work out an  
 14 agreement, and, Mr. Wieczorek, please proceed.  
 15 MR. WIECZOREK: Yes, Commission,  
 16 even though in the responses they talked about  
 17 information obtained from nondisclosure agreements,  
 18 after talking to Mr. De Witte he made it clear that  
 19 he didn't get any paper information on this. It's  
 20 just information he acquired either through phone  
 21 calls, or it's my understanding he's going to  
 22 testify he got it from phone calls.  
 23 MR. DICKENS: It's a different  
 24 category of information you're talking about. Is  
 25 that right, John? Isn't this a different category

1 of information?  
 2 MR. DE WITTE: Yes.  
 3 MR. WIECZOREK: In response to the  
 4 request for production you also said that  
 5 information was required by -- through NDA.  
 6 MS. POLLMAN ROGERS: Some of that  
 7 was weren't the SOA costs included in the request  
 8 for production number 3?  
 9 MS. SISAK: Yes.  
 10 MR. WIECZOREK: I'm not talking  
 11 about SOA. I talking about request for production  
 12 3, the stuff I narrowed my request to. Your  
 13 response in the discovery responses was that you  
 14 obtained that information pursuant to NDA. All I'm  
 15 telling the Commission is you've now represented to  
 16 me that there's actually no nondisclosure  
 17 agreement. Switch update costs, LNP software  
 18 features, that information, you didn't get hard  
 19 copies of that, it's just information you got over  
 20 the phone.  
 21 MS. POLLMAN ROGERS: The point of  
 22 clarification I'm trying to make is in the actual  
 23 request for production the responses there were  
 24 correct because some of that information was  
 25 obtained pursuant to an NDA, and it's only since

1 then today that you narrowed it to those other  
 2 issues.  
 3 MR. WIECZOREK: Commission, all I  
 4 was trying to point out is that the response -- the  
 5 documents and responses to request --  
 6 (Inaudible) --  
 7 (Discussion off the record)  
 8 MR. WIECZOREK: The documents in  
 9 response to this request were obtained pursuant to  
 10 NDA and, therefore, Petitioner cannot provide them.  
 11 Petitioner received permission from the vendors to  
 12 provide these documents subject to the  
 13 confidentiality rule.  
 14 So all I'm saying is it's our understanding  
 15 they had gotten documents. We went out into the  
 16 hall. Mr. De Witte said, no, I didn't get  
 17 documents to the cost you narrowed your stuff to.  
 18 And so that's all I'm laying out on the record  
 19 here. And so he's going to testify to it, and it's  
 20 my understanding he'll probably testify as to why  
 21 he came up with those numbers and the way he did  
 22 it. But he just doesn't have any documentation for  
 23 it.  
 24 MR. DICKENS: He did provide you  
 25 with information and answered your questions.

1 MR. WIECZOREK: We talked about it.  
 2 He said here's how I do it and some of it's based  
 3 on my experience and some of it's based on me  
 4 making a couple of calls.  
 5 That was the only clarification. I wasn't  
 6 meaning to --  
 7 MR. SMITH: For clarification then  
 8 do we still have a Motion on the table?  
 9 MR. WIECZOREK: I guess I would  
 10 remove my Motion, just with the proviso as I said  
 11 at the beginning that I'm going to retain the right  
 12 to argue that they failed to meet their burden for  
 13 failure to actually obtain bids and hard numbers  
 14 and provide them -- but I don't believe that's part  
 15 of my Motion.  
 16 MS. POLLMAN ROGERS: So your Motion  
 17 is withdrawn?  
 18 MR. WIECZOREK: Yeah.  
 19 MR. SMITH: Okay. That ends that.  
 20 Is there anything that anyone has to say on the  
 21 telephone regarding this?  
 22 MR. WELK: This is Mr. Welk. I  
 23 assume in light of the withdrawal any concerns  
 24 about the disclosure of the proprietary information  
 25 from my client would be moot?

1 CHAIRMAN SAHR: Yes.  
 2 MR. WELK: All I need to know.  
 3 CHAIRMAN SAHR: Thank you. We can  
 4 go off the record.  
 5 (Discussion off the record)  
 6 MR. SMITH: The hearing is over.  
 7 (The hearing concluded at 11:30 a.m.)

1 CHAIRMAN SAHR: I will begin the  
 2 hearing for the local number portability Dockets. The  
 3 time is approximately 2:30 p.m. The date is June 21,  
 4 2004, and the location of the hearing is Room 412 in  
 5 the Capitol Building, Pierre, South Dakota. I'm Bob  
 6 Sahr, Commission Chairman. Commissioners Gary Hanson  
 7 and Jim Burg are also present. I am presiding over  
 8 this hearing.  
 9 This hearing was noticed pursuant to the  
 10 Commission's order for and notice of procedural  
 11 schedule of hearing and of intent to take judicial  
 12 notice issued May 4, 2004. The issues at this hearing  
 13 will be, one, whether and the extent to which the  
 14 suspension of LNP requirements requested by Petitioner,  
 15 A, is necessary, one, to avoid a significant adverse  
 16 economic impact on users of telecommunications services  
 17 generally, two, to avoid imposing a requirement that is  
 18 unduly economically burdensome or, three, to avoid  
 19 imposing a requirement that is technically infeasible  
 20 and, B, is consistent with the public interest,  
 21 convenience, and necessity, two, if the suspension is  
 22 found to be justified, what the duration of the  
 23 suspension should be and, three, whether any other  
 24 relief should be granted.  
 25 All parties have the right to be present and

1 to be represented by an attorney. All persons so  
 2 testifying will be sworn in and subject to  
 3 cross-examination by the parties. The Commission's  
 4 final decision may be appealed by the parties to the  
 5 State Circuit Court and State Supreme Court. John  
 6 Smith will act as Commission counsel. He may provide  
 7 recommended rulings on procedural and evidentiary  
 8 matters. The Commission may overrule its counsel's  
 9 preliminary rulings throughout the hearing. If not  
 10 overruled, the preliminary rulings will become final  
 11 rulings. At this time I will take the appearances of  
 12 the parties.  
 13 MR. WIECZOREK: Talbot Wieczorek,  
 14 Western Wireless, Commission. Also assisting me is  
 15 Paul Lewis who is appearing under senior  
 16 certificate, second year law student, which I have  
 17 filed in these Dockets.  
 18 MR. GERDES: Mr. Chairman, members  
 19 of the Commission, I'm Dave Gerdes. I'm a lawyer  
 20 from Pierre with the law firm of May, Adam, Gerdes  
 21 & Thompson. I appear for Midcontinent  
 22 Communications. With me is J.G. Harrington, who is  
 23 a Washington attorney also appearing pro hac vice.  
 24 MS. AILTS WIEST: Ralayne Wiest on  
 25 behalf of Commission staff.

1 MS. POLLMAN ROGERS: Darla Pollman  
 2 Rogers. I am appearing on behalf of all of the  
 3 companies listed in these Dockets with the  
 4 exception of Santel Communications Cooperative  
 5 which is TC04-058, Brookings Municipal Utilities  
 6 doing business as Swiftel Communications which is  
 7 TC04-047, and James Valley Cooperative Telephone  
 8 Company which is TC04-077. I believe that's all. I  
 9 am appearing on behalf of the rest of them.  
 10 And in addition I have with me today  
 11 Ben Dickens and Mary Sisak from Washington, D.C.,  
 12 and I would again -- will be filing pro hac vice  
 13 orders and they can identify which Dockets in  
 14 addition to ones I have named in which they are  
 15 appearing.  
 16 MR. COIT: Mr. Chairman, members of  
 17 the Commission and staff, my name is Richard Coit  
 18 and I'm appearing today on behalf of all of the  
 19 SDTA member companies, specifically SDTA as an  
 20 association. Thank you.  
 21 MR. DICKENS: Mr. Chairman, I have  
 22 one other appearance to make for myself and  
 23 Ms. Sisak and that is we're appearing on behalf of  
 24 Brookings Municipal Utilities d/b/a Swiftel  
 25 Communications, which is TC04-047 and Jodie Smith

1 is with us from Mr. Helsper's firm.  
 2 CHAIRMAN SAHR: Thank you.  
 3 MR. SMITH: Are we ready to proceed?  
 4 CHAIRMAN SAHR: Yes.  
 5 MR. SMITH: The counsel for  
 6 Petitioners has requested to be able to make an  
 7 opening statement. One other note for the record.  
 8 We've had several discussions among the parties  
 9 leading up to the hearing today involving how to  
 10 handle the mechanics of the hearing given the  
 11 similarity of issues, at least the general issues  
 12 in the multitude of suspension Dockets.  
 13 And those discussions, I think can be fairly  
 14 summarized as concluding that to the extent we can,  
 15 we will try to keep the testimony that -- or try to  
 16 keep the introduction of testimony that is common  
 17 to a multitude of Dockets to a minimum, that once  
 18 introduced, unless there is something specific to a  
 19 particular company that distinguishes it, that it  
 20 would be introduced in the entirety of the Dockets  
 21 to which it pertains.  
 22 And as we go along here there may be obviously  
 23 situations where we'll have to carve out  
 24 exceptions. But given that, I think right now --  
 25 and there are a couple of lawyers that aren't here

1 right now, but I think perhaps it would be  
 2 appropriate to begin in the opening statements with  
 3 addressing basically the overall proceeding that  
 4 we're involved in, which is the LNP Dockets as a  
 5 class of cases that we're going to hear together.  
 6 And with that, Ms. Rogers for the Petitioners,  
 7 you may proceed.  
 8 MS. POLLMAN ROGERS: Thank you. I  
 9 would state for the benefit of those who are here  
 10 and the Commission in particular that I have  
 11 confined my opening remarks to -- or I will confine  
 12 them to more general issues, and they will relate  
 13 to all of the Dockets.  
 14 I would, however, reserve the right for those  
 15 attorneys that are not present to make some opening  
 16 comments at the beginning of each of their Dockets  
 17 if they would so choose to do so. And I would also  
 18 tell you so that you can relax a little bit that I  
 19 do not intend to repeat this statement at the  
 20 beginning of every Docket. Relief by all.  
 21 Members of the Commission, we are facing  
 22 several days here and maybe long days of hearings,  
 23 and they will be continuing probably over the next  
 24 couple of weeks. And as I consider the complexity  
 25 of the issues facing us as we sort through the maze

1 of LNP, I've struggled with how to help you as a  
 2 State Commission put your arms around the complex  
 3 issues involved with local number portability.  
 4 And I am not implying by that comment that  
 5 this is unique to you as a South Dakota Commission.  
 6 I believe you are aware that commissions across the  
 7 United States are probably facing similar questions  
 8 and issues and, in fact, the FCC is also facing  
 9 some unresolved issues relating to LNP.  
 10 But my clients are here today before you as  
 11 state regulators and they are petitioning for  
 12 suspension or modification of local number  
 13 portability requirements so that starts us on our  
 14 LNP journey. And perhaps I can assist all of us in  
 15 the room by referencing and urging us to focus on  
 16 just a few issues and what I perceive to be key  
 17 points over the next few days.  
 18 Before I bring to your attention those key  
 19 points, I would, however, like to remind you of the  
 20 jurisdiction and authority that you have in these  
 21 Dockets. Western Wireless has told you  
 22 Section 251(b)(2) of the Act, and I'm referring to  
 23 the Federal Communications Act, imposes the duty on  
 24 all local exchange carriers to provide to the  
 25 extent technically feasible, number portability.

1 While we do not dispute that section of the code, I  
 2 would also specifically draw your attention to  
 3 Section 251(f)(2) of the Federal Act and also  
 4 SDCL 49-31-80.  
 5 Each of those statutory sections, one at the  
 6 federal level and one at the state level, gives  
 7 this Commission the jurisdiction to suspend or  
 8 modify those requirements for LECs with fewer than  
 9 2 percent of the nation's subscriber lines. Under  
 10 the Act, suspension or modification shall be  
 11 granted to the extent that and for the duration  
 12 that the State Commission deems necessary if the  
 13 statutory requirements are met.  
 14 As I will discuss later, the Petitioners have  
 15 done that, and they will do that over the course of  
 16 the next few days. They will show you through  
 17 their evidence that they have met those statutory  
 18 burdens. So what I am telling you or suggesting to  
 19 you today is that under the Act and under South  
 20 Dakota Law you have the power and the  
 21 responsibility to act upon these petitions and to  
 22 suspend or modify if the statutory requirements are  
 23 met.  
 24 Interveners Western Wireless and in some of  
 25 the Dockets Midcontinent argue that the FCC has

21

1 found that LNP is necessary for competition. I  
 2 would suggest to you that this argument is not  
 3 relevant to this proceeding. The purpose of  
 4 Section 251(f)(2) was to allow State Commissions  
 5 such as yourself to come to a different conclusion  
 6 than the FCC with respect to rural carriers if it's  
 7 necessary to protect rural subscribers and those  
 8 carriers here in South Dakota.

9 Our evidence will demonstrate that the FCC's  
 10 attempts to limit the determinations made by State  
 11 Commissions in connection with Section 251(f),  
 12 these proceedings, that in fact the courts have  
 13 rejected that, any attempt to limit your authority.  
 14 And our evidence will also show that Western  
 15 Wireless has argued before the FCC on other  
 16 occasions that LNP is not necessary for  
 17 competition.

18 So the bottom line and the point I'm making to  
 19 you is that you have the power and the authority  
 20 and the jurisdiction to take the actions we are  
 21 requesting you to take today and over the next few  
 22 days.

23 Now let's look at some of the factors that I  
 24 believe are key in these cases, and there are  
 25 certainly a lot of them. You've been inundated

22

1 with a lot of exhibits and a lot of evidence,  
 2 documents. But I would like to focus our thoughts  
 3 on three things over the next few days.

4 The first one is the cost and the cost benefit  
 5 analysis. The second one is the transport and  
 6 routing issues, and the third one is the unresolved  
 7 or the unresolved issues including but not limited  
 8 to porting and wireless-to-wireline porting. I  
 9 think that if we focus and as we focus on these  
 10 three things it will become clear that the  
 11 Petitioners have demonstrated that LNP is not in  
 12 the public interest.

13 So let's look first of all at the cost  
 14 evidence and exhibits that I anticipated will be  
 15 presented over the next few days. Although  
 16 Petitioner's cost consultants formatted and  
 17 calculated estimated LNP costs somewhat  
 18 differently, there is no dispute on most of the  
 19 cost elements and most of the estimated cost  
 20 elements.

21 If we look at LNP from a cost perspective, it  
 22 includes several things. Number one, the  
 23 switch-related costs and expenses, number two, the  
 24 LNP query and service order administration costs,  
 25 and number three, the technical and administrative

23

1 costs including costs associated with changes and  
 2 company processes and procedures.

3 Except for the service order administration,  
 4 Western Wireless disputes few of these costs and  
 5 only in minor ways. Western Wireless's dispute  
 6 with respect to the service order administration is  
 7 not with the estimated cost of SOA but rather they  
 8 argue that an automatized SOA process cannot be  
 9 justified by the low volume of calls anticipated by  
 10 the Petitioners. Western Wireless argues that  
 11 Petitioners should use a manual SOA process. Our  
 12 evidence, however, will show an automated SOA  
 13 process may be necessary to meet the porting  
 14 interval and especially if it is reduced to two  
 15 days or less.

16 Our evidence will also show and in fact it's  
 17 clear from the law itself that there is no  
 18 requirement that carriers select the least cost LNP  
 19 process. Western Wireless's argument regarding  
 20 service order administration is based on the  
 21 Petitioner's low estimated number of ports, but you  
 22 will note from the evidence submitted that Western  
 23 Wireless's estimates of ports is much higher. The  
 24 bottom line is the number of ports is not known at  
 25 this time.

24

1 Perhaps the most significant thing is the  
 2 federal LNP surcharge can only be imposed for five  
 3 years and once imposed the FCC rules make increases  
 4 in the surcharges extremely unlikely. Therefore,  
 5 if a change in the SOA process is required after  
 6 initial implementation, either because a porting  
 7 interval is reduced or because the number of ports  
 8 is greater than expected by the Petitioners,  
 9 Petitioners will not be available to go back to  
 10 recover any additional costs through the federal  
 11 LNP surcharge.

12 Now let's look at the next point. You'll  
 13 recall I said the cost was the first one. The  
 14 second one I would like you to focus on would be  
 15 transport. I believe that the transport and the  
 16 costs associated with it are very, very big issues  
 17 in these cases. I would point out, first of all,  
 18 that there is no federal requirement concerning how  
 19 calls to ported numbers must be routed. That issue  
 20 was left unresolved in the November 10 order.

21 The FCC made certain assumptions regarding the  
 22 routing and rating of calls to ported numbers which  
 23 are wrong with respect to South Dakota. Under  
 24 current call routing and interconnection  
 25 arrangements, in most cases calls to numbers ported

1 to wireless carriers will be rated and routed as a  
 2 toll call. Under current call routing and  
 3 interconnection arrangements if a wireless carrier  
 4 wants calls to numbers ported to the wireless  
 5 carrier to be rated and routed as a local call, the  
 6 wireless carrier must establish a direct connection  
 7 to each LEC switch. Therefore, Petitioner's cost  
 8 exhibits introduced in these hearings reflect the  
 9 transport costs that would be incurred if direct  
 10 connections are established.

11 Now Western Wireless does not necessarily  
 12 dispute the first two points I made concerning the  
 13 current routing and interconnection arrangements,  
 14 but Western Wireless does argue that the transport  
 15 costs listed by Petitioners are excessive because  
 16 Petitioners should instead route traffic to Qwest  
 17 as a transit carrier.

18 However, I would point out and in fact Western  
 19 Wireless admits that there is no requirement for  
 20 Petitioners to route calls to Qwest and that the  
 21 interconnection arrangements or agreements between  
 22 Western Wireless and the Petitioner do not require  
 23 this. The Commission should not require Petitioner  
 24 to change routing and rating practices for ported  
 25 calls. If on the other hand the FCC would require

1 that or if you do, then the cost is appropriately  
 2 considered an LNP cost.

3 The next point that I would ask you to focus  
 4 on is the point of unresolved issues and how they  
 5 will affect the costs of implementing LNP to the  
 6 Petitioner's detriment. The porting interval, the  
 7 wireless-to-wireline porting and the routing issues  
 8 are all pending at the FCC as we sit here today.  
 9 The resolution of these issues most likely will  
 10 require changes in the implementation of LNP and  
 11 will result in additional costs to Petitioners.  
 12 Petitioners will be better able to know the costs  
 13 of LNP and will be able to implement LNP more  
 14 effectively if implementation is not required  
 15 before important unresolved issues are resolved.

16 Finally, the evidence of Petitioners will also  
 17 demonstrate that there is little, if any, demand  
 18 for LNP in the various service territories of these  
 19 Petitioners. What does this show us? It shows us  
 20 that Petitioners have met the requirements and will  
 21 meet the requirements of Section 251(f)(2).

22 Petitioners are 2 percent carriers. That's  
 23 not disputed. Petitioners have demonstrated or  
 24 will demonstrate significant cost of LNP and that  
 25 creates a significant adverse economic impact on

1 users of telecommunications services in  
 2 South Dakota and it imposes a requirement that is  
 3 unduly economically burdensome.

4 Petitioners will demonstrate and have shown  
 5 there are significant outstanding issues that  
 6 further impact the cost of LNP. Petitioners have  
 7 described or will describe to you the call routing  
 8 problem where the wireless carrier does not have a  
 9 direct connect which could impact the cost of LNP  
 10 which makes local routing of calls to portable  
 11 numbers technically infeasible. Petitioners will  
 12 demonstrate there is little or no demand for LNP in  
 13 their service territories. And in light of all of  
 14 that, Petitioners will demonstrate that the cost  
 15 and the implementation issues coupled with the lack  
 16 of demand lead to the conclusion that LNP is not in  
 17 the public interest.

18 So what are we asking? We are asking in all  
 19 of the dockets that Petitioner's obligation to  
 20 provide LNP be suspended at a minimum until  
 21 unresolved issues, transport, porting intervals,  
 22 wireless-to-wireline porting, are resolved by the  
 23 FCC. In some cases in some of the dockets we will  
 24 urge you to go beyond that. We will urge you that  
 25 in some cases even aside from those unresolved

1 issues the costs are too high for the demand, and  
 2 it's not sustainable to order those companies to  
 3 implement LNP.

4 I think I would sum it up with a picture, if I  
 5 could. If we look at the scales of justice or a  
 6 teeter-totter, whichever you're more familiar with,  
 7 I would stack on one side the issues that I have  
 8 discussed today, the cost, the transport, and the  
 9 unresolved issues, and on the other side I would  
 10 balance Western Wireless and Midcontinent's  
 11 arguments for competition, the necessity of LNP for  
 12 competition, and probably also just the appeal of  
 13 the idea of LNP.

14 And when you weigh the public interest with  
 15 those factors in the balance I would suggest to you  
 16 that our evidence will show that at this point in  
 17 time the scales weigh decisively in favor of  
 18 suspension or modification, and that's what we ask  
 19 you to grant. Thank you.

20 MR. SMITH: Mr. Coit.  
 21 MR. COIT: Thank you. First I would  
 22 like to thank the Commission staff and the  
 23 Commission for arranging SDTA to present the  
 24 testimony of its sole witness in this case out of  
 25 order. I don't believe that we'll be in a

29

1 position, because of the unavailability of our  
 2 witness we won't be in a position to present that  
 3 testimony immediately, and we appreciate the fact  
 4 that you've made adjustments to the schedule to  
 5 allow us to participate through testimony.  
 6 I would just like to state that SDTA concurs  
 7 and supports the comments made by Ms. Rogers, the  
 8 arguments that she's made, and also the specific  
 9 request for relief that she's made. I'd just like  
 10 to spend a little bit of time outlining the sort of  
 11 testimony that we will be presenting in this case.  
 12 We will be presenting our testimony through an  
 13 individual by the name of Steven Watkins. And  
 14 Steven Watkins is a special telecommunications  
 15 management consultant with the Washington, D.C.  
 16 law firm of Kraskin, Moorman & Cosson, which  
 17 provides legal and consulting services to  
 18 telecommunications services across the country.  
 19 Mr. Watkins has held a position with that firm  
 20 since 1996. He has approximately 28 years of  
 21 experience in the telecom industry that has been  
 22 devoted to providing consulting and regulatory  
 23 assistance to smaller independent  
 24 telecommunications firms throughout the  
 25 United States.

30

1 And primarily his work includes providing  
 2 assistance to those companies in their analysis of  
 3 regulatory and industry issues, and as we know,  
 4 many of those issues have arisen since the 1996  
 5 Telecom Act that was enacted and very clearly the  
 6 issues that we're faced with today have arisen as a  
 7 result of that Act.  
 8 Prior to his current position Mr. Watkins  
 9 spent about 12 years with the National Telephone  
 10 Cooperative Association. There he provided work in  
 11 the area of research analysis and formulation of  
 12 policy and also just expert advice to the member  
 13 companies of NTCA on industry issues.  
 14 Mr. Watkins will, as part of his testimony,  
 15 try to give you some background as to what's going  
 16 on in the rest of the nation on the issues of LNP,  
 17 and very clearly from his testimony you'll see that  
 18 the issues that we're faced with today, as  
 19 Ms. Rogers indicated, are not isolated to  
 20 South Dakota.  
 21 The FCC's memorandum and opinion and order on  
 22 intermodal LNP which was released on November 10,  
 23 2003 failed to address some unavoidable issues that  
 24 are wrapped up into the provisioning of that  
 25 service. And particularly those issues related to

31

1 calling scope differences and rate center  
 2 disparities between wireless and wireline  
 3 providers. And because those issues were not  
 4 addressed by the FCC, the FCC's intermodal order is  
 5 being challenged on different fronts, both at the  
 6 federal and state level.  
 7 There have been hundreds of LNP waiver filings  
 8 made across the country, and various national  
 9 organizations that represent both urban and rural  
 10 telecom companies throughout -- or landline LECs  
 11 including rural ILECs throughout the country have  
 12 initiated federal court proceedings challenging the  
 13 FCC's order. So very clearly we're dealing with  
 14 issues that have some significant consequence. If  
 15 they didn't, I don't think we would be seeing all  
 16 of that activity.  
 17 Mr. Watkins will go on to discuss the specific  
 18 criteria for reviewing suspension requests that are  
 19 found in the federal statute, Section 251(f)(2),  
 20 and also in the state code in 49-31-80. And he  
 21 will also, in talking about the FCC requirements,  
 22 address some different definitions that apply to  
 23 the provisioning of local number portability. He  
 24 will comment on the differences between service  
 25 provider portability and what is called location

32

1 number portability.  
 2 And I would encourage the Commission to pay  
 3 close attention to that testimony because it's  
 4 important to understanding just what the  
 5 requirements are in providing local number  
 6 portability. There's a difference between service  
 7 provided portability and location number  
 8 portability. And understanding these terms and  
 9 these differences is necessary to have a clear  
 10 understanding of the rate center disparity issues  
 11 and local calling scope disparity issues that exist  
 12 between wireless and wireline providers. And those  
 13 issues are very critical to understanding the  
 14 difficulties in implementing LNP at this particular  
 15 point in time.  
 16 He will spend a considerable amount of time in  
 17 addressing the technical feasibility and undue  
 18 economic burden standards in talking about the  
 19 issue of transport. Ms. Rogers discussed that  
 20 issue in her opening comments, and that is a very  
 21 important issue. And some of the testimony is  
 22 devoted to the question of, you know, why is this  
 23 important at this time to wireless carriers, given  
 24 the -- what appears to be low demand on the part of  
 25 customers for local number portability, intermodal

1 portability, moving a number from a wireline phone  
 2 to a wireless phone.  
 3 And it's our view that an attempt is being  
 4 made in this case to really go beyond the  
 5 provisioning of local number portability in the  
 6 service provider portability context and that is  
 7 allowing somebody at the same location to take a  
 8 number and move it to another service provider.  
 9 What appears to be happening here in this  
 10 proceeding is a push for what could be referred to  
 11 as location number portability. And we've had  
 12 proceedings before the Commission in the past that  
 13 have addressed what would have been termed virtual  
 14 NXX issues, where someone wants to take an NXX that  
 15 was assigned to one rate center and move it to a  
 16 rate center that is far removed from the current  
 17 area where that number is used.  
 18 And all wrapped up into those location number  
 19 portability issues are the transport issues. And  
 20 we feel that -- we believe that the reason there's  
 21 such a push at this point in time specifically by  
 22 Western Wireless is that they are trying to shift  
 23 transport responsibilities to ILECs and they are  
 24 also trying to establish an environment where they  
 25 can utilize basically virtual NXXs to bypass the

1 current access network, force us to route calls  
 2 that were previously toll calls as local calls.  
 3 All of those issues are addressed in  
 4 Mr. Watkins' testimony and they are very critical  
 5 to this Commission understanding the cost, the  
 6 economic burdens, and the technical feasibility of  
 7 providing the location or local number portability  
 8 in today's environment looking at the different  
 9 networks that are there and the different calling  
 10 scopes. So we would just encourage the Commission  
 11 to consider the testimony very carefully and look  
 12 at those rate center disparity issues and local  
 13 calling scope issues carefully to put itself in a  
 14 position to make a fair decision. Thank you.  
 15 MR. SMITH: Mr. Wieczorek.  
 16 MR. WIECZOREK: Thank you,  
 17 Mr. Smith. Thank you, Commission. I'm not going  
 18 to go through what the testimony is going to show  
 19 in the next couple of days totally. I think  
 20 suffice it to say, the burden in this process lays  
 21 on the Petitioners. I think the evidence is going  
 22 to show clearly that the Petitioners have increased  
 23 their costs substantially over what is necessary to  
 24 provide local number portability. I take exception  
 25 to the argument that we are somehow trying to

1 backdoor-in location portability. That is not what  
 2 is occurring here.  
 3 We're asking that the Petitioners provide LNP  
 4 as required under the statute because we do not  
 5 feel that they can meet their burdens here.  
 6 Ms. Rogers talked about some of the costs and  
 7 implied we don't contest many of the costs. I  
 8 would say there's a number of smaller costs that we  
 9 contest but the transport costs we contest as  
 10 totally unnecessary. It's as if the LECs in this  
 11 situation have bought a Rolls Royce -- are  
 12 proposing to buy a Rolls Royce system to do what a  
 13 used Chevy can do. Here is an existing structure  
 14 that can be utilized to render those transport  
 15 costs next to nothing in comparison to the hundreds  
 16 of thousands of dollars they're claiming they're  
 17 going to have to incur.  
 18 And I believe the evidence will clearly show  
 19 that's a viable alternative and they should follow  
 20 that viable alternative.  
 21 Finally, there's been some comments as to  
 22 points of interconnect as being a substantial part  
 23 of that transport cost. Those points of  
 24 interconnect at the level that they need them are  
 25 not necessary. Again, the existing infrastructure

1 is such that there's a much easier fix to this. It  
 2 could be done in South Dakota.  
 3 It's interesting that in the testimony and in  
 4 the openings the argument is being made that  
 5 there's no demand for local number portability and  
 6 they're asking us to incur these costs but then  
 7 they turn it around and they say well, if there is  
 8 a lot of local number portability it's going to  
 9 increase our costs so you shouldn't allow it  
 10 either. They're trying to throw us into a Catch-22  
 11 situation. They're trying to have the Commission  
 12 buy into that Catch-22 situation, and I would ask  
 13 the Commission look through that and see the  
 14 duplicity of that argument. There is demand for  
 15 local number portability. It is in the consumers'  
 16 best interest. It can be readily done with the  
 17 existing infrastructure and our testimony is going  
 18 to show that. Thank you.  
 19 MR. SMITH: Mr. Gerdes.  
 20 MR. GERDES: Thank you, Mr. Smith.  
 21 Mr. Chairman, members of the Commission, very  
 22 briefly, Midcontinent would like you to know that  
 23 what we are talking about is something very  
 24 different from what other parties are talking -- or  
 25 have talked about and are talking about in this

1 Docket. We are talking about wireline-to-wireline  
 2 local number portability as required and mandated  
 3 by 251(b)(2). The FCC has not entered any other  
 4 orders on that issue. That obligation exists now  
 5 just as it existed when the '96 Act was passed.  
 6 Many of the issues that have been mentioned do not  
 7 apply to wireline-to-wireline number portability.  
 8 Transport as an example. You've already heard  
 9 testimony in the other Docket that indicates that  
 10 for local number portability to exist on a  
 11 wireline-to-wireline basis is significantly less in  
 12 cost to the local exchange carrier.  
 13 The only other thing I'll ask you to keep in  
 14 mind other than the significant difference between  
 15 the issue that a CLEC has and the issue that a  
 16 wireless company has is that remember, these  
 17 incumbent local exchange carriers talk about how  
 18 there's no demand for local number portability and  
 19 they don't see it, but the demand comes to the  
 20 CLECs. The demand does not come to the ILECs. The  
 21 CLECs are the ones that are getting it. And I  
 22 think you've heard some testimony in the other  
 23 Docket that there is in fact significant demand for  
 24 local number portability.  
 25 That's all I have.

1 MR. SMITH: Ms. Wiest.  
 2 MS. WIEST: Thank you. Commission  
 3 staff has not yet taken a position on any of the  
 4 LNP Dockets. However, based on our valuation of  
 5 the prefiled testimony we have arrived at some  
 6 initial thoughts with respect to the standards that  
 7 the Commission has to apply in these cases.  
 8 One of the questions is whether the suspension  
 9 is necessary to avoid imposing a requirement that  
 10 is technically infeasible. Based upon our  
 11 evaluation of the prefiled testimony, it's staff's  
 12 belief that, no, it is not technically infeasible  
 13 for any of the Petitioners to implement LNP. There  
 14 is certainly costs associated with implementation  
 15 and there appear to be routing and who pays issues  
 16 that are not necessarily easy to resolve but it  
 17 does appear that LNP can be implemented.  
 18 The more difficult questions we believe are  
 19 posed by the remaining considerations; for example,  
 20 is it necessary to avoid significant adverse  
 21 economic impact on users. As you've heard, the FCC  
 22 has authorized the companies to place a surcharge  
 23 on their customers for LNP cost. Based on the cost  
 24 studies submitted, the estimated impact on users  
 25 can be considerable, but that brings up the

1 question just how accurate these cost studies are.  
 2 For example, one of the significant cost  
 3 factors is transport. As you've heard, Western  
 4 Wireless and the Petitioners have proposed cost  
 5 estimates for transport that are based on two  
 6 different methods of transporting calls. These two  
 7 methods come up with costs that vary quite  
 8 significantly. Other estimated costs also vary  
 9 considerably and we expect these hearings will  
 10 serve to validate or in some cases bring into  
 11 question some of the costs.  
 12 But even if the costs can be estimated with a  
 13 reasonable amount of certainty, I think the more  
 14 difficult issue for the Commissioners will be what  
 15 exactly is a significant adverse economic impact on  
 16 a user. Is it \$5, \$10? I don't think that will be  
 17 an easy question to answer.  
 18 Another standard is whether suspension is  
 19 necessary to avoid imposing a requirement that is  
 20 unduly economically burdensome. I think this  
 21 standard implicates the telephone company itself.  
 22 So the first question is how much of the expense  
 23 will be borne by the customers either through the  
 24 surcharge or as mentioned by some of the managers  
 25 possibly also increase in local rates and what

1 expense may the company itself choose to take on.  
 2 Whatever that expense turns out to be, the question  
 3 remains whether it reaches the standards of unduly  
 4 economically burdensome.  
 5 The final standard is the one the Commission  
 6 is certainly used to dealing with and that is the  
 7 public interest standard. Local number portability  
 8 is certainly a very useful tool for fostering  
 9 competition but is it worthwhile to wait until some  
 10 of those unresolved issues are resolved? Will that  
 11 impact some of the costs? And if the demand is low  
 12 does it need to be implemented right away? On the  
 13 other hand, isn't it safe to expect that demand for  
 14 LNP will continue to grow and shouldn't rural  
 15 customers have that option available to them?  
 16 These are the questions that we as staff would  
 17 like to explore during these hearings and then  
 18 following the hearings we will be able to make a  
 19 recommendation to the Commission. Thank you.  
 20 MR. SMITH: Ms. Rogers, are you  
 21 ready to begin?  
 22 MS. POLLMAN ROGERS: Yes, sir.  
 23 Thank you. We would call Jerry Heiberger as our  
 24 first witness.  
 25 JERRY HEIBERGER,

1 called as a witness, being first duly sworn in the  
2 above cause, testified under oath as follows:  
3 MS. POLLMAN ROGERS: I will defer to  
4 Mr. Dickens to perform the direct of this witness.

5 DIRECT EXAMINATION

6 BY MR. DICKENS:

7 **Q** Mr. Heiberger --

8 MR. DICKENS: Just as a point of  
9 clarification from the Chair, absent or directed to  
10 the contrary in the interest to kind of move things  
11 along we'd propose to have our witness sponsor the  
12 direct and rebuttal testimony at the same time  
13 unless you'd like to follow --

14 MR. SMITH: That would be my  
15 recommendation unless there's objection from one of  
16 the parties.

17 MR. WIECZOREK: I have no objection,  
18 Your Honor.

19 MR. GERDES: No objection.

20 MS. WIEST: No objection.

21 MR. SMITH: Please proceed.

22 MR. DICKENS: Thank you.

23 **Q** Mr. Heiberger, I'd like to show you copies of Exhibit 1  
24 and Exhibit 2. I'd like to show you Exhibits 1 and 2  
25 which are your direct prefiled testimony in this

1 proceeding and your rebuttal testimony. I'll hand you  
2 these and have you confirm that they appear to be the  
3 same document as your prefiled testimony.

4 (Witness examines documents)

5 **A** Yes. I would agree this is my direct prefiled and my  
6 rebuttal testimony, Exhibits 1 and 2.

7 **Q** I forgot to ask you, would you state your name and  
8 address for the record.

9 **A** I'm sorry. My name is Jerald or Jerry J. Heiberger.  
10 I'm a resident of Clear Lake, South Dakota.

11 **Q** And this testimony was prepared by you or under your  
12 supervision?

13 **A** That's correct.

14 **Q** Is the testimony true and correct to the best of your  
15 knowledge?

16 **A** It is.

17 **Q** Are there any additions or corrections?

18 **A** Not to my knowledge, no.

19 **Q** If I were to ask you the same questions that are  
20 contained in your prefiled testimony labeled Exhibit 1  
21 and your rebuttal testimony labeled Exhibit 2, would  
22 your answers be the same today?

23 **A** Yes, they would.

24 MR. DICKENS: I would like to move  
25 the admission of Exhibits 1 and 2 and tender

1 Mr. Heiberger for cross-examination.

2 MR. WIECZOREK: No objection.

3 MR. GERDES: No objection.

4 MS. WIEST: No objection.

5 **Q** Before I tender you, would you provide a summary of  
6 your testimony?

7 **A** Sure. I'd like to show through my testimony and  
8 address that if local number portability is required at  
9 ITC that the projected costs will significantly impact  
10 our members of our telephone cooperative. Local number  
11 portability at this point in time that I see is not a  
12 high demand type of a service that is being requested  
13 by our customers. I'm only aware of actually one  
14 customer that has contacted our office and inquired  
15 about it and made the statement that they would be  
16 interested in possibly using local number portability.

17 I think it is a very poor bargain for our  
18 members, many of them being elderly, in our ITC  
19 exchanges here in South Dakota. I believe it makes  
20 much more sense to wait for clarification on many of  
21 the key issues that were already discussed by both  
22 Ms. Rogers and Mr. Coit. Those, of course, being  
23 certainly the point of interconnection to the carriers,  
24 what are the porting intervals going to be. And I  
25 think it would just make a lot more sense to wait until

1 some of these questions are resolved in a manner that  
2 would not be so economically burdensome to ITC's  
3 customers.

4 **Q** Does that conclude your summary?

5 **A** Yes.

6 MR. DICKENS: Now Mr. Heiberger is  
7 available for cross-examination.

8 MR. SMITH: I'm going to admit ITC  
9 Exhibits 1 and 2. Mr. Coit, do you have any  
10 cross-examination?

11 MR. COIT: No cross.

12 MR. SMITH: Mr. Wieczorek?

13 MR. WIECZOREK: I do have the short  
14 straw on this side of the table so I'll go first.

15 CROSS-EXAMINATION

16 BY MR. WIECZOREK:

17 **Q** Mr. Heiberger, you said your prefiled testimony was put  
18 together under your supervision. Did they send you the  
19 questions and you wrote out the answers? Is that how  
20 that worked?

21 **A** For the most part, yes.

22 **Q** And I noted in your prefiled testimony that you  
23 discussed some of the cost exhibits attached to  
24 Mr. DeWitte's testimony.

25 **A** Yes.

1 Q So you reviewed his cost exhibits?  
 2 A Certainly.  
 3 Q And his prefiled testimony?  
 4 A Yes.  
 5 Q There's one thing that I'd like to get clarified right  
 6 off the bat. You were in the room when your counsel  
 7 said that you were going to claim that LNP is  
 8 technically infeasible?  
 9 A Yes.  
 10 Q Okay. Do you agree with her statement?  
 11 A If technically --  
 12 MS. POLLMAN ROGERS: Excuse me. I'm  
 13 going to object to that question as a misstatement  
 14 of my remarks.  
 15 MR. SMITH: Sustained.  
 16 Q All right. Let me ask it this way: You were served  
 17 Interrogatories in this proceeding where it was  
 18 inquired as to whether you were going to contend that  
 19 local number portability was infeasible. Do you  
 20 remember that, technically infeasible?  
 21 A Yes.  
 22 Q Okay. Just for your reference I'll show you question  
 23 number 27 to the Interrogatories and that's --  
 24 MS. POLLMAN ROGERS: Excuse me.  
 25 Could we clarify --

1 MR. WIECZOREK: First set.  
 2 Q Dated May 10, 2004 and that bears your signature;  
 3 correct?  
 4 A That's correct.  
 5 Q And in response to the question, "Do you contend that  
 6 requiring you to provide local number portability would  
 7 result in imposing a requirement that is technically  
 8 infeasible, and if you so contend explain in detail how  
 9 you reached the conclusion identifying all documents,  
 10 opinions, or other materials you used in reaching this  
 11 conclusion," how did you respond?  
 12 A It states "No" there.  
 13 Q It just states "No"?  
 14 A Yes.  
 15 Q And you're not changing your opinion today, are you?  
 16 A I guess technically infeasible, if included in all of  
 17 John's costs, then yes, it would be something that  
 18 would be infeasible for my customers.  
 19 Q And this might just boil down to confusion of standards  
 20 but what you're basically saying is it's too expensive?  
 21 A Yes.  
 22 Q Technically it could be done with enough money.  
 23 A That's correct.  
 24 Q Okay. How long have you known about the requirement  
 25 for local number portability was going to be coming

1 along?  
 2 A Last summer to last fall in 2003 is when it became more  
 3 of an industry issue that we began discussing.  
 4 Q And is that when you started this investigation and  
 5 research that you talked about in the earlier Docket  
 6 that you talked about in your prefiled testimony?  
 7 A That's correct.  
 8 Q And I believe you described it as you did a good-faith  
 9 investigation as to the costs to implement LNP?  
 10 A We began looking at what it was going to take to put  
 11 LNP services in and all of the other processes and  
 12 procedures of implementation of the LNP service, that's  
 13 correct.  
 14 Q In implementing the LNP did you ever contact Western  
 15 Wireless concerning what could be done to lower costs  
 16 for implementation of LNP?  
 17 A No.  
 18 Q Now Western Wireless you would agree sent you a BFR in  
 19 November of last year; correct?  
 20 A I don't know for sure on the date. If you can refer me  
 21 to a page or document.  
 22 Q I've got a copy and I'll go ahead and mark it as --  
 23 MR. WIECZOREK: We've premarked for  
 24 the record Western Wireless 1 already so I'll mark  
 25 this as Western Wireless 2.

1 (Exhibit WWC 2 is marked for identification)  
 2 Q I'll show you what has been marked as Western Wireless  
 3 Exhibit No. 2. Do you remember receiving that letter?  
 4 A I do.  
 5 Q And probably the easiest way -- I'm going to also mark  
 6 your response as 3.  
 7 (Exhibit WWC-3 is marked for identification)  
 8 Q And your response to the BFR was that you were  
 9 currently reviewing the request and would respond  
 10 further when your review was complete. Did you ever  
 11 respond to Western Wireless?  
 12 A Once we determined what the cost and everything that  
 13 was going to be involved with the whole process was  
 14 going to be, we determined it was in our best interest  
 15 for the members of our cooperative to go forward with  
 16 filing a petition for suspension or modification.  
 17 Q Okay.  
 18 A I also listed there on my letter, "If you have any  
 19 questions concerning the matter, please do not hesitate  
 20 to contact me."  
 21 Q And Western Wireless did contact you, didn't they?  
 22 A I don't recall, to be honest with you.  
 23 Q Okay.  
 24 MR. WIECZOREK: Mark as Western  
 25 Wireless 4, please.

1 (Exhibit WWC 4 is marked for identification)

2 **Q** Do you remember receiving that letter, Western Wireless

3 Exhibit No. 4?

4 **A** I don't recall specifically, to be honest with you.

5 **Q** Okay. You don't recall receiving this letter in the

6 proposed agreement they had for LNP?

7 **A** Which letter specifically?

8 **Q** Exhibit No. 4, the December letter.

9 **A** I vaguely remember it, yes.

10 **Q** Okay. And you'll see that they invite you to contact

11 them at the bottom of that letter if you have any

12 questions or any thoughts on implementation of LNP;

13 correct?

14 **A** Yes. I do see that there.

15 **Q** You never contacted them.

16 **A** No. We continued our investigation.

17 **Q** Okay. So just so I have it straight, your thorough

18 good-faith investigation did not include contacting

19 Western Wireless who is requesting local number

20 portability?

21 **A** I think we felt we could figure out what was going to

22 be needed in regards to deploying service.

23 **Q** Okay. Now the deployment of the service that you have

24 proposed requires point of interconnection from every

25 one of your switches essentially to Western Wireless;

1 **A** Yes, it is.

2 **Q** I'm sorry. Who came up with that approach?

3 **A** I think through conversation with consultants and ITC

4 staff members, it was based on the way that the network

5 is deployed today and determined our costs on that

6 basis.

7 **Q** Do you understand -- well, have you reviewed the

8 testimony of anybody besides Mr. DeWitte in this matter

9 and Mr. Williams who you reference in your rebuttal?

10 **A** No, I did not.

11 **Q** Okay. But as far as Mr. DeWitte, his last rebuttal

12 testimony was a joint rebuttal testimony on behalf of

13 all the companies he's testifying for, did you know it

14 then?

15 **A** I guess I did not know that for sure.

16 **Q** Okay. In your conversations with any of your

17 contemporaries with the other Petitioners was it your

18 understanding they're all proposing the same type of

19 arrangement to provide local number portability?

20 **A** I'm not sure what they're all doing. We've been busy

21 with just trying to research our own costs.

22 **MR. WIECZOREK:** If I could, I'd move

23 for the admission of 2 through 4 at this time so I

24 don't have to do them all at the end.

25 **MS. POLLMAN ROGERS:** No objection.

1 correct?

2 **A** That is based on today's network, yes, and how we have

3 it deployed today.

4 **Q** Well, that's what your costs are based on; correct?

5 **A** No. Currently -- well, our costs are -- to answer the

6 question, yes, our costs are based on that type of a

7 deployment, but we currently have three T-1s from

8 Western Wireless into three of our exchanges right now

9 and one from Verizon into one of our exchanges.

10 **Q** And that would lower your cost on what you'd have to

11 expend to make numbers portable for Western Wireless?

12 **A** I guess I don't know. Depending upon what the rulings

13 come out of the Commission or the FCC, I would imagine,

14 who's going to pay for what transport costs.

15 **Q** But you would agree with me that the transport

16 arrangement that's been recommended where you get your

17 costs from that you've submitted here to the Commission

18 envisions a point of interconnect from every one of

19 your switches to Western Wireless and other cell

20 providers; correct?

21 **A** To my knowledge that's correct, yes. John DeWitte

22 would be the one to talk more on the cost issues.

23 **Q** Yeah. But this is all part of your investigation?

24 **A** Yes.

25 **Q** And that's how you understand --

1 **MR. SMITH:** Western Wireless

2 exhibits -- is there an objection from any other

3 party?

4 **MR. GERDES:** No objection. I was

5 waiting for Mr. Coit. No objection.

6 **MR. COIT:** No objection.

7 **MR. SMITH:** Western Wireless

8 Exhibits 2 through 4 are admitted.

9 (Exhibit WWC 5 is marked for identification)

10 **MR. WIECZOREK:** This would be

11 Western Wireless 5.

12 **Q** Mr. Heiberger, the routing proposed by Interstate as

13 we've discussed would require an interconnect from

14 every one of your host or end offices to each cell

15 company. You understand that?

16 **A** Yes.

17 **Q** And this essentially -- Mr. DeWitte proposed six

18 different companies in getting your cost analysis?

19 **A** That's my understanding.

20 **Q** He's listed three. Do you know what other companies --

21 have the other companies sent you BFRs?

22 **A** Not at this time. I guess I'm not sure who the other

23 companies are, RCC, Nextel. I forget the other one.

24 **Q** Well, RCC isn't even licensed throughout your entire

25 area, are they?

1 A I believe they do not cover maybe a few of our south  
2 exchanges.

3 Q Okay. Look at page 2 of that document, that exhibit.

4 A Okay.

5 Q Now you've read Mr. Williams' testimony?

6 A Yes.

7 Q And you understand from Mr. Williams' testimony this is  
8 essentially the proposal that Western Wireless is  
9 putting forth for routing; correct?

10 A To tandem through some of the offices, yes.

11 Q Okay. Now this -- I have a couple of questions on this  
12 and maybe you can clarify. Mr. DeWitte's testimony,  
13 and this is only if you know. I can always ask this of  
14 Mr. DeWitte. But his install cost for these point of  
15 interconnects is 576,000 in both your petition and his  
16 direct but however it jumps to 720,000 in his rebuttal  
17 testimony with no explanation. Do you know why that  
18 is?

19 A I do not.

20 Q Okay.

21 A I'd prefer he answer that question.

22 Q Certainly. And then there's a monthly cost of \$165,870  
23 and that's your monthly charge for every one of those  
24 points of interconnect; correct?

25 A That's my understanding yes, based on what he put

1 together for us.

2 Q In doing this thorough good-faith investigation, is  
3 this the most cost-effective means you could come up  
4 with?

5 A Based on today's network, yes, and how it's deployed.

6 Q Okay. You guys go over into Minnesota; right? You  
7 have exchanges into Minnesota?

8 A That's correct.

9 Q And your network in Minnesota is substantially the same  
10 as it is in South Dakota?

11 A We have two offices, two exchanges in Minnesota.

12 Q But your exchanges are set up the same way; right?

13 A Yes, it is. Yes, they are.

14 Q Technically not much difference -- well, not any  
15 difference between Minnesota and South Dakota?

16 A Other than where they've got to terminate calls to, I  
17 would imagine, or connect to.

18 Q You're a member in South Dakota of SDTA; correct?

19 A That's correct.

20 Q And SDTA, the rural LECs use SDTA to help keep their  
21 costs down, don't they? Sometimes they use SDTA to do  
22 a joint filing or even negotiate interconnect  
23 agreements with one carrier?

24 MS. POLLMAN ROGERS: I'm going to  
25 object to that question as beyond the scope of

1 direct and rebuttal testimony.

2 MR. SMITH: Overruled.

3 Q Isn't it true that you used SDTA to negotiate your  
4 interconnect agreements with Western Wireless?

5 A That's correct.

6 Q Okay. And you guys do that to keep your costs down;  
7 right?

8 A Yes.

9 Q Okay. And you're also a member in Minnesota of a  
10 similar organization called Minnesota Independent  
11 Coalition, sometimes called MIC?

12 A That's correct.

13 Q And that's a similar organization to Mr. Coit's  
14 organization here in South Dakota; correct?

15 A Very similar, yes.

16 Q And what MIC does is they do many of the same things,  
17 they might negotiate an Interconnection Agreement with  
18 Western Wireless on behalf of all of its members in  
19 Minnesota; right?

20 MS. POLLMAN ROGERS: Could I please  
21 have a continuing objection to this line? This is  
22 way beyond the scope of his direct and rebuttal  
23 testimony.

24 MR. SMITH: You may have an  
25 objection. However, I'm going to overrule it and

1 let him go on for a little while and hopefully,  
2 Talbot, you'll bring it around to something we're  
3 talking about here.

4 MR. WIECZOREK: Okay. I'll get to  
5 it. I'll get to it right now.  
6 (Exhibit WWC 6 is marked for identification)

7 Q That's Western Wireless number 6. Could you just take  
8 a quick look through that, Mr. Heiberger.  
9 (Witness examines document)

10 A Okay.

11 Q You note on the first page of that document that's a  
12 public document that's been filed with the Minnesota  
13 Public Utilities Commission?

14 A That's correct.

15 Q Now before we get into that document I'd like to ask  
16 you just a couple more questions about that Interstate  
17 filing and the numbers that are on Exhibit No. 5. Your  
18 install costs, and I'm going to ask Mr. DeWitte why  
19 it's 720 in his recent -- but let's just use his old  
20 numbers, the 576. That's what you'd pay out the first  
21 year just to install all of those points of  
22 interconnect; correct?

23 A I would have to defer that to John, Mr. DeWitte.

24 Q You understand that's your install costs as represented  
25 on that?

1 A Yes.

2 Q And then Mr. DeWitte has set forth a monthly cost of

3 approximately 165,000; correct?

4 A That's correct.

5 Q So if that's a monthly cost, in the first year alone

6 you would spend close to \$2 million just to service

7 LNP; correct?

8 A That would be correct.

9 Q And you pride yourself on being efficient and

10 cost-effective, don't you?

11 A That's correct.

12 Q Okay. Now let's take a look at Western Wireless No. 6.

13 Now just as a point of reference for your ease, there's

14 actually fax page numbers at the top, and I'm going to

15 refer to those even though it starts with page 2.

16 Number 1 would have been a fax cover sheet, when we go

17 to pages, if that's all right?

18 A Sure.

19 Q If you look and go to first page number 20, it's

20 Exhibit 1 to this public filing, and on the left-hand

21 side about three-fourths of the way down it lists

22 Interstate Telecom Co-op, Inc., Minnesota. That's your

23 company, isn't it?

24 A It is but we're not to be listed in this filing.

25 Q But you are listed in this filing; correct?

1 A It's listed here but we're not supposed to be.

2 Q So let's go back to the first page again of the

3 document. The first page of the document actually

4 represents that the member companies of Minnesota

5 Independent Coalition listed on Exhibit 1 submit this

6 petition. That's what this petition says; correct?

7 A That's correct.

8 Q Okay.

9 A It's to my knowledge we weren't supposed to be in this

10 Docket.

11 Q Well, let's go to page 9 of this exhibit.

12 MS. POLLMAN ROGERS: I'm going to

13 continue to object to this line of questioning on

14 several grounds. Number one, it is beyond the

15 scope of the prefiled testimony in this Docket.

16 Number two, the witness has just testified to his

17 knowledge he was not to be included in this

18 document, and, number three, it's not relevant as

19 to what's happening in Minnesota so I object.

20 MR. WIECZOREK: Frankly, I think

21 it's very relevant. This is cross-examination. He

22 has testified that -- I'm sorry. He has testified

23 that they can't afford this, that it's too

24 expensive, that they have to follow this program to

25 get it done right. And I think I'm entitled to

1 cross-examine him how where his name, his company

2 name appears in a filing in Minnesota, whether he

3 says it's supposed to be there or not, it's

4 represented by MIC council that he's supposed to be

5 on this filing in this public document and I think

6 I'm entitled to cross-examine him on the difference

7 between what they're doing in Minnesota and what

8 they say is viable in Minnesota and what they're

9 trying to tell this Commission is not viable here.

10 MR. SMITH: The objection is

11 overruled.

12 Q Go to page 9 using the fax numbering up at the top.

13 Have you found it?

14 A Yes.

15 Q The last paragraph -- not full paragraph but that

16 begins on that page -- well, let's preface this way.

17 You said you've done a full investigation on what's the

18 most cost-effective manner to do local number

19 portability; correct?

20 A To the best of our abilities, yes.

21 Q Okay. Would you please read out loud the first two

22 sentences in that paragraph?

23 A Starting with, "The companies" --

24 Q Yes.

25 A -- "using centralized equal access have analyzed and

1 investigated how calls to local numbers ported to CMRS

2 providers could be routed, for those networks where

3 there are neither direct connections nor EAS

4 connections, without being rated as toll calls. The

5 companies believe this can be accomplished efficiently

6 and cost-effectively if such calls are routed via the

7 same facilities used by the CMRS providers to deliver

8 their traffic to the companies and at rates comparable

9 to TELRIC rates charged by Qwest to CMRS providers for

10 the same service."

11 Q Now if we look back at Exhibit No. 5, the second page.

12 A Okay.

13 Q The Western Wireless proposed routing, that is the

14 routing -- that routing as exists on page 2 of

15 Exhibit 5 is the same type of routing they're

16 discussing in that section of the MIC petition you just

17 read, isn't it?

18 A I believe so.

19 Q And the companies -- and here they're referring to

20 companies and you're listed on Exhibit 1 and those are

21 the companies that this petition has been filed for,

22 whether you contest you should have been included or

23 not, it says those companies feel that local number

24 portability can be accomplished effectively and cost --

25 excuse me, companies believe that local number

1 portability, and I'm going to quote "can be  
 2 accomplished effectively and cost efficiently" using  
 3 that type of routing, that type being page 2 of Exhibit  
 4 5; correct?  
 5 A It appears so, yes.  
 6 Q I'd like you to go back one page on that document.  
 7 Excuse me, on the Order, No. 6. The paragraph  
 8 that's --  
 9 A Page 6? I'm sorry.  
 10 Q No. Exhibit 6, page 8 using the fax pages.  
 11 A Page 8. Exhibit 6, page 8?  
 12 Q Correct.  
 13 A Okay.  
 14 Q The middle paragraph on that page, I'd like you to read  
 15 that middle paragraph out loud, please.  
 16 A "Companies have been diligently working to put in place  
 17 the many facility upgrades and contractual arrangements  
 18 needed to support wireless LNP. In doing so they have  
 19 also attempted to address a critical issue in wireless  
 20 LNP implementation which the FCC has not yet resolved:  
 21 How can calls be routed and rated local when the CMRS  
 22 provider has no point of interconnection in the LEC's  
 23 network? The FCC requires that ported numbers remain  
 24 rated to their original rate center even while the  
 25 routing of calls will change when a number is ported.

1 However, in the absence of direct connections, very  
 2 frequently the only facilities available to the rural  
 3 companies in order to route calls to numbers ported to  
 4 a CMRS provider are access tandem trunk facilities."  
 5 Q And you would agree that last sentence that's the same  
 6 here in South Dakota is that there's an absence of  
 7 direct connections and the facilities available are the  
 8 rural companies to route calls to the numbers ported to  
 9 a CMRS provider that exists today are the access tandem  
 10 trunk facilities; correct?  
 11 A So you're talking about the trunk facilities to Qwest  
 12 which are one-way?  
 13 Q Yes. They're one-way in Minnesota, aren't they?  
 14 A They're one-way in Minnesota at this time, yes.  
 15 Q Right. They're one-way in South Dakota right now,  
 16 aren't they?  
 17 A That's correct.  
 18 Q Okay. And you understand this MIC filing all they're  
 19 asking for is Qwest make those two-way trunks; correct?  
 20 A With reduced rates for transiting, as I understand it.  
 21 Q Right.  
 22 A But I'm not to be involved in that filing.  
 23 Q Yeah. But MIC thinks this is the most cost-effective,  
 24 efficient means in which to route LNP in Minnesota;  
 25 correct?

1 A As I understand it, yes.  
 2 Q And let's address that issue that you said they want a  
 3 better price. If you go to page 6 -- excuse me, page  
 4 10 on the fax page, the bottom paragraph, the last part  
 5 of the page, why don't you just read that to yourself  
 6 quick.  
 7 (Witness examines document)  
 8 CHAIRMAN SAHR: Mr. Wiczorek, last  
 9 full paragraph or last partial?  
 10 MR. WIECZOREK: Last partial. I'm  
 11 sorry.  
 12 A Okay.  
 13 Q Are you finished with that?  
 14 A Okay.  
 15 Q Okay. So you'd agree that at least represented by MIC  
 16 to Minnesota Public Utilities Commission is essentially  
 17 that the price differential is essentially nine-tenths  
 18 of a cent versus 1.6 of a cent; correct?  
 19 A Correct.  
 20 Q And if this -- let's talk about making an access tandem  
 21 two-way with Qwest. What would that cost?  
 22 A I guess I'm not sure.  
 23 Q It doesn't have to be perfect. Just give me a range.  
 24 MS. POLLMAN ROGERS: I object to  
 25 that. It's asked and answered. He doesn't know.

1 MR. SMITH: Sustained.  
 2 Q You're not contending to this Commission that making  
 3 access tandem two-way costs over a half a million  
 4 dollars, are you?  
 5 MS. POLLMAN ROGERS: Same objection.  
 6 He's answered the question.  
 7 MR. SMITH: Do you know?  
 8 THE WITNESS: I don't know what it  
 9 would cost for sure.  
 10 MR. SMITH: Sustained.  
 11 Q I'll ask it this way and see if it draws an objection.  
 12 Give me a range. Do you know what range it would be  
 13 in?  
 14 A No.  
 15 Q Well, you said you performed an in-depth investigation  
 16 as to how to provide LNP and now you're sitting here  
 17 telling this Commission you haven't even talked to  
 18 Qwest about what it would cost to make a tandem  
 19 two-way?  
 20 A That's correct.  
 21 Q Would it surprise you if that cost is less than \$5,000?  
 22 A I really don't know what it would cost in all of our  
 23 switches to make things two-way.  
 24 Q Okay. You'd only have to do the access tandem two-way,  
 25 the same way you're already routing your traffic to

1 Western Wireless; right? You don't have to make every  
 2 tandem two-way, only the ones Western Wireless is  
 3 routing traffic to --  
 4 **A** I believe -- I guess I don't know for sure. I believe  
 5 that's correct.  
 6 **Q** Okay. Let's just assume it's \$5,000 to make that  
 7 switch two-way. You'd agree with me that's a much more  
 8 cost-effective way than spending \$576,000 to install  
 9 points of interconnect between every cell provider who  
 10 might send you a BFR, wouldn't you agree?  
 11 MS. POLLMAN ROGERS: I'm going to  
 12 object to that. There's no foundation for that  
 13 question to this witness.  
 14 MR. WIECZOREK: I'm asking a  
 15 hypothetical.  
 16 MS. POLLMAN ROGERS: Lack of  
 17 foundation.  
 18 MR. SMITH: I think it was stated as  
 19 a clear hypothetical. To the extent that it's  
 20 hypothetical, it's overruled.  
 21 **A** Could you repeat it again.  
 22 **Q** I'm sorry. You would agree assuming your costs would  
 23 only be \$5,000 to make that access tandem two-way that  
 24 that would be much more cost-effective to make that  
 25 access tandem two-way than to spend \$575,000 on

1 proposals Mr. Williams used were in bad faith. You  
 2 used that term "bad faith." Do you recall that?  
 3 **A** Could you direct me to those pages?  
 4 **Q** Sure. It's your rebuttal testimony, which is 2 or 3.  
 5 MS. POLLMAN ROGERS: Exhibit 2.  
 6 **Q** Exhibit 2. Not Western Wireless's but your Exhibit 2.  
 7 If you look at page 2, line 12, you're talking about  
 8 the way that Western Wireless is proposing to route  
 9 direct traffic, which you've testified is the same way  
 10 that MIC is saying is the most cost-effective way in  
 11 Minnesota, but at line 12 you say that that proposal is  
 12 really a bad-faith attempt to change the agreement  
 13 between the parties. Do you see that?  
 14 **A** Yeah. We're talking about the Interconnection  
 15 Agreement, as I understand it.  
 16 **Q** Uh-huh.  
 17 **A** Uh-huh.  
 18 **Q** Well, you're talking in that answer about Western  
 19 Wireless's response to use the traffic terminating --  
 20 to use the interexchange carrier for the traffic  
 21 terminating being a bad-faith negotiation tool?  
 22 **A** It's my understanding traffic is part of the  
 23 Interconnection Agreement.  
 24 **Q** Well, so are you saying that you went back and just  
 25 modified the agreement and renegotiated the agreement

1 installing points of interconnect between every one of  
 2 your switches and six cellular companies which are  
 3 hypothetical?  
 4 **A** Yeah. We based our costs off of the way the network  
 5 was employed currently.  
 6 **Q** Yeah. That's an interesting statement because you said  
 7 you read Mr. DeWitte's testimony where he says  
 8 essentially, well, we don't have that agreement with  
 9 Qwest so Western Wireless's routing won't work because  
 10 there's no agreement. Do you remember that testimony?  
 11 **A** I don't.  
 12 **Q** All right. I'll save that for Mr. DeWitte.  
 13 Essentially if you had dual access tandem then your  
 14 monthly recurring costs would only be your permanent  
 15 use charge; correct?  
 16 **A** Getting into a lot of technical stuff I would defer to  
 17 John DeWitte on.  
 18 **Q** So you're saying you don't know?  
 19 **A** I would prefer he would answer the question.  
 20 **Q** But I'm asking you so if you know, you have to answer.  
 21 **A** No.  
 22 **Q** Do you understand that?  
 23 **A** I do not know.  
 24 **Q** Well, you said in your rebuttal testimony that some of  
 25 the numbers that Mr. Williams used and some of the

1 that you would provide LNP under the routing proposed  
 2 by Western Wireless in this testimony?  
 3 **A** No. I'm just stating that as part of the  
 4 Interconnection Agreement that we have in place right  
 5 now.  
 6 **Q** Let's go back to Exhibit No. 6 which is still in front  
 7 of you there. Go to page 11 as the fax numbers are on  
 8 the top. This is what the companies are requesting,  
 9 MIC's requesting the companies, at least MIC and its  
 10 attorneys represent you're one of those companies.  
 11 That last partial paragraph, could you read that first  
 12 sentence that sets forth what relief they're requesting  
 13 in Minnesota?  
 14 **A** "The companies anticipate that if the scope of  
 15 negotiations are narrow as requested and proceed on the  
 16 basis of nondiscriminatory rates, these matters could  
 17 be completed by July 30, 2004".  
 18 **Q** The next sentence, please.  
 19 **A** "This is an extension of 67 days from the May 24 WLNP  
 20 implementation date."  
 21 **Q** Now you're actually asking for suspension for a minimum  
 22 of six months; correct?  
 23 **A** That's correct.  
 24 **Q** But in Minnesota they can do it in a much shorter time?  
 25 **A** Well, our suspension in Minnesota gives us six months

1 also. We have our own individual suspension over here.  
 2 That's why we're not supposed to be party to the  
 3 proceedings.  
 4 Q But your name appears in the MIC proceedings?  
 5 A I don't know why or how it does.  
 6 Q And technologically what Western Wireless is proposing  
 7 is what the MIC proceedings is proposing; correct?  
 8 A To my understanding at this time, yes.  
 9 Q Okay. Will you go to page 13 of that exhibit by the  
 10 fax numbers. Now if you go to the bottom paragraph  
 11 it's a partial paragraph, could you read the second  
 12 sentence in it, please.  
 13 A "Companies have sought to develop a way of routing  
 14 calls to CMRS-ported numbers which is technically  
 15 sound, efficient, and not unduly economically  
 16 burdensome."  
 17 Q Okay. So you would agree this is a conclusion that MIC  
 18 has reached that porting numbers the way Western  
 19 Wireless has proposed is technically sound, efficient,  
 20 and not unduly economically burdensome?  
 21 A If the MIC proposal is exactly what Western Wireless is  
 22 proposing then yes, I would.  
 23 Q Okay. Turn to the next page in that same exhibit.  
 24 A Page 14?  
 25 Q Yes. That first full paragraph starting with the

1 second sentence, could you read the second sentence,  
 2 please?  
 3 A Where it starts "As noted"?  
 4 Q No. Where it says "The companies." The first full  
 5 paragraph, page 14. I'll just show it to you. I'm  
 6 asking you to start with the second sentence.  
 7 A "Companies could not reasonably be expected to pursue  
 8 installation of direct trunks to CMRS providers as a  
 9 method of traffic routing, when facility costs are so  
 10 high and it is unknown who will bear the costs."  
 11 Q What they're talking about is the type of routing  
 12 proposal you submitted to this Commission; correct?  
 13 A Yes.  
 14 Q And that's what MIC calls -- they refer to that routing  
 15 type of situation as so high that it's essentially  
 16 unreasonable; correct?  
 17 A Yes.  
 18 Q Okay. That next sentence starting with "Rather," could  
 19 you read that next sentence?  
 20 A "Companies have focused" --  
 21 MS. POLLMAN ROGERS: Excuse me a  
 22 minute. At this point I'm going to interpose  
 23 another objection but could I please ask the  
 24 witness a couple of questions for the purposes of  
 25 objection?

1 MR. SMITH: Please proceed.  
 2 MS. POLLMAN ROGERS: Mr. Heiberger,  
 3 were you to your knowledge a party to this action?  
 4 THE WITNESS: I knew my name was  
 5 listed on this thing but I talked to legal counsel  
 6 in Minnesota and said, What am I doing on that, and  
 7 they said, Well, let's see what we've got to do to  
 8 get it off beings I already have a suspension over  
 9 there.  
 10 MS. POLLMAN ROGERS: In fact, you  
 11 did petition separately and on your own for a  
 12 petition in a different Docket than this in  
 13 Minnesota; is that correct?  
 14 THE WITNESS: That's correct.  
 15 MS. POLLMAN ROGERS: To your  
 16 knowledge they were taking what steps they could to  
 17 remove you from this Docket?  
 18 THE WITNESS: That's my  
 19 understanding.  
 20 MS. POLLMAN ROGERS: Did you follow  
 21 or in any way participate in these proceedings?  
 22 THE WITNESS: I received the  
 23 document and read this document.  
 24 MS. POLLMAN ROGERS: That's when you  
 25 called and requested to be withdrawn?

1 THE WITNESS: Yeah. I got ahold of  
 2 legal counsel over there.  
 3 MS. POLLMAN ROGERS: I'm going to  
 4 object to the continued references to this Docket  
 5 with this witness because he was not knowingly a  
 6 party to it, asked to be withdrawn and he had his  
 7 own Docket and filing in Minnesota separate from  
 8 this so this does not affect him.  
 9 MR. WIECZOREK: If I may.  
 10 MR. SMITH: Response.  
 11 MR. WIECZOREK: He's already  
 12 testified that MIC's an equivalent of SDTA. SDTA  
 13 is here. He's a member of MIC. The information  
 14 being provided by MIC is directly opposite of what  
 15 they're having this Commission try to believe and I  
 16 think that I'm eligible to cross-examine him and  
 17 I'm eligible to cross-examine any specific cost  
 18 expert that's been to Minnesota or does work in  
 19 Minnesota on this and I'm entitled to cross-examine  
 20 using these documents anybody who's a member of MIC  
 21 quite frankly.  
 22 MR. SMITH: Well, if he's not a  
 23 party to the Docket, it isn't a document that  
 24 pertains to him. Is that --  
 25 CHAIRMAN SAHR: May I ask

1 Mr. Wieczorek a question, though?  
 2 MR. SMITH: Uh-huh.  
 3 CHAIRMAN SAHR: You're not offering  
 4 this to say he necessarily has signed on this  
 5 document. My understanding, at least what I can  
 6 ascertain where you're going is you are going as to  
 7 cost issues and what's economically feasible and  
 8 that is why you're using this Minnesota Docket for  
 9 more of a cross-examination as to cost, not  
 10 necessarily saying Mr. Heiberger agrees what's in  
 11 it or disagrees or was a party to this; is that  
 12 correct?  
 13 MR. WIECZOREK: That is correct.  
 14 And the Petitioner represents that it is a party  
 15 but it is cross-examination and they have proposed  
 16 to the Commission that they must follow this direct  
 17 interconnect that costs over a half a million  
 18 dollars, \$576,000, as being the only way to do  
 19 this. So I think I'm entitled as a member of --  
 20 even just solely based on his membership with MIC  
 21 to say -- to examine him. All of his other MIC  
 22 patriots in Minnesota have come to the direct  
 23 opposite conclusion and they have endorsed  
 24 essentially the same structure that Western  
 25 Wireless has proposed here.

1 MS. POLLMAN ROGERS: If this is a  
 2 general cost objection, as Chairman Sahr has said,  
 3 then the Western Wireless will have an opportunity  
 4 to present this and cross against the -- or direct  
 5 it to the cost consultants. But I do not think  
 6 that it's proper to address this to this witness  
 7 because he has stated that -- and just because he's  
 8 a member of MIC does not mean that he was a party  
 9 to this action and he had another action pending, a  
 10 separate Docket in Minnesota. And so, therefore, I  
 11 think that this line of questioning on  
 12 cross-examination is out of line with regard to  
 13 this witness.  
 14 CHAIRMAN SAHR: I would think that  
 15 you could probably use something from the state of  
 16 Georgia for that matter for getting to whether or  
 17 not something's feasible. Certainly he can say I  
 18 don't know or you can have your cost expert explain  
 19 why it's a bogus argument in your opinion but is it  
 20 not relevant to look at other cost comparisons when  
 21 he has -- again, I'm not commenting on the merit of  
 22 this cross-examination, strictly on whether or not  
 23 it's a legitimate review of another feasible or  
 24 potential cost method.  
 25 MS. POLLMAN ROGERS: And I'm not

1 trying to argue with you here. I understood  
 2 Mr. Wieczorek to say that he was asking him as a  
 3 member of Minnesota whatever it is, MIC, and I  
 4 think that he is specifically -- the witness has  
 5 clearly pointed out that he was not a party to this  
 6 action and that he had his own separate Docket.  
 7 And so, therefore, I don't think that to  
 8 question him as a member of MIC or because he was a  
 9 member of MIC on these specifics in a Docket that  
 10 he specifically tried to withdraw from is an  
 11 appropriate line of cross-examination. If we're  
 12 going to talk about costs and attack those, then  
 13 they can go to other witnesses that will be  
 14 presented later and Western Wireless will have  
 15 plenty of opportunity to pursue that.  
 16 CHAIRMAN SAHR: Do they have another  
 17 cost witness? Is it Mr. DeWitte?  
 18 MS. POLLMAN ROGERS: Yes.  
 19 CHAIRMAN SAHR: Would you think that  
 20 it would be appropriate to ask Mr. DeWitte that?  
 21 MS. POLLMAN ROGERS: I'm not going  
 22 to concede that at this point.  
 23 CHAIRMAN SAHR: I don't mean to  
 24 belabor the point but surely they can cross-examine  
 25 people on what costs they put forward and say

1 there's different methodology. Again, I'm not  
 2 assuming this is a good or bad way of doing this or  
 3 anything else other than to say I think on  
 4 cross-examination it's pretty much fair game to say  
 5 you could do it more cheaply or more cost  
 6 effectively and here's an example they did that.  
 7 MS. POLLMAN ROGERS: I think that's  
 8 an issue, and I guess I would have to hear the  
 9 questions as they come in order to respond to that.  
 10 MR. SMITH: I'm going to sustain the  
 11 objection to the extent -- or recommend sustaining  
 12 the objection to the extent that the testimony is  
 13 in any way attempting to show that ITC somehow  
 14 estopped itself or represented in an alternative  
 15 proceeding a contrary technical methodology for  
 16 achieving LNP.  
 17 To the extent that you're using the document  
 18 merely as a way of showing an alternative solution  
 19 to that which the Petitioner has proposed, and,  
 20 again, keeping the questions within his area of  
 21 competence to which you can freely object, I think  
 22 the document -- I'm going to allow questions using  
 23 this document for that purpose.  
 24 Q We were on page 14 and I was asking you to read the  
 25 sentence that starts with "Rather." Could you read

1 that, please, out loud?  
 2 MS. POLLMAN ROGERS: Just a minute.  
 3 I have one other issue here and that is that it's  
 4 my understanding that this document has not been  
 5 admitted into evidence and, therefore, there is no  
 6 foundation for this line of questioning based on  
 7 this document.  
 8 MR. WIECZOREK: Okay. I'll ask the  
 9 foundational questions.  
 10 MR. SMITH: Please proceed.  
 11 Q You stated earlier you got a copy of this document  
 12 based on your membership with MIC; correct?  
 13 A I believe this is the one I've received, yes.  
 14 Q Right. You saw your name on Exhibit 1?  
 15 A Yes.  
 16 Q So this is a document you've seen before and it's true  
 17 and correct, isn't it?  
 18 A I guess from what I've seen.  
 19 MS. POLLMAN ROGERS: I object. I  
 20 don't think that's proper foundation, and I don't  
 21 think this witness has the requisite qualifications  
 22 to establish foundation for this document.  
 23 MR. WIECZOREK: It's a public  
 24 document and the Commission can take public notice  
 25 of it too. He's already testified he received a

1 copy of this document and then he called and asked  
 2 his name be removed. There's no question of  
 3 authenticity.  
 4 MR. SMITH: Well, again, I think the  
 5 other thing is I'm going to address the foundation  
 6 thing really quick. I don't think the witness is  
 7 being asked whether this particular document states  
 8 technical facts that are true or false. He's just  
 9 being asked whether -- if it's true and based upon  
 10 this particular presentation by an organization in  
 11 Minnesota would that present an alternative,  
 12 assuming those facts to be true.  
 13 MS. POLLMAN ROGERS: I understood  
 14 Mr. Talbot's question. Again, I'm not trying to  
 15 belabor the point but I understood Mr. Talbot asked  
 16 him about the truth and accuracy of this document  
 17 by way of foundation.  
 18 MR. WIECZOREK: Well, he received a  
 19 copy of it. You're not claiming that I forged  
 20 something on it, are you, Mr. Heiberger?  
 21 THE WITNESS: No. Not to my  
 22 knowledge. I haven't read it all. I can't imagine  
 23 that you did.  
 24 CHAIRMAN SAHR: I didn't know you  
 25 went to law school.

1 MR. SMITH: I'm going to let you ask  
 2 the witness a couple of questions. If he doesn't  
 3 possess the requisite ability to know, I will  
 4 consider sustaining the objection with respect to  
 5 him.  
 6 MS. POLLMAN ROGERS: Mr. Heiberger,  
 7 do you have any personal knowledge of whether or  
 8 not this was a Docket that was filed in Minnesota?  
 9 Do you have any personal knowledge? Did you file  
 10 it?  
 11 THE WITNESS: No.  
 12 MS. POLLMAN ROGERS: Did you prepare  
 13 it?  
 14 THE WITNESS: No.  
 15 MS. POLLMAN ROGERS: It's not  
 16 your --  
 17 THE WITNESS: I received a copy of  
 18 it.  
 19 MS. POLLMAN ROGERS: But beyond  
 20 that, you don't know what happened with this --  
 21 THE WITNESS: No.  
 22 MS. POLLMAN ROGERS: -- proceeding  
 23 or this document in Minnesota; is that correct?  
 24 THE WITNESS: That's correct.  
 25 MS. POLLMAN ROGERS: I'm going to

1 continue to object on the basis of foundation. He  
 2 does not have the qualifications to lay the proper  
 3 foundation to enter this exhibit.  
 4 CHAIRMAN SAHR: I don't think  
 5 they're entering the exhibit, though.  
 6 MR. WIECZOREK: Well, I will move  
 7 it.  
 8 MR. SMITH: Are you going to move it  
 9 based on his foundation?  
 10 CHAIRMAN SAHR: I think there you  
 11 may have a point. The question of whether you can  
 12 cross-examine him on it, I think you can probably  
 13 cross-examine on it subject to the question of  
 14 whether it should be admitted.  
 15 MS. POLLMAN ROGERS: I was under the  
 16 impression he offered it and that's where the  
 17 questions were -- I'm objecting to the foundation.  
 18 CHAIRMAN SAHR: But not use of the  
 19 document.  
 20 MS. POLLMAN ROGERS: I'm objecting  
 21 to continued use of the document in the proceeding  
 22 in absence of proper foundation and there isn't  
 23 any.  
 24 CHAIRMAN SAHR: Well, isn't it one  
 25 thing to get into evidence and a separate thing

1 whether or not he can ask him, do you agree with  
2 this statement, whether it was from Minnesota or  
3 off the top of his head?

4 MS. POLLMAN ROGERS: But again, I'm  
5 not trying to belabor the point but I don't believe  
6 that that's the line that this cross-examination  
7 has taken. He has asked him to read specific  
8 portions from this document verbatim. That's  
9 different than general questions about a proceeding  
10 in Minnesota in general or a proceeding in some  
11 other state.

12 And I think when we're talking about specific  
13 references to the Docket and asking the witness  
14 about that, that exhibit needs to be offered into  
15 evidence and there isn't a proper foundation and in  
16 absence of that there's not a foundation, proper  
17 foundation for this line of questioning. That's  
18 the basis for my objection.

19 CHAIRMAN SAHR: But I don't believe  
20 he's asking that -- and I'm not going to jump in  
21 here on this any further -- well, but, no, it's a  
22 significant point. I think he's having him read  
23 the part of the record and then saying do you agree  
24 with this or is this correct, which is different  
25 than saying that you -- and asking him questions

1 based on that. He's not asking him to have that  
2 become part of the record in and of itself, and if  
3 he does, I think you can make a foundation  
4 objection at that point.

5 MS. SISAK: I'm not sure I  
6 understand, but are you suggesting that just the  
7 parts of this document that are read by  
8 Mr. Heiberger would be in the record and the rest  
9 of the document would not?

10 CHAIRMAN SAHR: I don't think it's  
11 in the record other than a hypothetical. I think  
12 it's -- at this point in time unless he can get it  
13 admitted.

14 MS. POLLMAN ROGERS: But that's not  
15 the way the questioning has taken place. It's not  
16 taken place as a hypothetical. That's the basis of  
17 my objection.

18 CHAIRMAN SAHR: Isn't he asking him  
19 whether he agrees or disagrees with him?

20 MS. POLLMAN ROGERS: I think the  
21 questions have gone beyond that. I really do. So  
22 then what do we have in the record? We have bits  
23 and pieces of something for which there's  
24 inappropriate foundation entered into the record.

25 CHAIRMAN SAHR: Well, I think the

1 hypothetical question can be part of the record. I  
2 don't think the underlying evidence, though, that  
3 it's based on comes in unless it's admitted. I  
4 think you are correct, I think that would not be  
5 part of the record unless it's admitted on its own.

6 MS. SISAK: So the fact he's only  
7 selectively had Mr. Heiberger read from the record,  
8 we would then be forced to introduce this in  
9 evidence to try to rebut the questions that we feel  
10 may be improper?

11 MR. GERDES: Mr. Chairman, I object.  
12 I think the rule is one lawyer per witness.

13 MS. SISAK: I withdraw my question.

14 CHAIRMAN SAHR: Maybe I'm trying to  
15 define this too narrowly but what I would think is  
16 if he's asking a hypothetical or a question or  
17 saying here is one way that it could work, could it  
18 not, I would think that that would be acceptable no  
19 matter what it's based on. Now if he's trying to  
20 get that particular statement into the evidence  
21 other than as a question from an attorney, then I  
22 agree with you. I don't think Mr. Heiberger  
23 reading into it makes it part of the record, so to  
24 speak, other than in terms of here is your  
25 hypothetical question.

1 So I think there's -- I think I'm agreeing  
2 with you in a roundabout way.

3 MR. SMITH: Well, if that's what the  
4 Chairman thinks, that's must be what I think.

5 CHAIRMAN SAHR: Should we go into  
6 executive session on it?

7 MR. SMITH: I don't think so. I'm  
8 going to allow the questioning to proceed again  
9 with -- I think I already stated this before, with  
10 this document just basically being a template for  
11 framing questions to the witness.

12 But I would state, Mr. Heiberger, please don't  
13 feel the need to answer questions that you don't  
14 know the answer to. Say I don't know. You know,  
15 if you don't know whether the assumptions implicit  
16 in a question are -- if you don't know whether they  
17 are true or not true, then I would appreciate it if  
18 you did not answer the question.

19 THE WITNESS: Okay.

20 CHAIRMAN SAHR: And I would add one  
21 other thing too. I think if it is going to be  
22 entered as part of the record, then I clearly think  
23 when it gets outside the scope of hypothetical I  
24 would encourage you to restate your objection at  
25 that point to the foundation. But I think if it's

85

1 strictly being used as a means of posing  
 2 hypothetical questioning, then I think it probably  
 3 is fair game to ask him.  
 4 Now again, as Mr. Smith said, if he doesn't  
 5 know the answer, there's nothing wrong with saying  
 6 I don't know and then he can ask Mr. DeWitte or  
 7 somebody else that same question.  
 8 **Q** I'm trying to remember exactly where I was,  
 9 Mr. Heiberger. Just as a way of clarification, of the  
 10 conversations since submitting testimony it was my  
 11 understanding from your earlier testimony that you said  
 12 you received a pleading showing that a petition had  
 13 been filed on your behalf from the MIC council and you  
 14 called the MIC council and asked them to take you off;  
 15 correct?  
 16 **A** I called ITC's legal counsel in Minnesota plus one of  
 17 the consultants in Minnesota and said, What am I doing  
 18 on this.  
 19 **Q** And that was after you had gotten a copy of a pleading  
 20 showing that you were on this petition that we've been  
 21 talking about?  
 22 **A** That's correct. And I think it was even after we had  
 23 gotten our suspension.  
 24 **Q** Okay. Let's go back then to page 14 where I talk about  
 25 that first full paragraph, and I think I'm going to ask

86

1 you for the third time would you read the sentence that  
 2 starts "Rather"?  
 3 **A** "Rather the companies have focused on the eminently  
 4 reasonable solution by the CMRS providers to deliver  
 5 traffic to companies, the companies are" --  
 6 **Q** I'm sorry. Did you want to finish that paragraph?  
 7 **A** No.  
 8 **Q** That's your understanding of at least the companies  
 9 that want to be involved in this petition, that was  
 10 their conclusion that this was the most eminently  
 11 reasonable solution?  
 12 **A** Yes. That's what I understand.  
 13 **Q** And you disagree with that statement?  
 14 **A** Do I disagree with it?  
 15 **Q** Yeah.  
 16 **A** I think that the costs that we have shown here based on  
 17 our network architecture in South Dakota is one that's  
 18 too expensive for our customers.  
 19 **Q** Right. But you agree with me that the cost structure  
 20 you have proposed and submitted to this Commission  
 21 which is over \$2.6 million the first year just in  
 22 transport-related costs, install and monthly that  
 23 follows this must have a point of interconnection  
 24 between every one of your switches and six different  
 25 wireless companies; right?

87

1 **A** That's correct.  
 2 **Q** And you also agree that's not what MIC is proposing to  
 3 do in Minnesota; correct?  
 4 **A** That's my understanding. Yeah. MIC is proposing it a  
 5 different way.  
 6 **Q** And do you agree with me that the proposal that MIC is  
 7 making is the same that Western Wireless is making  
 8 here?  
 9 **A** I'm not sure if it's exactly the same.  
 10 **Q** If you'd turn to page 20 of that same document, you'll  
 11 see that that's the list of the members. You see that  
 12 it has a caption on the top and it reads, "The  
 13 following LECs have end offices which subtend the Qwest  
 14 access tandem but have one-way terminating trunks."  
 15 MS. POLLMAN ROGERS: I'm sorry.  
 16 What page are we on?  
 17 MR. WIECZOREK: 20 by the fax  
 18 numbers, upper right-hand corner. It's the Exhibit  
 19 1 to that.  
 20 **Q** And it continues and says, "LEC is working with Qwest  
 21 to reconfigure these one-way groups as two-way groups  
 22 to permit delivery of LEC WLNP ported traffic." Do you  
 23 see that?  
 24 **A** Yes, I do.  
 25 **Q** When they talk about the two-way ported traffic you're

88

1 talking about making the tandem switch run both ways;  
 2 is that correct?  
 3 **A** Making the trunk group work two ways.  
 4 **Q** You haven't had any conversations with Qwest concerning  
 5 what it would cost to make the trunk work two ways;  
 6 correct?  
 7 **A** That's correct. I have not.  
 8 **Q** And you haven't had any conversations with Qwest  
 9 regarding what they would charge you at a minute charge  
 10 to run the traffic both -- excuse me, when you're  
 11 sending it out?  
 12 **A** That's correct.  
 13 **Q** But you're in here testifying to this Commission that  
 14 LNP results in an undue economic burden on your  
 15 company, aren't you?  
 16 **A** Based on today's network, the way it's designed.  
 17 **Q** And when you say based on today's network, the way it's  
 18 designed, what you're saying is because you don't have  
 19 a contractual agreement with Qwest to run the traffic  
 20 the other way, you currently don't have an agreement to  
 21 do that so you can't?  
 22 **A** That plus we built our costs based on the way the  
 23 existing network in South Dakota is already deployed.  
 24 **Q** And that's the same way your network is deployed in  
 25 Minnesota?

89

1 A No. We don't have any dedicated 2-B connections in  
 2 Minnesota at this point in time.  
 3 Q Oh, so there is no direct connects with any cellular  
 4 companies in Minnesota at this time?  
 5 A That's correct.  
 6 Q While you've claimed that providing LNP would cause  
 7 undue economic burden upon your company, you do agree  
 8 that if Commission were to require implementation of  
 9 LNP, you would have the ability to pay for it?  
 10 A The up-front capital costs of doing it?  
 11 Q Yes.  
 12 A More than likely, yes, we could sustain that  
 13 expenditure, yes.  
 14 Q And when you say sustain that expenditure, that assumes  
 15 the \$576,000 install cost that Mr. DeWitte's proposed;  
 16 correct?  
 17 A I haven't looked at our financials for sure to make  
 18 sure that they could take care of all of those costs,  
 19 but we'd have to analyze it.  
 20 MR. WIECZOREK: Might as well get  
 21 into this now before I go too far. I'm going to  
 22 move Exhibits 5 and 6 at this time.  
 23 MS. POLLMAN ROGERS: I will object  
 24 to those for lack of foundation.  
 25 MR. WIECZOREK: 5 is the diagram and

90

1 I believe he's testified both pictures accurately  
 2 represent proposals that have been made to the  
 3 Commission.  
 4 MS. POLLMAN ROGERS: I'll ask the  
 5 same questions for the purposes of objection. Did  
 6 you personally prepare either diagram -- either  
 7 number -- what are we talking about 4 or 5? 5.  
 8 THE WITNESS: No, I did not prepare  
 9 these.  
 10 MS. POLLMAN ROGERS: I object on the  
 11 grounds of foundation.  
 12 MR. SMITH: I think page 2 of 5 is  
 13 the part that concerns me the most. I think he did  
 14 testify that the connections that are shown in the  
 15 first page reflect his understanding of the  
 16 solution that they proposed.  
 17 MR. WIECZOREK: And, frankly, I  
 18 recall that he also testified that page 2 is how  
 19 Western Wireless has proposed it based on his  
 20 understanding.  
 21 The fact that he didn't prepare the document  
 22 doesn't mean that it's not admissible or that once  
 23 he validates the document he's saying yes, this is  
 24 an accurate representation. That's sufficient  
 25 foundation under the rules of evidence. Otherwise,

91

1 I could never get a cross-examination document into  
 2 evidence.  
 3 MS. POLLMAN ROGERS: Excuse me, but  
 4 this witness testified that he was not aware of who  
 5 the other wireless carriers were listed on there.  
 6 At least he for certain was not aware of one. And  
 7 he also testified he was not sure about the costs  
 8 that have been included here on the first page.  
 9 And he also testified that he was not aware about  
 10 the accuracy of the costs on the second page. So I  
 11 don't believe that there is adequate foundation for  
 12 this witness for the introduction of this exhibit.  
 13 And, furthermore, there will be opportunity  
 14 for them to put their own witness on and establish  
 15 a foundation if that's what it takes.  
 16 MR. SMITH: I'm going to sustain the  
 17 objection and deny admission at this time.  
 18 MR. WIECZOREK: To both 5 and 6  
 19 then?  
 20 MR. SMITH: 6 I am also going to  
 21 deny, although it may be one in the end I'm going  
 22 to end up taking judicial notice of, but after I  
 23 check. But I'm going to deny it at this point in  
 24 time. I don't think the witness has established  
 25 that he knows that this is an official document of

92

1 the State of Minnesota.  
 2 COMMISSIONER BURG: Can I ask a  
 3 question? What does what we just heard from this  
 4 witness mean if what he was talking about is not  
 5 evidence?  
 6 MR. SMITH: They're just questions  
 7 to him. And I'm assuming at some point in time the  
 8 document will probably be offered with alternative  
 9 foundation.  
 10 COMMISSIONER BURG: If we've just  
 11 ruled that he had nothing to do with these  
 12 documents, how does his answer mean anything?  
 13 CHAIRMAN SAHR: Can we go off the  
 14 record.  
 15 (Discussion off the record)  
 16 (A short recess is taken at which time the  
 17 Commission meets in executive session)  
 18 MR. SMITH: The hearing is back in  
 19 session. Mr. Wieczorek, you may resume.  
 20 Q (BY MR. WIECZOREK) Mr. Heiberger, you understand that  
 21 federal law allows you to recover your costs incurred  
 22 in implementing LNP; correct?  
 23 A It's my understanding that you receive compensation for  
 24 those costs for your customer base, that's correct.  
 25 Q You do a per-line charge?

93

1 A Yes.

2 Q And you'd agree with me that Congress envisioned the

3 fact LNP would cost you some money, that's why they

4 provided for a per-line charge?

5 A That's correct.

6 Q And what per-line cost charge do you contend

7 implementation of LNP does not result in imposing a

8 requirement that is unduly economically burdensome?

9 A I think for my customers, the more elderly ones, it

10 would certainly have to be 10 to 20 cents, I would

11 think, somewhere in that neighborhood.

12 Q Now you're not presenting any demographic information

13 on the average income of your customers, are you?

14 A No.

15 Q And you haven't done any independent internal survey of

16 your customers as to what they would pay for the option

17 of local number portability, have you?

18 A I have not, but I have talked to customers on rate

19 increases such as the SLC increase and that was

20 troublesome for many of the customers.

21 Q That SLC increase was \$3?

22 A Yes.

23 Q \$3 per line?

24 A I believe that's right.

25 Q You collect high-cost support and switch support

94

1 through USAC payments; right?

2 A That's correct.

3 Q And annually you submit your cost data to USAC for

4 setting those support limits; is that correct?

5 A That's correct.

6 Q And so if you implemented LNP, you would actually

7 submit those switch costs and that information to USAC

8 for setting your high-cost support, wouldn't you?

9 A I'm not sure if I can submit those for reimbursement.

10 Q You don't know?

11 A I do not.

12 MR. WIECZOREK: That's all I have.

13 MR. SMITH: Mr. Gerdes.

14 MR. GERDES: Thank you, Mr. Smith.

15 Now that I have my papers dried off.

16 CROSS-EXAMINATION

17 BY MR. GERDES:

18 Q I just have a couple of things I'd like to cover with

19 you, Mr. Heiberger. If you would look at your prefiled

20 direct testimony on page 4.

21 A Yes.

22 Q You talk about existing capital investments for

23 broadband that will be diverted if your company must

24 deploy LNP. Do you see that on line 5?

25 A Yes, I do.

95

1 Q And in your testimony you say, third sentence, "Any

2 amount of capital investment that is diverted to the

3 implementation of LNP will reduce needed capital for

4 broadband investments." Do you see that?

5 A I do.

6 Q What do you talk about when you say broadband?

7 A I'm talking about dollars that would be put into our

8 infrastructure to enhance our service offerings to our

9 customers, broadband being DSL services, bandwidth and

10 above.

11 Q You're talking about Internet services?

12 A Broadband services I believe are defined by the

13 Commission to be 200 kilobits and above.

14 Q Okay. What kind of services would you offer in those

15 bands?

16 A High-speed DSL services, BDSL services.

17 Q So that would be Internet?

18 A That's correct.

19 Q Cable?

20 A That's correct.

21 Q Okay. And you're aware of the fact that Midcontinent

22 competes with your company in the Webster exchange for

23 cable; correct?

24 A Certainly.

25 Q And it competes with your company in the Webster

96

1 exchange for Internet access; correct?

2 A That's correct.

3 Q And you're aware that Midcontinent contends that in

4 order for it to effectively compete, it also needs to

5 have local number portability; correct?

6 A I don't know if you need it for effective competition.

7 You've got your NXX right now, and you're competing

8 with us. I don't know if that's effective for you or

9 not.

10 Q That wasn't my question.

11 A Okay.

12 Q It's correct, is it not, Midcontinent contends in order

13 to compete effectively it has to have local number

14 portability?

15 A Yes. That's correct.

16 Q Okay. And the contention goes to the fact that

17 Midcontinent, again, contends that in order -- that the

18 purpose of requiring local number portability was in

19 fact to foster competition in the local loop in the

20 1996 Act; correct?

21 A Could you restate it?

22 Q It is Midcontinent's -- I'm asking if you agree that it

23 is Midcontinent's contention that the purpose of

24 requiring local number portability in the local loop

25 was to enhance competition in the local loop?

1 MS. POLLMAN ROGERS: I'm going to  
 2 object to that question. I don't know where in the  
 3 record you're referring to when you say that  
 4 Midcontinent is contending those things.  
 5 MR. SMITH: Sustained.  
 6 Q Are you aware of the purpose of -- what was the  
 7 announced purpose of -- what was the announced purpose  
 8 of local number portability in the '96 Act?  
 9 A I don't know.  
 10 Q You don't know why they required incumbent local  
 11 exchange carriers to provide local number portability  
 12 to connecting local exchange carriers?  
 13 A Not specifically what they wanted us to do with it.  
 14 Q Mr. Heiberger, you have a newsletter that you publish  
 15 on the Internet; is that correct?  
 16 A That's correct.  
 17 Q I'm going to show you what has been marked as Exhibit  
 18 2, and I'll ask you if that's a copy of your column in  
 19 your newsletter that appeared in your April newsletter?  
 20 MR. SMITH: Can I ask, Dave, is  
 21 that marked Midco 2 or something else?  
 22 MR. GERDES: Excuse me. Midco 2.  
 23 Pardon me.  
 24 MR. SMITH: Thank you.  
 25 A Yes. This is a copy of my article.

1 Q Would you look at the second paragraph, please, and  
 2 read it?  
 3 A Starting with the "Federal Communications Commission"?  
 4 Q Right.  
 5 A "Has issued an order on November 10, 2003. This order  
 6 basically states if a wireline company such as your  
 7 cooperative, ITC, is requested by a wireless company to  
 8 provide LNP, the wireline company must comply and  
 9 provide the service within six months of the initial  
 10 request. The LNP service essentially provides  
 11 customers the ability to port or transfer his or her  
 12 wireline phone number to a wireless phone thus  
 13 eliminating the need for a wireless phone number or  
 14 existing wireline service."  
 15 Q Would you read the first part of the next paragraph.  
 16 A "Since the FCC issued the Order ITC has received  
 17 numerous requests from wireless companies to provide  
 18 the service." Incidentally, we have also received a  
 19 similar request from a competing wireline company  
 20 within our service territory.  
 21 Q And who might that competing wireline company be that  
 22 you received a similar request from?  
 23 A It would be Midco.  
 24 Q Okay. And it's true, is it not, that Midco gave you  
 25 that request because they feel that they need local

1 number portability in order to compete with ITC in that  
 2 exchange?  
 3 MS. POLLMAN ROGERS: I object to  
 4 that question. That's outside the scope of this  
 5 witness's knowledge.  
 6 MR. GERDES: I don't know. I just  
 7 asked him the question.  
 8 A I don't know if that was why you filed.  
 9 Q Have you read Midcontinent's Motion to Compel in the  
 10 192 Docket?  
 11 A Yes.  
 12 Q I'll show you a copy of the Motion to Compel in the 192  
 13 Docket and direct your attention to paragraph 4 of that  
 14 Motion, the last sentence. Would you read that,  
 15 please.  
 16 A "Logically avoiding competition can be the only reason  
 17 an incumbent LEC would wish to discriminate between  
 18 wireless-to-wireline porting and wireline-to-wireline  
 19 porting."  
 20 Q Thank you. So you're aware that Midcontinent contended  
 21 that avoiding competition can be the only reason that  
 22 ITC would seek not to provide local number porting to  
 23 Midcontinent?  
 24 MS. POLLMAN ROGERS: Now wait. Are  
 25 we talking about -- your earlier questions were

1 with regard to this Docket.  
 2 MR. GERDES: I just had him read the  
 3 petition in the 192 Docket.  
 4 MS. POLLMAN ROGERS: I understand  
 5 that. Are you asking him -- I'm just asking for  
 6 clarification. Are you asking him -- I don't  
 7 understand your question, I guess. Could you  
 8 repeat it.  
 9 MR. GERDES: Well, in both the 192  
 10 Docket and in this Docket we are contending that  
 11 Midcontinent is entitled to local number  
 12 portability and that it's a matter of competition  
 13 between Midcontinent and ITC, that ITC is seeking  
 14 to obtain a competitive advantage by not providing  
 15 local number portability when Midcontinent is  
 16 seeking it.  
 17 MS. POLLMAN ROGERS: That's a  
 18 misstatement of the record. Those contentions are  
 19 not contained in your petition to intervene in this  
 20 Docket.  
 21 MR. GERDES: They are part of the  
 22 issues involved in whether or not local number  
 23 portability should be provided in this Docket.  
 24 MS. POLLMAN ROGERS: But you did not  
 25 make those contentions in this Docket.

101

1 MR. GERDES: Okay. Okay.

2 **Q** Setting aside for the moment whether or not

3 Midcontinent made those contentions in this Docket, are

4 you aware that Midcontinent has ever contended that it

5 was entitled to local number portability in order to

6 level the playing field of competition between ITC and

7 Midcontinent?

8 **A** I guess I don't understand or I don't know what you're

9 really asking me.

10 **Q** Okay. Have you ever understood that Midcontinent

11 wanted local number portability so that it could

12 compete fairly with ITC in Webster?

13 **A** Based on previous filed testimony, yeah, you know,

14 Ms. Lohnes stated it there, that she thought it was

15 needed so they could successfully compete.

16 **Q** Okay. Thank you. And so going back to your prefiled

17 testimony on page 4, what you're in essence saying is

18 that you prefer to spend money on your broadband

19 investments in order to compete with Midcontinent

20 rather than spending money on local number portability,

21 which would permit Midcontinent to compete with ITC in

22 the telecommunications area.

23 **A** No. Basically the crux of that statement is that we've

24 had greater demand for broadband services than what

25 we've had for LNP services, and I can't envision why we

102

1 would want to go spend the amount of money that would

2 be required for LNP but rather invest it in services

3 that my customers are asking for.

4 **Q** Do you agree that not offering LNP to Midcontinent puts

5 Midcontinent at a competitive disadvantage?

6 **A** I don't know that.

7 **Q** How about if you were in Midcontinent's shoes would you

8 rather have LNP, or would you rather be able to use

9 your own NXX when those people want to keep their

10 numbers in Webster?

11 **A** I'm not in LNP's shoes. I guess I don't know. I

12 haven't really thought about it.

13 **Q** You heard Mary Lohnes' testimony to the effect that she

14 had received numerous -- or quite a number of requests

15 for LNP? You heard that testimony, did you not?

16 **A** I think she said she had had her technicians contact

17 her in regards to when are we going to get LNP services

18 in Webster is what I think I recall.

19 **Q** You don't recall her saying that they had had customers

20 making those inquiries?

21 **A** I think she stated she had some customers requesting it

22 and then she also elaborated on her technicians.

23 **Q** Would you expect customers to want to have local number

24 portability if they were switching carriers?

25 **A** I guess I'm not a customer. I guess I can't answer for

103

1 them.

2 MR. GERDES: Okay. We'll offer

3 Midco Exhibit 2.

4 MS. POLLMAN ROGERS: No objection.

5 Was there are a Midco Exhibit 1 or not?

6 MR. SMITH: Not yet. Admitted.

7 **Q** Mr. Heiberger, when we're talking about local number

8 portability, of course that works both ways, would it

9 not?

10 **A** What, for your number to be ported to me?

11 **Q** For example, if Midco's customers wanted to go with

12 ITC, that local number portability works in that

13 direction as well; isn't that true?

14 **A** I would assume so, but I'd have to defer to my

15 technical people. I guess I hadn't thought about it

16 that way.

17 **Q** So it's a two-way street. If Midcontinent customers

18 want to come with ITC they would be entitled to have

19 their number follow them in that direction as well,

20 would they not?

21 **A** I would think so, yes.

22 MR. GERDES: That's all I have.

23 Thank you.

24 MR. SMITH: Ms. Wiest.

25 CROSS-EXAMINATION

104

1 BY MS. WIEST:

2 **Q** What is ITC's current local rate?

3 **A** 12.50.

4 **Q** Is that for all of your exchanges?

5 **A** It is.

6 **Q** And you stated in your direct, I believe, that you have

7 six wireless carriers authorized to serve; is that

8 correct, in your area?

9 **A** Yes.

10 **Q** How many of those wired carriers are currently serving

11 in your area?

12 **A** We have not Western Wireless, Verizon, Sprint PCS, RCC,

13 and Midwest Wireless is in Minnesota, I believe. So

14 those four, I believe. Nextel is one of the other ones

15 that I believe has authorization but is not currently

16 operating and I can't recall the other one. I should

17 have looked that up at the break.

18 **Q** So Verizon Wireless does serve. Western Wireless

19 serves, Sprint PCS does serve?

20 **A** That's correct.

21 **Q** RCC serves your entire area?

22 **A** Not entire area.

23 **Q** Part of it?

24 **A** The majority.

25 **Q** Majority?

1 A Yes.  
 2 Q Midwest Wireless?  
 3 A Is in Minnesota.  
 4 Q Only?  
 5 A Yeah.  
 6 Q And Nextel?  
 7 A They're authorized but are not operational, as I  
 8 understand it.  
 9 Q For the carriers that are authorized to provide service  
 10 in your area but do not currently serve, do you have  
 11 any reason to expect that those carriers will decide to  
 12 provide service in the near future?  
 13 A I would certainly anticipate they would. I think they  
 14 have some build-out requirements that they have to meet  
 15 in their areas, and I don't know what timeline they're  
 16 on in regards to those build-out requirements.  
 17 Q But to date you've received BFR request from three  
 18 carriers; is that correct?  
 19 A That's correct.  
 20 Q Wireless carriers, I should say?  
 21 A Yes.  
 22 Q ITC currently has four type 2-B connections with two  
 23 different wireless carriers?  
 24 A That's correct.  
 25 Q If you go to page 3 of your direct testimony beginning

1 on line 15?  
 2 A All right.  
 3 Q You state only one subscriber has inquired about LNP.  
 4 How did you determine -- how did you come up with that  
 5 number? Was that just based on your personal  
 6 experience or did you inquire of all of your staff and  
 7 exchanges?  
 8 A My managers had advised me that this customer had, and  
 9 through subsequent questions, haven't heard of any  
 10 other customers for intermodal portability here.  
 11 Q So would you expect inquiries regarding LNP to be made  
 12 to your company or wireless?  
 13 A I'm sorry.  
 14 Q Would you expect inquiries regarding LNP to be made to  
 15 your company or expect to be made to the wireless  
 16 company?  
 17 A I would think we would hear about them coming back  
 18 through our personnel and our board of directors that  
 19 we have out in all of our exchanges.  
 20 Q If you could go to page 6 of your direct testimony, and  
 21 looking at line 5 you're talking about some of what you  
 22 refer to as the unknowns and one of those questions  
 23 that you asked is what would the porting interval be.  
 24 A The requirements of actually making a port and  
 25 verifying the testing of it, yes.

1 Q So if your costs are based on an automated SOA system,  
 2 would any change in the porting interval have any  
 3 effect on your company?  
 4 A I'd really like to defer that to John DeWitte, if I  
 5 could.  
 6 Q And then on page 6 at the bottom of the page -- I'm  
 7 sorry. At the top of the page, it makes much more  
 8 sense -- on line 3, "It makes much more sense to wait  
 9 for the FCC or courts to clarify key issues."  
 10 Is it your position that the suspension  
 11 should last until the FCC decides or until any or all  
 12 of the appeals come to a conclusion?  
 13 A That or this Commission decides the issues, as I  
 14 understand it now better that they have the authority  
 15 to determine some of these issues, is my understanding.  
 16 Q You think some of these unresolved issues can be  
 17 determined by the Commission?  
 18 A That's my understanding, yes.  
 19 Q Going to your rebuttal testimony, do you have that in  
 20 front of you?  
 21 A Yes, I do.  
 22 Q If you could turn to page 3, please.  
 23 A All right.  
 24 Q Beginning on line 12, you state that if calls to  
 25 numbers ported to a carrier are to be dialed on a local

1 seven digit basis a direct connection needs to be  
 2 established between the carriers; is that correct?  
 3 A That's correct, based on our Interconnection Agreement  
 4 and framework we've essentially built all of our cost  
 5 estimates on, yes.  
 6 Q And then below that you talk about Western Wireless's  
 7 routing proposal. Do you see that?  
 8 A Yes.  
 9 Q Do you consider Western Wireless's proposal to be a  
 10 direct connection?  
 11 A Consider that's how we based our costs off, that in  
 12 order to use the network under the Interconnection  
 13 Agreement that we have in place that they would need to  
 14 deploy to be -- direct connections to each one of our  
 15 exchanges.  
 16 Q Okay. With respect to what Western Wireless has  
 17 proposed for transport do you consider Western  
 18 Wireless's proposal -- would you call that a direct  
 19 connection?  
 20 A I'm still not following. I'm sorry, Rolayne.  
 21 Q Well, you talked about that you needed a local seven  
 22 digit basis, a direct connection needs to be  
 23 established?  
 24 A Right.  
 25 Q Would Western Wireless's proposal would that be a

1 direct connection in your mind?  
 2 **A** Yes. It would have to be in my mind to be  
 3 connections -- to make it a local call.  
 4 **Q** But Western Wireless's proposal where they want to go  
 5 through the Qwest serving tandem, would that be a  
 6 direct connection in your mind?  
 7 **A** Not as I understand the direct connections that we've  
 8 referred to in the past.  
 9 **Q** Okay. So then based on Western Wireless's proposal --  
 10 **A** It would not.  
 11 **Q** If you used Western Wireless's proposal, the routing  
 12 proposal, could you dial the local seven digit basis  
 13 numbers on the local seven digit basis?  
 14 **A** It's not my understanding or I guess I really don't  
 15 know. Maybe John could help out with that or one of  
 16 the other witnesses.  
 17 **Q** Could you go to page 2 still on your rebuttal?  
 18 **A** All right.  
 19 **Q** On line 4 you state that "Pursuant to the  
 20 Interconnection Agreement ITC did not agree to route  
 21 traffic destined for Western Wireless to the serving  
 22 tandem;" correct?  
 23 **A** That's correct.  
 24 **Q** My question is why couldn't you agree to that?  
 25 **A** Well, because of the transport costs issues, the

1 tandeming cost issues, many other issues that I'm sure  
 2 many of the other experts will address here in their  
 3 testimony in the next two weeks.  
 4 **Q** Is it actually your understanding that routing to the  
 5 serving tandem would be cheaper than establishing  
 6 direct connections?  
 7 **A** I don't know that.  
 8 **Q** Do you know, is it ITC's position that transport costs  
 9 should be included in a customer surcharge?  
 10 **A** I'm not sure if those specific costs can be put into  
 11 the customer surcharge. I think John would be able to  
 12 address it.  
 13 **Q** Assuming that your costs do reflect transport costs in  
 14 the surcharge and assuming that there's nothing that  
 15 would prevent ITC from coming to an agreement and going  
 16 through the Qwest serving tandem, why wouldn't ITC want  
 17 to make sure that it took the least expensive approach  
 18 for its customers?  
 19 **A** I think we ultimately have to get to that, yes, to make  
 20 it affordable for our customers if it does go through,  
 21 that we minimize the impacts to the customer base  
 22 certainly.  
 23 **Q** So if you are required to implement LNP, do you believe  
 24 that you would look at other proposals such as Western  
 25 Wireless's routing proposal because it appears to be

1 cheaper than establishing all of those direct  
 2 connections?  
 3 **A** I think there are different ways now to deploy this  
 4 type of service and all of those need to be researched.  
 5 **Q** If you look at page 4 on your rebuttal, you describe a  
 6 situation that you call a regulatory arbitrage  
 7 scenario. Do you remember that?  
 8 **A** Yes.  
 9 **Q** So I guess my question is how likely do you think it is  
 10 that one of your wireline customers will port his  
 11 number to Western Wireless, if I understand this  
 12 correctly, in order that a different ITC landline  
 13 customer will be able to call the wireless customer  
 14 total free?  
 15 **A** I think this is actually talking about how a customer  
 16 would get rid of his wireless number.  
 17 **Q** Right. Oh, his wireless?  
 18 **A** Take his ITC number, okay, and then within that  
 19 exchange that would be a local call, okay, and then at  
 20 some point port that number back to a wireless phone.  
 21 So then now he's got an ITC number that's local to that  
 22 exchange and then bypass toll.  
 23 **Q** So that he could call who, anybody in the ITC?  
 24 **A** So other customers could call him and benefit from  
 25 that.

1 **Q** Would that be only subscribers in the ITC exchange who  
 2 could call him?  
 3 **A** Right.  
 4 **Q** Toll-free?  
 5 **A** Yes.  
 6 **Q** And you think they'd be willing to get rid of their  
 7 landline --  
 8 **A** It's a possibility.  
 9 **Q** But they would still keep their wireline service under  
 10 that?  
 11 **A** I think in this scenario a customer would disconnect  
 12 his wireless phone, get the wireline phone, and then  
 13 port his wireline phone to another wireless phone  
 14 number again so then the local people in that exchange  
 15 could call that -- now the wireless customer and bypass  
 16 toll.  
 17 **Q** Okay.  
 18 MS. WIEST: Can I show him a  
 19 response to staff's data request?  
 20 **Q** I just wanted to clarify lifeline customers. I believe  
 21 in -- this is -- staff sent a request on March 17 to  
 22 the company.  
 23 **A** Okay.  
 24 **Q** And we got the response on Friday. And down here you  
 25 state the number of lines, and then you say you have

113

1 306 lifeline?  
 2 A Correct.  
 3 Q Is that correct?  
 4 A For the total of South Dakota, I believe.  
 5 Q Okay. And I just wanted you to compare that to a  
 6 number that was in response to Interstate -- your  
 7 response to the first discovery request for Western  
 8 Wireless?  
 9 A Okay.  
 10 Q And that number there -- and you can tell me what the  
 11 difference is for. It appeared to be that the lifeline  
 12 was 354.  
 13 A I don't know why those numbers would be different.  
 14 Q I didn't know if you based them on different years or  
 15 those were --  
 16 A This is the average number of lifeline. This was -- I  
 17 know this was year end.  
 18 Q That was year end?  
 19 A This was the 12-31-03 number, I believe.  
 20 MR. WIECZOREK: Can I ask they  
 21 identify what one is year end.  
 22 THE WITNESS: 306. I'm sorry.  
 23 Q That's year end?  
 24 A I believe this was a number at the end of 2003, and  
 25 this -- it says it's the average lifeline customers

114

1 throughout 2003. I don't know if that is the reason  
 2 why they're different. I would assume that is.  
 3 Q Okay.  
 4 MS. WIEST: That's all I have.  
 5 MR. SMITH: Thank you. I think  
 6 what I'll do is ask the Commissioners if they have  
 7 anything so when we go back to you that you will be  
 8 able to address that at the same time. Is that  
 9 okay?  
 10 MR. DICKENS: Great.  
 11 MR. SMITH: Commissioners.  
 12 COMMISSIONER BURG: I just have  
 13 one. Mr. Heiberger, did you testify that you  
 14 received suspension of LNP in Minnesota?  
 15 THE WITNESS: That's correct.  
 16 COMMISSIONER BURG: In other words,  
 17 they've been through this process, and you got the  
 18 suspension; is that correct?  
 19 THE WITNESS: That's correct. And  
 20 then after that happened then the MIC group came  
 21 out and my name appeared on that -- not my name but  
 22 Interstate's name appeared on that and when I saw  
 23 it I said, well, why is my name on this, just  
 24 because I'm a --  
 25 COMMISSIONER BURG: That wasn't

115

1 where I was going but -- maybe it is a little bit,  
 2 but was the MIC proposal out when you got your  
 3 suspension? Was that available? Was that aware of  
 4 the MIC proposal.  
 5 THE WITNESS: They didn't publish  
 6 that document until after I got my suspension in  
 7 Minnesota is from what I can recall.  
 8 COMMISSIONER BURG: My question was  
 9 going to be how did you get that suspension if this  
 10 much cheaper proposal was out there?  
 11 THE WITNESS: It was before.  
 12 COMMISSIONER BURG: Did you use the  
 13 same type of -- I guess I'll use this even though  
 14 it wasn't accepted. Did you use this same type of  
 15 proposal in your testimony for request for  
 16 suspension in Minnesota?  
 17 THE WITNESS: It was based on that,  
 18 I believe, yes, and -- yes.  
 19 COMMISSIONER BURG: Were you the  
 20 only one into that Docket -- did they handle your  
 21 suspension request separately or combined like  
 22 ours?  
 23 THE WITNESS: I think if I recall  
 24 correctly, there's maybe two or three companies  
 25 that are similar to my suspensions in Minnesota.

116

1 And I can't recall if they were all part of one  
 2 Docket.  
 3 COMMISSIONER BURG: Did you have to  
 4 testify in Minnesota?  
 5 THE WITNESS: I did not.  
 6 COMMISSIONER BURG: You did not?  
 7 That's all I had. I just wanted to clarify.  
 8 MR. SMITH: Other Commissioner  
 9 questions?  
 10 VICE CHAIR HANSON: I have one, if I  
 11 could. Mr. Heiberger, in one of my future lives I  
 12 was a utilities Commissioners -- one of my previous  
 13 lives. I'm not sure what my future lives are going  
 14 to be. It will all depend on voters perhaps too.  
 15 One of my previous lives I was utilities  
 16 Commission in charge of electric and water  
 17 reclamation and if someone had come to me and said  
 18 in order to implement something we may be required  
 19 to implement that it's going to cost \$54 per meter  
 20 plus 12 and a half dollars recurring costs, after I  
 21 got off the floor, got done saying something  
 22 impertinent I would say let's examine every option  
 23 we possibly can pursue to provide this in a quality  
 24 fashion but let's see what our least costs are  
 25 going to be.

1 Did you pursue that?  
 2 THE WITNESS: I think it's important  
 3 to understand -- and this is my understanding of  
 4 things is that if I could refer to this -- I don't  
 5 know if I can or not.  
 6 VICE CHAIR HANSON: Please. If  
 7 you'd like to refer to that, yes.  
 8 THE WITNESS: This thing was  
 9 developed this way based on the Interconnection  
 10 Agreement that we have in place with Western  
 11 Wireless right now stating that we've got a -- or  
 12 the local call has got to terminate, from my  
 13 understanding, to a direct connection within that  
 14 local exchange.  
 15 And that's why this thing was developed this  
 16 way, as to my knowledge. We've got an  
 17 Interconnection Agreement there in place, basically  
 18 sets out these parameters that this is how these  
 19 calls are going to be handled. Based on that,  
 20 here's what the costs are going to be.  
 21 VICE CHAIR HANSON: I think we  
 22 understand that. My question was did you pursue  
 23 every available option? Did you say let's look at  
 24 this and see what directions we can go? Not what  
 25 particularly we're limited to under our present

1 understanding, yes.  
 2 COMMISSIONER BURG: That's all I  
 3 had.  
 4 CHAIRMAN SAHR: Good afternoon.  
 5 THE WITNESS: Good afternoon.  
 6 CHAIRMAN SAHR: Or is it evening?  
 7 THE WITNESS: Getting close.  
 8 CHAIRMAN SAHR: Getting closer.  
 9 This is a hypothetical. If the Commission were to  
 10 grant some type of temporary suspension, would ITC  
 11 be willing to look into alternatives to allow  
 12 porting to go forward if there were some lower cost  
 13 alternatives out there?  
 14 THE WITNESS: As long as all issues  
 15 are analyzed and addressed, certainly to minimize  
 16 the impact to my customers, certainly.  
 17 CHAIRMAN SAHR: And if that was done  
 18 in some type of comprehensive work group including  
 19 parties to this proceeding and staff, would that be  
 20 something you would be willing to look into?  
 21 THE WITNESS: Based on what I know  
 22 today, yes. Yep.  
 23 CHAIRMAN SAHR: Now the -- when the  
 24 Minnesota document was presented to you that's not  
 25 something that you have had an opportunity to

1 framework but let's green light think, let's see  
 2 what we can do here?  
 3 THE WITNESS: No. We just based it  
 4 off the agreement we're working under right now.  
 5 VICE CHAIR HANSON: After listening  
 6 to -- answering questions today, do you believe  
 7 that there are other options available to you?  
 8 THE WITNESS: There are certainly  
 9 other options out there that other states are  
 10 utilizing.  
 11 VICE CHAIR HANSON: So let me get  
 12 this straight. You did not ask Mr. DeWitte or any  
 13 other person to look at any other options that  
 14 might be available to you?  
 15 THE WITNESS: No. We just based it  
 16 off of the existing architecture that we have in  
 17 place today.  
 18 VICE CHAIR HANSON: Okay. Thank  
 19 you.  
 20 COMMISSIONER BURG: Can I just do a  
 21 follow-up to his? Just a clarification. Is it  
 22 your testimony that you would probably have to do  
 23 new interconnection agreements with them to use a  
 24 different mechanism?  
 25 THE WITNESS: That's my

1 review in the past, is it?  
 2 THE WITNESS: The Minnesota what?  
 3 CHAIRMAN SAHR: When the  
 4 Minnesota -- this public document that  
 5 Mr. Wiczorek -- that's not something you had an  
 6 opportunity to review in the past, is it?  
 7 THE WITNESS: When I received it,  
 8 yeah, I contacted my legal counsel over there and I  
 9 said, why is ITC listed on this thing? We're not a  
 10 party to this.  
 11 CHAIRMAN SAHR: Do you remember whe  
 12 you received it?  
 13 THE WITNESS: It was in, I think,  
 14 early May sometime.  
 15 CHAIRMAN SAHR: This year?  
 16 THE WITNESS: Yes.  
 17 CHAIRMAN SAHR: You haven't had an  
 18 opportunity to look into whether or not that --  
 19 THE WITNESS: I haven't been able to  
 20 contact too many people on it.  
 21 CHAIRMAN SAHR: It's always fair  
 22 game to say I don't know. Do you know whether that  
 23 would have merit or not have merit in South Dakota?  
 24 THE WITNESS: I don't know.  
 25 CHAIRMAN SAHR: Obviously what works

121

1 in one state may not work in other state.  
 2 THE WITNESS: Exactly right. That's  
 3 correct.  
 4 CHAIRMAN SAHR: Do you think  
 5 Mr. DeWitte would be able to testify to that?  
 6 THE WITNESS: He may be able to  
 7 refer to him.  
 8 CHAIRMAN SAHR: One of the things  
 9 that came up was the, I guess, issues of consumers  
 10 and for lack of a better word I'll throw out the  
 11 word "gaming the system" in trying to obtain what  
 12 might otherwise not be a local number for their  
 13 wireless phone through various means.  
 14 Would it surprise you to learn that after --  
 15 if a new tower is put up or where existing towers  
 16 are and the numbers aren't local for the people in  
 17 the area for people to call, would it surprise you  
 18 to learn we have a lot of people express interest  
 19 in having those numbers made local?  
 20 THE WITNESS: Would that surprise  
 21 me? No.  
 22 CHAIRMAN SAHR: And you had  
 23 mentioned that you thought there was a possibility  
 24 for someone to go wireless to landline back that  
 25 way.

122

1 THE WITNESS: Sure.  
 2 CHAIRMAN SAHR: But I wonder if a  
 3 more likely scenario would be you just take your  
 4 landline number, convert it to wireless and then  
 5 add a new landline number and it's a much smoother  
 6 process where you wouldn't have to worry about some  
 7 contract issues and so on and so forth. Isn't that  
 8 another possible scenario --  
 9 THE WITNESS: Certainly.  
 10 CHAIRMAN SAHR: -- that people could  
 11 use to get what otherwise would not be a local  
 12 number?  
 13 THE WITNESS: Uh-huh.  
 14 CHAIRMAN SAHR: What would be the  
 15 impact of that on your particular company or  
 16 cooperative? Excuse me.  
 17 THE WITNESS: If we were to port one  
 18 number and then -- but still retain a landline at  
 19 that residence?  
 20 CHAIRMAN SAHR: Well, let me ask it  
 21 this way. If the consumer normally has a -- excuse  
 22 me for using some lay terms, nonlocal number and  
 23 people in the area are calling them and then they  
 24 can subsequently change that to a local number,  
 25 perhaps by taking a landline to a wireless number,

123

1 I'm curious to see how does that impact your  
 2 cooperative? Does that have an impact on your  
 3 bottom line?  
 4 THE WITNESS: If that landline  
 5 number was installed and then eventually ported and  
 6 we lost that landline, certainly we would, you  
 7 know, lose access lines, access revenue, Universal  
 8 Service Funds based on the investment into those  
 9 access lines.  
 10 CHAIRMAN SAHR: Are there situations  
 11 where you cannot only be losing the revenue from  
 12 that but also -- and I'm asking this strictly  
 13 because I don't know the answer to this off the top  
 14 of my head but could you have a situation where I  
 15 switch and get that local number and then I move  
 16 off to Sioux Falls or do something along those  
 17 lines? Is there any other financial impact  
 18 associated with that? I mean, do you end up having  
 19 to pay fees that you can't recover?  
 20 THE WITNESS: Well, there would be  
 21 long distance charges possibly by customers that  
 22 would be impacted for our customers and then yes,  
 23 we would lose access charges if we don't have that  
 24 number local to us anymore.  
 25 CHAIRMAN SAHR: This morning we

124

1 talked a little bit about interim number  
 2 portability.  
 3 THE WITNESS: Uh-huh. Yes.  
 4 CHAIRMAN SAHR: Is that an  
 5 alternative here?  
 6 THE WITNESS: I don't see it as one.  
 7 You know, going wireline to wireless in an interim  
 8 number portability is a whole new ball game. It's  
 9 got many different issues associated with it as I  
 10 understand it where in a wireline to wireline it's  
 11 much easier to deploy.  
 12 CHAIRMAN SAHR: So you wouldn't  
 13 think it would have the same applicability when you  
 14 get into the context of going wireline to wireless  
 15 as opposed to this morning when you talked about  
 16 going wireline to wireline?  
 17 THE WITNESS: That's correct. I  
 18 don't think it would be applicable.  
 19 CHAIRMAN SAHR: Again I encourage  
 20 you if you don't know the answer to this just say  
 21 you don't know. But what would be some of the  
 22 issues that would be involved with interim number  
 23 portability if you did it in the context of  
 24 wireless?  
 25 THE WITNESS: Yeah. I would have to

1 defer that to other experts.  
 2 CHAIRMAN SAHR: Thank you.  
 3 MR. SMITH: Can I ask a couple of  
 4 questions? When Mr. Wieczorek was discussing with  
 5 you the Minnesota petition that was filed by the  
 6 MIC group in Minnesota he pointed out to you  
 7 several places in the document where the use of the  
 8 bidirectional tandem group method was deployed.  
 9 And I think maybe Commissioner Sahr asked you this  
 10 question a little less directly, but do you know  
 11 whether that option is available in South Dakota?  
 12 THE WITNESS: I do not know if it's  
 13 available or not.  
 14 MR. SMITH: With reference to the  
 15 numbers that were in the Minnesota petition, the  
 16 cost numbers pertinent to that particular method  
 17 that apparently may be available from Qwest in  
 18 Minnesota, do you of your own knowledge have any  
 19 idea whether those numbers are -- first of all, do  
 20 you know whether they are even accurate in terms of  
 21 the Minnesota bidirectional service?  
 22 THE WITNESS: I do not. I think  
 23 there are rates out there that Qwest is trying to  
 24 charge or some of the services, and how that  
 25 applies in Minnesota I just haven't been following

1 it. I guess I can't answer the question.  
 2 MR. SMITH: And in terms of  
 3 South Dakota do you know what the charges would be  
 4 from Qwest if available for that type of system in  
 5 South Dakota?  
 6 THE WITNESS: I would have no idea.  
 7 MR. SMITH: Thank you. Mr. Dickens,  
 8 do you want to have at it? We have about 15  
 9 minutes left.  
 10 MR. DICKENS: I'm hopeful that I  
 11 won't even consume all 15 minutes.  
 12 REDIRECT EXAMINATION  
 13 BY MR. DICKENS:  
 14 Q Mr. Heiberger, do you remember when you were being  
 15 cross-examined by Mr. Wieczorek answering a question  
 16 about what you did during the time period after their  
 17 request was received by your company for LNP and the  
 18 time that you filed your petition? Do you generally  
 19 recall that?  
 20 A Yes, I do.  
 21 Q And my recollection is that Mr. Wieczorek asked if you  
 22 contacted Western Wireless during that period that you  
 23 were conducting an inquiry of some sort.  
 24 A That's correct.  
 25 Q What kind of inquiry was that you were conducting?

1 A Well, we were researching our costs.  
 2 Q Yes.  
 3 A Yes.  
 4 Q And the question that I have for you is if you had  
 5 contacted Western Wireless during the period of time  
 6 that you were conducting a cost inquiry, do you have an  
 7 opinion on whether that would have affected your costs  
 8 in any way?  
 9 A I do not have an opinion on that.  
 10 Q Ms. Wiest was asking you with reference to your  
 11 rebuttal testimony on page 2 some questions about the  
 12 Interconnection Agreement that was signed between ITC  
 13 and Western Wireless and whether the Western Wireless  
 14 routing proposal is consistent with that agreement.  
 15 Do you generally recall that discussion?  
 16 A I do.  
 17 Q And I want to ask you some questions about your current  
 18 architecture. I think that's the term you mentioned  
 19 with either Ms. Wiest or Commissioner Hanson.  
 20 When you currently route a wireline to  
 21 wireline call outside of your local exchange area who  
 22 do you route those to?  
 23 A A wireline to wireline?  
 24 Q Yes. Say a customer calls from your exchange to --  
 25 A Florida.

1 Q Florida. Yes. How is that handled?  
 2 A It is routed through the SDN or South Dakota Network  
 3 centralized equal access tandem and is handed off to  
 4 the interexchange carrier that is prescribed by that  
 5 customer that's making the call.  
 6 Q Who pays to originate and terminate those interexchange  
 7 calls?  
 8 A It would be IXC's long distance carriers.  
 9 Q What do they pay?  
 10 A Access charges.  
 11 Q And I think you just mentioned your wireline  
 12 interexchange calls today is routed through SDN?  
 13 A That's correct.  
 14 Q Is it your understanding that the Western Wireless  
 15 proposal that we talked about, if the Qwest trunks are  
 16 converted to two-way trunks it is effectively asking  
 17 you to route interexchange calls outside your existing  
 18 network that is utilized today?  
 19 A That would be correct.  
 20 Q And is it your understanding that in many cases those  
 21 calls would traverse exchange boundaries, the  
 22 interexchange?  
 23 A Correct.  
 24 Q And do you know whether -- if those Qwest trunks are  
 25 converted to two-way trunks to carry wireless calls

129

1 outside of your local exchange area, do you know if  
 2 that traffic would be subject to access charges?  
 3 A I don't know that. I would assume that they would not  
 4 be charged an access charge.  
 5 Q If they were not would you have a concern about the  
 6 competitive neutrality of that arrangement?  
 7 A Very much so. It would be lost access revenue for us.  
 8 MR. DICKENS: I think those are all  
 9 the questions we have.  
 10 MR. SMITH: Mr. Wieczorek.  
 11 MR. WIECZOREK: Believe it or not  
 12 I'll keep it short. I want to follow up what  
 13 Mr. Dickens just said.  
 14 RE-CROSS-EXAMINATION  
 15 BY MR. WIECZOREK:  
 16 Q That lost access revenue that you're concerned about,  
 17 will it exceed the \$157,000 monthly recurring charge  
 18 you're going to incur if you do LNP your way?  
 19 A I don't know the answer to that.  
 20 Q What's the rate for that lost access revenue?  
 21 A Per minute?  
 22 Q Yeah.  
 23 A Somewhere in the neighborhood of 8 and a half cents, I  
 24 believe.  
 25 Q 8 and a half cents per minute?

130

1 A Per minute.  
 2 Q So if I do my math quick here -- so you'd have to lose  
 3 in excess -- let's just assume even a dime a minute.  
 4 You'd have to lose over \$1.5 million in access revenue  
 5 or spend 1.5 million minutes in a month to meet what  
 6 you're posting as a monthly recurring charge; correct?  
 7 A I believe your math is correct.  
 8 Q Well, and my assumption is correct there too; correct?  
 9 A Sure.  
 10 Q Is it your contention that calls to a ported number are  
 11 toll or access calls, or which do you contend it is?  
 12 A Toll is what the customer pays. Access is what the  
 13 long distance carrier would pay.  
 14 Q When you were doing your investigation of how to  
 15 deliver LNP you never contacted Western Wireless about,  
 16 hey, would you work with us on the interconnect  
 17 agreement so we can do this cheaper, did you?  
 18 A No. We based our cost assumptions based on what we had  
 19 in place with the Interconnection Agreement.  
 20 Q Right. You're assuming that the interconnection  
 21 agreements as they exist have to stay in place?  
 22 A That's my assumption, correct.  
 23 MR. WIECZOREK: That's all I have,  
 24 with the exception, Commissioners -- I'm doing this  
 25 more just to preserve my record understanding it's

131

1 been ruled on before but given Mr. Heiberger's  
 2 answer to Commissioner Sahr that when I received  
 3 this, that he said in reference to Exhibit 6 I  
 4 think takes away all questions as to it's  
 5 foundational legitimacy and I'd move it again into  
 6 admission.  
 7 MS. POLLMAN ROGERS: And I continue  
 8 my objection. I still do not think that that's  
 9 adequate foundation for admission of Exhibit 6, and  
 10 I think it should not be received pursuant to the  
 11 foundation that has been laid to date.  
 12 MR. SMITH: We're going to deny it  
 13 for now, and it's possible that we will rule on it  
 14 differently after we sleep overnight.  
 15 MR. WIECZOREK: Just for the record,  
 16 to the extent, though, the objections I've made,  
 17 the argument I've made, I'd like that to act as my  
 18 offer of proof for evidentiary reasons.  
 19 MR. SMITH: Absolutely.  
 20 MR. WIECZOREK: Thank you.  
 21 MR. SMITH: Mr. Gerdes.  
 22 MR. GERDES: No questions.  
 23 MS. WIEST: No questions.  
 24 MR. SMITH: Anything further?  
 25 MR. DICKENS: No.

132

1 MR. SMITH: You're excused.  
 2 THE WITNESS: Thank you.  
 3 MR. WIECZOREK: Can I ask a quick  
 4 clarifying question on a procedural issue? Because  
 5 this was discussed in the meetings with counsel and  
 6 that was whether when a cost expert is testifying  
 7 for multiple parties in one day whether he'd only  
 8 be called once and call both company people.  
 9 I guess I'm wondering what the procedure is  
 10 going to be -- if Brookings is going to go first so  
 11 Mr. DeWitte is on the stand tomorrow, I'd like to  
 12 know that ahead of time.  
 13 MR. SMITH: How do you want to do  
 14 that, Commissioners? Are you asking is the  
 15 question, Tal, are we going to begin with Brookings  
 16 immediately tomorrow?  
 17 MR. WIECZOREK: Is Mr. DeWitte going  
 18 to get on the stand and talk about ITC and then  
 19 Brookings is going to get on and Mr. DeWitte is  
 20 going to get on the stand and talk about Brookings?  
 21 I have no objection to Brookings getting on the  
 22 stand and doing their foundational things and  
 23 Mr. DeWitte covering both companies at one sitting.  
 24 MR. SMITH: Let me ask you this,  
 25 because of the other issues related to just ITC

1 maybe with the Midco -- is there a sufficient  
 2 distinction between ITC and the other companies to  
 3 where it's impracticable to do that? Otherwise I  
 4 think that is what we should probably do.  
 5 MR. GERDES: You're talking about  
 6 having Mr. DeWitte testify as to both companies.  
 7 MR. SMITH: Right.  
 8 MR. GERDES: Yeah. We have no  
 9 objection to that.  
 10 MR. SMITH: Do you have an objection  
 11 to that?  
 12 MS. POLLMAN ROGERS: I'm not sure  
 13 what the question is.  
 14 MR. SMITH: The question was do we  
 15 start with Brookings' foundational testimony, in  
 16 other words -- and he would start out and do like  
 17 Jerry did today and then they would put Mr. DeWitte  
 18 on for both companies. So we'd have him on there,  
 19 and you could handle all of it at once.  
 20 MR. GERDES: Excuse me, John. I  
 21 misunderstood Mr. Harrington. He has a plane to  
 22 catch tomorrow afternoon at 2 o'clock or he has to  
 23 leave here at 2 o'clock to catch his plane.  
 24 Perhaps we could have Mr. DeWitte do ITC first and  
 25 then go to the Brookings.

1 MR. SMITH: We will resume the  
 2 presentation of the direct case of Petitioners in  
 3 the Dockets that are scheduled for yesterday and  
 4 today. We did not conclude TC04-054 yesterday.  
 5 And with that, I will turn it over to Ms. Rogers to  
 6 proceed.  
 7 MS. POLLMAN ROGERS: Thank you,  
 8 Mr. Smith. Petitioners would call John DeWitte to  
 9 the stand.  
 10 JOHN DEWITTE,  
 11 called as a witness, being first duly sworn in the  
 12 above cause, testified under oath as follows:  
 13 DIRECT EXAMINATION  
 14 BY MS. SISAK:  
 15 Q Mr. DeWitte, would you please state your name and  
 16 address for the record.  
 17 A My name is John Michael DeWitte, and my address is  
 18 Mitchell, South Dakota.  
 19 Q Will you please take a look at Exhibits 3 and 4 and  
 20 tell me if that is your direct prefiled testimony and  
 21 rebuttal prefiled testimony.  
 22 (Witness examines documents)  
 23 A It is.  
 24 Q Did you prepare both of those exhibits?  
 25 A Yes, I did.

1 MS. POLLMAN ROGERS: Because Midco  
 2 has not intervened in the Brookings case at all.  
 3 MR. GERDES: That's correct.  
 4 MR. SMITH: I think we'll do that to  
 5 accommodate.  
 6 MR. HARRINGTON: You could do  
 7 DeWitte on both of those companies first and go to  
 8 Brookings' foundational witnesses. I don't know if  
 9 that works for you or not.  
 10 MR. WIECZOREK: I don't think so.  
 11 MR. GERDES: So we'll do DeWitte  
 12 first.  
 13 MR. SMITH: Yes. Thanks. We're in  
 14 recess until tomorrow at whenever the Commission  
 15 meeting is done. I scheduled it for 10:30, but in  
 16 reality it will be whenever.  
 17 (Proceedings are in recess)

1 Q Can you briefly describe your qualifications to testify  
 2 in this case?  
 3 A Certainly. I am currently vice president of  
 4 engineering for Vantage Point Solutions, which is a  
 5 telecom consulting and engineering firm located in  
 6 Mitchell, South Dakota. I'm a licensed professional  
 7 engineer in South Dakota and 10 other states. I have  
 8 over 20 years' experience in the telecom industry  
 9 focusing on engineering, including switching transport  
 10 and access electronics. I've personally engineered  
 11 over 400 switching systems mostly with Nortel Networks  
 12 where I did spend 10 years in various positions.  
 13 The purpose of my testimony today is that I'm  
 14 going to provide testimony on LNP implementation, where  
 15 the costs come from, what were the criteria that we  
 16 used to build those costs and the assumptions and --  
 17 assumptions for each of the cost areas. And we can get  
 18 into, you know, what those areas were. But, in  
 19 addition, to provide any insight on what effects some  
 20 of the things that are unresolved may have on those  
 21 costs.  
 22 Q Mr. DeWitte, do you have any additions or corrections  
 23 to your prefiled direct or rebuttal testimony?  
 24 A No, I do not.  
 25 Q If I were to ask you all the questions in your direct

1 and rebuttal testimony, would your answers be the same  
 2 today?  
 3 A Yes, they would.  
 4 Q And do you have any additional summary comments of your  
 5 testimony that you would like to make?  
 6 A I guess I would like to summarize that if we look at,  
 7 you know, some of the things that have occurred  
 8 since -- you know, since the Telecom Act was actually  
 9 passed in 1996, one of the things that, you know, most  
 10 of the less than 2 percent carriers including clients  
 11 that we work with have been aware of is, yeah, LNP is  
 12 out there, but mostly, you know, the requirements for  
 13 LNP were on the wireline-to-wireline side.  
 14 A lot of those things changed with the FCC's  
 15 November 10 Order that made wireless -- or  
 16 wireline-to-wireless local number portability a ruling.  
 17 And one of the things, you know, that was interesting  
 18 about that Order is there were some unresolved issues  
 19 in it but yet while there were some conversations going  
 20 on in the background, I do believe that, you know, the  
 21 timing of that Order did place a little bit of a burden  
 22 on companies as, you know, they weren't expecting, you  
 23 know, to have to implement that in the near-term time  
 24 frame.  
 25 So, you know, after the November 10 Order was

1 actually passed, that's when they began to take a look  
 2 at, well, now that we have to do LNP what's it going to  
 3 cost us. And there's basically four cost areas that  
 4 needed to be evaluated. Those cost areas were what do  
 5 we have to do to the physical switching infrastructure.  
 6 There's switches that have to be updated, software,  
 7 hardware potentially. There's coordination that must  
 8 fill in with the NPAC group for service order  
 9 administration and related items like that. There's  
 10 administration and testing and marketing, regulatory,  
 11 those types of effects that need to be addressed.  
 12 And one of the biggest question marks, of  
 13 course, was transport. So part of the process of, you  
 14 know, grasping what the implementation of LNP meant was  
 15 to look at all of these cost areas and determine, you  
 16 know, with the way that the industry was going, you  
 17 know, what were reasonable costs based on the rules  
 18 that were in effect at the time.  
 19 And so as I'll show when we discuss these  
 20 things, the methodology that we used to come up with  
 21 our cost estimates were based on the rules that we had  
 22 in hand. So if you draw an analogy where you're  
 23 planning a vacation, I mean, when you do the planning  
 24 process you figure out where you're going to go, you  
 25 figure out how to get there, there's roads that connect

1 when you're driving, there's laws that need to be  
 2 obeyed like speed limits and things like that. And  
 3 when we're coming up with cost estimates and  
 4 implementation costs for something like LNP, we have to  
 5 follow the same type of methodology. We know that --  
 6 you know, where we want to be in the end. We know what  
 7 rules are out there. We take a look at facilities of  
 8 networks and things like that that are already there,  
 9 and we, you know, take a look at how we can implement a  
 10 workable solution that fits within that framework.  
 11 And the, you know, key point there is that,  
 12 you know, there are several alternatives. There are  
 13 alternatives that involve renegotiation. There's  
 14 alternatives that involve different network  
 15 configurations, different pricing, et cetera. With the  
 16 time frame that we had in which to evaluate these  
 17 costs, you know, there wasn't a lot of time to do a lot  
 18 of negotiation or any negotiation, for that matter,  
 19 with any carriers that would require, you know, a  
 20 renegotiation of an existing agreement or renegotiation  
 21 of new facilities or anything like that.  
 22 So if we take a look at the framework that is  
 23 there and the rules that are there, those are the rules  
 24 we must follow when we're coming up with cost  
 25 estimates.

1 One of the outcomes, you know, that I think  
 2 we just witnessed was that given enough time there are  
 3 extenuating circumstances where a lot of these costs  
 4 can be negotiated and agreements can be met, but as a  
 5 general universal rule we were taking a look at, you  
 6 know, what the rules were in place at the time and how  
 7 those rules affected what we needed to do to get LNP  
 8 operational in these networks.  
 9 Q Thank you.  
 10 MS. SISAK: I'd like to offer  
 11 Exhibit 3, which is Mr. DeWitte's direct prefiled  
 12 testimony, and Exhibit 4, which is Mr. DeWitte's  
 13 rebuttal testimony, into evidence at this time.  
 14 MR. WIECZOREK: I have no objection.  
 15 MR. GERDES: No objection.  
 16 MS. WIEST: No objection.  
 17 MR. COIT: No objection.  
 18 MR. SMITH: Mr. DeWitte's direct  
 19 testimony and rebuttal testimony are admitted. And  
 20 I would note that the rebuttal testimony references  
 21 several Dockets other than the two that we are  
 22 talking about at the moment. And I don't know if I  
 23 need to read off all of those numbers because the  
 24 exhibit is what it is.  
 25 MR. WIECZOREK: For the record,

141

1 Western Wireless wouldn't object to that rebuttal  
2 testimony coming in on all Dockets.  
3 MR. SMITH: Thank you. So it is so  
4 admitted in all the Dockets that are referenced on  
5 the face of the document.  
6 MS. SISAK: The witness is available  
7 for cross-examination.  
8 CROSS-EXAMINATION  
9 BY MR. WIECZOREK:  
10 **Q** Mr. DeWitte, how are you today?  
11 **A** I'm good. How are you?  
12 **Q** Not too bad.  
13 MR. COIT: Excuse me. The Order on  
14 cross was SDTA then -- right?  
15 MR. SMITH: It was. I'm sorry.  
16 MR. COIT: I just want to remind you  
17 of that. I don't have any cross for this witness,  
18 but I think that's probably the proper order.  
19 MR. SMITH: Thank you. I stand  
20 chastised. Go ahead, Tal.  
21 MR. WIECZOREK: I apologize. I  
22 think it was my fault for jumping in.  
23 MR. SMITH: Quite all right.  
24 **Q** Now you're here today and you're testifying  
25 specifically cost specific right now as to Interstate

142

1 but you're testifying through these proceedings for  
2 seven different companies; is that correct?  
3 **A** That's correct.  
4 **Q** And in fact in your rebuttal testimony, which I believe  
5 has been marked as an exhibit, the exhibit to that  
6 rebuttal testimony, 3A, places all seven companies in a  
7 matrix showing the different costs; correct?  
8 **A** That is correct. That exhibit for simplicity's sake  
9 was taken from Ron Williams' direct testimony and in  
10 order to not recreate the wheel we used his exhibit and  
11 looked at some of the changes that he made and then  
12 incorporated some additional numbers back into that  
13 exhibit.  
14 **Q** Yeah. And you would agree with me that exhibit lists  
15 the same costs that you listed in your cost sheet that  
16 you provided to Interstate -- that they filed with  
17 their petition; right?  
18 **A** No. I would not agree with that.  
19 **Q** Cost categories. Excuse me. Cost numbers. I  
20 apologize.  
21 **A** Yes. It contains the same cost categories.  
22 **Q** Okay. We can talk about numbers later.  
23 **A** Okay.  
24 **Q** In your testimony you talk that your company works with  
25 a number of rural LECs and you estimated you worked

143

1 with over 100 rural LECs?  
2 **A** Could you repeat that?  
3 **Q** That your company has worked with over 100 rural LECs.  
4 **A** That's correct.  
5 **Q** Where are those LECs located?  
6 **A** Those LECs are located primarily in the upper Midwest  
7 from the states of Idaho to Ohio down through Missouri  
8 and Kansas. So it's kind of the upper breadbasket of  
9 the Midwest.  
10 We also have select clients that are outside  
11 of that geographical area. You know, for instance  
12 there's a couple in North Carolina, a couple in  
13 Georgia, Utah, et cetera. It's not coast to coast, but  
14 it's primarily the upper Midwest with the lion's share  
15 of them being in the Dakotas and Iowa and Minnesota.  
16 **Q** So you do work with rural LECs in Minnesota?  
17 **A** Yes.  
18 **Q** Okay. Are you familiar with the MIC filing in  
19 Minnesota?  
20 **A** I'm familiar the MIC filing is out there. I have not  
21 reviewed the MIC filing. The only comment I have on it  
22 is it's my understanding that the MIC group was unable  
23 to come to any sort of agreement with Qwest for those  
24 numbers and has since filed a petition. But I have no  
25 knowledge of the negotiations that went on with Qwest

144

1 or, you know, exactly where that stands.  
2 I was going to say the only information I've  
3 got was that, you know, the number that the companies  
4 were willing to file was one number, the Qwest number  
5 that came back was another number. They weren't the  
6 same. The Qwest number was higher. Hence they filed  
7 for some sort of relief. But beyond that I'm not  
8 familiar with any of the details of the filing.  
9 **Q** All right. Let me ask you, you said the one number  
10 Qwest was offering and the number MIC wanted were  
11 different so that caused the filing. What number are  
12 you talking about, the cost number for what?  
13 **A** My understanding was that they were negotiating with  
14 Qwest for some sort of, you know, transiting or  
15 transport number. I don't know what the numbers are or  
16 what they included or what they didn't include. So I  
17 can't testify to you what those numbers represented.  
18 The only information I have, just from what I've heard,  
19 is that they were not able to come to an agreement on  
20 whatever the rates or numbers or configurations or  
21 whatever it was so hence they did file for a suspension  
22 of their LNP obligations.  
23 **Q** Okay. Well, they filed for suspension for 67 days;  
24 correct?  
25 **A** I have no idea.

145

1 Q Okay. That time period was mentioned yesterday in the  
 2 cross-examination. While you are sitting here, do you  
 3 have any reason to dispute that?  
 4 A I did not read the attachment that was passed around.  
 5 So if you're telling me the number was 67, then that's  
 6 what it was.  
 7 Q Okay. The companies that have filed with that as part  
 8 of that MIC filing, does your company do any work for  
 9 those companies, besides Interstate?  
 10 A To tell you the truth, I couldn't even tell you who the  
 11 members of MIC are.  
 12 Q Okay.  
 13 A So, I mean, I've had zero involvement in it so, I mean,  
 14 you can read me a list and, you know, hard to say.  
 15 It's hard to tell, you know, what, if any, involvement  
 16 any of those companies have had. So I don't know. I  
 17 don't know the answer to your question.  
 18 Q You weren't asked by any company, rural LECs in  
 19 Minnesota, to do a cost analysis for LNP, were you?  
 20 A Yes, I was. But none of those companies have been  
 21 mentioned here.  
 22 Q Well, if you look at what has been marked for  
 23 identification purposes as Western Wireless's Exhibit  
 24 No. 6, page 20 by the fax numbering at the top, there's  
 25 a list of the companies that are part of this filing.

146

1 Why don't we turn to that and you can reference that  
 2 when we talk about companies.  
 3 Now the company --  
 4 A Just for clarification, is this the same thing we were  
 5 looking at yesterday?  
 6 Q Yes.  
 7 A I guess that I thought this wasn't admitted into  
 8 evidence.  
 9 Q It's been marked for reference purposes.  
 10 A Okay.  
 11 Q And I'm asking you to look at page 20 of that exhibit.  
 12 The companies that you did a LNP cost analysis for in  
 13 Minnesota, are any of them listed on Exhibit 6, page 20  
 14 by the fax page?  
 15 MS. SISAK: I object to the  
 16 relevance of this line of questioning. This is a  
 17 different state, different carriers, and different  
 18 proceedings, and I don't see any connection with  
 19 the cost testimony filed by Mr. DeWitte for ITC in  
 20 South Dakota.  
 21 MR. WIECZOREK: Well, if he did a  
 22 cost analysis for one of these companies and  
 23 they've rejected it or proceeding under this  
 24 different procedure in Minnesota, then I think it  
 25 is relevant for impeachment of the opinions he's

147

1 rendering today as to cost.  
 2 MS. SISAK: I would object to the  
 3 suggestion that some communication between  
 4 Mr. DeWitte and an entity that is not a party to  
 5 this proceeding should somehow be admissible into  
 6 evidence, not withstanding whatever confidentiality  
 7 questions may arise.  
 8 MR. WIECZOREK: If the Commission  
 9 would note, I didn't ask him to -- I don't believe  
 10 I asked him to name the companies. I asked him to  
 11 look to see if any of the companies that gave the  
 12 opinion were on that list. I'm not going to ask  
 13 him to identify the specific companies that are on  
 14 that list that he gave that kind of opinion to  
 15 because I don't want to get into what the  
 16 confidentiality is, but I do want to ask him  
 17 follow-up questions about whether he rendered the  
 18 same type of cost opinions to them that he's  
 19 rendering in front of this Commission or whether he  
 20 gave input on the cost issues based on the  
 21 procedures they're pursuing in Minnesota.  
 22 MR. SMITH: May I -- because of the  
 23 testimony yesterday involving Interstate and  
 24 Interstate having been inadvertently added to this  
 25 list -- that's the way I recall the testimony of

148

1 Mr. Heiberger is that they were not -- they did not  
 2 intend to be a party to this and they were a party  
 3 to a separate proceeding.  
 4 Phrased that way, does not the answer to that  
 5 question allow the presence of Interstate on this  
 6 list to lead to the wrong answer?  
 7 MR. WIECZOREK: Well, I apologize  
 8 and I will make that clarification. With the  
 9 exception of Interstate, I believe when I first  
 10 asked him I referenced except Interstate and I  
 11 would say it again. There's a client that he  
 12 provided cost recommendation or information on on  
 13 that list besides Interstate and I'll make that  
 14 clarification.  
 15 MS. SISAK: And I would continue to  
 16 object. If you have testimony or some other  
 17 written document that has been prepared by  
 18 Mr. DeWitte that you want to use to impeach him  
 19 that's one thing, but to just go on a fishing  
 20 expedition with communications he may have had with  
 21 entities that are not a party to this proceeding is  
 22 not at all relevant.  
 23 MR. SMITH: I'm going to let you  
 24 start, but let's keep it as close as we can to  
 25 what's pertinent to this proceeding.

1 MR. WIECZOREK: I will.  
 2 THE WITNESS: Can I make one quick  
 3 comment?  
 4 MR. SMITH: Please.  
 5 THE WITNESS: One of the things that  
 6 I think is important for the Commission and  
 7 everyone else to realize is yes, there are some  
 8 clients of ours on this list. However, one of the  
 9 things that's critically important to understand is  
 10 that our firm provides engineering services and  
 11 regulatory services and outside plant services.  
 12 However, not all of our clients use all of  
 13 those services for everything. So, you know, there  
 14 are companies that are on this list that we have  
 15 had no cost consulting whatsoever with. So, you  
 16 know, some of those, you know, if they're  
 17 participating or, you know, if they've done  
 18 something, I have zero knowledge of it because  
 19 we're not their consultant of record.  
 20 MR. SMITH: Well, I'm going to cut  
 21 through this a little bit because we went through a  
 22 long time with this yesterday and I don't know that  
 23 we ended up anywhere really. And I guess what I  
 24 would like, Talbot, is to lay some kind of a  
 25 relevancy foundation here. Mr. DeWitte's already

1 there's two on this list that I'm aware of -- do I need  
 2 to --  
 3 MR. WIECZOREK: I'm not asking  
 4 names.  
 5 MR. SMITH: Don't name a name.  
 6 A Okay. But the thing that's puzzling to me is that both  
 7 of them filed separate petitions. So I'm not even  
 8 aware that they're a party of this.  
 9 MR. SMITH: Thank you.  
 10 MR. WIECZOREK: So although they're  
 11 on the list and represented by MIC as being a party  
 12 to this, you don't know whether their party filed  
 13 separate petitions?  
 14 A I know they filed separate petitions.  
 15 Q Did you give the cost analysis for those separate  
 16 petitions?  
 17 A Yes.  
 18 Q Did you use the same cost analysis you're using today  
 19 in front of this Commission?  
 20 A Yes.  
 21 Q Through your work with companies here in the state  
 22 you're familiar with SDTA; correct?  
 23 A Yes.  
 24 Q And have you worked with SDTA before on behalf of the  
 25 companies?

1 testified that he had no involvement with this,  
 2 that he basically knew nothing about it, and had no  
 3 knowledge of how the costs that are referenced in  
 4 here and the whole technical scheme was developed  
 5 or even what the status of it is.  
 6 So maybe the place to start is to try to  
 7 establish whether there's some relevancy connection  
 8 here, and then if there isn't, I'm not going to  
 9 allow the testimony to proceed relative to this  
 10 exhibit.  
 11 MR. WIECZOREK: And I understand.  
 12 And the thing about it is I asked him whether he  
 13 did LNP cost analysis for any of the companies in  
 14 Minnesota, that's how I started my question, and  
 15 I'm trying to establish that relevancy. The next  
 16 question was are any of the people you did the LNP  
 17 cost analysis for on this list excluding  
 18 Interstate.  
 19 So I'm not trying to open up everything here,  
 20 I'm trying to keep it as limited as possible. I'd  
 21 ask that question. I'd ask if he could answer that  
 22 question.  
 23 MR. SMITH: You may answer the  
 24 question.  
 25 A The only one on this list that -- well, actually

1 A Yes.  
 2 Q Okay. And you would agree that SDTA often tries to cut  
 3 costs for its members by putting together negotiations  
 4 for connection agreements and doing that all at one  
 5 point rather than each member negotiating separate  
 6 connection agreements with like, say, Western Wireless?  
 7 A I'm aware that SDTA gets involved in issues that  
 8 concern the telecommunications industry in South Dakota  
 9 or the rural telecommunications industry in  
 10 South Dakota as a whole. I guess that, you know, I  
 11 know that a lot of companies negotiate separate  
 12 agreements outside of SDTA. But I do know that SDTA is  
 13 involved in things that are for the common good of  
 14 rural South Dakota.  
 15 Q Right. And when you did your cost analysis, all of  
 16 this cost analysis on marketing flyers, customer care,  
 17 training, you assumed that every company you were  
 18 testifying for go out and do this on its own; correct?  
 19 A I don't know that I actually, you know, made that type  
 20 of decision. What these costs represent are if each  
 21 company, you know, has to do LNP on their own, which  
 22 they do, you know, these are the costs that would be  
 23 associated with such a -- with, you know, such an  
 24 implementation.  
 25 Q In your testimony you talk about how efficient these

1 companies are but you have marketing flyers that are  
 2 going to cost each one of the companies you're  
 3 testifying for \$15,000 to come up with; correct?  
 4 A I believe that -- hold that thought. We revised that.  
 5 Q If you look at Exhibit 3A of your rebuttal testimony --  
 6 A Yeah. Hang on a second. Here we go. Yes.  
 7 Q So if my math's right, 7 times 15 is \$105,000 to come  
 8 up with marketing flyers for these seven companies?  
 9 A Yes.  
 10 Q And these marketing flyers you're representing would be  
 11 sent out to the individuals explaining the LNP, their  
 12 customers?  
 13 A That is correct.  
 14 Q You're not assuming that any of these companies work  
 15 together to come together with the common language or  
 16 hire one company to put together common language to  
 17 send out to their customers?  
 18 A That is one thing that, you know, is absolutely  
 19 possible. However, the fact of the matter remains is  
 20 if each company decides to customize it to, you know,  
 21 have their own logos, their own artwork, their own  
 22 postproduction, their own copies, their own mailings,  
 23 all of those types of things, then these numbers are in  
 24 fact accurate.  
 25 Q Yeah. But all I'm asking so the Commission

1 understands, in your cost estimates you haven't assumed  
 2 any efficiencies of these companies going together to  
 3 accomplish any of this marketing; right?  
 4 A No, I have not. But I guess that, you know, I'd also  
 5 like to point out that, you know, we did revise those  
 6 numbers and we did base them on a -- on some  
 7 correspondence with a marketing company.  
 8 So, you know, the fact remains that if each  
 9 company made the decision, which is fully within their  
 10 rights to do, to develop their own marketing campaign,  
 11 these are approximately what those costs would be.  
 12 Q Right.  
 13 A And there may be some efficiencies to be gained by  
 14 doing something, but that's an assumption that I can't  
 15 make for all the companies that I don't represent.  
 16 Q And all I'm doing is trying to set forth the  
 17 assumptions you've made in setting forth these costs.  
 18 So you haven't assumed any efficiencies in that  
 19 category?  
 20 A I think that's misrepresented. I've tried to be as  
 21 efficient as possible. And here's an example. If we  
 22 jump ahead to transport costs, you know, one could make  
 23 the assumption that since on any given place in the  
 24 United States you could potentially have two cellular  
 25 wireless carriers, six PCS carriers, and three SMR

1 carriers, you know, one could actually assume, well,  
 2 gee, if you add all of that up, that would be 11  
 3 carriers. So by rights if we assume each carrier is  
 4 going to connect each place, you know, we could have  
 5 higher numbers. But we did take a look at the  
 6 reasonableness of whether all of those 11 carriers  
 7 would actually be there, and we simply chose the ones  
 8 that are either already there or would likely within  
 9 the next five years offer a service there.  
 10 So I guess I totally do not agree with you  
 11 that, you know, we weren't thinking about efficiencies.  
 12 Q Well, you originally estimated the Interstate marketing  
 13 flyer costs at \$30,000 just to put it together; right?  
 14 A That is correct.  
 15 Q And then you went sometime thereafter and got this  
 16 information and come up with the 15?  
 17 A I had not received final numbers back from the  
 18 marketing firms that I had talked to, and I wanted to  
 19 make sure that, you know, as I am not in the business  
 20 of marketing, that I had something that I could support  
 21 in a hearing such as this and that had some actual  
 22 numbers.  
 23 So, yeah, I did revise those numbers simply  
 24 because I didn't feel comfortable with the numbers that  
 25 I was given initially when we were putting the

1 petitions together.  
 2 Q Let's just back up a bit. In your original testimony  
 3 on page 2, lines 12 through 13 you've noted that your  
 4 testimony today is only being provided as to technical  
 5 cost issues of implementing LNP; correct?  
 6 A That is correct.  
 7 Q Okay. So you are not testifying as to public interest  
 8 standard in this case at all?  
 9 A No. That is all going to be handled by Mr. Watkins'  
 10 testimony. However, if you do raise an opinion that,  
 11 you know, whether I think it's in the public interest,  
 12 I can certainly tell you.  
 13 Q Well --  
 14 A But --  
 15 Q I'm going to try to restrain myself today.  
 16 A Mr. Watkins is handling those legal issues.  
 17 Q And when we talk about the technical cost issues you'd  
 18 agree with me that, you know, LNP is technically  
 19 feasible -- can be technically done, it's all a matter  
 20 of how much it costs.  
 21 A That's correct. In no -- I'm not going to tell you  
 22 that it technically can't be done, at least for any of  
 23 the clients that we're representing as part of these  
 24 proceedings. And I think that you can take a look at  
 25 anything, and the fact is if you throw enough money at

1 it, yeah, you can make it work from a technical  
 2 perspective.  
 3 **Q** Let's also talk about the numbers. The last numbers  
 4 you submitted I'm assuming which are your rebuttal  
 5 testimony, those are your most accurate numbers to  
 6 date.  
 7 **A** In Exhibit 3A?  
 8 **Q** Correct.  
 9 **A** Yeah. I think that, you know, what we need to point  
 10 out in Exhibit 3A is that those numbers are based on  
 11 Mr. Williams' numbers and, yes, there were some changes  
 12 that were made, you know, that we actually didn't put a  
 13 few of our numbers back in simply because, you know, in  
 14 terms of taking a look at -- and I actually said this  
 15 in my testimony was, you know, there are some things  
 16 that we included in the original cost estimates, you  
 17 know, perhaps some transiting or whatever that  
 18 obviously go away if we have direct connections and  
 19 things like that.  
 20 We actually left some of those types of  
 21 numbers out when we filed 3A.  
 22 **Q** Numbers that if you had direct connections you wouldn't  
 23 have those costs?  
 24 **A** That's correct.  
 25 **Q** Well, let's talk about some of the specific costs then

1 ask -- I'll try to restrain myself to specific numbers,  
 2 Interstate numbers, but generally how you came up with  
 3 them so I don't have to repeat it every time you're on  
 4 the stand. I'll try to break that up. If you have a  
 5 question whether I'm referring to Interstate or  
 6 everybody you testified for, please ask me to clarify,  
 7 all right?  
 8 **A** Okay. Before we go there, one of the things that  
 9 appears to be wrong with this exhibit is I only have 3B  
 10 and 3C. I don't have 3A.  
 11 **Q** That's your exhibit that's been marked by your  
 12 clients -- I mean, by your attorneys.  
 13 **A** I think it was just a copying thing. I've got mine.  
 14 **Q** All right. If you've got your original, you can work  
 15 off that.  
 16 MS. POLLMAN ROGERS: We will correct  
 17 that. We intended for the whole thing. It was  
 18 just inadvertence if it was not attached.  
 19 MR. WIECZOREK: Sure. You start  
 20 printing those Excel spreadsheets, it's easy to  
 21 miss a page.  
 22 **Q** Do you have it?  
 23 **A** Yes.  
 24 **Q** All right. The question I have on -- make sure I keep  
 25 the lines right but under Interstate you have an

1 since -- I'm going to work off your 3A since that's the  
 2 closest you've got to final numbers. And just as a way  
 3 of clarification, Exhibit No. 5, which was the diagram  
 4 we set up over there, the proposed routing by  
 5 Interstate, you would agree that that shows the  
 6 interconnections that you have proposed in this  
 7 situation, come up with your numbers; correct?  
 8 **A** Well, since my back was to it yesterday.  
 9 **Q** You can turn and look at it right now.  
 10 **A** That appears to be correct, and at this time I should  
 11 probably talk about exactly how we came up with those  
 12 numbers and why we had the number connections.  
 13 **Q** I'll tell you, why don't you let me ask you questions  
 14 and we'll probably get there, and if I don't get there,  
 15 I'm sure Ms. Sisak will take you there. You've got all  
 16 of these interconnections essentially, and you  
 17 assumed -- I believe there was an objection yesterday  
 18 that there wasn't six wireless companies but you  
 19 assumed six wireless companies for your model in  
 20 Interstate; correct?  
 21 **A** That is correct.  
 22 **Q** And I'm just going to keep that up here but I'm going  
 23 to walk you down -- before I get to the transport  
 24 interconnect let's talk first about the LNP software  
 25 numbers and what you have on 5A. And I want to just

1 additional software feature of \$4,000.  
 2 **A** That is correct.  
 3 **Q** And this additional software feature is for directory  
 4 numbering pooling you've even noted in your testimony  
 5 but that's if it's implemented in South Dakota for LNP;  
 6 correct?  
 7 **A** Correct.  
 8 **Q** And it's not been implemented?  
 9 **A** Correct. My thought process there was, you know, part  
 10 of the goal in looking at these numbers in their  
 11 entirety is to look at things that could potentially go  
 12 into an end-user charge. I didn't calculate an  
 13 end-user charge in here. I was simply identifying  
 14 potential costs that could go into that. The thought  
 15 process was the potential between now and the next five  
 16 years number pooling may in fact actually be a  
 17 requirement.  
 18 **Q** Right. But in today's world it's not required?  
 19 **A** Not in South Dakota at this time, correct.  
 20 **Q** All right. And you have no -- it may not be required  
 21 in the next five years too?  
 22 **A** It may not be, but the possibility exists that it could  
 23 be.  
 24 **Q** The possibility exists. You have additional -- under  
 25 Interstate again, you have additional vendor fees of

1 \$5,000, and that's to process RUS paperwork; correct?

2 **A** That is a combination of things. Getting into the

3 details of how various vendors administer their

4 software programs. It's important to note that in

5 Interstate's case specifically they have a Nortel

6 Network DMS-10 network. Nortel has several different

7 programs and upgrades and things like that.

8 While we haven't talked about it yet, you

9 know, their software fees are administered by a program

10 price, program price means it is what it is. And they

11 have a mathematical formula that you can use to

12 determine what that number needs to be.

13 In the case of this, the assumption -- or

14 the -- it was an assumption. The thing we're going

15 after there is that in order to actually upgrade and,

16 you know, get everything processed correctly with RUS

17 and through their system to get any software upgrade

18 that is done, the cost to, you know, get all of that

19 implemented would be approximately \$5,000.

20 **Q** Let's just talk generally about your switch-related

21 investment costs.

22 **A** Uh-huh.

23 **Q** It's my understanding that you didn't get quotes for

24 the LPN hardware requirements, you just called up or

25 had this knowledge based on your background. Is that a

1 upgrade costs would be.

2 **Q** Okay. What's it cost to have Qwest install a two-way

3 trunk group?

4 **A** I don't know what Qwest's contractual -- or what their

5 cost structures are.

6 **Q** Okay. You just spent the last two minutes explaining

7 your great background.

8 **A** I can tell you what the hardware cost would be.

9 **Q** What's the hardware cost?

10 **A** The hardware's already there so I don't know what their

11 internal processes would be to do any labor, any of

12 their internal support or any of those types of things

13 to make it work.

14 **Q** Okay.

15 **A** The trunk group's already there, the hardware's there.

16 **Q** The hardware's there, there's no cost for hardware?

17 **A** Unless it's an older piece of hardware that perhaps

18 needs to be changed out to support to two-way. But

19 without seeing what their switch configuration is with

20 the product codes, I can't say for certainty that it's

21 zero cost, but my assumption would be that it would be

22 little or no hardware cost.

23 **Q** Do you have any idea what the man-hour cost might be to

24 make a one-way trunk two-way?

25 **A** I don't know what Qwest's cost structures of those

1 correct statement?

2 **A** That is a correct statement. My background includes

3 working over 10 years with Nortel Networks on both the

4 DMS-10 and the DMS-100 portfolio of products. And as a

5 result of that experience and my day-to-day experience

6 in engineering, I mean, this is what we do. I mean,

7 I've seen countless proposals for, you know, a variety

8 of different things that are switch related, and we

9 have good vendor relationships with our vendors.

10 And one of the things that I find it

11 important to do is not abuse those relationships by

12 unnecessarily getting proposals for things that we

13 aren't, you know -- you know, for a piece of what may

14 be included in some other larger project.

15 So the methodology that we used to get these

16 numbers was I simply placed a call to the Nortel sales

17 and I said, well, you know, our clients are looking at

18 having to implement LNP, you know, what are the

19 specifics that I need to be aware of for prerequisite

20 hardware and software as well as, you know, what

21 programs, if any, are there available to do LNP. He

22 told me what they were. I can take a look at our

23 client's switching configuration and, you know, come up

24 with a fairly accurate -- not to the penny, of course,

25 but an accurate representation of what those expected

1 things are.

2 **Q** You seem to think it's pretty easy to call Nortel and

3 get quotes. You could have as part of your cost

4 analysis here just called Qwest and asked them that

5 too, couldn't you?

6 **A** Except Qwest isn't a client and they wouldn't have told

7 me if I would have called them. Typically Qwest holds

8 all of that kind of stuff tight to the vest. So I

9 guess I would have to disagree with you. I couldn't

10 call Qwest and have them give me a quote for what it

11 would cost.

12 **Q** You're telling me if on behalf of Interstate you called

13 Qwest and said Interstate's my client, they want to

14 look at what it would cost to do a two-way trunk group,

15 what would it cost, they wouldn't tell you?

16 **A** I don't think that would be enough information for them

17 to give us a quote. Because it doesn't include all of

18 the underlying things that are associated with making

19 that type of change.

20 First of all, on Interstate's side we

21 wouldn't be able to, you know, evaluate what that would

22 cost Interstate from the standpoint of, you know, their

23 existing contracts that they have with other carriers,

24 the way that their network is set up, you know, their

25 settlement issues, their regulatory issues, all of

165

1 those types of things.  
 2 Then on Qwest's side, you know, the first  
 3 thing that we would have to provide to Qwest is what  
 4 type of traffic is expected to come up and down that,  
 5 and we don't even know that. We would have -- you  
 6 know, are we talking one carrier, are we talking all  
 7 the carriers. I think that you've asked me an  
 8 ambiguous question that it has no simple answer.  
 9 **Q** Yeah. But you could get enough detail from Interstate  
 10 to go to Nortel and get a quote what it would cost to  
 11 update their switches?  
 12 **A** True. That is a completely different question.  
 13 **Q** I understand that. Are you telling this Commission you  
 14 couldn't get enough information from Interstate to even  
 15 get a number out of Qwest or a range?  
 16 **A** I think that what you're asking is not a trivial, you  
 17 know, give me a number for this type of question. You  
 18 know, you seem to be confusing the hardware costs,  
 19 which are relatively, you know, easy to look at, but,  
 20 you know, we're talking about a process and a  
 21 configuration that's been in place for years that's had  
 22 regulatory approval. And, you know, Interstate has no  
 23 agreement with Qwest to even do a one-way trunk. So  
 24 asking how much does it cost to convert it is not the  
 25 entire question that you'd have to ask them.

166

1 **Q** So is it your testimony that Interstate couldn't get an  
 2 agreement, an Interconnection Agreement to do a two-way  
 3 trunk?  
 4 **A** That's not my testimony.  
 5 **Q** Okay.  
 6 **A** My testimony is is that if I were to call Qwest up and  
 7 ask them how much it would cost to convert it they  
 8 would not be able to tell me because I haven't given  
 9 them enough information.  
 10 **Q** But you could get the information if you wanted to from  
 11 your client?  
 12 **A** I don't believe I could. I mean, I could get the  
 13 information from Interstate. However, you know, I  
 14 don't know how Qwest handles those types of things or  
 15 what agreements they have in place. So I wouldn't be  
 16 able to know how it fits in their framework.  
 17 **Q** Right. And one of the reasons you don't know is you  
 18 never checked in preparation for this testimony, did  
 19 you?  
 20 **A** I don't know if I agree with that assertion.  
 21 **Q** Did you check?  
 22 **A** The thing that I checked was do we have an agreement  
 23 with Qwest, yes or no.  
 24 **Q** Right.  
 25 **A** And the answer to that is, no, we do not. Given the

167

1 time frame that we had to put this together, we didn't  
 2 have time to negotiate with every possible carrier for  
 3 the infinite number of configurations that would likely  
 4 be possible.  
 5 **Q** Did you ever look at the Qwest tariff?  
 6 **A** I have looked at the Qwest tariff in the past. I don't  
 7 believe I looked at the Qwest tariff specific to this  
 8 proceeding because the answer that I just gave where,  
 9 you know, we don't have an agreement or an arrangement  
 10 with Qwest today for two-way facilities.  
 11 **Q** The information on costs for a two-way trunk is in  
 12 Qwest's tariff, isn't it?  
 13 **A** I don't know. I don't.  
 14 **Q** Okay. That's fair. So essentially you're telling this  
 15 Commission that if there wasn't an agreement for  
 16 two-way traffic over that trunk, you didn't even bother  
 17 to look at what the cost would be to do it that way?  
 18 **A** That's correct because that didn't fit into the  
 19 framework of the existing rules including the  
 20 reciprocal compensation agreement that was there. The  
 21 way that we looked at this was, okay, the Telecom Act  
 22 says, I believe, and I'm paraphrasing --  
 23 **Q** I'm just saying you didn't look at it, and you say  
 24 that's correct. That's enough. And if you want  
 25 further explanation, Mary can ask those questions on

168

1 redirect.  
 2 MS. SISAK: I'm sorry. Is there an  
 3 objection here to your witness?  
 4 MR. WIECZOREK: I'm objecting to  
 5 rambling. He's not my witness.  
 6 MS. SISAK: To your own question?  
 7 MR. WIECZOREK: I'm objecting to the  
 8 answer as being nonresponsive.  
 9 MS. SISAK: I would ask the  
 10 Commission to rule whether they agree the answer's  
 11 nonresponsive.  
 12 MR. SMITH: Would you please confine  
 13 your answers as close as possible to the question  
 14 that Mr. Wieczorek is asking?  
 15 THE WITNESS: Certainly.  
 16 **Q** So let's go back to your Exhibit 3A.  
 17 **A** Okay.  
 18 **Q** Your wireless carrier point of interconnect, and I want  
 19 to ask you specifically about Interstate went from 500  
 20 about \$67,000 to \$720,000 from your direct testimony to  
 21 your rebuttal testimony without explanation.  
 22 MS. SISAK: Could you repeat the  
 23 question?  
 24 MR. WIECZOREK: His point of  
 25 interconnect under transport-related costs, the

1 first one from Interstate goes to 720,000 from 576  
 2 in his direct testimony, and I wanted to know, you  
 3 know, why the major jump.  
 4 **Q** There is no explanation in your rebuttal testimony.  
 5 **A** I guess I'm going to have to check that.  
 6 THE WITNESS: Could I have a moment  
 7 to do some math?  
 8 MR. SMITH: Uh-huh.  
 9 (Pause)  
 10 MR. SMITH: Mr. Chairman, it's noon.  
 11 Should we give the witness a little time to do his  
 12 calculations over the break?  
 13 CHAIRMAN SAHR: Sounds good.  
 14 MR. SMITH: Commissioners, when do  
 15 you want to convene?  
 16 CHAIRMAN SAHR: Let's start back at  
 17 1:15.  
 18 (A lunch recess is taken)  
 19 MR. SMITH: Mr. Wieczorek, we are  
 20 back in session and, Mr. DeWitte, have you had time  
 21 to perform your calculation?  
 22 THE WITNESS: Yes, I have.  
 23 MR. SMITH: Please proceed.  
 24 **Q** (BY MR. WIECZOREK) In performing your calculations did  
 25 you find a mistake on Exhibit 3 to your rebuttal

1 testimony?  
 2 **A** I did.  
 3 **Q** Okay. Could you describe to the Commission what the  
 4 mistake is?  
 5 **A** Concerning the number that is for ITC, and if you have  
 6 the color -- I guess you don't. Anyway, under  
 7 transport-related costs there's a nonrecurring cost of  
 8 720,000 which was mathematically arrived at by taking  
 9 six carriers times 5,000 times -- of course I didn't  
 10 write down the formula but anyway the bottom line is I  
 11 inadvertently used 5,000 as opposed to 4,000 which was  
 12 in my original exhibit so the true number should be  
 13 576,000.  
 14 **Q** And, Mr. DeWitte, that number, that change should also  
 15 be made on the second page of that too; is that  
 16 correct?  
 17 **A** Yes. That would carry through to Exhibits 3A, 3B, and  
 18 3C.  
 19 MR. WIECZOREK: If the Commission  
 20 has a preference, I'd ask Mr. DeWitte to change the  
 21 documents so it properly reflects the number either  
 22 on the admitted exhibit or he has offered to rerun  
 23 it and provide it and supplement later.  
 24 MR. SMITH: I think the preference  
 25 over here is to rerun it, but other counsel?

1 MR. WIECZOREK: I have no objection  
 2 to that format or that approach.  
 3 MR. SMITH: Okay. Why don't we do  
 4 that.  
 5 COMMISSIONER BURG: Can I ask a  
 6 clarifying question?  
 7 MR. SMITH: Please.  
 8 COMMISSIONER BURG: Am I right that  
 9 what you're doing now is saying both documents  
 10 should have the same figure as the first document?  
 11 THE WITNESS: No. Actually in my  
 12 original prefiled testimony when I was calculating  
 13 transport costs I used on a per DS-1 the number  
 14 that I was using for the nonrecurring piece for  
 15 that was 4,000 on my original exhibit.  
 16 When I was revising Mr. Williams' exhibit,  
 17 which was 5B, to incorporate into my rebuttal  
 18 testimony as Exhibit 3A I inadvertently used an  
 19 incorrect factor in the formula, which was 5,000 as  
 20 opposed to 4,000. So that flows through to all  
 21 three pages of the exhibit. So in essence what I'm  
 22 doing is making it match the number that I had  
 23 presented in my earlier testimony.  
 24 COMMISSIONER BURG: Yeah. That was  
 25 my question.

1 MR. GERDES: Excuse me. What is the  
 2 number supposed to be?  
 3 THE WITNESS: 576,000.  
 4 **Q** The number is not, Mr. DeWitte, reflected on Exhibit 5A  
 5 which is represented by poster board up there, if you  
 6 look over there as the install cost?  
 7 **A** That's correct.  
 8 **Q** That's your correct number?  
 9 **A** That's my correct number.  
 10 COMMISSIONER BURG: For both?  
 11 MR. WIECZOREK: For both pages A and  
 12 B through 3.  
 13 THE WITNESS: Actually 3A, 3B, and  
 14 3C.  
 15 **Q** I didn't think that number carried through.  
 16 **A** Yes, it does.  
 17 **Q** Okay. And 3C. Okay. All right.  
 18 MR. WIECZOREK: Are there any  
 19 further questions on that revision? Otherwise I'll  
 20 just begin my questioning again.  
 21 MR. SMITH: And the understanding of  
 22 course is that will flow all the way through to the  
 23 bottom in terms of its effect on the per-customer  
 24 charge?  
 25 THE WITNESS: Correct. That's why I

1 was wondering if you would like me to resubmit the  
 2 document because that number is used in subsequent  
 3 calculations.  
 4 MR. SMITH: As I understand, the  
 5 agreement of counsel here is that's what you want  
 6 is to have those automatic calculations done.  
 7 MR. GERDES: Yes.  
 8 MS. POLLMAN ROGERS: I think it  
 9 would be clearer for everyone.  
 10 MR. WIECZOREK: I'm agreeable.  
 11 MR. SMITH: The parties so stipulate  
 12 and that's what we'll do. Please proceed.  
 13 MR. WIECZOREK: Thank you.  
 14 Q On this cost analysis, we've been talking about your  
 15 rebuttal Exhibit 3, did you look to see if this cost  
 16 model was consistent with the NECA format?  
 17 A NECA format meaning what?  
 18 Q There's a NECA cost format for LNP cost implementation.  
 19 Did you look at that at all to come up with this cost?  
 20 A I'm not sure what you mean. I'm not representing this  
 21 to be an end-user charge. I'm just identifying costs.  
 22 So for a spreadsheet that identifies costs, I guess I  
 23 wasn't aware that NECA had a format for that.  
 24 Q Okay. But your spreadsheet does identify a final  
 25 number that's been represented, I believe, through the

1 testimony as being an end-user charge?  
 2 A I don't believe that I referenced that as an end-user  
 3 charge. I believe I referenced that as a total  
 4 implementation cost expressed in a per-subscriber  
 5 basis. You know, I guess that, you know, I wasn't  
 6 representing what would be or would not be included in  
 7 an end-user charge. I was simply trying to point out  
 8 what the total costs were.  
 9 Q Okay. So to the extent that any of the company  
 10 testimony has represented that these are going to be  
 11 actual costs to the consumers, you're not saying that?  
 12 A No. I'm not saying that that would be a NECA end-user  
 13 charge. What I'm saying is this is what the impact of  
 14 LNP implementation would be.  
 15 Q Okay.  
 16 A And I wasn't making a representation as to who paid.  
 17 Q All right. So you're not saying that the LNP cost per  
 18 line would actually all flow through on a per-line  
 19 charge for every customer? If I understand your  
 20 testimony right you're saying the company could pick  
 21 some of that up and decide not to pass it along?  
 22 A Either the company or, you know, perhaps the wireless  
 23 carriers as it relates to transport.  
 24 Q Okay. Let's talk about the transport issue. That  
 25 appears to me to be the biggest cost item on your

1 analysis. Wouldn't you agree?  
 2 A I would agree.  
 3 Q And before we go to the actual numbers, I'd like to --  
 4 do you still have your rebuttal testimony in front of  
 5 you?  
 6 A Yes, I do.  
 7 Q Okay. Could you turn to page 5, line 8, please.  
 8 A I'm there.  
 9 Q Okay. Could you read the first sentence of that  
 10 paragraph, please, out loud.  
 11 A "While there may be more efficient network trunking  
 12 configurations that could be implemented as  
 13 Mr. Williams asserts in his direct testimony, there are  
 14 no Interconnection Agreements or reciprocal  
 15 compensation agreements in place for alternative  
 16 arrangements. Petitioners cannot require other  
 17 carriers to agree to other arrangements."  
 18 Q Okay. As I understand that sentence, what you're  
 19 saying is while what Western Wireless has proposed  
 20 could be done, the agreements to transport traffic that  
 21 way are not in place?  
 22 A That's correct. And I'd like to -- if you would like,  
 23 I can kind of pause and talk about where those  
 24 transport numbers came from.  
 25 Q Why don't I -- I've got a bunch of transport questions.

1 Why don't I go through those first.  
 2 A Okay.  
 3 Q And staying where in the testimony you are right there,  
 4 if you go on in the next sentence could you read that  
 5 out loud too?  
 6 A "One way to address the impasse over transport costs  
 7 may be to allow the Petitioners to investigate  
 8 alternative transport options and then offer those  
 9 alternatives to carriers who wish to transport  
 10 numbers."  
 11 Q When you talk about alternative transport numbers  
 12 you're talking about options to alternatives to the  
 13 routing proposal that you have that's been reflected on  
 14 Exhibit 5A?  
 15 A I'm talking about the infinite number of choices there  
 16 are for transport. You know, the method that we came  
 17 up with and that we used that we know will work in our  
 18 petition as well as, you know, there are literally  
 19 hundreds of others that may actually work. But, you  
 20 know, those all require changes in negotiations and,  
 21 you know, one thing that we wanted to ensure that we  
 22 did not do is assume things that weren't actually there  
 23 and thus misrepresent costs.  
 24 Q Okay. What has been marked as Western Wireless  
 25 Exhibit 5, the first page was that interconnection

1 numbers that you proposed and the second page has been  
 2 this tandem routing options that Western Wireless  
 3 claims is available to Interstate Telecom. You would  
 4 agree this is one of the potential options out there  
 5 for routing this traffic?  
 6 **A** Without evaluating that option in its entirety I can't  
 7 say for sure whether it's a viable option or not. The  
 8 issue that --  
 9 **Q** Let me ask -- before you go on, let me ask a follow-up  
 10 to what you said.  
 11 **A** Okay.  
 12 **Q** What you're telling this Commission is you have not  
 13 evaluated that type of routing system for Interstate  
 14 Telecom; correct?  
 15 **A** I have not evaluated what you have on that board, no.  
 16 **Q** Have you evaluated that kind of routing system for any  
 17 other people you're testifying for in these LNP  
 18 Dockets?  
 19 **A** No, I have not.  
 20 **Q** Okay. Now you say you haven't evaluated these other  
 21 routing systems. Do you know whether any of the  
 22 companies you're testifying for, any of their people  
 23 have evaluated any of these other routing options?  
 24 **A** Not to my knowledge.  
 25 **Q** Okay. You were here yesterday when Mr. Heiberger

1 testified; correct?  
 2 **A** Yes.  
 3 **Q** And you heard Mr. Heiberger testify about how he had  
 4 been offended that Western Wireless implied in filings  
 5 that they actually delayed their filing for LNP so they  
 6 could just buy time. Do you recall that?  
 7 **A** Yes, I do.  
 8 **Q** He said he had done a thorough investigation of options  
 9 available to Interstate. During that investigation did  
 10 you assist him at all?  
 11 **A** We had conversations as to what the Order means, how we  
 12 would interpret it and what tools we had at our  
 13 disposal in order to route traffic.  
 14 **Q** Okay. As his expert on routing, at least for this  
 15 forum, did you ever suggest talking about or looking at  
 16 these other routing options?  
 17 **A** We did not --  
 18 **Q** Did you ever suggest that?  
 19 **A** No. And the reason that we didn't suggest it is  
 20 because the arrangements that Western Wireless and  
 21 other carriers have with Qwest are their arrangements  
 22 and they're not ours.  
 23 **Q** All right.  
 24 **A** And we're not able to negotiate with Qwest on something  
 25 that isn't even our facility or our agreement.

1 **Q** Are you saying you can't -- I mean, you testified this  
 2 morning you hadn't talked to Qwest as to whether you  
 3 could arrange for the one-way trunk group to be changed  
 4 into a two-way trunk group. Did you talk to Qwest over  
 5 lunch and find out you can't do that?  
 6 **A** No. What I'm saying is that the arrangements -- the  
 7 reason we didn't contact Qwest was simply that the  
 8 arrangements that you, Western Wireless, and other  
 9 carriers may have with Qwest are your contractual  
 10 arrangements, they're not ITC's.  
 11 So the transiting traffic and the transiting  
 12 arrangement that you have with Qwest today to terminate  
 13 down that one-way pipe that goes into ITC's exchange,  
 14 we're not at liberty to renegotiate some contract that  
 15 we're not a party to.  
 16 **Q** You were here yesterday when Mr. Heiberger testified;  
 17 correct?  
 18 **A** Yes.  
 19 **Q** You understand that Western Wireless sent him a BFR?  
 20 **A** Yes.  
 21 **Q** And then he responded saying he was going to  
 22 investigate various options?  
 23 **A** Yes.  
 24 **Q** And then Western Wireless sent a follow-up and  
 25 basically said let us know if you have any questions,

1 let's start talking; correct?  
 2 **A** Yes.  
 3 **Q** And you heard Mr. Heiberger testify he never bothered  
 4 to call Qwest to ask them whether there's a better  
 5 route or whether they had a system in getting this  
 6 two-way trunk; correct?  
 7 MS. SISAK: I'd like to object to  
 8 this line of questioning. Can you please, rather  
 9 than pose questions which may or may not be in the  
 10 record, can we have the record read back so we know  
 11 exactly what Mr. Heiberger said?  
 12 MR. WIECZOREK: I believe it's a  
 13 standard approach if she has an objection to the  
 14 misstatement of the record, she can make it and it  
 15 can be ruled on. If we're going to have to go  
 16 through the record it will greatly increase the  
 17 time.  
 18 MR. SMITH: I'm going to overrule  
 19 the objection.  
 20 THE WITNESS: Could you repeat the  
 21 question.  
 22 (Reporter reads back last question)  
 23 **A** I guess the way I'll answer that is I don't understand  
 24 what better means, whether -- you know, better route.  
 25 Does better mean --

1 Q I'll define it for you.  
 2 A Okay.  
 3 Q How about cheaper?  
 4 A I don't believe that we have all the cost variables  
 5 available to even investigate whether that's cheaper or  
 6 not. The costs of the transport is but one of the  
 7 factors that would go into such a study. Other things  
 8 that would go into it would be what the settlement  
 9 impact would be, what effect that would have on their  
 10 frozen factors, what other contractual obligations they  
 11 have with other carriers for such traffic.

12 And on top of that those agreements are your  
 13 agreements, not ours so, you know, if we would have  
 14 contacted Qwest and said this is my supposition we'd  
 15 like to look at, that the first thing they say is you  
 16 don't have a contract with us. You know, that type of  
 17 thing I would assume would be something that Western  
 18 Wireless would negotiate with Qwest and then present to  
 19 a carrier as an alternative.

20 Q Do you still have your rebuttal testimony in front of  
 21 you?

22 A Yes.

23 Q Your answer kind of takes us to the last part of that  
 24 paragraph starting on line 14 where you state,  
 25 "Carriers like WWC could then either negotiate direct

1 we looked at this is if you take a look at LNP and the  
 2 way that it's defined, LNP, if we have a level playing  
 3 field and we have -- we have porting that's available  
 4 in all of the exchanges, the idea there is that Western  
 5 Wireless or any other carrier that chooses to offer  
 6 service in a particular exchange could either get an  
 7 NPA NXX for every exchange where they want to have a  
 8 local presence or they could get one NPA NXX for a  
 9 local service area, if you will, establish a POI in  
 10 that exchange and then, you know, have transport. And  
 11 typically that transport is ordered and paid for by the  
 12 carrier requesting the service from that POI that's  
 13 inside the -- you know, a Petitioner's exchange to  
 14 wherever you would like to take it.

15 MR. WIECZOREK: I would move to  
 16 strike everything from where he said, The way we  
 17 looked at this. It was nonresponsive to the  
 18 question and it was just a repeat of what he said  
 19 he used as a standard this morning.

20 MS. SISAK: May I have the question  
 21 read back so I can evaluate that.

22 MR. WIECZOREK: Sure.  
 23 (Reporter reads back last question)

24 MS. SISAK: I would respectfully  
 25 suggest that the question opens up the door for all

1 connections through the interconnection process, choose  
 2 to use the alternative transport option," and just so I  
 3 make sure I understand what you're saying, the  
 4 alternative transport option, you're talking about what  
 5 Mr. Williams proposed; correct?

6 A Actually that should be options, plural.

7 Q Okay. So multiple options for routing?

8 A Yes.

9 Q Or choose not to port with particular Petitioner. This  
 10 would seem to be a fair alternative than simply placing  
 11 the entire burden of transport on Petitioners and their  
 12 end-user customers.

13 And you're concerned about that burden  
 14 because for like Interstate it's in excess of 2.5  
 15 million in the first year; right?

16 A Correct.

17 Q And that's a major concern to you given the cost of  
 18 that item?

19 A That is correct.

20 Q Do you know whether any of these alternative options  
 21 cost over 200,000 a year in the first year?

22 A Without having new agreements in place and some new  
 23 rates to work with, what we had at our disposal to use  
 24 were the contracts that are existing in place today and  
 25 the methodology that we use and what we -- the way that

1 discussion on options concerning transport and  
 2 routing of traffic.

3 MR. SMITH: I'm going to sustain the  
 4 objection and let you get into that on redirect.  
 5 And, again, I would urge the witness to keep it  
 6 crisp and confined to the question and then let  
 7 your lawyers let you elaborate.

8 THE WITNESS: Understood.

9 Q So if I understand the portion of your answer that  
 10 wasn't struck is, no, you don't know?

11 THE WITNESS: Could you read back  
 12 the first part of my answer. I think you are  
 13 correct.

14 Q Yeah. You don't know whether any of these other  
 15 options cost over 200,000?

16 A That's correct.

17 MS. SISAK: I would like the  
 18 question and answer read back so that the witness  
 19 can confirm accurately as he requested.

20 (Reporter reads back question and partial answer)

21 MR. WIECZOREK: At this point I  
 22 believe that's been stricken from that spot. So  
 23 the answer was --

24 MS. SISAK: Can you please read back  
 25 the final question.

1 (Reporter reads back requested portion)  
 2 A And then the response is correct, the answer is no.  
 3 (Discussion off the record)  
 4 Q Looking again at your rebuttal testimony, that line 14,  
 5 the last two sentences, you talk about -- you talk  
 6 about giving Western Wireless a chance to either  
 7 negotiate direct connections through interconnections  
 8 or choose the alternative transport, and you say that  
 9 should be options, not just option; correct?  
 10 A Correct. What I'm saying is that with --  
 11 Q It's just supposed to be options?  
 12 A Right.  
 13 Q Let me finish my question as to that.  
 14 A Okay.  
 15 Q Did Interstate, did you -- did any of the companies  
 16 that you're testifying here on behalf and have  
 17 submitted this testimony for contact Western Wireless  
 18 after they got the BFR and say, hey, maybe we need to  
 19 look at renegotiating these interconnections because  
 20 that would be a much more cost feasible way to do LNP?  
 21 A The answer to that is no.  
 22 Q Okay.  
 23 A And the reason the answer to that is no is because what  
 24 we would negotiate with Western Wireless may not work  
 25 for the other carriers and we need a solution that

1 A I guess that --  
 2 Q If you know, you know. I'm not asking you to guess.  
 3 A Okay. I'll rephrase my answer. The reason we hadn't  
 4 contacted anybody as an industry group was because you  
 5 have a position yourself as one, and, second, due to  
 6 the limited amount of time that we had to put these  
 7 petitions together, we needed to have something that we  
 8 absolutely knew would work in the absence of any new  
 9 negotiations or any new costs and then, you know,  
 10 present those costs, present why they -- you know, why  
 11 they're accurate, you know, this is the configuration  
 12 that we absolutely know will work and then if there's  
 13 other options that can be explored we can certainly  
 14 explore those.  
 15 Q Okay.  
 16 A But we have a number of carriers besides Western  
 17 Wireless that would be affected by any negotiations  
 18 with any single carrier.  
 19 Q And you have not notified any of them you're willing to  
 20 negotiate and try to come up with a different  
 21 Interconnection Agreement; correct?  
 22 A Correct.  
 23 Q And neither have any of the companies you represent as  
 24 far as you know?  
 25 A As far as I know.

1 works well for all the carriers, not just Western  
 2 Wireless.  
 3 Q You could have said that to every carrier requesting  
 4 BFRs. You could have made the same request, couldn't  
 5 you?  
 6 A Right. But we would like to negotiate with all the  
 7 carriers as a group rather than individuals.  
 8 Q This is not part of this Docket but it seems to get  
 9 back into how do we even know you're going to negotiate  
 10 when every request we send to you there's no response  
 11 to?  
 12 MS. SISAK: Excuse me. I object.  
 13 You stated it was not part of this Docket so I  
 14 would object that counsel has admitted it's not  
 15 relevant.  
 16 MR. WIECZOREK: Well, I think it's  
 17 relevant, quite frankly --  
 18 MR. SMITH: I'm going to sustain it  
 19 as argumentative. If you want to rephrase it, go  
 20 ahead.  
 21 Q How is Western Wireless or all of these other cell  
 22 phone companies supposed to know you're looking at what  
 23 you propose in your own testimony is a fair alternative  
 24 unless you tell them that you're willing to look at  
 25 these other options?

1 Q Let's go back to your 3A exhibit. Looking at the  
 2 Interstate number, you are claiming or your numbers  
 3 represent to provide LNP the way you're proposing,  
 4 install costs alone is 576,000; correct?  
 5 A Correct.  
 6 Q And then every month thereafter they have a monthly  
 7 recurring charge of \$157,400.  
 8 A 442.  
 9 Q Sure. I was just trying to round.  
 10 A Yeah.  
 11 Q Start talking that big and it gets -- \$42 doesn't seem  
 12 to be that big of a deal.  
 13 A But I know you used the 576. I wanted to make sure we  
 14 were reading off the same page.  
 15 Q Sure. You also in that exhibit show it's going to cost  
 16 \$325,000, and this is a little small so I'm not sure if  
 17 that's 500 or 325,000 even. Do you know what it is?  
 18 A Yes.  
 19 Q What is it?  
 20 A 325,000 even.  
 21 Q Okay. That James Valley would have to incur to  
 22 basically do the same points of interconnection plan  
 23 that you're telling this Commission is what you're  
 24 going to have -- what you believe your clients are  
 25 going to have to do.

189

1 You were here this morning when it was placed  
 2 on public record, the stipulation and open hearing what  
 3 James Valley is going to do to provide LNP; correct?  
 4 **A** Correct.  
 5 **Q** And they're not going to incur anywhere near \$325,000  
 6 to provide LNP through that method, are they?  
 7 **A** No. That number has been reduced as a result of the  
 8 negotiation and the numbers that have been negotiated  
 9 with Western Wireless. However, that doesn't address,  
 10 you know, other carriers other than, you know, James  
 11 Valley is in a position to make the same offer that  
 12 they made with Western Wireless available to those  
 13 other carriers. Whether they'll accept it or not is  
 14 another story.  
 15 **Q** Right. And in fact that number for James Valley goes  
 16 virtually to zero, doesn't it, under the arrangements  
 17 made and what's set forth on the record earlier today?  
 18 **A** I --  
 19 MS. SISAK: I believe the witness  
 20 has already answered this does not apply to other  
 21 wireless carriers that interconnect with James  
 22 Valley.  
 23 **Q** I'll ask a hypothetical. How many cell carriers apply  
 24 to James Valley? Five or six or do you know?  
 25 **A** I'll have to look it up quick.

190

1 **Q** Okay.  
 2 **A** Bear with me a second.  
 3 (Witness examines document)  
 4 **A** The answer is five.  
 5 **Q** Five. So let's assume all five get LNP porting  
 6 hypothetically as laid out in front of the Commission  
 7 this morning. That cost for the install would be --  
 8 would it be in excess of \$10,000 for -- that's total  
 9 cumulative?  
 10 **A** I guess I don't know exactly what the numbers that are  
 11 in the James Valley agreement are. I don't recall them  
 12 off the top of my head. I heard, you know, the  
 13 stipulation as it was read, and I have a basic  
 14 understanding of what's going on there. However, I  
 15 think the salient point there is that the reason the  
 16 transport goes away is because the carrier is willing  
 17 to take the burden for payment of that said transport.  
 18 **Q** If you built those transports into the costs of all of  
 19 these carriers you're testifying for; right?  
 20 **A** That is correct.  
 21 **Q** Let's even assume -- you said it was \$4,000 for point  
 22 of interconnect, right, in your testimony?  
 23 **A** Correct.  
 24 **Q** And five carriers using one point of interconnect each,  
 25 4 times 5 is 20,000; correct?

191

1 **A** Correct.  
 2 **Q** So James Valley under that scenario spends 20,000 to  
 3 install the cost versus 325,000. Do you agree?  
 4 **A** However --  
 5 **Q** Agree with me first.  
 6 **A** Yeah. I agree your math is correct.  
 7 **Q** Do you agree that's the cost James Valley gets for the  
 8 install costs for those lines under my hypothetical?  
 9 **A** Under your hypothetical, yes.  
 10 **Q** Because all that your cost is is \$4,000 per point of  
 11 interconnect; right? That's your cost on this sheet,  
 12 3A?  
 13 **A** Right. And the reason it's higher than the numbers you  
 14 just gave in your hypothetical is because if we take a  
 15 look at what could occur in the next five years, we  
 16 could potentially have multiple point of  
 17 interconnections, you know, potentially in every  
 18 exchange James Valley has if the NPA NXXs are ordered.  
 19 Your case is a little bit special in that, you know,  
 20 you only have the one NPA NXX that you're dealing with  
 21 but you are in fact, you know, providing a point of  
 22 interconnection through the umbilicals to every one of  
 23 their local service areas.  
 24 **Q** Do you know whether that's different for the other four  
 25 companies?

192

1 **A** What other four companies?  
 2 **Q** The other four cell companies. I'm sorry.  
 3 **A** I have absolutely no idea.  
 4 **Q** So you didn't even investigate that as an option?  
 5 **A** We investigated whether they offered service or not.  
 6 You know, we do not have any information as to where  
 7 their POIs are or are not.  
 8 **Q** The routing option as proposed by Western Wireless in  
 9 5B, which is a chart up on the wall, Western's Exhibit  
 10 5B, while I understand you have not done a full  
 11 investigation of that, do you believe that that's an  
 12 accurate diagram as to essentially how those routing  
 13 groups would take place?  
 14 **A** Just so there's no misunderstanding, would you mind  
 15 walking me through it.  
 16 **Q** Yes. My understanding is from every end-office those  
 17 would be routed up to the Brookings host or Clear Lake  
 18 host, which would then be routed -- you'd have to make  
 19 the Qwest tandem or the Qwest trunk two-way and then  
 20 you would route -- you're already getting incoming  
 21 traffic over the Qwest tandem; correct?  
 22 **A** Incoming?  
 23 **Q** Yes.  
 24 **A** Incoming toll from Qwest, yes.  
 25 **Q** Incoming from Qwest.

193

1 A Yeah.

2 Q And then the proposal as you understand Mr. Williams' proposal is to make that a two-way trunk; correct?

3 A Correct.

4 Q Maybe this isn't a fair question for you because I know you haven't talked to Qwest and don't have any background on making a Qwest trunk two-way. So with that diagram -- well, let me ask you this: Are those actually existing facilities in blue on those diagrams that are already in place?

5 A I believe that there are some existing facilities there. However, you know, one of the things that I'm not sure whether it was taken into consideration was the other host offices where there may be existing facilities.

6 So I guess that, you know, I would have to evaluate exactly, you know, where those facilities are and exactly what the calling areas are before I could say that that's an accurate representation.

7 Q All right. Well, then that's all I'll ask you on it.

8 A Okay.

9 Q And you didn't go through and do that kind of investigation as part of your being retained in this situation.

10 A That is correct.

194

1 Q For any of your companies?

2 A No.

3 Q I think I asked that question poorly. You didn't do that investigation for any of these companies?

4 A No. We didn't investigate the Qwest option as you described in your -- as Mr. Williams described in his testimony for any of the companies. Simply because, you know, as I mentioned before, you know, there's all kinds of things that we would have to assume that aren't there today.

5 Q Okay. And let's go back to my hypothetical with James Valley. You have the James Valley nonrecurring monthly costs at \$112,404; correct?

6 A Correct.

7 Q And you calculated these recurring costs the exact same way for James Valley as you did for Interstate; correct?

8 A Correct.

9 Q And you calculated these recurring costs this exact same way for all the companies you're testifying on behalf of in these LNP Dockets; correct?

10 A Correct.

11 Q That was calculated by taking the number of points of interconnect and taking them times a set number. I believe the number was \$1,150. Does that ring a bell?

195

1 A Which piece are you talking about?

2 Q I'm talking about the monthly recurring cost. You took that times the monthly charge, times the number of points of interconnect to get up to the monthly recurring cost?

3 A Are you talking the transport piece?

4 Q Yes, I am.

5 A On the transport piece I used the total monthly recurring charge from a quote that I got from SDN Communications in my rebuttal testimony listed as Exhibit 2, making the assumption that the POIs would be in Sioux Falls. I don't know whether there's a POI in Sioux Falls or not but just for consistency's sake we needed to take them somewhere.

6 Q Okay. But that's a set monthly charge for each point of interconnect you'd have?

7 A Correct.

8 Q Okay. And what's that number?

9 A For which company?

10 Q It's bearing a number for point of interconnect?

11 A Yes.

12 Q That's a set number by the number of points of interconnects so you'd agree the more points of interconnect that you have the higher that's going to be?

196

1 A That is correct.

2 Q Now what's the number for Interstate?

3 A Which one?

4 Q The point of interconnect number per -- the charge per interconnect.

5 A The charge per interconnect is 1,762.47.

6 Q I'm making sure you take that times the number of interconnects they would have for all of these cell companies and that's how you get the monthly recurring cost?

7 A That is correct.

8 Q And the rate changes slightly from company to company?

9 A That is correct.

10 Q Okay. So if there's only -- well, let's just take Interstate. If there's only one point of interconnect what is the monthly recurring cost?

11 A One point of interconnect where? Per calling area, per company?

12 Q No. One point of interconnect between the cell company and Interstate on that chart what is the --

13 A I guess that I'm not following what you're trying to ask me because based on, you know, the way that the rules are set up and especially the reciprocal compensation agreement like, for instance, that you guys have there, you know, would likely be more than

1 one point of interconnect per company. So I'm not  
 2 sure, you know, saying, yeah, if it's one or -- you  
 3 know, I don't want to position one as being the right  
 4 number.  
 5 **Q** Well, but I'm just asking you one point of  
 6 interconnect, what's the number?  
 7 **A** Yeah. Assuming hypothetically that there's only one  
 8 interconnect, it would be -- per company then for --  
 9 sorry, for -- I must have -- oh, okay. Let's get back  
 10 to the Groton example. If there was --  
 11 **Q** James Valley example you're saying.  
 12 **A** Right.  
 13 **Q** Okay.  
 14 **A** Okay. For James Valley if there was one point of  
 15 interconnect, based on my numbers it would be a monthly  
 16 recurring charge of \$1,729.29 per company, per CMRS  
 17 carrier that's doing that. So you take that times five  
 18 in their case.  
 19 **Q** And what's that come to? You can round it off.  
 20 **A** It's under 10 grand.  
 21 **Q** Yeah. It's like less than 6, isn't it?  
 22 **A** Well, 17 times --  
 23 **Q** 17. I'm sorry. 17 times 5. Okay.  
 24 **A** Yeah. I mean, it's under 20 grand.  
 25 **Q** And that would then be the monthly recurring costs

1 under that type of scenario?  
 2 **A** Yes. If hypothetically there was only one POI per  
 3 company.  
 4 **Q** You talk in your rebuttal testimony -- I mean, you keep  
 5 talking about the rules, the rules, the rules.  
 6 **A** Uh-huh.  
 7 **Q** Those rules are subject to modification and change,  
 8 aren't they?  
 9 **A** Right. But I can't personally change them to come up  
 10 with something. I have to follow the rules as written.  
 11 **Q** Right. But Interstate, Mr. Heiberger could call  
 12 Western Wireless and take care of the Interconnection  
 13 Agreement, the reciprocal transport issues and  
 14 negotiate that, couldn't he?  
 15 **A** Right. By the same token Western Wireless could have  
 16 called and offered, you know, to negotiate it as well.  
 17 **Q** Are you saying Western Wireless didn't make an overture  
 18 to Interstate about trying to assist with the LNP?  
 19 **A** I don't know if they did or not. All I'm observing is  
 20 that, you know, negotiations are two-way. I mean, if  
 21 there's negotiations it doesn't matter who starts them.  
 22 **Q** Well, Interstate is looking at \$2.5 million the first  
 23 year under your cost analysis. Don't you think that  
 24 would be a motivating factor for Interstate to try to  
 25 figure out a cheaper way to do this?

1 **A** As I stated earlier, there are a lot of different  
 2 options. The one that --  
 3 **MR. WIECZOREK:** I'm going to object  
 4 and move to strike. I mean, stating earlier and  
 5 going through his options is not the question.  
 6 **MR. SMITH:** Sustained.  
 7 **Q** The question was, your proposal is Interstate, a small  
 8 company by your definition, by Interstate's definition,  
 9 is going to spend \$2.5 million under your proposal.  
 10 Don't you think that would motivate Interstate to  
 11 actually make a call and say to somebody, you know,  
 12 there's cheaper options, let's look at the options?  
 13 **A** In the time frame that we had to evaluate what the  
 14 potential costs would be --  
 15 **MR. WIECZOREK:** Object, move to  
 16 strike again.  
 17 **MR. SMITH:** Overruled.  
 18 **Q** Four months of investigation time according to  
 19 Mr. Heiberger. Do you remember that testimony from  
 20 yesterday?  
 21 **A** Vaguely. I remember him saying some time frame. If  
 22 four is the number that he used, then yes.  
 23 **Q** Do you know how long it took for James Valley and  
 24 Western Wireless to reach an agreement?  
 25 **A** I believe it was a couple of months.

1 **Q** Would it surprise you if it was only a couple of weeks?  
 2 **A** I guess not if that's what it was.  
 3 **Q** Okay. Did you ever talk to SDN about providing a  
 4 two-way trunk to carry this traffic under the way  
 5 proposed by Western Wireless?  
 6 **A** Yes.  
 7 **Q** You did?  
 8 **A** I talked to SDN to find out if they had any wireless  
 9 point of interconnections on their switch.  
 10 **Q** And they told you it was nonviable or --  
 11 **A** No. We just didn't get any further than that, other  
 12 than, you know, getting some pricing and proposal  
 13 numbers from them. But the, you know, bottom line is  
 14 is that when we were looking at things, you know, the  
 15 first question is, well, let's see if we can figure out  
 16 where some companies may have points of  
 17 interconnections.  
 18 At that time, you know, there weren't any  
 19 and, you know, we assumed that, you know, we would hav  
 20 to look at some other alternatives.  
 21 **Q** Let's go on to something different. You talk about  
 22 type 1 migration issues in your rebuttal testimony. Do  
 23 you recall that?  
 24 **A** Yes.  
 25 **Q** And you claimed there's no issues with type 1 migration

201

1 numbers because Western Wireless can go out and get its  
 2 own numbers.  
 3 A I believe that the FCC or actually the Telecom Act  
 4 or -- I might need to read what I have. Can you direct  
 5 me to that?  
 6 Q Why don't I give you a citation on that. Why don't you  
 7 look at your rebuttal testimony.  
 8 A Okay.  
 9 Q At page 11.  
 10 A Okay.  
 11 Q Starting on line 6.  
 12 A Okay.  
 13 Q I was trying to summarize your testimony and I don't  
 14 want to misstate you so let me know, but if you go to  
 15 the bottom of line 19 you state, "Mr. Williams  
 16 incorrectly asserts that wireless-to-wireless  
 17 portability will be hampered in South Dakota due to  
 18 these type 1 connections." Do you see that?  
 19 A Yes.  
 20 Q But isn't it true for any cellular company where there  
 21 are type 1 connections where the number that they've  
 22 got right now, a Western Wireless customer who has a  
 23 phone number right now that's a type 1 connection, that  
 24 they can't be ported to another wireless company?  
 25 A I believe that what I was trying to say here was that

202

1 the FCC found that no action was necessary with regard  
 2 to type 1 interconnections because their assertion was  
 3 that all of the wireless carriers are migrating off of  
 4 type 1 connections getting their own NPA NXXs and going  
 5 to type 2, therefore, they weren't required.  
 6 Q I'm not asking what the FCC said. You said it won't be  
 7 hampered in South Dakota. However, if you have a -- if  
 8 a cell customer has a type 1 number right now and he  
 9 wants to port that and the LEC is not providing  
 10 portability, that person cannot port that number; isn't  
 11 that correct?  
 12 A The context of my testimony was that type 1 connections  
 13 should not be considered in the LNP equation because  
 14 the FCC is assuming that -- or, you know, has found  
 15 that most wireless carriers are migrating away from  
 16 those. So if number porting is to be implemented, you  
 17 know, their assumption is the type 2s would be  
 18 converted by the wireless carrier to -- the type 1s  
 19 would be converted by the wireless carrier to type 2s,  
 20 and then, you know, the existing rules regarding LNP  
 21 would fly at that point.  
 22 So that was the context of, you know, what my  
 23 testimony was trying to say.  
 24 Q So you're not representing that there's been  
 25 difficulties with porting type 1 numbers between

203

1 wireless companies in South Dakota, are you?  
 2 A I'm saying I know of no time where they've, A, gotten a  
 3 request, or, B, actually tried to do it. I am aware  
 4 the reason -- the background information that the FCC  
 5 has considered when they made such statements was that  
 6 if porting is to occur wireless to wireless on type 1,  
 7 it's not between those two wireless carriers that the  
 8 LEC that's hosting those numbers has to be involved,  
 9 which is why they didn't want to do it.  
 10 Q Well, so you're not aware -- you don't have any  
 11 knowledge of people that have had trouble porting their  
 12 numbers in South Dakota because of this issue?  
 13 A I don't believe there's been any requests so, no, I  
 14 have no knowledge.  
 15 Q Okay. Well, you have no knowledge?  
 16 A Yeah.  
 17 Q All right. So the point you say nobody's been hampered  
 18 in South Dakota from porting your numbers, you really  
 19 don't know?  
 20 A As I stated earlier, the reason I said that was because  
 21 the FCC is assuming everybody's going to type 2,  
 22 therefore type 1s would be eliminated thus porting  
 23 would be hampered is my point.  
 24 Q Okay.  
 25 A I mean, if the carriers choose to keep them, I mean,

204

1 that's their issue.  
 2 Q You're not here today testifying on behalf of your  
 3 companies that these companies can come to the  
 4 Commission, pick a very high-cost alternative to  
 5 provide LNP and then use that to establish an undue  
 6 economic burden, are you?  
 7 A I guess I'm not understanding what you're trying to get  
 8 at.  
 9 Q I'm sorry. Maybe the best way to ask this is you're  
 10 just talking about costs and you're only presenting the  
 11 costs in the format you presented them. You're not  
 12 reaching any conclusions that they create an undue  
 13 economic burden or that they're an adverse economic  
 14 impact?  
 15 A I am not -- you know, I am not making those types of  
 16 judgments. That has to do with, I believe,  
 17 Mr. Watkins' testimony. However, you know, I think as  
 18 we've discussed earlier, yeah, transport's a huge issue  
 19 and, you know, that's the area where alternative  
 20 solutions need to be evaluated and need to be addressed  
 21 that benefit not only the, you know, company so it's  
 22 viable for them but also, you know, so we can treat all  
 23 wireless carriers including Western Wireless the same  
 24 way.  
 25 Q Right.

1 A And --  
 2 Q Let me ask a question. You're repeating the stuff that  
 3 we talked about earlier that's in your testimony.  
 4 A Uh-huh.  
 5 Q Essentially what you're saying in your testimony as I  
 6 understand it is there are cheap ways to do this if  
 7 they sat down and could reach an agreement?  
 8 A I believe that we would have to identify what the  
 9 options are and then evaluate each option.  
 10 Q And you have not done that; correct?  
 11 A No. Not in the time frame that we've been allowed for  
 12 this petition.  
 13 MR. WIECZOREK: That's all I have.  
 14 MR. SMITH: Mr. Gerdes.  
 15 CROSS-EXAMINATION  
 16 BY MR. GERDES:  
 17 Q Good afternoon, Mr. DeWitte.  
 18 A Good afternoon.  
 19 Q I'd like to talk with you a little bit about  
 20 wireline-to-wireline LNP, if I could.  
 21 A Okay.  
 22 Q Would you go to page 19 -- no. Page 20 of your direct  
 23 prefiled testimony.  
 24 A Okay. Page 20?  
 25 Q 20.

1 A Okay.  
 2 Q When we're talking about wireline-to-wireline LNP you  
 3 virtually eliminate the transport component of that  
 4 computation, do you not?  
 5 A I believe that's accurate. I can check the exhibit  
 6 quick and let you know that.  
 7 Q My question was, you can virtually eliminate it; is  
 8 that correct?  
 9 A Correct.  
 10 Q Thank you. And as a matter of fact, on page -- or  
 11 excuse me, page 20, line 7 of your testimony you say,  
 12 "Petitioner estimates that these transport costs would  
 13 likely be significantly reduced;" correct? Page 20,  
 14 line 7.  
 15 A Yes.  
 16 Q And if you look at your Exhibit 1A, the only  
 17 transport-related costs that you identify as it relates  
 18 to Midcontinent's LNP would be a \$500 nonrecurring dip  
 19 cost and a \$100 monthly recurring dip cost; correct?  
 20 A Correct.  
 21 Q And in contrast, if you look at your Exhibit 1B, the  
 22 same testimony, we're talking about almost a million  
 23 dollars in costs, 944,000; correct?  
 24 MS. SISAK: Excuse me. You referred  
 25 to 1B of Mr. DeWitte's direct testimony?

1 MR. GERDES: Correct.  
 2 A I guess that the numbers I'm looking at were 577,000  
 3 plus 166, 190.  
 4 Q Right. If you add the two together would you get  
 5 944,000?  
 6 A Approximately, yes.  
 7 Q Okay. I take that back. It's 772. I miss --  
 8 A Okay.  
 9 Q And if you add 772 and 171 you get 944.  
 10 A Right.  
 11 Q Okay. So what we're talking about then is the  
 12 difference between about \$700,000 and \$600; correct?  
 13 MS. SISAK: I'm sorry. Could you  
 14 explain what you're comparing?  
 15 Q Do you understand what I'm asking?  
 16 A I guess that I lost you after -- you know, after we  
 17 added 772 to 171 and got 900, I'm with you there. But  
 18 I'm not with you on the other thing you wanted me to  
 19 look at.  
 20 Q Talking about just transport-related costs.  
 21 A Okay.  
 22 Q The total transport-related costs for LNP for wireline  
 23 to wireline would be \$600; correct?  
 24 A That's the estimate, yes.  
 25 Q And if you're talking about intermodal local number

1 portability, we're talking about something on the high  
 2 side of \$700,000, that's 577 plus 166; correct?  
 3 A Correct.  
 4 Q Okay. So that is a significant reduction, is it not?  
 5 A That is.  
 6 Q Thank you.  
 7 A I guess the only other thing I'd point out --  
 8 Q I haven't asked you a question.  
 9 A Okay.  
 10 Q Thank you. Now later on in that same paragraph you  
 11 talk about in intramodal LNP cases that you're familiar  
 12 with the carriers have entered into an Interconnection  
 13 Agreement. Do you see that?  
 14 A Hold on a second.  
 15 Q Okay. I thought you had it. Excuse me.  
 16 A Back on page 20?  
 17 Q We are.  
 18 A Okay.  
 19 Q Line 11.  
 20 A Okay.  
 21 Q Excuse me. Line 10.  
 22 A Okay. And the question?  
 23 Q The question was, in intramodal LNP cases with which  
 24 you're familiar carriers have entered into an  
 25 Interconnection Agreement, that's what you said?

1 A Correct.  
 2 Q That's what we have here, there's an Interconnection  
 3 Agreement between Midcontinent and ITC; correct?  
 4 A Correct.  
 5 Q Okay. And then it talks about the Interconnection  
 6 Agreement -- your testimony talks about the  
 7 Interconnection Agreement addressing methods and  
 8 compensation. Have you looked at the Interconnection  
 9 Agreement between ITC and Midcontinent?  
 10 A No, I have not.  
 11 Q Okay. So you don't know whether it does or doesn't?  
 12 A No. That's why I said the ones that I'm familiar with.  
 13 Q Okay. And then in the next sentence you talk about  
 14 Interconnection Agreements including "compensation for  
 15 traffic volumes typically in the form of reciprocal  
 16 compensation." Do you see that?  
 17 A Yes.  
 18 Q And are you aware whether or not the Interconnection  
 19 Agreement between Midcontinent and ITC has that?  
 20 A I am not aware of that.  
 21 Q And if it did that would be a good thing, I imagine?  
 22 A Yes.  
 23 Q And then you talk about the testing for each ported  
 24 number would be reduced; correct?  
 25 A Correct.

1 Q Okay. And if we go over to your exhibit, we're talking  
 2 about -- compare the exhibit for Midcontinent with the  
 3 Exhibit 1B for intermodal local number portability.  
 4 A Okay.  
 5 Q It appears to me that you're using a higher figure for  
 6 Midcontinent than you are for intermodal portability.  
 7 A Which figure in particular?  
 8 Q For testing. We were just talking about testing.  
 9 Under technical administrative costs, testing.  
 10 A Right. Are we talking about the recurring?  
 11 Q That's the only figure I see.  
 12 A Okay. We may have a rounding error there. They are  
 13 intended to be the same because it's the same hourly  
 14 rates that were used to back them up.  
 15 Q Well, your testimony says that it would be less for  
 16 Midcontinent.  
 17 A What I was talking about was the -- let's go back and  
 18 look at it quick. Okay.  
 19 (Witness examines document)  
 20 Q Was that perhaps a mistake?  
 21 A I guess that I'll have to look into that, but my  
 22 assumption is this -- or my methodology was this. You  
 23 know, I did say likely. I didn't say would be, and I  
 24 wanted to make sure that I maintained some consistency  
 25 from exhibit to exhibit.

1 So my intention was to leave those numbers  
 2 the same.  
 3 Q Well, then why did you say they would be less in your  
 4 testimony?  
 5 A I said they likely could be less. I didn't say they  
 6 would be less.  
 7 Q No. I think you said would likely be reduced. That's  
 8 what I'm reading.  
 9 A Right. Would likely be reduced.  
 10 Q You didn't say could. You said would; right?  
 11 A My --  
 12 Q Mr. DeWitte, my question is, did you say could or would  
 13 in your testimony?  
 14 A I said likely. Likely doesn't mean it would be.  
 15 Q Well, excuse me. Look at the last word on line 15.  
 16 A I see that.  
 17 Q What is it?  
 18 A It's would.  
 19 Q Thank you. I'd like to call your attention to Exhibit  
 20 1A, and if I'm looking at that exhibit correctly, you  
 21 are amortizing -- or I should say spreading the total  
 22 estimated costs over 1,660 access lines; is that  
 23 correct?  
 24 A That's correct.  
 25 Q And that's the number of access lines in Webster?

1 A I believe that's correct. Let me check quick. I  
 2 believe that was an exhibit in the original petition.  
 3 (Witness examines documents)  
 4 A I believe that is the correct number.  
 5 Q Okay. And then if you look at your Exhibit 1B, you're  
 6 spreading the estimated costs to implement intermodal  
 7 LNP over 14,529 lines; is that correct?  
 8 A That's correct.  
 9 Q And I assume that would be over the entirety of ITC's  
 10 lines.  
 11 A No. That is not correct. That's over the entirety of  
 12 ITC's South Dakota lines.  
 13 Q Yeah. Okay. Excuse me. The entirety of ITC's  
 14 South Dakota lines.  
 15 A Okay.  
 16 Q Correct?  
 17 A Correct.  
 18 Q Okay. Point of fact, you could spread that cost in the  
 19 Midcontinent exhibit over 14,529 and that would be the  
 20 more accurate allocation of those costs, would it not?  
 21 A That's not -- that's not accurate. My understanding of  
 22 the way that those types of costs need to be allocated  
 23 is that if there is an exchange that has LNP  
 24 implemented for wireline-to-wireline LNP porting, you  
 25 spread the costs of LNP across those subscriber lines

1 in that exchange or group of exchanges, not the entire  
2 service area.  
3 **Q** But it would be correct, would it not, that if you  
4 implemented LNP, intermodal LNP, these costs would go  
5 away and subsumed in the costs of doing the intermodal  
6 LNP, wouldn't that be correct?  
7 **A** Could you say that again?  
8 **Q** I'm saying that if intermodal LNP was implemented.  
9 **A** Intermodal?  
10 **Q** Intermodal were implemented, these costs that you have  
11 on Exhibit 1A would be subsumed in that process, would  
12 it not?  
13 **A** That's correct.  
14 **Q** Then you would have zero on these lines, would you not?  
15 **A** Correct. But --  
16 **Q** So would it not be more accurate since we can assume  
17 there may very well be calls for LNP in other exchanges  
18 to spread those costs over the entirety of Interstate's  
19 South Dakota lines, rather than just the Webster  
20 exchange?  
21 **A** That would not be accurate because if you look at the  
22 way these exhibits were put together and my testimony,  
23 I specifically pointed out if LNP was required only for  
24 wireline-to-wireline porting those costs would be  
25 represented by the numbers that are in Exhibit 1A. If

1 intermodal, meaning wireline to wireless, was  
2 implemented then, you know, that exhibit covers those  
3 costs. And I do point out in my testimony that if both  
4 are required, then, yes, there is some overlap of  
5 costs.

6 But to the point if LNP is only required from  
7 wireline to wireline, you can only spread those costs  
8 where that competition is going on in those exchanges.  
9 You can't spread it across the entire subscriber base.

10 **Q** Excuse me. We're not trying this case in a vacuum, are  
11 we?

12 **A** No.

13 **Q** And it is true, is it not, that these figures on  
14 Exhibit 1A assume that we would not be doing  
15 wireline-to-wireless LNP; correct?

16 **A** That is correct.

17 **Q** Okay. Thank you. And it is also true that the overall  
18 cost of wireline-to-wireline local number portability  
19 is substantially less, even taken in a comparative  
20 sense like you've done here, than the wireless LNP;  
21 correct?

22 **A** I don't know if that's an accurate representation.

23 What --

24 **Q** Yes or no?

25 **A** No then.

1 **Q** Okay. What is your definition of substantial?

2 **A** My point is that --

3 **Q** What is your definition of substantial?

4 **A** More than.

5 **Q** Okay.

6 **A** You know --

7 **Q** So would you say that 7 and a half percent as big as  
8 the other figure would be a substantial difference?

9 **A** 7 and a half percent of what?

10 **Q** Let's say that the costs of implementing  
11 wireline-to-wireline LNP were 7 and a half percent of  
12 the costs of implementing intermodal LNP. Would that  
13 be a substantial difference?

14 **A** Is this a hypothetical?

15 **Q** Yes.

16 **A** Yes. I would say that's a substantial difference.

17 **Q** If you take these two exhibits and add them together, I  
18 get on Exhibit 1A \$71,596 total costs of implementing  
19 intramodal LNP, okay? If you add the same figures  
20 together on intermodal LNP I get \$944,729. Would you  
21 trust me if I did the math and found 7 and a half  
22 percent to be the portion of the larger figure that the  
23 smaller figure is?

24 **A** I would trust your math. However, I would have to, you  
25 know, provide some explanation as to why it's that

1 large.

2 **Q** Well, and I'll allow your lawyer to do that with you.

3 MR. GERDES: That's all the  
4 questions I have.

5 MR. SMITH: Ms. Wiest.

6 CROSS-EXAMINATION

7 BY MS. WIEST:

8 **Q** Mr. DeWitte, could you please go to your Exhibit 3A to  
9 your rebuttal. Looking at Interstate and going back to  
10 the transport-related costs and the \$576,000, my  
11 understanding is that number was arrived at taking the  
12 number of exchanges times 6 CMRS carriers times 4,000  
13 per line; is that correct?

14 **A** For Interstate?

15 **Q** Yeah.

16 **A** Correct.

17 **Q** Does ITC have four direct connections with wireless  
18 carriers?

19 **A** I believe they do.

20 **Q** Should those costs for those connections be subtracted  
21 from that number?

22 **A** Yes. It should be reduced by four connections.

23 **Q** So that would be \$16,000?

24 **A** Yes.

25 **Q** And in some cases you used \$4,000 for a direct

1 connection and in other cases you used 5,000. Could  
 2 you tell me the difference between those two?  
 3 **A** Yes. If you take a look at the actual implementation  
 4 and configuration the existing switches have, the way  
 5 that I arrived at that is for every circuit pack that  
 6 you add into a switch you have to have a shelf to plug  
 7 it into, you have to have a bay to plug the shelf into,  
 8 and, of course, you have the cost of the circuit pack.  
 9 So what I did was I took a look at their  
 10 initial configuration and then estimated the number of  
 11 bays, shelves, and networks and all of that kind of  
 12 stuff that you would need to add this quantity of DS-1s  
 13 and then rounded it to the appropriate number. In some  
 14 cases it was 4,000. In others it was 5.  
 15 **Q** Okay. I believe Mr. Heiberger stated one of the CMRS  
 16 carriers that you calculated in your RCC does not serve  
 17 all of ITC exchanges. Should those also be subtracted?  
 18 **A** The assumption that I made was, you know, if a carrier  
 19 was serving there, you know, we made some assumptions  
 20 on where they may expand service to, but, you know, if  
 21 we want to take a look at our RCC, for instance, and if  
 22 they're not going to serve, you know, a particular  
 23 service area or particular exchanges, yes, we could  
 24 reduce those for that particular carrier.  
 25 **Q** How did you determine some carriers would be serving

1 within the next five years and some would not be? I  
 2 think you used all six in the ITC example but then when  
 3 we get to Brookings you didn't use all 11.  
 4 **A** All 11 potential you mean?  
 5 **Q** Yes.  
 6 **A** What we did was, you know, we sat down and we talked  
 7 about, you know, with each client, you know, which  
 8 carriers are there today, which ones, you know, they  
 9 have heard of that are evaluating offering service, and  
 10 made our assumptions based on those.  
 11 And in particular if you take a look at, for  
 12 instance, Nextel, you know, there's a lot of areas  
 13 where Nextel is not offering service today but yet  
 14 they've made plans and announced plans to begin  
 15 offering services throughout South Dakota within the  
 16 next couple of years. So that's why we included Nextel  
 17 on a lot of those.  
 18 **Q** But then if at any time LNP is actually implemented and  
 19 there would be only four carriers, then you wouldn't be  
 20 allowed to include those costs, right, in any --  
 21 **A** I don't -- I wasn't, you know, positioning what would  
 22 actually go into the end-user cost with my numbers. I  
 23 was trying to get my hands around what the potential  
 24 total implementation cost could be.  
 25 **Q** And then I think this is true for 1B and for 3A. There

1 was a discussion with Mr. Wieczorek about directory  
 2 number pooling. Do you recall that?  
 3 **A** Yes.  
 4 **Q** And I believe that would be under additional software  
 5 features; is that correct?  
 6 **A** Correct.  
 7 **Q** And then when you go across there, how come that was  
 8 put in place for some of the carriers and not for all  
 9 of them?  
 10 **A** For some carriers we talked about whether we should  
 11 include that or not. We looked at the likelihood of  
 12 that being implemented in some areas and came to the  
 13 conclusion that, you know, it may not ever be a  
 14 requirement. And that was the case with West River and  
 15 Swiftel.  
 16 **Q** And a similar question for additional vendor fees. I  
 17 believe that was RUS paperwork that was only included  
 18 for three of them, I believe.  
 19 **A** Right. That goes back to how they are looking at  
 20 potentially financing it and whether they're on a, you  
 21 know, vendor upgrade program that waives some of those  
 22 costs.  
 23 **Q** Okay. And then on page 11 of your direct testimony.  
 24 **A** For Interstate?  
 25 **Q** Yes. For Interstate. Going to line 3.

1 **A** Okay.  
 2 **Q** I guess starting with 2, the recurring administrative  
 3 costs are based on hour per port, loaded administrative  
 4 costs at \$41 per hour. I believe for ITC you estimated  
 5 two ports, and then the number that you came up with  
 6 for the recurring costs on administration is 200.  
 7 How did you come up with 200 using \$41 an  
 8 hour and two ports?  
 9 **A** Hold that thought. Let me look.  
 10 (Witness examines documents)  
 11 **A** For which line item again, please?  
 12 **Q** This is for administrative costs recurring.  
 13 **A** I believe that I misstated the way that I actually did  
 14 the calculation in my direct testimony. The  
 15 calculation that I used in the exhibits was 2 and a  
 16 half hours and \$41.  
 17 **Q** Okay. And go to your direct, page 10, line 24. You  
 18 mentioned a cost of \$5,000 for administrative costs.  
 19 If you go to your exhibit, you have \$8,000. Which is  
 20 correct?  
 21 **A** That would be the nonrecurring?  
 22 **Q** Yes. Nonrecurring administrative.  
 23 **A** Could you repeat your question?  
 24 **Q** Yes. On page 10, line 24 you state the cost is assumed  
 25 to be 5,000. And the way I read it you have \$8,000.

1 A Right.  
 2 Q On the exhibit.  
 3 A And that actually was a typographical error that I had  
 4 in my notes here that I needed to correct when we  
 5 talked about it. But 5,000 is the correct number.  
 6 Q So the 8,000 on Exhibit 3A needs to be changed to  
 7 5,000?  
 8 A Correct.  
 9 Q You can just rerun it that way too; right?  
 10 A Okay.  
 11 Q And then going to page 19 on your direct testimony,  
 12 please.  
 13 A Page 19.  
 14 Q I'm sorry. Page 18 when you're talking about automated  
 15 SOA.  
 16 A Yes.  
 17 Q I believe with an automated SOA you would not assume  
 18 that there would be any increase if the porting  
 19 interval is shortened; is that correct?  
 20 A There would be no potential increase in, you know, the  
 21 licensing fees and that sort of stuff, but there are  
 22 possibilities that some of the recurring costs may go  
 23 up and that -- in my testimony I talked about if  
 24 those -- if the porting interval was reduced to the  
 25 point where we're talking hours and it turned out to be

1 center help desk?  
 2 A Yes.  
 3 Q Could you give me your thoughts? Is that an option?  
 4 A It's an option in what context?  
 5 Q Is it an option for your companies?  
 6 A In what context?  
 7 Q Instead of an automated SOA process.  
 8 A I guess I don't know how to answer that other than to  
 9 say it's definitely an option worthy of consideration  
 10 if the porting interval never changes and you have four  
 11 days and you can operate using faxes and some other  
 12 manual processes. As the porting interval becomes  
 13 shorter then, no, it's not an option and, you know,  
 14 everybody would have to use an automated system anyway.  
 15 Q Do you know how much shorter the porting interval would  
 16 have to become?  
 17 A I don't know, no.  
 18 Q Would two days mean that you would have to go to an  
 19 automated system?  
 20 A I don't know.  
 21 Q Do you know if the FCC would lessen the interval --  
 22 let's say that you put in costs for a manual SOA  
 23 system, which is cheaper than automated; is that  
 24 correct?  
 25 A Yes.

1 something that required an expedited request, you know,  
 2 night service, weekend service, or somebody working on  
 3 holidays or something along that line, obviously labor  
 4 costs are more on those types of days and the  
 5 applicable labor rate would apply.  
 6 But in terms of the, you know, service order  
 7 administration system itself, no, we're not  
 8 anticipating additional costs there.  
 9 Q So keeping on that same issue of SOA, could you go to  
 10 your rebuttal, page 6. Page 6, line 10 you state,  
 11 "Manual SOA processes will not be sufficient if the  
 12 CMRS carriers get the FCC to reduce the porting  
 13 interval from 4 days to 2.5 hours?"  
 14 A Uh-huh.  
 15 Q I assume the 2.5 hours is the current  
 16 wireless-to-wireless porting interval; is that correct?  
 17 A No. That has been a target that the FCC has put out  
 18 there. I don't believe that it's down to 2.5 hours.  
 19 Q Not for wireless to wireless it isn't? Okay.  
 20 A I thought it was two days today. Is that true?  
 21 Q But you state that it might go down to 2.5 hours as the  
 22 target?  
 23 A That's the target that I have read about, yes.  
 24 Q And did you read Mr. Williams' testimony when he  
 25 mentions the use of a number portability administration

1 Q And that would be based on the current four-day porting  
 2 interval?  
 3 A Uh-huh.  
 4 Q And let's say the FCC subsequently determines to lessen  
 5 that interval. Do you know if carriers could petition  
 6 to allow the increased costs based on a change in FCC  
 7 rules?  
 8 A I don't know. My understanding is that once you create  
 9 an end-user charge that's what it is, and I don't know  
 10 what the rules are for any changes myself. We put it  
 11 in up-front.  
 12 Q Not even for reductions, you're not aware?  
 13 A I'm not aware.  
 14 Q On your NTSO connection cost estimates, I believe that  
 15 you took them out. Why is that on Exhibit 3A?  
 16 A In my -- I believe it's in my rebuttal testimony -- the  
 17 short answer to that is that it really depends on how  
 18 the transporting is actually going to occur. And those  
 19 charges would only occur if there was some sort of  
 20 transiting option that we don't know whether it would  
 21 exist or not. So what we made the assumption of with  
 22 the revised 3A testimony was that we're going to have  
 23 direct connections and we're not going to have any  
 24 transiting or any other default dips and so we  
 25 eliminated those costs.

1 Q And then for when you talk about number of access  
 2 lines, did you include lifeline subscribers in that  
 3 number?  
 4 A Which number?  
 5 Q In the number of access lines, people who are on  
 6 lifeline.  
 7 A Which?  
 8 Q For ITC. I'm sorry.  
 9 A The access lines that were on my exhibits do include  
 10 lifeline.  
 11 Q Okay. And if those numbers were to be used for  
 12 surcharge, they wouldn't be included then, but your  
 13 testimony is it's not to be used for a surcharge;  
 14 right?  
 15 A Yeah. I wasn't positioning my numbers as surcharge.  
 16 My understanding is that you take lifeline lines off of  
 17 that and then use the remaining lines.  
 18 Q And then are you familiar with Western Wireless's  
 19 response to the Petitioner's Interrogatories? I'll  
 20 just show it to you in case you don't have it. It is  
 21 supplemental discovery requests dated June 14.  
 22 I'm on page 8, question 14. What is listed  
 23 there is Western Wireless estimates of the cost of  
 24 routing traffic, and they go through a list of how they  
 25 came up with their cost. Are there any costs on there

1 rebuttal? Line 1 you state, "Further the use of Qwest  
 2 as an aggregator has not been acceptable to the  
 3 Petitioners for a number of reasons, such as the  
 4 ongoing issues with Qwest and phantom traffic and other  
 5 service issues."  
 6 Could you explain the phantom traffic issue?  
 7 A Yes. Phantom traffic is a phenomenon where traffic is  
 8 terminated down the one-way trunk group that we've been  
 9 talking about and on most of the switching systems  
 10 you're actually able to measure the number of minutes  
 11 that terminate on that trunk group.  
 12 Let's just say for the purposes of easy math  
 13 that we terminate a million minutes a month on that  
 14 trunk group. Then we get a CABS bill with CABS  
 15 information and it is only reflecting 800,000 minutes.  
 16 And so there's a disagreement on, you know, what Qwest  
 17 is saying that they sent down the trunk group. They're  
 18 saying, hey, here's your CABS bill, here's 800 minutes  
 19 and this is where it came from, and it's like well, we  
 20 measured 200,000 minutes, well, what happened to the  
 21 200,000 minutes that aren't on your CABS? And the  
 22 answer to that is, well, we have no idea, hence the  
 23 term phantom traffic.  
 24 The reason that it's phantom is it gets into  
 25 a, you know, quite lengthy discussion about things like

1 that you would dispute?  
 2 MS. SISAK: I'm sorry. For  
 3 clarification, your question is if he would dispute  
 4 the costs or if he would dispute the methodology?  
 5 MS. WIEST: My question is costs,  
 6 does he dispute any of the costs.  
 7 A I guess I have no basis to dispute the \$400  
 8 nonrecurring charge for the Qwest tandem other than I  
 9 guess I would have to ask whether that number was  
 10 requested from Qwest and Qwest actually gave it or if  
 11 somebody estimated that or what. Without knowing what  
 12 kind of switch Qwest has or what release level their  
 13 cards are or anything like that, I just have absolutely  
 14 no idea whether that number is high, low, or correct.  
 15 The Qwest toll transit rate, you know, I --  
 16 you know, with six digits of accuracy listed there I'm  
 17 guessing that that's probably out of either an  
 18 agreement that exists between Western Wireless and  
 19 Qwest or, you know, something along that line. So I  
 20 have no idea whether that's right or not.  
 21 But the other assumptions in terms of the  
 22 number of local calls originated and things like that  
 23 appear to be within the same parameters that I used for  
 24 my estimates.  
 25 Q Okay. Thank you. Could you go to page 12 of your

1 information that would be provided by carriers that  
 2 would use Qwest as a terminating carrier -- or  
 3 transiting carrier to terminate that traffic and  
 4 they're not delivering things like the carrier  
 5 identification code or the jurisdictional information  
 6 parameter, JIP, and things like that so thus there's no  
 7 way of billing a CABS record back to a particular -- a  
 8 particular carrier.  
 9 So what the fear is is that since the phantom  
 10 traffic issue has gone unresolved for years, you know,  
 11 one of the ways that it's being addressed is actually  
 12 SB-144 that was signed earlier this year. You know,  
 13 that will help at least put some requirements on what  
 14 kind of industry standard signaling information has to  
 15 be provided.  
 16 But the bottom line is, you know, the ongoing  
 17 dispute on what is actually being terminated and what's  
 18 actually being billed, you know, is a huge issue and,  
 19 you know, things like voice-over IP and, you know,  
 20 other unidentified carriers will probably make that  
 21 problem worse. And so what, you know, the issue there  
 22 is that -- and this is pretty common with every ILEC  
 23 that is in the state of South Dakota today. They all  
 24 have these issues. They've all, you know, been trying  
 25 to work with Qwest for literally years to try to solve

1 some of these issues and other issues on top of that.  
 2 And the bottom line is ILECs typically don't view Qwest  
 3 as their carrier of choice for things like this.  
 4 **Q** What other service issues are there?  
 5 **A** Without knowing, you know -- I guess that, you know, I  
 6 don't have other examples for you. I know that I've  
 7 talked to several of our clients about the phantom  
 8 traffic issue. But there's been other issues with, you  
 9 know, outages or, you know, service issues because, you  
 10 know, their trunks go down or those types of service  
 11 issues. And it's simply because, you know, a lot of  
 12 times their circuits aren't on a SONET-protected ring  
 13 and things along that line.  
 14 **Q** Going to Exhibit 3A, what exact inputs did you use by  
 15 Mr. Williams that changed this exhibit?  
 16 **A** Do you have a color copy?  
 17 **Q** Yes.  
 18 **A** Okay. Everything that I left that Mr. Williams had  
 19 changed is in green. So he had changed stuff from the  
 20 original petitions that I had submitted. And so  
 21 everything that he -- you know, that he changed that  
 22 either, you know, they had some other calculation which  
 23 was close enough or whatever, I just left it as green  
 24 because, okay, yeah, it's within the range of  
 25 reasonableness. And that's why I also -- Mr. Williams

1 actually suggested removing, you know, those dip  
 2 charges that we discussed earlier.  
 3 **Q** Uh-huh.  
 4 **A** So I left those. And then everything that I felt like  
 5 Mr. Williams was not correct in his assumptions for  
 6 either removing or reducing a number, I filled the  
 7 number back in and turned it yellow.  
 8 **Q** And then Exhibit 3C represents all CMRS -- how does  
 9 that differ from 3A?  
 10 **A** Yeah. The idea with Exhibits 3A, 3B, and 3C is this:  
 11 If you refer to the ports-per-year line, which is -- I  
 12 believe it's the last line on 3A, those are the number  
 13 of ports per year that we projected with our original  
 14 petition.  
 15 So the calculation that I used for that was  
 16 if we take the total number of access lines, which is  
 17 up a little ways. It says access lines total, 2003.  
 18 We subtract the number of annual ports, that gives us  
 19 the -- you know, that gives us the number of lines that  
 20 we would actually have left to spread costs against.  
 21 And what I was trying to show was that in Western  
 22 Wireless's testimony the number of ports that they were  
 23 projecting for -- you know, for all of these areas  
 24 varied and, in fact, they were greater than the ones we  
 25 submitted with our petition.

1 So 3B is a representation of how the  
 2 recurring costs would change based on Western  
 3 Wireless's porting quantities that were provided by  
 4 Ron Williams.  
 5 Then we made the assumption, okay, that's  
 6 what happens if Western Wireless is correct with the  
 7 number of ports that they submitted in their testimony.  
 8 And so if we take that a step further and we look at  
 9 the number of total ports there would be if all  
 10 carriers had the same success rate that Western  
 11 Wireless did, those numbers are represented as  
 12 Exhibit 3C.  
 13 **Q** And whose number of estimates of ports do you consider  
 14 to be more accurate, your original or Mr. Williams?  
 15 **A** I consider ours to be more accurate judging by the fact  
 16 that, you know, in talking to managers and, you know,  
 17 other -- you know, other people in the industry there  
 18 does not seem to be a huge demand for -- you know, for  
 19 wireless to wireline -- I'm sorry.  
 20 Wireline-to-wireless ports.  
 21 And I guess that information is backed up by  
 22 a recent study that came out from OPASCO that surveyed  
 23 several other member companies who were inside the top  
 24 100 MSAs and they had a whole list of companies and it  
 25 doesn't really matter who they were but the important

1 thing is there if you look at the number of ports  
 2 they've had since they were forced to implement it back  
 3 in November, it's very small numbers. It's usually all  
 4 zeroes, maybe one or two.  
 5 So the numbers that we were projecting I  
 6 think are more accurate based on the information that's  
 7 coming in from the OPASCO from their member companies  
 8 in other parts of Midwest.  
 9 MS. WIEST: Thank you. I have  
 10 nothing further.  
 11 MR. SMITH: Do the Commissioners  
 12 have questions at this point before we go to  
 13 redirect so you'll know what you're up against?  
 14 VICE CHAIR HANSON: You don't want  
 15 to go redirect first?  
 16 MR. SMITH: I think maybe they'd  
 17 like a shot at rehabilitation depending on what you  
 18 ask, Gary.  
 19 VICE CHAIR HANSON: I thought you  
 20 were going to say they'd like a shot at the  
 21 Commissioners.  
 22 MR. SMITH: Depends on how you vote.  
 23 CHAIRMAN SAHR: Depends on what you  
 24 ask.  
 25 VICE CHAIR HANSON: I'll ask a few

1 questions, if I may. Mr. DeWitte, well, first of  
 2 all, just a general question. I don't believe any  
 3 of the Commissioners have a colored copy of the 3A  
 4 that has been discussed. Do you have color copies?  
 5 So when you start talking about greens and yellows  
 6 and such, except for the markings that we've put on  
 7 it, we don't have color copies.  
 8 (Mr. Smith hands Commissioner copy)  
 9 VICE CHAIR HANSON: Thank you.  
 10 Amazing what you can get when you're Commissioner.  
 11 I just noticed that these show confidential on them  
 12 and we're discussing them. How confidential are  
 13 these papers since we've been discussing them?  
 14 THE WITNESS: The information that I  
 15 filled in is all information that was -- you know,  
 16 that we had -- I had either gotten or included in  
 17 my rebuttal or whatever. I didn't bother removing  
 18 the confidentiality stamp from Mr. Williams'  
 19 numbers so if Mr. Williams' numbers are  
 20 confidential --  
 21 MR. WIECZOREK: I can speak to that.  
 22 I believe when I presented the document with the  
 23 testimony it was marked confidential only because  
 24 it included the Petitioner's original numbers and  
 25 those were provided as a confidential exhibit to us

1 floor.  
 2 VICE CHAIR HANSON: Thank you.  
 3 Mr. DeWitte.  
 4 THE WITNESS: Yes.  
 5 VICE CHAIR HANSON: I appreciate  
 6 very much all of the information that you've  
 7 provided through your testimony and through the  
 8 written testimony as well. I'm glad we didn't have  
 9 to try to ferret out the exhibits through some type  
 10 of a written testimony.  
 11 The information on 3A on your rebuttal  
 12 testimony, something I'd like to touch on a little  
 13 bit, but first of all, you had said that there were  
 14 an infinite number, and I'll accept that you may  
 15 have exaggerated when you said there were an  
 16 infinite number of options available for routing  
 17 and you examined those options which could be done  
 18 now and I wasn't quite certain when you said after  
 19 that something about hundreds of others which  
 20 require negotiations and changes of some sort.  
 21 Were there a number of other options that you  
 22 explored? It sounded as if you did. Obviously if  
 23 you subtract hundreds from infinite number you have  
 24 quite a few left over.  
 25 THE WITNESS: We talked about

1 originally so I continued it so there would be no  
 2 confusion we'd be disclosing something publicly.  
 3 So if there's no objection, we have none either.  
 4 VICE CHAIR HANSON: At this juncture  
 5 then these papers are not confidential, we can --  
 6 MR. WIECZOREK: If the Petitioners  
 7 don't want to keep the numbers confidential -- it's  
 8 their numbers.  
 9 VICE CHAIR HANSON: I know. But at  
 10 the same time if someone was doing an interview  
 11 outside afterwards and starts using some numbers, I  
 12 don't --  
 13 THE WITNESS: The only issue that I  
 14 have is that on Exhibit 3A, 3B, and 3C I -- could I  
 15 just have like 30 seconds to ask on the SOA costs  
 16 where I still have that range in there, is the  
 17 range okay?  
 18 MS. SISAK: May I confer with my  
 19 client on this limited question or my witness?  
 20 MR. SMITH: Yes. We're going to  
 21 take a recess for a couple of minutes. Let's say 5  
 22 minutes.  
 23 (A short recess is taken)  
 24 MR. SMITH: We're back on the  
 25 record, and Commissioner Hanson, you have the

1 several different potential network architectures,  
 2 and what we came to is we have a short amount of  
 3 time in which to put together some costs. We don't  
 4 have any time to negotiate with any carriers to try  
 5 to implement one thing or the other hoping that the  
 6 numbers are right.  
 7 So rather than, you know, spend time on things  
 8 that may never come to fruition, let's put together  
 9 some cost estimates for things that we absolutely  
 10 know that we can do today with the existing  
 11 agreements that are in place today and that don't  
 12 require changes of, you know, backing support  
 13 systems and things along that line with rating and  
 14 routing and so forth.  
 15 So in essence what we did is took the existing  
 16 agreements, we took, you know, what could happen in  
 17 the exchanges, you know, made the assumption that  
 18 we had a POI in each exchange for each wireless  
 19 carrier, et cetera, et cetera, and based our costs  
 20 on those.  
 21 VICE CHAIR HANSON: Okay.  
 22 THE WITNESS: And I think the real  
 23 answer to your question is, you know, I think as  
 24 evidenced by what happened earlier today with James  
 25 Valley, you know, once some of the issues that

1 we've addressed in our testimony have been, you  
2 know, addressed and agreed to, yeah, then there are  
3 other solutions that pop up.

4 And, of course, in that particular case, you  
5 know, the transport went away for Western Wireless  
6 because of that agreement. But yet, you know, they  
7 are fulfilling having a POI in their -- you know,  
8 in James Valley's exchange as, you know, they  
9 needed to do so pursuant to their reciprocal comp  
10 agreement.

11 VICE CHAIR HANSON: So in the real  
12 world if you were the Jerry Heiberger managing  
13 facilities, you would explore other avenues?

14 THE WITNESS: Yes. And the thing  
15 that would need to be explored when you're  
16 evaluating those is not on an individual wireless  
17 carrier by wireless carrier basis but a solution  
18 that would solve all of these issues for all of the  
19 carriers, not just one carrier.

20 Because what may work well for one carrier  
21 doesn't necessarily work for the others. And  
22 that's part of the valuation that there, you know,  
23 frankly wasn't time to evaluate or negotiate.

24 VICE CHAIR HANSON: Do you think the  
25 James Valley solution would be precedent that could

1 be worked in with the others?

2 THE WITNESS: I think that the James  
3 Valley solution while, you know, it obviously was  
4 good for James Valley, you know, merits evaluation  
5 by other carriers.

6 There may be some issues on, you know, where  
7 the POIs are, some common POIs but I think the  
8 important precedence that the James Valley petition  
9 gives us is that it takes -- it puts the  
10 responsibility for transport back on the wireless  
11 carrier rather than the Petitioners. It, you know,  
12 establishes a POI in the local serving area that,  
13 you know, the wireless carrier is interested in  
14 serving. So in other words, we don't have to  
15 transport local traffic outside of our service  
16 area.

17 Thirdly, you know, that single DS-1 can be  
18 split up into DSOs to serve multiple serving areas  
19 within that company exchange, thereby, you know,  
20 respecting the requirements that are actually in  
21 the reciprocal comp agreement today.

22 Now, you know, prior to putting all of these  
23 proposals together, none of those things were  
24 available, hence, you know, that wasn't an option  
25 that was explored for all the Petitioners.

1 VICE CHAIR HANSON: Thank you. Is  
2 it realistic for us to believe then looking at the  
3 \$4,000 option and the \$576,000 option that not  
4 withstanding the recurring costs, et cetera, is it  
5 realistic for us to believe that there are  
6 considerably less expensive ways of skinning this  
7 cat than the methodology that was shown on 3A?

8 THE WITNESS: I believe there are  
9 other options that could be explored. However, you  
10 know, the option that we presented is valid and it  
11 will work absent any other negotiations. But I  
12 think, to your point, I don't think anybody's  
13 arguing that those are large numbers.

14 And, you know, one of the things that  
15 definitely should happen is to explore other  
16 alternatives that are palatable to everybody, and  
17 perhaps a working group or something like that is  
18 the way to go on that. However, you know, the part  
19 that needs to be there is that, you know, it needs  
20 to address not only, you know, the requirements,  
21 you know, that Western Wireless has brought up in  
22 this proceeding but, you know, also all future  
23 comers.

24 And that's why a working group may be one of  
25 the ways to accomplish that end.

1 VICE CHAIR HANSON: So you'd conduct  
2 further research and bring folks together to try  
3 and come up with a common method by which to  
4 resolve this.

5 THE WITNESS: Right.

6 VICE CHAIR HANSON: But you would  
7 not use the method apparently that you've outlined  
8 here on 3A?

9 THE WITNESS: No. Admittedly the  
10 method that we used in here was based on the  
11 fact --

12 VICE CHAIR HANSON: I understand  
13 from your previous testimony.

14 THE WITNESS: Yeah. But I can  
15 assure you that this method will, in fact, work and  
16 everything will write and route correctly.

17 CHAIRMAN SAHR: You know they have  
18 the page 2 up there.

19 THE WITNESS: I thought they had the  
20 other one.

21 CHAIRMAN SAHR: You said this method  
22 and you pointed at that. I think you probably  
23 meant this method.

24 THE WITNESS: Yeah. They shouldn't  
25 change things on me when I'm not there.

241

1 VICE CHAIR HANSON: Well, again, I  
 2 very much appreciate your testimony and the  
 3 information that you've provided to us. Thank you.  
 4 COMMISSIONER BURG: Okay. I've got  
 5 a couple.  
 6 MR. SMITH: Commissioner Burg.  
 7 COMMISSIONER BURG: You testified  
 8 that you calculated on a per-subscriber cost basis;  
 9 is that correct?  
 10 THE WITNESS: Correct.  
 11 COMMISSIONER BURG: Does that mean  
 12 that you could calculate a different per-subscriber  
 13 cost for each company you considered then?  
 14 THE WITNESS: Correct.  
 15 COMMISSIONER BURG: That would be  
 16 the outcome. I just wanted to follow that through.  
 17 Probably just one other question to follow up on  
 18 Gary's a little.  
 19 I'm trying to visualize because I think the  
 20 idea that's been coming through is why didn't we do  
 21 all of these things, but if I understand it right,  
 22 what you had to do this time is decide -- what the  
 23 companies had to do at this time is decide whether  
 24 to ask for the exemption or suspension or exception  
 25 at this point, which would have to go to any

242

1 carrier that would come.  
 2 THE WITNESS: Correct. And if we  
 3 take a look at the timeline, I believe that most,  
 4 you know, industry watchers were somewhat surprised  
 5 by the Order when the FCC released it, all the  
 6 things that were contained into it. You know, it  
 7 appeared that it went much further than most, you  
 8 know, people who follow that kind of stuff and  
 9 project those outcomes had anticipated.  
 10 And on top of that, you know, it was a rather  
 11 short timeline. You know, it came out on  
 12 November 10 and, you know, May 24 is when you have  
 13 to have everything there. So, you know, obviously,  
 14 you know, the first thing you need to look at is  
 15 oh, now we have this obligation that we didn't  
 16 think was going to be coming for another couple of  
 17 years and what's it going to cost, how do we get  
 18 our arms around it, what new things are in this  
 19 order that we don't -- that we didn't anticipate,  
 20 do we agree with them or not, et cetera, et cetera.  
 21 And that was kind of the genesis of starting  
 22 to evaluate what was going on. After looking at  
 23 all of those variables it became clear that  
 24 transport aside it was still a big number and, you  
 25 know, with the unresolved issues there were still

243

1 some things that required and warranted further  
 2 study. Hence, the decision was made to seek a  
 3 suspension until those issues were resolved, you  
 4 know, or in the case of James Valley until  
 5 something else could be negotiated.  
 6 COMMISSIONER BURG: And I heard at  
 7 least one Commissioner say that perhaps they were  
 8 too aggressive and there were too many unresolved  
 9 issues to have forced this at this time.  
 10 What do you see as those unresolved issues  
 11 that we still have out there? That's part of  
 12 what's concerning me because it's one thing to  
 13 analyze the known but it's quite something else to  
 14 decide what the unknown -- and some of those are  
 15 decisions that the FCC still needs to make; is that  
 16 correct?  
 17 THE WITNESS: That's correct. The  
 18 issues and, you know, the largest issue that's out  
 19 there is, of course, transport because while the --  
 20 and, you know, I confess I'm not an attorney so  
 21 you'll have to let me paraphrase a few things but  
 22 my understanding of what's actually in the  
 23 Telecommunications Act is that, you know, in an LNP  
 24 environment we're not obligated to transport  
 25 outside of our service area.

244

1 However, the FCC in their November 10 Order  
 2 made the assumption that all Interconnection  
 3 Agreements and all reciprocal compensation  
 4 agreements and all things like that obviously must  
 5 already be existing. Therefore, you know, you  
 6 should just do it.  
 7 Well, you know, I think that it's my personal  
 8 belief that that's probably true in the urban areas  
 9 but it's certainly not true for rural South Dakota.  
 10 So one of the unresolved issues is if the FCC --  
 11 was their intent really to place the burden of  
 12 transport on, you know, the Petitioners in this  
 13 case if it doesn't already exist? And so that's  
 14 one of the unresolved issues, and I think with the  
 15 negotiations that we've had today and some of the  
 16 outcomes like with James Valley, clearly, you know,  
 17 where it makes sense, you know, that obligation  
 18 falls back to the wireless carriers.  
 19 Other things that are not there today are  
 20 things like a level playing field. You know, the  
 21 FCC November 10 Order talked about the ability to  
 22 for a wireline subscriber to port his number to a  
 23 wireless carrier. However, they left unresolved  
 24 the reverse of that which was wireless to wireline.  
 25 The reason for that is we have the rate center

1 issue and the rate center issue deals with, you  
 2 know, what do you consider a local call or a toll  
 3 call if the rate center's down the line. So that's  
 4 still an unresolved issue that warrants further  
 5 study.  
 6 Then obviously the implementation costs are an  
 7 issue. The porting interval's a huge issue because  
 8 we have had discussion today where, you know, today  
 9 if the porting interval would never change from  
 10 four days and everybody has adequate time to do  
 11 testing and coordination and things like that,  
 12 yeah, there's some cheaper solutions that may work  
 13 implementation-wise for SOA costs, but since that's  
 14 a huge unknown and the direction appears to be that  
 15 that interval is decreasing, well, then that adds  
 16 the additional burden of having to go automated.  
 17 So there's some of those types of issues that  
 18 continue to be unresolved. And, you know, those  
 19 reasons plus the costs were the impetus for filing  
 20 these petitions.  
 21 COMMISSIONER BURG: That's all.  
 22 CHAIRMAN SAHR: Good afternoon,  
 23 Mr. DeWitte.  
 24 THE WITNESS: Good afternoon.  
 25 CHAIRMAN SAHR: Thank you very much

1 for coming today and obviously you have put  
 2 substantial time and effort into the materials that  
 3 you have submitted to the Commission so I  
 4 appreciate that.  
 5 One of the things that Commissioner Hanson  
 6 touched upon is the possibility of a working group  
 7 and it was something kind of that I explored a  
 8 little bit yesterday with Mr. Heiberger. If you  
 9 were going to put together a working group to  
 10 analyze some of these issues, and I think it's  
 11 important to keep in mind the context of this being  
 12 a fairly short time period, as you mentioned, from  
 13 November until even today here in June to sit down  
 14 and analyze what type of options might be out there  
 15 and basically bring people together and try to work  
 16 as much as possible on a team to try to figure out  
 17 solutions here, who do you think would be  
 18 appropriate people to be on that working group?  
 19 THE WITNESS: I believe that you  
 20 would have to have representation from the major  
 21 wireless carriers that are serving the state and,  
 22 you know, maybe it's a subset of those groups or  
 23 whatever. But, I mean, the obvious choices would  
 24 be companies like Western Wireless, Verizon, Sprint  
 25 and, you know, those types of companies. In

1 addition, I think you'd have to have representation  
 2 from the rural independent local exchange carrier  
 3 companies. And, you know, perhaps that would be  
 4 individual company managers or a subset of those  
 5 managers plus SDTA or something along that line.  
 6 And then, you know, if there are other  
 7 interested parties, you know, perhaps, you know --  
 8 you know, perhaps Qwest or somebody else like that  
 9 would be a party to that too or SDN or, you know,  
 10 companies like that. But, you know, all of those  
 11 companies have substantial investment and  
 12 substantial facilities in the state and those would  
 13 be the obvious choices for people to, you know, to  
 14 be included in a group that's evaluating what the  
 15 best solution would be.  
 16 CHAIRMAN SAHR: And in your  
 17 professional judgment if we were looking at  
 18 solutions like we've seen on the diagram that's  
 19 currently up here in the room and the following  
 20 diagram, I guess they're from Exhibit 5, there's  
 21 two solutions there, there may be others.  
 22 THE WITNESS: Uh-huh.  
 23 CHAIRMAN SAHR: What would be an  
 24 appropriate time frame to expect a group to be able  
 25 to sit down and do some reasonable analysis on

1 cost?  
 2 THE WITNESS: I guess I would have  
 3 to answer that with I think that part of the answer  
 4 to that question is how many actual alternatives  
 5 are we going to be looking at? Because, you know,  
 6 if we're looking at, you know, like 10  
 7 alternatives, you know, that could obviously take  
 8 much longer than if we, you know, are evaluating  
 9 two or three or whatever.  
 10 But I guess that it's my opinion that it would  
 11 need to be an absolute minimum of a year to 18  
 12 months, you know, perhaps as long as two years.  
 13 And the reason for that is that I think it would  
 14 take a while just to get all of the information  
 15 from all of the interested parties to, you know,  
 16 understand, you know, what facilities are  
 17 available, what kind of contracts need to be in  
 18 place and those types of things, and perhaps the  
 19 first goal is within the first six months or the  
 20 first third of that or whatever to identify, you  
 21 know, what tools are available, you know, from  
 22 everybody's disposal.  
 23 Then the next phase of that would be to come  
 24 up with alternatives and then evaluate those  
 25 alternatives and perhaps select the first two or

1 three and maybe that would take six months of  
 2 meetings.  
 3 Then after that it becomes a question of, you  
 4 know, how exactly is it going to be implemented,  
 5 you know, are we going to have -- is it going to  
 6 take six months or so to agree as to what the  
 7 alternative needs to be and then, you know, once  
 8 that agreement's made, then everybody has X-amount  
 9 of time to implement, or are those done in concert  
 10 or how that would go.  
 11 But, you know, I guess that, you know, it's  
 12 our feeling that a six-month interval like, you  
 13 know, we were given before clearly is an adequate  
 14 time. And I guess it depends on, you know,  
 15 scheduling and how often the meetings are and all  
 16 of that stuff as to what the appropriate time is.  
 17 But I certainly think it's probably in excess of a  
 18 year.  
 19 CHAIRMAN SAHR: What if the parties  
 20 speak on a more frequent basis than we've seen in  
 21 these proceedings where we've gotten into a little  
 22 bit of finger pointing about who was supposed to  
 23 call whom and we've limited it to identifying  
 24 options and doing cost analysis on the options and  
 25 didn't go any further than that and brought that to

1 THE WITNESS: Yes.  
 2 CHAIRMAN SAHR: Have any of them  
 3 filed for forbearance in North Dakota?  
 4 THE WITNESS: Yes, they are.  
 5 CHAIRMAN SAHR: Are the issues  
 6 relatively similar in North Dakota as South Dakota  
 7 or do we get into different issues depending on the  
 8 states or more technology based or how do those  
 9 sorts of things compare?  
 10 THE WITNESS: The issue in North  
 11 Dakota was we used the same formula arguments, cost  
 12 analyses, all of those types of things for our  
 13 North Dakota clients and we actually submitted  
 14 those petitions around the same time that we  
 15 submitted these.  
 16 However, the North Dakota Commission  
 17 unilaterally decided that, you know, they, based on  
 18 some state regulation, they didn't have the  
 19 authority to rule on it, or at least that's what I  
 20 was told. But subsequently all of those petitions  
 21 were denied.  
 22 CHAIRMAN SAHR: And where do your  
 23 clients go from there? Did they go to the FCC  
 24 then?  
 25 THE WITNESS: I think it really

1 the Commission for evaluation so we're not going to  
 2 go through and have postmediation meetings, those  
 3 types of things after the analysis is done. How  
 4 long do you think that would take?  
 5 THE WITNESS: I would estimate that  
 6 that would probably be around a year.  
 7 CHAIRMAN SAHR: Go ahead.  
 8 THE WITNESS: Perhaps longer. But a  
 9 year is what I would say.  
 10 CHAIRMAN SAHR: And this might be a  
 11 question better asked for one of the other  
 12 managers, but do you know if one of the clients  
 13 that you represent, if we are offering a wireless  
 14 product, would they be able to -- a customer there  
 15 be able to port from their wireline number to their  
 16 wireless product?  
 17 THE WITNESS: I don't know.  
 18 CHAIRMAN SAHR: Okay. I may ask  
 19 that question again later.  
 20 THE WITNESS: Okay.  
 21 CHAIRMAN SAHR: Then it may be a  
 22 little bit comparing apples to oranges but I'm just  
 23 kind of curious, especially with your background  
 24 and expertise, do you have any North Dakota  
 25 clients?

1 depends on which client it was. Most of our  
 2 clients opted to go ahead and begin the process of  
 3 upgrading their switches and, you know, going  
 4 through the preparations that they needed to, you  
 5 know, complete in order to become LNP compliant.  
 6 CHAIRMAN SAHR: Are they doing  
 7 routing like you've proposed for ITC, or are they  
 8 doing different types of routing?  
 9 THE WITNESS: What their plan is,  
 10 they've ordered additional trunking facilities.  
 11 They're upgrading their switches, they've got the  
 12 software in there, they just aren't actually  
 13 building the facilities until they actually get a  
 14 request.  
 15 And for the ones that I know of, none of them  
 16 have gotten a request at all so they haven't, you  
 17 know, built or activated any of the facilities.  
 18 They have upgraded their switches to have the  
 19 appropriate software.  
 20 CHAIRMAN SAHR: So the answer, are  
 21 they using similar routing proposals or --  
 22 THE WITNESS: No. What they're  
 23 doing is they've got everything ready to go, you  
 24 know, based on -- you know, if they -- in some of  
 25 these areas it's if they ever get a request they

253

1 are planning to, if necessary, you know, route it  
 2 over its own dedicated facilities like that.  
 3 (Indicating).  
 4 However, you know, to date they haven't been  
 5 approached by anybody who's interested in the  
 6 service. They also have not been approached or  
 7 approached anyone for negotiation.  
 8 CHAIRMAN SAHR: How do the recurring  
 9 and nonrecurring costs under the North Dakota  
 10 method compare to the South Dakota requests that  
 11 we've had or the analysis that you've done?  
 12 THE WITNESS: In the petitions, the  
 13 arguments and the estimates that I used were they  
 14 were the same in terms of format and assumptions.  
 15 Obviously the numbers were different. In actual  
 16 implementation, you know, most of the companies  
 17 have opted to go with a low-tech interface just  
 18 because they can do that by signing an NDA and  
 19 getting things rolling. However, they're all  
 20 prepared to go with an automated SOA should the  
 21 porting interval be reduced.  
 22 But they've opted to, you know, kind of wait  
 23 and, you know, not impose any end-user charges or  
 24 anything like that until they actually get a real  
 25 request for a port because that way they can

254

1 evaluate exactly what their costs are based on the,  
 2 you know, outcome of courts and all of that kind of  
 3 stuff at that point before they actually nail that  
 4 end-user charge down.  
 5 CHAIRMAN SAHR: We actually talked  
 6 yesterday about the Minnesota, and I'll term it  
 7 proposal, because as far as I know that hasn't been  
 8 approved by anyone and it's part of a pending case.  
 9 THE WITNESS: Yeah.  
 10 CHAIRMAN SAHR: Do you know, with --  
 11 would you just critique that type of -- or analyze  
 12 that for kind of the pros and cons of how that  
 13 would work or would not work in South Dakota?  
 14 MS. SISAK: Before the witness  
 15 answers, may I remind the Commission I believe the  
 16 witness has testified that he's really not familiar  
 17 with that proposal so if you would like him to  
 18 address something specifically in it maybe it would  
 19 be helpful if he had a chance to read it.  
 20 CHAIRMAN SAHR: I was trying to stay  
 21 away from that piece of paper. I guess I can cut  
 22 to the chase. Are you able or unable to make  
 23 generalizations about the MIC proposal that would  
 24 give us some sort of application to South Dakota?  
 25 THE WITNESS: At this point I am

255

1 unable to do that because I don't exactly know what  
 2 the rates are or what is included or not included  
 3 in those rates.  
 4 So other than the 30,000-foot view that we've  
 5 talked about where the other picture that was up  
 6 there, you know, apparently that mimics it. I  
 7 don't know if that's true or false. But I don't  
 8 know what the rates represent or, you know, what  
 9 else is in there so I can't comment on it.  
 10 CHAIRMAN SAHR: That's  
 11 understandable you don't have the firsthand  
 12 knowledge that you have from the North Dakota  
 13 situation.  
 14 Have you done any work for any clients in  
 15 other states on implementing LNP?  
 16 THE WITNESS: You mean from the  
 17 suspension of petition standpoint?  
 18 CHAIRMAN SAHR: Just technically  
 19 implemented.  
 20 THE WITNESS: Yes. Yes, we have.  
 21 CHAIRMAN SAHR: Well, could you talk  
 22 a little bit about what sort of methods are being  
 23 used there?  
 24 THE WITNESS: State-by-state basis.  
 25 You know, there are companies that are in other

256

1 states -- we have a client in particular in Ohio  
 2 that elected early on not to seek an LNP waiver  
 3 based on where they were located. They figured  
 4 that, you know, they were close enough to a metro  
 5 area it would never fly. So went ahead and made  
 6 the decision early on to upgrade their switches.  
 7 So they went ahead and upgraded. They put an  
 8 automated service order administration and it's up  
 9 and operational. They haven't set up trunk  
 10 facilities yet, but they have actually talked to  
 11 the two major carriers that are in their area, no  
 12 resolution at this point, but, you know, they're  
 13 trying at this point to, you know, get direct  
 14 connections into their service areas.  
 15 And they have been ongoing in those  
 16 negotiations now going on eight months from my  
 17 understanding. But the bottom line is that they  
 18 have begun to implement all of these issues -- or  
 19 all of these costs based on, you know, their belief  
 20 and their analysis that it was, you know, something  
 21 that their State Commission was not going to allow  
 22 them to get a suspension on.  
 23 So, you know, from that experience with, you  
 24 know, coming up with, you know, what it costs to do  
 25 the translations, what it costs to do testing for

1 carriers, you know, if there's -- you know, if they  
 2 have to duplicate some dialing plan or whatever,  
 3 you know, a lot of the experiences that came from  
 4 that plus another company in Iowa is where those  
 5 real-world experiences come from.  
 6 And then of course just translations  
 7 experience in general.  
 8 CHAIRMAN SAHR: Thank you. And  
 9 maybe this is covered in your prefiled testimony  
 10 and I just missed it.  
 11 When we talk about the costs, for instance,  
 12 that are outlined on your exhibits, and I'm not  
 13 going to ask any specific questions, but those type  
 14 of costs, are any of those costs the companies  
 15 might be reasonably expected to incur within, say,  
 16 a few years anyway? When you sort of talk about  
 17 the upgrades, are any of these the sort of things  
 18 that perhaps would be -- I don't want to use the  
 19 term regular maintenance, but would it be something  
 20 that might be expected to happen at some point in  
 21 time anyway?  
 22 THE WITNESS: And I think the answer  
 23 to your question is -- and most of those costs we  
 24 didn't include anyway because they were already at  
 25 the proper generic level or they already had the

1 software or whatever.  
 2 You know, if we look at, you know, the  
 3 companies that we've represented, with the  
 4 exception of James Valley they're all Nortel  
 5 products. Nortel is a vendor -- is notorious I  
 6 believe would be the correct word for charging a  
 7 right-to-use fee for just about everything that one  
 8 of their switching systems performs.  
 9 So unless you specifically would order  
 10 something like LNP and you are, you know, on a  
 11 Nortel platform, you would "never get it for free"  
 12 unless you paid for it.  
 13 CHAIRMAN SAHR: Are any of the  
 14 companies or cooperatives that did not file in  
 15 South Dakota, are any of those clients of yours?  
 16 THE WITNESS: I guess that I wasn't  
 17 aware that there was companies that hadn't filed.  
 18 But I guess not. Or at least if it is one of our  
 19 clients, I'm not aware of it.  
 20 CHAIRMAN SAHR: And are you familiar  
 21 with the James Valley system?  
 22 THE WITNESS: Yes.  
 23 CHAIRMAN SAHR: My understanding is  
 24 there's negotiations on the transport costs. Is  
 25 that correct?

1 THE WITNESS: Correct.  
 2 CHAIRMAN SAHR: Are the other costs  
 3 that you would see, are they still going to need to  
 4 be borne by James Valley as far as the other  
 5 nonrecurring and monthly recurring costs outside  
 6 the transport?  
 7 THE WITNESS: If we refer to the  
 8 exhibit, the --  
 9 CHAIRMAN SAHR: Are we looking at  
 10 3A?  
 11 THE WITNESS: Yeah. The technical  
 12 implementation and testing, a portion of that will  
 13 still be required because that number is generated  
 14 on a per-carrier basis. But the bottom line,  
 15 they're still going to have to look at what -- you  
 16 know, what a -- you know, what needs to be done to  
 17 set up proper routing translations for Western  
 18 Wireless pursuant to their negotiations. So some  
 19 of that will still be there.  
 20 The query charges attributable to wireline  
 21 will still be there. And I guess that I haven't  
 22 asked them about what their plans are for marketing  
 23 or things along that line to explain what the  
 24 end-user charge is but I will assume they will  
 25 still incur some costs there.

1 And then, you know, I guess that I don't know  
 2 the details on, you know, what their plans are on  
 3 the recurring end with some of those. But, you  
 4 know, they will have some testing and translations  
 5 and service order activity that will have to be  
 6 done, and, you know, if they're -- and I guess  
 7 that's driven by the number of ports and the number  
 8 of people they have trained and all of that kind of  
 9 stuff.  
 10 So, you know, there are some of those things  
 11 that are still going to be there. However, I don't  
 12 know what James Valley's plans are in terms of  
 13 creating an end-user charge. But some of those  
 14 types of things would obviously be candidates for  
 15 it.  
 16 CHAIRMAN SAHR: That's partially  
 17 where I was going with it. I can ask one of the  
 18 managers if you don't know how they intend to  
 19 handle it. And it's probably and possibly beyond  
 20 the scope of this Commission's proceeding and  
 21 beyond the scope of what we may have jurisdiction  
 22 over, but I am curious on the consumer impact. Do  
 23 you know, do the providers intend to do a straight  
 24 pass-through on the charges or are they going to  
 25 eat part of this or do you know anyway on how they

1 intend to break down the costs?  
 2 THE WITNESS: I have absolutely no  
 3 idea. And I believe part of that decision is  
 4 predicated on, you know, what actually is the  
 5 impact going to be for things like transport or  
 6 whatever.  
 7 So, you know, I don't know if there's any  
 8 preconceived notions on they're going to go halves  
 9 or what they may do. I have no idea.  
 10 CHAIRMAN SAHR: Nontechnical term;  
 11 right? And the reason I'm asking is even taking  
 12 out -- again, I'm pleased to hear negotiations are  
 13 going well on that particular one, but even taking  
 14 out all or part of the transport costs there's  
 15 still some sizable costs that are going to be  
 16 associated with this, and I was just curious to see  
 17 if you knew what the end impact on the consumer  
 18 would be.  
 19 THE WITNESS: And I don't.  
 20 CHAIRMAN SAHR: Okay. And that's  
 21 probably better off for me to ask one of the  
 22 managers. So I appreciate your assistance and  
 23 thank you for coming to Pierre.  
 24 THE WITNESS: Thank you.  
 25 MR. SMITH: I have a couple of

1 questions, Mr. DeWitte, and it will be short and  
 2 we'll move on.  
 3 If we look at the bottom of the James Valley  
 4 exhibit, inside that box it says, LNP cost per line  
 5 per month excluding transport.  
 6 THE WITNESS: Uh-huh.  
 7 MR. SMITH: Again, these eyes are  
 8 mighty old but I think that looks like --  
 9 THE WITNESS: 55 cents.  
 10 MR. SMITH: 55 cents? And then what  
 11 is the next number?  
 12 THE WITNESS: 30.94.  
 13 MR. SMITH: No. I'm looking to the  
 14 right, the monthly --  
 15 THE WITNESS: That would be 0.61 or  
 16 61 cents.  
 17 MR. SMITH: So basically if they did  
 18 a straight line end-user charge we're talking 61  
 19 cents if the transport issue is totally solved?  
 20 THE WITNESS: Actually I believe  
 21 that the 61 cents is a -- it's a -- the calculation  
 22 was actually put in by Mr. Williams and I just left  
 23 it there, but if you take the 55 cents that is just  
 24 a straight mathematical calculation and you take it  
 25 times a factor of 12 percent so, in other words,

1 1.12, that's what the 61 percent is. And I believe  
 2 what Mr. Williams was trying to show there is with  
 3 growth and inflation and, you know, rate of return  
 4 and all of those types of factors in there, it  
 5 would be a higher number. So I have no idea where  
 6 he got the 12 percent. It's just that I just left  
 7 it in there because it was his exhibit to start  
 8 with.  
 9 MR. SMITH: Okay. I think just to  
 10 get an order of magnitude, that's the kind of order  
 11 of magnitude we'd be looking at if the transport  
 12 element is totally out of there?  
 13 THE WITNESS: For James Valley,  
 14 that's correct.  
 15 MR. SMITH: So we're not going to be  
 16 talking -- at least if the Commission were to  
 17 approve that settlement, this isn't going to be a  
 18 string-them-up kind of extra charge from the  
 19 Commission.  
 20 THE WITNESS: I guess the only  
 21 caveat I would put into my answer is I believe that  
 22 would be true if Western Wireless were the only  
 23 carrier. However, you know, if there are other  
 24 carriers that, you know, have some other  
 25 arrangements, it's hard to say what that number

1 would change.  
 2 But I think in general, you know, I believe  
 3 the answer to your question is yes.  
 4 MR. SMITH: Okay. Looking at this  
 5 second page of Exhibit 5, Western Wireless which  
 6 has not been admitted as evidence, but just looking  
 7 at it for me to try to understand this, as far as  
 8 you know -- and maybe you don't know what happens  
 9 below the box labeled Qwest Sioux Falls LATA tandem  
 10 but down to that point does this reflect the  
 11 transport architecture Interstate uses?  
 12 THE WITNESS: I don't believe it  
 13 does because I don't think it accurately depicts  
 14 Interstate's host remote relationships.  
 15 MR. SMITH: And that's one of the  
 16 questions I had is there aren't any lines --  
 17 there's nothing on here that seems to indicate how  
 18 things got from this out to these other facilities.  
 19 How does that work?  
 20 THE WITNESS: Let's see. I guess,  
 21 you know, without drawing it out, Interstate has a  
 22 DMS-10 what is called HSO SSO arrangement. SSO and  
 23 HSO is a very specific Nortel architecture in that  
 24 it's not really host remote, but it -- you know, it  
 25 allows you to centralize some maintenance and some

265

1 administrative and some amber recording functions  
 2 and things along that line. But the bottom line is  
 3 is that they have several stand-alone host offices  
 4 that host remotes and then they have remotes that  
 5 feed into those host offices. Those are all  
 6 connected on ITC's intercompany SONE facilities  
 7 and then run to SDN from Clear Lake -- or actually  
 8 I think it's -- and I'll have to check, but I  
 9 believe it's direct trunks from each host office is  
 10 the way it goes.

11 MR. SMITH: To SDN?

12 THE WITNESS: To SDN. And then, of  
 13 course, Qwest has their terminating facilities and  
 14 I'm unsure as to exactly how many offices that  
 15 hits.

16 MR. SMITH: So those lines that go  
 17 from Qwest, the blue lines are just heading north?

18 THE WITNESS: Yeah. Right. I don't  
 19 know if all the Qwest traffic terminates in Clear  
 20 Lake or if it terminates in each individual host  
 21 office. I will have to check. I don't know that  
 22 off the top of my head and I didn't bring our  
 23 network diagram with me.

24 MR. SMITH: So the idea of using the  
 25 two-way tandem proposal is basically just to

266

1 reverse those blue lines -- I guess emanating now  
 2 from the Qwest facility, it would reverse the  
 3 direction of those or it would add the capability  
 4 of going back the other way as well?

5 THE WITNESS: Yeah. From a physical  
 6 connection standpoint the idea is to use the same  
 7 physical connections but yet change the trunk  
 8 signaling and allow those facilities to be two-way  
 9 as opposed to one-way. However, as I earlier  
 10 pointed out, it's not quite that simple in terms of  
 11 looking at it as a viable option.

12 MS. ROGERS: There's several other  
 13 impacts that need to be studied.

14 MR. SMITH: Are those impacts such  
 15 as phantom traffic?

16 THE WITNESS: Well, such as phantom  
 17 traffic, but it even goes further than that because  
 18 it deals with contractual relationships that ITC  
 19 may have on where they actually deliver their  
 20 traffic. It has to do with how such a connect --  
 21 you know, a change in architecture would affect  
 22 their settlement structure, you know, what some of  
 23 the downstream impacts are and things along that  
 24 line. So, yeah, I guess my big caution is is that  
 25 while it seems simple on the surface, you know, I

267

1 don't want to go into an hour-long dissertation on  
 2 what all the complexities are but it's an extremely  
 3 complex analysis that would have to be done to  
 4 determine whether it's even a viable solution.

5 MR. SMITH: Does that analysis get  
 6 any simpler if SDN -- if there's a line running  
 7 from SDN down here?

8 THE WITNESS: I think that, you  
 9 know, part of what needs to happen there is that,  
 10 again, you know, SDN would have to, you know,  
 11 develop whatever rates that they need to have in  
 12 order to terminate facilities. All the carriers  
 13 would have to agree to have a POI there. And then  
 14 each individual company would have to develop what  
 15 the transiting rates are to get the traffic from  
 16 SDN to their local areas.

17 So that, again, is an option that's worthy of  
 18 consideration, but it also needs a significant  
 19 amount of study.

20 MR. SMITH: And this is my last  
 21 question and we'll get on with it. If we were to  
 22 look at the James Valley settlement agreement, I  
 23 mean, what that is, as I understand it, it's we're  
 24 just drawing a line directly from Western Wireless  
 25 to Groton if Groton were one of these boxes.

268

1 THE WITNESS: That's correct.

2 MR. SMITH: I guess my question is  
 3 if the line just goes to Groton -- is Groton a host  
 4 office?

5 THE WITNESS: That is James Valley's  
 6 host office.

7 MR. SMITH: So in other words, once  
 8 you enter that particular host office then  
 9 everything else -- not post office, host office,  
 10 then everything else is handled with whatever  
 11 connects these boxes?

12 THE WITNESS: The answer to that is  
 13 partially, yes. The other key point on the James  
 14 Valley agreement was that establishment of a POI in  
 15 each of the local calling areas. And what that has  
 16 to do with is what constitutes a local call. Well,  
 17 obviously even though there are exchanges that are  
 18 all connected to a host office, you know, some  
 19 remotes calling other remotes is a toll call  
 20 because of the way the calling plan is. Some of  
 21 them are local.

22 With Western Wireless's agreement they're  
 23 taking the span that's appearing in Groton and  
 24 there's separate DSOs going to each of those  
 25 calling areas so we have a POI in each calling area

1 to respect the local and toll calling plans.  
 2 MR. SMITH: Basically you're saying  
 3 the architecture of that more resembles the first  
 4 page of Exhibit 5 than my one line --  
 5 THE WITNESS: Yeah. It represents  
 6 it because of the agreement that Western Wireless  
 7 has agreed to with, you know, yeah, they're only  
 8 running one DS-1 which is obviously a lot more  
 9 efficient than running multiple DS-1s but yet it  
 10 adheres to their connection agreement in terms of  
 11 where the POIs need to be, it respects the idea  
 12 that, you know, the LEC doesn't have to transport  
 13 traffic outside of their service area and those  
 14 types of issues.

15 MR. SMITH: Thank you. Ms. Sisak.  
 16 REDIRECT EXAMINATION

17 BY MS. SISAK:

18 **Q** Thank you. Mr. DeWitte, I'd like you to take a look at  
 19 your Exhibit 1A and 1B in your direct testimony. I  
 20 believe Mr. Gerdes asked a number of questions  
 21 comparing these two documents.

22 Can you please tell me why the, I guess,  
 23 bottom line number under switch-related investment in  
 24 Exhibit 1A is different than the bottom line number on  
 25 switch-related investment on 1B -- that would be why is

1 transport costs. You know, the thing that I think is  
 2 important to realize on this exhibit is the reason that  
 3 the transport costs are zero is not because there are  
 4 not any transport costs. It's just that the costs of  
 5 transport are addressed in the Interconnection  
 6 Agreement as to what percentage of that facility is  
 7 paid by which party rather than having a cost just be  
 8 out there.

9 So, you know, since those costs are covered  
 10 by that agreement, you know, they weren't something  
 11 that needed to be shown on this particular exhibit.  
 12 And that was -- that's the big reason why it's there.  
 13 It's not that the transport cost is zero. It's just  
 14 there's an agreement to cover off the percentages of  
 15 the facility and the transport that need to be paid by  
 16 each party.

17 **Q** Thank you. And looking at switch-related investment  
 18 costs, as a point of clarification I believe you were  
 19 asked whether any of these switch-related investment  
 20 costs involved anything other than LNP, in other words,  
 21 would they be incurred even if LNP was not implemented.

22 **A** The answer to that is no. These are all as a result of  
 23 LNP.

24 **Q** And if Interstate is required to implement LNP for all  
 25 wireless carriers and for all wireline carriers, which

1 the \$42,200 different than the 129,664?  
 2 **A** There are several reasons. The first and largest  
 3 reason is that with Exhibit 1A we were only upgrading  
 4 the switches that are required to serve Webster with  
 5 LNP software. So the software feature number is less,  
 6 obviously. And since we're only dealing with one  
 7 carrier as opposed to multiple carriers, you know, the  
 8 numbers for translations and things along that line  
 9 were reduced, you know, by the appropriate number of  
 10 carriers. So that's why there's a significant  
 11 difference between the 129,664 and the 42,2.

12 **Q** Can you do a similar comparison for your NPAC-related  
 13 costs?

14 **A** Yes. Again, looking at the numbers and how they're  
 15 driven and the formulas, the line items for the cost  
 16 categories for LNP queries, for instance, is based on  
 17 the number of lines that are actually being queried,  
 18 you know, how many originating attempts they would  
 19 have, et cetera, et cetera, et cetera.

20 But the bottom line is since we're dealing  
 21 with a smaller number of lines on this exhibit in  
 22 Exhibit 1A that is as compared to 1B it reduces the  
 23 number of queries and query charges similarly.

24 The same type of analysis goes on through the  
 25 technical administrative, but the real key is on the

1 of these exhibits represents that total cost?

2 **A** Exhibit 1B is representative of those costs.

3 **Q** And just to clarify, does it represent the total cost  
 4 and also the total per-line cost?

5 **A** That would be correct. With the caveat that it's the  
 6 total lines in South Dakota. Obviously it's not all of  
 7 ITC's because I did include the Minnesota lines in  
 8 there.

9 **Q** Thank you. Can you clarify how calls are routed to  
 10 CMRS providers by Interstate today?

11 **A** Yes. With the exception of the existing 2-B  
 12 connections, you know, that they already have for  
 13 direct connections to wireless carriers, those wireless  
 14 calls are routed through the appropriate switch to SDN  
 15 as toll call. SDN then routes it to the appropriate  
 16 carrier.

17 **Q** Can you clarify what that means? Could that  
 18 arrangement be kept in a porting environment?

19 **A** The issue with using that same toll facility for  
 20 porting now local calls is it creates an administrative  
 21 issue where, you know, based on the routing numbers if  
 22 we're routing everything as toll but yet it's supposed  
 23 to be local, there's no simple way to separate those  
 24 records so we end up with inaccurate toll records that  
 25 either have to be manually corrected before billing

1 goes out or there's an amount of toll that would have  
 2 to be absorbed by Interstate, which is why -- you know,  
 3 in our analysis the way that we avoid that problem is  
 4 if we create direct trunk groups that's understood to  
 5 have only local traffic on it that leaves our exchange,  
 6 we need to have dedicated facilities to carry that  
 7 traffic to the appropriate carrier.

8 And, you know, so the important thing to  
 9 realize is that in order to keep the rating and routing  
 10 accurate for CABS so we don't exacerbate the existing,  
 11 you know, phantom traffic problems we have or any other  
 12 service issues, there was really no choice but to  
 13 assume dedicated facilities were going to be required  
 14 and that each carrier would require their own POI.

15 **Q** If ported calls were routed over toll facilities would  
 16 any additional transport costs be incurred?

17 **A** If they were ported over the existing toll facilities?

18 **Q** Correct.

19 **A** No.

20 **Q** So the current arrangement with Western Wireless and  
 21 other wireless carriers could be maintained and there  
 22 would be no transport costs?

23 **A** Correct. However, as we just discussed, that would  
 24 create issues with, you know, who pays for the excess  
 25 toll that is supposed to be on a local call now. If

1 the wireless carriers were willing to eat that, I guess  
 2 it wouldn't be a problem.

3 **Q** Does Interstate currently design its network to be the  
 4 cheapest possible?

5 **A** Interstate in particular and the independent telephone  
 6 companies as a whole have, you know, prided themselves  
 7 with the support of the Commission and, you know, time  
 8 and time again implemented a network that benefits the  
 9 rural subscribers of South Dakota and made things  
 10 possible.

11 You know, obviously the first example of that  
 12 was SDN and centralized equal access. The issue that  
 13 is discussed a lot is the -- you know, we're talking  
 14 about cost benefit. And in many cases, you know,  
 15 cheapest does not always mean best. There are other  
 16 things to take into consideration. You know, being  
 17 able to actually deliver a service ubiquitously across  
 18 the entire state is an issue.

19 MR. WIECZOREK: I'm going to render  
 20 an objection at this point. He's not a general  
 21 policy witness, he's a cost witness, and to start  
 22 talking about ubiquitous service and those things  
 23 is outside what he's been designated to cover under  
 24 his testimony.

25 MR. SMITH: Overruled.

1 **A** So, you know, part of being able to, you know, take a  
 2 look at what benefits the subscribers in rural areas  
 3 and, you know, makes things possible, yeah, there may  
 4 be things that are in the public interest that aren't  
 5 necessarily the low-cost solution but yet they are the  
 6 most reliable. They do have, you know, the technology  
 7 and the bandwidth and all of the things that are  
 8 necessary to deliver those services to places where  
 9 typically, you know, unless things are aggregated, you  
 10 know, a lot of carriers aren't interested in serving.

11 **Q** Is it your experience local exchange carriers and in  
 12 particular Interstate generally design their network  
 13 for tomorrow or do they plan a more long-term horizon?

14 **A** Interstate in particular and the independent companies  
 15 as a whole are clearly viewed as leaders in the  
 16 deployment of technology into their networks. And  
 17 there are countless examples where the, you know,  
 18 supposed larger, bigger, you know, more cash heavy  
 19 RBOCs have lagged severely behind the independents in  
 20 terms of deploying new technology into their networks.

21 You know, the independent companies today are  
 22 taking the investment dollars that they have available  
 23 and investing heavily in broadband applications, fiber  
 24 to the home, next-generation switching, all of the  
 25 things that they need to remain competitive and, you

1 know, also expand their portfolio to, you know, provide  
 2 the services to their subscribers that their  
 3 subscribers need. So they're constantly putting the  
 4 most technically advanced equipment and facilities into  
 5 their network that's economically feasible.

6 **Q** Did you follow similar logic on coming up with your  
 7 anticipated or estimated LNP costs?

8 **A** From the standpoint of, you know, looking at what would  
 9 be required, what would actually be necessary to  
 10 implement LNP, you know, if the porting interval has  
 11 changed or, you know, we had X-number of carriers thus  
 12 and so forth, the answer to that question is yes. We  
 13 did not look for the cheapest, dirtiest solution  
 14 available.

15 What we looked at was the solution that would  
 16 likely be required to support the applications and the  
 17 functions in the time frames that they would need if  
 18 they were to -- you know, if they had to come up with a  
 19 fixed end-user charge and not be able to change.

20 **Q** There was also some discussion on the situation in  
 21 North Dakota. Can you explain whether in general  
 22 routing and in particular routing of centralized equal  
 23 access is the same in North Dakota and South Dakota?

24 **A** North Dakota does not have a centralized equal access  
 25 tandem. There are only three states that I'm aware of

1 that have such an arrangement, those states being  
 2 South Dakota, Iowa, and Minnesota.  
 3 The idea behind a centralized equal access  
 4 network is that typically the smaller rural independent  
 5 telephone companies, you know, back in the '80s got  
 6 together. They were wanting to be able to provide  
 7 equal access, which at the time was there on paper. It  
 8 wasn't there in reality because none of the carriers  
 9 would come to a lot of the sparsely-populated rural  
 10 areas.  
 11 So what they did was created a tandem switch  
 12 and built a network behind it, aggregated all of their  
 13 traffic delivered to one place which gave the carrier  
 14 some interest because now they had access to rather  
 15 than a thousand access lines, tens of thousands of  
 16 hundreds of access lines. So the way that that works  
 17 is that all of the companies send all of their  
 18 originating toll traffic to SDN and SDN delivers it to  
 19 the appropriate carrier.  
 20 On the terminating side all of the IXC's,  
 21 companies like MCI and AT&T and those guys, deliver  
 22 their traffic to SDN, SDN delivers it to the ILECs.  
 23 The exception to that is Qwest as part of the  
 24 arrangements that were being negotiated back then  
 25 reserved the right since they already had facilities

1 sounds like the idea is that, you know, all of the  
 2 traffic that would be destined for in this case Western  
 3 Wireless would traverse that one -- what is now a  
 4 one-way terminated-only facility up to the Qwest switch  
 5 and then of course Qwest would either transit it or  
 6 switch it to Western Wireless.  
 7 **Q** I'm sorry.  
 8 **A** I was going to say so I don't exactly know what the  
 9 back end of that connection looks like. But the bottom  
 10 line there is the point of interconnection would  
 11 clearly not be the Petitioner's exchange.  
 12 **Q** And is it your understanding or what is your  
 13 understanding concerning ITC's obligations to transport  
 14 traffic to such a point outside of their exchange?  
 15 **A** My understanding is that they have no such obligation.  
 16 However, unfortunately the November 10 Order didn't  
 17 sufficiently address transport where it doesn't exist.  
 18 So in order to identify what some of the transport  
 19 costs needed to be, they were included on the exhibit.  
 20 So it's my understanding that the Petitioners  
 21 are not obligated to transport outside the facility.  
 22 Their reasonable expectation is that they would have a  
 23 point of interconnection within their network that the  
 24 wireless carriers would come to.  
 25 **Q** So if this Commission found that Interstate was not

1 into these exchanges to terminate their toll traffic  
 2 from their Qwest tandem to the individual ILECs and  
 3 that was granted. And so that's how in general toll  
 4 traffic is routed in South Dakota today.  
 5 Whereas in states like North Dakota, you  
 6 know, each company would have two-way facilities that  
 7 would go to the access tandem of their choice. It  
 8 could be an RBOC. It could be somebody else.  
 9 **Q** Does that make a difference for LNP purposes?  
 10 **A** It makes a difference for LNP purposes when we look at  
 11 how the traffic needs to be routed and which carrier  
 12 it's actually going to. In terms of how the SS7  
 13 network works with doing database queries and things  
 14 like that, there are no differences. And so it's a  
 15 rating and routing issue more so than it is a being  
 16 able to query dips and things along that line.  
 17 **Q** And can you clarify, I believe there were a number of  
 18 questions from Western Wireless concerning their Qwest  
 19 option. Is it your understanding that that point of  
 20 interconnection would be -- where would that be in  
 21 relation to Interstate's service territory?  
 22 **A** Judging on what I've heard, obviously I haven't seen  
 23 any final proposals, but it appears that the point of  
 24 interconnection with Qwest would be apparently, you  
 25 know, the backside of the Qwest tandem because it

1 required to transport traffic outside of its service  
 2 area, what would the transport cost be on your LNP  
 3 exhibit?  
 4 **A** That would depend on what the Commission ruled in terms  
 5 of the number of POIs and how it would relate to the  
 6 number of service areas. In ITC's case where they have  
 7 no arrangements for EAS between exchanges that would  
 8 require a POI to each exchange and thus the facilities  
 9 would have to hit every one of their exchanges in order  
 10 to be able to respect the local calling areas.  
 11 So, in other words they'd have to have 24  
 12 POIs in ITC's service area.  
 13 **Q** And under current arrangements who would pay for that?  
 14 **A** That would be the -- under current arrangements?  
 15 **Q** Correct.  
 16 **A** Under the -- my understanding is that the wireless CMSR  
 17 provider would be responsible for paying for that. Or  
 18 I should say should be responsible for paying for that.  
 19 (Pause)  
 20 MS. SISAK: Sorry for the delay. I  
 21 believe that's all of my questions.  
 22 MR. SMITH: Mr. Coit?  
 23 MR. COIT: No. I don't have any.  
 24 MR. SMITH: Mr. Wiczorek.  
 25 MR. WIECZOREK: Thank you.

1 RECROSS-EXAMINATION

2 BY MR. WIECZOREK:

3 Q You mentioned toll charges. You mentioned the tolls

4 would need to be absorbed by Interstate if you used the

5 existing toll facilities. Do you remember that?

6 A Yes. I said if they aren't manually taken out and

7 removed from the CABS records.

8 Q If you use the existing facilities porting volume you

9 forecast, how much cost would Interstate have to absorb

10 in that case?

11 A I haven't studied that so I don't know the answer.

12 Q Well, you project two ports; correct?

13 A Two ports per month, correct.

14 Q Right.

15 A Yes.

16 Q And you project each receiving six calls per day?

17 A I believe that is correct, yes.

18 Q Okay. And you can assume an average time of a

19 telephone call; right?

20 A Right.

21 Q What would be an average time you'd find acceptable?

22 A I believe 3 and a half to 4 minutes.

23 Q Let's use 4 because it's easier.

24 A Okay.

25 Q So 6 times 4 is 24 minutes?

1 A Uh-huh.

2 Q Per two ports.

3 A Okay.

4 Q So that's, follow me on my math, 58 minutes?

5 A Okay.

6 MR. BEST: 48.

7 MR. WIECZOREK: I'm sorry. Thank

8 you.

9 Q And then how much would -- how much cost would that

10 require Interstate to absorb in a day then?

11 A I'm not sure. Because I don't know what the rate per

12 minute is.

13 Q Well, what do you think -- what's an estimate that you

14 have on that rate per minute?

15 A I don't have an estimate for it.

16 Q Okay. Do you think it's more than a dime a minute?

17 A I don't know.

18 Q Well, it's certainly -- well, let's just assume a dime.

19 MS. SISA: Hypothetical now?

20 MR. WIECZOREK: Yeah. Assume it's a

21 dime.

22 Q So the cost they would be absorbing on a daily basis

23 would be \$4.80?

24 A Your math would be correct.

25 Q Okay. And let's assume 5 just to keep my math easier

1 obviously and even building in some extra time let's

2 even assume additional ports, I mean, what would that

3 equate to a year in the absorbed cost? 5 bucks a day.

4 A I'll figure it out here quick. I can't multiply in my

5 head on the stand.

6 VICE CHAIR HANSON: 1,825.

7 MR. WIECZOREK: 1,825.

8 Q 1,825 is the number we're using?

9 A Hypothetically.

10 Q All right. 1,825. And rather than absorbing that cost

11 what Interstate is proposing to do is spend monthly

12 recurring \$157,000 to provide porting; correct?

13 A Based on the information and the ruling and, you know,

14 all of the rules that were in place, yes.

15 Q And essentially we could do the same mathematical model

16 for each one of the companies you're testifying for?

17 A Yes.

18 Q So, for example, where a company -- well, that's all I

19 have on that. It just doesn't seem to stick with what

20 you're testifying to. Maybe you can explain it to me.

21 You said SDTA and these independent companies made

22 things possible. Do you remember that?

23 A Yes.

24 Q Do you remember saying that? And I just can't

25 reconcile absorbing costs of \$2,000 a year with the

1 proposal that you're putting forth to spend the

2 \$157,000 a month. Do you see my confusion there?

3 A Yeah. And I think that you're missing the larger point

4 and that point is, A, they shouldn't have to absorb

5 anything and, B, if we looked at the reciprocal

6 compensation agreement that Western Wireless signed

7 with the independent companies, you know, the agreement

8 there was that there would be a POI in each of their

9 offices and that you would meet them there.

10 You know, so I guess that, you know, to me

11 that means that if you're interested in, you know,

12 having LNP services with, you know, the companies then,

13 you know, the transport and how to get there, you know,

14 you need to foot the bill for that transport and

15 establish a POI, you know, in the local calling area of

16 their service area.

17 Q Which establishing a POI in the local calling -- or

18 each local calling service area doesn't require a

19 direct interconnect as was evidenced by the James

20 Valley agreement this morning, does it?

21 A It is a direct interconnect.

22 Q Well, you don't have to put a point of interconnect

23 from Western Wireless to every one of the end offices,

24 do you?

25 A What they have is they have a direct interconnection

1 into their local service area from a location where  
 2 Western Wireless said, okay, if you -- if we establish  
 3 the facility from point A to point B and we'll worry  
 4 about taking it to point B to wherever you need to take  
 5 it, that's an acceptable solution. However --  
 6 **Q** Just so I understand -- I don't mean to interrupt but  
 7 you say we say we'll take it from there. What you're  
 8 saying --  
 9 **A** Western Wireless will take it from point B to wherever  
 10 their MTSO is. Because I believe that the way that  
 11 works is that Western Wireless has some facilities  
 12 apparently that are somewhere in the neighborhood of  
 13 Aberdeen and the negotiated facilities that you had  
 14 with James Valley is taking it from wherever that  
 15 location is to a POI within their local service area in  
 16 Groton. You're paying them a monthly lease on that  
 17 facility, and then once -- you know, once the traffic  
 18 hits wherever that location of yours is in Aberdeen,  
 19 you at your own expenses are transporting it to  
 20 wherever it is that you transport it on your own  
 21 facilities.  
 22 **Q** Sounds like you talked to some people during the break  
 23 to try to get some more details on that; is that  
 24 correct, during the last break?  
 25 **A** I haven't talked to anybody about that over the last

1 break.  
 2 **Q** Okay. But that can be done at a fraction of the cost  
 3 of what you've proposed for your install costs;  
 4 correct?  
 5 **A** That --  
 6 **Q** Is that correct?  
 7 **A** That would reduce the cost because the cost of the  
 8 transport I was assuming was a minimum of wherever they  
 9 were at to Sioux Falls but if there's a closer location  
 10 then yes, that reduces the cost because you don't have  
 11 as many air-line miles to deal with.  
 12 **Q** Let me ask it this way then: If this Commission orders  
 13 these companies to become LNP compliant within 30 days,  
 14 just hypothetical, would you advise your clients to  
 15 proceed to put in a system as represented in your  
 16 Exhibit 3A with those expenses, or would you advise  
 17 them to ask for renegotiation with their contracts with  
 18 Western Wireless?  
 19 **A** I guess that I don't know how to advise them without  
 20 finding out if Western Wireless is willing to make the  
 21 same type of deal that they've made with James Valley  
 22 to all comers. I don't know if that's a special case.  
 23 I don't know if that's a model. I don't know what the  
 24 answer to that is.  
 25 **Q** And you don't know that because none of the companies

1 you're representing have approached Western Wireless  
 2 with the exception of James Valley to talk to them?  
 3 **A** Nor has Western Wireless approached any of the  
 4 companies with that particular solution.  
 5 **Q** I'll take you back again. You were here yesterday when  
 6 Mr. Heiberger discussed he was contacted by Western  
 7 Wireless in two different letters as overtures to  
 8 discuss LNP; correct?  
 9 **A** I haven't read the letters, but --  
 10 **Q** I'm just asking you about how the testimony went  
 11 yesterday. I'm not asking whether you read the  
 12 letters.  
 13 **A** I believe that that is correct.  
 14 **Q** Do you do any work with your clients on USAC numbers?  
 15 **A** Not personally, no.  
 16 **Q** Okay. So do you know on the USAC reports when your  
 17 clients report them if they do these LNP and switch  
 18 upgrades, do you know whether that would be included in  
 19 the cost information given to USAC?  
 20 **A** I have absolutely no idea.  
 21 **Q** Okay. Phantom traffic has to do with terminating  
 22 traffic, doesn't it?  
 23 MS. SISAK: Excuse me. I have an  
 24 objection here. It's my understanding these  
 25 questions are limited to my redirect and I did not

1 go down that avenue.  
 2 MR. SMITH: I'm sorry, Talbot could  
 3 you repeat the question.  
 4 MR. WIECZOREK: The question was,  
 5 there was questions by Rolayne I believe on phantom  
 6 traffic and so I was asking a follow-up on that.  
 7 MR. SMITH: Yes. I think he can --  
 8 well, ordinarily -- I'll let you ask it.  
 9 MR. WIECZOREK: I'll keep it short.  
 10 MR. SMITH: The other parties  
 11 cross-examining are not identified with Western  
 12 Wireless.  
 13 **Q** Phantom traffic has to do with terminating traffic;  
 14 correct?  
 15 **A** Correct.  
 16 **Q** And you used, and I'm not sure it was a direct example,  
 17 but you talked about a million minutes. Was that just  
 18 a ballpark or related to a company?  
 19 **A** That was so I could do easy math.  
 20 **Q** You and I are on the same wavelength there. So if you  
 21 have 200,000 minutes phantom, what's that cost a  
 22 minute? Do you know?  
 23 **A** I don't know.  
 24 **Q** Okay. Just so I'm clear on this because there's some  
 25 questions on the recurring costs. On the recurring

1 costs I think there's a question on James Valley  
 2 recurring costs and you said something to the effect  
 3 that recurring costs could be impacted by another  
 4 cellular company approaching them.  
 5 Do you remember saying that? Am I  
 6 summarizing your testimony correctly?  
 7 **A** Are we talking about -- I guess, in what context?  
 8 **Q** I think the example was given of James Valley and there  
 9 was a question as to would these recurring costs be the  
 10 same and, as I recall, the reference to your Exhibit 3A  
 11 but the recurring costs still -- those SOA costs,  
 12 everything else -- let me back up. May be easier to  
 13 ask it this way.  
 14 All the recurring costs you've got for SOA,  
 15 translation, those kinds of costs, you came up with  
 16 those numbers based on an assumption that like in  
 17 Interstate's situation, all six wireless companies,  
 18 that would be enough to cover all six wireless  
 19 companies in your hypothetical; correct?  
 20 **A** Correct.  
 21 **Q** So let's go to James Valley. All the recurring costs,  
 22 SOA, those types of marketing flyer costs, those costs  
 23 assume -- I believe in that case there would be five  
 24 cellular companies that would be coming to them.  
 25 **A** Except things like marketing flyer costs were not

1 driven by number of carriers.  
 2 **Q** Right.  
 3 **A** It was, you know, what's this end-user charge.  
 4 **Q** Right. I guess what I'm getting at is the numbers you  
 5 gave as recurring costs are essentially assume BFRs  
 6 from five companies in the case of James Valley, six  
 7 companies in the case of Interstate.  
 8 **A** I guess that we'd need to look at which recurring  
 9 charges we're talking about. I think that the answer  
 10 to your question is the recurring charges that are  
 11 driven by the number of ports are -- our port number is  
 12 independent of how many carriers there are. If there  
 13 are two ports a month, I don't know which carriers are  
 14 actually doing the port but the two ports are taken  
 15 times the appropriate factors to come up with the  
 16 recurring charges on the ones that are driven by ports.  
 17 **Q** Okay.  
 18 MR. WIECZOREK: That's all I have.  
 19 RE-CROSS-EXAMINATION  
 20 BY MR. GERDES:  
 21 **Q** Very briefly, Mr. DeWitte. Ms. Sisak asked you about  
 22 transport costs on Exhibit 1A and I just want to cover  
 23 a couple of points.  
 24 Your figures on Exhibit 1A contemplate that  
 25 Midcontinent would have a point of interface in the

1 Webster exchange; correct?  
 2 **A** Correct.  
 3 **Q** So the only transport costs we're talking about are  
 4 local transport; correct?  
 5 **A** That is correct.  
 6 **Q** And the local transport is covered in the  
 7 Interconnection Agreement which is in evidence as  
 8 Exhibit 3; correct?  
 9 **A** I guess it's in evidence. I have not read the  
 10 Interconnection Agreement.  
 11 **Q** Okay. But typically it would be in the Interconnection  
 12 Agreement; correct? You testified to that?  
 13 **A** I testified I hadn't read it.  
 14 **Q** In response to your questions I believe you said the  
 15 transport costs would be covered in the Interconnection  
 16 Agreement?  
 17 **A** Are typically covered in the Interconnection  
 18 Agreements. I haven't read that so I don't know if it  
 19 is or not.  
 20 MS. SISAK: Excuse me. Point of  
 21 clarification, what is exhibit -- Exhibit 3, I  
 22 believe, is Mr. DeWitte's testimony.  
 23 MR. GERDES: Excuse me. Midco  
 24 Exhibit 3 is the Interconnection Agreement between  
 25 the two parties.

1 MS. POLLMAN ROGERS: That was not  
 2 offered --  
 3 MR. GERDES: That's in the other  
 4 Docket.  
 5 MS. SISAK: I would move to strike  
 6 all questions and answers concerning Midco Exhibit  
 7 3.  
 8 MR. GERDES: That's fine. Let me  
 9 just ask one question.  
 10 MR. SMITH: Are you withdrawing it?  
 11 MR. GERDES: I'll withdraw the part  
 12 about Exhibit 3.  
 13 MR. SMITH: You didn't actually  
 14 mention anything about it so I don't know that it  
 15 matters. Go ahead.  
 16 **Q** Again, your last answer I think is what I was getting  
 17 at, and that is that typically the transport costs  
 18 would be provided for in the Interconnection Agreement  
 19 between the parties; correct?  
 20 **A** Typically, yes.  
 21 **Q** Where there is a point of interface in the exchange,  
 22 the only transport that needs to be covered would be  
 23 local transport?  
 24 **A** That is correct.  
 25 MR. GERDES: Thank you.

1 MR. SMITH: Ms. Wiest?  
 2 MS. WIEST: Nothing.  
 3 MR. SMITH: Commissioners, anything  
 4 else?  
 5 (No audible response)  
 6 MR. SMITH: You may step down.  
 7 THE WITNESS: Thank you very much  
 8 for your time.  
 9 (Discussion off the record)  
 10 (A short recess is taken)  
 11 MR. SMITH: We're back on the  
 12 record. We're going to take a witness somewhat out  
 13 of order. I guess that's up to the Petitioners to  
 14 decide but in order to accommodate Mr. Adkins we've  
 15 agreed to allow him to be called out of order and  
 16 with that it's either Ms. Sisak or Ms. Smith over  
 17 here who will -- you may proceed with your  
 18 examination.  
 19 MS. SISAK: Mr. Adkins, if you  
 20 would take the witness stand. Thank you.  
 21 (Exhibits Brookings 1 and 2 are marked for identification)  
 22 W. JAMES ADKINS,  
 23 called as a witness, being first duly sworn in the  
 24 above cause, testified under oath as follows:  
 25

1 DIRECT EXAMINATION  
 2 BY MS. SISAK:  
 3 Q Mr. Adkins, can you please state your name and address  
 4 for the record.  
 5 A My name is W. James Adkins, Brookings, South Dakota.  
 6 Q Can you please look at Brookings Exhibits 1 and 2 which  
 7 are before you.  
 8 A Okay. I see them.  
 9 Q Would you please review them and indicate whether or  
 10 not that is your prefiled direct testimony marked as  
 11 Brookings Exhibit 1 and your rebuttal testimony marked  
 12 as Brookings Exhibit 2.  
 13 (Witness examines documents)  
 14 A That's correct.  
 15 Q Did you prepare both the direct and rebuttal testimony?  
 16 A Yes.  
 17 Q Do you have any additions or corrections at this time  
 18 to either one of those exhibits?  
 19 A Just a couple of additions. One of the points that we  
 20 made in here was that we had not received any requests  
 21 for local number portability and I'd just like to  
 22 update in that as of today we have received two  
 23 inquiries on local number portability for intermodal  
 24 and also just want to point out in Exhibit 1 just a  
 25 drawing error there, we were showing the CMRS carrier

1 making a direct connection to SDN and I think more  
 2 typically they would make a direct connection to Qwest.  
 3 MR. WIECZOREK: The Exhibit 1 is  
 4 rebuttal testimony; correct?  
 5 THE WITNESS: That's correct.  
 6 MR. WIECZOREK: I apologize, could  
 7 you give me that change one more time on the  
 8 exhibit.  
 9 THE WITNESS: Exhibit 1?  
 10 MR. WIECZOREK: Yes.  
 11 THE WITNESS: CMRS carriers more  
 12 likely connect to Qwest, if we're talking specific  
 13 routing.  
 14 Q If I were to ask you the questions that are in your  
 15 direct and rebuttal testimony today, would your answers  
 16 be the same?  
 17 A Yes.  
 18 Q Other than the one correction that you made to your, I  
 19 believe, direct testimony?  
 20 A Yes.  
 21 Q And can you please briefly summarize your testimony.  
 22 A Swiftel Communications has received the bona fide  
 23 request from Western Wireless and Verizon subsequent to  
 24 the FCC Order and as a result of that we've  
 25 investigated the option or the possibility of providing

1 local number portability. After reviewing the  
 2 information with our consultants, our internal staff  
 3 and having discussions with our utility board --  
 4 And I should mention that we are governed  
 5 by -- I work for the City of Brookings Municipal  
 6 Utilities Telephone Department, which is a handful, and  
 7 that's why we go by doing business as Swiftel  
 8 Communications and just generally just use the name  
 9 Swiftel. It's a lot easier to communicate that way.  
 10 But, in any event, we are governed by a local  
 11 appointed regulatory board of the citizens of Brookings  
 12 and the customers of our network, and in preparing the  
 13 information relative to local number portability we  
 14 presented that to our utility board and discussed it  
 15 with them. We're looking at the \$300,000-plus capital  
 16 figure in terms of implementing local number  
 17 portability. We were evaluating the routing issues and  
 18 the inequities there, the lack of determination of how  
 19 the rate centers and routing would work. And so we  
 20 have the issue of cost.  
 21 We have also the issue of benefit of that  
 22 cost going back to that \$300,000. We were not aware of  
 23 any interest or any pent up demand for local number  
 24 portability. So our board looked at that and was  
 25 concerned about that issue.

1 We were also concerned that there was only an  
 2 opportunity for us to port numbers from our wireline  
 3 company to wireless but not the reciprocal. So we  
 4 could only stand to lose customers. And so with those  
 5 issues being unresolved and then looking at the impact  
 6 of the cost and how that would be allocated we were  
 7 looking at the cost-causer being the one who avoids the  
 8 cost in this case. I mean, typically telephone  
 9 companies have operated on the cost-causer is the  
 10 cause-payer and as it relates to LNP we've got the  
 11 cost-causer is the one who escapes. He's the one who's  
 12 leaving your network and leaves the remaining customers  
 13 having to pay the bill.

14 So our board evaluated all of that  
 15 information and when we looked at offering local number  
 16 portability they determined that that was not in our  
 17 interest of the City of Brookings and directed staff  
 18 then to seek a suspension modification of the rules  
 19 until such time as several of these troubling issues  
 20 were resolved. And so that's why we're here today.

21 MS. SISAK: At this time I'd like  
 22 to offer Brookings Exhibits 1 and 2 into evidence.  
 23 MR. WIECZOREK: I have no objection.  
 24 MS. WIEST: No objection.  
 25 MR. SMITH: Brookings Exhibits 1 and

1 MS. SISAK: No objection.  
 2 MR. COIT: I would ask for the  
 3 purposes of this proceeding the Commission take  
 4 judicial notice of that agreement. I can't recall  
 5 the Docket number. I don't have that with me  
 6 currently.

7 MR. WIECZOREK: I have no  
 8 objections, but if it's going to be quoted from, if  
 9 we could get copies distributed, I'd ask that.

10 MR. COIT: I'm finished.  
 11 MR. SMITH: Are there any other  
 12 objections to the taking of judicial notice of a  
 13 document that's on file with the Commission?

14 MS. WIEST: I don't.  
 15 MR. WIECZOREK: I think the  
 16 Commission can take judicial notice of the  
 17 documents on their file and in Minnesota too.

18 MR. SMITH: Hearing no objection,  
 19 we'll take judicial notice of the transport and  
 20 termination agreement.  
 21 Please proceed.

22 MR. WIECZOREK: Thank you.

23 CROSS-EXAMINATION

24 BY MR. WIECZOREK:

25 Q You're going to have to bear with me, Mr. Adkins. If I

1 2 are admitted.  
 2 MS. SISAK: The witness is ready  
 3 for cross-examination.  
 4 MR. SMITH: Mr. Coit.  
 5 MR. COIT: Yes. I do have just a  
 6 couple of questions. Thank you.

7 CROSS-EXAMINATION

8 BY MR. COIT:  
 9 Q Mr. Adkins, Swiftel or Brookings Municipal Utilities,  
 10 has your company entered into an Interconnection  
 11 Agreement, reciprocal interconnection and transport and  
 12 termination agreement with Western Wireless?  
 13 A Yes, we have.  
 14 Q And has that agreement been filed with the Commission?  
 15 A Yes. It's been recently filed with the Commission.  
 16 Q Do you know whether or not that agreement has recently  
 17 been approved or is it still pending?  
 18 A I believe it has been approved recently.

19 Q I would just ask would you have any objections to the  
 20 Commission taking judicial notice of that agreement for  
 21 the purposes of this proceeding?

22 MR. COIT: Does anybody have any  
 23 objections to that?

24 THE WITNESS: I wouldn't have any  
 25 objections to that.

1 refer to you as Interstate, please correct me, if  
 2 that's all right.

3 Just ask some general questions. It's my  
 4 understanding that Swiftel actually operates a wireless  
 5 affiliate?

6 A That is correct.

7 Q Okay. Were you sent BFRs to any other areas on behalf  
 8 of your wireless affiliate?

9 A For intermodal portability?

10 Q Yes.

11 A No.

12 Q Your wireless affiliate's LNP capable; is that correct?

13 A The wireless affiliate is.

14 Q Has Swiftel ported numbers between Swiftel, the  
 15 wireless affiliate, and any other cell companies since  
 16 its being LNP compliant?

17 A Yes. Swiftel has ported -- Swiftel PCS has ported  
 18 numbers to other carriers, yes.

19 Q Okay. Your wireless operation, do you -- well, I want  
 20 to make sure I refer to this correctly. Your wireless  
 21 operation, your landline operation is that the best way  
 22 to distinguish between the two?

23 A That's fine.

24 Q Okay. Does your two affiliations, the wireless and  
 25 wireline, share network equipment or facilities or

1 personnel?  
 2 A They do share personnel. They're housed in the same  
 3 central office, but they're two independent switching  
 4 networks.  
 5 Q Okay. So you don't share equipment?  
 6 A No.  
 7 Q Okay. Has your wireless affiliate requested your  
 8 wireline portion of your company become LNP capable?  
 9 A No.  
 10 Q Are there any plans for that?  
 11 A No.  
 12 Q Do you have an interconnection -- as Mr. Coit pointed  
 13 out, you have an Interconnection Agreement with Western  
 14 Wireless; correct?  
 15 A On the wireline side?  
 16 Q Yes.  
 17 A Yes.  
 18 Q And, in fact, that agreement allows Western Wireless to  
 19 terminate traffic to Brookings using a tandem trunk  
 20 group?  
 21 A I'd have to review that. It's been a while since I  
 22 reviewed that.  
 23 Q And I'm not trying to trip you up. Who negotiated that  
 24 agreement for you?  
 25 A The agreement was negotiated through SDTA.

1 A Okay. Restate in terms of the PCS --  
 2 Q The cellular portion of your company.  
 3 A If you'd restate the question, please, in light of  
 4 the --  
 5 Q Just restate the question. Have you talked to Western  
 6 Wireless about allowing your cellular portion of your  
 7 company or the PCS portion of your company to route  
 8 traffic to numbers ported to Western via tandem  
 9 connection?  
 10 A I don't believe we've discussed that with Western  
 11 Wireless.  
 12 Q Okay. You stated one of the reasons you filed this  
 13 suspension is the fact you met with your board and you  
 14 wanted some things reconciled, and one of the things  
 15 that you pointed out was the ability to port from  
 16 wireline to wireless one way. Do you remember stating  
 17 that?  
 18 A The ability to port from wireless to wireline.  
 19 Q I'm sorry.  
 20 A That was a deficiency in the order that we thought was  
 21 inequitable. It was a point of concern.  
 22 Q That's part of the FCC's Order. It hasn't provided for  
 23 porting from wireless to wireline; correct?  
 24 A That's correct.  
 25 Q And you don't like that. You don't think it's fair.

1 Q Okay. So and since we're taking judicial notice of it,  
 2 the Commission could actually look at that document to  
 3 determine that the agreement allows Western Wireless to  
 4 terminate traffic in Brookings via a tandem trunk  
 5 group?  
 6 MS. SISAK: Objection. I believe  
 7 that question was already answered by the witness.  
 8 MR. WIECZOREK: No. I believe I  
 9 asked if the Commission could look and make that  
 10 determination looking at the document now since he  
 11 didn't know.  
 12 MS. SISAK: You're asking the  
 13 witness to opine on that?  
 14 MR. SMITH: Are you just asking him  
 15 is the answer to the question in the document?  
 16 Q Do you know if the answer to the question is in the  
 17 document?  
 18 A I believe it is, yes.  
 19 Q Okay. Have you talked to Western Wireless about  
 20 allowing Swiftel to route traffic to numbers ported to  
 21 Western Wireless via a tandem connection?  
 22 A Okay. Let me be clear when you say Swiftel.  
 23 Q I'm sorry.  
 24 MS. ROGERS: Swiftel the cellular  
 25 company.

1 A Well, certainly we would like the opportunity to be  
 2 able to gain customers in a similar fashion as it  
 3 relates to our wireline operation being able to and  
 4 gain customers from wireless carriers if that was  
 5 possible.  
 6 Q Okay. Is it your testimony to this Commission that you  
 7 should receive a suspension until wireless companies  
 8 are required to port back to wireline companies?  
 9 A No. I think it's my position that there are several  
 10 issues that are outstanding. Some of those issues are  
 11 cost-related issues. Some of those are routing-related  
 12 issues. There are some issues that we -- as you  
 13 referred to the wireless to wireline that we may have  
 14 preferred was ruled in another manner. But several we  
 15 would not be in a position to think that local number  
 16 portability should be held up for every issue in that  
 17 one.  
 18 Q All right. In fact, your petition talks about six  
 19 months from when the FCC rules are final, but it  
 20 doesn't define what final is. I mean, are you  
 21 expecting it to go to the whole appeals process, go to  
 22 the Supreme Court, come back down? When does it stop?  
 23 A Yeah. I don't have an answer for that because I'm not  
 24 familiar with what might happen. It seems to me  
 25 that -- are you asking a hypothetical here?

1 **Q** That's what your petition asks for relief. It asks for  
 2 six months when all the rules are decided I believe the  
 3 language is. But it doesn't talk about when that is.  
 4 I mean, do you want to appeal it all the way to the  
 5 U.S. Supreme Court? Would you have this Commission  
 6 wait until it goes to the U.S. Supreme Court, comes  
 7 back down to the FCC if possible?  
 8 **A** I think when the ruling is final as it relates to the  
 9 FCC -- I have no knowledge of what somebody might do in  
 10 terms of appealing their ruling. Certainly that's not  
 11 something that we are contemplating is appealing an FCC  
 12 ruling.  
 13 **Q** So if the FCC ruling was final on -- is there a pending  
 14 Docket number with the FCC you're tying this to? I  
 15 mean, let me back up. You understand that there's  
 16 constantly decisions and clarifications being sought  
 17 from the FCC.  
 18 **A** Correct.  
 19 **Q** Well, when you ask for relief that's tied to final  
 20 decision-making, what decisions are you talking about  
 21 and what constitutes final?  
 22 **A** Well, the issues that are more troubling to us are the  
 23 routing and the -- the routing issues of the calls and  
 24 the rate center issues relative to wireline and  
 25 wireless. And if those issues were addressed as it

1 relates to South Dakota or some direction that we might  
 2 receive from the Commission so that the carriers could  
 3 be approached on a level playing field or a similar  
 4 basis, I think that would be helpful for us.  
 5 **Q** You understand -- how long have you been in the  
 6 business, the telecommunications business?  
 7 **A** Oh, probably about 25 years.  
 8 **Q** Okay. So when did you first come to hear about local  
 9 number portability as being a requirement that your  
 10 company would have to face?  
 11 **A** Well, we heard about local number portability with the  
 12 Telecommunications Act, but we also recognize that in  
 13 the intervening time that we had the FCC implementation  
 14 questions that ensued and as it related to intermodal  
 15 local number portability, frankly that came as a bit of  
 16 a surprise in terms of the extent of which the FCC  
 17 ordered it. It did catch us by surprise a bit.  
 18 **Q** Yeah. There's been some testimony by Mr. DeWitte that  
 19 there wasn't time to do an analysis of how to actually  
 20 deal with local number portability, and so you guys had  
 21 to come here to the Commission and ask for this  
 22 extension.  
 23 **A** Uh-huh.  
 24 **Q** Nothing prevented you from starting to look at local  
 25 number portability before the November 10 decision of

1 last year of the FCC, was there?  
 2 **A** Well, we would have had to speculate on several  
 3 scenarios. And not knowing how the Commission might  
 4 rule, there could have been another delay. We could  
 5 have spent a good deal of time working on  
 6 hypotheticals. It really wasn't appropriate for us to  
 7 invest the time and the effort and the research until  
 8 such time as the FCC Order was finalized.  
 9 **Q** Well, Mr. DeWitte, when he was testifying on behalf of  
 10 your company earlier today or all of the people he's  
 11 testifying on behalf of, talked at length about  
 12 the great -- and these are my terms, but I think I'm  
 13 going to summarize his testimony -- the vision you guys  
 14 have and how you plan ahead and make things happen. So  
 15 are you telling the Commission --  
 16 MS. SISAK: Is there a question?  
 17 MR. WIECZOREK: I'm trying to  
 18 complete it, if I could be allowed to complete it.  
 19 MR. SMITH: Please do.  
 20 **Q** But you're telling this Commission that you decided not  
 21 to plan ahead on these issues, given an absolute drop  
 22 dead date of the November 10, 2003 issue -- or, excuse  
 23 me, FCC decision?  
 24 **A** No. I don't think that's what we're telling the  
 25 Commission. What we are saying to the Commission is

1 that we didn't have the information, we didn't have the  
 2 Order from the FCC, we didn't have the necessary facts  
 3 for us to go through the analysis. And there wasn't a  
 4 timeline involved in terms of when the FCC might rule.  
 5 There were several pending issues. They could have  
 6 been delayed, could have been appealed.  
 7 **Q** So you waited for the FCC to enter their rule on  
 8 November 10?  
 9 **A** Correct.  
 10 **Q** And then there wasn't time.  
 11 **A** Well, there was not time to go through the entire  
 12 process, go through all the analysis and meet the May  
 13 24 deadline, that's true.  
 14 **Q** You've been in the room today when Mr. DeWitte  
 15 testified, weren't you?  
 16 **A** Yes. I was here part of the time.  
 17 **Q** Okay. There was quite a bit of discussion on some of  
 18 the different costs and who came up with the plan for  
 19 how to route traffic. Did you do an analysis -- did  
 20 Brookings do an analysis of any alternative routing  
 21 options?  
 22 **A** We did the analysis based upon the existing  
 23 architecture, the existing routing, and had that  
 24 analysis done by Mr. DeWitte and his firm.  
 25 **Q** Okay. And did you -- have you read Mr. DeWitte's

1 prefiled testimony?

2 **A** No. Actually I have not, not recently.

3 **Q** Okay. Well, then I'll keep questions limited to the

4 examination, what was discussed in his examination. He

5 talked about there are various other options for

6 routing traffic; correct?

7 **A** Uh-huh.

8 **Q** You have to say yes.

9 **A** Yes. There are other options to route traffic.

10 There's numerous options that one might employ.

11 **Q** And you didn't investigate any of the other options but

12 the one that Mr. DeWitte did his cost analysis on;

13 correct?

14 **A** We did the analysis based upon the current routing and

15 interconnection arrangements and contractual

16 arrangements that we had in place.

17 **Q** Yeah. But you didn't do the analysis on the existing

18 facilities, you agree that your current analysis is

19 based on adding new facilities and point of

20 interconnections?

21 **A** Yes.

22 **Q** Okay. Do you do your USAC filings for your company?

23 **A** No, I do not.

24 **Q** You have a Complaint in your prefiled testimony. You

25 talk about Western Wireless has a larger calling area,

1 whether he agreed a larger calling area was a

2 benefit to his consumers. I wasn't asking him to

3 differentiate between the services.

4 **MR. SMITH:** I'm not going to strike

5 it but would you just address the question,

6 Mr. Adkins, that he's asked.

7 **A** A benefit to our consumers compared to what, please?

8 **Q** Larger calling area is more beneficial to the consumer

9 than a small calling area.

10 **A** Given the equal quality of service, I would think that

11 that would be true.

12 **Q** Okay. I'm a State grad. When I went to State I got my

13 phone number and I think the ability to spend two years

14 in the dorm, for those kids going to State and being

15 able to port their number out and use a cell phone

16 would be a benefit to them.

17 **A** It's interesting that you bring up that example because

18 what we have experienced over the last three years is

19 that our students in the residence halls have availed

20 themselves of that opportunity to migrate from

21 wireless -- from wireline rather to wireless. And as a

22 result we have -- our access line count has gone down

23 approximately 1,200 phone lines.

24 **Q** Yeah. So what you're saying is those college students

25 are opting for cellphones as opposed to your landlines

1 do you recall that, than Brookings?

2 **A** That's the very nature of wireless and that when we

3 look at the city of Brookings it covers a relatively

4 small geographic area and it's just the very nature of

5 wireless that if you have a tower or two in the general

6 vicinity your footprint's going to be quite a bit

7 larger. And if you look then at the licensed area it's

8 even larger still.

9 **Q** Okay. You agree with me that could be a benefit to

10 your individual consumers to be able to take their

11 number to a cell phone and obtain a larger calling

12 area?

13 **A** I agree that mobility for some customers is an

14 important issue and that does afford them that larger

15 calling area.

16 **Q** And you'd agree that larger calling areas can be a

17 benefit to most consumers?

18 **A** I think when you look at -- if your question is is

19 comparing the two different modes of

20 telecommunications, the landline service versus the

21 wireless, there are two different service types. I

22 mean, there are --

23 **Q** I'm just --

24 **MR. WIECZOREK:** I'm going to ask

25 that the response be stricken. My question was

1 coming into the dorms if I follow your statement

2 correctly?

3 **A** Well, I think the point here is that is twofold. One,

4 the students as they travel to state universities

5 oftentimes are given a wireless phone by their parents

6 for safety and security reasons and so that they can

7 call them from their home. But additionally I think it

8 also illustrates that what we have is we have pretty

9 fair competition without local number portability.

10 **Q** Uh-huh. And you would agree that the local number

11 portability with wireline to wireless would even help

12 raise that level of competition, make it a more even

13 playing field between cellular and your landlines?

14 **A** Well, as you look at the advantage of local number

15 portability from a wireline to a wireless and the

16 quantity of ports you may have in that regard, in an

17 environment where competition is being served, the

18 customers are, in fact, migrating as they desire from

19 wireline to wireless. There are some customers we have

20 in Brookings that don't have a wireline phone. They

21 strictly operate on a wireless phone.

22 And so to say that they would be advantaged,

23 when you look at the cost to provide that small

24 advantage, it certainly doesn't seem to -- it certainly

25 doesn't seem to pass muster on the cost benefit ratio.

313

- 1 **Q** When you talk about the cost benefit ratios, you're  
2 talking about Mr. DeWitte's cost; correct?
- 3 **A** Well, I'm just using a general term, but, yes, I'm  
4 relating to his costs.
- 5 **Q** In Mr. DeWitte's testimony there were some questions on  
6 the LNP cost per line he had been throwing around and  
7 he represented he did not know whether that would be an  
8 actual line cost going out to each of your consumers.  
9 Are you representing to this Commission that  
10 that's the actual line cost that's going to be billed  
11 out to your wireline users?
- 12 **A** Well, I can't make that representation because we  
13 haven't filed our costs with NECA. I mean, we have to  
14 go through that process to determine what would  
15 actually be billed to our end-users.
- 16 **Q** You have some concern -- in your testimony you talk  
17 about the investment LNP might result in you not being  
18 able to roll out broadband services as quickly as you'd  
19 like. Do you recall that?
- 20 **A** Yes, I do.
- 21 **Q** You understand that there is the ability to recoup your  
22 investment -- excuse me. Let me ask it this way.  
23 Congress has provided a mechanism for you to do a line  
24 charge to recoup your investment in LNP; correct?
- 25 **A** Yes. I understand that could be true.

314

- 1 **Q** You'd be charging customers for any broadband service  
2 too; right?
- 3 **A** When you look at the cost of local number portability  
4 and we would pull the capital cost out of our system --  
5 MR. WIECZOREK: I'm going to object  
6 as nonresponsive. All I asked him is whether he  
7 was going to charge for broadband service.  
8 MR. SMITH: Sustained.
- 9 **Q** Are you going to charge for broadband service?
- 10 **A** Yes, we will.  
11 (Exhibit WWC 7 is marked for identification)
- 12 **Q** You've noted in your testimony that you received a BFR  
13 from Western Wireless. Did you review that letter?
- 14 **A** Yes, I did.
- 15 **Q** Okay. I'm showing you what has been marked as Exhibit  
16 No. 7, Western Wireless Exhibit No. 7. Is that a copy  
17 of that letter?
- 18 **A** It appears to be.
- 19 **Q** Yeah.  
20 MR. WIECZOREK: I guess I'd move 7  
21 for admission at this time.  
22 MR. SMITH: Any objection?  
23 MR. COIT: No objection.  
24 MS. SISAK: No objection.  
25 MS. WIEST: No objection.

315

- 1 MR. SMITH: Western Wireless 7 is  
2 admitted.
- 3 **Q** After you received this BFR did you or anybody on  
4 behalf of Swiftel Communications contact Western  
5 Wireless to try to deal with what you saw as routing  
6 issues and cost issues of providing LNP?
- 7 **A** No, I did not respond to this BFR.
- 8 **Q** So during that investigation after the November 10  
9 decision of the FCC, you didn't feel it necessary to  
10 contact the cellular companies that might want to port  
11 numbers to see if they could assist you in some of that  
12 research?
- 13 **A** I did not contact the cellular companies as it related  
14 to their BFRs simply because we had no obligation to do  
15 so, and secondly, we were researching the subject  
16 matter as it related to the FCC ruling and we're not in  
17 a position to discuss much with -- if anything, with  
18 the wireless carriers.
- 19 **Q** And maybe you already talked about this. You agreed  
20 there's other ways to route ported traffic?
- 21 **A** I think there are many different ways to route traffic.  
22 What I would like to see, however, is that there be  
23 some guidance so as we relate to dealing with the  
24 multiple wireless carriers that we don't have to  
25 negotiate in our instance three different arrangements

316

- 1 for routing ported numbers. I'd like to see there be  
2 some direction or some guidelines so that we can move  
3 forward with some similarity, some formality.
- 4 **Q** When you say -- you're not restricting that to just the  
5 FCC, the decision on the FCC, are you? Let me ask you  
6 this way. Kind of unfair, long day. If this  
7 Commission granted some guidance that's the kind of  
8 guidance you'd be looking for?
- 9 **A** I think that's very appropriate. This Commission  
10 understands the issues in South Dakota. They  
11 understand the various communities that we have, the  
12 sizes of towns, East River, West River and I think  
13 they're in a great position to provide guidance on that  
14 for us carriers.
- 15 **Q** There's been some discussion about a Minnesota filing  
16 by I believe it's Minnesota Independent Coalition. Are  
17 you familiar with that group?
- 18 **A** I have heard the acronym before.
- 19 **Q** Okay. Are you familiar with what they're doing in  
20 Minnesota or proposing as routing options in Minnesota?
- 21 **A** No, I am not.
- 22 **Q** Have you done any studies either internally or through  
23 hiring an independent group as to what the demand is in  
24 Brookings for local number portability?
- 25 **A** No. We have not studied LNP demand for local number

1 portability.  
 2 Q Okay. Have you accumulated any demographic information  
 3 on what costs your customers may be able to bear in  
 4 providing local number portability -- or excuse me.  
 5 Let me back up. Have you provided any demographic --  
 6 well, let me ask it this way. Cut right to it.  
 7 You are not presenting any demographic  
 8 information on the average income of your customers in  
 9 this proceeding, are you?  
 10 A No, we are not.  
 11 Q Okay.  
 12 MR. WIECZOREK: That's all I have.  
 13 MR. SMITH: Ms. Wiest.  
 14 MS. WIEST: Thank you.  
 15 CROSS-EXAMINATION  
 16 BY MS. WIEST:  
 17 Q Mr. Adkins, what is your current local rate?  
 18 A Current local rate for residential customers is \$14,  
 19 business 23.  
 20 Q Brookings has one type 2-B connection with Sprint?  
 21 A Yes.  
 22 Q You corrected your testimony or updated and stated you  
 23 have two inquiries for intermodal LNP from subscribers?  
 24 A That's correct.  
 25 Q Are your employees instructed to keep track of

1 Q Did you understand me to say that he stated that he did  
 2 not calculate an end-user surcharge, he just calculated  
 3 possible costs?  
 4 A Oh, I'm sorry. Yes. He calculated possible costs. It  
 5 was an estimate.  
 6 Q So today do you have any estimate? Do you have any  
 7 estimate as to what an end-user surcharge would be to  
 8 your customers?  
 9 A I'm sorry. I wasn't following your question. I  
 10 apologize. No. We have not gone through the filing  
 11 with NECA to determine what the surcharges might be and  
 12 what rate elements might be incorporated into it. I  
 13 don't have that information.  
 14 Q If you go to your rebuttal on line 12 you state that,  
 15 "Pursuant to the Interconnection Agreement ITC did not  
 16 agree to route traffic destined for Western Wireless to  
 17 the serving tandem."  
 18 A Can you direct me to the page number, please.  
 19 Q Page 2, line 12.  
 20 A Okay. I'm there.  
 21 Q Is there any reason why you couldn't agree to do that?  
 22 A Well, we have current agreements in place, an  
 23 Interconnection Agreement in place that's been recently  
 24 filed with Western Wireless and had they wished to  
 25 bring up LNP into that agreement, I would think that

1 inquiries or requests?  
 2 A I asked them to keep me apprised of any requests we  
 3 had.  
 4 Q If you could go to your direct testimony, on page 5 and  
 5 line 21 you talk about substantial cost savings to be  
 6 realized by not deploying during early phases of  
 7 introduction. Do you see that?  
 8 A Yes, I do.  
 9 Q I believe earlier you stated that you first learned of  
 10 LNP in 1996. Hasn't LNP been around for a while?  
 11 A Well, LNP in the 1996 Act was when Congress  
 12 indicated -- first gave the overtures towards local  
 13 number portability but they did not address anything in  
 14 terms of how it was to be implemented but left that to  
 15 the FCC.  
 16 Q Hasn't LNP software and hardware been around for a  
 17 number of years?  
 18 A I'm sure that it has.  
 19 Q So today do you have an estimate as to what would be  
 20 any end-user surcharge if Swiftel was to implement LNP?  
 21 A Do I have any indication what the surcharge is for LNP?  
 22 Q Yes.  
 23 A Mr. DeWitte's study indicated that -- and I think the  
 24 revised study was 74 cents without transport and a  
 25 dollar with.

1 they would have addressed it at that point in time.  
 2 But as it relates to us routing over the  
 3 Qwest tandem, that's a question that we have discussed  
 4 several times, and what we would like to do is we  
 5 currently route our traffic over a very common trunk  
 6 route to South Dakota Network, and that is our most  
 7 efficient route.  
 8 Q Were you finished?  
 9 A Yes, I am.  
 10 Q Okay. If you go to page 4, and I believe you referred  
 11 to it as a regulatory arbitrage scenario.  
 12 A Yes.  
 13 Q How likely do you think that -- if I understand it  
 14 correctly, one of your wireline customers will port his  
 15 number to Western Wireless in order that a different  
 16 ITC landline customer will be able to call the wireless  
 17 number toll-free?  
 18 A Well, that certainly is a possibility when you have the  
 19 portability issue. Once we have an LNP customer that  
 20 can relocate to some other location they can utilize  
 21 that to avoid toll. I think in many cases customers  
 22 are using wireless for toll avoidance. And we talked  
 23 earlier about situations where SDSU students coming in  
 24 from other areas are using their wireless phones to  
 25 avoid toll for their parents hypothetically calling

1 them. I think this situation would be very analogous  
2 to that in that our wireline customers would then be  
3 ported over to a wireless arrangement and we would end  
4 up losing toll because of that.

5 MS. WIEST: Thank you, Mr. Adkins.

6 MR. SMITH: Commissioners?

7 COMMISSIONER BURG: I had one. What  
8 are the lengths of the Interconnection Agreements?

9 THE WITNESS: If I recall correctly,  
10 I think the Interconnection Agreement with Western  
11 Wireless is a two-year agreement.

12 MR. COIT: May I correct that for  
13 the record? Or is that appropriate or not? We  
14 took judicial notice of it. I believe they're  
15 actually three years but it's from -- it's from  
16 January 1 of 2003.

17 MR. SMITH: We've received the  
18 agreement into the record so it is what it is but  
19 just to correct Jim's impression, I don't think we  
20 need to correct the record necessarily.

21 MR. COIT: Yes. I just wanted to  
22 make sure the record reflected the right number.

23 MR. SMITH: Are you available for  
24 cross-examination?

25 Do you have another question?

1 A If the calls -- the end-user would not experience a  
2 charge as it related to a call over the EAS network,  
3 something that was local to our serving territory.  
4 However, they would receive a toll charge for any call  
5 that was routed to SDN to be terminated through an IXC.

6 Q And you were asked about -- I guess, the reason why  
7 customers conclude whether one service is better than  
8 another. Is size of the service area the only  
9 consideration in your opinion that a customer would  
10 consider to determine whether one service is better  
11 than another?

12 A No. Size and calling scope is not the only issue.  
13 It's interesting that we have -- our marketing group  
14 ends up marketing both the wireline and wireless and  
15 there are distinct advantages and disadvantages for  
16 each type of service. On the wireless side, you have  
17 the portability but you certainly don't have the  
18 quality of service. You have more frequently dropped  
19 calls or blocked calls, coverage issues.

20 On the wireline side, you do have exceptional  
21 quality of service, tremendous reliability. The  
22 wireline telephone system was built for reliability.  
23 Five 9s of reliability has been the industry standard.  
24 We have wanted to build a network such that it would  
25 support E-911 emergency services and highly reliable

1 COMMISSIONER BURG: No.

2 MR. SMITH: Any redirect?

3 MS. SISAK: Yes.

4 REDIRECT EXAMINATION

5 BY MS. SISAK:

6 Q Can you please describe your existing interconnection  
7 facilities with Western Wireless? Do you have any?

8 A We do not have any interconnection facilities with  
9 Western Wireless.

10 Q What interconnection facilities do you have for the  
11 routing of traffic to wireless carriers?

12 A We have one interconnection arrangement with Sprint PCS  
13 or Swiffel PCS and that is all.

14 Q How do you route calls today to Western Wireless?

15 A Calls today to Western Wireless are routed depending  
16 upon the numbers that are dialed. If calls to Western  
17 Wireless are within our local rate area they are routed  
18 through the EAS trunks that we have to ITC for  
19 termination there. In the event that the Western  
20 Wireless numbers are not within our rate area, then we  
21 route those calls to South Dakota Network to our  
22 interexchange carriers.

23 Q Does that mean -- what does that mean in terms of how  
24 end-user customers are charged for calls that they  
25 place to Western Wireless?

1 telecommunications service for our customers.

2 Q And I believe you were asked about comparing the  
3 assessment of a charge for your broadband service,  
4 comparing the assessment of an LNP surcharge. How do  
5 you charge and who do you charge for broadband service  
6 as compared to who would you charge or assess the LNP  
7 surcharge?

8 A Well, it seems to me that the customers of our  
9 broadband service would pay for that service. And our  
10 customer base would receive the LNP surcharge fees.  
11 And as we relate to the comparison between the costs,  
12 the customers that would purchase broadband services  
13 are buying a commodity and a commodity, rather, that  
14 has a particular value, and they voluntarily subscribe  
15 to that service. As it would relate to an LNP charge,  
16 that's something that would be imposed on them for  
17 something that they may or may not use. It would  
18 become akin to another tax or another add-on to their  
19 local number charges.

20 Q And do you have some idea of what the total impact of  
21 those types of surcharges currently are on your  
22 end-users?

23 A Well, on our residential customers, residential rates,  
24 \$14. If we add up all of the surcharges, I believe  
25 that's about \$7.20.

- 1 Q Is that 7.20 before LNP or after LNP?  
 2 A That 7.20 would be before LNP.  
 3 Q You were also asked about whether you had contacted any  
 4 wireless carriers. Have any wireless carriers  
 5 contacted you to resolve the high cost of LNP?  
 6 A No. We have not had any discussions with other --  
 7 Q Any wireless carriers contact you to try to arrange a  
 8 cheaper transport solution or a different transport  
 9 solution?  
 10 A No. We have not had those discussions. We have not  
 11 been contacted.  
 12 Q And, finally, what is your understanding as to when you  
 13 were ordered to provide -- the first date by which you  
 14 were ordered to provide wireline-to-wireless  
 15 portability by the FCC?  
 16 A The first date would be May 24, 2004.  
 17 Q I'm sorry. The day that the FCC required that.  
 18 A Oh, that would be November 10 of 2003.  
 19 MS. SISAK: That's all of my  
 20 questions.  
 21 MR. SMITH: Rich?  
 22 MR. COIT: No questions.  
 23 RE-CROSS-EXAMINATION  
 24 BY MR. WIECZOREK:  
 25 Q You said there's distinct advantages and disadvantages

- 1 to cell phone service versus wireline service. Don't  
 2 you believe that customers should have the option of  
 3 making a decision of whether they think the wireless  
 4 service would be a better service and take that number  
 5 over from your wireline?  
 6 A Well, I believe that the customer should make the  
 7 choice whether they want wireless or wireline, and I  
 8 believe they are making that choice currently even  
 9 without local number portability.  
 10 MR. WIECZOREK: I have nothing else.  
 11 MR. SMITH: Thank you. Ms. Wiest?  
 12 MS. WIEST: No.  
 13 MR. SMITH: Commissioners?  
 14 CHAIRMAN SAHR: Just give me a  
 15 moment.  
 16 (Pause)  
 17 CHAIRMAN SAHR: No. I have nothing.  
 18 MR. SMITH: Thank you, Mr. Adkins.  
 19 You may step down.  
 20 (Proceedings are in recess)  
 21  
 22  
 23  
 24

=====

TRANSCRIPT OF PROCEEDINGS, held in the  
above-entitled matter, at the State Capitol Building,  
500 East Capitol Avenue, Pierre, South Dakota, on the  
21st day of June through the 1st day of July 2004.

1 (Exhibits Stockholm 1 through 3 are marked for identification)  
 2 (Exhibits SDTA 1 and 2 are marked for identification)  
 3 (Exhibit Brookings 3 is marked for identification)  
 4 MR. SMITH: We are back in session  
 5 in the LNP Dockets, the numbers of which I'm not  
 6 going to repeat. Today we're going to begin, as we  
 7 said yesterday, with Mr. Gerdes presenting his  
 8 Motion and following that we'll begin with the  
 9 managers that were noticed in the Notice of Hearing  
 10 and we'll take them in the order in which they  
 11 appeared in the notice, unless some of them aren't  
 12 here, and then we'll take them in a different  
 13 order. Randy isn't here at the moment.  
 14 Mr. Gerdes, would you care to proceed with  
 15 your Motion.  
 16 MR. GERDES: Thank you,  
 17 Mr. Chairman. Members of the Commission, we've  
 18 made a Motion for judicial notice to ask that the  
 19 testimony of Tom Simmons -- that the Commission  
 20 take judicial notice of the testimony of Tom  
 21 Simmons and Mary Lohnes for the purposes of the LNP  
 22 Dockets, and specifically as it relates to Docket  
 23 TC04-054. And as a matter of fact, I should  
 24 correct myself. The Motion is simply that that  
 25 testimony be applicable to the TC04-054 Docket and

1 not the other Dockets.  
 2 And of course there's no question but that the  
 3 Commission is entitled to and can take judicial  
 4 notice. That's statutorily preserved in 1-26-19.  
 5 The question simply is will the Commission exercise  
 6 discretion.  
 7 In our Motion we've set forth what we think  
 8 are substantial reasons why it should. First of  
 9 all, the relief requested in the 192 Docket was  
 10 partially -- there were two things asked for. One,  
 11 to compel good-faith negotiation and the other to  
 12 compel local number porting. So that issue was in  
 13 that Docket and was contemplated by their  
 14 testimony.  
 15 Secondly, the parties are the same and the  
 16 issue of local number porting is the same and as I  
 17 indicated to the Commission before, quite frankly I  
 18 believe we were under the impression the testimony  
 19 would be applicable to both and I apologize that I  
 20 wasn't clear on that coming into these hearings.  
 21 Our alternative is to re-call them as  
 22 witnesses and have them give essentially the same  
 23 direct testimony again in these Dockets. And we  
 24 would of course -- if this Motion is denied we  
 25 would make a Motion to permit them to come back and

1 present testimony which I will represent will be  
 2 essentially the same as they have already given.  
 3 And as I have said, they have been subject to  
 4 cross-examination by the same parties in the Docket  
 5 and the cross-examination was wide ranging and it  
 6 did touch on LNP issues.  
 7 So without belaboring the point I've cited  
 8 some cases that talk about the fact that judicial  
 9 notice of prior proceedings can be taken. Of  
 10 course, the Commission knows that well. Based on  
 11 my own experience the Commission has taken judicial  
 12 notice of prior Dockets and testimony in prior  
 13 Dockets. The one that comes to my mind was in the  
 14 US West switched access rates Docket. My  
 15 recollection is that the Commission took judicial  
 16 notice of that -- of a prior proceeding in switched  
 17 access rates.  
 18 So with that, Mr. Chairman, members of the  
 19 Commission, we would ask the Commission to take  
 20 judicial notice of the testimony of W. Tom Simmons  
 21 and Mary Lohnes and take judicial notice of that  
 22 testimony and such portions of that testimony as  
 23 the Commission deems relevant to the issues in this  
 24 Docket and that the evidence be applicable to this  
 25 Docket only, referring to TC04-054.

1 MR. SMITH: And when you ask the  
 2 Commission to take judicial notice of the  
 3 testimony, you're asking us only to take judicial  
 4 notice that the testimony as represented on the  
 5 transcript and the exhibits is what it is?  
 6 MR. GERDES: Right. And that it be  
 7 applicable to the 054 Docket.  
 8 MR. SMITH: As opposed to the  
 9 judicial notice statutes contemplate taking  
 10 judicial notice of facts. And you're not asking us  
 11 to take judicial notice that anything in that  
 12 testimony is true or not true?  
 13 MR. GERDES: Only to the extent that  
 14 the facts are represented by the testimony, if I --  
 15 I mean, the Commission as the finder of fact can  
 16 either accept those facts or not in the testimony,  
 17 but I think I'm asking that the testimony be  
 18 taken -- judicial notice be taken of the testimony  
 19 to the extent that it may be relevant to the issues  
 20 of the 054 Docket. I mean, it would be evidence in  
 21 the 054 Docket is what we're asking.  
 22 MR. SMITH: Alternatively then the  
 23 judicial notice, would another avenue for doing  
 24 this would be to just move the admission of that  
 25 testimony into this Docket?

331

1 MR. GERDES: I could do that too.  
 2 MR. SMITH: The record in that case.  
 3 MR. GERDES: Right. My purpose is  
 4 to accomplish that.  
 5 MR. SMITH: Your purpose is so we  
 6 don't have to listen to it all over again.  
 7 MR. GERDES: That's correct.  
 8 MR. SMITH: With that, let's  
 9 entertain a response.  
 10 MR. DICKENS: Thank you, Mr. Smith  
 11 and Commissioners. We do oppose the Motion, both  
 12 as a matter of fairness, particularly having  
 13 listened to the comments of my friend Mr. Gerdes  
 14 and after doing a little additional research in  
 15 lieu of the filing of the Motion yesterday.  
 16 The reason that we oppose it basically is  
 17 fundamental fairness. Mr. Gerdes' client had an  
 18 opportunity to file testimony in this case and  
 19 didn't. Instead it filed testimony in a case  
 20 involving an allegation of bad faith, which said,  
 21 by the way, we want you to order them to implement  
 22 LNP as a result of our Motion to Compel.  
 23 I did, I believe, cross-examine Ms. Lohnes to  
 24 the extent -- on the issue of whether they  
 25 thought -- whether Midco's position was the

332

1 Interconnection Agreement required us to actually  
 2 implement LNP, and she said yes. That's briefable.  
 3 You know, we felt -- there's no argument that we  
 4 didn't get due process. I say that I'm still not  
 5 happy you struck the testimony, but we're not --  
 6 we're not contesting that some major lapse of  
 7 fundamental fairness occurred because we weren't  
 8 able to present a case.  
 9 This Docket is a Motion to suspend under a  
 10 different section of the statute. This Docket is  
 11 the subject of Section 251(f) of the '96 Act which  
 12 sets forth certain standards for suspension of an  
 13 LNP requirement, that is technical feasibility,  
 14 economic burden from a couple of different prongs,  
 15 and public interest.  
 16 None of the testimony addresses those. If  
 17 Ms. Lohnes and Mr. Simmons were here to testify, we  
 18 would cross-examine them as to those statutory  
 19 elements because their testimony has to be  
 20 responsive or relevant in some way to those  
 21 elements that control this proceeding. So you  
 22 asked Mr. Gerdes, do you want us to take judicial  
 23 notice of the testimony just to show that they said  
 24 that in that proceeding and his response was no, we  
 25 want you to take judicial notice so that those

333

1 facts are established in this record and we're  
 2 unable to -- we don't have our fundamental tools of  
 3 due process and fairness if you do that because he  
 4 is asserting those facts for the truth of the  
 5 matter asserted, not merely that they were said.  
 6 They are facts that he wants to establish in this  
 7 record as probative on the question of whether a  
 8 suspension should be granted or not.  
 9 Midco had an opportunity to file testimony.  
 10 They didn't for whatever reason. Our clients  
 11 shouldn't have to bear the burden and be prejudiced  
 12 because of that, and I think that's the result.  
 13 On the law that Mr. Gerdes cited, Alexander  
 14 vs. Solem, I would point out first that the court  
 15 records that were the subject of judicial notice is  
 16 on page 488 of the case that is cited, reflects  
 17 that it was a criminal file which contained  
 18 certified copies of prior judgments of conviction.  
 19 There's no Commission action we're taking judicial  
 20 notice of or the request is not to take judicial  
 21 notice of a Commission action. It's a contested  
 22 fact. It would be a contested fact.  
 23 Now Mr. Meierhenry, who was a lawyer for the  
 24 State of South Dakota in the case cited by  
 25 Mr. Gerdes, since wrote a trial practice manual for

334

1 South Dakota and in his trial practice manual that  
 2 Mr. Meierhenry wrote, this is from the South Dakota  
 3 trial handbook, chapter 19, page 140 under heading  
 4 Section 19:2, items which may be judicially  
 5 noticed, the third paragraph says, "The court need  
 6 not have actual knowledge to judicially notice a  
 7 fact. However, as soon as the matter becomes  
 8 disputable it is no longer common knowledge and it  
 9 should not be judicially noticed by the court."  
 10 And I would submit to you with all due respect  
 11 that we very much dispute testimony that says we  
 12 should have -- we should be forced to implement  
 13 LNP. That's why we've invested all the time and  
 14 money and witnesses and lawyers is to try to avoid  
 15 that result. So with all due respect to Midco, I  
 16 would submit that neither fundamental fairness nor  
 17 the law compels you to take judicial notice.  
 18 MR. SMITH: Mr. Coit.  
 19 MR. COIT: Thank you. SDTA would  
 20 concur in the position just stated by Mr. Dickens.  
 21 I would also note that unless something escapes me,  
 22 I don't believe we were parties. SDTA, who is a  
 23 party in this proceeding is not a party to that  
 24 other case. Thank you.  
 25 MR. SMITH: Mr. Wieczorek.

1 MR. WIECZOREK: I have no objection  
 2 to their Motion and granting it. It seems as  
 3 confusing as it's been scheduling these things, I  
 4 can understand how there could be some confusion as  
 5 to what testimony was supposed to apply to what.  
 6 And I was not a party to that Motion to Compel but  
 7 the statements made concerning LNP I don't believe  
 8 are prejudicial to anybody, they just set forth the  
 9 facts and what's been requested.

10 MR. SMITH: Thank you. Ms. Wiest.  
 11 MS. WIEST: I would agree with  
 12 Mr. Wieczorek that the circumstances leading up to  
 13 this has been rather confusing with respect to  
 14 whether this should be -- whether the Dockets were  
 15 actually going to be combined or not, but at this  
 16 point I guess I would say that Midcontinent did not  
 17 file in 04-054 and so I would think that they would  
 18 have to put on witnesses in that case.

19 MR. SMITH: Chairman Sahr.  
 20 CHAIRMAN SAHR: I had a question for  
 21 Mr. Dickens. You've indicated that you do intend  
 22 to cross-examine the witnesses of Midcontinent. Is  
 23 that your intention if they do come back?

24 MR. DICKENS: If they were permitted  
 25 to come back, I would like to cross-examine them

1 notice of that testimony to the extent the  
 2 Commission deems it applicable to the 054 Docket.  
 3 And so I've tried to craft the requested relief as  
 4 narrowly as possible, yet to we believe present a  
 5 situation which is fundamentally fair to both  
 6 Midcontinent and to the other parties.

7 Finally, if, in fact, Mr. Dickens would like  
 8 to cross-examine further the witnesses, we would  
 9 have no problem in asking them to come back at an  
 10 appointed time to be cross-examined additionally on  
 11 whatever other topics that Mr. Dickens and others  
 12 would choose to pursue within the framework of  
 13 their direct testimony.

14 CHAIRMAN SAHR: I will move that we  
 15 go into executive session.

16 VICE CHAIR HANSON: Second.  
 17 (A short recess is taken at which time the  
 18 Commission meets in executive session)

19 MR. SMITH: We're back on the record  
 20 having returned from executive session. I am going  
 21 to deny the Motion to take judicial notice. I  
 22 guess if you want later when I get to that, Dave,  
 23 if you want to alternatively move to have that  
 24 evidence introduced that might be an alternative.

25 In the interest again as I think your point's

1 and possibly sponsor rebuttal testimony.

2 CHAIRMAN SAHR: And is this  
 3 cross-examination that -- and I think clearly we  
 4 didn't have a meeting of the minds on what was  
 5 expected for the witnesses of Midcontinent. Is  
 6 this cross-examination that you would have  
 7 conducted on Monday if you had known that that  
 8 would have been your one and only chance to  
 9 cross-examine the witnesses?

10 MR. DICKENS: It's cross-examination  
 11 I would have conducted had I known that the  
 12 testimony concerned the standards for suspension in  
 13 this proceeding as opposed to the Motion to Compel  
 14 because they're different legal standards.

15 CHAIRMAN SAHR: Thank you.  
 16 MR. SMITH: Mr. Gerdes, do you have  
 17 a response?

18 MR. GERDES: Very briefly. Thank  
 19 you. First, we do not necessarily agree that the  
 20 statutory foundation for the two Dockets is  
 21 different because in asking for local number  
 22 portability in the 192 Docket Midcontinent was in  
 23 fact asking for relief under the Federal Act.

24 Secondly, as to the character of the evidence,  
 25 as you will note, the Motion is to take judicial

1 well taken, Ben, that fairness is an issue, and I  
 2 think the Commission believes that it would be  
 3 prejudicial to Petitioners to have this happen.

4 The other side of the fairness issue is how do  
 5 we deal with Mr. Gerdes' misapprehension of the  
 6 discovery and scheduling order and I think in the  
 7 interest of fairness there it's our decision we are  
 8 not going to act in a harsh manner with respect to  
 9 that. And I think the solution, Dave, and what  
 10 we've decided is to schedule Midcontinent for 054,  
 11 to allow you, your witnesses, to appear in the 054  
 12 Docket on July 1, and despite the fact that you  
 13 didn't prefile any testimony due to a mistake we're  
 14 going to allow your witnesses to testify in the 054  
 15 Docket and then allow a full cross-examination by  
 16 Petitioners.

17 MR. DICKENS: May I ask would the  
 18 testimony --

19 CHAIRMAN SAHR: Please turn on your  
 20 mike.

21 MR. DICKENS: Pardon me. Would the  
 22 testimony that would be sponsored on July 1  
 23 constitute the same testimony that was prefiled,  
 24 they sponsored the prefiled testimony in the other  
 25 Docket?

1 MR. SMITH: I think you'll have to  
 2 address that to Mr. Gerdes. I don't know what he  
 3 would do.  
 4 MR. GERDES: My question would be do  
 5 you want us to file prefiled testimony in advance  
 6 of July 1?  
 7 MR. SMITH: Do you want that?  
 8 MS. SISAk: (Nods head).  
 9 MR. GERDES: Then we will do it if  
 10 that's what you want. And I guess the next  
 11 question, I had contemplated it would be  
 12 substantially the same as the first testimony and I  
 13 guess what we'll do is we'll just file what we  
 14 think is appropriate and you can comment on that.  
 15 I'm not proposing it's going to be substantially  
 16 different, don't get me wrong.  
 17 MR. DICKENS: I was going to say if  
 18 it were going to be exactly that testimony, I think  
 19 we would stipulate the testimony into the record  
 20 and just cross-examine them on that.  
 21 MR. GERDES: Oh, let me --  
 22 MR. DICKENS: Let me give that some  
 23 thought with my co-counsel and that may be a way to  
 24 handle it.  
 25 MR. SMITH: On that issue in terms

1 of prefilng why don't we hear some testimony and  
 2 you guys have some time to think about that and  
 3 we'll revisit that maybe first thing after lunch.  
 4 MR. GERDES: Fine.  
 5 CHAIRMAN SAHR: I want to add one  
 6 thing. Pretty obviously there was some confusion  
 7 as to how these proceedings would work and I think  
 8 to a large extent it obviously was a good-faith  
 9 error on Midcontinent on their part and the  
 10 unfortunate thing is I think if we would have been  
 11 able to have the cross-examination on Monday we  
 12 probably would have spent less time doing that than  
 13 we have and less effort than we have with the  
 14 attorneys and time spent here. So it's  
 15 unfortunate, but I think we definitely appreciate  
 16 everyone's willingness to be reasonable and trying  
 17 to correct what was obviously just a  
 18 misunderstanding.  
 19 (Discussion off the record)  
 20 MR. SMITH: With that, Petitioners  
 21 please proceed with the three company Dockets that  
 22 we have for this morning and those are TC04-062,  
 23 Stockholm Telephone Company; TC04-060, Venture  
 24 Communications Cooperative; and TC04-061, West  
 25 River Cooperative Telephone Company.

1 MS. POLLMAN ROGERS: Thank you. And  
 2 I believe what we have discussed was calling the  
 3 general managers first this morning so I would  
 4 first of all call Marjorie Nowick to the stand.  
 5 MARJORIE NOWICK,  
 6 called as a witness, being first duly sworn in the  
 7 above cause, testified under oath as follows:  
 8 DIRECT EXAMINATION  
 9 BY MS. POLLMAN ROGERS:  
 10 Q Could you please state your name and address for the  
 11 record.  
 12 A My name is Marjorie Nowick and my business address is  
 13 Post Office Box 20 and we're located at 210 North Main  
 14 Street in Stockholm, South Dakota.  
 15 Q What is your occupation?  
 16 A Well, I have been the office manager, and I am one of  
 17 the owners of the company and we are a little rural  
 18 telephone company, family-owned company in the  
 19 northeast corner of South Dakota.  
 20 Q And you're referring to Stockholm-Strandburg Telephone  
 21 Company?  
 22 A Yes.  
 23 Q I'm going to hand you what has been marked as Stockholm  
 24 Exhibit 1 and also Stockholm Exhibit No. 2. Do you  
 25 want to take a look at those and tell me what they are?

1 A Well, this is the matter of the petition of the  
 2 Stockholm-Strandburg Telephone Company for suspension  
 3 and modification of the Communication Act of 1934 as  
 4 amended.  
 5 Q And is Exhibit 1 your prefiled direct testimony in this  
 6 case?  
 7 A Yes, ma'am.  
 8 Q And is Exhibit No. 2 your prefiled rebuttal testimony  
 9 in this Docket?  
 10 A Yes, ma'am.  
 11 Q And as you take a look at those, are those accurate  
 12 copies of that testimony as we filed them in this  
 13 Docket?  
 14 A Yes, it is.  
 15 Q Do you have any corrections or additions that you would  
 16 like to make to these documents or exhibits at this  
 17 time?  
 18 A The only correction is on the rebuttal testimony I  
 19 would like to take and have I am the office manager of  
 20 the Stockholm-Strandburg Telephone Company and correc  
 21 our address and that is 210 North Main Street,  
 22 Stockholm, South Dakota.  
 23 Q Okay. So on page 1 of Exhibit 2 you are talking about  
 24 line 2 and we are going to strike general manager and  
 25 put office manager; is that correct?

1 A Yes.  
 2 Q Okay. And on line 3 of the first page of your rebuttal  
 3 testimony it should be 210 North Main Street instead of  
 4 201?  
 5 A Yes.  
 6 Q Any other additions or corrections?  
 7 A Not to my knowledge.  
 8 Q Okay. If I asked you the same questions that are  
 9 contained in Exhibits 1 and 2 today, would you respond  
 10 in the same way?  
 11 A I would try to do the best I could.  
 12 Q Okay. This testimony was prepared by you or under your  
 13 direction; is that correct?  
 14 A Yes.  
 15 Q And could you please provide us with a brief summary of  
 16 your testimony?  
 17 A Well, I'm not sure what you mean by that, Darla.  
 18 Q Would you like to summarize what you testified to in  
 19 your direct testimony, in your rebuttal?  
 20 A Well, I can tell you a little bit about our telephone  
 21 company. We have EAS between Stockholm and Milbank.  
 22 We have EAS between Revillo and Milbank and our  
 23 South Shore subscribers have EAS to Watertown.  
 24 Q Perhaps I can help you a little bit. Do you feel that  
 25 based on the testimony that you've submitted that it

1 A Good morning.  
 2 Q How are you?  
 3 A Fine. Thank you.  
 4 Q My name is Paul Lewis and I represent Western Wireless  
 5 in this Docket. I have a series of questions for you.  
 6 Ma'am, you understand that in 1996, over  
 7 eight years ago, number portability became required by  
 8 the FCC, do you not?  
 9 A I remember when it was, you know, put on the record,  
 10 yes, I do.  
 11 Q And so by November 10 of 2003 the FCC mandated  
 12 compliance for your company for local number  
 13 portability by May 24 of 2004 unless there was an  
 14 exception granted. Is that true?  
 15 A Yes.  
 16 Q In your testimony on page 3, line 9 of your direct,  
 17 that's Stockholm 1.  
 18 A Okay.  
 19 Q You acknowledge to having received a bona fide request  
 20 from Western Wireless in December of 2003. That's  
 21 correct, is it not?  
 22 A Yes.  
 23 Q So from December of 2003 until May of 2004 in  
 24 investigating your options available to you to  
 25 implement LNP you never contacted Western Wireless to

1 would be extremely costly to your customers if you were  
 2 forced to implement LNP?  
 3 A Yes, it would be.  
 4 Q And have you had any demand for LNP from your  
 5 customers?  
 6 A No, we have not.  
 7 MS. POLLMAN ROGERS: Thank you,  
 8 Marj, and I would tender her for cross-examination.  
 9 I'm sorry. I will move Exhibits 1 and 2.  
 10 MR. LEWIS: No objections.  
 11 MR. GERDES: No objection.  
 12 MS. WIEST: No objection.  
 13 MR. SMITH: Exhibits Stockholm 1 and  
 14 Stockholm 2 are admitted.  
 15 MR. COIT: I have no questions on  
 16 cross.  
 17 MR. WIECZOREK: Mr. Smith, Mr. Lewis  
 18 will be doing the examination of this witness.  
 19 MR. SMITH: Please proceed,  
 20 Mr. Lewis.  
 21 MR. LEWIS: Members of the  
 22 Commission, good morning, counsel.  
 23 CROSS-EXAMINATION  
 24 BY MR. LEWIS:  
 25 Q Good morning, Ms. Nowick.

1 discuss what options were available to you, did you?  
 2 A That is correct. And when I received the letter I just  
 3 kind of thought it was an informative letter -- you  
 4 know, a form letter that was sent out to people and I  
 5 didn't think it was necessary to contact to you.  
 6 Q But you will acknowledge that you did understand it was  
 7 a bona fide request letter?  
 8 A Yes, I did, sir.  
 9 Q Now one of the arguments that's being presented before  
 10 the Commission today, and Mr. DeWitte has referred to  
 11 it as well as Mr. Dickens, is the economic impact or  
 12 the undue economic burden on your company and your  
 13 customers. Do you agree with that?  
 14 A That is right.  
 15 Q But you also realize that Congress clearly envisioned  
 16 that the implementation of LNP is going to cost  
 17 somewhat; is that true?  
 18 A That is true.  
 19 Q And you also realize that Congress anticipated those  
 20 costs and provided for an end-user surcharge to help  
 21 cover those expenses; correct?  
 22 A Yes.  
 23 Q Now, ma'am, you've noted in your direct testimony on  
 24 page 1 that cellular companies, PCSs, they have a much  
 25 larger local calling area than what you have with your

1 exchange at Stockholm-Strandburg. Is that not true?  
 2 A That's correct.  
 3 Q And would you not agree that it's beneficial for the  
 4 public to have a carrier that can provide them a larger  
 5 local calling area? It's a convenience?  
 6 A I would prefer not to answer that question.  
 7 Q Let me rephrase it. You have an extended area of  
 8 service to Milbank and Watertown; correct?  
 9 A Yes.  
 10 Q And that's a local call, is it not?  
 11 A Yes.  
 12 Q And would you not agree that that basically was  
 13 prompted by the fact that you had customers who wanted  
 14 to call Watertown or Milbank frequently?  
 15 A Yes.  
 16 Q And they didn't want to incur toll charges for those  
 17 calls.  
 18 A That is correct.  
 19 Q So by providing to your customer needs you went ahead  
 20 and made that a local call.  
 21 A That is correct.  
 22 Q Essentially expanding your calling area, wouldn't you  
 23 agree?  
 24 A That is correct.  
 25 Q So if we talk about just basic pocketbook economics,

1 please read that, your response to the question?  
 2 A Okay. Let me see. Now you're on --  
 3 Q Page 3 of your direct.  
 4 A My rebuttal testimony?  
 5 Q Your direct, Exhibit 1.  
 6 A And you said line 18?  
 7 Q Correct. And the statement beginning with "We would."  
 8 It's about the middle of the line.  
 9 A I'm sorry. I'm not finding that on here. Here's my  
 10 18.  
 11 Q Sure.  
 12 A Here's my direct. Okay. Here's line 18.  
 13 Q Page 3.  
 14 A Okay. Okay.  
 15 Q Broadband and we've got a little bit different  
 16 numbering system. Here we go. Right there.  
 17 MS. POLLMAN ROGERS: You can go off  
 18 of this if you want.  
 19 A "We would prefer to serve the real demands of our  
 20 customers than provide a service that has been mandated  
 21 by the FCC and that our customers are not requesting."  
 22 Q So in that statement you refer to the real demands of  
 23 your customer, do you not?  
 24 A Yes.  
 25 Q Yet you have not done any independent internal surveys

1 you know, what hits you in the wallet, it would  
 2 obviously be a benefit for people to be able to keep  
 3 their same phone number but get an extended area of  
 4 service available to them. Wouldn't you agree with  
 5 that?  
 6 A Yes and no.  
 7 Q But yes in terms of customer outlay or expense, what  
 8 they have to pay?  
 9 MS. POLLMAN ROGERS: I will object  
 10 and make sure that the witness understands the  
 11 question. Maybe you would like to rephrase it.  
 12 Q Ms. Nowick, when you say yes and no to my question,  
 13 what don't you understand?  
 14 A Well, I guess I've been in the telephone business for  
 15 many years, 38, and knowing my customer base as it is,  
 16 I have a lot of elderly people and I guess there could  
 17 be added burdens to some people. So I'm very reluctant  
 18 to answer this question.  
 19 Q I'll move on. I'd like to refer you to your direct  
 20 testimony on page 3.  
 21 A Uh-huh. And what lines, sir, please?  
 22 Q It's your answer to the broadband delivery issue. It's  
 23 line 18.  
 24 A Okay. Thank you.  
 25 Q And your statement begins with "We would." Would you

1 within the Stockholm-Strandburg telephone service area  
 2 to determine what your customers would like or what  
 3 they'd be willing to pay to have the option of LNP,  
 4 have you?  
 5 A That is correct. We have not done that.  
 6 Q And, in fact, you're not presenting to the Commission  
 7 today any demographic information on the average income  
 8 or the interests of your client base, are you?  
 9 A No.  
 10 Q Regarding the deployment, the implementation of local  
 11 number portability, Stockholm-Strandburg has not really  
 12 conducted any independent cost investigation either,  
 13 have you?  
 14 A Well, my consultants have taken and done some of this  
 15 work for us or has prepared it.  
 16 Q And when you refer to your consultant, Mr. DeWitte; is  
 17 that true?  
 18 A That is correct.  
 19 Q So basically you've relied on his numbers to constitute  
 20 what you say in your rebuttal testimony as a complete a  
 21 petition as possible. Those were his numbers to make  
 22 your complete petition, is it not?  
 23 A But I believe those numbers were provided from  
 24 information that he has received from us to put these  
 25 things together for us.

1 Q And that information comes from your personal  
 2 knowledge?  
 3 A Yes.  
 4 Q But no survey work concerning the costings was done.  
 5 A No.  
 6 Q In your appearance before the Commission today, ma'am,  
 7 you're not contending that it is technically infeasible  
 8 to implement LNP, are you?  
 9 A I would prefer not to respond to that.  
 10 MS. POLLMAN ROGERS: I'll object.  
 11 It goes beyond the scope of her direct and rebuttal  
 12 exam.  
 13 MR. SMITH: I'm going to sustain the  
 14 objection.  
 15 Q Now as we've previously discussed, it's true that  
 16 Stockholm-Strandburg has local calling to Watertown,  
 17 isn't it?  
 18 A Yes.  
 19 Q So would you tell the Commission how you're planning to  
 20 make sure that ported numbers from a local Watertown  
 21 wireline is going to be ported properly?  
 22 MS. POLLMAN ROGERS: I'm going to  
 23 interpose the same objection. This goes beyond the  
 24 scope of what she has testified to in her direct  
 25 and redirect. Furthermore, I believe that these

1 is 27.50. South Shore, the business is 29.80, and the  
 2 rural is 32.80, and the Stockholm is 19.50, and the  
 3 rural business is 19.50.  
 4 Q Thank you. And you state that there are four wireless  
 5 carriers that have the authority to serve your area?  
 6 A I believe the testimony -- I believe it is five.  
 7 Q Oh, okay. Five. And of those how many are actually  
 8 currently serving your area?  
 9 A Well, Western Wireless is.  
 10 Q Okay.  
 11 A And RC, which is Cellular 2000.  
 12 Q And are they serving your entire area?  
 13 A Yes. Oh, yes. Yes. They serve our entire area. And  
 14 we have -- I can't remember what page this was on where  
 15 these were listed.  
 16 Q Page 2, line 19 on your direct.  
 17 A Okay. Just a minute. Okay. And then Verizon and  
 18 Western Wireless, Sprint, Nextel, and RC, and I would  
 19 say of the two of them it is Western Wireless and RC  
 20 that are the biggest. And then there possibly could be  
 21 some Sprint also.  
 22 Q So is Nextel currently serving or do they just have the  
 23 authority to serve?  
 24 A I believe they just have the authority to serve.  
 25 Q For those carriers that do not currently provide

1 questions can be directed to her cost consultant.  
 2 MR. SMITH: Sustained.  
 3 MR. LEWIS: No further questions.  
 4 MR. SMITH: Thank you. Mr. Gerdes  
 5 is not a party to this; right?  
 6 MR. WIECZOREK: He is not.  
 7 MR. SMITH: Ms. Wiest.  
 8 MS. WIEST: Thank you.  
 9 CROSS-EXAMINATION  
 10 BY MS. WIEST:  
 11 Q What is your current local rate?  
 12 A My current rate is -- I've got three different rates  
 13 for my exchange. They're in here someplace. Well, I  
 14 will take and give them to you the best of my  
 15 knowledge.  
 16 Q Okay.  
 17 A Our Stockholm customers pay \$15. Our city residents in  
 18 the Revillo exchange pay \$15. Our Revillo customers  
 19 that are out in the area pay 17.20, and now this is  
 20 residential customers, Rolayne.  
 21 Q Sure.  
 22 A And our South Shore customers pay \$15 and our resident  
 23 rural pays 18 and -- okay. Our Stockholm customers pay  
 24 15 and 15. Now we will go to the business entity.  
 25 Revillo pays in the city 27.50, and the business rural

1 service, do you have any reason to expect that they  
 2 will be providing service in the near future?  
 3 A I do not know.  
 4 Q Okay. If the Commission were to order you to implement  
 5 LNP, as you understand what your cost witnesses come up  
 6 with, do you believe that you would look at more  
 7 efficient and less costly options at that point?  
 8 A I don't know. I don't know how to respond to that.  
 9 MS. WIEST: I have nothing further.  
 10 MR. SMITH: Thank you. Are there  
 11 any questions from the Commissioners?  
 12 COMMISSIONER BURG: None.  
 13 CHAIRMAN SAHR: Good morning.  
 14 THE WITNESS: Good morning.  
 15 CHAIRMAN SAHR: Again.  
 16 THE WITNESS: Good morning.  
 17 CHAIRMAN SAHR: I just have a couple  
 18 of questions. And I'm going to talk about some  
 19 figures from the cost study, but I'm not going to  
 20 ask you about the numbers, just the impact.  
 21 On the cost study done by Mr. DeWitte we are  
 22 looking at, according to his figures, \$5.58 per  
 23 month recurring charges for your customers without  
 24 transport, and including transport, close to \$40 a  
 25 month, which just from my quick perusal, appears to

355

1 be some of the highest numbers in the state.  
 2 THE WITNESS: That is correct.  
 3 CHAIRMAN SAHR: I would assume that  
 4 that would have a significant impact on either your  
 5 operations or else customers or perhaps both if you  
 6 were forced to --  
 7 THE WITNESS: Yes, it would.  
 8 CHAIRMAN SAHR: To take on those  
 9 costs.  
 10 THE WITNESS: And I could tell you a  
 11 little story about this, you know, that I have one  
 12 customer and she's a very good customer. She has a  
 13 cell phone and she has told me this, that she uses  
 14 her cell phone, calls her family, and then her  
 15 family call her right back.  
 16 CHAIRMAN SAHR: Thank you.  
 17 COMMISSIONER BURG: I do have one,  
 18 John.  
 19 MR. SMITH: Commissioner Burg.  
 20 COMMISSIONER BURG: Marj, you know,  
 21 you're indicating if you had to invest in something  
 22 like this it would delay --  
 23 THE WITNESS: Pardon?  
 24 COMMISSIONER BURG: It would delay  
 25 the DSL build-out that your customers are more

356

1 interested in; correct?  
 2 THE WITNESS: Well, we are doing DSL  
 3 as of now and it probably could.  
 4 COMMISSIONER BURG: What percentage  
 5 of your customers have DSL availability? Not how  
 6 many take it but what percent could take it if they  
 7 wanted to?  
 8 THE WITNESS: Well, I believe all of  
 9 our customers could because we have been pushing  
 10 out quite far and it is working fine with all the  
 11 new technology that we've got to help us.  
 12 COMMISSIONER BURG: Okay. Good.  
 13 Thank you. That's all I have.  
 14 VICE CHAIR HANSON: Thank you, John.  
 15 MR. SMITH: Do you have a question,  
 16 Commissioner Hanson?  
 17 VICE CHAIR HANSON: Thank you.  
 18 Ms. Nowick, how do you pronounce your last name,  
 19 Nowick?  
 20 THE WITNESS: N-O-W-I-C-K, Nowick,  
 21 and that's because those crazy Norwegians didn't  
 22 know how to spell when they came to the  
 23 United States.  
 24 VICE CHAIR HANSON: We'll talk about  
 25 how it was originally spelled some other time. On

357

1 page 3 of your testimony, and this is gratuitous  
 2 that Commissioner Burg asked the questions he did  
 3 because I've highlighted some parts of your  
 4 testimony on your --  
 5 THE WITNESS: Are you on the direct?  
 6 VICE CHAIR HANSON: I'm on the  
 7 prefiled.  
 8 THE WITNESS: The prefiled. Okay.  
 9 VICE CHAIR HANSON: Page 3,  
 10 beginning on line 13. I don't know that you need  
 11 to reference it. But you stated "Of all of our new  
 12 services, our customers are most interested in  
 13 broadband."  
 14 I assume you know your customers fairly well.  
 15 You have 714 exchanges and a small town, you  
 16 probably know a lot of folks. But how do you know  
 17 for certain of all of the new services that are  
 18 available that they are most interested in  
 19 broadband?  
 20 THE WITNESS: Well, I believe it's  
 21 because of the questions that people are asking.  
 22 They're very interested in TV. They are requesting  
 23 more and more, you know -- more people are taking  
 24 Internet and I definitely do believe that broadband  
 25 is here to stay.

358

1 VICE CHAIR HANSON: Without getting  
 2 into any confidential information about your  
 3 company, I imagine that's an expensive build-out  
 4 for you, broadband. I'm trying to see how the  
 5 switching to LNP may affect your build-out because  
 6 that is part of your argument here.  
 7 In your statement to an extent you state that  
 8 if you -- I'm searching for -- there's a number of  
 9 questions that I can easily ask you, but I don't  
 10 know that they would -- I don't want to harm your  
 11 business. The LNP build-out, will that in some way  
 12 delay the broadband? Have you examined the  
 13 financial costs of LNP so you know that?  
 14 THE WITNESS: Well, I guess not any  
 15 more than what Mr. DeWitte has done, you know, for  
 16 us. And we are in the process of doing a broadband  
 17 loan at this time and we are not quite finished  
 18 with that but we have been working on that.  
 19 VICE CHAIR HANSON: You know that  
 20 you would be able to pass the cost onto the  
 21 consumer in order to provide for the LNP. What  
 22 affect do you see that as having on your exchange?  
 23 THE WITNESS: I would probably  
 24 rather to have Mr. DeWitte answer this for me,  
 25 please.

1 VICE CHAIR HANSON: All right. Just  
2 curious from your own personal knowledge and your  
3 relationship with your customers. But I appreciate  
4 that and I will have him answer that question.  
5 Thank you very much. Thank you, John.

6 MR. SMITH: Any redirect?

7 MS. POLLMAN ROGERS: I have just a  
8 couple on redirect.

9 REDIRECT EXAMINATION

10 BY MS. POLLMAN ROGERS:

11 Q Marj, you were asked a little bit about your EAS  
12 services. You acquired some of your exchanges later  
13 through a US West, what was then US West acquisition;  
14 is that right?

15 A Yes.

16 Q Were those EAS arrangements in existence when you  
17 bought the exchanges?

18 A Yes.

19 Q So you just continued those services?

20 A Yes.

21 Q All right. You were also asked by Mr. Lewis if you had  
22 done any independent surveys or demographic  
23 information, and I think Mr. Hanson covered this but  
24 how many customers do you serve in your telephone  
25 exchange?

1 customers would react if you did choose to pass all or  
2 part of this on and add a surcharge of 4.50 or 59 or 60  
3 cents to their bills? How do you think your customers  
4 would react?

5 A They would not be happy at all.

6 Q You told a story about a customer of yours who calls  
7 her family on the cell phone and then they call back on  
8 the landline phone?

9 A That is correct.

10 Q Why do they do that? Do you know?

11 A Well, in the first place she would like to take and  
12 save herself some money, which is the big thing, and  
13 also the reliability because they are in a bigger city  
14 where they have better cell service and so then she can  
15 visit with them and hear them and so forth much better.

16 Q And they call her back because the landline service is  
17 better quality; is that correct?

18 A That is correct.

19 Q If you were required by this Commission to implement  
20 LNP, would that be a costly burden to your company  
21 based on the cost testimony as you're aware of it?

22 A Yes, it would be.

23 MS. POLLMAN ROGERS: Thank you.

24 That's all I have.

25 MR. SMITH: Mr. Lewis?

1 A 714.

2 Q Do you feel you know those customers personally quite  
3 well?

4 A Yes.

5 Q You live in the same community, you have coffee with  
6 them?

7 A I have coffee with them. I've grown up with them.  
8 I've played with them. I've gone to their funerals.  
9 I've done just about everything you can do.

10 Q And have any of those customers asked for or demanded  
11 LNP services from your company?

12 A No, they have not.

13 Q And on the other hand, have some of your customers  
14 requested and in fact availed themselves to broadband  
15 services, access to broadband DSL, Internet, all of  
16 those types of services?

17 A Yes. They have access to all of those services.

18 Q And those are the things they're asking for by way of  
19 service; is that correct?

20 A Yes.

21 Q Okay. And even based on the cost estimates of Western  
22 Wireless wherein excluding transport, just setting that  
23 issue aside for a moment, even Western Wireless's  
24 expert says that best case scenario that \$4.59 is the  
25 per-line, per-month amount. How do you believe your

1 MR. LEWIS: No further questions.

2 MR. SMITH: Ms. Wiest?

3 MS. WIEST: Nothing further.

4 MR. SMITH: Anything from the  
5 Commissioners? You're excused, Ms. Nowick.

6 THE WITNESS: Thank you, everybody.  
7 (Discussion off the record)

8 MS. POLLMAN ROGERS: We'll call  
9 Randy Houdek to the stand next.

10 (Exhibits Venture 1 through 3 are marked for  
11 identification)

12 MS. POLLMAN ROGERS: I'll call  
13 Randy Houdek, and this would be in Docket No.  
14 TC04-060.

15 RANDY HOUDEK,  
16 called as a witness, being first duly sworn in the  
17 above cause, testified under oath as follows:

18 DIRECT EXAMINATION

19 BY MS. POLLMAN ROGERS:

20 Q Would you please state your name and address for the  
21 record.

22 A Randy Houdek, Highmore, South Dakota.

23 Q What is your occupation?

24 A General manager of Venture Communications.

25 Q Venture is in Highmore and elsewhere in the state?

1 A Right.

2 Q Randy, I want you to look at what has been marked as

3 Venture Exhibit 1 and Venture Exhibit 2. Are these the

4 direct and rebuttal testimony that you filed in these

5 Dockets?

6 A Yes.

7 Q And did you prepare these or were they prepared under

8 your direction?

9 A Yes.

10 Q I understand that you do have some corrections to make

11 to these exhibits or one of them in particular?

12 A Right. My direct testimony.

13 Q Okay. And what corrections would you like us to make

14 to that testimony?

15 A On page 1 I'd like to add the word "approximately"

16 13,666. It changes from month to month.

17 Q And that would be on line 10?

18 A Yes.

19 MR. SMITH: Which page are we on?

20 MS. POLLMAN ROGERS: Page 1 of

21 direct testimony and referring to the number of

22 access lines, add the word "approximately."

23 Q Is that correct?

24 COMMISSIONER BURG: I don't find

25 that on line 10.

1 CHAIRMAN SAHR: On DeWitte's

2 testimony.

3 COMMISSIONER BURG: Oh, excuse me.

4 Q And any other corrections?

5 A Yeah. I had a couple of other mistakes and I apologize

6 for them, but on line 19 where it says "type 1," that

7 should be type 2-B connections. And on line 20 instead

8 of "Britton" that should be Bowdle. And on page 3,

9 line 7 where it says "type 1" that should be type 2.

10 Line 8, "Britton" should be Bowdle. And line 11, "type

11 2-B" should be type 1.

12 Q Any other corrections or additions?

13 A No.

14 MR. SMITH: It was Britton Bowdle in

15 line 8 too?

16 MS. POLLMAN ROGERS: That's correct.

17 Q Randy, with those additions and corrections, if I asked

18 you the questions in these exhibits today would you

19 respond in the same way?

20 A Yes.

21 Q And would you please give us a brief summary of your

22 prefiled testimony?

23 A Basically what we try to convey to the Commission is

24 implementing LNP as we understand it today is very

25 costly and unfair to the ILEC. There are a lot of

1 issues that haven't been resolved by the FCC relating

2 to the transport of the traffic and the calling scope,

3 the routing and rating of the calls, and if we were

4 forced to implement it and deal with all of those

5 costs, it would put us at an unfair economic -- or

6 competitive advantage -- disadvantage and it would be

7 very costly for our customers.

8 MS. POLLMAN ROGERS: I would offer

9 Venture Exhibits 1 and 2 into the record.

10 MR. COIT: No questions.

11 MS. POLLMAN ROGERS: I'm offering

12 into evidence. No objections?

13 MR. COIT: No objections. Excuse

14 me. I'm busy.

15 MR. SMITH: Venture 1 and Venture 2

16 are admitted.

17 MS. POLLMAN ROGERS: I would tender

18 the witness for cross-examination.

19 MR. COIT: No questions.

20 MR. SMITH: Mr. Wieczorek.

21 CROSS-EXAMINATION

22 BY MR. WIECZOREK:

23 Q Thank you, Mr. Smith, Commissioners. Mr. Houdek, does

24 Venture have any switches currently that are LNP

25 capable?

1 A I believe the switching system has some of the

2 capability but not all of it.

3 Q What do you mean by some of it, if you can tell me?

4 A You know, I'd rather have you ask John DeWitte. We

5 ordered it through him. It was the last switch we

6 bought, and I think maybe some of it came with a

7 package we bought but it's technically I'm not able to

8 answer.

9 Q Might have come with already the software installed?

10 A I don't think it was the software, but again, please

11 ask John.

12 Q All right. How many exchanges do you have?

13 A 26.

14 Q Now in looking through your testimony you list the

15 towns and having looked at your area before, you have a

16 very significant -- you don't have a contiguous company

17 service area; is that fair?

18 A Yes.

19 Q In fact, you have part of your service area up in the

20 northeast corner which is separated by well over 100

21 miles from your nearest -- your other service area.

22 Wouldn't you agree?

23 A Yeah.

24 Q In that northeast corner, how many exchanges do you

25 have up there?

1 A I don't know. If you know off the top, I'll probably  
 2 agree with you.  
 3 Q It's not in your testimony. Is there a reference -- at  
 4 least that you don't break it out. I see that you're  
 5 looking at an exhibit to your testimony. Would that  
 6 give you the information?  
 7 A About seven.  
 8 Q Okay. You have seven switches up there or exchanges?  
 9 A (Witness nods head)  
 10 Q Now you cite to some of Mr. DeWitte's cost testimony  
 11 and you were present I believe yesterday during some of  
 12 Mr. DeWitte's testimony; is that correct?  
 13 A Uh-huh.  
 14 Q Yes?  
 15 A Yes.  
 16 Q Thank you. During that testimony you understand that  
 17 his install cost takes five cell companies times the  
 18 number of exchanges you have times the cost to do what  
 19 he calls a POI, point of interconnect, to each of those  
 20 exchanges from each one of those companies; correct?  
 21 A I believe that's what he testified to.  
 22 Q Okay. And on page -- your direct, page 3, line 18, are  
 23 you there?  
 24 A Yes.  
 25 Q You list those five companies; correct?

1 A On my direct?  
 2 Q Yes. What I have as page 3 of the direct that's been  
 3 provided to me, line 18.  
 4 A I had Mr. DeWitte's too.  
 5 Q Well, it's catchy. Do you have any modifications to  
 6 Mr. DeWitte's testimony while you have it in front of  
 7 you.  
 8 A Okay.  
 9 Q Got it?  
 10 A Yes.  
 11 Q All right. And those five companies you list are  
 12 Verizon Wireless, Western Wireless, Sprint PCS, RCC,  
 13 and Nextel; correct?  
 14 A Correct.  
 15 Q Did you give those five companies to Mr. DeWitte to do  
 16 his calculations -- or identify those?  
 17 A I or my staff.  
 18 Q Okay. Now you understand that RCC doesn't even have a  
 19 license anywhere in your service area except for that  
 20 northeast corner; correct?  
 21 A Right. But I expect there would be another carrier  
 22 that will have a license in the rest of the service  
 23 area.  
 24 Q Well, you understand that Mr. DeWitte assumed RCC would  
 25 need a point of interconnect to every one of your

1 exchanges.  
 2 A RCC or another carrier. I'm not sure if he relied just  
 3 on RCC. You maybe could ask Mr. DeWitte that.  
 4 Q Do you know of any other carriers that have licensing  
 5 in your non -- in your area outside of the northeast  
 6 corner besides Verizon and Western Wireless?  
 7 A It's my understanding that Nextel and Sprint have  
 8 state-wide licenses and again there's another license  
 9 there. Somebody owns it.  
 10 Q You don't know who it is?  
 11 A No.  
 12 Q But you didn't identify that in your direct?  
 13 A No. Just five carriers.  
 14 Q Okay. You would agree with me as to RCC, there's no  
 15 reason for RCC to have a point of interconnection to  
 16 any of your exchanges outside the northeast corner?  
 17 A Unless he worked out a deal with the other carrier.  
 18 Q Well, you agree they don't have a license even over an  
 19 area covered by 19 of your exchanges?  
 20 MS. POLLMAN ROGERS: Object, this  
 21 has been asked and answered.  
 22 MR. SMITH: Overruled.  
 23 Q You agree RCC doesn't have a license to broadcast to  
 24 provide services over 19 of your exchanges.  
 25 A Okay.

1 Q You agree?  
 2 A Yes.  
 3 Q Do you have any knowledge that Sprint, Nextel, or this  
 4 other third-party cell company that you don't know who  
 5 it is are going to provide services within the next  
 6 five years over those 19 exchanges?  
 7 A I believe that they will.  
 8 Q Well, you believe they will. Do you have any knowledge  
 9 to base that on?  
 10 A These carriers have made statements that they plan to  
 11 offer service.  
 12 Q When?  
 13 A Soon, I guess. They didn't give me a precise date.  
 14 Q But you don't know whether soon to them is two years,  
 15 three years, or five years out?  
 16 A I don't know.  
 17 Q You would agree with me as to those 19 carriers there  
 18 would be no reason to install point of interconnects  
 19 until they actually provide service -- or excuse me, to  
 20 those three carriers over those 19 exchanges?  
 21 A No. But it's my understanding that once the surcharge  
 22 is established I will be unable to change it so we  
 23 wanted to take that into effect.  
 24 Q Yeah. So are you telling this Commission you're going  
 25 to when you set your surcharge set it so it includes

1 numbers of companies that might at some time provide  
 2 service in your area and you're going to pass that cost  
 3 on to your customer before you incur it?  
 4 A No. I didn't say that.  
 5 Q Okay.  
 6 A We wanted to establish what the costs would be.  
 7 Q Okay. So it doesn't establish a surcharge; correct?  
 8 A I can't establish a surcharge.  
 9 Q Well, the calculations provided by Mr. DeWitte as to  
 10 that per-line cost, you agree with me that would be  
 11 inappropriate to use that as a surcharge base for your  
 12 customers?  
 13 A No. I don't agree with you.  
 14 Q So if today you are ordered to provide LNP, it's your  
 15 testimony that you can use that to establish a  
 16 surcharge even though you don't have to incur that  
 17 expense and you have no idea when you're going to have  
 18 to incur that expense?  
 19 A I would testify I would charge whatever the Commission  
 20 deemed appropriate.  
 21 Q But you would request a surcharge including 57 extra  
 22 point of interconnects unnecessary at that time?  
 23 A Can you repeat the question.  
 24 Q You would request a surcharge including the cost of 57  
 25 interconnects not necessary at that time?

1 A That's correct.  
 2 Q You have not had five carriers?  
 3 A We have not had five bona fide requests.  
 4 Q Of the bona fide requests you've had one from Western;  
 5 correct?  
 6 A Yes.  
 7 Q You've had one from Verizon; correct?  
 8 A Correct.  
 9 Q You've had one from RCC; correct?  
 10 A Correct.  
 11 Q And RCC only covers the northeast corner, those seven  
 12 switches; correct?  
 13 A I think that's correct.  
 14 Q So if you had to provide LNP for the three companies  
 15 that have actually filed bona fide requests for  
 16 service, you would not have to provide 57 of the POIs  
 17 that Mr. DeWitte has taken into consideration in his  
 18 cost analysis under his plan?  
 19 A I don't know if 57 is the right number, but it would be  
 20 less than the total.  
 21 Q Well, you said there was 19 exchanges outside that  
 22 northeast corner. Can you take that times three?  
 23 A I'd just as soon not. You can do the math.  
 24 MR. WIECZOREK: Well, Commissioner  
 25 Hanson has been correcting my math, but I assume

1 A What I would ask for is a surcharge that covers my  
 2 costs and if they change, the ability to change the  
 3 surcharge.  
 4 Q I'm just trying to get clear on the record the numbers  
 5 that you've had Mr. DeWitte create do not accurately  
 6 reflect what currently exists in those 19 exchanges  
 7 today?  
 8 MS. POLLMAN ROGERS: I'm going to  
 9 object to that question. The question was that  
 10 Mr. Houdek had Mr. DeWitte create. I don't believe  
 11 that that's an accurate statement of what happened  
 12 and I object to the question and the form of it.  
 13 MR. SMITH: Can you rephrase the  
 14 question, Mr. Wiczorek?  
 15 MR. WIECZOREK: I'm not sure this is  
 16 rephrasing but I'll restate.  
 17 Q Do you agree the numbers that Mr. DeWitte created do  
 18 not reflect the actual factual situation that exists  
 19 over those 19 exchanges today?  
 20 A And I don't want to belabor this either, but when you  
 21 say factual, if five carriers request LNP, then I think  
 22 these accurately reflect the costs that we would incur.  
 23 Is that what you're asking?  
 24 Q Well, you haven't had five carriers request LNP, have  
 25 you?

1 it's 57.  
 2 Q And that install cost, I believe Mr. DeWitte set that  
 3 install cost at \$4,000 per POI. Do you recall that?  
 4 A I remember hearing that, yes.  
 5 Q Okay. I can try the math again or you can do it.  
 6 A Just as soon not.  
 7 Q Okay. So it would be \$4,000 times 57 that his numbers  
 8 clearly overstate the current situation you're in;  
 9 correct?  
 10 A Assuming that we have no more requests for LNP.  
 11 Q I'm trying to do the math, but I'll just rest on 4  
 12 times 57.  
 13 A Thank you.  
 14 Q Now you also heard Mr. DeWitte testify that he doesn't  
 15 think the type 1 number issues caused any problems in  
 16 South Dakota. Do you remember hearing him say that?  
 17 A I don't, but I don't have any reason to doubt you.  
 18 Q Okay. I believe it was his term in his prefile  
 19 testimony is it hasn't hampered consumers in  
 20 South Dakota.  
 21 You know for a fact there's been problems  
 22 with porting wireless-to-wireless numbers because of  
 23 the type 1 issue, don't you?  
 24 A I believe it was a type 1 issue.  
 25 Q Yeah. Your Gettysburg exchange has had problems

1 porting wireless-to-wireless ports because of the type  
 2 1 issue, hasn't it?  
 3 A We've had problems. I don't know if I can attribute it  
 4 to the type 1 but yes, we've had problems.  
 5 Q Are you familiar with the FCC's Century Tel decision?  
 6 MS. POLLMAN ROGERS: I object to  
 7 that question. It's an inaccurate statement of  
 8 what that is. That is not an FCC decision.  
 9 MR. WIECZOREK: All right.  
 10 Q I'll ask you, are you familiar with the Century Tel  
 11 decision?  
 12 MS. POLLMAN ROGERS: I still object.  
 13 It's not a decision. It's not a final decision.  
 14 A The NAL?  
 15 Q Yes.  
 16 A Vaguely.  
 17 Q Have you reviewed that decision?  
 18 A You know, I read part of it, but I wouldn't say I'm an  
 19 expert on it.  
 20 Q Okay. Have you reviewed that in the context of this  
 21 type 1 problem -- or this porting problem? I  
 22 understand you weren't sure it was a type 1 problem.  
 23 A No, I guess.  
 24 Q Now how long have you been in the telecommunications  
 25 business?

1 A I personally didn't contact Western Wireless.  
 2 Q And nobody from your company did, to your knowledge?  
 3 A I think Rich Coit had conversations with people from  
 4 Western Wireless.  
 5 Q I can't call Mr. Coit in this proceeding but I'm  
 6 asking, he's not with your company; correct?  
 7 A No.  
 8 Q Okay. So Mr. Coit or SDTA might have had some contact.  
 9 A Correct.  
 10 Q Okay. But you in your investigation, your complete  
 11 investigation on the costs, you never had a contact  
 12 with Western Wireless, did you, or your company?  
 13 A I don't believe so.  
 14 Q And besides the cost analysis done by Mr. DeWitte,  
 15 you're not presenting any other cost options to this  
 16 Commission for LNP routing, are you?  
 17 A No.  
 18 Q And, in fact, you didn't investigate any other routing  
 19 options?  
 20 A I don't know if investigate is the right word. We've  
 21 talked about other routing options.  
 22 Q Have you cost out any other routing options?  
 23 A I don't know what you mean by cost out. We looked at  
 24 the rules as we understood them, and determined that  
 25 these were going to be our costs.

1 A About 18 years.  
 2 Q So you were in the telecommunications business when the  
 3 number portability -- when it became clear that number  
 4 portability was going to be required someday in 1996?  
 5 Well, in 1996 portability became an issue. Would you  
 6 agree?  
 7 A Yeah. That was part of the Telecom Act.  
 8 Q All right. And then between 1996 and the February --  
 9 excuse me, November 10 of 2003, did Venture do anything  
 10 to investigate the feasibility or best cost way to  
 11 provide LNP?  
 12 A Yeah. We've had numerous meetings and discussions  
 13 regarding LNP.  
 14 Q Before the November 10, 2003 decision?  
 15 A Oh, I know it was discussed.  
 16 Q Okay. Your rebuttal testimony at page 1, line 11 talks  
 17 about how you took months after the November 10, 2003  
 18 date to investigate the cost and processes involved  
 19 with LNP. That's your rebuttal testimony, page 1, line  
 20 15, not Mr. DeWitte's. Okay. Do you see that?  
 21 A Yep.  
 22 Q Now in investigating those costs you would agree with  
 23 me that your investigation did not include contacting  
 24 Western Wireless at any time to discuss possible  
 25 routing alternatives?

1 Q You understand that under the federal law you're  
 2 allowed to recover costs incurred in implementing line  
 3 number portability; right? You can do an end-user  
 4 surcharge to recover your costs for deployment of LNP;  
 5 correct?  
 6 A For some of them.  
 7 Q Are there some costs you're claiming are not  
 8 recoverable?  
 9 A It was my understanding that some of the recurring  
 10 costs were not recoverable.  
 11 Q Do you know which ones?  
 12 A No.  
 13 Q You said something to the effect in your opening --  
 14 excuse me, your summary about there being an unfair  
 15 competitive advantage of LNP. Do you understand that  
 16 if you become LNP compliant that people -- cell phone  
 17 users will be able to port their numbers back to you  
 18 too?  
 19 A I didn't think that the FCC allowed for  
 20 wireless-to-wireline porting yet.  
 21 Q You're not presenting to this Commission any  
 22 demographic information on the income or average income  
 23 of the customers in your areas, are you?  
 24 A I don't believe that was part of my testimony.  
 25 Q Okay. And while I'm thinking about this, you're not

1 claiming that LNP is technically infeasible, are you?  
 2 A Technically, no.  
 3 Q You collect high-cost support through USAC; right?  
 4 A Yes.  
 5 Q And you, in fact, collect high-cost -- you collect  
 6 switching support too.  
 7 A Okay.  
 8 Q You don't know?  
 9 A Yes, we do.  
 10 Q Okay. And you submit to USAC on an annual basis your  
 11 cost investments and your switches; correct?  
 12 A After the fact.  
 13 Q Right. And they build that into their cost analysis  
 14 for your support.  
 15 A Repeat that.  
 16 Q They build your costs into their analysis in  
 17 calculating your support; correct?  
 18 A USAC does, yes.  
 19 Q And it would be your plan to submit to USAC your costs  
 20 associated with upgrades to LNP.  
 21 A To the extent I can. I don't know if all of them are  
 22 eligible.  
 23 Q Last year how much did you collect in local switching  
 24 support from USAC?  
 25 MS. POLLMAN ROGERS: I'm going to

1 object to that as not relevant to this proceeding  
 2 and it's also way beyond the scope of his  
 3 evidence -- or direct submitted in this Docket.  
 4 MR. SMITH: Overruled.  
 5 A I don't have that information available.  
 6 Q Is it over 600,000?  
 7 MS. POLLMAN ROGERS: Asked and  
 8 answered. He just said he didn't have it  
 9 available. I object.  
 10 MR. SMITH: Overruled.  
 11 A I don't know. I mean, I don't have the information.  
 12 Q You have no idea what range you're collecting?  
 13 MS. POLLMAN ROGERS: Same objection.  
 14 He's answered it. It's argumentative.  
 15 MR. SMITH: Overruled. Randy, if  
 16 you can, answer.  
 17 A What's the question?  
 18 Q Do you know what you collect annually -- I just want a  
 19 range, an estimate -- in local switch support,  
 20 switching support?  
 21 A I honestly don't want to say. I've got a total number  
 22 of universal service.  
 23 Q Why don't you just give me the total number then.  
 24 A Between 2 and \$3 million.  
 25 Q All right. You talk about deployment of broadband in

1 your testimony, that if you had to actually pay out  
 2 money to do LNP that might delay your broadband  
 3 deployment?  
 4 A Yes.  
 5 Q It's your intent to charge for anybody, any of your  
 6 customers who use broadband; correct?  
 7 A Am I going to charge my customers who use broadband?  
 8 Q Yeah.  
 9 A Yes.  
 10 Q You reviewed Mr. Williams' testimony in this case;  
 11 correct?  
 12 A Very briefly. No, I wouldn't say I've read the whole  
 13 thing.  
 14 Q Well, you respond to his testimony and you actually  
 15 call some of his testimony -- you said it was submitted  
 16 in bad faith.  
 17 A Right.  
 18 Q Did you review his testimony as to what his proposals  
 19 were for routing calls to LNP and how it would save you  
 20 hundreds of thousands of dollars if you routed it that  
 21 way?  
 22 A Are you referring to this --  
 23 Q That routing plan.  
 24 A -- Etcha Sketch? Yes. I'm vaguely familiar with it.  
 25 Q You would agree with me that if you had to install LNP,

1 you would prefer to save that \$625,000 that Mr. DeWitte  
 2 has projected in install costs, correct, and install it  
 3 some cheaper way?  
 4 A No. I don't think I would -- I'm not quite sure what  
 5 you're asking, but, no, I wouldn't agree it would be  
 6 better to do it the way Mr. Williams has described.  
 7 Q But you've not investigated that way at all anyway,  
 8 have you?  
 9 A Had discussions regarding it.  
 10 Q But you decided not to pursue it?  
 11 A To do it that way wouldn't cover our costs.  
 12 Q So because that way wouldn't cover your cost, you go  
 13 with the way Mr. DeWitte proposes, which entails -- and  
 14 I believe you've been looking at Mr. DeWitte's  
 15 testimony so it's attached to his rebuttal if you want  
 16 to refresh your memory, but his rebuttal 3A entails  
 17 \$625,000 in install costs. Do you remember that?  
 18 A I believe it's in here.  
 19 Q Okay. And a monthly recurring cost for transport alone  
 20 of \$220,000.  
 21 A Which page are you on?  
 22 Q I'm on his rebuttal testimony, 3A. That's his direct.  
 23 MS. POLLMAN ROGERS: What was your  
 24 question, Mr. Wiecezorek?  
 25 Q I asked him to look at 3A. Here's a copy of 3A. I'll

1 just do it this way, to Mr. DeWitte's rebuttal  
 2 testimony. And he had asked -- or he had made the  
 3 statement that under Western Wireless's approach they  
 4 would lose some money or they couldn't recover all of  
 5 their costs. So the questions I'm asking revolve  
 6 around the fact that under the plan that they're  
 7 presenting to the Commission here, they are looking at  
 8 install costs of \$625,000.  
 9 Now if the install costs under Mr. Williams'  
 10 proposal was only \$10,000, you would only spend \$10,000  
 11 for install costs and you would much prefer to only do  
 12 that rather than spend 625,000, wouldn't you?  
 13 A That's probably a question better asked of Mr. DeWitte.  
 14 Q Well, you're the general manager, and you're the one  
 15 who makes decisions on how to spend money for your  
 16 company; correct?  
 17 A I'm one of the people that makes the decisions.  
 18 Q Okay. Well, as the general manager who prides himself  
 19 on being efficient and cost-effective, you would agree  
 20 that you'd much prefer to spend \$10,000 to complete  
 21 something than 625,000, wouldn't you?  
 22 A Not if that meant I was to configure my network in a  
 23 way that would force me to carry my competitor's  
 24 traffic for free and not recover my costs and mess up  
 25 my whole revenue stream. I guess the answer would be

1 no.  
 2 Q Okay. So carry your competitor's traffic for free, if  
 3 you were carrying your competitor's traffic for free,  
 4 how much do you think that would cost a month?  
 5 A I would have no idea.  
 6 Q What's a minute of traffic? I think we talked about a  
 7 dime clearly for a minute of traffic would cover any  
 8 traffic you'd carry for free. Wouldn't you agree?  
 9 A Restate your question.  
 10 Q A dime of cost per minute for this traffic you'd carry  
 11 for free is a high enough number it would cover any  
 12 traffic costs, wouldn't you agree?  
 13 A Actually, no, my costs are higher than that. That  
 14 might be approaching the LECA average but I'm a higher  
 15 cost company than that.  
 16 Q Okay. What's your cost?  
 17 A More than that, 18, 20 cents.  
 18 Q Okay. Let's say 20 cents because even easier to do my  
 19 math. At 20 cents for monthly recurring cost under  
 20 your plan, you're going to spend \$220,000 a month under  
 21 the way you've designed LNP. Do you see that under  
 22 Mr. DeWitte's testimony?  
 23 A I see that number.  
 24 Q So if you assume your cost is 20 cents, you would have  
 25 to carry for free over 1.1 million minutes of free

1 traffic before you'd even reach the cost of your  
 2 proposal, wouldn't you agree?  
 3 A I'm not going to do the math. I guess if you've done  
 4 it, then I have no reason to doubt it. Of course, when  
 5 you start carrying all of those extra minutes, if I can  
 6 elaborate, that's going to reduce your access, it's  
 7 going to reduce your toll, it's going to change the  
 8 ratios of local calling.  
 9 Q So you'd much rather spend the \$220,000 a month;  
 10 correct?  
 11 A I would rather do it in a way that protects the  
 12 integrity of your company.  
 13 Q You're willing to spend \$2.5 million just in monthly  
 14 recurring costs alone in the first year to protect the  
 15 integrity of your company?  
 16 A It seems kind of foolish to spend that kind of money on  
 17 something like LNP when it's -- when there's so little  
 18 demand for the LNP.  
 19 Q You're right. I agree, your numbers are foolish.  
 20 MS. POLLMAN ROGERS: I object to  
 21 that, ask that it be stricken. That's a  
 22 misstatement of what the witness said.  
 23 MR. SMITH: Sustained.  
 24 MR. WIECZOREK: That's all I have  
 25 for this witness.

1 MR. SMITH: Thank you. Mr. Gerdes.  
 2 CROSS-EXAMINATION  
 3 BY MR. GERDES:  
 4 Q Good morning, Mr. Houdek.  
 5 A Good morning.  
 6 Q Again. We've seen each other before in this forum, I  
 7 think.  
 8 A Yes. I'm afraid of that.  
 9 Q On page 2 of your prefiled testimony, your direct  
 10 prefiled testimony you list your EAS arrangements?  
 11 A Yes.  
 12 Q I'd just like to ask you a couple of hypothetical  
 13 questions about those arrangements. Do you have any  
 14 plans to go into the Huron market as a CLEC?  
 15 A No.  
 16 Q If you did go into the Huron market you would expect,  
 17 of course, to make arrangements with Qwest for LNP  
 18 between your company and Qwest; correct?  
 19 A You know, we haven't even considered that.  
 20 Q Okay. So you don't know what you would expect?  
 21 A Right.  
 22 MR. GERDES: All right. No further  
 23 questions.  
 24 MR. SMITH: Ms. Wiest.  
 25 MS. WIEST: Thank you.

CROSS-EXAMINATION

1  
2 BY MS. WIEST:  
3 **Q** Mr. Houdek, you have 26 exchanges; is that correct?  
4 **A** Roughly. We serve a number of towns that occasionally  
5 I miscount.  
6 **Q** I think if you look at page 1 of your direct, I believe  
7 that's 26 exchanges when you count those up.  
8 **A** Okay. I can make that correction.  
9 **Q** No. I'm not saying anything was incorrect.  
10 **A** Okay.  
11 **Q** This is just leading me to my next question. Are you  
12 aware that your witness, Mr. DeWitte, used 25  
13 exchanges?  
14 **A** No.  
15 **Q** And I'm just trying to clarify this because I think for  
16 the record, do you think that could be because Lebanon  
17 is part of Gettysburg?  
18 **A** That's probably it.  
19 **Q** Okay. And what is your current local rate?  
20 **A** We've got a number of them. I've supplied those to the  
21 staff.  
22 **Q** Can you give me a range?  
23 **A** Residential from 11.50 to 15.75, combined business  
24 residence from 13.50 to 16.70, and business from 18.50  
25 to 29.65.

1 **Q** Thank you. Just to clarify something Mr. Wiczorek was  
2 asking you about, is it correct to say that Verizon and  
3 Western Wireless, do they serve your entire area or  
4 not?  
5 **A** You know, I think they do. I notice my phone goes on  
6 roam a lot in the northeast when I'm on Verizon but it  
7 all comes on the same bill.  
8 **Q** It's just RCC that serves part of the currently serving  
9 carriers?  
10 **A** I think that's right.  
11 **Q** To your knowledge, Sprint and Nextel do not provide any  
12 service?  
13 **A** To my knowledge.  
14 **Q** To your knowledge. Okay. After your corrections that  
15 you made, I believe, on page 1 of your direct would it  
16 be accurate to say that you currently have four then  
17 type 2-B connections?  
18 **A** You know, it might be. I guess I haven't thought about  
19 that since I made my corrections.  
20 **Q** On line 18 you talk about VCC as one type 2-B with  
21 Western Wireless and you change that to three type 2-B  
22 with Verizon?  
23 **A** Okay.  
24 **Q** You're not sure if that's all of them or not?  
25 **A** I don't think it's more than four.

1 **Q** Okay. And then when you go on and you talk about the  
2 fact that -- let's see, looking on line 21, you say --  
3 beginning at line 20 that you provide blocks of  
4 numbers, that the carriers are evaluating and replacing  
5 the type 1 connections.  
6 Do you know how many type 1 connections  
7 you're talking about?  
8 **A** I don't.  
9 **Q** Can you explain why the carriers are evaluating and  
10 replacing those?  
11 **A** That's been my understanding in conversations with our  
12 consultants.  
13 **Q** And how many BFRs did you receive?  
14 **A** I believe, three. I think they're all an actual BFR  
15 but there was some question on some of them earlier.  
16 But I think, three.  
17 **Q** Did you respond to any of those?  
18 **A** By respond? I didn't --  
19 **Q** Did you respond in writing to any of those BFRs?  
20 **A** I think we acknowledged receipt of the letter.  
21 **Q** Okay.  
22 **A** I guess I'm --  
23 **Q** And you're familiar with Mr. DeWitte's costs and his  
24 methods for transport; correct, what he used for your  
25 company?

1 **A** Yes. Staff worked with Mr. DeWitte more than I did.  
2 **Q** Okay. If the Commission were to order LNP and your  
3 company was responsible for a transport, do you believe  
4 at that point that you would then explore more  
5 efficient and less costly options?  
6 **A** You know, we'd do it again in the most efficient way  
7 that we could that would cover our costs.  
8 **Q** That would cover your costs. And going to your  
9 rebuttal page 2, line 4.  
10 **A** Okay.  
11 **Q** Starting with "Pursuant to that agreement Venture did  
12 not agree to route traffic destined for Western  
13 Wireless to the serving tandem," you're talking about  
14 the Qwest serving tandem; is that correct?  
15 **A** Yes.  
16 **Q** Is there any reason why you could not agree to do that?  
17 **A** I think we have contractual arrangements that prevents  
18 us from doing that but I'd like to review that and get  
19 back to you, if I could. I don't have --  
20 **Q** Contractual arrangements with whom?  
21 **A** SDN and possibly Qwest.  
22 **Q** That would prevent you from connecting with them?  
23 **A** No. We connect with Qwest, but the delivery of our  
24 traffic -- some of our traffic is committed to SDN I  
25 guess is --

1 Q But LNP traffic wouldn't be committed to SDN, would it?

2 A Let me reread this.

3 Q Okay.

4 (Witness examines document)

5 A Okay. What's your question?

6 Q My question is, you stated that Venture did not agree

7 to route traffic destined for Western Wireless to the

8 serving tandem. So my question is, why could you not

9 agree to that?

10 A Our Interconnection Agreement with Western Wireless

11 prevents that. We deliver local calls to the local

12 calling area. Everything else is a toll call.

13 Q Are you aware the FCC states LNP does not require

14 Interconnection Agreements?

15 A Vaguely, yes.

16 Q So LNP traffic wouldn't necessarily have to be subject

17 to an Interconnection Agreement, would it?

18 A Maybe not but a toll call is still a toll call. I

19 mean, if it's not a local call, it has to go to an IXC.

20 MS. WIEST: I have nothing further.

21 Thank you.

22 MR. SMITH: Did the Commissioners

23 have questions?

24 CHAIRMAN SAHR: Yes, I do.

25 MR. SMITH: Chairman Sahr.

1 CHAIRMAN SAHR: Good morning.

2 THE WITNESS: Good morning.

3 CHAIRMAN SAHR: One of the issues

4 that came up during your testimony was the question

5 of which carriers are serving what part of

6 South Dakota on the wireless side of things, and I

7 think it may be something you can't answer but we

8 might hear from another witness, but my

9 understanding is that RCC and Verizon use the --

10 they're using the same spectrum that the B side of

11 the cell phone spectrum and so RCC would have the

12 licenses in the northeast corner of the state,

13 Verizon would have the licenses in most of the rest

14 of the state, although CommNet has some licenses

15 out there as well on the B side of things. And

16 more than likely if you can use your Verizon phone

17 in the RCC area, it's probably because they have an

18 agreement with RCC, I would imagine.

19 THE WITNESS: I suspect you're

20 right.

21 CHAIRMAN SAHR: So when we talk

22 about the number of providers in one area, I would

23 think that RCC and Verizon for the purposes of what

24 we're discussing today would be mutually exclusive

25 because they don't have overlapping licenses in

1 those markets.

2 THE WITNESS: Okay.

3 CHAIRMAN SAHR: Do you have any idea

4 if that's an accurate statement?

5 THE WITNESS: No.

6 CHAIRMAN SAHR: Mr. DeWitte will.

7 But that's certainly my understanding of it, and I

8 don't profess that I would be 100 percent accurate

9 on that.

10 One of the issues that's come up with the

11 tandem routing options that has been outlined by

12 Mr. Williams is phantom traffic; is that right, or

13 the potential for phantom traffic under that

14 option? Or excuse me, that's one of the things

15 that you've outlined as a potential problem with

16 using that type of option.

17 THE WITNESS: That's probably a

18 question better answered by Mr. DeWitte.

19 CHAIRMAN SAHR: Thank you. One of

20 the things that has been discussed is a possibility

21 of trying to form some type of working group to

22 look at these issues and more cost-effective ways

23 of implementing LNP. Is that something that you

24 would be interested in participating in?

25 THE WITNESS: I think it's a great

1 idea.

2 CHAIRMAN SAHR: What would you think

3 would be the time frame assuming we can get the

4 right people to the table and get appropriate

5 consultants hired and so on and so forth for

6 analyzing some of the possible options?

7 THE WITNESS: I know that

8 Mr. DeWitte said 18 months to two years, and I hope

9 that's long. I'd like to see it less than that.

10 But just negotiating an Interconnection Agreement

11 took months and months, and in getting all of the

12 parties to agree would be very difficult.

13 You know, if they're very motivated I would

14 think we could have some work done in a six-month

15 time frame. Whether or not it was completed and

16 agreed to by everybody in that time, I'm doubtful.

17 CHAIRMAN SAHR: And I'd have to

18 check with our attorneys on whether or not a

19 complete agreement would be necessary or if our

20 Commission Order could take care of the issue if

21 there seems to be a reasonable alternative that's

22 acceptable to the Commission.

23 One of the other issues that certainly we're

24 focusing on, it's what we are legally charged to

25 look at is we're to determine whether or not

395

1 there's a need to avoid a significant adverse  
 2 economic impact on users of telecommunications  
 3 services generally or to avoid imposing a  
 4 requirement that is unduly economically burdensome.  
 5 And certainly Mr. DeWitte has supplied  
 6 information that certainly that you would propose  
 7 be used to support those propositions. The  
 8 question I would have is at what point in time,  
 9 whether the cost is borne by you as the provider or  
 10 as a pass-through to the consumer, at what point in  
 11 time do you think we're at -- or what dollar amount  
 12 are we at where it's no longer a significant  
 13 adverse economic impact or unduly economically  
 14 burdensome?  
 15 THE WITNESS: I think that's going  
 16 to vary based on the consumer. Some of our lower  
 17 income or elderly people that don't have a cell  
 18 phone, don't ever care to have a cell phone,  
 19 certainly don't care to port numbers. You know,  
 20 you put 25 cents on their bill, that's too much.  
 21 Maybe some of our big, wealthier customers or  
 22 businesses, you could throw another dollar or two  
 23 on there and they might not even raise their  
 24 eyebrows. But again, it's going to vary for  
 25 everybody.

396

1 CHAIRMAN SAHR: Have you discussed  
 2 whether or not you intend to pass through or eat  
 3 all or part of the costs as the provider and, you  
 4 know, recognizing that you serve your members so to  
 5 a certain extent there's some similarities it just  
 6 depends on which pot it comes out of, but have you  
 7 discussed what your plans would be as far as if you  
 8 were required to have LNP capabilities?  
 9 THE WITNESS: We've had discussions  
 10 and, you know, there's concerns if you throw too  
 11 big of a charge on a bill, you're begging the  
 12 customer to drop your service. And obviously that  
 13 long-term impact on that, on your company in that  
 14 regard is suicide. But, again, we're co-opped so  
 15 if we don't cover our costs, we reduce our margins  
 16 and, you know, we could go out of business that way  
 17 as well.  
 18 CHAIRMAN SAHR: And there are what  
 19 have been broken down into monthly recurring and  
 20 nonrecurring costs, and have you discussed how to  
 21 handle those with a nonrecurring cost? Would that  
 22 be a one-time charge, here's your \$36 charge on  
 23 your bill and next month you wouldn't have any  
 24 charge or have you talked about how to break that  
 25 out over time?

397

1 THE WITNESS: No. We're taking it  
 2 one day at a time.  
 3 CHAIRMAN SAHR: Because as a whole,  
 4 you know, certainly on one person's bill for a  
 5 particular month the entire cost would obviously  
 6 close to triple the amount of their normal monthly  
 7 service; correct?  
 8 THE WITNESS: Exactly. We've got  
 9 faith that the rules will address the transport  
 10 costs. The FCC, when they issued the Order, they  
 11 realized the different characteristics of rural  
 12 phone companies and said they were going to address  
 13 the transport costs and the calling scope issues  
 14 and routing and rating and they haven't.  
 15 I've got faith that somebody's going to  
 16 recognize that.  
 17 CHAIRMAN SAHR: And this again may  
 18 be a question better served for Mr. DeWitte, but is  
 19 there anything that in any of your particular  
 20 changes would make it easier for you to implement  
 21 LNP or harder if we're going to look at to have an  
 22 exchange-by-exchange analysis?  
 23 And I think Mr. Wiczorek might have asked you  
 24 a question about this. Some of them have updated  
 25 switches to the point where it would be less

398

1 burdensome than it would be, for instance, in  
 2 another exchange?  
 3 THE WITNESS: Again, this is a  
 4 better question for Mr. DeWitte because he spec'd  
 5 the switch when we ordered it, but I think Sisseton  
 6 has more capabilities than the other towns. But,  
 7 again, it's not ready to be LNP compatible.  
 8 COMMISSIONER BURG: Just a couple I  
 9 have. Did I hear you right, did you say once you  
 10 establish a surcharge you cannot change it?  
 11 THE WITNESS: That's my  
 12 understanding.  
 13 COMMISSIONER BURG: So what you're  
 14 having to do here is anticipate what your maximum  
 15 cost would be, establish that surcharge even if it  
 16 were greater than what the current charge would be  
 17 because you're not going to be able to adjust it?  
 18 THE WITNESS: That's my  
 19 understanding is I don't know if that's something  
 20 you folks or the FCC has to determine.  
 21 COMMISSIONER BURG: And I'm sure  
 22 it's going to be hard to vary a surcharge up and  
 23 down on a constant basis. By the way the questions  
 24 have been asked from numerous witnesses, I've heard  
 25 that the Western Wireless feels there's a huge

1 benefit to LNP.  
 2 What benefit do you see to your customers of  
 3 LNP?  
 4 THE WITNESS: Well, none, because as  
 5 I understand it, you can't port from a wireless to  
 6 a wireline, which is inherently unfair. I suspect  
 7 that the customers, you know, if they studied the  
 8 calling plans on some of the wireless carriers  
 9 could figure out a way to bypass the toll and  
 10 access network, which would be good for the  
 11 customer short-term but would be bad for our  
 12 company long-term.  
 13 COMMISSIONER BURG: What percent of  
 14 your customers do you think would desire to port  
 15 their wireline number?  
 16 THE WITNESS: Less than 1 percent.  
 17 I haven't done a survey.  
 18 COMMISSIONER BURG: What's the  
 19 nature of the customers of your companies? Do they  
 20 give up their wireline for wireless?  
 21 THE WITNESS: I don't believe so.  
 22 There's probably been a few that have substituted  
 23 service, but I would guess most people are like me  
 24 and, you know, it's more of a complimentary product  
 25 than a substitution.

1 COMMISSIONER BURG: So most of them  
 2 have both wireline and wireless that have a  
 3 wireless phone?  
 4 THE WITNESS: That's what I believe.  
 5 COMMISSIONER BURG: And to get that  
 6 wireless they would not port their number that they  
 7 currently have for the wireline?  
 8 THE WITNESS: That's what I believe.  
 9 COMMISSIONER BURG: So you don't  
 10 really see much opportunity for the service in your  
 11 territory. Is that what I'm hearing you say?  
 12 THE WITNESS: Right. The only way I  
 13 would think that might happen is, again, we end up  
 14 putting so many surcharges and costs on our bill  
 15 that the customer has to choose.  
 16 COMMISSIONER BURG: Well, then if  
 17 you end up -- and this is a follow-up on  
 18 Commissioner Sahr's. If you end up losing a  
 19 customer because a surcharge is too high, that  
 20 would in turn make the charge for the remaining  
 21 ones go even higher.  
 22 THE WITNESS: Exactly.  
 23 COMMISSIONER BURG: It's sort of a  
 24 snowballing effect.  
 25 THE WITNESS: Death spiral.

1 COMMISSIONER BURG: Thanks.  
 2 CHAIRMAN SAHR: I have somewhat of a  
 3 follow-up question to Commissioner Burg's line of  
 4 questioning. And the question of which way people  
 5 will port, wouldn't you anticipate, though, that  
 6 there might be a lot of consumers interested in  
 7 switching between or among wireless companies?  
 8 THE WITNESS: Yeah. That wouldn't  
 9 surprise me.  
 10 CHAIRMAN SAHR: And maybe you're not  
 11 the witness to ask this question of, but right now  
 12 is there that ability to port your number from a  
 13 wireless-to-wireless company?  
 14 THE WITNESS: We've investigated  
 15 ways to accommodate, you know, on a short-term  
 16 basis to keep calls from getting dropped and we  
 17 have not yet found a good solution.  
 18 CHAIRMAN SAHR: Do you know with any  
 19 of these estimates was there any consideration of  
 20 that type of analysis or was it not included?  
 21 THE WITNESS: Say that again.  
 22 CHAIRMAN SAHR: With the cost  
 23 estimates do you know what the -- and I may ask  
 24 this question of Mr. DeWitte and I think actually I  
 25 will save that for him.

1 THE WITNESS: All right.  
 2 CHAIRMAN SAHR: Because it will give  
 3 me a chance to better phrase my question and I  
 4 would imagine you're going to defer to him on it.  
 5 So I'll save that question for Mr. DeWitte's return  
 6 to the stand.  
 7 COMMISSIONER BURG: The suspense is  
 8 killing me.  
 9 MR. SMITH: Commissioner Hanson.  
 10 VICE CHAIR HANSON: Mr. Houdek, on  
 11 your testimony, your rebuttal testimony, and I'm  
 12 not going to ask you to regurgitate it, I'm just  
 13 going to refer to page 1 of your comments from  
 14 lines 12 through 21, and if I could paraphrase and  
 15 perhaps quote a portion of that, you were  
 16 responding to statements that Mr. Williams had made  
 17 in his testimony and you were stating that once the  
 18 FCC made it clear that you were going to be  
 19 required to port numbers, that Venture took  
 20 immediate steps to investigate the cost and the  
 21 processes involved with LNP, and you went on to  
 22 state at the end that the information that you  
 23 wanted to present to the Commission would be  
 24 adopted by cost information as complete as  
 25 possible.

1 What I'm most interested in there is Venture  
2 took immediate steps to investigate the cost and  
3 processes involved with LNP. Are you referring to  
4 your hiring of Mr. DeWitte at that juncture?

5 THE WITNESS: Well, maybe  
6 indirectly. If memory serves, as soon as the Order  
7 came out it turned out that there was an industry  
8 meeting in Sioux Falls on a different topic and we  
9 immediately tried to schedule an industry meeting  
10 to talk about LNP and some of the issues that were  
11 faced there and I think both Mr. DeWitte and  
12 Mr. Thompson were there. So, yeah, it's within a  
13 week of the Order. So pretty immediate.

14 VICE CHAIR HANSON: When you took  
15 those immediate steps to examine as best you could  
16 all the financial information, the costs to  
17 Venture, what sort of instructions did you give to  
18 Mr. DeWitte? Did you say -- and I'll tell you  
19 openly what I'm concerned with here is obviously a  
20 lot of folks went together and hired Mr. DeWitte to  
21 provide information. All of that information is  
22 geared along the same line for providing for LNP.

23 You didn't go off and explore other avenues of  
24 are there less expensive ways to do this, are there  
25 more efficient ways to do this, of all of these

1 options are available.

2 THE WITNESS: Suspension would be a  
3 good option.

4 VICE CHAIR HANSON: All right.  
5 Well, if I was in your chair, if I was in a  
6 manager's chair, again, and someone dictated to me  
7 that I had to -- and certainly I was in that chair  
8 a number of times where other bureaucracies were  
9 telling me you're going to do this and there's a  
10 strong urge to fight it, there's a strong urge to  
11 say what else can we do.

12 However, when you know you've got to  
13 accomplish something, you start looking at all of  
14 those other things.

15 THE WITNESS: That's correct.

16 VICE CHAIR HANSON: Are you  
17 confident that this is your best option?

18 THE WITNESS: If we were forced to  
19 implement -- and again, like I mentioned to  
20 Mr. Sahr, I do think that someone's going to  
21 address the transport and rating and routing issues  
22 and then in my opinion the LNP burden becomes much  
23 less.

24 Right now I don't think that this whole --  
25 this whole process is so much about LNP and porting

1 areas, what is my best option. And certainly that  
2 concerns me.

3 THE WITNESS: I and staff have  
4 talked to managers and staff at other phone  
5 companies that used other consultants and, you  
6 know, tried to best evaluate, you know, how is your  
7 consultant looking at this? Are they considering  
8 this cost or this process. So, you know, maybe in  
9 a less formal way we did evaluate other options. I  
10 don't know if that answers your question.

11 VICE CHAIR HANSON: Well, as a  
12 manager you certainly don't want to place on the  
13 shoulders of your customers the most expensive  
14 option.

15 THE WITNESS: No.

16 VICE CHAIR HANSON: Unless it's the  
17 only option.

18 THE WITNESS: Correct.

19 VICE CHAIR HANSON: And certainly  
20 you want to look for efficiency. You want to look  
21 for quality of service, things of that nature.

22 THE WITNESS: Yes.

23 VICE CHAIR HANSON: And if you only  
24 have one option and it's a very expensive option,  
25 then you're going to be looking at what other

1 of numbers. I think it's a scheme or a game to  
2 get -- get to virtual NXX, have us carry traffic  
3 for free, and I think those are going to be  
4 addressed somehow.

5 So when and if we get to the point where we're  
6 porting numbers I think the burden will be much  
7 less and the cost will be much less.

8 VICE CHAIR HANSON: All right. I  
9 appreciate your honesty in that answer. Thank you  
10 very much.

11 MR. SMITH: Commissioner Burg.

12 COMMISSIONER BURG: I want to pursue  
13 a little bit how we got to this point. What was  
14 the rule -- in other words, I know that certain  
15 companies had to do LNP a year ago or six months  
16 ago or much earlier. What was the rule that came  
17 out?

18 THE WITNESS: I think that's ILECs  
19 that served in the top 100 MSAs, of which we don't.

20 COMMISSIONER BURG: Was there also  
21 you had to be under a certain percent of total  
22 lines in the United States to be eligible for  
23 suspension?

24 THE WITNESS: It seems like some of  
25 the smaller companies in the top 100 received a

1 suspension or temporary suspension.  
 2 COMMISSIONER BURG: And this is part  
 3 of the 1996 Act, or is this FCC ruling?  
 4 THE WITNESS: Kind of a combination.  
 5 I think Congress ordered or put in the '96 Act LNP  
 6 provisions, but I think Mr. Wieczorek said that  
 7 Congress ordered the surcharge. I don't think  
 8 that's correct. I think the FCC talked about a  
 9 surcharge.  
 10 COMMISSIONER BURG: What I'm getting  
 11 at is where did the suspension opportunity come  
 12 from, the authority to request suspension come  
 13 from?  
 14 THE WITNESS: I think the FCC has  
 15 given the State Commissions the authority to  
 16 suspend or modify.  
 17 MR. SMITH: It's in the Act.  
 18 COMMISSIONER BURG: It's in the Act.  
 19 That's what I was going to say.  
 20 MR. SMITH: And the state statute,  
 21 Section 80 of our statute.  
 22 COMMISSIONER BURG: Okay. So what  
 23 I'm getting at is somebody recognized that there  
 24 might be an undue burden for that portion of it and  
 25 allowed a suspension opportunity.

1 THE WITNESS: Exactly.  
 2 COMMISSIONER BURG: And what we're  
 3 here for today is determining whether you should be  
 4 eligible for that suspension opportunity; is that  
 5 correct?  
 6 THE WITNESS: Right.  
 7 COMMISSIONER BURG: And that's why  
 8 you submitted it, and is that why -- I mean, you  
 9 know, one of the problems I have with other options  
 10 is there are probably ultimate options of ways that  
 11 this could be done. To what extent and to what  
 12 cost should we be going to find those options,  
 13 especially when so much of it is still, like you  
 14 said, undetermined. I think you made a pretty good  
 15 statement on that.  
 16 THE WITNESS: And again, this is my  
 17 opinion, but I think to order the rural ILECs to  
 18 provision for LNP until all of these issues are  
 19 addressed and place this burden on the customers is  
 20 rash because I do think at some point these issues  
 21 are going to be addressed.  
 22 COMMISSIONER BURG: Do you have any  
 23 kind of wild estimate of how long you think that  
 24 process would take?  
 25 THE WITNESS: I would hope to have

1 seen something by now. I've had visits with the  
 2 FCC Commissioners and staff and they recognize that  
 3 they dropped the ball and none of them are willing  
 4 to commit to a timeline but I'd hope before the end  
 5 of the year.  
 6 COMMISSIONER BURG: Did they  
 7 indicate to you the wisdom of pushing LNP forward  
 8 before they've made those adjustments?  
 9 THE WITNESS: Again, my  
 10 characterization of their opinion is that they  
 11 failed to recognize the rural and high-cost areas  
 12 and how LNP might impact them.  
 13 COMMISSIONER BURG: But did they  
 14 give you any indication of their feeling about the  
 15 suspension until that occurred then, even though  
 16 they made the Order?  
 17 THE WITNESS: One of them said the  
 18 response to LNP was underwhelming.  
 19 COMMISSIONER BURG: That's all I  
 20 have.  
 21 CHAIRMAN SAHR: I have a couple more  
 22 questions.  
 23 MR. SMITH: Please.  
 24 CHAIRMAN SAHR: The issues of the  
 25 uncertainty in the rules, and we've heard that

1 phrase be used a lot, do you know -- it's a legal  
 2 question. Do you know, is that grounds for a State  
 3 Commission to grant suspension based on uncertainty  
 4 of the rules going forward?  
 5 THE WITNESS: In my legal opinion,  
 6 yes.  
 7 CHAIRMAN SAHR: Fair enough. And  
 8 then a question that I think has been asked time  
 9 and time again has been are there lower cost  
 10 alternatives available? I'm going to ask the other  
 11 side of that question. Did you identify any other  
 12 alternatives that were higher cost or is the one  
 13 that's being proposed the highest cost one that you  
 14 know of?  
 15 THE WITNESS: No. I wouldn't say  
 16 this is the highest cost one. This was meant to  
 17 portray -- someone indicated worst case. I don't  
 18 think that's quite fair. If we had to provision  
 19 today under the way that we interpret the rules,  
 20 this could be the impact. And we wanted to try to  
 21 demonstrate just how big of an impact that could  
 22 be. So, no, I don't think it's the highest cost  
 23 certainly. Are there lower ways? You know,  
 24 perhaps.  
 25 CHAIRMAN SAHR: Thank you.

1 MR. SMITH: Randy, you've been up  
 2 there a long time. Do you need a break before we  
 3 go to the next round?  
 4 THE WITNESS: No. Once I get down I  
 5 don't want to get back up.  
 6 MR. SMITH: All right. Ms. Rogers.  
 7 MS. POLLMAN ROGERS: Thank you.  
 8 REDIRECT EXAMINATION  
 9 BY MS. POLLMAN ROGERS:  
 10 Q Randy, I have just a few questions on redirect. You  
 11 were asked by Mr. Wieczorek whether you contacted  
 12 Western Wireless to discuss options or other options  
 13 for provisioning LNP.  
 14 And I would ask you other than that form  
 15 letter that accompanied the BFR, did they contact you?  
 16 A No.  
 17 Q Now with regard to the questions concerning the  
 18 other -- you had some questions about five wireless  
 19 carriers and you've listed them in your testimony.  
 20 Once you implement LNP if you are required to do so,  
 21 would you anticipate that there are other wireless  
 22 carriers that would come in and request LNP?  
 23 A I'd have to assume so. There are at least five  
 24 wireless licenses that cover our area and I have to  
 25 assume that the providers or the owners of those

1 LNP?  
 2 A Certainly.  
 3 Q And so under the existing network and the way your  
 4 contractual arrangements are set up now, are you  
 5 confident that the system that Mr. DeWitte looked at  
 6 and studied and provided us costs for today, that this  
 7 is a system that would work if you have to implement  
 8 LNP?  
 9 A That's correct.  
 10 Q Under today's system do you, other than any specific  
 11 arrangements for EAS, which you have outlined, do you  
 12 route traffic outside of your exchange area as toll  
 13 traffic?  
 14 A Yes.  
 15 Q Do you get access charges for that?  
 16 A Yes.  
 17 Q Are the access charges important as part of your  
 18 revenue stream?  
 19 A It's a huge part of our revenue stream.  
 20 Q And if asked by this Commission or through this process  
 21 to change the whole underlying system of your network  
 22 now, do you believe that that could be detrimental to  
 23 your company in other ways?  
 24 MR. WIECZOREK: I'm going to  
 25 interpose an objection. The last several questions

1 licenses are going to provide service.  
 2 Q Okay. And, in fact, in Mr. Williams' testimony in his  
 3 exhibits he also used five wireless carriers in his  
 4 analysis, didn't he?  
 5 A That's correct.  
 6 Q There was some talk about -- or some questions  
 7 concerning whether or not it would be better for your  
 8 subscribers to pay one level of transport versus  
 9 another. Wouldn't it be better for your subscribers to  
 10 pay zero in transport?  
 11 A Yeah. In my opinion, I think the transport obligation  
 12 should go back to the wireless carrier.  
 13 Q Okay. And when you were -- let's take your -- let me  
 14 approach it this way: Take yourself back to the point  
 15 in time when the LNP Order from the FCC came out, okay,  
 16 and what you had at that time was basically a deadline  
 17 breathing down your neck; is that correct?  
 18 A Yes.  
 19 Q And so then you did start to look at what are we going  
 20 to do as a company?  
 21 A That's correct.  
 22 Q And when you started talking to consultants or finding  
 23 a consultant and that type of thing, wasn't one of your  
 24 other considerations to come up with an option or a  
 25 plan that would work if you were required to implement

1 have all been straight leading questions. It's her  
 2 witness, she's not allowed to just lead him down  
 3 the road.  
 4 MR. SMITH: Can you rephrase the  
 5 question.  
 6 Q What effect, if any, do you think that that could have  
 7 on your company?  
 8 A It would be very detrimental. We have a large amount  
 9 of debt, and these loans were loaned to us based on  
 10 assumption of some recurring revenue streams. If  
 11 that's disrupted, it's going to affect my ability to  
 12 pay those loans or certainly to get new loans.  
 13 Q And this would be to implement a service for which you  
 14 have had -- have you had very much demand for LNP?  
 15 A To my knowledge, no customers have asked for  
 16 wireline-to-wireless LNP. We have talked about a  
 17 couple of wireless-to-wireless issues.  
 18 Q Okay. You were asked, I believe, by Commissioner Burg  
 19 about some of your communications with the FCC, and I'm  
 20 going to ask you to look at this document that I will  
 21 have marked as Exhibit 4.  
 22 (Exhibit Venture 4 is marked for identification)  
 23 Q I assume you have what has been marked as Venture  
 24 Exhibit 4. Can you please identify this?  
 25 A It appears to be a letter from FCC Chairman Mike Powell

1 to Stan Wise, President of NARUC.  
 2 **Q** And what's the date of the letter?  
 3 **A** June 18, 2004.  
 4 **Q** How did you receive a copy of it? Or did you receive a  
 5 copy of it?  
 6 **A** Yes, I did.  
 7 **Q** How did you receive a copy of it?  
 8 **A** This particular copy came as an e-mail from someone at  
 9 NTCA.  
 10 **Q** In response to Commissioner Burg's questions concerning  
 11 the attitude of the FCC with regard to smaller  
 12 carriers, do you believe this letter would address some  
 13 of those questions?  
 14 **A** Yes, I do.  
 15 **Q** And can you just briefly describe them? Although  
 16 obviously the exhibit speaks for itself, what are some  
 17 of the sentiments expressed in the letter?  
 18 **A** I think the reason that this letter came about was due  
 19 to the lawsuit that NTCA filed in opposition to the  
 20 FCC's LNP Order that was adjoined by the Small Business  
 21 Administration. The Small Business Administration  
 22 wanted to demonstrate that the FCC's Order placed some  
 23 huge burdens on small businesses and didn't consider  
 24 the impacts that the LNP Order might have on these  
 25 small businesses. And it goes on to instruct NARUC to

1 MS. POLLMAN ROGERS: Could you tell  
 2 us which discovery request you're referring to?  
 3 MR. WIECZOREK: Well, rather than  
 4 spend the next 20 minutes to go through and pick  
 5 out the number of discovery requests where we asked  
 6 for information based on public information or  
 7 LNP --  
 8 MS. POLLMAN ROGERS: Well, my  
 9 question is, did you ask any discovery requests for  
 10 these types of documents?  
 11 MR. WIECZOREK: Yes. Commission, I  
 12 apologize. When I get something out of the blue  
 13 sometimes I just have questions where it came from,  
 14 but I tell you what, I don't have any objections to  
 15 the document based on that.  
 16 MR. SMITH: We all got the same  
 17 letter yesterday.  
 18 MS. POLLMAN ROGERS: I want the  
 19 question stricken, however. That is a misstatement  
 20 of what's happened. There were no discovery  
 21 requests like that. That was incorrect.  
 22 CHAIRMAN SAHR: Why don't we just  
 23 take -- can't we take judicial notice of this?  
 24 MS. POLLMAN ROGERS: I believe that  
 25 would be another option.

1 instruct the State Commissions to recognize the burdens  
 2 that LNP has on small rural phone companies.  
 3 **Q** Okay.  
 4 MS. POLLMAN ROGERS: I would offer  
 5 this exhibit into evidence.  
 6 MR. WIECZOREK: May I ask a couple  
 7 of questions of the witness to clarify some issues  
 8 on the document?  
 9 MR. SMITH: Yes.  
 10 MR. WIECZOREK: When did you receive  
 11 this e-mail that contained this document?  
 12 THE WITNESS: The day before  
 13 yesterday, I believe.  
 14 MR. WIECZOREK: Day before  
 15 yesterday. This is the first time I've seen it.  
 16 Did you -- you didn't feel like you had an  
 17 obligation to supply it through continuing  
 18 discovery after you received it based on our  
 19 discovery request?  
 20 THE WITNESS: Frankly, I didn't  
 21 think that it would be issued this soon. I knew  
 22 that they had talked -- the person I talked to at  
 23 the Small Business Administration indicated there  
 24 might be a letter but I didn't think it would be  
 25 out this soon.

1 MR. SMITH: We received the letter  
 2 so I guess we know it exists and it's -- I'm going  
 3 to admit the letter.  
 4 MR. WIECZOREK: And I'll withdraw my  
 5 objections.  
 6 MS. POLLMAN ROGERS: Thank you.  
 7 That's all.  
 8 MR. COIT: No questions.  
 9 MR. SMITH: Mr. Wieczorek.  
 10 MR. WIECZOREK: A couple.  
 11 RE-CROSS-EXAMINATION  
 12 BY MR. WIECZOREK:  
 13 **Q** If you'll give me a moment, I'm reading this letter for  
 14 the first time, Venture No. 4. You still have that in  
 15 front of you?  
 16 **A** Yes.  
 17 **Q** The bottom of that first page it talks about urging the  
 18 State Commissions in the course of deliberations on  
 19 waiver requests such as the one you have here, you've  
 20 made here; correct?  
 21 **A** Uh-huh.  
 22 **Q** To encourage the parties to develop and submit data  
 23 relating to the benefits of wireline-to-wireless number  
 24 portability, and this is the part, and the costs of  
 25 complying with those obligations, including upgrade

1 costs to the network and routing costs for calls  
 2 forwarded to carriers.  
 3 Do you see that?  
 4 A Yes.  
 5 Q Well, the only costs you're submitting to this  
 6 Commission are the costs that Mr. DeWitte is  
 7 submitting; correct?  
 8 A Yes.  
 9 Q And on my earlier cross you've already admitted that  
 10 those costs submitted by Mr. DeWitte actually overstate  
 11 the current situation that you have in your system?  
 12 MS. POLLMAN ROGERS: I object to  
 13 that. That's a misstatement of his testimony.  
 14 MR. WIECZOREK: I don't believe it  
 15 is.  
 16 MR. SMITH: I'm sorry.  
 17 MR. WIECZOREK: He testified in my  
 18 original cross that Mr. DeWitte's cost analysis  
 19 does not reflect the current situation in his  
 20 service area.  
 21 MS. POLLMAN ROGERS: No. That's a  
 22 different question than what you just asked.  
 23 MR. WIECZOREK: Well, then I'll ask  
 24 that question.  
 25 MS. POLLMAN ROGERS: I have the same

1 A I would agree.  
 2 Q You said something on another questioning that -- I  
 3 wrote it down and hopefully I had it perfect. Let me  
 4 know if I didn't. But you said, If we were forced to  
 5 implement LNP, this transport and routing will be  
 6 answered. Do you remember saying that?  
 7 A I remember saying something to the effect I hope the  
 8 transporting and routing will be addressed in the  
 9 order.  
 10 Q So if this Commission would order implementation of LNP  
 11 and address transport and routing, that would satisfy  
 12 you?  
 13 A We still have obviously some costs not associated with  
 14 transport and routing. You know, as long as they are  
 15 addressed and the transport and routing issues are  
 16 addressed properly, yeah.  
 17 Q Now you understand that it's your burden to show undue  
 18 economic -- undue economic burden in this case; right?  
 19 A I guess so.  
 20 Q Okay. And maybe burden's not a -- that's kind of a  
 21 legal term. It's your obligation to show this is going  
 22 to cause you an undue economic burden.  
 23 A Okay.  
 24 Q And you testified that if you had to provide LNP  
 25 pursuant to the way that Western Wireless has

1 objection to that question. That's a  
 2 mischaracterization of what he testified to.  
 3 MR. SMITH: I'm going to let him  
 4 answer it.  
 5 A I was afraid of that. Can you ask it again.  
 6 MR. WIECZOREK: Rather than get  
 7 another objection, I'll just ask the court reporter  
 8 to read it back.  
 9 (Reporter reads back last question)  
 10 MS. POLLMAN ROGERS: I'm sorry.  
 11 That's not the second question you asked.  
 12 (Reporter reads back requested portion)  
 13 A I'll try. The costs that Mr. DeWitte supplied supposed  
 14 there would be five carriers requesting LNP. To date I  
 15 have not yet received five requests for LNP.  
 16 Q Right. And you agree that you don't even -- Nextel,  
 17 Sprint PCS, do not even provide -- are not currently  
 18 even providing service in at least 19 of your  
 19 exchanges; correct?  
 20 A I think that's correct.  
 21 Q Now in reading this letter, again, very quickly here,  
 22 but it seems to be the general gist of this letter is  
 23 Commissioner Powell would like people to try to  
 24 cooperate and get the true facts on the table and the  
 25 best cost estimates of LNP. Wouldn't you agree?

1 suggested, it could impact different loans and  
 2 different things you have because you rely on transport  
 3 revenue and you lose some of that transport revenue;  
 4 correct?  
 5 A That's not exactly what I said.  
 6 Q Go ahead.  
 7 A If we had to provision LNP the way that you've  
 8 diagrammed there, I suspect that there would be a huge  
 9 reduction in access minutes and toll minutes, and that  
 10 would impact our whole business, not just our ability  
 11 to pay our loans.  
 12 Q Okay. Your transport cost as projected by Mr. DeWitte  
 13 in his plan, which we agree -- I believe and you agree  
 14 overstates your actual current situation?  
 15 MS. POLLMAN ROGERS: No. I'm going  
 16 to object to that. I don't believe that he did  
 17 agree to that.  
 18 MR. WIECZOREK: Well, the record  
 19 will stand for what you've said.  
 20 A Okay.  
 21 Q I'll just say this: The current projections submitted  
 22 by Mr. DeWitte for transport installation, and monthly  
 23 recurring -- well, transport installation is 625,000  
 24 and -- here's a copy of his Exhibit 3A so you can  
 25 confirm that I'm representing the numbers correctly.

1 Do you see that?

2 A Yes.

3 Q And a monthly recurring of 220,000 and change; correct?

4 A Correct.

5 Q And my math, at 220,000 a month gets me to over -- I'm

6 just going to round off, over 2.6 million. Do you

7 agree with that?

8 A Subject to your math.

9 Q Okay. Which is always iffy. But add 600,000 to 2.6

10 million you get 3.2 million; correct?

11 A Again, subject to your math.

12 Q Wouldn't a \$3.2 million hit to install LNP the way

13 you've proposed impact these loans that you're so

14 concerned about?

15 A I don't know if this is an answer to your question but

16 a \$3 million capital outlay for anything impacts our

17 company.

18 Q Okay. Wouldn't you agree that would be a greater

19 impact than the lost transport costs that you would

20 project under the Western Wireless plan?

21 A I don't think I would agree with that.

22 Q You think you're going to lose transport costs in

23 excess of \$3.2 million under the Western Wireless plan?

24 A Just the Western Wireless plan and just dealing with

25 Western Wireless probably wouldn't be \$3.2 million.

1 But that begins a process where, you know, if five

2 carriers -- if I'm forced to provide LNP like this for

3 five carriers, the downstream effects of what it will

4 do to access, what it will do to my toll revenues, the

5 impact it will have on my local service it will be in

6 excess of \$3 million.

7 Q You haven't done any research to present any numbers to

8 support that conclusion, have you?

9 A I don't believe so.

10 Q And Mr. DeWitte hasn't provided any numbers to support

11 that conclusion, has he?

12 A Again, I don't believe so.

13 MR. WIECZOREK: Okay. That's all I

14 have.

15 MR. SMITH: Mr. Gerdes?

16 MR. GERDES: No questions.

17 MS. WIEST: No questions.

18 MR. SMITH: Commissioners?

19 COMMISSIONER BURG: I have one

20 follow-up. I think Mr. Wiczorek asked you, and if

21 I state this question wrongly, correct me, that if

22 the Commission found a way to satisfy your

23 transport issues that could we go forward. Do you

24 remember that question?

25 THE WITNESS: Again, in my opinion.

1 I can't testify for the other companies, but

2 transport is a huge issue in our company. The

3 software costs, implementation, the proposed time

4 to actually port the numbers. There's a lot of big

5 issues, but transport is a major issue for our

6 company.

7 COMMISSIONER BURG: But my question

8 is, do you see any way this Commission could

9 mitigate the transport costs to satisfy your

10 problem?

11 THE WITNESS: Yeah. You make it the

12 obligation of the wireless carrier requesting LNP.

13 COMMISSIONER BURG: Do you think we

14 have that authority?

15 THE WITNESS: Yes.

16 COMMISSIONER BURG: I don't know if

17 we do. We don't regulate the wireless. That would

18 be the question I had.

19 MR. SMITH: We'll talk about that

20 with somebody that's not Randy.

21 THE WITNESS: If you want my legal

22 opinion.

23 MR. SMITH: I think that's a legal

24 issue.

25 COMMISSIONER BURG: That's a very

1 huge issue to me because if there's a way, that

2 opens a whole new avenue whether we can implement

3 LNP and pass those transport costs on. Otherwise,

4 I would be under the impression since we don't

5 regulate wireless and I don't know if we do but you

6 said it's a legal question and I'll leave it to the

7 legal people to decide but it did make my attention

8 span go up in a hurry. Thank you.

9 MS. POLLMAN ROGERS: I have nothing

10 further.

11 MR. SMITH: You may step down.

12 THE WITNESS: Thank you.

13 MR. SMITH: Not a minute too soon.

14 THE WITNESS: Yes.

15 (Exhibits West River 1 through 3 are marked for

16 identification)

17 (A short recess is taken)

18 MR. SMITH: We're back on the

19 record. And it's now time for Docket No. TC04-061

20 that's in the matter of the petition of West River

21 Cooperative Telephone Company for suspension of LNP

22 obligations.

23 I'm going to note something before we head

24 into this, and that is the exhibit that we

25 received, the FCC letter, I'm going to make the

427

1 assumption that that letter was offered with  
 2 respect to all of the LNP Dockets.  
 3 MR. WIECZOREK: I have no objection.  
 4 MR. SMITH: Okay. Thank you. With  
 5 that, Petitioners, please call your next witness.  
 6 MS. POLLMAN ROGERS: We would call  
 7 Jerry Reisenauer.  
 8 JERRY REISENAUER,  
 9 called as a witness, being first duly sworn in the  
 10 above cause, testified under oath as follows:  
 11 DIRECT EXAMINATION  
 12 BY MS. POLLMAN ROGERS:  
 13 **Q** Good morning.  
 14 **A** Good morning.  
 15 **Q** Would you please state your name and business address  
 16 for the record.  
 17 **A** Yes. My name is Jerry Reisenauer and my business  
 18 address is 801 Coleman Avenue, Bison, South Dakota.  
 19 **Q** What is your occupation?  
 20 **A** I'm the general manager of the West River Cooperative  
 21 Telephone Company.  
 22 **Q** That's the Petitioner in this Docket; correct?  
 23 **A** That's correct.  
 24 **Q** Mr. Reisenauer, have you prefiled testimony in this  
 25 case?

428

1 **A** Yes, I have.  
 2 **Q** And would you please take a look at West River's  
 3 Exhibits 1 and 2?  
 4 **A** Yes.  
 5 **Q** And would those documents be the prefiled testimony,  
 6 both your direct and rebuttal that you filed in this  
 7 Docket?  
 8 **A** That is correct.  
 9 **Q** Do you have any additions or corrections to the  
 10 documents?  
 11 **A** I do have a clarification to my prefiled, direct  
 12 prefiled testimony, and that would be on page 4, line  
 13 13 where I reference Exhibit 1. The Exhibit 1 should  
 14 be to John DeWitte's prefiled testimony. It was not  
 15 attached to my testimony.  
 16 **Q** Would that be on line 9?  
 17 **A** It's on line 13 on mine.  
 18 **Q** Okay. Do you have any other additions or corrections  
 19 or clarifications?  
 20 **A** I do not.  
 21 **Q** If I asked you -- and this testimony was prepared by  
 22 you or at your direction; is that correct?  
 23 **A** That is correct.  
 24 **Q** If I were to ask you the questions contained in these  
 25 exhibits today, would your answers be the same?

429

1 **A** Yes, they would.  
 2 **Q** Could you please briefly summarize your prefiled  
 3 testimony.  
 4 **A** Certainly. Being a cooperative or a member-owned  
 5 organization, our goal is to provide those services  
 6 that benefit our members. And after reviewing the LNP  
 7 issues with our board of directors, we determined that  
 8 the lack of request for porting of wireline number to a  
 9 wireless -- excuse me, wireless number to -- wireline  
 10 number to wireless carrier, the excessive costs  
 11 associated with implementing local number portability  
 12 and the obvious lack of benefit to our members, it was  
 13 in our best interest to request a waiver to complying  
 14 with the portability requirements until the FCC has  
 15 addressed the transport and cost issues that will be  
 16 borne by our members under the existing environment.  
 17 MS. POLLMAN ROGERS: Thank you. At  
 18 this time I would offer West River's Exhibits 1 and  
 19 2.  
 20 MR. WIECZOREK: I have no objection.  
 21 MS. WIEST: No objection.  
 22 MR. COIT: No objection.  
 23 MR. SMITH: West River's Exhibits 1  
 24 and 2 are admitted.  
 25 MS. POLLMAN ROGERS: I would tender

430

1 the witness for cross-examination.  
 2 MR. SMITH: Mr. Coit?  
 3 MR. COIT: No questions.  
 4 MR. SMITH: Mr. Wieczorek.  
 5 MR. WIECZOREK: Thank you,  
 6 Mr. Smith, Commission.  
 7 CROSS-EXAMINATION  
 8 BY MR. WIECZOREK:  
 9 **Q** Do you have an affiliate in North Dakota?  
 10 **A** No, we do not.  
 11 **Q** You reference and had actually modified your testimony  
 12 regarding the costs that have been prepared by  
 13 Mr. DeWitte. Do you recall doing that just a moment  
 14 ago?  
 15 **A** Yes, I do.  
 16 **Q** And you also then in your summary talked about the  
 17 excessive costs of LNP. Do you remember that?  
 18 **A** Yes, I do.  
 19 **Q** Now when you talked -- the excessive costs you're  
 20 talking about -- well, the only cost analysis that you  
 21 have done is what you have had Mr. DeWitte perform;  
 22 correct?  
 23 **A** Cost analysis, that is correct.  
 24 **Q** So when you talk about the excessive costs you're using  
 25 Mr. DeWitte's numbers; correct?

1 A Yes, I am.  
 2 Q Now are you familiar with the fact that when  
 3 Mr. DeWitte calculated your costs he assumed four cell  
 4 phone providers in your area?  
 5 A I am not familiar with that fact to that extent, no.  
 6 Q Okay. Well, the four cell phone carriers in your  
 7 direct testimony, it might be easier to use the marked  
 8 testimony because that line number and page number  
 9 should coordinate with what's been provided to  
 10 everybody else.  
 11 A All right.  
 12 Q Did you find it?  
 13 A Yes.  
 14 Q Go ahead. I might have to borrow from you to read some  
 15 of these numbers myself. If you go to page 2 of your  
 16 direct testimony.  
 17 A Yes.  
 18 Q Line 21.  
 19 A Yes.  
 20 Q The four cell companies, and I'll just represent to you  
 21 these are the four cell companies Mr. DeWitte used and  
 22 I'll clarify that with him later, of course, Verizon  
 23 Wireless, Western Wireless, Sprint PCS, and Nextel. Do  
 24 you see that?  
 25 A Yes, I do.

1 Q With that modification, can you answer the question?  
 2 MR. WIECZOREK: I agree he says it's  
 3 excessive costs.  
 4 Q It's based on Mr. DeWitte's costs when you come up with  
 5 excessive; right? Let's back up. The excessive costs  
 6 you talked about, the only cost analysis you've done is  
 7 Mr. DeWitte's cost analysis; correct?  
 8 A That is correct.  
 9 Q The excessive costs you refer to in your opening  
 10 statement were the cost analysis performed by  
 11 Mr. DeWitte; correct?  
 12 A That is correct.  
 13 Q With that premise then, do you understand that the cost  
 14 analysis performed by Mr. DeWitte includes a point of  
 15 interconnection to every one of your exchanges by  
 16 Sprint PCS and Nextel?  
 17 A I believe it does.  
 18 Q Okay. And you have eight exchanges?  
 19 A That is correct.  
 20 Q So that would be 16 points of interconnection, 2 times  
 21 8?  
 22 A Yes.  
 23 Q And Mr. DeWitte has priced those points of  
 24 interconnection at \$5,000 a piece. Are you aware of  
 25 that?

1 Q Do you know whether Nextel even currently operates in  
 2 the state of South Dakota?  
 3 A I am not aware as to the extent of Nextel's  
 4 South Dakota operations. I am aware that they do have  
 5 service in some parts of South Dakota.  
 6 Q And that's in the eastern part of the state, you'd  
 7 agree?  
 8 A I believe it is.  
 9 Q In fact, Nextel doesn't operate anywhere West River, do  
 10 they?  
 11 A I'm not aware of anywhere they operate West River.  
 12 Q Okay. And Sprint PCS doesn't operate anywhere West  
 13 River, does it?  
 14 A Not that I'm aware.  
 15 Q Do you know the extent of the Sprint PCS operating  
 16 range in South Dakota?  
 17 A I do not.  
 18 Q You understand that those excessive costs of  
 19 Mr. DeWitte includes point of interconnects to each one  
 20 of your exchanges for both Sprint PCS and Nextel?  
 21 MS. POLLMAN ROGERS: I'm going to  
 22 object to that question. He did not testify it was  
 23 excessive costs of Mr. DeWitte. He testified it  
 24 would be excessive cost to his company and  
 25 cooperative members.

1 A Yes.  
 2 Q Okay. So at \$5,000, 16 interconnections, that's  
 3 \$80,000 of your install costs; correct?  
 4 A I don't believe I agree with your math but --  
 5 Q Well, let's do it the easy way. You've got eight  
 6 exchanges.  
 7 A I will agree with that's --  
 8 Q Well, I don't want you to think that I miscalculated.  
 9 So let me run through it and tell me if you agree. You  
 10 have eight exchanges; correct?  
 11 A Yes.  
 12 Q For one cell company it costs \$5,000 to put a point of  
 13 interconnection in?  
 14 A Yes.  
 15 Q Okay. So you take 8 times 5 equals 40 and you have two  
 16 cell companies that -- or two of the companies you've  
 17 listed that are nowhere near your territory. You take  
 18 40 times 2, that's \$80,000; correct?  
 19 A That's correct.  
 20 Q Okay. And Mr. DeWitte's costs for your install are  
 21 \$160,000; correct?  
 22 A That is correct.  
 23 Q So that's half of that install cost; correct?  
 24 A Yes. It would be.  
 25 Q Okay. Now you're not representing to this Commission

435

1 that you have information that Nextel and Sprint are  
 2 going to be coming into your service area within the  
 3 next couple of years, are you?  
 4 A I don't have that knowledge. I can't determine what  
 5 Sprint or Nextel may do.  
 6 Q Now you would also agree that costs, the monthly  
 7 recurring costs, includes a monthly recurring cost for  
 8 each one of those points of interconnects for both  
 9 Sprint and Nextel; correct?  
 10 A I would defer that question to Mr. DeWitte. I'm not  
 11 aware of that.  
 12 Q Do you know of any more expensive way to provide LNP on  
 13 your system than the one that's been proposed by  
 14 Mr. DeWitte?  
 15 A Do I have knowledge of any more expensive?  
 16 Q Yes.  
 17 A No. I do not have knowledge if there are more  
 18 expensive options. I have no knowledge if there are  
 19 more dependable or less dependable options.  
 20 Q Okay. You've testified about -- you guys have rolled  
 21 out broadband in your area?  
 22 A Yes, we have.  
 23 Q You've actually rolled out and have broadband in your  
 24 area?  
 25 A In some parts of our service territory we have.

436

1 Q Have you charged for that broadband that you've rolled  
 2 out?  
 3 A We do charge for it, yes.  
 4 Q You have some extended area of service for your  
 5 subscribers; correct?  
 6 A That is correct.  
 7 Q And you provide that because that's a benefit to your  
 8 consumers?  
 9 A Yes.  
 10 Q Your consumers like having that extended area of  
 11 service?  
 12 A Our consumers I assume like having extended area  
 13 service. We do not get complaints about it.  
 14 Q Well, you agree that the more calls you can make as  
 15 local, that usually benefits the consumer?  
 16 A No. I don't agree to that.  
 17 Q So toll calls actually are more of a benefit to the  
 18 consumer?  
 19 A I agree that I would state that there are several other  
 20 criteria as to what is beneficial to our consumers  
 21 other than the size of the calling scope.  
 22 Q Well, calling scope can be a benefit. You'd agree with  
 23 that?  
 24 A Hypothetically bigger is better? Is that what you're  
 25 asking?

437

1 Q Well, I'm asking you that general -- let's ask  
 2 generally. Maybe it isn't for every consumer, though I  
 3 can't imagine it isn't. But generally the ability to  
 4 place local calls within a larger area is a benefit to  
 5 those consumers paying for the service?  
 6 A It is one of the criteria and would be beneficial based  
 7 on that, yes.  
 8 Q Prior to the November 10, 2003 decision by the FCC on  
 9 number portability had you done any investigation or  
 10 any work regarding the cost or supplying of LNP?  
 11 A Prior to November 10?  
 12 Q Right.  
 13 A No, we have not.  
 14 Q The sole scope of your investigation and cost into the  
 15 provisioning of LNP since then has been working with  
 16 Mr. DeWitte and preparing your costs; is that true?  
 17 A No, that's not.  
 18 Q What else have you done?  
 19 A We have reviewed our infrastructure as to the updates  
 20 that are necessary. We have talked to other companies  
 21 as to -- and other companies as to what they felt  
 22 companies with the same type of switch that we have as  
 23 to what they felt were issues.  
 24 We've discussed issues with legal, and we  
 25 have reviewed things with our consultants.

438

1 Q Have you talked to any Minnesota companies, LECs, how  
 2 they're handling LNP?  
 3 A No, I have not.  
 4 Q You understand that there's a -- that the federal law  
 5 allows an end-user surcharge to recover your costs for  
 6 deployment of LNP?  
 7 A I understand that an end-user surcharge may be  
 8 available to cover some of the costs of LNP. I have no  
 9 knowledge whether that is all the costs associated with  
 10 LNP or not.  
 11 Q So in your investigation you didn't make that  
 12 determination?  
 13 A We did not make that determination.  
 14 Q You receive USAC funds; correct?  
 15 A Yes, we do.  
 16 Q Do you know how much you receive in local switching  
 17 support through USAC on an annual basis?  
 18 A I do not.  
 19 Q How much do you just receive in USAC funds on an annual  
 20 basis?  
 21 A I don't have that number. I can't tell you exactly.  
 22 Q You can't even approximate?  
 23 A Approximately in excess of 1 million.  
 24 Q You understand that your switch-related costs -- well,  
 25 let's back up. You submit your costs for the service

1 to your system and your switch upgrades to USAC to use  
 2 in basing support costs, don't you?  
 3 A I believe we do.  
 4 Q And it would be your plan to submit these costs for LNP  
 5 upgrade to USAC for support?  
 6 A Those costs that are eligible for reimbursement, I'm  
 7 sure we would.  
 8 Q Now you've not done any kind of independent or internal  
 9 survey of your customers on what they would pay to have  
 10 the option of LNP, have you?  
 11 A Formal survey, we have not.  
 12 Q And you're not presenting any demographic information  
 13 to this Commission as to the income, average income or  
 14 any income information on your customers, are you?  
 15 A I have not provided any demographic information.  
 16 However, I would state that we serve parts of two  
 17 counties that are consistently amongst the 10 lowest  
 18 income counties in the nation annually.  
 19 Q You serve parts of those counties?  
 20 A Yes, we do.  
 21 MR. WIECZOREK: That's all I have.  
 22 MR. SMITH: Ms. Wiest.  
 23 CROSS-EXAMINATION  
 24 BY MS. WIEST:  
 25 Q What is your current local rate?

1 A Current local rates for residential range between 7 and  
 2 12.50 and for business between 10.50 and \$23.  
 3 Q Thank you. You have received some BFRs; is that  
 4 correct?  
 5 A We have received two BFRs.  
 6 Q How did you respond to those?  
 7 A We acknowledged the receipt of the BFRs.  
 8 Q Could you go to your rebuttal testimony?  
 9 A Yes.  
 10 Q On page 2 beginning at the end of line 5 but mainly on  
 11 line 6 you state, "Pursuant to the Interconnection  
 12 Agreement West River did not agree to route traffic  
 13 destined for Western Wireless to the serving tandem."  
 14 Is there any reason why West River did not agree to do  
 15 that?  
 16 A Would you define the serving tandem?  
 17 Q Qwest.  
 18 A Qwest?  
 19 Q Yes.  
 20 A I would have to review all of our contractual  
 21 arrangements to see if that is possible. I would have  
 22 to contact Qwest to see if they were interested in  
 23 having that traffic routed through that tandem.  
 24 Q Do you have any reason to believe that Qwest would not  
 25 be interested in routing that traffic for you?

1 A I don't know.  
 2 Q If the Commission were to order your company to  
 3 implement LNP and transport was your responsibility, do  
 4 you believe at that point you would explore other more  
 5 efficient, less costly options?  
 6 A I believe we would, given the proper time frame we  
 7 would --  
 8 MS. POLLMAN ROGERS: Just a minute.  
 9 I am going to object to that question. It has not  
 10 been established that there are more efficient  
 11 cost-effective methods.  
 12 Q Are you aware --  
 13 MR. SMITH: I'm going to overrule it  
 14 because all she asked is whether would he explore  
 15 more efficient cost-effective methods.  
 16 MS. POLLMAN ROGERS: But again, it  
 17 hasn't been established if there are any --  
 18 MR. SMITH: I don't think the  
 19 question assumes that.  
 20 Q Go ahead.  
 21 A Could you restate your question.  
 22 Q Right. If the Commission were to order you to  
 23 implement LNP and you were responsible for the  
 24 transport, at that point do you believe that you would  
 25 explore other more efficient less costly options?

1 A Again, given sufficient time frame, I think we would  
 2 explore all available options for not only cost but  
 3 reliability, availability. A number of things would  
 4 come into that equation.  
 5 Q And do you believe that Western Wireless's proposal,  
 6 routing proposal, would bring up reliability concerns?  
 7 A Routing to a Qwest tandem?  
 8 Q Yes.  
 9 A I don't know.  
 10 MS. WIEST: That's all I have.  
 11 Thank you.  
 12 MR. SMITH: Commissioner questions?  
 13 CHAIRMAN SAHR: Good morning.  
 14 THE WITNESS: Good morning, Bob.  
 15 CHAIRMAN SAHR: Or good afternoon.  
 16 I think we just ticked past morning.  
 17 THE WITNESS: It's still morning in  
 18 West River.  
 19 CHAIRMAN SAHR: Very good point.  
 20 THE WITNESS: Thank you.  
 21 CHAIRMAN SAHR: Would you be willing  
 22 to participate in a working group to continue to  
 23 look at options to implement LNP that might be more  
 24 cost-effective while at the same time addressing  
 25 what you feel are some very important concerns that

1 you've outlined in your testimony?  
 2 THE WITNESS: Absolutely.  
 3 CHAIRMAN SAHR: And if you were to  
 4 have input on what type of people might serve on  
 5 that group, who would you suggest be part of that  
 6 process?  
 7 THE WITNESS: I would assume all the  
 8 associated parties, some consultants, some legal  
 9 experts, and Commissioners or Commission staff.  
 10 CHAIRMAN SAHR: Thank you. That's  
 11 all the questions I have. Thank you.  
 12 MR. SMITH: Commissioner Hanson, do  
 13 you have any questions?  
 14 VICE CHAIR HANSON: Sure. Good  
 15 afternoon or morning, Mr. Reisenauer.  
 16 THE WITNESS: Good morning.  
 17 VICE CHAIR HANSON: Thank you very  
 18 much for coming before us and testifying. I'm  
 19 curious. Do you see any way in which LNP,  
 20 implementation of LNP, would be palatable to you?  
 21 I'm asking you to look at those challenges of  
 22 porting and routing, rates, et cetera. What items  
 23 do you -- another way to ask the question: What  
 24 items do you see that need to be overcome to make  
 25 LNP a palatable reality for you?

1 MR. SMITH: Ms. Rogers.  
 2 MS. POLLMAN ROGERS: Thank you. I  
 3 have just a few questions on redirect.  
 4 REDIRECT EXAMINATION  
 5 BY MS. POLLMAN ROGERS:  
 6 Q With regard to the wireless carriers that we discussed  
 7 earlier, all of them are licensed to do business in  
 8 your area, the four that we talked about; is that  
 9 correct?  
 10 A To my knowledge they are.  
 11 Q And do you know if Mr. Williams, Western Wireless's  
 12 expert, used the same number of wireless carriers in  
 13 his calculations?  
 14 A I do not know that.  
 15 Q In follow-up to Commissioner Hanson's questions, do you  
 16 see a distinction between the provisioning of broadband  
 17 services wherein the customer that subscribes to the  
 18 service pays for it as opposed to LNP?  
 19 A Definitely.  
 20 Q And that would be in accordance with what you just  
 21 explained or --  
 22 A Yes. Again, the person who orders broadband pays for  
 23 the associated costs. LNP, the costs will be borne by  
 24 those members that are remaining.  
 25 Q Do you believe that LNP would be beneficial to your

1 THE WITNESS: I would have to first  
 2 off answer in two parts. In response to that  
 3 question, I would say that if I felt there were  
 4 individuals that were -- and there would be a  
 5 demand for porting, I would support it  
 6 aggressively.  
 7 The second part of that answer is I believe  
 8 it's a viable option when the cost-causer is the  
 9 cost payer versus the members that remain picking  
 10 up that cost.  
 11 VICE CHAIR HANSON: So if the  
 12 cost-causer, and I know that has a number of  
 13 implications in it, were to be -- I know in your  
 14 eyes and your mind and many of these instances is  
 15 the -- in this example would be Western Wireless.  
 16 If they were to be required to pay for the cost  
 17 that they caused and other entities, ILECs were  
 18 still paying for the costs that they are  
 19 responsible for, then you would see that as a major  
 20 hurdle to overcome? Am I correct?  
 21 THE WITNESS: I would agree with  
 22 you.  
 23 VICE CHAIR HANSON: Okay. Thank  
 24 you.  
 25 THE WITNESS: Thank you.

1 consumers at this point, your customers?  
 2 A I don't believe there's a demand for LNP and I don't  
 3 believe it's beneficial at this point, no.  
 4 Q And that being the case, did you have any reason to  
 5 explore it or even look into it prior to the  
 6 Commission's Order of November 13?  
 7 A We have never had a request for wireline-to-wireline or  
 8 wireless-to-wireline porting so there was no reason to  
 9 research.  
 10 Q Perhaps I didn't hear you correctly but have you had a  
 11 request for wireline-to-wireless?  
 12 A We have not.  
 13 Q How many customers do you have?  
 14 A Approximately 3,775 in South Dakota.  
 15 Q Do you feel you know them quite well?  
 16 A Extremely well.  
 17 Q You have already testified you serve two counties that  
 18 are lower-income counties?  
 19 A Yes.  
 20 Q With regard to your particular company's case, just the  
 21 cost of upgrading your switches is still significant  
 22 even if you put the transport costs aside. Would you  
 23 agree with that?  
 24 A That is correct.  
 25 Q Okay. And, in fact, would some of your customers

1 consider a surcharge on their line of a dollar or \$2 --  
 2 how do you think they'd react to that?  
 3 A They would be very negative to an additional charge on  
 4 their bill.  
 5 Q You were asked about exploring other routing proposals,  
 6 in particular the one that maybe you see on the board  
 7 up here with regard to Qwest.  
 8 Prior to your coming here did Western  
 9 Wireless ever present you with any other proposals with  
 10 regard to routing?  
 11 A They did not.  
 12 Q And as you see the top portion of the chart up there on  
 13 the board, would you consider that a proposal?  
 14 A I would defer that to our cost consultant.  
 15 Q Okay. And do you believe that, for example, SDN has a  
 16 more reliable network than the Qwest tandem network?  
 17 A I do.  
 18 Q Okay.  
 19 MS. POLLMAN ROGERS: That's all.  
 20 Thank you.  
 21 MR. SMITH: Mr. Coit?  
 22 MR. COIT: No questions.  
 23 MR. SMITH: Mr. Wiczorek?  
 24 MR. WIECZOREK: I do have a couple  
 25 of follow-up.

1 MR. WIECZOREK: I'm going to mark it  
 2 as Western Wireless 8.  
 3 MS. POLLMAN ROGERS: Could I just  
 4 see it.  
 5 (Exhibit WWC 8 is marked for identification)  
 6 Q I'm going to show you what has been marked as Exhibit  
 7 No. 8, Mr. Reisenauer. Do you recall receiving that  
 8 letter? You can take a second to review it.  
 9 (Witness examines document)  
 10 A I'm sorry. I do not recall receiving this letter.  
 11 Q Okay. That letter is a letter addressed to you;  
 12 correct?  
 13 A That is addressed to me, yes.  
 14 Q And that letter references the fact that Western  
 15 Wireless has sent you a local number portability  
 16 operations agreement as a proposal; is that correct?  
 17 A Yes.  
 18 Q Okay. Do you route these letters to somebody else in  
 19 your office when you get these types of things?  
 20 MS. POLLMAN ROGERS: I'm sorry. I  
 21 guess -- he said he doesn't remember receiving it.  
 22 A This particular letter that would have been associated  
 23 with number portability I would have retained. I would  
 24 not have routed it to another.  
 25 Q So is it your testimony in front of this Commission

1 RECROSS-EXAMINATION  
 2 BY MR. WIECZOREK:  
 3 Q First, when you answered the number of lines, you said  
 4 you have -- you set forth a number. I'm not sure I got  
 5 it exactly right, but you said in South Dakota?  
 6 A That's correct.  
 7 Q Do you have exchanges in other states?  
 8 A We do not have exchanges in other states. We do have  
 9 consumers in other states, yes.  
 10 MR. WIECZOREK: I apologize to the  
 11 Commission. I would like to mark an exhibit. I  
 12 only have one copy. It's essentially the identical  
 13 letter that I marked during Mr. Heiberger's  
 14 testimony, the December 19 letter proposing a  
 15 portability agreement from Western Wireless. And  
 16 that's Exhibit, I believe -- I believe, 4.  
 17 MS. POLLMAN ROGERS: Could I ask a  
 18 question? Is this a letter to ITC?  
 19 MR. WIECZOREK: This is a letter to  
 20 Jerry. It's the same letter. I'm just pointing  
 21 out so if you want to follow along, the body of the  
 22 letter is the same. Who it's addressed to -- I'm  
 23 sure I'll mispronounce your last name so I'm a  
 24 little nervous about it.  
 25 THE WITNESS: Reisenauer.

1 that you didn't receive this letter?  
 2 A No. My testimony is I do not recall receiving this  
 3 letter.  
 4 Q Okay. You testified -- Ms. Rogers asked you actually  
 5 whether Western Wireless had proposed any type of  
 6 routing or agreements. You'd agree if you would have  
 7 received this letter or assuming that you received it,  
 8 that Western Wireless is making proposals for  
 9 agreements; correct?  
 10 MS. POLLMAN ROGERS: Just a minute.  
 11 I believe what I asked him is if Western Wireless  
 12 ever presented the proposal that is  
 13 theoretically -- if we call it a proposal, the one  
 14 on the board to him prior to this hearing. I  
 15 believe that was my question.  
 16 MR. WIECZOREK: Okay. Assuming  
 17 that's your question I'll ask it that way, if  
 18 that's all right.  
 19 Q You've admitted receiving a BFR from Western Wireless;  
 20 correct?  
 21 A That is correct.  
 22 Q And you have never contacted Western Wireless about any  
 23 options for LNP implementation or any possible routing  
 24 agreements, have you?  
 25 A We have not.

1 MR. WIECZOREK: That's all I have.  
 2 MR. SMITH: Thank you. Ms. Wiest.  
 3 RE-CROSS-EXAMINATION  
 4 BY MS. WIEST:  
 5 Q Does your broadband rate cover your cost?  
 6 A Excuse me?  
 7 Q Does your broadband rate cover its cost?  
 8 A When you say cover its costs, I question what costs you  
 9 are associating with broadband. Are you associating  
 10 total network costs? Are you associating the costs  
 11 just -- with broadband? When we replace plant, and I  
 12 believe I made that clear in my original testimony, we  
 13 replace plant based on the age of the plant, the  
 14 condition of the plant.  
 15 Today's technology is that fiber is the most  
 16 cost-effective replacement, and fiber does provide  
 17 opportunity for broadband. So if you're asking if the  
 18 total plant cost -- if our rate covers the total plant  
 19 costs, I would have to say no. There's some  
 20 incremental costs that could be associated with  
 21 broadband. There I would have a different answer. I  
 22 would say yes, we try to cover those incremental costs  
 23 that are associated.  
 24 MS. WIEST: Thank you. That's all  
 25 I have.

1 Mr. Reisenauer. Tal, what's the date on the letter  
 2 you showed him on the exhibit, just so I can --  
 3 MR. WIECZOREK: It's marked up  
 4 there.  
 5 THE WITNESS: December 19.  
 6 MR. SMITH: I mean --  
 7 MR. WIECZOREK: December 19.  
 8 MR. SMITH: It hasn't been offered.  
 9 Just for my record.  
 10 MR. WIECZOREK: I marked it but he  
 11 couldn't recall it. I didn't offer it.  
 12 MR. SMITH: Okay. I know. Just for  
 13 my sheet here. I don't know -- you might offer it  
 14 in the future is the only reason so I know what it  
 15 is since I don't have a copy of it.  
 16 MR. WIECZOREK: I apologize for  
 17 that.  
 18 MR. SMITH: At this point,  
 19 Mr. Chairman, is it the pleasure of the Commission  
 20 to take a break right now?  
 21 CHAIRMAN SAHR: Yeah. I think it's  
 22 a good time to take a lunch break. Should we say  
 23 1:30? Does that work for people?  
 24 MR. SMITH: And then for the  
 25 purposes, I think, of witness planning -- and maybe

1 MR. SMITH: Chairman Sahr.  
 2 CHAIRMAN SAHR: I do have another  
 3 question based on a response to I think it was  
 4 either -- I think it was a question asked by  
 5 Ms. Rogers.  
 6 You talked about the comparison of the SDN and  
 7 Qwest systems and please -- you know, I'm going to  
 8 try to paraphrase your comment and not have to go  
 9 back in the record, but basically you said there  
 10 was some advantages to SDN I think in terms of  
 11 reliability and so on and so forth.  
 12 THE WITNESS: Yes.  
 13 CHAIRMAN SAHR: How did the costs  
 14 compare between SDN and Qwest systems?  
 15 THE WITNESS: I can't answer that.  
 16 We use SDN's system. I cannot make a comparison to  
 17 Qwest.  
 18 CHAIRMAN SAHR: Thank you. And I  
 19 may ask that question of Mr. DeWitte and see if he  
 20 knows anything about the comparison of the costs.  
 21 So thank you.  
 22 MR. SMITH: Further questions?  
 23 MS. POLLMAN ROGERS: No. I have  
 24 nothing further. Thank you.  
 25 MR. SMITH: You're excused,

1 attorneys as well, who do the Petitioners intend to  
 2 call right after lunch? We'll go off the record,  
 3 Cheri. We're in recess until 1:30.  
 4 (A lunch recess is taken)  
 5 MR. SMITH: We'll go on the record.  
 6 We're back in session after our noon recess, and  
 7 per agreement with the parties, the next witness to  
 8 be called, as I understand it, will be Mr. DeWitte.  
 9 MS. SISK: Correct.  
 10 MR. SMITH: To conclude his  
 11 testimony with respect to the Dockets that have  
 12 been scheduled through today with the exception of  
 13 James Valley which we are continuing.  
 14 MS. POLLMAN ROGERS: Santel.  
 15 MR. SMITH: And Santel but that was  
 16 not scheduled until July 1.  
 17 MS. SISK: Correct.  
 18 MR. SMITH: With that, Ms. Sisk  
 19 please proceed.  
 20 MS. SISK: Mr. DeWitte.  
 21 MR. SMITH: You're sworn.  
 22 DIRECT EXAMINATION  
 23 BY MS. SISK:  
 24 Q You're the same Mr. DeWitte that testified previously.  
 25 Can you please state your name and address for the

1 record again?  
 2 **A** John Michael DeWitte, 1801 North Main Street, Mitchell,  
 3 South Dakota.  
 4 **Q** Mr. DeWitte, I'm going to ask you to take a look at  
 5 Brookings Exhibit 3, which is your direct prefiled  
 6 testimony; Venture Exhibit 3, also your direct prefiled  
 7 testimony; West River Exhibit 3, direct prefiled  
 8 testimony; Stockholm Exhibit 3, direct prefiled  
 9 testimony; and previously ITC Exhibit 4, prefiled  
 10 rebuttal testimony, Mr. DeWitte, has been admitted into  
 11 evidence but I'm going to ask you to take a look at  
 12 that as well.  
 13 Did you prepare all of those documents?  
 14 **A** Yes, I did.  
 15 **Q** And do you have any additions or corrections to those  
 16 documents?  
 17 **A** Yes, I do. Let me just quick thumb through these.  
 18 **Q** Before you do that --  
 19 **A** Yes.  
 20 **Q** When we discussed ITC Exhibit 4, the rebuttal, there  
 21 were some corrections on the cost exhibit that we  
 22 discussed with the Commission; is that correct?  
 23 **A** Yes.  
 24 **Q** And at that time you indicated you would provide a  
 25 revised copy of that exhibit?

1 **A** Yes.  
 2 **Q** Do you have that with you today?  
 3 **A** Yes, I do. There was also one addition or adjustment I  
 4 needed to make --  
 5 **Q** One moment. If we could hand that out before you  
 6 discuss it.  
 7 **A** Okay.  
 8 (Discussion off the record)  
 9 **Q** Mr. DeWitte, did you have some additional corrections  
 10 on the exhibit that was just handed out or the chart  
 11 that was just handed out?  
 12 **A** Yes.  
 13 **Q** Can you please explain those.  
 14 **A** The first revision is a result of yesterday's testimony  
 15 when I inadvertently had a math error in one of my  
 16 Excel cells that created this spreadsheet. And so  
 17 therefore if you look at the column Interstate,  
 18 wireless carrier's point of interconnection, POI,  
 19 nonrecurring transport costs, I've corrected that value  
 20 to read 576,000 as opposed to the 720,000 that was  
 21 inadvertently calculated and submitted with the  
 22 exhibit. That number, of course, flows down and is  
 23 used until the calculation in several other cells so  
 24 the cells that use that number in its calculations also  
 25 have changed.

1 Do you want me to go through all of the  
 2 cells?  
 3 MS. SISAK: If the Commission would  
 4 like Mr. DeWitte to go through all the cells, he  
 5 can.  
 6 **A** The only thing that is really relevant is it does  
 7 change the LNP cost-per-line calculations to 55 cents  
 8 without transport and \$12.35 with transport. And of  
 9 course if you take both of those times 12 percent you  
 10 get the numbers that are right next to it, 61 and 13.83  
 11 in the next column.  
 12 I made that change on all three of my  
 13 exhibits, which is 3A, 3B, and 3C. It was the same  
 14 change. And that was the change that we had talked  
 15 about yesterday.  
 16 The other adjustment that I have made that  
 17 was an inadvertent calculation -- or actually I plugged  
 18 in the wrong number, covers Venture Communications. If  
 19 you look at the top number where the column reading is  
 20 LNP software features, I've reduced the effect of -- or  
 21 the calculation for the amount of dollars that are  
 22 required to upgrade Venture's switching network by  
 23 3,200 lines times \$4. And the reason that change was  
 24 made was because I had forgotten to delete the  
 25 associated access lines associated with the Sisseton

1 switch which is already paid for and activated the LNP  
 2 software feature.  
 3 MR. GERDES: So which figure  
 4 changed on the exhibit?  
 5 THE WITNESS: The one that reads  
 6 55.90 has changed.  
 7 MR. GERDES: Thank you.  
 8 THE WITNESS: 55,900.  
 9 MR. SMITH: The one that was 68,7.  
 10 MR. WIECZOREK: The LNP software  
 11 feature.  
 12 THE WITNESS: Yeah. I reduced that  
 13 by the number of lines in Sisseton. Sisseton  
 14 already has it activated. That concludes my  
 15 changes.  
 16 **Q** Do you have any additions or corrections to all of the  
 17 Exhibit 3s before you or any of the Exhibit No. 3s  
 18 before you?  
 19 **A** I guess that since the updates that I have made to  
 20 Venture's are in this exhibit, I could make the same  
 21 adjustment on Venture's numbers in their cost exhibit,  
 22 you know, as part of my direct because that's where I  
 23 pulled these numbers from.  
 24 So I guess I would also make that same  
 25 adjustment, you know, reducing the number on that cost

1 exhibit --

2 MR. WIECZOREK: Commission, may I

3 simply suggest, I believe he's testified in his

4 original direct that his 3A is his most accurate

5 numbers and rather than go through and adjust every

6 one, to the extent it differentiates between what

7 he's submitted, 3A overrules the earlier versions.

8 MR. SMITH: Ms. Sisak.

9 MS. SISK: That's fine.

10 Q Do you have any corrections to your Exhibit 3 other

11 than your cost exhibit?

12 A No.

13 Q And if I were to ask you the questions that appear in

14 each one of the Exhibit 3s that you've put before you,

15 the same questions today, would your answers be the

16 same?

17 A Yes, they would.

18 MR. SMITH: May I ask one other

19 probably dumb question before we move along? I

20 thought Rolayne Wiest had another number issue.

21 MS. WIEST: Yes. Has that been

22 changed?

23 THE WITNESS: Yeah. That number was

24 actually correct on the exhibit but it was not --

25 MS. WIEST: It was the other way

1 around.

2 MR. SMITH: It was the other way

3 around.

4 MS. WIEST: We're talking

5 administrative on the Interstate. In the testimony

6 he said it was 5,000, on the exhibit he said it was

7 8,000, and then yesterday he said it was supposed

8 to be 5,000 but actually it is supposed to be

9 8,000?

10 Yesterday when I asked you, you said the

11 correct number was 5,000, not 8,000, and that you

12 would correct that and run it through.

13 THE WITNESS: On this one, I forgot

14 to make that update. I could redo that and

15 resubmit it, I guess.

16 MS. WIEST: So it is supposed to be

17 5,000?

18 THE WITNESS: Let me look quick.

19 MR. SMITH: Which company was that

20 again?

21 MS. WIEST: That's ITC. That's my

22 recollection.

23 THE WITNESS: Yeah. I believe your

24 recollection is correct.

25 Yes. It should have been 5,000. So I will

1 need to make that additional correction as well.

2 MR. SMITH: Either that or if you

3 want to -- or that will have drop-down effects,

4 though, won't it?

5 THE WITNESS: Yep.

6 MR. SMITH: Okay. I'm sorry.

7 THE WITNESS: Okay.

8 Q Can you please summarize briefly your testimony in the

9 Exhibit 3, 3s?

10 MR. WIECZOREK: I'm going to

11 interpose an objection to a summary at this time.

12 He summarized the basic framework of his testimony

13 already yesterday. The only really issues left are

14 the specific numbers as to the companies that he

15 hasn't already -- to the testimony.

16 MR. SMITH: Is that what you're

17 asking him? This is going to be limited to the

18 company -- because Exhibit 3 are the

19 company-specific documents.

20 MS. SISK: I would limit the

21 summary to any new information in any of the

22 Exhibits 3 as it relates to a specific company. I

23 am not certain that the only change between the

24 exhibits is, in fact, the cost exhibits. I believe

25 there are, in fact, some additional changes in the

1 written testimony aspect as well that Mr. DeWitte

2 may feel the need to summarize.

3 MR. WIECZOREK: I guess if he's

4 changing some of his prefiled testimony, maybe we

5 should do that through additions and amendments.

6 MS. SISK: I'm not suggesting that

7 he's changing it.

8 MR. SMITH: If I understand it, what

9 he's going to summarize --

10 MS. SISK: Is anything new? Not

11 new as a result of a change but different language

12 that did not appear in the ITC direct.

13 MR. SMITH: I'm going to overrule

14 the objection and allow you to proceed. However,

15 we don't want to replot general testimony. So keep

16 it specific to what's different about these

17 particular exhibits.

18 Q And if I may, I will ask you to only provide a summary

19 of any company-specific points that you think are

20 important to raise at this time.

21 A Okay. I guess to summarize, we did spend a great deal

22 of time yesterday talking about the basic framework

23 and, you know, how all the cost exhibits were put

24 together. And I guess the important things that I do

25 want to point out with this testimony is that, you

1 know, the numbers are based on contracts and things  
2 that we absolutely know will work. There's a  
3 reciprocal compensation agreement that talks about, you  
4 know, where points --

5 MR. WIECZOREK: I'm going to object.  
6 This is exactly what he talked about yesterday. He  
7 has nothing to do with specific company numbers.

8 MR. SMITH: Yeah. We're going to  
9 keep it -- maybe you don't need to make a summary  
10 if you feel that we can move on to the  
11 cross-examination that's specific to the companies.  
12 But anything that you want to say that's specific  
13 to the companies we're talking about today, which  
14 is Brookings, Venture, West River, and Stockholm.

15 A Yeah. The only other thing that I would add to that is  
16 the methodology that I used for all of the companies is  
17 the same with all of those exhibits in terms of the  
18 cost elements.

19 MS. SISAK: I'd like to offer  
20 Brookings Exhibit 3, Venture Exhibit 3, Stockholm  
21 Exhibit 3, and West River Exhibit 3 into evidence.

22 MR. WIECZOREK: I have no objections  
23 to those exhibits.

24 MR. GERDES: No objection.

25 MS. WIEST: No objections.

1 MR. SMITH: Brookings 3, Stockholm  
2 3, Venture 3, and West River 3 are admitted.

3 MS. SISAK: The witness is ready  
4 for cross-examination.

5 MR. COIT: No questions here.

6 CROSS-EXAMINATION

7 BY MR. WIECZOREK:

8 Q As I understand it, the revised spreadsheet that you  
9 just handed out still needs more changes on it;  
10 correct?

11 A There's one additional change.

12 Q You still have the spreadsheet in front of you, please,  
13 or do you?

14 A The new revised one?

15 Q The new revised one. You can work off of that.

16 A Okay.

17 Q Look at your new revised spreadsheet.

18 A Okay.

19 Q Let's talk about specific numbers as to Venture.

20 A Okay.

21 Q As to Venture, they have 27 exchanges; is that correct?

22 A I believe that is correct.

23 Q And you assumed five cell carriers who would each need  
24 a point of interconnect to every one of those  
25 exchanges; correct?

1 A That is correct.

2 Q And you assumed or actually I believe you even got an  
3 estimate that each one of those points of interconnects  
4 would cost approximately \$4,000 per exchange? Page 13  
5 of your direct in Venture, if you want to double-check.

6 A I believe I revised those transport numbers on my  
7 rebuttal.

8 Q I'm talking about the -- you're talking about the  
9 install number?

10 A The recurring charge.

11 Q I'm talking about the install number, \$4,000.

12 A I'm sorry.

13 Q Is that \$4,000 install cost correct?

14 A That is correct.

15 Q Okay. I said to you before you came up to the stand  
16 whether you were going to bring a calculator this time?

17 A I forgot it. Let me go grab it.

18 (Discussion off the record)

19 Q Do you have your calculator?

20 A I have my calculator.

21 Q Take your 27 exchanges times 5 --

22 MS. SISAK: I'd like to object to  
23 this. I believe the purpose of cross-examination  
24 is to ask questions, not to have the witness  
25 conduct mathematical calculations. If there's a

1 question, please ask it.

2 MR. WIECZOREK: All right.

3 Q You messed up your install costs for Venture just like  
4 you messed up your number for Interstate. Why don't  
5 you check that and see.

6 A Okay.

7 (Witness examines document)

8 MS. POLLMAN ROGERS: Could we have a  
9 point of clarification here. I was of the  
10 impression that Mr. Houdek testified to 26  
11 exchanges, and as I count the number -- I thought  
12 that's what he said in response to Ms. Wiest's  
13 testimony.

14 MR. WIECZOREK: I'll use 26 in the  
15 calculation. That would be fine.

16 CHAIRMAN SAHR: And I have 26 down  
17 in my notes too.

18 MS. POLLMAN ROGERS: That's the  
19 number that's in his testimony.

20 (Witness makes calculation)

21 A I believe that number 2 should be 532.50.

22 Q Using 27 for number of exchanges? Before you rewrite  
23 it again and change your exhibit yet again, how many  
24 exchanges did you use --

25 CHAIRMAN SAHR: Excuse me. And I

467

1 apologize for interrupting. Could we go off the  
 2 record.  
 3 (Discussion off the record)  
 4 MR. SMITH: Please proceed.  
 5 **Q** Have you recalculated what the true install transport  
 6 cost is for Venture under your model?  
 7 **A** Yes, I have.  
 8 **Q** What's that number?  
 9 **A** That number is 500,000, which is the result of the  
 10 calculation of 5 CMRS carriers times 25 exchanges times  
 11 4,000.  
 12 **Q** Okay. That's \$125,000 less than what you have in your  
 13 Exhibit 3A; correct?  
 14 **A** Yes, it is. And I apologize for the math error.  
 15 **Q** And those were the numbers being relied on by  
 16 Mr. Houdek when he testified, the incorrect numbers?  
 17 **A** Yes.  
 18 **Q** You may also recall there was a number of witnesses  
 19 that deferred things to you this morning. Do you  
 20 recall that?  
 21 **A** Yes.  
 22 **Q** Let me just ask a couple of those questions so we get  
 23 those out of the way. You've already responded to the  
 24 fact that the Sisseton exchange is LNP compliant  
 25 already?

468

1 **A** I stipulated that the Sisseton exchange has the  
 2 software features activated. That does not mean that  
 3 it's LNP compliant or completely ready to go.  
 4 **Q** All right. Thank you.  
 5 **A** Okay.  
 6 **Q** Then there was a deferral from Stockholm as to how  
 7 Stockholm's handling ports given its EAS into Watertown  
 8 and she deferred that to you. Can you explain how  
 9 Stockholm's handling those ports?  
 10 **A** They don't have any ports right now. I'm not following  
 11 your question.  
 12 **Q** There's been no ports in Watertown in that EAS system?  
 13 There's a routing issue if there's a ported call come  
 14 in under that EAS, isn't there?  
 15 **A** I don't believe that they've run into any problems at  
 16 this point. I'm not aware of any.  
 17 **Q** Okay.  
 18 **A** But their traffic is currently being routed based on  
 19 the translations that are there today.  
 20 **Q** And I forgot and I apologize for making you jump back.  
 21 3A, that new \$500,000 number that we've come up with,  
 22 that's still under your theory where you would have  
 23 five cell companies having the point of interconnection  
 24 into every exchange on Venture; correct?  
 25 **A** It would be five CMRS carriers, not necessarily cell

469

1 companies, but yes.  
 2 **Q** And those numbers assume -- those numbers -- that  
 3 \$500,000 includes point of interconnections with Nextel  
 4 and Sprint PCS; correct?  
 5 **A** I'll have to check for sure, but I believe that is  
 6 correct.  
 7 **Q** Okay. There was cross-examination by Ms. Rogers where  
 8 she was asking some of the corporate witnesses whether  
 9 they knew -- whether Mr. Williams used the same number  
 10 of CMRS providers that you did in your number analysis.  
 11 Do you recall those --  
 12 MS. POLLMAN ROGERS: Excuse me.  
 13 MR. WIECZOREK: Examination, I'm  
 14 sorry, redirect.  
 15 **Q** Do you recall those questions?  
 16 **A** I recall there were questions about those. I don't  
 17 recall the answers verbatim, but continue.  
 18 **Q** You reviewed Mr. Williams' testimony that's been  
 19 prefiled in this case; correct?  
 20 **A** Yes, I have.  
 21 **Q** And I'm going to show you what has been marked as  
 22 Western Wireless Exhibit 1, just for your ease. When  
 23 you reviewed that testimony you reviewed his  
 24 spreadsheet; correct?  
 25 **A** Correct.

470

1 **Q** And I am showing that spreadsheet to you right now  
 2 which is marked 5B to Western Wireless Exhibit 1?  
 3 **A** Correct.  
 4 **Q** When Mr. Williams did his calculations based on the  
 5 Western Wireless proposal for Venture, what did he come  
 6 up with for cost of point of interconnection?  
 7 MS. SISAK: I'm not sure if that's  
 8 an objection or a clarification but you're saying  
 9 that -- what proposal are we referring to?  
 10 MR. WIECZOREK: I said when  
 11 Mr. Williams did his proposal of the cost for  
 12 Western Wireless.  
 13 MS. SISAK: You're talking about the  
 14 Qwest tandem proposal?  
 15 MR. WIECZOREK: Yeah. The proposal  
 16 that's contained in Mr. Williams' testimony for his  
 17 cost analysis.  
 18 **Q** What did he come up with for an install cost?  
 19 **A** For which company, please?  
 20 **Q** Venture.  
 21 **A** He had \$800 nonrecurring, 118 recurring.  
 22 **Q** How about for West River?  
 23 **A** For West River Mr. Williams had \$400 nonrecurring, \$59  
 24 recurring.  
 25 **Q** How about Swiftel?

1 A Mr. Williams had \$400 nonrecurring, 118 recurring.  
 2 Q And Stockholm?  
 3 A \$400 nonrecurring, \$500 recurring.  
 4 Q Now even assuming Mr. Williams used all the same number  
 5 of CMRS providers that you did in your cost  
 6 calculations -- and I'll let him testify to that when  
 7 he's on the stand, you would agree with me that his  
 8 cost calculations are substantially lower for transport  
 9 both recurring and install than what you've come up  
 10 with; correct?  
 11 A I would agree they are lower. However, I don't know  
 12 what the basis is that he used to derive those, and I  
 13 can certainly explain the basis in which I used to  
 14 derive my numbers.  
 15 Q Did the basis of your numbers -- because I don't want  
 16 to rehash this, we went through the whole thing. But  
 17 to clarify it, you used the same mythology (sic) to  
 18 come up with the numbers for every one of these  
 19 companies; correct?  
 20 A Correct.  
 21 MR. GERDES: Are those old numbers,  
 22 Counsel?  
 23 MR. WIECZOREK: Well --  
 24 MS. SISK: I believe the question  
 25 was you used the same mythology to calculate your

1 numbers.  
 2 A I understood it to be methodology.  
 3 Q It could be interchangeable in this case maybe.  
 4 A I really resent that implication.  
 5 MR. WIECZOREK: That's all I have.  
 6 MR. GERDES: I have no questions.  
 7 MR. SMITH: Ms. Wiest.  
 8 MS. WIEST: Sure.  
 9 CROSS-EXAMINATION  
 10 BY MS. WIEST:  
 11 Q Okay. Going back to Swiftel or Brookings -- I'm sorry.  
 12 Going back to Swiftel, I believe it was the testimony  
 13 that they have one direct connection with Sprint PCS.  
 14 Do you remember that?  
 15 A Whose testimony?  
 16 Q The manager. I can't remember his name. Adkins.  
 17 A I was not here for Mr. Adkins' testimony.  
 18 Q Did you read his testimony?  
 19 A I read it a while ago. I can certainly review it  
 20 quick.  
 21 Q It is in his testimony that there's one direct  
 22 connection. And this is similar to the question I  
 23 asked before about Interstate which had four direct  
 24 connections. And my point is is shouldn't that  
 25 connection be subtracted from your number of \$20,000?

1 Isn't that one less connection that would have to be  
 2 done? I'm sorry. I'm talking about your  
 3 transport-related costs for POIs.  
 4 A Right. And I believe that I would have to check with  
 5 Mr. Adkins on that, but my recollection was when I was  
 6 putting those numbers together that, you know, they had  
 7 some sort of indirect connection, but, yeah, I believe  
 8 the answer to -- you know, that you're looking for is  
 9 if, in fact, they do have a direct connection between  
 10 their PCS switch and their switch that's located in  
 11 Brookings for their wireline services, then, yes, we  
 12 could subtract one DS-1 from those numbers.  
 13 Q Thank you.  
 14 A But my recollection is is that they don't have a direct  
 15 connection there today. But I'd have to check that.  
 16 Q Can you go to your direct testimony in that case? That  
 17 would be in the Swiftel Brookings case.  
 18 A I have a copy.  
 19 Q Go to page 11, line 2.  
 20 A 11, line?  
 21 Q 2.  
 22 A I am there.  
 23 Q Oh, okay. On that line you talk about the recurring  
 24 administrative costs for -- for the administrative  
 25 costs and you state you base that on \$25 per port and I

1 believe the others were based on an hourly rate. Could  
 2 you tell me the difference in those calculations, why  
 3 you did a different calculation?  
 4 A Certainly. Let me look quick.  
 5 (Witness examines documents)  
 6 A I believe there's a typographical error in my actual  
 7 direct testimony.  
 8 Q Okay.  
 9 A Because the formula that's been used consistently  
 10 throughout all of the exhibits is calculated at  
 11 \$1.25 -- sorry. 1.25 hours per port at \$40 per hour.  
 12 And I believe that will give you -- when you do that  
 13 mathematical calculation of 1.25 times 4 times 40, that  
 14 calculates out to \$200.  
 15 Q Well, I thought you said that ITC, when you corrected  
 16 that testimony that was two and a half hours?  
 17 A That is correct. In conversations with Mr. Adkins he  
 18 felt like they could do it in a shorter amount of time.  
 19 Q Okay.  
 20 A That time was reflected in that calculation.  
 21 Q And then in Mr. Adkins' testimony he referenced 14,150  
 22 access lines. You reference 14,057. Is that just a  
 23 timing difference?  
 24 A I believe that could be a timing difference. I believe  
 25 the number that -- or the 14,057 number may be an

1 annual average. But that's the -- you know, when we  
 2 were talking about the current number of access lines  
 3 that we needed to use, that is what number we had. I  
 4 can tell you for sure here quick.  
 5 (Witness examines documents)  
 6 A I thought they'd referenced that in my direct but  
 7 apparently not.  
 8 Q Okay.  
 9 A The 14,057 is a number that I did receive from Swiftel.  
 10 Q Let's just go on to Venture. I have a couple of  
 11 questions there. I believe there Houdek testified this  
 12 morning that he has four direct connections with two  
 13 different wireless carriers.  
 14 Did you subtract for those in your transport  
 15 costs for direct points of interconnection?  
 16 A No, I did not. If those were there, we can subtract  
 17 four of those off. Incidentally, do you want me to  
 18 subtract those off for the revised exhibits?  
 19 Q Sure. And that would be for ITC too.  
 20 A Right.  
 21 Q If you would just go to your direct testimony in 060.  
 22 A Okay.  
 23 Q Could you go to page 7, line 19. The heading under  
 24 technical implementation and testing.  
 25 A Uh-huh.

1 Q At the very bottom there, could you explain each  
 2 appropriate exchange? Is that a particular number? We  
 3 couldn't figure out that number, how you came up with  
 4 72,500.  
 5 MS. SISAK: I'm sorry. I missed the  
 6 question. What number are we looking at?  
 7 MS. WIEST: We're looking at  
 8 technical implementation and testing, and the  
 9 number that he comes up with based on the  
 10 calculation if you look at Exhibit 3A, 72,500.  
 11 A That number is calculated at -- you know, on a  
 12 per-exchange basis, we had estimated that in looking at  
 13 all the different variations that were there, it would  
 14 be 24 hours per exchange. And we figured that there  
 15 would be a third-party resource doing it so it should  
 16 have included plus expenses in there because it rounds  
 17 out to be 24 hours at \$100 times 25 exchanges. And  
 18 then, of course, for each exchange there's  
 19 approximately \$500 worth of expenses in there. But it  
 20 also works out if you take 2,900 times 25.  
 21 Q Okay. Thank you.  
 22 A But that's the basis for where that was coming from.  
 23 MS. WIEST: That's all I have.  
 24 Thanks.  
 25 MR. SMITH: Commissioners?

1 Questions?  
 2 CHAIRMAN SAHR: Mr. DeWitte, I'm  
 3 going to apologize if you've been asked this  
 4 question before. Did you analyze any other options  
 5 other than the ones that's been proposed in the  
 6 cost materials as far as ways to address the LNP  
 7 implementation?  
 8 THE WITNESS: Analyze in terms of  
 9 tried to calculate costs or analyze in terms of  
 10 coming up with alternative network configuration  
 11 solutions, et cetera?  
 12 CHAIRMAN SAHR: The second one.  
 13 THE WITNESS: Yeah. Actually we  
 14 talked about several different possible  
 15 configurations that could potentially work in this  
 16 case. You know, there are literally, you know,  
 17 thousands upon thousands of possible alternatives.  
 18 Some of them, you know, could even stretch the  
 19 realm of, you know, using packet switching, for  
 20 instance, or the packet network.  
 21 However, what we kept coming back to was the  
 22 simple fact that with everything that we needed to  
 23 make this thing work, we had to use the tools that  
 24 were at our disposal with the networks that were at  
 25 our disposal with the agreements that were at our

1 disposal and come up with something that we could  
 2 present to this Commission that we absolutely knew  
 3 was rock solid and would absolutely work.  
 4 And, you know, our point as we've been going  
 5 through this whole thing; you know, I'm not denying  
 6 that there's other options. And I'm not denying  
 7 that transport's a huge part of what it is that  
 8 we're looking at.  
 9 But the bottom line is if we consider, for  
 10 instance, a packet solution we don't know whether  
 11 all the carriers would, A, be interested in packet  
 12 solution or, B, whether they have anything that  
 13 could even connect to a packet network.  
 14 There are no tariffed rates. Even the  
 15 Petitioners don't have switching rates or  
 16 transiting rates or anything like that for packet  
 17 traffic. You know, plus there's all the protocol  
 18 issues. But, you know, is it a viable option? You  
 19 bet it is. Everything's going to packet.  
 20 Similarly, you know, there was some talk about  
 21 perhaps using SDN. You know, absolutely a viable  
 22 option. The problem is is that there's no  
 23 agreements, there's no rates. You know, none of  
 24 those things have been developed so we didn't want  
 25 to present an option that, you know, clearly was

479

1 not supportable costwise because of the missing  
 2 agreements or, you know, the missing pieces of  
 3 information that were needed to make it work.  
 4 So what we came up with was, you know, we took  
 5 a look at the reciprocal compensation agreement  
 6 that had been signed by Western Wireless and  
 7 assumed with an agreement like that in place with  
 8 every other wireless carrier we could use that as  
 9 our basis. And the basis of that agreement, if I  
 10 can paraphrase, is that if wireless traffic is  
 11 being -- I don't want to get this wrong. Anyway,  
 12 there's a paragraph in there and it talks about the  
 13 different types of connections, either a type 2-A  
 14 or a type 2-B, a type 2-A being a tandem  
 15 connection, type 2-B being direct connection. If  
 16 we assume type 2-B connections, the paragraph in  
 17 that reciprocal compensation agreement says that  
 18 that carrier will have an access in each local  
 19 calling area.  
 20 If we assume at some point in the next five  
 21 years the FCC is able to resolve some of the rate  
 22 center issues and make the reciprocal, meaning  
 23 wireless-to-wireline porting, possible, one of the  
 24 effects of that will be that number pooling will  
 25 probably be implemented. But the bottom line is

480

1 that most carriers will more than likely have to  
 2 duplicate their point of presence in every rate  
 3 center, which is typically an exchange and you'd  
 4 have to have some sort of point of interconnection  
 5 in that rate center.  
 6 So for our initial costs based on the  
 7 reciprocal compensation agreement that's already  
 8 there plus, you know, the assumptions on, you know,  
 9 parity being -- you know, the FCC ruling that -- in  
 10 intermodal LNP that parity will eventually be there  
 11 meaning it can go both ways we'll have to have some  
 12 interconnection in each exchange.  
 13 So what we did was take a look at the cost to  
 14 put a DS-1 in every exchange and transport back  
 15 somewhere. I guess, you know, one of the things  
 16 that I think there's been a perception of, when the  
 17 BFRs came out, you know, I don't think that anybody  
 18 has denied that at the bottom of the letter, you  
 19 know, it probably said, yeah, if you have any  
 20 questions give me a call, depending on which  
 21 business writing style book that whoever was  
 22 drafting the letter came up with --  
 23 MR. WIECZOREK: I'm going to object  
 24 at this point. He's getting to his summary of the  
 25 testimony.

481

1 MR. SMITH: I think we're back to  
 2 yesterday here. I don't want to --  
 3 THE WITNESS: Yeah. The only thing  
 4 that I wanted to belabor on that point --  
 5 MR. WIECZOREK: I'm going to object  
 6 because I don't necessarily want to open up all of  
 7 yesterday again, go back through that.  
 8 MS. SISAK: We would just request a  
 9 ruling on the objection.  
 10 MR. SMITH: The objection is  
 11 sustained, and, of course, the Chairman is the  
 12 Chairman and he's my boss so I'll let him make the  
 13 final decision.  
 14 THE WITNESS: I won't go into any of  
 15 that stuff other than to say yes, we talked about  
 16 other options. Those options did not appear to fit  
 17 into the framework, thus we chose what we chose.  
 18 CHAIRMAN SAHR: So packet was one,  
 19 you mentioned using SDN, DS-1s. Are those kind of  
 20 the main options that you looked at using?  
 21 THE WITNESS: Yes. We did not get  
 22 to the point of actually trying to cost anything  
 23 out or, you know, get any agreements in place --  
 24 CHAIRMAN SAHR: Thank you. That was  
 25 my next question was asking about cost. With the

482

1 possibility of comparing SDN and Qwest, any  
 2 thoughts on that as far as the ability of one  
 3 versus the other?  
 4 THE WITNESS: I think on the surface  
 5 it would appear to be a reasonable comparison, but  
 6 I do think that it's very much not a trivial  
 7 analysis. You know, each company's cost -- you  
 8 know, the cost elements that go into their cost  
 9 study, their separations factors, all of those  
 10 regulatory things that go into developing what  
 11 their rate of return and their revenue requirements  
 12 need to be are all completely different.  
 13 So, you know, anything that involves looking  
 14 at the use of, you know, Qwest -- and you have to  
 15 take all of those underlying factors into account  
 16 to see what it is actually going to do to, you  
 17 know, their settlements, their revenues, all of  
 18 those types of things.  
 19 So, you know, just looking at, you know, one  
 20 piece of that cost and holding that up and saying,  
 21 see, it's cheaper does not paint an accurate  
 22 picture of what the total effect on the company  
 23 would be.  
 24 CHAIRMAN SAHR: And then this next  
 25 question might be a little bit outside the scope of

1 your expertise so I'll ask you a leading question.  
 2 Are you familiar with the guidelines for how the --  
 3 how providers can implement -- let me rephrase  
 4 that.  
 5 Are you familiar with the guidelines on how  
 6 commissions can implement any costs or the  
 7 providers can implement costs relating to LNP? Or  
 8 are you strictly someone who looks at the system's  
 9 questions and runs the cost numbers?  
 10 THE WITNESS: Are you asking me  
 11 whether I know how to calculate the end-user fee?  
 12 CHAIRMAN SAHR: Well, really what I  
 13 was asking was one of the issues that's come up was  
 14 the number of carriers.  
 15 THE WITNESS: Uh-huh.  
 16 CHAIRMAN SAHR: I was curious if you  
 17 know whether it would be possible or not for some  
 18 type of -- I won't say sliding scale but some type  
 19 of LNP, should I say, charge -- surcharge  
 20 methodology where you could look and take that into  
 21 consideration because it seems like there are some  
 22 costs within your study that -- and models that  
 23 vary considerably based on the number of providers.  
 24 Here we are in many of the markets with maybe one  
 25 provider request again at this point in time and

1 maybe two, three, or four somewhere on the horizon?  
 2 Do you know is there any flexibility on that?  
 3 THE WITNESS: If I understand your  
 4 question correctly, if I boil it down, is it  
 5 possible to create an end-user charge that ratchets  
 6 up every time you have another carrier that you  
 7 have to interface with and then you can include  
 8 those charges? Is that a fair summary?  
 9 CHAIRMAN SAHR: I think that's fair.  
 10 THE WITNESS: And the answer to that  
 11 is I have absolutely no idea. I don't have the  
 12 level of detail -- or the level of knowledge on  
 13 exactly what the NECA rules are on that  
 14 calculation.  
 15 My understanding is that once you create that  
 16 charge that's what it is unless -- you know, I know  
 17 that, for instance, Bell South, I read somewhere  
 18 where they were able to adjust and continue theirs  
 19 longer than the first five years in which they  
 20 placed it on bills, largely because there was still  
 21 some turmoil in the industry from when  
 22 wireline-to-wireline porting started and continuing  
 23 through intermodal. So, you know, it was kind of a  
 24 special circumstance.  
 25 But my understanding is once you set it you

1 can't revise it. But I may be wrong.  
 2 CHAIRMAN SAHR: Thank you.  
 3 MR. SMITH: I have one, I think,  
 4 question related to all of these companies. And it  
 5 relates to yesterday when I asked you about that  
 6 chart up there. And instead of looking at that  
 7 particular solution, looking at that chart as a way  
 8 of visualizing how the James Valley proposed  
 9 solution would work.  
 10 And I guess the question I have is, is there  
 11 anything with respect to the -- what is it, four --  
 12 four companies that we are talking about right now  
 13 that would preclude a similar solution with respect  
 14 to these particular companies? Is there anything  
 15 different about the architecture or anything  
 16 compared with James Valley which would preclude a  
 17 answer like was found for James Valley?  
 18 THE WITNESS: The answer to that  
 19 question is it depends. Let me take them  
 20 individually. And I'll be very brief and short.  
 21 But in Swiftel's case they have one exchange with  
 22 one rate center. The James Valley solution would  
 23 absolutely work into their network. I think a lot  
 24 of the discussion there would, you know, depend on  
 25 if transport's taken out of the picture like it was

1 in James Valley, exactly, you know what is  
 2 Swiftel's position on the remaining, you know,  
 3 charges or once those are gone away is that  
 4 palatable to them or not. And I don't know the  
 5 answer to that question.  
 6 But from a technical standpoint the James  
 7 Valley solution truly would work in theirs and then  
 8 it becomes a question of whether Western Wireless  
 9 or any of the other carriers, you know, feel like  
 10 they can, you know, enter into such an agreement.  
 11 And that's an economic analysis that they, of  
 12 course, would have to perform.  
 13 If we move onto Interstate, ITC, that model --  
 14 MR. SMITH: I think we dealt with  
 15 that yesterday.  
 16 THE WITNESS: I'm sorry. I was just  
 17 going down the Order. The next one would be --  
 18 MR. SMITH: Stockholm.  
 19 THE WITNESS: Let's go with  
 20 Stockholm next. That same model would also work  
 21 there. However, like in James Valley's case we  
 22 would likely have to split the DS-1 into, you know,  
 23 discrete DSOs going to each of their calling areas.  
 24 But, yes, that model would work there.  
 25 In the case of West River, again, they have a

1 host remote architecture with their DMS-10  
2 depending on where the point of interconnection and  
3 all of those other items I mentioned earlier, how  
4 that would work. In that particular architecture  
5 we would have to look at how many local calling  
6 areas that they have in their network, split the  
7 DS-1 and go in there. But the short answer is,  
8 yes, that architecture would fit there.

9 MR. SMITH: Venture.

10 THE WITNESS: Then in Venture I  
11 think their architecture would be slightly  
12 different with respect to the fact that their  
13 network architecture has 16 I'll call it  
14 stand-alone central offices and the rest are either  
15 remotes or concentrators. So one of the things  
16 that, you know, we would have to look at -- and I  
17 confess, without looking at their network diagram  
18 I'm not exactly sure how many local calling areas  
19 there are.

20 But let's just say that for the purposes of  
21 our example that each of the exchanges is a local  
22 calling area so I can do the math easy. That gives  
23 us 25. There's only 24 DSOs in a DS-1. So even if  
24 we tried to put everything on one DS-1 we would not  
25 be able to do so. We'd have to go with two.

1 fact that the Iowa utilities board has given a  
2 blanket, you know, suspension to the carriers who  
3 were involved in what's referred to as the RETA and  
4 IUB combined petitions while they studied it  
5 further.

6 So most of them were looking at using INS --  
7 they were looking at using INS to at least purchase  
8 the transport where they would have to do these  
9 types of things. But the bottom line is, you know,  
10 that group of ILECs has a lot of the same concerns  
11 we've talked about before using Qwest as, you know,  
12 some of the companies in South Dakota. But that's  
13 Iowa.

14 And then in North Dakota the Commission up  
15 there -- I don't exactly know what the chapter and  
16 verse is but they quoted some state statute that  
17 basically said, you know, they don't have the  
18 authority to hear the case so they did not get  
19 suspensions. Those companies are all, you know,  
20 working to find, you know, some sort of transport  
21 solution as we speak.

22 And, you know, a lot of them are -- you know,  
23 could easily order this type of thing but, you  
24 know, they're looking at some other alternatives  
25 and, you know, to date there's been no demand for

1 MR. SMITH: Okay. At least with two  
2 DS-1s it could possibly work, even in Venture?

3 THE WITNESS: Right. That's just  
4 due to the number of exchanges they have. But  
5 obviously in all of those cases, you know, the  
6 transport, you know, would -- if we're emulating  
7 that model, you know, that transport would be --  
8 you know, the cost burden for that would fall back  
9 to the wireless carrier.

10 MR. SMITH: Thank you. Ms. Sisak.

11 COMMISSIONER BURG: I might follow  
12 up with just one quick, John. You work with other  
13 states as well; right?

14 THE WITNESS: Correct.

15 COMMISSIONER BURG: Have you worked  
16 this type of a configuration any place else?

17 MR. SMITH: Can I ask a clarifying?  
18 What type, Jim?

19 COMMISSIONER BURG: The type we're  
20 discussing, the option that Western's presented.

21 THE WITNESS: The answer to that is  
22 we have a lot of clients in the state of Iowa.  
23 Those clients were pursuing, you know, looking at  
24 options as well. We architected similar cost  
25 numbers for them. And you're probably aware of the

1 it and nobody's ported so, you know, they haven't  
2 actually placed any of the ASRs for any of the  
3 facilities at this point.

4 And that's similar to some of the other  
5 states.

6 MR. SMITH: Ms. Sisak.

7 REDIRECT EXAMINATION

8 BY MS. SISAK:

9 Q I think I might just have one question. You were  
10 comparing the costs between some of the Petitioners,  
11 some of the switch-related costs, the costs to upgrade  
12 their switches. Can you just explain the difference,  
13 for example, between Stockholm and maybe some of the  
14 other companies with respect to their switch-related  
15 costs?

16 And I think -- excuse me, the specific  
17 reference, I believe, was if a James Valley type  
18 proposal was adopted, would that be acceptable to some  
19 of the other carriers or would it be feasible for some  
20 of the other carriers and I believe you mentioned  
21 switch-related costs in reference to that answer.

22 A Yeah. My point if we take a look at the bottom line  
23 for Exhibit 3A and, you know, we look at the numbers  
24 that are LNP costs including or excluding transport, if  
25 we refer to the James Valley solution as solving the

1 transport issue by having the wireless carriers  
2 actually order and, you know, accept the burden for the  
3 cost of those transport facilities, you know, then the  
4 question becomes if we add all of the other costs  
5 together that, you know, we've talked about, you know,  
6 throughout these last few days and, you know, divide it  
7 by the number of access lines they have and, you know,  
8 perform our mathematics on them, then the question  
9 becomes in the case of Swiftel is 74 cents palatable as  
10 an end-user charge or potential end-user charge? I  
11 don't know the answer to that question for Swiftel.

12 In the case of Stockholm, even if transport  
13 is gone, it's pushing \$5 per line. Is that palatable  
14 for Stockholm? And I believe Marj testified this  
15 morning it's highly unlikely her subscriber base would  
16 be able --

17 MR. WIECZOREK: I'm going to object  
18 to this kind of testimony. He's not been proffered  
19 as a witness to the public interest portion of the  
20 test.

21 MR. SMITH: Could you just kind of  
22 confine it to the numbers? Because I think the  
23 other thing is you don't know what they think, you  
24 know. So just talk about the numbers.

25 A I guess the way that I wanted to end with that then is

1 if we have a solution like the James Valley solution  
2 that takes transport off the table in terms of a cost  
3 that the Petitioner would have to absorb, you know,  
4 then the question becomes is it economically feasible  
5 for them to implement the service given whatever, you  
6 know, their potential end-user charge may end up being.

7 And the answer for that is for each  
8 individual company, I don't know what neighborhood they  
9 want that to be in.

10 MS. SISAK: Nothing further.

11 MR. SMITH: Mr. Coit?

12 MR. COIT: No questions.

13 MR. WIECZOREK: I have a couple and  
14 they're more clarification.

15 RE-CROSS-EXAMINATION

16 BY MR. WIECZOREK:

17 Q I believe it was in response to Commissioner Burg's  
18 question. You said that you formulated some numbers  
19 similar to -- and you pointed, kind of gestured over to  
20 the poster boards, Western Wireless 5A and 5B. The  
21 implication was, as I understood the cost analysis you  
22 did for your Iowa clients, was based on routing similar  
23 to what's been proposed by Western Wireless here; is  
24 that correct?

25 A That's not correct. I was pointing to the bottom.

1 Q Okay. And then as to the North Dakota stuff not every  
2 ILEC in North Dakota is your client, are they?

3 A No.

4 Q So you can't testify as to intermodal porting has been  
5 taking place in those other LECs in North Dakota, can  
6 you?

7 A No. I can only speak to the ones that are North Dakota  
8 here, correct.

9 Q Okay. And it's my understanding that you're again  
10 going to modify your Exhibit 3A based on the mistake I  
11 found and based on the mistake Ms. Wiest found;  
12 correct?

13 A Yeah. There are two things that remain to be updated.  
14 One was an update from yesterday, and then we had the  
15 new update from today.

16 Q Well, I pointed out a problem and then I believe you  
17 conceded with Ms. Wiest that you would have to take off  
18 preexisting -- existing points of interconnect?

19 A Right. Right. Okay.

20 MR. WIECZOREK: I would just ask  
21 that he provide that update with written  
22 explanation of all the numbers he changed -- at  
23 least I'd ask two days before he testifies on  
24 behalf of Santel so if I have any questions I'd  
25 have a chance to review it and understand what he

1 did.

2 MR. SMITH: I think that sounds  
3 good. The one clarification I think is my  
4 recollection is with respect to Swiftel your belief  
5 was they did not have an existing --

6 THE WITNESS: Right. I will verify  
7 that and have the exhibit corrected accordingly.

8 MR. SMITH: Are we done? Ms. Wiest  
9 or Dave?

10 MS. WIEST: No.

11 MR. GERDES: No questions.

12 MR. SMITH: You're excused. Thank  
13 you.

14 THE WITNESS: Thank you.

15 (A short recess is taken)

16 MR. SMITH: We're reconvened.

17 Before we begin, Cheri brought to my attention that  
18 she has a scheduling -- she has a baby-sitter  
19 problem tonight and so we're going to have to knock  
20 off around 5:00 and, Mr. Coit, would you care to  
21 proceed with SDTA's case.

22 MR. COIT: Yes. SDTA along with the  
23 Petitioners at this time would call Mr. Steven  
24 Watkins.

25

1 STEVEN WATKINS,  
 2 called as a witness, being first duly sworn in the  
 3 above cause, testified under oath as follows:  
 4 DIRECT EXAMINATION  
 5 BY MR. COIT:  
 6 Q Mr. Watkins, could you please provide your full name  
 7 and address for the record.  
 8 A Steven E. Watkins. My business address is 2120 L  
 9 Street Northwest, Suite 520, Washington, D.C. 20037.  
 10 Q And are you providing testimony in these LNP petition  
 11 cases for both SDTA and also individually on behalf of  
 12 each of the Petitioners?  
 13 A Yes, I am.  
 14 Q Where are you currently employed?  
 15 A I am currently a single business person employed by  
 16 myself. I'm affiliated with a law firm in Washington,  
 17 D.C. that does work with small and rural telephone  
 18 companies.  
 19 Q Who is that law firm?  
 20 A Kraskin, Moorman & Cosson.  
 21 Q And you have provided I believe with your testimony an  
 22 attachment summary of your work experience and  
 23 education; is that correct?  
 24 A Yes.  
 25 Q Has that been filed with your direct testimony?

1 A Yes, it was.  
 2 Q You have in front of you a couple of documents. Could  
 3 you take a look at those, please. Could you identify  
 4 for the record each of those documents?  
 5 A Yes. SDTA 1 is my direct testimony filed in all of the  
 6 Dockets on May 14, and SDTA 2 is my rebuttal testimony  
 7 filed in the same proceedings on June 14.  
 8 Q The testimony that you prepared, do you have any  
 9 additions or corrections at this point in time that you  
 10 would like to make to either of those?  
 11 A No.  
 12 Q If I were to ask you the same questions that I  
 13 presented in each of those documents, would you provide  
 14 the same answers today that you provided when they were  
 15 filed?  
 16 A Yes.  
 17 MR. COIT: At this time I would  
 18 introduce both SDTA Exhibit 1, which is the direct  
 19 testimony, and also SDTA Exhibit 2, which is the  
 20 rebuttal.  
 21 MR. WIECZOREK: No objection.  
 22 MS. WIEST: No objection.  
 23 MR. GERDES: No objection.  
 24 MS. POLLMAN ROGERS: We do not  
 25 object.

1 MR. SMITH: I guess it's your own  
 2 witness. Pardon me. SDTA -- or exhibits SDTA 1  
 3 and SDTA 2 are admitted.  
 4 Q At this time could you just provide a brief summary of  
 5 what you've indicated in both the direct and rebuttal,  
 6 please.  
 7 A Yes. We're here to examine suspension of certain  
 8 interconnection requirements pursuant to 251(f)(2)  
 9 section of the Act. Under Section 251(f) Congress  
 10 provided broad protections to small and rural telephone  
 11 companies in the form of exemptions from the most  
 12 onerous interconnection requirements and the  
 13 opportunity to obtain suspensions and modifications of  
 14 others.  
 15 Since Congress passed this provision the  
 16 courts have confirmed and strengthened the intent that  
 17 Congress had with these provisions. Congress intended  
 18 that the interconnection requirements only be applied  
 19 to the small and rural telephone companies and  
 20 consequently impacting their rural customers in a  
 21 manner that would avoid certain adverse consequences,  
 22 particularly economic burdens on the users in rural  
 23 areas, economic burdens on the small telephone  
 24 companies themselves, also to avoid requirements that  
 25 might be technically infeasible.

1 Based on that criteria State Commissions have  
 2 the sole authority to suspend or modify particular  
 3 interconnection requirements based upon consistency  
 4 with the public interest, convenience, and necessity.  
 5 Local number portability is one of those certain  
 6 requirements that needs to be conditioned properly.  
 7 First, the costs to implement number portability are  
 8 significant. Now I know you've heard witnesses and I  
 9 know there's a debate about what the components of  
 10 those costs are and there's a whole lot of confusion as  
 11 to what those costs are. Part of that confusion is  
 12 brought on by the fact the FCC hasn't fully resolved  
 13 all of those issues. Regardless of that debate, the  
 14 costs are more than inconsequential. Someone will have  
 15 to bear those costs, either end-users in the form of  
 16 new surcharges or potential cost recovery of rate  
 17 increases elsewhere or the LECs through some sort of  
 18 hidden costs or some sort of competitive disparity  
 19 created by requiring local number portability. And the  
 20 costs are made more onerous by the fact there are  
 21 uncertainties as to what they ultimately would be.  
 22 Second, even if we implement it end-users  
 23 will bear these costs but for no real purpose for the  
 24 time being. For many reasons wireline-to-wireless LNP  
 25 demand in rural South Dakota does not and will not

1 exist for the foreseeable future. In fact, there is no  
 2 evidence of demand for LNP. The anecdotal experience  
 3 we have in the urban areas with the Bell companies in  
 4 the top 100 MSAs shows that there's very little demand  
 5 for wireline-to-wireless porting. For several reasons  
 6 that demand would be even less in rural areas.

7 One, wirelines -- rural users have a greater  
 8 dependance on reliable service and for the time being  
 9 view their wireline service as the dependable service.  
 10 Their remoteness demands that they have a dependable  
 11 service and they don't have fall-back for other types  
 12 of services.

13 End-users typically don't abandon completely  
 14 their wireline service and completely convert to  
 15 wireless service. They may decide to use wireless  
 16 service and may find it useful for its mobile component  
 17 but generally don't abandon their wireline service.  
 18 The point being is that rural customers continue to  
 19 obtain mobile services without really needing to port  
 20 their numbers.

21 There's an irony here that some rural  
 22 customers might come to one of the towns here in  
 23 South Dakota and say, hey, I want to -- if we were to  
 24 implement LNP, I want to port my wireline telephone  
 25 number to wireless service and the wireless service

1 company and not the typical small and rural telephone  
 2 company, seems to be based upon requiring carriers to  
 3 do things that there's no requirements for them to do  
 4 in the first place, or seems to be based upon small  
 5 carriers incurring some sort of burden to potentially  
 6 transport local traffic to some distant location.

7 It appears even that the wireless carriers'  
 8 interest in these issues may have more to do with  
 9 transferring that responsibility of transporting local  
 10 calls beyond the small and rural LECs' service  
 11 territories, more to do with that than with LNP.

12 The FCC started work on local number  
 13 portability shortly after the Act was passed in  
 14 the '96, '97 time frame. They did issue some rules  
 15 regarding LNP, but those rules only applied to  
 16 wireline-to-wireline number portability. At the time  
 17 the FCC recognized that there was special issues  
 18 associated with the differences in geographic scope  
 19 between a typical wireless carrier and wireline  
 20 carriers, this concept known as rate center disparity,  
 21 and it's assigned those issues to an industry working  
 22 group. And the FCC told the industry working group to  
 23 go and study these issues and come back with  
 24 recommendations.

25 The FCC promised when it got such

1 provider could give them a phone and they could go home  
 2 and they could find out that they don't even have  
 3 service where they live.

4 Therefore, we have higher relative costs for  
 5 the LNP deployment in rural areas, which results in  
 6 economic burdens for the users, economic burdens for  
 7 the companies. There's little or no benefit because  
 8 there's really no real demand. This is a situation  
 9 Congress intended to be conditioned pursuant to  
 10 251(f)(2) in a manner that would be consistent with the  
 11 public interest.

12 Third, there is a continuing debate about  
 13 exactly what the FCC did last November in its LNP  
 14 Order. That debate will continue. For the short  
 15 amount of time I've been here today, I see that there's  
 16 a lot of confusion as to exactly what the FCC meant by  
 17 its requirements.

18 While the FCC recognized that the routing of  
 19 calls in an LNP environment is an issue that's related  
 20 to some of the questions that have been presented, they  
 21 decided to defer resolution of those issues to some  
 22 future proceeding. In any event, the FCC's decision  
 23 seemed to be based upon presumptions about what  
 24 capabilities may exist or may not exist, seems to be  
 25 based upon a framework that fits a typical large Bell

1 recommendations it would put those recommendations out  
 2 for public comment and the industry would have an  
 3 opportunity to comment on those recommendations. The  
 4 industry work group that the FCC assigned these issues  
 5 to has never resolved the intermodal issues. In  
 6 November of last year the FCC decided out of the blue  
 7 to completely abandon the process that it had promised  
 8 to follow which is why we're left not understanding  
 9 exactly what it is the FCC has required.

10 The form of number portability that we're  
 11 required to implement is what's known as service  
 12 provider number portability, and that is where a  
 13 customer changes his or her service from one service  
 14 provider to another and keeps his or her same telephone  
 15 number, but at the same service location.

16 The debate will continue as to whether  
 17 porting a number to a mobile user who obviously can  
 18 move around the country, whether that constitutes at  
 19 the same location or not. But the fact is at the same  
 20 location has been rendered somewhat meaningless when  
 21 the wireless carrier to which the number may be ported  
 22 doesn't have any interconnection arrangements, doesn't  
 23 have any business arrangements, doesn't have  
 24 interconnection points in those areas that constitute  
 25 service at the same location.

1 Therein is where arises the confusion about  
2 the so-called transport issues.

3 At any rate, there is no obligation for small  
4 telephone companies to transport local calls beyond  
5 their own service territory. There simply does not  
6 exist any such requirement, and it certainly would be  
7 contrary to at the same location criteria of service  
8 provider number portability.

9 The other sidelight of the FCC's decision and  
10 because of this rate center disparity is there's a much  
11 greater chance competitively to port numbers from  
12 wireline to wireless than there is vice versa so there  
13 is a competitive disparity presented by the form that  
14 was adopted.

15 You have also probably heard some who  
16 suggest, gee, we should have known this was coming and  
17 why didn't we do anything. Well, the fact of the  
18 matter is that same industry work group that I  
19 mentioned a few minutes ago had continually reported  
20 there was no resolution to these issues and continually  
21 reported that there was no recommendation. So without  
22 a request and without a real reason to implement LNP it  
23 would have been somewhat foolish to spend the money.  
24 And without knowing how those issues would ultimately  
25 be resolved carriers wouldn't have known until November

1 carriers to transport local calls to some distant  
2 location.

3 Finally, if and when the suspension were  
4 discontinued the carriers would then need some  
5 sufficient time to plan for the hardware and the  
6 software and get it all working and put in place, all  
7 of the administrative processes.

8 So in summary, granted the suspension of the  
9 local number portability is necessary, one, to avoid a  
10 significant adverse impact on users in the form of  
11 surcharges and higher rates, all in light of the fact  
12 that there's very little, if any, demand, to avoid  
13 economic burdens on the companies in the form of  
14 unnecessary resource burdens to attempt to implement  
15 uncertain requirements and to avoid the imposition of  
16 requirements that could impose transport burdens well  
17 beyond those that are required of the carriers, well  
18 beyond what they do today, and beyond what is in place  
19 today or available today.

20 Any one of these single conclusions is enough  
21 to satisfy the criteria under 251(f)(2). Suspension  
22 would be in the public interest.

23 Q Thank you, Mr. Watkins.

24 MR. COIT: I tender the witness for  
25 cross. I think the exhibits are already

1 10 of last year that the FCC was going to come out with  
2 some novel approach.

3 It's no wonder that the states are all  
4 confused about all of this. It's difficult to say  
5 exactly, but I count at least 35 states where there's  
6 no suspension request activity underway and while it's  
7 difficult to say exactly where all of those stand and  
8 it changes daily, the majority of those states seem to  
9 be ruling -- finding merit in providing some sort of  
10 suspension relief.

11 So let me just summarize what it is we're  
12 requesting here. We would like to extend the current  
13 interim suspension until conditions consistent with the  
14 criteria that I just discussed under 251(f)(2) have  
15 changed such that there's a better balance in potential  
16 cost versus benefits and that the public interest has a  
17 better balance.

18 At a minimum, we don't think that sort of  
19 evaluation can take place until the courts and the FCC  
20 resolve the outstanding issues and there are other  
21 rule-makings that the FCC has still underway. In any  
22 event, the Commission should confirm that under no  
23 circumstances do the small companies have some sort of  
24 obligation to incur some sort of extraordinary cost or  
25 do something -- a superior arrangement for wireless

1 introduced.

2 MR. SMITH: The exhibits are  
3 introduced. Mr. Wiczorek.

4 MR. WIECZOREK: Mr. Smith, just one  
5 housekeeping matter. Because of the previous  
6 conference call where Mr. Larson on behalf of  
7 Santel couldn't be present, I think it should be  
8 reflected in the record that his partner is present  
9 here as he promised. So if there are any questions  
10 Santel has specific to Mr. Watkins, he could ask  
11 them.

12 MR. SMITH: Do you want to make an  
13 appearance?

14 MR. NIPE: I wasn't planning on  
15 making an appearance on the record here today, no.

16 MR. WIECZOREK: The only reason I'm  
17 pointing it out is because the conversation was  
18 rather than having to bring Mr. Watkins back,  
19 Santel would make sure they had an attorney here to  
20 formally appear during his testimony so it could  
21 apply to that Docket.

22 MR. SMITH: Are you suggesting he  
23 appear?

24 MR. WIECZOREK: I'm just saying for  
25 completion of the record I don't want to get to

1 next July 1 and have some argument that Santel  
2 wasn't represented at this proceeding because that  
3 was the agreement, that they would have counsel  
4 here so Mr. Watkins wouldn't be coming back next  
5 week, that his testimony would apply throughout.

6 MS. POLLMAN ROGERS: If I could  
7 interject here, if Mr. Nipe does not want to make  
8 an appearance on behalf of Santel, Mr. Larson had  
9 talked to me about also representing Santel at this  
10 time so there would not be the necessity to bring  
11 him back.

12 But I'm not trying to step in on anybody's  
13 toes. I think their interests are covered, but  
14 you're certainly free to step forward if you wish.

15 MR. SMITH: What's the pleasure  
16 of -- I'm going to go off the record here and let  
17 you guys talk this over, okay.

18 (Discussion off the record)

19 MR. SMITH: We're reconvened and  
20 back on the record.

21 Ms. Rogers, do you want to make an appearance  
22 on behalf of Santel?

23 MS. POLLMAN ROGERS: Yes. For the  
24 purposes of today's hearing I will be appearing on  
25 behalf of Santel as well. Thank you.

1 (Discussion off the record)

2 MR. SMITH: Commissioner Sahr had a  
3 conference call he had to participate in for a  
4 little while. He should be back here momentarily.  
5 So for this portion of the hearing he'll have to  
6 read the record. We actually have that as a  
7 statutory provision here. So that's what he'll  
8 have to do.

9 COMMISSIONER BURG: He reads it  
10 twice anyway.

11 MR. SMITH: I'm sure he does. With  
12 that, Mr. Wieczorek, please proceed.

13 MR. WIECZOREK: Thank you,  
14 Commission, for bearing with that procedural  
15 requirement. I apologize, Mr. Watkins, for  
16 interrupting to take care of that issue.

17 CROSS-EXAMINATION

18 BY MR. WIECZOREK:

19 **Q** To begin with, I just have a couple yes-and-no  
20 questions that more just to clarifying the extent of  
21 your testimony. And if you can answer them yes or no,  
22 I would appreciate it. If you do not feel you can  
23 answer them yes or no, I'd ask you to tell me you don't  
24 feel you can answer them yes or no. Is that fair?

25 **A** Okay.

1 **Q** Now the opinions expressed by you in Exhibits 1 and 2  
2 of SDTA Exhibits 1 and 2 apply to all the 20  
3 Petitioners evenly; correct?

4 **A** Yes.

5 **Q** Okay. And as I have read your testimony, nowhere in  
6 your testimony do you single out a specific Petitioner  
7 and talk about how LPN may impact it specifically  
8 financially.

9 **A** No.

10 **Q** You understand that all the Petitioners in this case  
11 receive universal services high-cost support, don't  
12 you?

13 **A** I don't know that for a fact, but I'll take your word  
14 for it.

15 **Q** Okay. And would it surprise you to know that five of  
16 the companies you are testifying for receive in excess  
17 of \$400,000 a year in local switch support through  
18 USAC?

19 **A** That doesn't surprise me.

20 **Q** And are you also aware that the companies you are  
21 testifying for will be able to include the costs for  
22 the LPN update in their cost summaries to USAC to be  
23 considered in setting their future support?

24 **A** No. I think their costs for LNP are subject to a very  
25 special costing methodology that the FCC set forth that

1 creates a surcharge that will be charged each and every  
2 one of their customers as an additional charge.

3 **Q** Okay. You're talking about the end-user surcharge that  
4 the federal law allows to be applied to each of their  
5 users?

6 **A** For specific LNP costs, yes.

7 MR. WIECZOREK: That's all I have.

8 MR. SMITH: Mr. Gerdes.

9 MR. GERDES: I was planning on  
10 relaxing for a moment. I have no questions.

11 MR. SMITH: Ms. Wiest.

12 MS. WIEST: Thank you.

13 CROSS-EXAMINATION

14 BY MS. WIEST:

15 **Q** Mr. Watkins, could you go to page 6 of your direct  
16 testimony, please.

17 **A** Okay.

18 **Q** Looking at line 12, you state that the Commission,  
19 "should extend the suspension until the conditions have  
20 changed, and until such time as a per line cost of LNP  
21 is more reasonable compared to whatever demand, if any,  
22 may exist in the future."

23 My question is, how do you perceive that the  
24 per-line cost will become more reasonable at some time  
25 in the future when compared to demand?

511

1 A I actually don't think it will change much from the  
 2 current position because I don't think there's going to  
 3 be that much demand from wireline-to-wireless number  
 4 portability in rural areas. But presumably there could  
 5 be and presumably things could change and that's where  
 6 we have State Commissions to use their judgment to  
 7 evaluate when that balance may change.

8 Q And wouldn't any increase in demand just serve to  
 9 increase the RLEC's cost because that means they're  
 10 losing that many more customers or not necessarily?

11 A Well, there's the cost of implementing LNP, which has  
 12 some number of porting-sensitive costs, but primarily  
 13 there are a bunch of fixed costs of investments. But,  
 14 yes, then there's the secondary impact on the companies  
 15 when they lose customers and lose revenue and have to  
 16 spread their network costs over a declining set of  
 17 customers which has a whole nother set of universal  
 18 service implications for rural areas.

19 Q Could you define what a reasonable per-line cost of LNP  
 20 could be?

21 A I'd say that it's not -- it's not reasonable, the ones  
 22 we were seeing here, given the fact that there won't be  
 23 any demand.

24 Q None of them would be reasonable?

25 A Right.

512

1 Q And that would be under the cost witnesses, the  
 2 Petitioner's cost witnesses's estimates of cost?

3 A Yes.

4 Q Would that be true with Western Wireless's?

5 A Western Wireless's cost?

6 Q Yes.

7 A There is no provision in the Act to examine.

8 Q I'm sorry. Go ahead.

9 A To examine Western Wireless's. They don't have the  
 10 suspension request --

11 Q No. Their proposed costs in this case. Have you  
 12 looked at Mr. Williams' testimony with respect to what  
 13 he has stated?

14 A There was a whole lot of confusion about whatever it is  
 15 they proposed. I would say first they proposed, from  
 16 what I understand that somehow or another the LECs may  
 17 be required to be responsible for transporting costs  
 18 beyond their network, which I said earlier isn't a  
 19 requirement they have. So we wouldn't agree to do  
 20 that.

21 And the amount of costs that might be  
 22 incurred to do whatever resolution you come up with for  
 23 the transport issue is really unknown because we don't  
 24 know what the responsibilities are yet going to be.

25 So even under the best-case scenario of

513

1 Western Wireless I would answer the question, yes,  
 2 they're still unreasonable given there's no real  
 3 demand.

4 Q Looking on the same page, page 6, line 17 you state  
 5 that, "Consideration of the criteria can't occur until  
 6 after issues pending before the courts and the FCC are  
 7 resolved."

8 Do you have any expected timeline for this  
 9 resolution to occur?

10 A Well, I keep getting word from FCC staff people that  
 11 they're going to address the transport issue, but I  
 12 don't know that for a fact. The porting interval  
 13 has -- there's a pending rule making and the comments  
 14 and reply comments have been filed. It's hard to  
 15 predict how quickly FCC works.

16 Q And the courts could take a number of years to come to  
 17 any final resolution?

18 A They could.

19 Q Could you go to page 8, please. Beginning on line 16,  
 20 where you state that the "Petitioners could bear some  
 21 costs to the extent they're not recovered from  
 22 subscribers or carriers."

23 Could you point to any specific costs RLECs  
 24 would be unable to pass on to a subscriber?

25 A Yeah. The methodology for the surcharge only includes

514

1 specifically directly identifiable costs that are  
 2 associated with LNP. But typically there are other  
 3 upgrade costs that carriers incur in getting to the  
 4 point of providing LNP. And the transport issue, which  
 5 I understand you've kicked around considerably, is  
 6 another cost that wouldn't necessarily be addressed by  
 7 the surcharge that's potentially unbounded.

8 Q The RLECs could still pass those costs on to the  
 9 subscribers by an increase in local rates as they  
 10 suggest; isn't that correct?

11 A Which would be further economic burden to their  
 12 customers, which is the same reason we've asked for a  
 13 suspension.

14 Q On page 10, line 1 where you talk about  
 15 wireless-to-wireline porting, could you explain under  
 16 what scenario wireless-to-wireline porting is now  
 17 available and explain when it is not available?

18 A Only when the wireless mobile user has a telephone  
 19 number that has the same rate center as the wireline  
 20 LEC.

21 Q And that would exclude many --

22 A Well, the disparity occurs in that we can port wireline  
 23 numbers for a particular geographic rate center to a  
 24 mobile user who can subsequently move to California and  
 25 have service in California. But another mobile

515

1 customer that's currently in California can't move to  
 2 South Dakota and port their wireless number to a  
 3 wireline carrier. That's the disparity that's created  
 4 because of the widely different concepts of service  
 5 area used by wireline carriers and wireless carriers.  
 6 **Q** And then could you go to your rebuttal testimony,  
 7 please. On page 14, and on my copy I only have that  
 8 single line on page 14, three lines. Is that correct  
 9 on your copy also?  
 10 **A** Yes.  
 11 **Q** Could you just read that complete sentence there?  
 12 **A** The one that starts "As"?  
 13 **Q** Yes.  
 14 **A** "As I concluded in my direct testimony, there are  
 15 technical infeasibility implications for intermodal  
 16 porting where there is no presence by the wireless  
 17 carrier in the area that constitutes at the same  
 18 location because there is no network or business  
 19 arrangement in place for routing of calls."  
 20 **Q** So is it your testimony that it is in fact technically  
 21 infeasible for any of the Petitioners to implement  
 22 intermodal portability?  
 23 **A** It's technically infeasible to do it with every  
 24 wireless carrier, I believe, because I don't think they  
 25 have such arrangements in place with every wireless

516

1 carrier.  
 2 **Q** They could get arrangements in place, couldn't they,  
 3 with wireless carriers?  
 4 **A** They actually have no right under the statute to force  
 5 wireless carriers in these interconnection and business  
 6 arrangements.  
 7 **Q** So to the extent then any of the wireless carriers  
 8 don't have a point of connection within the rate center  
 9 you'd state that was technically infeasible?  
 10 **A** There's no existing arrangement to send the calls. It  
 11 either means we have to go out of our way to do  
 12 something extraordinary and superior at extra cost,  
 13 which I contend is not even something we're required to  
 14 do, or if we agree we're not required to do it, then  
 15 there's no existing facilities to route the calls which  
 16 makes it technically infeasible.  
 17 It doesn't really matter which way you say it  
 18 and it doesn't matter what way it comes out, it still  
 19 ends up being either an economic burden or infeasible.  
 20 **Q** Could you go to page 18. And I believe on line 17  
 21 could you read that sentence starting with the word  
 22 "However"?  
 23 **A** "However, the suggestion by Mr. Williams that a  
 24 Petitioner could be required to provision local  
 25 exchange carrier services would transport to some

517

1 distant point or to purchase services from some other  
 2 carrier for transport of traffic beyond the  
 3 Petitioner's network, for example, Qwest to transport  
 4 traffic to the Qwest tandem, would represent just such  
 5 extraordinary arrangement not required of the  
 6 Petitioners."  
 7 **Q** Could you read the next line, please.  
 8 **A** "While an incumbent LEC may at the incumbent LEC's sole  
 9 discretion voluntarily agree to extraordinary  
 10 arrangements, the LEC would not do so unless the  
 11 carrier requesting such extraordinary arrangement is  
 12 prepared to compensate the incumbent LEC or be  
 13 responsible for extraordinary cost for such superior  
 14 arrangement."  
 15 **Q** Is it your understanding that transporting into the  
 16 Qwest tandem would be cheaper than establishing direct  
 17 connection with each CMRS carrier?  
 18 **A** It may be cheaper to some carriers, and when you factor  
 19 in all the factors of competition and looking after our  
 20 own rights as far as ability to identify traffic and  
 21 those kinds of things, it's debatable as to what the  
 22 most efficient arrangement would be from my client's  
 23 standpoint.  
 24 **Q** Setting aside most efficient, which would be the  
 25 cheaper one?

518

1 **A** Well, I'm not sure that I understand what the exact  
 2 arrangement would be.  
 3 **Q** Did you review Mr. Williams' testimony?  
 4 **A** I did, but if we were to combine it all in a single  
 5 trunk group, that presents some competitive  
 6 implications and some other burdens on the carriers  
 7 which outweigh other cost considerations, and how it  
 8 all comes out in the balance is something that would  
 9 have to be evaluated.  
 10 **Q** Would you agree the costs are fairly extraordinary in  
 11 some cases under the direct connection arrangement as  
 12 proposed by the Petitioners?  
 13 **A** I do.  
 14 **Q** Could you go to page 21, please. Actually why don't  
 15 you go to 22. I think you've answered that question.  
 16 Page 22, please.  
 17 On page 22 I believe on line 2, "The  
 18 potential costs to transport traffic to some distant  
 19 point are potentially unbounded." Didn't Mr. Williams  
 20 outline costs for connecting to the Qwest tandem?  
 21 **A** Yeah. But Western Wireless is only one carrier among  
 22 many, and some wireless carriers contend that this  
 23 transport to some distant location should be some  
 24 absurd location several hundreds of miles away. And we  
 25 also have potentially competitive wireline LECs who

519

1 have ISPs where there's huge amounts of traffic. So if  
 2 this kind of framework were to be imposed upon the  
 3 rural companies for all of those kinds of traffic, it  
 4 could amount to huge amounts of costs to transport  
 5 these calls.

6 **Q** And then also on page 22 you mention some routing  
 7 issues in reference at least in the Century Tel  
 8 decision. Could you explain that routing problem?

9 **A** Yeah. I'm not certain that I fully understand exactly  
 10 what the Century Tel issue is, but undoubtedly where a  
 11 number is ported to a wireless carrier that you don't  
 12 have any interconnection or business arrangements in  
 13 place, carriers are understandably going to scratch  
 14 their heads as to what it is they're supposed to do  
 15 when the FCC has said, well, we'll address that issue  
 16 later.

17 **Q** So is it the Petitioner's position that given their  
 18 current interim suspension they're not required to  
 19 route those ported calls?

20 **A** I'm not certain whether those kind of calls in the  
 21 Century situation actually are the same here. I'm not  
 22 certain I understand the facts of the Century Tel. I  
 23 understand there's going to be further action on the  
 24 facts of the Century Tel issue.

25 **Q** Could you go to page 23, please. Line 4, could you

520

1 read that sentence, please?

2 **A** "Mr. Williams admits in his answer to Interrogatory 19  
 3 that Western Wireless is not required to use numbers  
 4 assigned by LECs and that it can obtain its own numbers  
 5 and not those assigned by LECs."

6 **Q** Would that mean Western Wireless's current subscribers  
 7 would need new numbers?

8 **A** In what respect?

9 **Q** You said that they can obtain their own numbers. I  
 10 think you're talking about problems with  
 11 wireless-to-wireless LNP?

12 **A** I think Mr. Williams was discussing the so-called  
 13 type 1 type interconnection. Are you familiar with  
 14 that?

15 **Q** Yes.

16 **A** Okay. My understanding is that the FCC declined  
 17 because there are special problems with type 1 porting,  
 18 that the FCC declined to adopt any rules regarding type  
 19 1 porting, but in any event there are a number of  
 20 issues associated with type 1 service that go beyond  
 21 just porting.

22 **Q** So but just speaking to your answer here, when you talk  
 23 about Western Wireless isn't required to use numbers  
 24 assigned by the LECs, they have in some instances. Is  
 25 that your understanding?

521

1 **A** That is my understanding.

2 **MR. SMITH:** Can I interrupt one  
 3 second? I want to note for the record Chairman  
 4 Sahr has returned so he can find his reading  
 5 obligation.

6 **CHAIRMAN SAHR:** Thank you.

7 **Q** So in order to resolve any problems, would Western  
 8 Wireless's customers have to obtain new numbers?

9 **A** Again, I'm not so certain any type 1 number can be  
 10 ported so I'm not certain that that can occur anyway.

11 **Q** Could you go to page 27. On line 8, could you read  
 12 that sentence starting with the word "Further"?

13 **A** "Further, the Commission should confirm that the  
 14 Petitioners have no obligation to transport calls  
 15 beyond their service areas for purposes of LNP or any  
 16 other purpose."

17 **Q** Is it your understanding that that is an issue that is  
 18 currently pending before the FCC, the transport of  
 19 calls beyond service areas for the purposes of LNP?

20 **A** That's a fair assessment, yes.

21 **Q** And it is expected that the FCC will come eventually at  
 22 some point in the future to a decision on that?

23 **A** Yes. That's fair to assume, yes.

24 **Q** Given that, do you think that this Commission could  
 25 make a separate decision on that same issue?

522

1 **A** Yes. Because this Commission has the authority to  
 2 arbitrate interconnection terms and it would presumably  
 3 be potential issues that arise in the course of  
 4 Interconnection Agreements.

5 **Q** Are you aware the FCC has stated that Interconnection  
 6 Agreements are not needed in order to implement LNP?

7 **A** Yes. And I also provided extensive discussion by their  
 8 own expert in an industry work group which said just  
 9 the opposite.

10 **Q** But that's in one of their most recent decisions, isn't  
 11 it?

12 **A** It is. It's a simple statement without any  
 13 explanation.

14 **Q** It is possible that if the Commission determines some  
 15 sort of transport obligation in these cases it could  
 16 conflict with a future FCC decision; is that correct?

17 **A** That's possible.

18 **MS. WIEST:** Thank you. That's all  
 19 I have.

20 **CHAIRMAN SAHR:** Commissioners, do  
 21 you have questions?

22 **COMMISSIONER BURG:** Yeah. I have a  
 23 couple. Mr. Wiczorek asked you a series of  
 24 questions on Universal Service Fund money. Do you  
 25 recall that?

523

1 THE WITNESS: Uh-huh.  
 2 COMMISSIONER BURG: Did you hear  
 3 him -- I don't know how long you were here, but did  
 4 you hear him ask those of other witnesses?  
 5 THE WITNESS: Not exactly. Some  
 6 people have told me what went on.  
 7 COMMISSIONER BURG: There was a  
 8 couple of times he referred to them. Do you think  
 9 this would be a wise use of Universal Service Funds  
 10 would be to finance LNP and porting?  
 11 THE WITNESS: No. Because I still  
 12 believe that the costs really would be borne for no  
 13 real purpose. And so there are better things to  
 14 use Universal Service Funds for than to deploy  
 15 something that's really not even going to be used.  
 16 COMMISSIONER BURG: And,  
 17 furthermore, my concern is with the whole raft of  
 18 things with universal service that are  
 19 deteriorating the funds or depleting the funds we  
 20 may not be able to have them for the purpose they  
 21 were. One of those would be, if I'm right, let's  
 22 just suppose that a LEC in this case applied for  
 23 and got Universal Service Funds for LNP. And in  
 24 the case of Western Wireless having an ETC,  
 25 eligible telecommunications carrier customer in

524

1 that area, their recovery would probably increase  
 2 because of that additional Universal Service Fund  
 3 because the ETC gives them whatever the cost of the  
 4 landline provider in that area gets, not what  
 5 actual costs are; is that correct?  
 6 THE WITNESS: That's correct under  
 7 today's rules of the FCC, yes.  
 8 COMMISSIONER BURG: So today if one  
 9 of the LECs got additional universal service moneys  
 10 because of implementation of this, the recovery  
 11 from a customer of an ETC provider, wireless  
 12 provider would actually increase?  
 13 THE WITNESS: Correct.  
 14 COMMISSIONER BURG: Okay. I wanted  
 15 to clarify that. That's all I have.  
 16 MR. SMITH: Commissioner Sahr.  
 17 CHAIRMAN SAHR: Good afternoon.  
 18 We've had some discussion about uncertainty from  
 19 the FCC and unresolved issues. And when looking at  
 20 whether or not LNP can be suspended, can we  
 21 consider that uncertainty as a factor?  
 22 And in particular I'm looking at the prongs  
 23 dealing with significant adverse economic impact,  
 24 unduly economically burdensome, technically  
 25 infeasible. And then it does talk about the public

525

1 interest, convenience, and necessity. Does  
 2 uncertainty fit into any of those categories in  
 3 your mind?  
 4 THE WITNESS: The way I presented  
 5 that issue in my testimony was the uncertainty adds  
 6 to the potential economic burden on the companies  
 7 to try and implement something when they don't know  
 8 how they're supposed to be implementing it. And I  
 9 think you heard the debate about the whole  
 10 transport thing so that would be one of the  
 11 examples the uncertainty contributes to the  
 12 economic burden.  
 13 CHAIRMAN SAHR: Thank you.  
 14 MR. SMITH: Maybe you're not the  
 15 right person for this, to ask, but I'm going to try  
 16 it. Just so I think we have a clear understanding,  
 17 with the suspension of the LNP obligations will  
 18 that also completely disable the ability of  
 19 wireless-to-wireless portability with respect to  
 20 these areas?  
 21 THE WITNESS: Well, I think that's  
 22 probably an issue that has already arisen. There  
 23 may be some implications to that in that -- but the  
 24 same exact issues arise where there's no business  
 25 and interconnection arrangements in place, when

526

1 numbers get ported, carriers don't know what to do  
 2 with the calls to the ported numbers, even in the  
 3 wireless-to-wireless situation.  
 4 MR. SMITH: Given that situation, is  
 5 there a technical solution for the wireless  
 6 carriers other than imposing an LNP obligation on  
 7 local carriers? Is there any other way to do that?  
 8 And if you don't know --  
 9 THE WITNESS: You mean, is there  
 10 some way to resolve all the dilemmas I've  
 11 suggested?  
 12 MR. SMITH: No. Just the wireless  
 13 to wireless.  
 14 THE WITNESS: I'm not sure.  
 15 MR. SMITH: Thank you. Mr. Coit.  
 16 MR. COIT: Thank you. I just have a  
 17 couple.  
 18 REDIRECT EXAMINATION  
 19 BY MR. COIT:  
 20 Q With respect to the question that Mr. Smith just asked  
 21 and I know you indicated that you're not sure, but do  
 22 you have any understanding as to whether a wireless  
 23 carrier that has a direct connect to a local exchange  
 24 company can perform and route to the appropriate  
 25 wireless carrier a call that is routed to a ported

1 number from a landline customer?  
 2 **A** It's conceivable that, yes, you could route a call to  
 3 one wireless carrier and then they could deal with the  
 4 fault query and route it to the proper wireless  
 5 carrier, yes.  
 6 **Q** Thank you. The last question. Do you believe that  
 7 having answers to issues surrounding transport  
 8 obligations and cost are essential in this Commission  
 9 making a fair determination under the criteria under  
 10 251(f)(2)?  
 11 **A** Yeah. They are a necessary condition but not a totally  
 12 sufficient condition, yes.  
 13 MR. COIT: That's all I have. Thank  
 14 you.  
 15 MR. SMITH: Mr. Wieczorek.  
 16 MR. WIECZOREK: Nothing further.  
 17 MR. GERDES: Nothing.  
 18 MS. WIEST: Nothing.  
 19 MR. SMITH: Commissioners, do you  
 20 have any last questions for Mr. Watkins?  
 21 (No audible response)  
 22 MR. SMITH: You're excused. I guess  
 23 now maybe it's up to the Chairman to make an  
 24 executive decision here.  
 25 CHAIRMAN SAHR: Or the

1 (Exhibits WWC 9 through 11 are marked for ridentification)  
 2 MR. SMITH: Good morning. Today is  
 3 Thursday, June 24, and the hearing in the LNP  
 4 Dockets is reconvened. Per discussions of  
 5 yesterday and a week ago, today is the day for  
 6 Mr. Williams. And with that, I'll turn it over to  
 7 Mr. Wieczorek.  
 8 MR. WIECZOREK: Western Wireless  
 9 would call Mr. Ron Williams to the stand.  
 10 RON WILLIAMS,  
 11 called as a witness, being first duly sworn in the  
 12 above cause, testified under oath as follows:  
 13 DIRECT EXAMINATION  
 14 BY MR. WIECZOREK:  
 15 **Q** Mr. Williams, could you identify yourself and who you  
 16 work for for the purposes of the record and for the  
 17 Commission?  
 18 **A** Yes. My name is Ron Williams, and I work for Western  
 19 Wireless Corporation.  
 20 **Q** And in front of you there is a -- well, you filed  
 21 prefiled testimony in this case; is that correct?  
 22 **A** Yes, I did.  
 23 **Q** And in front of you is an exhibit marked as Western  
 24 Wireless Exhibit 1. Can you identify that for the  
 25 Commission, please.

1 Commissioners.  
 2 MR. SMITH: Do you want to begin  
 3 with Mr. Williams immediately, or are you guys  
 4 prepared today to do that or would you rather wait  
 5 and start first thing in the morning?  
 6 COMMISSIONER BURG: How are we as  
 7 far as schedule?  
 8 MR. GERDES: We're right on  
 9 schedule.  
 10 MR. SMITH: Are you guys ready to  
 11 go? We're right on schedule. Even if we start  
 12 with Williams in the morning, I think we're on  
 13 schedule still.  
 14 COMMISSIONER BURG: I guess I  
 15 suggest we do that.  
 16 MR. SMITH: Take a break for an hour  
 17 and do something else? We're in recess until 8:30  
 18 tomorrow morning.  
 19 (Proceedings are in recess)  
 20  
 21  
 22  
 23  
 24  
 25

1 **A** Yes. This is my testimony, prefiled testimony in this  
 2 case.  
 3 **Q** Do you have any changes, additions, or corrections to  
 4 that testimony?  
 5 **A** I do have a change, and I do have an addition. The  
 6 most significant change dealing with the exhibit -- I  
 7 think it was originally listed as Exhibit 5 to the  
 8 testimony involving costs, there's been a lot of  
 9 evolution of the costs in this proceeding and I have a  
 10 replacement exhibit -- or replacement exhibits to  
 11 capture that cost evolution and bring it up to  
 12 relatively current status.  
 13 **Q** Okay. I'm going to show you what has been marked as  
 14 Western Wireless Exhibits 9 and 10. Are those those  
 15 replacement exhibits that you just discussed?  
 16 **A** That's correct.  
 17 MR. WIECZOREK: The colorful one  
 18 will be 9 and the black-and-white's 10.  
 19 (Discussion off the record)  
 20 **Q** Just for the record, Mr. Williams, can you just give a  
 21 brief description of documents 9 and 10 and how they  
 22 amend your prefiled?  
 23 **A** Sure. The colored version starting on the first page I  
 24 have as Brookings, the way this is structured is in the  
 25 format that was originally presented by the Petitioners

1 for these companies, and what I reflect in the first  
2 three columns of numbers are the progression of the  
3 Petitioner's cost study -- or cost submissions through  
4 the original petition and then their initial testimony  
5 and then reply testimony.

6 And then there is a column called Western  
7 original estimates, and that column both nonrecurring  
8 and monthly recurring represents what I had filed in my  
9 original petition, 5A.

10 Then there is another column immediately  
11 adjacent to that which is Western revised estimates.  
12 That column reflects Western's current estimates as of  
13 today based upon the Petitioner's projections for port  
14 volumes.

15 Down at the bottom of this page there's a  
16 line item you'll see that says ports per year. So what  
17 you've got here are Petitioner's projections based on  
18 those port numbers, you've got Western's projections  
19 based on those port numbers, and then the final column,  
20 which says Western's revised estimates, these are  
21 Western's estimates based on Western's annual port  
22 volumes.

23 And, again, so that reflects the difference  
24 both in terms of Petitioner's cost versus Western's  
25 costs also but also Petitioner's forecasted port

1 volumes versus Western's forecasted port volumes. I  
2 tried to capture it here on one page.

3 I know there's maybe subsequent adjustments  
4 to some of the Petitioner's line items, but this  
5 generally captures where we were at at the beginning of  
6 the week.

7 **Q** Okay. And this consists of just the companies that  
8 Mr. DeWitte has testified for so far?

9 **A** That's right. These are the companies we've seen so  
10 far, and they're represented by Mr. DeWitte's cost  
11 testimony.

12 **Q** Just one clarification. The amendments that  
13 Mr. DeWitte has said he's going to be making on his  
14 numbers where he had misstated his numbers in his cost  
15 study, are those reflected in Exhibit 9?

16 **A** No. Not the ones we've heard over the last couple of  
17 days.

18 **Q** Okay. Could you explain to the Commission how Exhibit  
19 No. 10 modifies your testimony?

20 **A** Exhibit No. 10 based on what the Commissioner's concern  
21 about having a rate that approximates an end-user  
22 surcharge that would be filed for through a NECA tariff  
23 filing, what I did was went out Monday night and found  
24 a NECA tariff filing. In that filing was the model  
25 that NECA uses. It's a standard template for all of

1 their companies that they use to produce a surcharge.  
2 What you see reflected on this exhibit, the  
3 black-and-white exhibit that says NECA model end-user  
4 charge rate development, this is their model with the  
5 numbers from the Western revised column here put into  
6 the NECA model.

7 The NECA model is different from what you  
8 have seen so far because it is intended to calculate an  
9 end-user rate that's recoverable over a five-year  
10 period, an end-user surcharge is recoverable over a  
11 five-year period. And it aggregates line items. The  
12 top line is really just the capital or start-up  
13 investment, the one-time charges. The expenses  
14 starting with line 5, those are the monthly recurring  
15 expenses. And then you've got -- then the access lines  
16 here reflect the -- access lines beginning at year zero  
17 and then decremented year by the line loss. We didn't  
18 project any line growth in our projections for these  
19 companies so this is assuming a net loss scenario with  
20 no line growth.

21 **MR. DICKENS:** Mr. Chairman, I  
22 apologize for interrupting Mr. Williams. I would  
23 like to object to any further reference to what has  
24 been marked as Exhibit 10 in the record. This is  
25 new evidence that Western Wireless is bringing into

1 the proceeding that could have been filed with  
2 Mr. Williams' testimony, and I don't think now is  
3 the time to be bringing new exhibits in.

4 I don't object to Exhibit No. 9 since, as I  
5 understand from Mr. Williams' testimony, Exhibit 9  
6 brings current an exhibit based on some changes  
7 that we've made in the manner of corrections to  
8 numbers in our testimony. But I don't think that  
9 it's fair to the parties, especially the  
10 Petitioners, to be getting new evidence on cost  
11 after our cost witnesses have already been up and  
12 off.

13 So I would object to any further -- even  
14 though they haven't offered this exhibit, I don't  
15 particularly like Mr. Williams discussing it on the  
16 record either.

17 **MR. COIT:** If I could add a comment  
18 too, I would also -- I've got concerns about this  
19 particular exhibit in the fact that it's new  
20 evidence. We were just presented with this. We  
21 have not had an opportunity for our cost  
22 consultants to review it to see whether he's  
23 applied appropriate methodology. You know, he had  
24 an opportunity to put something like this in with  
25 his direct testimony and that was not done so we

1 would also be objecting to -- I know it hasn't been  
2 offered yet but we would like to see the Commission  
3 not accept it.

4 MR. SMITH: Mr. Wieczorek.

5 MR. WIECZOREK: Could I ask just a  
6 couple of preliminary questions of the witness so  
7 we can establish why he's only recently developed  
8 this?

9 MR. SMITH: Yes.

10 Q Just for the Commission's -- for the record,  
11 Mr. Williams, when is the first time that you ran  
12 across this NECA model?

13 A Well, the first time I actually was able to locate a  
14 representation of the model was Monday night.

15 Q Okay. And I have -- I won't mark it at this time, but  
16 I was going to offer it in case anybody wanted it, or  
17 just give copies but I'm going to have him identify  
18 what -- there is a copy of a May 17, 2004 NECA letter  
19 that you found on the NECA website; is that correct?

20 A Yeah. This was in their recent tariff filings portion  
21 of their website and the model was attached as part of  
22 this tariff filing.

23 Q Okay. And you based the Exhibit 10 based on this NECA  
24 tariff model that's part of their tariff filing?

25 A That's correct. It's the methodology that they have

1 used for this tariff filing.

2 MR. WIECZOREK: Given that it's  
3 just a recent discovery, information and model, I'd  
4 ask the Commission's indulgence to let us add it to  
5 his testimony. And if the Commission would like, I  
6 do have copies of this. I made enough copies so if  
7 there's questions on where it originated from  
8 anybody could have it for review. I could either  
9 mark it or distribute it.

10 MR. DICKENS: Mr. Chairman, might I  
11 offer a brief response?

12 MR. SMITH: Why don't we hear from  
13 the remaining parties.

14 MR. KOENECKE: I have nothing to  
15 say.

16 MS. WIEST: Well, this is the first  
17 I've seen of it. I guess if it was out May 17 I  
18 would have hoped that they might have brought it  
19 sooner, especially before the Petitioner's cost  
20 witnesses were on.

21 MR. SMITH: Mr. Dickens.

22 MR. DICKENS: It's my understanding  
23 this model has been available for years. I could  
24 call Mr. Watkins for the limited purposes of  
25 establishing that on the record. He's still here

1 but the model's been available for years. The  
2 filing that he's referring to has been available at  
3 least since May 17 I believe the record reflects,  
4 and I think it's just unfair to us to hit us with  
5 new evidence at this late hour.

6 MR. SMITH: Can I ask, I mean, the  
7 trouble I have -- I guess the dilemma is it  
8 actually appears that this evidence might be  
9 something the Commission might actually want to see  
10 is I think the bad thing about excluding it. But I  
11 do agree that somehow we have to have a way for it  
12 to be done in a manner -- if they do want to see it  
13 we've got to do it in a way it's done fairly.

14 Can you describe generally what it is so that  
15 the Commissioners can make an informed decision of  
16 whether they deem it of sufficient importance to  
17 deal with.

18 MR. WIECZOREK: I'll let the witness  
19 do that if that's all right.

20 MR. SMITH: Could you do that.

21 THE WITNESS: It's the mathematical  
22 format that NECA uses to calculate the tariff,  
23 end-user tariff or surcharge that becomes a part of  
24 the NECA federal tariff for LNP cost recovery. And  
25 NECA uses the inputs provided by their members, the

1 telephone companies, and they put them into this  
2 format -- or formula and so the formula's  
3 consistent for their calculations.

4 The inputs are -- it's my understanding the  
5 inputs are provided from the individual telephone  
6 companies.

7 MR. SMITH: And, I mean, this is  
8 then what's going to show up on a customer's bill?

9 THE WITNESS: Yes.

10 MR. SMITH: That's your  
11 representation?

12 THE WITNESS: Yes. The numbers that  
13 you have in these are Western's perspective on the  
14 inputs.

15 MR. SMITH: This is your opinion of  
16 what's going to show up on a customer's bill and  
17 that's what's in the document?

18 THE WITNESS: Yeah. This would  
19 calculate based on Western's cost estimates.

20 MR. SMITH: We're going to recess  
21 for an executive session discussion on this.

22 (A short recess is taken at which time the  
23 Commission meets in executive session)

24 MR. SMITH: We're back on the  
25 record. We've discussed the objection, and we're

1 going to sustain it. We believe the document --  
 2 that the Petitioners had no notice of the document,  
 3 and it's unfair at this late date to spring it on  
 4 them.  
 5 MR. DICKENS: Thank you.  
 6 MR. SMITH: I'm referencing Western  
 7 Wireless No. 10.  
 8 MR. WIECZOREK: Does the Commission  
 9 desire us to mark the actual letter that has the  
 10 model? I mean, as Mr. Dickens has said, it's a  
 11 well-known model. At least you'd have the document  
 12 in front of you in case staff or Commission wanted  
 13 to look at that model.  
 14 MR. SMITH: To me that's a public  
 15 document and if you would like to mark that, I  
 16 don't think that's prejudicial.  
 17 (Exhibit WWC 12 is marked for identification)  
 18 MR. WIECZOREK: With the  
 19 Commission's indulgence I'd like to just do -- as  
 20 to Exhibit 11, so we don't -- so the opposing  
 21 counsel knows where this originates, I served the  
 22 first page of Exhibit 11 late last week. This is  
 23 from a survey just completed, the numbers just  
 24 provided to Western Wireless last week.  
 25 There is a second page to that that I just got

1 MR. DICKENS: The first page -- can  
 2 I have a moment?  
 3 MR. SMITH: Yes. We're off the  
 4 record.  
 5 (Discussion off the record)  
 6 MR. DICKENS: Do you want to move it  
 7 now, or we can have the discussion?  
 8 MR. WIECZOREK: I can move it now.  
 9 If there's an objection I can freely remove it. I  
 10 thought that's what you were looking at.  
 11 MR. COIT: I have a question, I  
 12 guess. Does Mr. Williams know enough about this  
 13 survey that he can answer questions on cross  
 14 regarding the specifics of this?  
 15 THE WITNESS: Yes.  
 16 MR. DICKENS: Are you offering it  
 17 now? Why don't you go ahead and offer it and then  
 18 we'll hash it out.  
 19 MR. WIECZOREK: I'll offer what has  
 20 been marked as 9, 11, and 12 as amendments and  
 21 additions to his testimony.  
 22 MR. SMITH: Well, I mean, he's  
 23 offering it. We haven't had any foundational  
 24 testimony yet, Ben. I think the only thing we're  
 25 talking about now is do you object to any of this

1 by e-mail last night. So I will say that -- so  
 2 there's no confusion about what I served and what  
 3 they've seen, the second page is new to opposing  
 4 counsel. And I don't want to cause any prejudice  
 5 so I'll have Mr. Williams identify the documents  
 6 and where they originate from but if there's an  
 7 objection because they've just seen that page, I  
 8 would understand.  
 9 MR. DICKENS: Could I ask -- is this  
 10 Exhibit 11?  
 11 MR. WIECZOREK: Yes. This is  
 12 Exhibit 11.  
 13 MR. DICKENS: Is this first page an  
 14 existing exhibit in the case?  
 15 MR. WIECZOREK: No. It was provided  
 16 subsequent discovery last week. They just got the  
 17 numbers last week.  
 18 MR. DICKENS: The documents you gave  
 19 us in discovery?  
 20 MR. WIECZOREK: Only the first page.  
 21 And that's the clarification I'm making. Given the  
 22 Commission's ruling on the last one, I wanted  
 23 clarification because if there's an objection to  
 24 page 2 because of the latest I would freely just  
 25 remove that from the exhibit.

1 on the grounds of unfairness because it's  
 2 information that you were not provided?  
 3 MR. DICKENS: I believe that we  
 4 would object to this Exhibit 11 because it's  
 5 evidence that could have been supplied in the  
 6 direct case.  
 7 MR. SMITH: I guess my understanding  
 8 was that it was supplied.  
 9 MR. DICKENS: I think it was just  
 10 supplied in discovery.  
 11 MR. WIECZOREK: Because it didn't  
 12 exist until last week. So as soon as I got it, I  
 13 supplied it in discovery. The question that  
 14 everybody asks here is whether there's any  
 15 modifications, corrections, or additions. This  
 16 came in late, and what I was saying to the  
 17 Commission because I guess I didn't want to get  
 18 into a surprise mode is the second page of it I  
 19 only got by e-mail last night, got it to print out  
 20 last night at midnight and that I would freely  
 21 remove it based on your earlier ruling they hadn't  
 22 had a chance to see it.  
 23 I did provide the first page as a supplement  
 24 to discovery, and I was going to ask him whether it  
 25 would be an addition to his testimony. But since

543

1 his testimony was due before the numbers were  
 2 actually ever recorded by the survey company, I'm  
 3 not sure how else you could do it except offer it  
 4 as an addition.  
 5 MR. COIT: You could have  
 6 supplemented your testimony; correct?  
 7 MR. WIECZOREK: Well --  
 8 MR. SMITH: I mean, is there a  
 9 substantive distinction there in the sense that, I  
 10 mean, you had it?  
 11 MR. DICKENS: We had one page of it  
 12 since last week.  
 13 MR. SMITH: Right. The second page  
 14 I think Tal has already agreed that's something you  
 15 haven't seen.  
 16 MR. COIT: Excuse me, but I have a  
 17 lot more concern about the second page. I guess it  
 18 certainly would have been nice if they would have  
 19 supplemented their direct so we knew page 1 was  
 20 coming in. But with respect to the second page we  
 21 don't know how this survey was conducted. There's  
 22 numbers on there that deal with whether the  
 23 landline provider or the landline subscriber feels  
 24 they should have a choice in providers.  
 25 I mean, we're talking rural areas. What rural

544

1 areas? We have a lot of rural areas in  
 2 South Dakota.  
 3 MR. SMITH: I know. I'm sure  
 4 there's going to be foundation here, Rich. Do you  
 5 want to just remove the second page so that part of  
 6 it's out of the issue?  
 7 MR. WIECZOREK: That's where the  
 8 start of it --  
 9 CHAIRMAN SAHR: I have a question  
 10 about the second page. I'm just curious, what's  
 11 the relevance of the second? Even forgetting  
 12 foundation, is it relevant to the proceeding? I  
 13 look at the first page and, you know, perhaps I can  
 14 see where you'd go with that, but the second page  
 15 I'm not sure if we're talking about  
 16 wireline-to-wireless-porting, is it really relevant  
 17 to those type of feelings.  
 18 MR. SMITH: We have one case where  
 19 we do have wireline to wireline.  
 20 CHAIRMAN SAHR: Well, that's not his  
 21 client.  
 22 MR. SMITH: Yeah. It's not his  
 23 client.  
 24 CHAIRMAN SAHR: Mr. Koenecke may  
 25 want to take the exhibit and run with it.

545

1 MR. WIECZOREK: When I was printing  
 2 it out last night at midnight my judgment may have  
 3 been blurred as to whether it's necessary to add.  
 4 I will freely remove it. So when I offer 11 it  
 5 will only be one page. So we don't have to discuss  
 6 that issue.  
 7 CHAIRMAN SAHR: Midcontinent  
 8 appreciates having it for future reference, though.  
 9 MR. SMITH: Okay.  
 10 MR. WIECZOREK: I'll ask the  
 11 foundational questions if I could, Mr. Smith.  
 12 MR. SMITH: Please.  
 13 **Q** (BY MR. WIECZOREK) Mr. Williams, what is now the  
 14 one-page document, Western Wireless No. 11, could you  
 15 briefly describe when that information became available  
 16 to you?  
 17 **A** Well, these represent results of a survey that was  
 18 conducted -- commissioned by Western Wireless,  
 19 conducted by an outside, you know, survey company.  
 20 Those results became available -- it was my  
 21 understanding the first results of the survey became  
 22 available end of the day Wednesday last week and from  
 23 the survey, the relevant questions of that survey to  
 24 this proceeding were captured and summarized here.  
 25 **Q** Now there was a question as to the area covered. And

546

1 this was not limited to South Dakota; correct?  
 2 **A** No. This was a thousand consumers in rural areas  
 3 within Western's service -- entire service area so that  
 4 would cover parts of 19 western states.  
 5 **Q** Okay.  
 6 **A** But they were all rural consumers, yeah.  
 7 **Q** So you're not offering it for -- you're not offering it  
 8 for determination that it be -- you're not representing  
 9 it was limited in South Dakota, it covered every state  
 10 that you guys have rural presence.  
 11 **A** Correct.  
 12 MR. WIECZOREK: With that, I would  
 13 offer Exhibit 1 and the modifications 9 -- I want  
 14 to make sure I'm offering the right ones, 11, and  
 15 12 I believe would be the correct numbers.  
 16 MR. DICKENS: I'd like to just ask a  
 17 clarifying question or two to Mr. Wiecezorek about  
 18 Exhibit 9.  
 19 MR. WIECZOREK: Okay.  
 20 MR. DICKENS: Is Exhibit 9 merely  
 21 Mr. Williams' attempt to bring his exhibit up -- 5A  
 22 and B up to date based on the changes that we've  
 23 made to our exhibits and the corrections and so  
 24 forth the last couple of days?  
 25 MR. WIECZOREK: Not the last couple

1 of days but every Petitioner has changed their  
2 numbers from the petition to the direct and then to  
3 rebuttal. And as I understand it that represents  
4 the first three columns.

5 Western's direct -- because the number the  
6 Petitioners was using, the petition numbers when we  
7 submitted our direct, the Western revised then was  
8 trying to pick up the revised from your direct and  
9 then there was a final Western revised estimates  
10 and it's my understanding that the really only  
11 change there is just the number of ports to  
12 represent the number of ports that Western would  
13 project to be in -- for wireless companies in that  
14 area.

15 And as further explanation, when the format  
16 was laid out in this situation where Mr. Williams  
17 was going to testify after every -- and the cost  
18 people were going to testify after every corporate  
19 guy we -- what his plan was was so the Commission  
20 could have all the numbers that had been presented  
21 in front of them in one sheet. And that's why  
22 there's different sheets for each company is  
23 because he thought he was going to be testifying  
24 after every corporate guy.

25 So that's why we're offering them all together

1 at this time because he's going to be addressing  
2 these companies.

3 MR. DICKENS: I'm advised that there  
4 are mistakes in this new exhibit, but if the  
5 exhibit merely recaps what Western Wireless's  
6 numbers are based on our changes I don't think we  
7 have an objection to it. If it's come up with new  
8 numbers at this hour we do. And I just want to  
9 make sure that I understand.

10 MR. WIECZOREK: Yeah. And I will  
11 tell you I guess I don't know what mistakes they're  
12 pointing at. The one thing -- I guess I don't know  
13 what mistakes they're pointing at so I'm offering  
14 it and --

15 MR. SMITH: I'm going to admit 9,  
16 and you can deal with the numbers on  
17 cross-examination.

18 MR. DICKENS: Right. Since we just  
19 got this we may ask for a little indulgence.

20 MR. SMITH: Sure, sure, sure, Ben.  
21 I totally agree with that. Let's move along with  
22 No. 11, and I'd like to hear from Petitioners on  
23 No. 11. That's this thing.

24 MR. DICKENS: We have no objections.

25 MR. COIT: We have no objection as

1 long as page 2 isn't a part of it.

2 MR. WIECZOREK: I agree. Page 2  
3 should be removed.

4 MR. SMITH: And No. 12?

5 MR. DICKENS: No objection.

6 MR. COIT: No objection.

7 MR. SMITH: Western Wireless's  
8 Exhibits No. 9, 11, and 12 are admitted --

9 MR. WIECZOREK: I'm sorry,  
10 Mr. Smith. I also moved No. 1, which is his  
11 prefiled testimony.

12 MR. SMITH: Is there an objection to  
13 1?

14 MR. DICKENS: No.

15 MR. COIT: No objection.

16 MR. SMITH: Western Wireless Exhibit  
17 1 is also admitted. And I had previously, although  
18 you didn't offer it, Mr. Wieczorek, I denied 10  
19 before you even offered it.

20 MR. WIECZOREK: That's fine.

21 MR. SMITH: Okay.

22 MR. WIECZOREK: I know this is  
23 taking probably longer than necessary. There is a  
24 foundational exhibit -- or objection to a  
25 previously filed exhibit that I can have the

1 foundation laid just very quickly by Mr. Williams  
2 so we can avoid it. We can get that exhibit  
3 cleaned up.

4 MR. SMITH: Please.

5 Q (BY MR. WIECZOREK) Mr. Williams, I'm going to show you  
6 what has been marked as Western Wireless Exhibit No. 6.  
7 This is the MIC filing.

8 A Yes.

9 Q Are you familiar with that exhibit?

10 A I am.

11 Q If you turn to, using the fax page numbers in the upper  
12 right-hand corner, page 19.

13 A Yes.

14 Q Which is the Certificate of Service of the MIC  
15 petition, does it show that you're on the service list?

16 A It does.

17 Q Okay. And is this a true and correct copy of that  
18 petition that you received pursuant to formal service  
19 from the MIC attorney?

20 A Yes.

21 MR. WIECZOREK: With that, I would  
22 move entry of Western Wireless Exhibit No. 6, given  
23 that I've laid that foundation.

24 MR. DICKENS: I'd like to ask what  
25 date you received that, Mr. Williams.

1 THE WITNESS: Shortly after it was  
 2 filed. And I can't name the date that I received  
 3 it.  
 4 MR. DICKENS: A month ago?  
 5 THE WITNESS: Well, it would have  
 6 been just within a couple of days of the filing,  
 7 which would have been approximately a month ago.  
 8 MR. DICKENS: Yeah. We would  
 9 object. It could have been supplied with the  
 10 testimony or as a supplement to the testimony.  
 11 MR. WIECZOREK: In response,  
 12 Mr. Smith, we've already had at least one of the  
 13 Petitioners state that they received it. They  
 14 already had it in their possession. They already  
 15 have it. I'm not sure there's an obligation to  
 16 supply it.  
 17 MR. SMITH: Can I ask you, maybe  
 18 this is a dumb question but, I mean, one of the  
 19 problems I kind of have had with this exhibit isn't  
 20 really even a notice issue or anything like that.  
 21 In terms of it just being a public filing in the  
 22 State of Minnesota, I mean, I think that document  
 23 is freely usable by counsel as a legal authority,  
 24 as a legal document, you know, in briefs and  
 25 whatever. You can reference it.

1 The thing that bothered me about the document  
 2 more than anything is whether there's foundation  
 3 for the fact that the particular methodology that's  
 4 laid out in Minnesota and the various numbers that  
 5 are in there are indicative of the situation here.  
 6 And to me, I don't mind admitting it to show what  
 7 somebody submitted in a petition in Minnesota, as  
 8 long as we have an understanding that we have no  
 9 basis for thinking that -- either way as to whether  
 10 or not that same opportunity is even available  
 11 here. At least I haven't heard that evidence yet.  
 12 MR. WIECZOREK: And I can live with  
 13 an admission based on that. I understand that.  
 14 CHAIRMAN SAHR: And I would agree  
 15 with the comments, and I also would add, I think,  
 16 obviously this is something when we take judicial  
 17 notice or if it's briefed, I think procedurally  
 18 this is actually being heard today in Minnesota or  
 19 something -- I think procedurally this has not  
 20 necessarily been adopted in Minnesota. So I think  
 21 that is at this point somewhat notable we don't  
 22 even know what the final resolution -- so I think  
 23 for comparison's sake it's something that can come  
 24 in from judicial notice, but it doesn't necessarily  
 25 mean it's dispositive of the weight that should be

1 given to it or even if this could be done in  
 2 South Dakota.  
 3 MR. SMITH: Right. With that, I  
 4 will admit it subject to those limitations.  
 5 MR. WIECZOREK: Okay.  
 6 Q (BY MR. WIECZOREK) Mr. Williams, have you ever  
 7 testified in front of this Commission before?  
 8 A No, I have not.  
 9 Q Could you just kind of give a brief background of your  
 10 experience and education?  
 11 A Sure. I'm an employee of Western Wireless, been in the  
 12 regulatory department now for about a year. I really  
 13 come out of the operations side of the business. My  
 14 education is in economics and accounting as an  
 15 undergraduate and a master's in business  
 16 administration. I've been in the telecom business  
 17 about 15 years, about half of that time with a large  
 18 local exchange carrier, half of that time as a regional  
 19 operations manager for a wireless company, not Western  
 20 Wireless, and a couple of those years with a CLEC  
 21 start-up enterprise.  
 22 During the course of that time frame I've  
 23 been involved, as I said, in operations that --  
 24 specifically, among other things, involved in the  
 25 implementation and operation of wireline local number

1 portability, both the old interim local number  
 2 portability as well as full number portability, and  
 3 then also more recently over the course of the last  
 4 year with wireless, implementation of wireless local  
 5 number portability, and in the last couple of months  
 6 with respect to intermodal aspects of wireless number  
 7 portability.  
 8 Q Can you give a brief summary of your testimony?  
 9 A Sure. My testimony was intended to be responsive to  
 10 the petitions and testimony of the Petitioners here.  
 11 Our situation is distinguished from the Interstate  
 12 Motion to Compel we heard on Monday in that ours is  
 13 based on a process of a bona fide request and our  
 14 intervention is associated with the existing bona fide  
 15 requests we have with these Petitioners as well as the  
 16 anticipated issuance of bona fide requests for some of  
 17 the Petitioners.  
 18 The intent of my testimony was to put the LNP  
 19 challenges you've heard about in a realistic context.  
 20 There's no question that implementation of LNP is a  
 21 challenging project. It's been challenging for  
 22 everybody who has implemented it. It was challenging  
 23 for Western Wireless, and it will be challenging for  
 24 the Petitioners.  
 25 I wanted to lay out the standards for LNP

1 suspension. You've heard those. You're familiar with  
2 them, but as an important part of my testimony, how  
3 those standards have been applied elsewhere. I've been  
4 an active participant in LNP proceedings very similar  
5 to that but also similar in purpose to this but  
6 different in format in several states.

7 I could compare the challenges -- my  
8 testimony compares the challenges faced by these  
9 Petitioners with the standard for the LNP suspension  
10 and hopefully I can cut through some of the confusion  
11 about LNP and about its implementation.

12 With respect to LNP, the Petitioners really  
13 have two obligations. They need to update their  
14 switches to be able to port out numbers, and they need  
15 to update their network to permit their customers to  
16 call ported numbers.

17 Now that last obligation is not the  
18 obligation that they've asked for a suspension of.  
19 They've asked for a suspension of porting their  
20 numbers.

21 These obligations, as I said, impose a  
22 difficult project, but it's not as complex as it's made  
23 out to be. In fact, it's not as complex as bringing  
24 DSL to the market, for example.

25 And then the other piece associated with

1 however, we haven't seen any evidence that there's any  
2 policy representations that are unique to these  
3 Petitioners. In fact, I think yesterday the statement  
4 was made that no individual assessments were made of  
5 the Petitioners relative to economic burden and adverse  
6 impact on consumers and -- or on demand issues that  
7 might affect the public interest.

8 My testimony presents evidence on that for  
9 each one of the Petitioners.

10 Getting back to the high standards,  
11 Congress -- this is a quotation from the First Report  
12 and Order relative to the suspension standard,  
13 "Congress intended exemption, suspension, or  
14 modification of Section 251(f) requirements to be the  
15 exception rather than the rule. We believe Congress  
16 did not intend to insulate smaller or rural LECs from  
17 competition." And it clearly says that to grant a  
18 suspension would be a unique or should be a unique  
19 consideration based on unique circumstances.

20 The three standards that apply here, and one  
21 of which must be met, we've heard about them, but I'll  
22 just go over them very briefly. Technical feasibility.  
23 Technical feasibility in terms of implementation and  
24 number portability and intermodal number portability  
25 was already addressed by the FCC. It's already been

1 these obligations is we've had a lot of discussions,  
2 everybody's familiar with the November 10 Order from  
3 the FCC that set some of the parameters for  
4 wireline-to-wireless porting. My testimony does  
5 provide a reminder that that was merely a  
6 clarification. It was not a new direction issued by  
7 the FCC. The FCC took careful care in that Order to  
8 say that they had envisioned intermodal portability and  
9 all they were doing is clarifying the circumstances  
10 associated and the expectations associated with  
11 intermodal portability.

12 The Petitioners have made their petition for  
13 suspension as they -- at the state here. And they've  
14 asked for that suspension. The standards that the  
15 Commission must address are very high to grant a  
16 suspension. Significantly, the Petitioners must be  
17 viewed on an individual basis. They can't be viewed as  
18 a group. They each have to be assessed on their own  
19 individual merits.

20 Now we've seen from the Petitioners that  
21 there was care taken in developing costs that are  
22 unique to each one of these Petitioners, even though  
23 there was some similarities in terms of methodology,  
24 the costs are unique to each one of these Petitioners.

25 From some of the policy perspectives,

1 addressed by all the rural carriers, including rural  
2 telcos that have implemented LNP. It's already been  
3 addressed in this proceeding. Technical feasibility is  
4 not an issue in this proceeding.

5 Another standard is undue economic burden.  
6 This is a standard that relates to the telcos or the  
7 Petitioner's wherewithal to implement number  
8 portability. We don't have any evidence that that is  
9 an issue in this case. Their criteria just isn't there  
10 that this is a cost that is undue in some way on these  
11 particular telephone companies. There are recovery  
12 mechanisms available for these telephone companies for  
13 number portability. In fact, there are two mechanisms  
14 available, and they may in some ways be duplicative.

15 They can recover these LNP implementation  
16 costs through an LNP surcharge that they can in essence  
17 flow through the direct costs number portability to  
18 their consumers. That is not a mandate. That's a  
19 choice. They also have recovery available to them  
20 through USF high-cost switching support. The costs  
21 they invest in number portability for switching  
22 equipment.

23 MR. DICKENS: Excuse me. I  
24 apologize so terribly for interrupting your summary  
25 but I would like to strike the reference to the

1 Universal Service Funding support. I don't believe  
2 that's in your direct testimony, is it,  
3 Mr. Williams?

4 THE WITNESS: I think I indicated  
5 that support would be available for these  
6 companies.

7 MR. DICKENS: Well, I don't want to  
8 interrupt your summary anymore. If you give me a  
9 page reference, I'll look at it and hold my  
10 objection in abeyance and raise it again if it  
11 appears improper. Can we go off the record for a  
12 moment?

13 MR. SMITH: Let's go into recess for  
14 a moment, Cheri.

15 (Discussion off the record)

16 THE WITNESS: I don't have the  
17 specific reference to USF support in my testimony.

18 MR. SMITH: I'm going to sustain  
19 Mr. Dickens' objection because right now we're  
20 dealing with you just summarizing what's in the  
21 document.

22 A And I was summarizing undue economic burden as a  
23 standard that needs to be met. I talked about  
24 recoveries available to these companies and my  
25 testimony sets forth that they have not met the

1 intermodal portability.

2 One of the keystones of number portability  
3 was that it was always intended to be deployed at a  
4 national level and be a universal capability. All  
5 carriers were expected to participate in number  
6 portability as markets were ready to accept it. And  
7 that acceptance was driven by competition.

8 Public interest in this case is also driven  
9 by the fact that consistency within the state of South  
10 Dakota could be an important issue. Right now most of  
11 the consumers in South Dakota have the ability to port  
12 their numbers to a competitive provider. That's true  
13 in wireless. That is true in wireline.

14 Number conservation implications are  
15 associated with the implementation of number  
16 portability. It arrives on the same platform, same  
17 capabilities that we're talking about implementing  
18 here.

19 Competition and consumer choice, we know  
20 consumers want this. We've submitted evidence for it.  
21 There's other evidence from non-Western sources that  
22 indicate that migration from landline to mobile will  
23 occur. We believe it will occur here. We believe  
24 number portability is an enabler for that.

25 And finally with respect to the public

1 standard for undue economic burden.

2 The final of the three standards which must  
3 be met is significant adverse impact on users. We've  
4 heard about potential pass-through charges to users in  
5 this, but my testimony states that the Petitioners have  
6 not proven an adverse impact on users. I have made  
7 adjustments to the Petitioner claims in terms of cost  
8 impacts and what those might appear as in a  
9 flow-through means. I would contend that my  
10 projections are still higher than what I believe the  
11 final costs will be in terms of implementation to LNP.

12 And these costs that may flow through to  
13 consumers, they do get offset by economic benefits of  
14 competition. We are all familiar with the benefits of  
15 competitive entry and the tendency for markets to react  
16 to that through lower prices and improved service and I  
17 believe that will be the case with respect to these  
18 Petitioners.

19 One of these three criteria must be met and  
20 then there is a public interest standard that can be  
21 applied. The public interest standard for  
22 implementation of number portability was already tested  
23 at the national level several years ago, and it's been  
24 retested with the advent of wireless number portability  
25 and with discussions around the refinement of

1 interest, there's an issue with respect to the fact  
2 that suspension for these Petitioners does not just  
3 impact these Petitioners' consumers. It impacts  
4 wireless consumers in other markets that these folks  
5 don't even serve. Today it is impacting the ability  
6 for wireless-to-wireless ports to occur in  
7 South Dakota, and it is impacting proper routing of  
8 calls to ported numbers. And that usually occurs when  
9 wireless carriers may have ported numbers in a market  
10 that is within the extended area calling service of one  
11 of the Petitioners and calls are being misrouted  
12 because in essence a number has changed hands between  
13 two carriers.

14 So there's a lot to think about on the public  
15 interest standard. This is not just about cost. This  
16 is about benefit, and it's also about, from a company  
17 perspective, revenue and financial wherewithal. And my  
18 testimony basically states that the Petitioners have  
19 failed to meet these standards for any suspension, let  
20 alone the indefinite suspension they're requesting.

21 They point to the uncertainty about  
22 indefinite suspension. The uncertainty that we have  
23 heard about may be more self-imposed than is imposed by  
24 the rules of number portability implementation. I have  
25 been, like all of you, here for several days now and I

1 wonder if the energy that has been put forward in the  
2 last several days were put forward months ago to the  
3 implementation of number portability where we would be  
4 today.

5 MR. DICKENS: Excuse me. I object.  
6 This is more new testimony that's not in his  
7 direct.

8 MR. SMITH: Overruled. Continue.  
9 A Relative to suspensions, the FCC has recently over the  
10 last six months denied many waivers. I know the waiver  
11 process is slightly different than the suspension  
12 process but it gets to the same effect. And the FCC  
13 denying those waivers has said you haven't met the  
14 standards, and we're going to -- basically we're going  
15 to give you 60 days to implement from our decision  
16 date.

17 I think that serves as a reasonable benchmark  
18 for this Commission. My testimony states that it  
19 should not be the presumption that once a company has  
20 received a bona fide request for number portability,  
21 and even if they have filed a waiver, that all activity  
22 relative to implementation should cease. There still  
23 is a prevailing obligation to implement number  
24 portability. The Commission in this case has granted  
25 an interim waiver or interim suspension pending a final

1 resolution. But there is much, much work that could go  
2 on in the intervening period, and I think 60 days  
3 after -- is appropriate once this Commission's  
4 decisions are made.

5 Other states they've worked with on number  
6 portability resolutions for very similar waivers -- or  
7 suspensions for rural carriers that have been handled  
8 in different ways in different states. In all of those  
9 states commissions have set firm dates for  
10 implementation within 2004. There's never been a  
11 question as to some indefinite contingent time period,  
12 it's always been a fixed date. And again, I would  
13 encourage while this process is ongoing that the work  
14 to implement LNP, which is the national policy, should  
15 also be ongoing.

16 That's my summary.

17 Q That concludes your summary?

18 A Yes, it does.

19 MR. WIECZOREK: I'd make the witness  
20 available for cross-examination.

21 MR. SMITH: Mr. Dickens?

22 MR. DICKENS: Yes. I'm going to go  
23 ahead of Mr. Coit for this witness.

24 MR. SMITH: Thank you.  
25

CROSS-EXAMINATION

2 BY MR. DICKENS:

3 Q Mr. Williams, good morning.

4 A Good morning.

5 Q If you would look at page 3, please, of your prefiled  
6 testimony, lines 8 and 9 you pose a question, "Is there  
7 a jurisdiction issue regarding waivers to LNP  
8 implementation?" Do you have that reference?

9 A I do.

10 Q And your answer on lines 10 and 11 is that, "I cannot  
11 give a legal opinion but I do believe there is an issue  
12 as to whether jurisdiction for LNP waivers is in the  
13 FCC or the State Commissions." Do you see that?

14 A I do.

15 Q Would you turn to page 6 of your testimony and read  
16 lines 14 and 15, please.

17 A "Section 251(f)(2) of the Act permits State Commissions  
18 to suspend the carrier's LNP obligations only."

19 Q After the word "only" the statutory standards are set  
20 forth; is that correct?

21 A That's correct.

22 Q On page 23 of your prefiled testimony you mention a  
23 letter on lines 17 and 18 from K. Dane Snowden, chief  
24 of the consumer and governmental affairs bureau of the  
25 FCC, that went to the president of NARUC. Do you see

1 that?

2 A I do.

3 Q Give me a moment. I'm trying to find a reference point  
4 in this letter.

5 (Pause)

6 Q Could you turn to -- do you have that letter?

7 A I think it's Exhibit 7.

8 Q Yes. It is. If you would look down to the third  
9 paragraph, about midway, in the middle of that  
10 paragraph there is a sentence that begins "Of course."  
11 Do you see that reference?

12 A I do.

13 Q Would you please read that sentence into the record?

14 A "Of course states have jurisdiction to waive porting  
15 obligations for certain rural telephone companies under  
16 Section 251(f) of the Telecommunications Act."

17 Q Okay. And I believe that you were present in the room  
18 when an exhibit marked as Venture Exhibit No. 4, which  
19 was a letter from Chairman Powell of the FCC to the  
20 president of NARUC, was admitted into evidence. The  
21 letter is dated June 18. Do you recall that?

22 A I do recall.

23 Q Would you like a copy of the letter because I'm going  
24 to ask you to read a sentence or two from it?

25 A Is it one of the exhibits here?

1 **Q** It's Venture Exhibit 4. I've got an extra copy. Did  
 2 you find it?  
 3 **A** Here it is.  
 4 **Q** If you would look at the third paragraph on what has  
 5 been admitted as Venture Exhibit 4, there is I think  
 6 the third sentence begins, "The Small Business  
 7 Administration's office of advocacy, however," do you  
 8 see that reference?  
 9 **A** I do.  
 10 **Q** Would you please read that into the record? Begin  
 11 there, and then read through the end of the paragraph  
 12 into the record.  
 13 **A** "The Small Business Administration's Office of  
 14 Advocacy, however, has raised concerns about the  
 15 possible economic burden that intermodal number porting  
 16 may place on LECs that are small businesses,  
 17 particularly those in rural areas. Those concerns may  
 18 warrant flexibility in evaluating pending waiver  
 19 requests by small LECs under Section 251(f)(2).  
 20 Accordingly, and notwithstanding Chief Snowden's  
 21 letter, I urge State Commissions to consider the  
 22 burdens on small businesses in addressing those waiver  
 23 requests and to grant the requested relief if the State  
 24 Commissions deem it appropriate. I also request that  
 25 you share with NARUC's membership this letter

1 encouraging State Commissioners to closely consider the  
 2 concerns raised by small LECs petitioning for waivers."  
 3 **Q** Thank you. Mr. Williams, would you please turn to page  
 4 25 of your prefiled testimony. Beginning on line 13  
 5 there is a sentence in your prefiled testimony that  
 6 says, "The provision of LNP by LECs is a critical  
 7 component of a competitive local telephone market." Do  
 8 you have that reference?  
 9 **A** I do.  
 10 **Q** Mr. Williams, it is true, isn't it, that you compete  
 11 today without local number portability?  
 12 **A** We compete the best we can in the marketplace without  
 13 number portability.  
 14 **Q** Okay. Well, do you recall testifying in Nebraska on  
 15 the subject of local number portability suspension  
 16 request?  
 17 **A** I do.  
 18 **Q** And in that case didn't you say that we can compete  
 19 today?  
 20 **A** Well, we can compete today, just not on an equal  
 21 footing.  
 22 **Q** Okay. On the subject of equal footing, Mr. Williams,  
 23 isn't it true that wireless companies today don't port  
 24 out to wireline companies where the wireless companies  
 25 are not -- don't have numbers in the ILEC's rate

1 centers?  
 2 **A** The same rules apply for wireless-to-wireline porting  
 3 as from wireline-to-wireless.  
 4 **Q** Yeah. The FCC has a proceeding pending, does it not?  
 5 **A** The FCC has a proceeding pending to see if wireline  
 6 companies can port in numbers from outside of their  
 7 service area even if they don't provide service in the  
 8 outlying rate center.  
 9 **Q** And, Mr. Williams, would you say that getting ready for  
 10 LNP -- I think that you said in your summary today that  
 11 providing local number portability by an ILEC is easier  
 12 than providing DSL service or something to that effect.  
 13 Do you recall that?  
 14 **A** I do.  
 15 **Q** You would agree that getting ready for local number  
 16 portability involves hundreds and hundreds of tasks,  
 17 isn't that true?  
 18 **A** I've completed both the task set for implementation and  
 19 DSL and the task set for implementation and LNP. DSL  
 20 is hard.  
 21 **Q** That wasn't my question. My question was you would  
 22 agree, wouldn't you, that getting ready for local  
 23 number portability involves hundreds and hundreds of  
 24 tasks?  
 25 **A** It does.

1 **Q** Thank you. On page 10 of your prefiled testimony you  
 2 mention the decision of other independent telephone  
 3 companies to implement local number portability. Isn't  
 4 that true at lines 9 through 14, you have a discussion  
 5 about that?  
 6 **A** Yes.  
 7 **Q** You would agree, though, Mr. Williams, wouldn't you,  
 8 that the circumstances of each company should be  
 9 considered individually as opposed to a group?  
 10 **A** Yes, they should.  
 11 **Q** Also on page, 10 line 15 you have a question and answer  
 12 that relates to what other State Commissions are doing.  
 13 Do you have that?  
 14 **A** I do.  
 15 **Q** Isn't it true that State Commissions have not only  
 16 denied suspension petitions but there are State  
 17 Commissions that have granted them?  
 18 **A** That's correct.  
 19 **Q** I'd like to ask you about a statement on page 24 of  
 20 your testimony, lines 7 to 11. You discuss industry  
 21 projections for the potential substitution of  
 22 wireless -- wireline service, excuse me, by wireless.  
 23 Do you have that reference?  
 24 **A** Yes, I do.  
 25 **Q** Wouldn't you agree that the overall porting activity

571

1 anticipated for wireless carriers has been somewhat  
 2 lower than anticipated?  
 3 **A** Yes. It's been lower than industry estimates for  
 4 wireless-to-wireless porting.  
 5 **Q** Now for wireline -- excuse me.  
 6 (Pause)  
 7 **Q** Mr. Williams, you testified earlier that you have  
 8 recently testified in Nebraska. I want to ask you  
 9 about a statement. Isn't it true that in Nebraska you  
 10 testified referring to local number portability that,  
 11 "It's not a perfect science. Today it still takes 10,  
 12 20, 30, 40 days to do an intermodal port, in some cases  
 13 it only takes 4 days?"  
 14 Do you recall more or less that testimony?  
 15 **A** Yeah. There are still some intermodal porting issues  
 16 within local exchange carriers.  
 17 **Q** For wireline customers that port to your company?  
 18 **A** Yes.  
 19 **Q** Using local number portability, isn't it true that to  
 20 get the best price or a better price those customers  
 21 are going to be required to sign contracts as opposed  
 22 to going on a month-to-month arrangement?  
 23 **A** Any of our customers would assess the total value  
 24 proposition we put in front of them, which include  
 25 different service packages and feature packages and

572

1 usage packages as well as different contract term  
 2 lengths.  
 3 **Q** Well, for customers that have contracts with you.  
 4 **A** Yes.  
 5 **Q** And they port to another wireless carrier?  
 6 **A** Yes.  
 7 **Q** Or back to a wireline carrier if they're able to port  
 8 back to a wireline carrier?  
 9 **A** That shouldn't be a question. It's a fact.  
 10 **Q** My understanding is that you will process the port; is  
 11 that correct, if they have a contract with you?  
 12 **A** Yes, we will. We're obligated to.  
 13 **Q** Right. And whatever contract issue -- the customer may  
 14 have to deal with you over a contract issue?  
 15 **A** If there's a remaining unfulfilled contract term, we  
 16 would deal separately with the customer on that issue  
 17 from the porting process.  
 18 **Q** Do some of your contracts have early termination fees?  
 19 **A** Some of them do.  
 20 **Q** Are you aware whether the Petitioners here have  
 21 termination fees for services they offer subject to  
 22 tariff?  
 23 **A** I don't, because I don't think it's relevant.  
 24 **Q** Okay. But you don't -- you're not aware of any  
 25 termination fees?

573

1 **A** I'm not aware of pricing structure other than what I  
 2 heard yesterday for their local rates.  
 3 **Q** Now if a -- what technology does your company use? Are  
 4 you GSM?  
 5 **A** Most of our services are CDMA.  
 6 **Q** Okay.  
 7 **A** We do have some GSM in our network.  
 8 **Q** And different wireless providers use different  
 9 technologies. There's not one common standard in the  
 10 United States, is there?  
 11 **A** Coalescing around two primarily.  
 12 **Q** Okay. For the purposes of my question, if a customer  
 13 wanted to port to your company from another wireless  
 14 company that doesn't use the same technology, you may  
 15 not -- you may not be able to accept their -- the  
 16 customer may not be able to keep the same phone. Is  
 17 that true?  
 18 **A** The customer handset equipment would be, again, I'm  
 19 sure part of the value proposition that that customer  
 20 considers when they would choose us.  
 21 **Q** Okay. And I think the answer is the customer may not  
 22 be able to use the equipment they're bringing from the  
 23 other provider's network. Isn't that true?  
 24 **A** In some cases that's true.  
 25 **Q** Are you aware that -- aren't there FCC rules requiring

574

1 wireline telephones to be compatible across wireline  
 2 networks?  
 3 **A** Somewhere in the deep archives I think there was a  
 4 standard set in 1969.  
 5 **Q** Maybe part 68, something like that?  
 6 **A** It predates the Telecom Act of '96.  
 7 **Q** Okay. And are you aware of any rules requiring  
 8 wireless companies to accept wireless competitors'  
 9 phones as an example we just discussed?  
 10 **A** I know there's some proceedings or processes underway  
 11 to examine that.  
 12 **Q** Now, Mr. Williams, your company has not always been in  
 13 favor of local number portability, has it?  
 14 **A** I think the answer to that would be that in the  
 15 environment of a few years ago we had a different  
 16 position on implementation of wireless number  
 17 portability.  
 18 **Q** And that different position was taken among other  
 19 places at the Federal Communications Commission?  
 20 **A** Yes.  
 21 **Q** And that -- subject to check, Mr. Williams, that was in  
 22 the year 2001, wasn't it?  
 23 **A** Do you have the document I could look at?  
 24 **Q** Well, I can refer you to a transcript in Nebraska but  
 25 subject to check --

575

1 A Subject to check, yes, 2001 sounds -- 2000 or 2001  
 2 sounds appropriate.  
 3 Q I want to phrase my next question carefully.  
 4 A I'll be sure to answer it carefully.  
 5 Q As I understand it -- I'm going to ask you your  
 6 company's position on transport. As I understand it,  
 7 isn't it your company's position that rural ILECs have  
 8 the responsibility to transport local traffic to your  
 9 switch or the point of interconnection at some other  
 10 carrier's tandem where there is no direct connection?  
 11 A With respect to this proceeding, we believe it is every  
 12 carrier's obligation to route traffic appropriately to  
 13 ported numbers.  
 14 Q Well, that didn't exactly answer my question. Let me  
 15 ask it differently. Do you believe that rural ILECs  
 16 have no responsibility to transport local traffic to  
 17 your switch or a point of interconnection at some other  
 18 carrier's tandem if you don't have a direct connection  
 19 with them?  
 20 A Are you talking in general or are you talking about  
 21 traffic to ported numbers?  
 22 Q Ported numbers.  
 23 A In that case, would you restate the question.  
 24 Q Sure. Is it your company's position here that rural  
 25 ILECs do not have the responsibility to transport local

576

1 traffic for ported numbers to your switch or a point of  
 2 interconnection at some other carrier's tandem if you  
 3 don't have a direct connection with that ILEC?  
 4 A I believe the local companies, since they are the  
 5 originating carrier of a call to a ported number, do  
 6 have an obligation to route that traffic to the  
 7 designated local routing location within the LATA.  
 8 Q Okay. And so that may be outside of their  
 9 certificated, for the lack of a more precise term,  
 10 local exchange boundary?  
 11 A Yes.  
 12 Q And so for a company -- you're familiar with Kennebec  
 13 Telephone Company?  
 14 A Yes.  
 15 Q And would you accept, subject to check, it's -- would  
 16 you accept, subject to check, that Kennebec is  
 17 approximately 180 miles from Sioux Falls, South Dakota?  
 18 A A little closer to Pierre, isn't it? About 40 miles  
 19 south or something.  
 20 Q Would you expect -- I ought to put Mr. Coit on the  
 21 stand.  
 22 MR. WIECZOREK: I would appreciate  
 23 that.  
 24 MR. DICKENS: Well, we're not going  
 25 to be that generous, even though it is John's

577

1 birthday.  
 2 Q And so for a carrier like Kennebec, if I understand  
 3 your position correctly, you would expect them to  
 4 assume the responsibility including the financial  
 5 responsibility to get that call to your switch or the  
 6 Qwest tandem in Sioux Falls?  
 7 A We would expect them to fulfill their obligations.  
 8 Q And --  
 9 A If that obligation included delivering a call  
 10 originated on their network, a local call to a ported  
 11 number, that would mean delivering it to the designated  
 12 routing point within the LATA.  
 13 Q And South Dakota is a one LATA state pretty much, isn't  
 14 it?  
 15 A Yes.  
 16 Q On page 19 of your testimony, lines 8 through 10, I  
 17 think I understand your position to be that those costs  
 18 associated with discharging that responsibility that  
 19 you say they have is not a number portability cost; is  
 20 that correct?  
 21 A That's correct.  
 22 Q Would those costs for delivering ported numbers to you  
 23 in Sioux Falls exist in the absence of number  
 24 portability?  
 25 A Delivering local traffic, the costs of delivering local

578

1 traffic exists in the absence of local number  
 2 portability.  
 3 Q The question is in the absence of local number  
 4 portability, would the cost of delivering ported  
 5 numbers exist?  
 6 A Well, in the absence of number portability there would  
 7 be no ported numbers so it doesn't exist.  
 8 Q Now, Mr. Williams, if I understand your testimony  
 9 correctly, you indicate that there isn't just one way  
 10 to route calls. Is that true?  
 11 A I would agree with the testimony we heard yesterday  
 12 that there are multiple ways. I don't know that there  
 13 are thousands of ways but there are multiple ways to  
 14 deliver traffic and route traffic.  
 15 Q Okay. You were just proposing one alternative; isn't  
 16 that correct?  
 17 A That's correct.  
 18 Q And you're familiar, I think, with the James Valley  
 19 settlement that was discussed on the record the other  
 20 day? You would be familiar with that settlement?  
 21 A Yes.  
 22 Q And that alternative is a different alternative than  
 23 you've proposed for the rest of the Petitioners in this  
 24 proceeding?  
 25 A Yes. We negotiated that resolution with James Valley

1 because of specific circumstances associated with our  
2 network and obviously they had specific circumstances  
3 associated with their network. It is different than  
4 the diagrams that have been bandied about the last few  
5 days.

6 **Q** Okay. It's different than the arrangement you're  
7 proposing for the balance of the Petitioners?

8 **A** What we suggested for the Petitioners was what we  
9 believed to be the most economically efficient method  
10 to accomplish the routing. But we didn't identify it  
11 as the only method.

12 **Q** And they're different --

13 **A** James Valley is different than --

14 **Q** That's what I --

15 **A** -- the default.

16 **Q** Okay. Now for the rest of the Petitioners, I think  
17 you're proposing the use of facilities to get to the  
18 LATA tandem I think is what your Exhibit 6 refers to  
19 that as; is that correct?

20 **A** Yes. These are currently existing one-way facilities  
21 that are used to deliver wireless traffic to the  
22 telcos.

23 **Q** And that tandem that you refer to is actually the Qwest  
24 tandem, isn't that synonymous with LATA tandem?

25 **A** Yes.

1 **Q** And I think that you have testified previously that  
2 you've established reciprocal interconnection and  
3 transport and termination agreements with most of the  
4 rural ILECs in South Dakota.

5 **A** Rich could correct me, but I think we've got them with  
6 all the SDTA members.

7 **Q** All right. And my recollection, and correct me if I'm  
8 wrong, is you're pretty familiar with those agreements,  
9 aren't you?

10 **A** I am.

11 **Q** I remember talking to you on the phone about it. All  
12 right. Under the terms of those agreements isn't it  
13 true that your company is responsible for delivering  
14 and picking up traffic at a point of interconnection  
15 within the LEC's calling area?

16 **A** That's not a completely correct statement.

17 **Q** At least for some of the LECs?

18 **A** Well, I'd say at least for some of the traffic.

19 **Q** Why don't you go ahead and explain for the Commission  
20 what those arrangements consist of in the  
21 Interconnection Agreement.

22 **A** Sure. The way the Interconnection Agreement we have  
23 with South Dakota telephone companies is modeled is it  
24 allows for two different kinds of traffic exchange.

25 One is what we would call a direct traffic exchange and

1 that's where there's a physical facility connecting our  
2 network with the telco network. And there's different  
3 conditions around that but suffice it to say that we  
4 would pass traffic directly from our network to the  
5 telco network.

6 There is a provision also in the agreement  
7 for what's called an indirect routing mechanism and  
8 that permits under the agreement for a Western Wireless  
9 originated call to be sent to a Qwest tandem and for  
10 Western Wireless to hire Qwest to deliver that call  
11 over their trunk group to the local exchange carrier.  
12 The agreement does not contain the corollary to that,  
13 which would be having the LEC route traffic through the  
14 Qwest tandem to Western Wireless. That corollary was  
15 dropped as part of the negotiations.

16 **Q** Thank you. And the question I would like to ask you is  
17 that under your proposal where an ILEC like Kennebec  
18 that we talked about earlier would be responsible for  
19 delivering ported traffic to your switch or point -- to  
20 Qwest's tandem or a point of interface with you and  
21 Sioux Falls, that's different than the way the  
22 Interconnection Agreement would handle the call?

23 **A** The interconnection does not speak in any way to  
24 routing of traffic to ported numbers.

25 **Q** Thank you. Mr. Williams, this morning when -- I think

1 it's Exhibit 9 is the new cost exhibit.

2 **A** Yes, sir.

3 **Q** I want to ask you a question or two about that. Give  
4 me a moment.

5 MR. SMITH: Is this a good time to  
6 take a short break?

7 (A short recess is taken)

8 MR. SMITH: We're back on the  
9 record. Mr. Dickens, you may continue.

10 **Q** (BY MR. DICKENS) Mr. Williams, we were talking about  
11 transport right before the break, I believe?

12 **A** Yes.

13 **Q** And earlier we had had some questions and answers about  
14 your company's position that it is a company like  
15 Kennebec's responsibility to transport the ported calls  
16 to your point of interface, wherever that is -- well,  
17 wherever that is is not correct. We didn't say that.

18 But I think that the question and answers  
19 indicated your company's position that it is the ILEC's  
20 responsibility to deliver calls to your company and in  
21 some cases that may be outside of their exchange,  
22 serving exchange boundary; is that correct?

23 **A** We believe that the obligations to deliver local calls  
24 are the same for all carriers, and that may include  
25 delivery of calls outside of the local network service

1 area.

2 **Q** Thank you. But you would agree, wouldn't you,

3 Mr. Williams, that the FCC recognizes that there is a

4 dispute as to which carrier is responsible for

5 transport costs when the routing point for the wireless

6 carrier switch is located outside the wireline local

7 calling area in which the number is rated?

8 **A** There is a dispute about who would absorb the transport

9 costs. There is no dispute about the obligation to

10 route that call. And I think the hearings -- or the

11 process will be handled in a different Docket as to who

12 ultimately absorbs the transport --

13 **Q** Before the Federal Communications Commission?

14 **A** Correct.

15 **Q** Now I'd like to ask you to -- you handed out a new

16 exhibit. I think it was Exhibit 9.

17 **A** Revised cost?

18 **Q** Yes. And I just want to ask you a couple of questions

19 about the exhibit that that modifies, I guess, to some

20 extent. That would be 5A and 5B?

21 **A** Yes.

22 MR. WIECZOREK: For the purpose of

23 the record, I believe Exhibit 9 would only modify

24 5A because it's only as to those companies that

25 there's been cost testimony for so far.

1 MR. DICKENS: Okay.

2 THE WITNESS: 5B.

3 MR. WIECZOREK: 5B. Yeah.

4 **Q** So the question I was going to ask you at the moment is

5 about Exhibit 5A.

6 MR. WIECZOREK: I guess I'm going to

7 interpose an objection here. If we're going to

8 talk about cost specifics on 5A, that -- those

9 companies haven't presented yet. They haven't

10 presented their cost people yet, and it would be

11 appropriate for them to present first and then

12 Mr. Williams to respond. As I understand the

13 procedure, Mr. Williams will get on the stand to

14 respond to those cost experts after those cost

15 experts have testified so he can address their

16 costs. And that would be the time to cross on 5A.

17 MR. DICKENS: Well, this is

18 really -- I'm not going to ask him how he

19 calculated the costs. This is really a policy

20 question.

21 MR. WIECZOREK: That's fine.

22 MR. DICKENS: It's demonstrated by

23 some cost information.

24 THE WITNESS: Sure.

25 MS. POLLMAN ROGERS: Just a minute.

1 Could I just be clear here on our procedure then?

2 Are we saying that Mr. Williams will be on the

3 stand again and available for cross-examination

4 with regard to cost questions on the remaining

5 companies, or is he only going to be on the stand

6 one time? I'm just asking. I don't know.

7 MR. WIECZOREK: That's been my

8 understanding of how we've talked about it.

9 MR. SMITH: I think that is what I

10 understand too, exactly. I think the purpose of

11 having him today was to sort of follow Mr. Watkins

12 as sort of the general policy guy. And if we want

13 to get into numbers for which we've had the direct

14 case, I don't have a problem with that. We are out

15 of order on numbers with respect to companies about

16 which we have heard no testimony.

17 MR. COIT: That follows my

18 recollection too.

19 MS. POLLMAN ROGERS: Okay. And I

20 didn't mean to interrupt the flow. I just wanted

21 to make sure I understood.

22 **Q** I promise I won't ask you how you calculated that

23 number.

24 **A** All right.

25 **Q** Under any circumstances. Exhibit 5A, do you have that?

1 **A** Yes, I do.

2 **Q** Okay. If you would look at the column for Faith, and I

3 believe that's the City of Faith.

4 **A** Yes.

5 **Q** And follow the box down to the calculated costs for LNP

6 per line per month excluding transport and including

7 transport, it shows \$3.95 a line?

8 **A** Yes.

9 **Q** And I'd like to ask you to refer to Mr. Watkins'

10 testimony. Specifically he attached some discovery as

11 an exhibit that you had supplied to the Petitioners.

12 It's SDTA 2 is the exhibit number.

13 **A** Yes.

14 **Q** And it's Exhibit 1B to SDTA 2. And what I'm referring

15 to specifically is a supplemental discovery response

16 that your company supplied showing projected port

17 requests for the first five years of porting. Do you

18 recall that?

19 **A** I do.

20 **Q** Would you accept, subject to check, Mr. Williams, that

21 the projected ports that you show for the City of Faith

22 over five years is zero?

23 **A** Could you just point me to the response question on the

24 discovery?

25 **Q** Yes. Actually I can show it to you. Would that be

1 helpful?  
 2 A However you can get it in front of me. That would be  
 3 good.  
 4 Q Okay. I've got to take Ms. Sisak's pocketbook with me  
 5 evidently.  
 6 A There it is. Zero.  
 7 Q Okay. Thank you. Now I'd like to refer you to Exhibit  
 8 5B, and this may be impacted by your Exhibit 9 that we  
 9 admitted this morning.  
 10 A Okay.  
 11 Q I'm sorry for the delay. Here it is. And I'd like to  
 12 refer you to the column for Brookings, if you see that.  
 13 A Yes.  
 14 Q And I think that this is unchanged by the revisions  
 15 that we admitted this morning as Exhibit 9, but it  
 16 shows transport-related costs of \$118 as a monthly  
 17 recurring cost. Do you see that on 5B?  
 18 A That I do.  
 19 Q Now does that remain \$118 on Exhibit 9?  
 20 A It remains \$118 for our revised numbers based on the  
 21 estimated ports made by the Petitioners, and then it's  
 22 adjusted for the port volume estimated by Western  
 23 Wireless.  
 24 Q Okay. So \$118 is still a good number for --  
 25 A Recurring transport related to routing calls to ported

1 numbers.  
 2 Q Okay. What is that \$118 price based on? I know you  
 3 mentioned projected ports, but what I want to ask you  
 4 is did that come out of a Qwest tariff?  
 5 A Yes. It's based on estimated traffic volume times the  
 6 rate that Qwest offers as a transit service provider  
 7 for those that have interconnection arrangements with  
 8 Qwest.  
 9 Q And is that a minute-based rate?  
 10 A It is.  
 11 Q And how many minutes roughly would \$118 a month  
 12 represent?  
 13 A Well, I can tell you how the formula was -- how the  
 14 formula factors out.  
 15 Q Okay.  
 16 A The way the formula is derived is you take the number  
 17 of ported outlines times the assumption that those  
 18 lines will receive six calls a day, each line will  
 19 receive six calls a day --  
 20 Q Six calls a day per line?  
 21 A Per line from the local calling area. And then that  
 22 number is multiplied by the .003123 per minute rate  
 23 that Qwest charges for toll -- they call it toll  
 24 transit in the state. And then that's multiplied by 30  
 25 days to get a monthly estimate.

1 Q So the six calls per day, is there a minute  
 2 associated --  
 3 A I'm sorry. There also is a factor. I think I assumed  
 4 3.5 minutes per call, which is above -- appears to be  
 5 above the average for not only Western Wireless's  
 6 incoming calls but also the rural telco calls.  
 7 Q Okay. Mr. Williams, if your company were  
 8 responsible -- I know that your position is you're not  
 9 responsible for transport costs. But if your company  
 10 were responsible for transport costs as we have  
 11 discussed it today, would Western Wireless still want  
 12 local number portability from all the Petitioners in  
 13 this case?  
 14 A If we were responsible for the transport costs?  
 15 Q Yes.  
 16 A I think we would want local number portability, yes.  
 17 Q Okay. Thank you. Let's see. I wanted to ask you  
 18 about the testimony in your prefiled exhibit on page  
 19 22, where you mention the notice of apparent liability  
 20 that was issued by the enforcement bureau for the FCC?  
 21 A Yes.  
 22 Q And that's at lines -- see if I've got this right. I  
 23 think the quote that appears in your testimony is, "The  
 24 FCC has made it clear that a carrier is still obligated  
 25 to route calls to ported numbers." I think you're

1 referring to the notice of apparent liability.  
 2 Is that a fair characterization of your  
 3 testimony?  
 4 A Yes. There's a citation there from the actual notice.  
 5 Q Okay. And isn't it true, Mr. Williams, that the  
 6 document that you cite, that is the notice of apparent  
 7 liability, does not establish any kind of final  
 8 liability for Century Telephone?  
 9 A It's a notice of a forfeiture for failure to route  
 10 traffic properly, and I assume that there's follow-on  
 11 process.  
 12 Q It's a notice of apparent liability, isn't it?  
 13 A That's what it says.  
 14 Q And do you understand the way that apparent liability  
 15 notices and FCC forfeiture proceedings operate?  
 16 A I do not.  
 17 Q Okay. Mr. Williams, you were in the room yesterday  
 18 when Commissioner Burg was asking Mr. Houdek some  
 19 questions?  
 20 A Yes.  
 21 Q Do you remember when Commissioner Burg asked Mr. Houdek  
 22 about the possibility of having wireless carriers pay  
 23 for those transport costs that we discussed earlier  
 24 generally?  
 25 A It sounds like a question that may have been asked,

1 yes.  
 2 **Q** And you were sitting over there, I think, weren't you,  
 3 over there in the corner?  
 4 **A** I was.  
 5 **Q** Did you say during -- when Mr. Houdek was having that  
 6 exchange with Commissioner Burg -- did you mention to  
 7 someone, Watch phantom traffic go up, during that  
 8 exchange? Does that sound familiar to you?  
 9 **A** Not at all.  
 10 **Q** Okay.  
 11 **A** In fact, if you want to talk about phantom traffic, I  
 12 think --  
 13 **Q** My question was did you say that?  
 14 **A** I did not.  
 15 **Q** Okay. Thank you.  
 16 MR. DICKENS: Those are all the  
 17 questions I have.  
 18 MR. SMITH: Mr. Coit.  
 19 MR. COIT: Yes. Thank you.  
 20 CROSS-EXAMINATION  
 21 BY MR. COIT:  
 22 **Q** First, Mr. Williams, I would like to -- I've got a  
 23 question regarding Exhibit 11, which is the survey of  
 24 rural consumers.  
 25 **A** Yes.

1 **Q** The survey that was conducted -- it says it's a survey  
 2 of rural consumers. How was rural defined for the  
 3 purposes of this survey?  
 4 **A** Within Western Wireless's serving area, but outside of  
 5 an MSA.  
 6 **Q** Okay. Outside of any of the top 100 MSA? Is that the  
 7 answer?  
 8 **A** That's correct.  
 9 **Q** I'm going to show you now an exhibit and I'll circulate  
 10 copies.  
 11 (Exhibit SDTA 3 is marked for identification)  
 12 MR. COIT: It's been marked SDTA  
 13 Exhibit No. 3.  
 14 CHAIRMAN SAHR: Can we go off the  
 15 record?  
 16 (Discussion off the record)  
 17 **Q** For the purposes of the record and for providing you a  
 18 little assistance, Mr. Williams, what you have in front  
 19 of you is a listing of the SDTA member companies. I  
 20 would say I think it needs one correction, but it's not  
 21 all that important for the purposes of the questions  
 22 I'm going to ask. I don't believe Prairie Wave  
 23 Community Telephone is on that, and that would have to  
 24 be added as one of the SDTA members.  
 25 Mr. Williams, you participated in

1 negotiations with respect to reciprocal traffic  
 2 exchange and interconnection with SDTA and many of  
 3 those companies; is that correct?  
 4 **A** That's correct.  
 5 **Q** If I could ask you to review that, there's  
 6 agreements -- I believe you would agree that agreements  
 7 have been reached with most of those companies. I  
 8 think there's a couple, though, that the agreements  
 9 have not yet been signed on. Could you for the record  
 10 identify which companies those might be?  
 11 **A** I think we have a couple remaining wrinkles with  
 12 respect to Roberts County, RC, and Splitrock  
 13 Properties. I don't think the McCook has been signed  
 14 yet, only because of an administrative error.  
 15 **Q** Okay. So looking at that list then all of the other  
 16 companies on that list to your recollection and your  
 17 understanding have executed a reciprocal transport and  
 18 termination and Interconnection Agreement with Western  
 19 Wireless?  
 20 **A** Yes. They all look familiar.  
 21 **Q** And at least most of those agreements have been filed  
 22 with the Commission for approval; is that correct?  
 23 **A** It's my understanding.  
 24 MR. COIT: At this time I would ask,  
 25 just as we did in the ITC cases, I would ask the

1 Commission to take judicial notice of the filings  
 2 that have been made with respect to those  
 3 agreements.  
 4 MR. SMITH: Is there an objection?  
 5 MR. WIECZOREK: I have no objection.  
 6 **Q** With respect to the terms of those agreements and just  
 7 the agreements in general, would you agree they are  
 8 identical in terms and conditions and the only  
 9 differences relate to rates and local calling scope and  
 10 point of interconnect information that would be  
 11 included in Appendix B to those agreements?  
 12 **A** Yes.  
 13 **Q** At this time I would like to go back to the Interstate  
 14 agreement that was judicially noticed earlier, and I'm  
 15 going to hand a copy of that out. I'm not sure that I  
 16 have enough copies.  
 17 MR. WIECZOREK: Could I ask for the  
 18 purposes of the record it get marked so we can  
 19 refer to it as an exhibit, when we have the record  
 20 we have an exhibit with it.  
 21 MR. COIT: If we could mark that as  
 22 SDTA Exhibit 4. There's also a cover letter on the  
 23 top of the agreement indicating about the date that  
 24 it was filed.  
 25 (Exhibit SDTA 4 is marked for identification)

595

- 1 **Q** Mr. Williams, with respect to this agreement executed  
 2 between ITC and Western Wireless, I'd like to refer  
 3 your attention to specifically Section 3.1 of the  
 4 agreement on page 5. And if you could take just a  
 5 moment to review Sections 3.1.1 and 3.1.2.  
 6 (Witness examines document)
- 7 **A** Okay.
- 8 **Q** Thank you. Looking specifically at Section 3.1.2 and  
 9 actually 3.1.3 if you want to take a look at that.
- 10 **A** Yes.
- 11 **Q** Would you agree that the provisions in each of those  
 12 sections do address the establishment of points of  
 13 interconnection between wireless carriers and landline  
 14 local exchange companies?
- 15 **A** Yes, I do.
- 16 **Q** And would you agree that they also speak to the  
 17 delivery of local traffic to those points of  
 18 interconnection?
- 19 **A** The delivery of a specific form of local traffic to an  
 20 NPA NXX assigned to Western Wireless.
- 21 **Q** But it references specifically local traffic; correct?
- 22 **A** Local traffic destined to an NPA NXX assigned to  
 23 Western Wireless.
- 24 **Q** And so would you agree that those provisions also speak  
 25 to the -- in speaking to the establishment of points of

596

- 1 interconnection they also address NXX assignment?
- 2 **A** They refer to CMRS provider NPA NXX assignment within  
 3 the rate center.
- 4 **Q** Within the rate center; correct?
- 5 **A** NPA NXX in that rate center.
- 6 **Q** Now just for the purposes of, I guess, bringing  
 7 attention to particular provisions that I think are  
 8 relevant to the issues that we've been discussing on  
 9 points of interconnection and transport  
 10 responsibilities, could you read in Section 3.1.2 the  
 11 first and second sentence, and that would be the  
 12 Section 3.1.2. Read that for the record.
- 13 **A** "Type 2-B interconnection facilities which provide a  
 14 trunk side connection between a CMRS provider and a  
 15 telephone company end office or tandem switch that is  
 16 capable of trunk-to-trunk switching, as specified in  
 17 Appendix B, the CMRS provider's POI must be located  
 18 within the telephone company's exchange boundary of  
 19 that telephone company end office or tandem switch.  
 20 Type 2-A facilities provide the capability for the CMRS  
 21 provider with an NPA NXX in that rate center to  
 22 exchange traffic between the CMRS provider subscribers  
 23 and telephone company subscribers served only by that  
 24 telephone company end office."
- 25 **Q** Okay. I'd like to ask you also to read Section

597

- 1 3.1.2.2.
- 2 **A** "Only local traffic originating from the telephone  
 3 company end-users in the LEC local calling area will be  
 4 delivered by the local telephone company to the CMRS  
 5 provider POI."
- 6 **Q** In Section 3.1.3 which speaks to type 2-B  
 7 interconnections could you read the first and second  
 8 sentences only, please.
- 9 **A** "Facilities which provide a trunk side connection  
 10 between the CMRS provider and the telephone company end  
 11 office, the CMRS provider's POI must be located within  
 12 the telephone company's end office exchange boundary of  
 13 that telephone company end office," and it goes on to  
 14 explain specifically what traffic is associated with  
 15 that.
- 16 **Q** Okay. And I would also like you to take a quick moment  
 17 to review sections 4.2.1 and 4.2.2, please.  
 18 (Witness examines document)
- 19 **A** Okay.
- 20 **Q** And could you for the record again read 4.2.1, please.
- 21 **A** "The telephone company with which CMRS provider has  
 22 directly connected shall be responsible for the  
 23 delivery of traffic from its end-users in the local  
 24 calling area connected to its network to the  
 25 appropriate point of interconnection within the

598

- 1 exchange boundary of the end office in which the tandem  
 2 providing type 2-B interconnection is located or within  
 3 the exchange boundary of the end office providing type  
 4 1 and/or type 2-B interconnection on the CMRS  
 5 provider's network for the transport and termination of  
 6 such traffic by the CMRS provider to its end-user."
- 7 **Q** And finally could you just read the first sentence of  
 8 Section 4.2.2.
- 9 **A** "Telephone company agrees that its landline customers  
 10 will dial CMRS provider NPA NXXs on a local basis, so  
 11 long as the CMRS provider NPA NXX has been assigned by  
 12 the North American Numbering Plan Administrator to an  
 13 end office rate center in which a POI is physically  
 14 located, and provided such local access is consistent  
 15 with the capabilities and use of the direct  
 16 interconnection established as described in Exhibit 1  
 17 to this agreement."  
 18 Who wrote these sentences?
- 19 **Q** You indicated earlier that you were involved directly  
 20 in these negotiations of these agreements; correct?
- 21 **A** Correct.
- 22 **Q** I'd like to talk a little bit about the statement that  
 23 you made regarding impacts on customers who are outside  
 24 the rural LEC service areas. And I believe that was in  
 25 relation to the porting between wireless subscribers,

1 porting their numbers to different wireless companies.  
 2 Now in a situation where you would receive  
 3 landline-to-wireless traffic over a direct connect,  
 4 would I be correct in saying that -- and let's say it's  
 5 destined to a number that was ported from Western  
 6 Wireless to another wireless carrier. Would I be  
 7 correct in saying that there is action that you can  
 8 take to ensure that the traffic is appropriately routed  
 9 to that other wireless carrier?  
 10 A There is action we do take on behalf of the local  
 11 exchange carrier that has misrouted that call. The  
 12 action includes a query, expense and dip that we  
 13 provide and the action includes transport and  
 14 termination to the proper terminating carrier.  
 15 Q So you as a wireless carrier can take the call and make  
 16 sure that it's routed to the wireless carrier that the  
 17 customer has ported their number to?  
 18 A In order to provide and to facilitate call completion,  
 19 we are trying to provide default query service whenever  
 20 possible so that calls continue to complete even though  
 21 they are misrouted by the local exchange carrier.  
 22 Q So if there is an obstacle there, you have a way of  
 23 removing the obstacle; correct? Yes or no?  
 24 A We have a way to provide an emergency service to do  
 25 that, that's correct.

1 exchanges?  
 2 A I'm not certain about the details of Faith.  
 3 Q I was just curious. And then you stated that on page  
 4 15, line 12, and there you're talking about the  
 5 uncertainty and what the FCC will do with respect to  
 6 future -- in the future regarding compensation matters.  
 7 In that statement are you only referencing  
 8 transport questions or not?  
 9 A Well, I think as it's relevant to this proceeding I was  
 10 focusing on the issue of who would pay for transport  
 11 for numbers outside of a -- routing numbers outside of  
 12 a local calling area.  
 13 Q With respect to LNP you don't know of any other issues  
 14 regarding compensation matters?  
 15 A I do not.  
 16 Q FCC will decide? Okay. And it is your understanding  
 17 the FCC will decide that at some time in the future;  
 18 correct?  
 19 A Yes.  
 20 Q Is it Western Wireless's position that this Commission  
 21 can decide that?  
 22 A No.  
 23 Q Could you go to page 17, please. On line 11 where you  
 24 state that, "Some Petitioners have included fees for  
 25 SOA nonrecurring set-up charge or nonrecurring SOA when

1 Q Now didn't you talk a little bit about the James Valley  
 2 settlement? Didn't you agree in the James Valley  
 3 settlement to conduct LNP queries at least on an  
 4 interim basis?  
 5 A On an interim basis.  
 6 MR. COIT: That's all I have.  
 7 MR. SMITH: Mr. Koenecke?  
 8 MR. KOENECKE: Nothing. Thank you.  
 9 MR. SMITH: Ms. Wiest.  
 10 MS. WIEST: Thank you.  
 11 CROSS-EXAMINATION  
 12 BY MS. WIEST:  
 13 Q Mr. Williams, could you go to page 6 of your testimony?  
 14 Lines 5 to 6 you state that you sent a BFR to everyone  
 15 except three of the Petitioners; is that correct?  
 16 A That's correct.  
 17 Q And why didn't you send a BFR to those?  
 18 A As we were looking at the opportunity to deploy  
 19 intermodal portability we -- because we do cover a  
 20 broad area, there are many telephone companies within  
 21 that area. We decided to take a phased approach and  
 22 the first phase that we sent bona fide requests to were  
 23 those that from a marketing perspective were more  
 24 important opportunities for us.  
 25 Q Faith was more important opportunity than these

1 estimated port volumes provide no justification for  
 2 automated SOA."  
 3 My question is if the porting interval is  
 4 shortened, would that require the use of an automated  
 5 SOA even with low port volumes?  
 6 A No, that's not the case. In fact, today wireless  
 7 porting intervals today are set at approximately two  
 8 and a half hours. We have, I think, two or three rural  
 9 wireless carriers that we're dealing with. They are  
 10 meeting two and a half hour intervals and they are  
 11 using a fax process and help desk method to accomplish  
 12 the porting.  
 13 Q So even if the porting interval was two and a half  
 14 hours, a company with low volumes still wouldn't need  
 15 an automated SOA. Is that your --  
 16 A I would agree, yes.  
 17 Q Okay. And then on line 20 you state that, "SOA monthly  
 18 charge estimates that are based on a vendor quote for  
 19 an automated interface with a high minimum monthly  
 20 charge," and you're providing examples of what you  
 21 state are overstated costs; is that correct?  
 22 A I'm sorry. I think I'm at the wrong location. What  
 23 page?  
 24 Q Page 17, line 20.  
 25 A I was at the wrong page.

1 **Q** Sorry. Beginning on line 20. Do you see that where  
 2 you're talking about SOA monthly charges?  
 3 **A** Yes.  
 4 **Q** And I'm just trying to clarify. Are you saying the  
 5 minimum monthly charge is high for an automated  
 6 interface or just that the minimum monthly charge is  
 7 high because the company is using an automated  
 8 interface which you claim they don't need?  
 9 **A** Well, with an automated and we talk automated interface  
 10 there's really two levels of automated interface  
 11 available.  
 12 **Q** Okay.  
 13 **A** What most of the Petitioners have, I think, recommended  
 14 is an interface that is a web-based interface or  
 15 dial-up base where you dial up into their service. You  
 16 pay for that a \$1,000 fee for an access ID and a \$400 a  
 17 month recurring port charge to access that. And that  
 18 gives you a look into their system and you can transact  
 19 things via computer.  
 20 There's a more sophisticated interface which  
 21 is more expensive than that. I don't think any of the  
 22 Petitioners have recommended that kind of an automated  
 23 interface.  
 24 **Q** Okay. Thank you. And then still on page 17, line 22  
 25 where you state, "Other recurring costs are overstated

1 based on Petitioner's own estimate of port volumes,"  
 2 could you explain that in more detail?  
 3 **A** Other Petitioner costs based on port volumes  
 4 overstated, they have included costs for the port  
 5 processing, taking the transaction of a port request  
 6 and processing it through to completion, that are  
 7 overstated both based on my experience and the fact  
 8 that at the time I wrote this many of the Petitioners  
 9 had claimed that they would be subjected to zero ports.  
 10 And it's in essence a variable cost that if you aren't  
 11 porting anything, you shouldn't be incurring that cost.  
 12 **Q** And then just going on to page 18, line 1, can you  
 13 explain in more detail why the business procedure and  
 14 porting process costs appear to be overstated and  
 15 redundant?  
 16 **A** Each company forecasts -- not each company. Each group  
 17 of companies represented by cost witness stated these a  
 18 little bit differently, but the business procedure  
 19 costs, and that would be the development of processes  
 20 necessary to perform number portability, there was  
 21 quite a bit of variance between the Petitioners, and  
 22 yet there isn't in the end much variance in the  
 23 process.  
 24 And so what I did was normalize the numbers  
 25 for what seemed to be an average, roughly an average

1 for all of the companies. What I didn't do was take a  
 2 look at the opportunity for these companies to use,  
 3 either through their association or some other informal  
 4 organization, the ability to develop one set of  
 5 processes one time that could apply to many or most of  
 6 their operations, that that wasn't part of my study,  
 7 but that would be an opportunity for the reduced costs.  
 8 **Q** And then on line 3 you state that, "The marketing  
 9 information of flyer costs are not justified on a  
 10 recurring basis." Why is that?  
 11 **A** Well, what some of the Petitioners have proposed is an  
 12 informational communique of some sort that would inform  
 13 their customers about the advent of number portability  
 14 in their systems and visionably the advent of a number  
 15 portability surcharge on their bills. And we do  
 16 endorse the necessity for that kind of a communication  
 17 when LNP is implemented. We don't believe that that  
 18 kind of a communication, particularly as it relates to  
 19 the LNP surcharge, makes sense as an isolated  
 20 communique on an annual recurring basis.  
 21 I think if you're going to communicate with  
 22 your customers about charges on their phone bill, for  
 23 example, that first of all you do it in concert with  
 24 all the other charges that would appear on your phone  
 25 bill -- if it was 911 or any of the other, you know --

1 any of the other line-item charges that appear on a  
 2 phone bill it would make sense to do that as an  
 3 integrated unified basis. That is probably an activity  
 4 that if it is happening today that LNP would just be an  
 5 incremental citation within that same communique and  
 6 would not require an additional independent marketing  
 7 distribution.  
 8 **Q** And you mentioned just recurring basis. Are the  
 9 nonrecurring costs justified?  
 10 **A** I think there are costs justified for the nonrecurring  
 11 piece. There is again a variance in terms of how the  
 12 Petitioners have approached -- how those costs are  
 13 going to be incurred, and I think -- maybe we'll hear  
 14 testimony today that would represent different costs  
 15 associated with that than we might have heard so far in  
 16 this proceeding.  
 17 **Q** Okay. Still on page 18 on line 6, going back to some  
 18 of the SOA costs, you talk about overstated SOA costs  
 19 and then mention the NPAC help desk. Is it your  
 20 opinion all the Petitioners would be able to use that?  
 21 **A** No. I think they're -- well, when you look at Western  
 22 Wireless's port projections, there are a few  
 23 Petitioners -- a handful of Petitioners that have  
 24 monthly port volumes, I think, that would justify, you  
 25 know, the more sophisticated SOA interface, the non

1 help desk method. But for the majority of the  
 2 Petitioners and given even Western Wireless's port  
 3 volumes, I would think that the help desk method would  
 4 be appropriate.  
 5 **Q** What's your cutoff?  
 6 **A** Close -- I would say 15 to 20 ports per month might be  
 7 appropriate. When you think about it, even 20 ports  
 8 per month is just one per business day.  
 9 **Q** And does Western Wireless have an automated interface?  
 10 **A** Well, actually we've used all three methods. You know,  
 11 we've implemented our capability in stages.  
 12 Initially -- and we still do work today using the help  
 13 desk method on some occasions. We use the -- the  
 14 dial-up \$400 a month recurring method on a semi-regular  
 15 basis today, and then we are in the process of  
 16 implementing a more integrated system that fits our OSS  
 17 and that is the direct computer-to-computer connection  
 18 that doesn't use a human intervention. So we use all  
 19 three layers of interface with them.  
 20 **Q** And then in your cost analysis did Western Wireless,  
 21 did you use carriers authorized to serve as opposed to  
 22 carriers actually serving?  
 23 **A** Well, our methodology was different.  
 24 **Q** Okay.  
 25 **A** In a significant way. What you have seen are costs

1 based on points of interconnection with each carrier in  
 2 the area. What we did was -- because our transport  
 3 costs aren't dependant upon the number of carriers,  
 4 they're dependant upon the volume of traffic.  
 5 And so what we did was forecast expected  
 6 ports, and we used that to derive an estimated traffic  
 7 volume and so there is no specific number of carriers.  
 8 We have just assumed on average over a -- over a  
 9 five-year period that there would be a 15 percent  
 10 migration from landline to wireless.  
 11 **Q** Okay. And so based on that analysis you don't have to  
 12 come up with any type of number of wireless carriers  
 13 that are serving?  
 14 **A** That's correct. It's traffic volume direct.  
 15 **Q** And then if you go to page 22 where you reference FCC's  
 16 Century Tel NAL, I believe with respect to the answers  
 17 that you gave to Mr. Coit it's not necessarily true  
 18 that the LEC would have to become LNP to resolve those  
 19 routing problems. Is that correct or not?  
 20 **A** Well, that is correct, but what the LEC needs to do is  
 21 if they are unwilling or incapable of supporting number  
 22 portability, they need to contract with a carrier that  
 23 will provide default query service. And in this state  
 24 the only carrier that I'm aware of that is not only  
 25 obligated to do that but offers it as a service is

1 Qwest.  
 2 **Q** And so that would involve or entail that those calls  
 3 would be transported to the Qwest serving tandem? Is  
 4 that correct?  
 5 **A** That's correct. And Qwest does have in its tariffs  
 6 both a default query, and then they also have a  
 7 subscription query rate, which is lower than the  
 8 default rate.  
 9 **Q** I believe you stated in your summary that the  
 10 Petitioners have not asked for a suspension from  
 11 transporting other carriers' porting numbers. Is that  
 12 correct or did I have that wrong?  
 13 **A** Let me see if I can clarify this. They haven't  
 14 requested a suspension from their routing obligations.  
 15 And an example would be if Western Wireless's number  
 16 was ported to Verizon Wireless.  
 17 **Q** Right.  
 18 **A** The originating carrier still has an obligation to  
 19 route that traffic to the terminating carrier, and they  
 20 have, as I understand it -- as I have read it, they  
 21 haven't asked for a suspension of that routing  
 22 obligation.  
 23 **Q** Is it your understanding that they could ask for  
 24 suspension of that routing obligation?  
 25 **A** No.

1 MS. WIEST: That's all I have.  
 2 Thanks.  
 3 MR. SMITH: I might go to  
 4 Commissioner questions anyway. What I wanted to  
 5 ask was a clarifying. Just to make sure we're all  
 6 on the same track here in terms of the issue Tal  
 7 brought up earlier, had you completed -- I mean,  
 8 did your cross-examination include all of the  
 9 subjects that you were intending to cross-examine  
 10 Mr. Williams about, such as the company-specific  
 11 numbers dealing with the companies that we've heard  
 12 from so far?  
 13 MR. DICKENS: If today is our only  
 14 opportunity to ask Mr. Williams questions about  
 15 companies who were subject to cost testimony this  
 16 week, I would probably have five or 10 minutes of  
 17 questions for Mr. Williams.  
 18 MR. SMITH: I was worried that -- I  
 19 don't know, Tal. Was that your understanding, that  
 20 today we would deal with the cost testimony  
 21 relating to companies we've already heard about?  
 22 MR. WIECZOREK: That's my  
 23 understanding of what we've planned.  
 24 MR. SMITH: I just didn't want to  
 25 have a situation develop where you guys, you know,

611

1 lost that opportunity if you were intending to do  
 2 so.  
 3 MR. DICKENS: We've got a very small  
 4 amount --  
 5 MR. SMITH: Before the Commission  
 6 questions would you please -- I'm going to treat  
 7 this as a continuation of your original  
 8 cross-examination.  
 9 MR. WIECZOREK: Fine.  
 10 MR. SMITH: Do you need time or are  
 11 you ready to go?  
 12 MR. DICKENS: I think I'm ready.  
 13 CROSS-EXAMINATION  
 14 BY MR. DICKENS:  
 15 **Q** These are questions about Exhibit 9 that came in this  
 16 morning. On the first page of that exhibit,  
 17 Mr. Williams, which are cost -- it's a cost comparison  
 18 exhibit that relates to the City of Brookings.  
 19 **A** Correct.  
 20 **Q** Under the second heading on the left-hand side of the  
 21 page for the category labeled impact-related costs --  
 22 **A** Yes.  
 23 **Q** -- under service order administration in the third  
 24 column entitled Petitioner revised estimates under  
 25 nonrecurring, if you follow that down to the service or

612

1 administration line item, there's nonrecurring I guess  
 2 monthly charge there of \$2,000 that Mr. DeWitte  
 3 identified; is that correct?  
 4 **A** That's correct.  
 5 **Q** Okay. And if you look over to your revised estimates,  
 6 which is the last column on the page --  
 7 **A** Yes.  
 8 **Q** -- under nonrecurring, it shows \$1,000.  
 9 **A** That's right.  
 10 **Q** Is that a change? Should that be highlighted?  
 11 **A** That should be highlighted in yellow. It is different  
 12 than the Petitioner.  
 13 **Q** Okay. Why did you change that?  
 14 **A** Well, as I just explained, Western has forecasted a  
 15 much higher port volume than the Petitioners for  
 16 Brookings. We think Brookings is one of those  
 17 companies that at Western's forecasted port volume that  
 18 would and should take advantage of an automated SOA  
 19 interface. So the \$1,000 represents the start-up costs  
 20 I referred to which is the access ID fee, and then the  
 21 \$400 is the monthly recurring port charge.  
 22 **Q** Okay. Would you turn to the next page for Interstate  
 23 Telephone Cooperative.  
 24 MR. WIECZOREK: Would you like him  
 25 to highlight it so it's clear on the original at

613

1 least?  
 2 MR. DICKENS: If it should, yes.  
 3 (Witness highlights document)  
 4 **Q** Is that how we got the yellow on here is a highlighter?  
 5 **A** There's a little guy in the machine that does that.  
 6 **Q** Okay. Are you with me now?  
 7 **A** Yes. I'm sorry.  
 8 **Q** Under the technical administrative costs, and I believe  
 9 the line that I'm looking at is marketing/informational  
 10 flyer?  
 11 **A** Yes.  
 12 **Q** I'm following that across to the column that says --  
 13 well, let me try to do this the right way. I'm  
 14 following it across to the third column that is  
 15 entitled Petitioner revised estimates 3A.  
 16 **A** Yes.  
 17 **Q** And that shows \$15,000.  
 18 **A** Yes.  
 19 **Q** And if we continue to -- that's \$15,000 for  
 20 nonrecurring; right?  
 21 **A** That's correct.  
 22 **Q** Okay. If we follow that across to the last column on  
 23 the page it says Western revised estimates?  
 24 **A** Right.  
 25 **Q** You've got \$15,000 there, and it's highlighted. Should

614

1 that be highlighted?  
 2 **A** No, it should not. Because that was the last --  
 3 equivalent to the last estimate provided by the  
 4 Petitioners.  
 5 **Q** Okay. And then for monthly recurring that's also  
 6 highlighted and it appears as though you have  
 7 eliminated any monthly recurring charge --  
 8 **A** On the flyer?  
 9 **Q** Yes.  
 10 **A** That's correct.  
 11 **Q** Okay. I think I've just got one more question on this.  
 12 Let me check with Mr. DeWitte, if I could for just a  
 13 second.  
 14 (Pause)  
 15 MR. DICKENS: Those are all the  
 16 questions on the numbers. Thank you for the  
 17 opportunity.  
 18 MR. SMITH: Commissioners.  
 19 CHAIRMAN SAHR: Good morning.  
 20 THE WITNESS: Good morning.  
 21 CHAIRMAN SAHR: Mr. Williams, I have  
 22 a few questions. The survey that's marked Western  
 23 Wireless Exhibit 11 that was admitted this morning.  
 24 THE WITNESS: Yes.  
 25 CHAIRMAN SAHR: I'm looking at the

1 survey overview and it says 1,000 on-line surveys.  
 2 Do you know if this -- I mean, was this a  
 3 scientific survey done with representative samples  
 4 or was it just something people could voluntarily  
 5 go on line or do you know anything about the  
 6 methodology behind the survey?  
 7 THE WITNESS: No. I think this  
 8 implies the responses were provided on line but the  
 9 survey was scientific in terms of its approach to  
 10 validity level of plus or minus 4 percent.  
 11 CHAIRMAN SAHR: Thank you. And then  
 12 I'm working on trying to flush out some of the  
 13 issues relating to the question of whether or not  
 14 there's a significant adverse economic impact on  
 15 users. And you talked a little bit about this this  
 16 morning. You mentioned that while there may be  
 17 costs borne by the consumers, there may be some  
 18 advantages gained to consumers, I assume through  
 19 enhanced competition.  
 20 Would you discuss that a little more fully?  
 21 THE WITNESS: Certainly. Well, I  
 22 mean, I think the biggest manifestation of the  
 23 implementation of LNP is additional consumer  
 24 choice. And obviously choices are unique to each  
 25 individual, but this offers a choice that's of

1 value to at least some individuals.  
 2 The other thing that happens in a marketplace  
 3 that's introduced to competition like this, I would  
 4 suggest that market prices tend to go down and  
 5 service levels tend to go up. And that occurs more  
 6 broadly across the marketplace for all consumers.  
 7 The other thing that happens, even for those  
 8 consumers that aren't going to take advantage of  
 9 number portability, it increases their own personal  
 10 bargaining position with respect to the provider of  
 11 telecommunications services. If you are a current  
 12 customer of a service provider and you have a  
 13 choice and you're not inhibited in your ability to  
 14 make that choice, if you have a billing issue or a  
 15 service issue, you know, something is wrong about  
 16 your value proposition, you have more leverage to  
 17 negotiate resolution of that than if there was not  
 18 another choice available to you.  
 19 And I think those impacts, though qualitative  
 20 in nature, are real, and real for every customer  
 21 that gets introduced into a competitive  
 22 environment.  
 23 CHAIRMAN SAHR: And you may have  
 24 anticipated my follow-up question. I think you've  
 25 stated some accurate economic principles. Is there

1 any statistical evidence that you can present to  
 2 support that in this particular situation? Has  
 3 Western Wireless done any analysis of potential  
 4 benefits of LNP that would compare that to  
 5 potential costs either borne by the consumers or  
 6 the companies?  
 7 THE WITNESS: The record on the  
 8 impact of competition and LNP as a component of  
 9 competition was made really at the federal level in  
 10 the course of Congress's proceedings up to the  
 11 Telecommunications Act and then the subsequent  
 12 proceedings in terms of the implementation of  
 13 number portability. I don't have any additional  
 14 studies to offer to that.  
 15 The conclusion of the FCC was that this was in  
 16 the public interest whether people took advantage  
 17 of porting or not.  
 18 CHAIRMAN SAHR: And this may get a  
 19 little bit beyond your scope of expertise but it  
 20 may not so please let me know if it does. And this  
 21 is going to be a little bit rhetorical in nature.  
 22 But, you know, from my discussions with the  
 23 consumers I have heard of a lot of interest across  
 24 the state with business people who are interested  
 25 in porting their wireless to wireless and some

1 wireline to wireless.  
 2 On the consumer level I've generally heard,  
 3 especially in the smaller towns and more rural  
 4 area, a higher degree of interest in keeping the  
 5 landline and adding the wireless or maybe they've  
 6 already added the wireless phone as a second line  
 7 or we can argue which one's primary or secondary,  
 8 but in any event going more that route.  
 9 Is there any implications of that on the  
 10 question of end-user costs and the benefits of this  
 11 if people are, in fact, more likely to be adding  
 12 this as a second line, the typical consumer, as  
 13 opposed to actually porting their landline number?  
 14 THE WITNESS: Well, I think that's  
 15 an excellent question and my answer is going to be  
 16 along the lines of each individual consumer is  
 17 interpreting it differently, and let me just kind  
 18 of describe that.  
 19 Many of us have wireless phones that are  
 20 complimentary to our landline service and we use  
 21 them at different levels for different reasons.  
 22 You know, some people use them because of local  
 23 calling area issues. Others use them because of  
 24 mobility issues. There's lots of different  
 25 reasons.

619

1 The experience of people who have never had  
 2 wireless phones before is often, you know, I'm not  
 3 sure I want to jump in with both feet from the  
 4 get-go, although the rural youth market  
 5 specifically is much more prone to do that. So  
 6 instead of jumping in with both feet and cutting  
 7 the cord from the get-go, consumers add wireless  
 8 service as a complimentary service. Once they  
 9 become familiar and confident and comfortable with  
 10 it, many consumers want to make that their primary  
 11 service.

12 And with some of these consumers that is an  
 13 issue because their identity may be invested in  
 14 their landline phone number, their primary  
 15 identity. And so what you've got is a condition  
 16 where you've got an identity invested in a landline  
 17 phone, which you want to preserve because there's  
 18 value in that for you, and you've got a preference  
 19 to use wireless services as your sole  
 20 communications device. Right now those people have  
 21 to pay for dual services because their identity is  
 22 invested in one and their usage preferences are  
 23 invested in another and there's no easy way to get  
 24 out of that situation. Number portability provides  
 25 that class of consumers a chance to consolidate

620

1 their services.

2 CHAIRMAN SAHR: One of the  
 3 considerations that we are charged with making is  
 4 whether or not this is consistent with public  
 5 interest, convenience, and necessity. And the -- I  
 6 think one of the more challenging parts of the LNP  
 7 issue is typically we tend to have costs borne by  
 8 cost-causers, meaning I am a business person who  
 9 wants to switch from wireless company to wireless  
 10 company, and either I as the consumer who wants  
 11 this or the company who receives the benefit of  
 12 getting me as a new customer would typically be the  
 13 one generally, with the way we run economics in  
 14 this country, would generally be the people who  
 15 would be expected to bear that, although certainly  
 16 there's plenty of socialized cost and all of that.  
 17 We all know that.

18 Would you comment on how that relates here in  
 19 the LNP context when we've had some testimony  
 20 talking about the fact that it appears that  
 21 end-users who aren't going to benefit, other than  
 22 perhaps generally from competition, and providers  
 23 who probably are looking at losing customers, not  
 24 gaining customers, appear to be bearing a lot of  
 25 those costs. And maybe you can kind of flush out

621

1 those points from your perspective.  
 2 THE WITNESS: And you're correct.  
 3 You know, the cost causation relationship to how  
 4 number portability gets funded is not necessarily  
 5 consistent with cost-causer. I think what the FCC  
 6 and Congress intended when this was conceived was  
 7 that it would be a universal feature available  
 8 throughout the country and that everybody would be  
 9 paying to their current carrier and their future  
 10 carrier because when somebody ports their number  
 11 they stop paying their -- the LNP surcharge to  
 12 their former carrier but they start paying it to  
 13 their new carrier.

14 And so number portability surcharge wasn't  
 15 intended to be a competitive differentiator in the  
 16 marketplace. It was assumed that the marketplace  
 17 as a whole, almost as if it were a social program,  
 18 the marketplace as a whole would bear the  
 19 responsibility and the way to do that is drive that  
 20 cost down to an individual consumer level.

21 CHAIRMAN SAHR: And down to that  
 22 individual consumer level, let's talk a little bit  
 23 about the costs that could be borne by consumers,  
 24 and let's assume pass-through on these costs and  
 25 the companies choose not to eat any of it, which

622

1 certainly they could choose to eat all or part of  
 2 it.  
 3 Looking at the figures we have here, would you  
 4 point to any of them as being so high that they  
 5 would have a significant adverse economic impact on  
 6 consumers?

7 THE WITNESS: I think this is one of  
 8 the toughest decisions you have to make is with the  
 9 known benefits available through competition versus  
 10 what an individual group of consumers would have to  
 11 pay, I think, as I've looked at these and if I  
 12 could think about sitting in your chair for a  
 13 minute across-the-board which of these companies  
 14 strike me as different in terms of the potential  
 15 impact on consumers, I think there's two or three  
 16 of these -- three certainly that stand out and  
 17 might be treated differently in terms of my answer  
 18 to this.

19 I think Faith is an example we've heard.  
 20 Faith has a relatively high cost and Western  
 21 projects low demand, and we think it would be  
 22 appropriate, for example, for the Commission to  
 23 provide Faith an extended suspension into 2005,  
 24 something like March 31, 2005 with Faith having the  
 25 opportunity to come back at a later time if they

623

1 still are not confident that number portability  
 2 suits the needs of, you know, their customer base  
 3 and, you know, they still project expenses at the  
 4 level that they're projecting now.  
 5 So that would be an example where they stand  
 6 out because of low demand and high costs per line,  
 7 and I think the two of those are an indicator that  
 8 there's something special, there's something that's  
 9 different about their circumstances than what we  
 10 see with most of the rest of the Petitioners.  
 11 CHAIRMAN SAHR: And you indicated  
 12 that you thought there were three that might be of  
 13 at least interest for the Commission to analyze.  
 14 What would the other two be?  
 15 THE WITNESS: Well, the other two  
 16 that kind of bump up against that threshold I think  
 17 would be Stockholm and Tri-County.  
 18 CHAIRMAN SAHR: And with that  
 19 threshold I'm going to ask you the difficult  
 20 question and maybe one that you inevitably must  
 21 avoid, the question is what is that threshold?  
 22 THE WITNESS: Where do you draw the  
 23 line? You know, the line is not a thin red line or  
 24 a thin black line. It's probably a wide gray line.  
 25 And, you know, I can only give you my opinion

624

1 and experience. And I think what we're looking at  
 2 here are three companies with -- even though these  
 3 aren't what will actually appear in a tariff but  
 4 appear to have costs that are, you know, in excess  
 5 of -- north of \$2. And I think that's reasonable.  
 6 There is some question as to, well, how do you  
 7 determine adversity, you know, if \$2 is -- you  
 8 know, it's X percent of a monthly rate or it's X  
 9 percent of a current set of tariffs and taxes and  
 10 surcharges that a customer pays or it's X percent  
 11 of a total telecommunications investment a consumer  
 12 makes every month, I mean, those are different ways  
 13 to look at it and, you know, certainly from  
 14 Western's perspective where we try to provide a  
 15 portfolio of services we think consumers buy -- and  
 16 are price conscientious on a portfolio basis, not  
 17 on an individual line-item basis.  
 18 So I will tell you my experience and give you  
 19 an example. In Missouri, Commission staff in  
 20 Missouri took a look at thresholds. Again, I think  
 21 they had about 30 Petitioners in Missouri. All of  
 22 them produced costs. And the Commission staff  
 23 looked at it and said, you know, we think there's a  
 24 natural break point down there of \$1.50. But they  
 25 were basing their analysis on an assessment of an

625

1 average monthly line charge of 7 to \$9.  
 2 So that's just an example of what, you know,  
 3 one state did to try and draw a line. And, again,  
 4 that was against costs that hadn't gone through a  
 5 hearing process. But that's an example.  
 6 CHAIRMAN SAHR: And I'll give you  
 7 the flip side of that to talk about, if you know.  
 8 Your company's surcharges, you do have a \$1.70  
 9 surcharge that is called an administrative and  
 10 regulatory surcharge?  
 11 THE WITNESS: That's correct.  
 12 CHAIRMAN SAHR: Local number  
 13 portability, CALEA, E911, number pooling, and that  
 14 might be it or maybe there's one other factor.  
 15 THE WITNESS: Yeah. I'm not sure of  
 16 all that goes in there, but it is intended to bring  
 17 all of those regulatory mandated recoverable fees  
 18 together in one line-item and it's \$1.70.  
 19 CHAIRMAN SAHR: Were you involved at  
 20 all in analyzing that type of charge and the  
 21 economic impact it would have on your consumers?  
 22 THE WITNESS: I was involved in the  
 23 very early stages of what the LNP cost might be  
 24 that would be recoverable by Western Wireless, but  
 25 beyond that early estimate, which I don't think

626

1 ultimately was used, beyond that I don't know how  
 2 they were calculated.  
 3 CHAIRMAN SAHR: And I would imagine  
 4 that a typical bill from your company would be more  
 5 in the 35, \$40 type range. Have you had any  
 6 opportunity to look at the impact of a surcharge on  
 7 that whereas -- and I'm not necessarily talking the  
 8 context at this point since you said you really  
 9 weren't involved in setting that particular charge,  
 10 but have you ever looked at or do you have an  
 11 opinion as to when a charge is too much from your  
 12 company's perspective?  
 13 THE WITNESS: I really -- I haven't  
 14 been involved in that piece of the business so I  
 15 don't think I could answer that.  
 16 CHAIRMAN SAHR: Switching gears,  
 17 we've had a lot of conversations about BFRs?  
 18 THE WITNESS: Yes.  
 19 CHAIRMAN SAHR: Obviously you've  
 20 established a paper trail of setting out BFRs to  
 21 the telcos. Did you do any follow-up contacts  
 22 after those BFRs or what did you do -- you know,  
 23 we've kind of had the context of, well, the ball  
 24 was in their court. Did you take steps to try to  
 25 move the ball forward and the issue forward or

1 here's the hot potato, it's yours now, and we're  
 2 out of it?

3 THE WITNESS: Well, I mean, there's  
 4 no question we had hoped that the hot potato would  
 5 gain some attention, but the process we took,  
 6 again, it was across multiple states, and in our  
 7 serving area, I mean, we deal with more than 300  
 8 rural telephone companies, and as I described  
 9 earlier, we kind of broke the process down into  
 10 phases with those that were most important to us.  
 11 We sent out bona fide requests first. And those  
 12 all went out in the September to November time  
 13 frame. And we used a bona fide request template  
 14 that was sponsored by the CTA but acknowledged as a  
 15 bona fide approach by the FCC. Those all went out.  
 16 Our follow-up to that was to send what we  
 17 called an LNP operations agreement draft out, and  
 18 we sent those out in mid-December, December 10 to  
 19 the 18th, to most of the companies that we had sent  
 20 bona fide requests to, and I think there's in  
 21 evidence that -- cover letters that are associated  
 22 with that.  
 23 We asked them for follow-up. We provided them  
 24 our information. We suggested that this is an  
 25 agreement that could be used, although no agreement

1 is required to do number portability. And then in  
 2 that agreement we also provided some rudimentary  
 3 information about our porting contacts and that  
 4 kind of thing.  
 5 From there we really -- we got some follow-up  
 6 with some companies and we worked with those  
 7 companies, telephone companies to -- in dialogue to  
 8 get through the process of their implementation of  
 9 LNP, and then in April as we were coming closer to  
 10 the timeline -- late March, the first of April, we  
 11 began calling all of the companies that we hadn't  
 12 heard anything back from and, you know, we made --  
 13 we made at least one attempt, if not two attempts  
 14 to get ahold of folks. And by that I mean leave  
 15 messages specific to follow-up on LNP. And again  
 16 we heard back from some and those we heard back  
 17 from we worked with them to get implementation  
 18 accomplished.  
 19 CHAIRMAN SAHR: And I was encouraged  
 20 to see things move forward with James Valley. And  
 21 I realize that for every company or cooperative  
 22 that you're working with the facts are going to be  
 23 different that's going to make it easier or harder.  
 24 And I was also, though, encouraged it appears the  
 25 managers who have testified in Western Wireless are

1 still willing to continue to negotiate and talk  
 2 through that process. Are you still willing to  
 3 work with the other players and see if you can't  
 4 come up with some type of solution short of a  
 5 Commission Order?

6 THE WITNESS: Absolutely. From my  
 7 perspective, there's no reason this thing couldn't  
 8 be settled this afternoon and implemented by the  
 9 end of July.  
 10 CHAIRMAN SAHR: And I'm sure they  
 11 could come up with a solution they think could be  
 12 done by this afternoon.  
 13 MR. SMITH: Let's get a tee time.  
 14 CHAIRMAN SAHR: That would be the  
 15 best birthday present you've ever had.  
 16 Along those lines and maybe it's impractical  
 17 and maybe sometimes having a regulator in the room  
 18 isn't the way to facilitate private negotiations  
 19 among parties, but is there any merit of trying to  
 20 come up with some type of working group to analyze  
 21 these issues? Because we hear proposals and it  
 22 seems like it's either A or Z coming in from the  
 23 two sides, and is there something in the middle we  
 24 could possibly have a role in helping to  
 25 facilitate?

1 THE WITNESS: I think the most  
 2 important thing you can do to facilitate  
 3 implementation or resolution of issues is to make  
 4 sure that the obligation appears as an obligation  
 5 to implement LNP and put a stake in the ground as  
 6 to when that needs to happen. The rest of it will  
 7 fall into place.  
 8 I mean, there's been enough study and enough  
 9 implementation of LNP where first of all there's no  
 10 one right answer. There are answers that are  
 11 faster than others. There are answers that are  
 12 more economical than others. There are answers  
 13 with more flexibility than others. And, you know,  
 14 I don't think when we've seen companies that were  
 15 members of a group that actually had pursued a  
 16 petition process like this, when it comes right  
 17 down to their implementation it's different for  
 18 every one of them or there are variations among the  
 19 group.  
 20 I don't think, you know, a working group at  
 21 this point would rehash the science that has  
 22 already been implemented. Again, I would say a  
 23 stake just needs to be put into the ground and if  
 24 you can put a stake firmly in the ground and make  
 25 sure everybody believes there's an obligation to

1 get to that stake, then in the natural course of  
 2 the business affairs things will get done.  
 3 CHAIRMAN SAHR: Along those lines  
 4 you mentioned -- you gave a recommendation for  
 5 Faith, and I realize -- as far as when a deadline  
 6 for suspension would be appropriate, and I realize  
 7 that your position is that you'd rather not see any  
 8 delay.  
 9 At the same time, looking forward at the  
 10 potential options strictly from a hypothetical, not  
 11 to hold your company to this, we're trying to  
 12 grapple with if this does, in fact -- if they can,  
 13 in fact, prove their case as far as suspension is  
 14 concerned, how long should that suspension be.  
 15 Would you please comment on what you think  
 16 would be appropriate periods of suspension or  
 17 suspensions?  
 18 THE WITNESS: Sure. Well, what  
 19 we're talking about is how quickly is it practical  
 20 for them to get the work done, even though, you  
 21 know, we could argue about where they should be  
 22 today versus where they are. I've seen proposals  
 23 from Qwest that says they can implement the transit  
 24 solution that we suggested as an option within  
 25 three weeks.

1 I know from my experience with implementation  
 2 and number portability and from testimony from  
 3 other telephone companies that the activation of  
 4 number portability on a switch in most cases is not  
 5 a long interval process. Now, in fact, in most  
 6 cases the software is already loaded on the switch,  
 7 you just need to send a purchase order to Nortel  
 8 and they'll activate the software for you. And  
 9 then, of course, you have to test it after that and  
 10 there's a process associated with that.  
 11 So, you know, the technical timeline probably  
 12 isn't as long as you might think it to be. I  
 13 think, you know -- I don't know when your order  
 14 date is on this particular proceeding, but I think  
 15 the FCC has set up a, you know, reasonable  
 16 guideline -- their expectation by the time they say  
 17 yes or no to an application that things can get  
 18 done within 60 days.  
 19 CHAIRMAN SAHR: And if we were to  
 20 grant a suspension and set it for a certain amount  
 21 of time, what would be the process for reviewing if  
 22 that time period should be extended or not? And I  
 23 ask it knowing maybe the FCC's already answered  
 24 that question or maybe they haven't. Do you know  
 25 the answer to that question?

1 THE WITNESS: I think once you set a  
 2 time frame that, I mean, it is -- it becomes an  
 3 absolute time frame, and to the extent that  
 4 carriers aren't able to meet that mandated time  
 5 frame, they would be subject to whatever remedies  
 6 exist for, you know, being in noncompliance.  
 7 CHAIRMAN SAHR: And when we were  
 8 analyzing your proposal that was put up and you  
 9 talked about using Qwest, are there differences  
 10 between using Qwest and SDN?  
 11 THE WITNESS: Yeah. I think SDN  
 12 could be implemented today. And, again, we're  
 13 talking about an interim let's get this thing done  
 14 approach versus what might be the more elite  
 15 endgame approach. But we heard yesterday that SDN  
 16 provides a centralized tandem function for equal  
 17 access for all of these carriers, that trunks  
 18 already exist into that equal access tandem, and  
 19 that those are toll trunks today.  
 20 But we also went through some math that  
 21 indicated that the telephone companies would have  
 22 to absorb costs if they sent traffic to port  
 23 numbers down those toll trunks and that number was,  
 24 in my opinion, more expensive than if they would go  
 25 through the Qwest transit option but it's

1 immediately available to them once they perform the  
 2 translations on their switch.  
 3 So that would be -- I mean, in terms of  
 4 getting going and particularly in terms of the fact  
 5 there's not going to be an instant, you know,  
 6 uptake in volume here. We're talking about a  
 7 process where we have to start selling our services  
 8 to wireline customers so it's going to be a slow  
 9 ramp-up, and the traffic volumes in the beginning  
 10 are likely to be very low for several months until  
 11 we get some traction in terms of marketing and  
 12 until word of mouth gets around about the options  
 13 that are available.  
 14 So we're looking at a very kind of slow  
 15 ramp-up and faster uptake, you know, months out.  
 16 So a solution like using SDN and existing toll  
 17 trunk groups, I mean, that could be done with very,  
 18 very modest, I mean, not even in the rounding kind  
 19 of costs and that could be followed on after, you  
 20 know, agreements or relationships were built with  
 21 other -- Qwest, for example, or different facility  
 22 arrangements were established with SDN that allowed  
 23 these telcos to separate the toll traffic from the  
 24 local traffic.  
 25 CHAIRMAN SAHR: And then my last

1 question is one that relates more towards the  
2 actual charge that might end up being either  
3 absorbed by the provider or else passed on to the  
4 consumer.

5 We heard testimony about how that charge  
6 under -- I don't know if it's under the Act or  
7 under FCC regs or rules or Orders set and then is  
8 fixed, meaning that, okay, an Order comes out  
9 saying you will do this, they peg their charge, I  
10 assume, and then if the costs rise, there's no way  
11 to go back and review that. And I know part of  
12 this kind of came into the question of, well, how  
13 many wireless carriers are there going to be out  
14 there.

15 But do you know as far as how that costing  
16 part will work if there is a surcharge and is that  
17 fixed or are there ways for our Commission to give  
18 reasonable flexibility to acknowledge that the  
19 market may change?

20 THE WITNESS: Well, I think there is  
21 precedent that the surcharge can be adjusted. And  
22 Bell South just was referenced yesterday but they  
23 had some incremental costs that they were going to  
24 incur for intermodal LNP over and above the LNP  
25 they had deployed for CLECs. And they went to the

1 four days and we are porting with wireline carriers  
2 today and going through that four-day process. The  
3 FCC uses one of its -- an industry organization,  
4 the North American Numbering Council, to deal with  
5 this kind of thing and they've asked them to come  
6 up with a recommendation as to what -- about  
7 shortening that porting interval.

8 That recommendation was issued in May. It  
9 basically said, you know, if reducing the porting  
10 interval is going to be a high-cost item for  
11 telephone companies that have invested a lot in  
12 their IT infrastructure, to do the four day, but  
13 for companies that are already using largely a  
14 manual process, you know, there's not a lot of  
15 impact.

16 They also recommended that the interval --  
17 before any interval happens that the FCC provide  
18 two years of notice before that implementation.  
19 Now the FCC has this under consideration right now,  
20 and when they'll actually order it, I don't know.  
21 But it's at least, according to the recommendation,  
22 two years away before any reduction would be made.  
23 The reduction that was recommended was from a  
24 four-day to a two-day interval, not to the two and  
25 a half hours that wireless carriers would liked to

1 FCC, and the FCC basically said, yes, you can  
2 adjust your surcharge to reflect the incremental  
3 costs and they granted that not only to Bell South  
4 but to other carriers similarly situated.

5 I think it's important to understand that the  
6 methodology of the recovery mechanism was built  
7 based on the assumption which is still correct  
8 today that almost all the costs associated with  
9 number portability are one-time costs, and in spite  
10 of the cost structure we have seen where it's  
11 contingent upon if there are three or five wireless  
12 carriers in the marketplace, a tandem routing  
13 solution, whether it's SDN or Qwest or some other  
14 tandem routing, is not wireless carrier dependant.  
15 It is traffic dependant and traffic is driven by  
16 how many customers pour out, not by necessarily how  
17 many competitors there are in the market.

18 So, you know, you don't have to worry about  
19 this, you know, prediction of how many wireless  
20 carriers are going to be operating in your market.  
21 And then we also heard that, you know, the  
22 timeline -- the port processing interval, you know,  
23 that that might be subject to change and, in fact,  
24 the FCC has taken that under review.

25 Currently the interval for wireline ports is

1 have seen. So it's a four-day to a two-day  
2 interval. I don't think that that uncertainty  
3 changes any of the financial circumstances for the  
4 Petitioners in this state.

5 CHAIRMAN SAHR: Thank you.  
6 MR. SMITH: It's 12:15. Do we want  
7 to take a break now or proceed with his total  
8 testimony, or how do you want to do that? Take a  
9 break?

10 MR. COIT: That would be fine. I  
11 just have a question for you. I can't recall. Did  
12 I offer into evidence SDTA Exhibits 3 and 4? If I  
13 didn't, I would like to do that now.

14 MR. SMITH: 4, didn't we take  
15 judicial notice of that? I think we just labeled  
16 it.

17 MR. COIT: If I didn't offer the  
18 other one.

19 MR. SMITH: 3 you didn't offer.

20 MR. COIT: I would like to offer  
21 that now at this time.

22 MR. WIECZOREK: No objection.

23 COMMISSIONER BURG: Which was 4?

24 MR. SMITH: 4 was the ITC contract,  
25 and we judicially noticed it yesterday so it's

1 already part of the record.  
 2 Let's take a break and give everybody a  
 3 chance -- 1:30.  
 4 (A lunch recess is taken)  
 5 MR. SMITH: We're back on the  
 6 record. We were in the Commissioner question  
 7 portion of the examination here, and are you done,  
 8 Bob?  
 9 CHAIRMAN SAHR: Yeah.  
 10 MR. SMITH: Jim, do you have  
 11 questions?  
 12 COMMISSIONER BURG: I have a few.  
 13 They're kind of along the same line. I don't want  
 14 to be repetitive. Some of the issues I had are the  
 15 same ones Commissioner Sahr brought up.  
 16 Do you feel that every utility or every  
 17 company should be treated individually, each one  
 18 should be looked at?  
 19 THE WITNESS: Yes, I do.  
 20 COMMISSIONER BURG: But then when  
 21 you talked about the benefits of competition were  
 22 you talking every single company, or were you  
 23 talking in generality?  
 24 THE WITNESS: Well, I think the  
 25 benefits of competition as they would be applied

1 would be specific to the companies.  
 2 COMMISSIONER BURG: So then one of  
 3 the questions that came to my mind is what benefits  
 4 of competition can you identify for some of the  
 5 individual companies that we have before us today?  
 6 THE WITNESS: Well, I mean, the  
 7 benefits of competition will allow their consumers  
 8 a choice in who they can get their service from and  
 9 still maintain their same telephone number.  
 10 COMMISSIONER BURG: You know, is  
 11 choice always -- you know, is choice always that  
 12 beneficial? I'm getting at the fact that, you  
 13 know, I've grown up -- I remember before we had  
 14 electric power, central electric power at our farm,  
 15 and we were just pretty fortunate to have one  
 16 provider let alone competitive ones. And sometimes  
 17 your service deteriorates when you have more than  
 18 one in a very, very small market.  
 19 But beyond that -- not more than beyond the  
 20 competition, I'm interested in how much LNP  
 21 enhances that competition. You've already  
 22 indicated or testified that you are competing now;  
 23 is that correct?  
 24 THE WITNESS: We are competing now.  
 25 And LNP enhances the competition because for a

1 certain segment of the population their telephone  
 2 number is an important piece of their identity in  
 3 terms of how to communicate with them, and, you  
 4 know, it's not every person --  
 5 COMMISSIONER BURG: Do you feel  
 6 that's true in most of the companies that are in  
 7 front of us, consumers in those companies?  
 8 THE WITNESS: I believe that whether  
 9 it's a rural or an urban consumer that the  
 10 telephone numbers can become important to an  
 11 individual.  
 12 COMMISSIONER BURG: How much greater  
 13 would your customer base be if LNP had been in  
 14 force for, say, the last five years?  
 15 THE WITNESS: You know, that's hard  
 16 to say.  
 17 COMMISSIONER BURG: And what  
 18 percent -- what percent of your business can you  
 19 attribute to LNP being available in the nonrural  
 20 areas, your business growth in the period that it's  
 21 been available?  
 22 THE WITNESS: We actually haven't  
 23 implemented our marketing plan to target wireline  
 24 customers as of yet. We've held off because of the  
 25 fragmented nature of the marketplace today. So we

1 haven't aggressively attacked the wireline market.  
 2 COMMISSIONER BURG: Have you had  
 3 that situation any place in your national  
 4 footprint?  
 5 THE WITNESS: We have just  
 6 implemented number portability in January of 2004  
 7 this year.  
 8 COMMISSIONER BURG: So at this point  
 9 everything that you talk about as being beneficial  
 10 is theoretic? You don't have any --  
 11 THE WITNESS: We've only got really  
 12 about a month's worth of experience -- actually  
 13 today a month's worth of experience in rural areas,  
 14 and in that month's time we've probably had 5 to  
 15 800 wireline to wireless ports.  
 16 COMMISSIONER BURG: Basically the  
 17 benefits that you've advocated extremely pretty  
 18 much so here so far are theoretical, and you don't  
 19 have any empirical data LNP availability has  
 20 enhanced your customer base then?  
 21 THE WITNESS: Other than the one I  
 22 just gave you, no.  
 23 COMMISSIONER BURG: What did you  
 24 give?  
 25 THE WITNESS: I said we ported 5 to

643

1 800 wireline numbers in the last month.  
 2 COMMISSIONER BURG: South Dakota?  
 3 THE WITNESS: System wide.  
 4 COMMISSIONER BURG: That's the  
 5 challenge I think we have here is given the cost  
 6 that we've seen, even to me if it's only a quarter  
 7 increase in the state, we've denied increases for  
 8 E911 or 911 because of a quarter or 50 cents or a  
 9 small number.  
 10 So, I mean, I think you indicated that you  
 11 agree it's pretty hard to put a figure on that  
 12 number depending on the individuals because a  
 13 quarter to some people's phone number is difficult,  
 14 a quarter a month on top of all the other things  
 15 that's been added to it. That's the difficulty  
 16 that I have here.  
 17 I'm trying to find out what the benefits would  
 18 be to those consumers as compared to what the costs  
 19 would be to people who don't even get any benefits  
 20 or don't want any of the benefits.  
 21 If we had a cost-causer, cost-payer -- and I  
 22 know in the testimony we've heard so far we've had  
 23 several people mention do you offer DSL or  
 24 something? Well, usually if you want DSL, you have  
 25 to pay for it. In this case if you want LNP,

644

1 basically somebody else is paying for it, or it  
 2 isn't there.  
 3 THE WITNESS: There are other  
 4 examples where a cost-causer doesn't pay for the  
 5 costs of the implementation.  
 6 COMMISSIONER BURG: I agree, but I  
 7 don't know many where I feel there's less what I  
 8 see in benefit, evidentiary benefit. Because  
 9 you're able to compete, you are competing, people  
 10 are buying your service, people are buying both  
 11 services in most cases, and the kind of costs we're  
 12 talking about I want to see and I want to give you  
 13 the opportunity to give me some numerical value in  
 14 LNP in these companies that we have here.  
 15 You indicated a couple were evident to you you  
 16 didn't think the value would be there. I want to  
 17 give you a chance to convince me some of these  
 18 others there will be that much value to this  
 19 expense.  
 20 THE WITNESS: It's hard to give  
 21 experiential information for something that hasn't  
 22 been experienced yet. But the studies that I  
 23 referred to in my testimony and the studies that  
 24 we've conducted would indicate that our projections  
 25 of ports, intermodal ports in these telephone

645

1 companies' service areas over the next five years  
 2 are in line with projections made by several  
 3 independent organizations, as well as by, you know,  
 4 our recent survey we've taken of rural consumers.  
 5 COMMISSIONER BURG: Is this part of  
 6 what you're referring to?  
 7 THE WITNESS: That's Western  
 8 Wireless's internal survey. I had cited additional  
 9 independent studies from PriMetrica and others that  
 10 indicate a wireline to wireless migration  
 11 facilitated by number portability over the next --  
 12 they've forecasted for different periods of time  
 13 and those forecasts range everywhere from, you  
 14 know, 3 or 6 percent to 50 percent.  
 15 But most of them come around and, you know, in  
 16 the 3 percent per year range, which is similar to  
 17 the experience that -- of line loss experience that  
 18 we've seen in competitive markets when LNP has been  
 19 implemented on a wireline to wireline basis.  
 20 COMMISSIONER BURG: But does this --  
 21 what in this survey that you have indicates value  
 22 of LNP?  
 23 THE WITNESS: Well, I think it  
 24 indicates that consumers are interested in having  
 25 this choice.

646

1 COMMISSIONER BURG: It indicates  
 2 that they're interested in being able to get a cell  
 3 phone. I don't see any of your questions that  
 4 refer to LNP at all. That's the thing I'm trying  
 5 to separate. I realize the value of cellphones.  
 6 THE WITNESS: I think in chart 1 the  
 7 clear example there is that, you know, 16 percent  
 8 indicated that they would replace their landline  
 9 phone with wireless only.  
 10 COMMISSIONER BURG: But not because  
 11 of LNP necessarily; right? Or at least there's  
 12 nothing in there --  
 13 THE WITNESS: LNP is clearly a  
 14 facilitator for them to make that choice. It drops  
 15 the last inhibitor.  
 16 COMMISSIONER BURG: I'm considering  
 17 replacing my landline with a cell phone, but I  
 18 don't care whether I port or not so I'm not sure  
 19 that's there.  
 20 The other point I want to bring home is you  
 21 made quite an issue of -- it was the federal policy  
 22 in the Telecommunications Act as well as the FCC  
 23 indicated they wanted local number portability as  
 24 they thought it was a national policy.  
 25 THE WITNESS: Correct.

1 COMMISSIONER BURG: But they also --  
2 and the reason we're here today is because they  
3 also saw it may not be the right thing everywhere  
4 and left options.

5 THE WITNESS: They provided for a  
6 situation like this to review it on the standards  
7 we've discussed today.

8 COMMISSIONER BURG: And you  
9 indicated two or three today that you feel probably  
10 don't make sense, if I understood what you were  
11 saying; is that correct? For example, Faith and  
12 one or two others.

13 THE WITNESS: I suggested that for  
14 three of the companies that if it were me sitting  
15 in your chair, that it might be appropriate to give  
16 them an extended suspension with a firm date. And  
17 I suggested that that would be March 31 of next  
18 year. And they'd have the opportunity to come back  
19 before the Commission if they still felt that it  
20 was a burden for them to implement LNP at that  
21 time.

22 COMMISSIONER BURG: So for us to  
23 decide, it's a matter of degree, you know, what is  
24 the right level.

25 One last question from me. You mentioned too

1 of the areas.

2 THE WITNESS: I'll likewise try not  
3 to be redundant.

4 VICE CHAIR HANSON: Appreciate it.  
5 I'm not positive where to begin. I'll start a  
6 little bit on the information that you provided,  
7 Western Wireless No. 9.

8 The information -- and these are just general  
9 questions. I don't think you're going to have to  
10 refer to anything on it. Would you consider that  
11 this option is the least expensive of the options?

12 You'll recall through a lot of the  
13 conversations that we've had with managers and  
14 other folks during the processes here earlier we  
15 were asking them if they didn't come up with the  
16 most expensive one, and I'm wondering a couple of  
17 things. Number one, did you come up with the least  
18 expensive method, and, secondly, is this the best  
19 practice?

20 THE WITNESS: Well, let me answer  
21 that in two ways. This is among the less -- our  
22 proposal, which we're suggesting might be tandem  
23 routed based solution, is among the least  
24 expensive. For some of the companies I think an  
25 option was discussed yesterday regarding routing

1 in the benefits of LNP was number conservation. Do  
2 you think that's an issue in South Dakota?

3 THE WITNESS: I don't know if it's  
4 an issue in South Dakota.

5 COMMISSIONER BURG: I don't think  
6 we've ever had a challenge to number exhaustion in  
7 this state, you know, because of our size.

8 THE WITNESS: That's a good thing.

9 COMMISSIONER BURG: Well, it is, but  
10 it isn't. Sometimes it would be nice to have that  
11 problem with some growth. That's all I have.  
12 Thank you.

13 VICE CHAIR HANSON: Mr. Williams,  
14 good afternoon.

15 THE WITNESS: Good afternoon.

16 VICE CHAIR HANSON: Thank you very  
17 much for your prefiled testimony and the  
18 information you provided today. I appreciate it.  
19 I'm going to be -- it's pretty difficult being the  
20 very last person on the entire batting list to go  
21 through all the information. Some of it I don't  
22 mean for you to regurgitate. Some of it I'm  
23 planning on clarifying a bit. I'll be piggybacking  
24 on some of the items some of the other people were  
25 discussing, and forgive me if I'm redundant in any

1 through the SDN tandem for the traffic volumes.  
2 That even might be less expensive.

3 The genesis for this concept has been -- this  
4 is a common traffic routing scheme used in the  
5 industry today is when you've got low traffic  
6 volumes to centralize and share common facilities  
7 and then, you know, move them through a tandem  
8 where many, many carriers can connect -- and that  
9 was the motivation behind SDN and for a long time  
10 that's been what Qwest has done as kind of the  
11 routing focal point for the entire -- almost the  
12 entire state here.

13 So the concept is not new in that way. It was  
14 first applied in an LNP environment. We had it  
15 proposed to us by telephone companies, and we  
16 thought it to be a good solution. It is also the  
17 solution that was proposed by the Minnesota  
18 telephone companies.

19 The hearing that we know about that's going on  
20 today in Minnesota is not a hearing about what's  
21 the best method to use. The method there was, in  
22 essence, what we proposed here. And that method  
23 was designed and created and proposed by the  
24 Minnesota telephone companies. The hearing today  
25 is just to decide whether to give them an extra 60

1 whatever days to finish implementation of it.  
 2 So not necessarily the least expensive.  
 3 Certainly among the least expensive. And I think  
 4 there's evidence in the industry that for routing  
 5 for low volumes of traffic that tandem routing  
 6 scenarios using shared trunks is the best practice.  
 7 VICE CHAIR HANSON: You alluded to  
 8 the SDN, and in your testimony earlier I believe  
 9 you stated that you felt that that was a good --  
 10 you perhaps are not the person to necessarily  
 11 ask -- on a temporary basis, I believe you said.  
 12 Would you think on a permanent basis that the SDN  
 13 method would be --  
 14 THE WITNESS: Well, there's no  
 15 question in my mind SDN is capable of doing this.  
 16 Whether they want to or not, I don't know that, but  
 17 certainly technologically capable of doing it. The  
 18 interim piece I referred to is to route the traffic  
 19 over existing toll trunk groups that are in place  
 20 between the telco switches and the SDN tandem now.  
 21 I would think over time they would want to  
 22 migrate those, you know, away from the toll trunks  
 23 and then put them on a, you know, separate local  
 24 trunk group.  
 25 But that largely would be driven by I think a

1 price issue of SDN. SDN, I don't know what they  
 2 pay or what the cost is of shipping traffic over  
 3 that trunk group today on a toll trunk. I guess  
 4 I'm just assuming that SDN might have a different  
 5 price point if it's local traffic.  
 6 VICE CHAIR HANSON: That's why I  
 7 prefaced my question by stating that I didn't think  
 8 you were necessarily the best person to answer that  
 9 question, but I was curious on your answer.  
 10 Are there different wireless standards that  
 11 could somehow affect the porting of numbers from  
 12 one wireless company to another wireless company?  
 13 THE WITNESS: Wireless standards and  
 14 the porting of wireless to wireless are governed  
 15 under a -- well, a set of standards that was  
 16 developed by the wireless industry and came up with  
 17 a pretty comprehensive and explicit set of rules.  
 18 And what we've tried to do is simplify the porting  
 19 process because it's not -- the original porting  
 20 rules were set up for really CLEC porting, and a  
 21 CLEC port involved a lot more than just the number.  
 22 There were usually loops involved and sometimes you  
 23 had to send technicians out physically to a  
 24 location to make a port work on a CLEC. And the  
 25 time frames and intervals were designed around that

1 experience.  
 2 So wireless kind of took a fresh look at this  
 3 and said, well, when we port wireless to wireless  
 4 we don't have to worry about loops, we've just got  
 5 to make sure that number gets over there from one  
 6 carrier's network to another. They designed a  
 7 whole set of rules and sessions around that. It  
 8 doesn't work perfectly. Porting is not a perfect  
 9 science. It hasn't been in the wireline to  
 10 wireline world. It certainly isn't in the wireless  
 11 world. Our fallout percentage on ports is -- now  
 12 that we've been at it a month, has gone from  
 13 50 percent down to around 20 percent.  
 14 And when I say fallout it means it didn't work  
 15 the first time through, we've had to go back and  
 16 call somebody or validate some information or  
 17 something like that to make the process go through.  
 18 So there are issues. They're not unexpected.  
 19 And learning experience, learning curve both on a  
 20 carrier basis but also on an industry basis is  
 21 streamlining the processes daily.  
 22 VICE CHAIR HANSON: So would you say  
 23 that wireless companies could implement different  
 24 types of standards to make the porting more easy or  
 25 less expensive?

1 THE WITNESS: Well, yeah. In fact,  
 2 we port differently depending upon another  
 3 carrier's circumstances. Verizon Wireless, for  
 4 example, our porting relationship with them is  
 5 fully automated and things just happen -- it  
 6 doesn't even take two and a half hours.  
 7 There are other wireless carriers that, you  
 8 know, we're sending faxes with them and, you know,  
 9 it's a real different process. And then we are  
 10 porting with wireline companies today and we are  
 11 using a four-day interval and we're using wireline  
 12 forms to do that on versus the wireless forms we  
 13 would use.  
 14 So we are able to, you know, make  
 15 accommodations for different processes. But in the  
 16 end the actual processes, as much preparation as  
 17 you have to do for it, it's reasonably simple. If  
 18 you can envision it, somebody sends you a fax which  
 19 amounts to a port request, and obviously somebody's  
 20 receiving that fax. And they look at it, and on  
 21 there it has a customer name and a telephone  
 22 number, and it has some other validating  
 23 information.  
 24 And it also says this is the date and time we  
 25 would like this port to occur. And the person

655

1 receiving that fax is going to turn to their  
 2 customer service system and make sure that the  
 3 phone number matches up with the name and that the  
 4 proper validation information is there and they can  
 5 meet the date that was requested for the event to  
 6 happen.  
 7 That company then responds back to the new  
 8 carrier that's going to win the service and says we  
 9 can do this on the date and time you scheduled or  
 10 we can't do it on the date and time you scheduled,  
 11 we can do it a day later, you know, whatever. And  
 12 so then now you've got a request for an order, and  
 13 you've got a confirmation of an order.  
 14 The next thing that happens if you're the  
 15 provider that's porting out the number is you have  
 16 to -- you don't have to actually, but you can agree  
 17 to release the number at the -- through the SOA  
 18 process we've been talking about. That's the  
 19 service order administration process.  
 20 And the way that would work for like the help  
 21 desk method we've been talking about is a carrier  
 22 would have a relationship with NECA who handles  
 23 this -- I'm sorry. Not NECA. NPAC who handles  
 24 this. They would call NPAC's number. They would  
 25 say I have a -- this is customer identification

656

1 number, this is my password, I have number  
 2 (605) 742-1000 to release for a port on July 1 at  
 3 midnight. And that's the extent of the call. And  
 4 then NPAC will process that port as you've asked  
 5 for it to be scheduled.  
 6 The other thing that has to go on is that  
 7 you've got to set what's called a 10-digit trigger  
 8 in your switch, which just means you've got to let  
 9 your switch know that beginning on that date it's  
 10 got to route traffic to the ported number. And  
 11 then when that date comes you have to go and you've  
 12 got to just terminate -- it's like a customer  
 13 disconnect at that point, and it would be the same  
 14 process as a customer disconnect, I think. Those  
 15 are the steps involved in porting out a customer.  
 16 VICE CHAIR HANSON: Probably more  
 17 than I needed to know.  
 18 THE WITNESS: I'm sorry.  
 19 VICE CHAIR HANSON: But thank you  
 20 for answering the question so completely. One of  
 21 the challenges I have as a consumer purchasing  
 22 goods is the dynamics of the industry by which you  
 23 think is the best quality and the best type of item  
 24 and you're ready to go with it, and a month later  
 25 your son buys one that's far more advanced than

657

1 what you have.  
 2 And I imagine if I were one of these managers  
 3 trying to figure out what I'm going to do if I'm  
 4 required to have a location with number  
 5 portability, I don't want -- and it's capital  
 6 intensive. I don't want to go out and spend a  
 7 whole lot of money if a new mousetrap is being  
 8 built and there's switches that are going to be  
 9 less expensive that are going to do twice as much  
 10 as the one that's available right now. That's a  
 11 real challenge.  
 12 And so when they start looking at investments  
 13 of this nature what -- ultimately the consumer is  
 14 the one who's going to pay for it. Is there sense  
 15 in waiting for a better product?  
 16 THE WITNESS: You know, there's  
 17 always a better product around the corner, but as  
 18 I've reviewed the materials provided through  
 19 discovery on the state of these telephone  
 20 companies' networks, they have -- most of them have  
 21 very current equipment and the incremental costs of  
 22 implementing LNP, though it appears significant as  
 23 a line item, is a fraction of their toll switch  
 24 investment to date.  
 25 And it's not likely that the costs for

658

1 implementing LNP on like, for example, a Nortel  
 2 DMS-10 are going to change any time soon. It's a  
 3 solid product that's been in the marketplace for  
 4 six years now, six or seven years, and it's very  
 5 robust and, you know, don't foresee adding any  
 6 bells and whistles to the number portability piece  
 7 of the overall switch puzzle.  
 8 Now some carriers are looking at evolution  
 9 towards packet switching and all sorts of exotic  
 10 new ways to deliver services in the future. You  
 11 know, again, I think that the fractional investment  
 12 in terms of the overall switching costs that number  
 13 portability accounts for wouldn't affect those  
 14 decisions, shouldn't affect those decisions. And,  
 15 again, different companies will choose different  
 16 times and different methods to deliver the next  
 17 generation of services that are out there.  
 18 My perspective is it wouldn't be appropriate  
 19 to hold up number portability, you know, to see if  
 20 companies want to move to packet switching sometime  
 21 in the future to address Internet telephony.  
 22 VICE CHAIR HANSON: Thank you. On  
 23 page 3 of your testimony you take exception  
 24 apparently to the South Dakota Commission's ability  
 25 to make certain determinations in this case. And

1 Mr. Dickens pointed out what appear to be some  
2 conflicts in your testimony in regard to that  
3 statement.

4 As I look through the testimony and compare  
5 one item to the next and then in Mr. Watkins'  
6 testimony, his rebuttal testimony on page 6 he  
7 states that "Petitioners seek a suspension or  
8 modification, not a waiver," is this simply  
9 semantics, or is there something to that?

10 THE WITNESS: Well, I think a lot of  
11 people use the words interchangeably, I think. I'm  
12 not a lawyer, but there is a difference in the FCC  
13 waiver process and the state suspension process.

14 VICE CHAIR HANSON: Okay.

15 THE WITNESS: And I'm not -- you  
16 know, we're here in this forum obviously dealing  
17 with the state suspension process.

18 VICE CHAIR HANSON: All right. So  
19 is that a point you're willing to --

20 THE WITNESS: Concede?

21 VICE CHAIR HANSON: Yes.

22 THE WITNESS: I think we ought to  
23 finish this and get a ruling and see where we go  
24 from there.

25 VICE CHAIR HANSON: So you're not

1 conceding it, you're just saying let's play ball  
2 and see who wins the game and --

3 THE WITNESS: This is a good forum  
4 to resolve this.

5 VICE CHAIR HANSON: Well, that's  
6 encouraging. You made some statements about you  
7 had said something about providing Faith with an  
8 extension and you were giving -- hopefully  
9 conceding something, but you were stating that  
10 there were some extenuating circumstances. I'm  
11 using words you didn't use. And you referred to  
12 Faith and Stockholm and Tri-County.

13 THE WITNESS: Correct.

14 VICE CHAIR HANSON: As you were  
15 going through that, of course, I'm sure a number of  
16 us, especially managers, were running through in  
17 their mind how they compare with Stockholm and  
18 Kennebec and et cetera.

19 Excuse me. I gave up my question.

20 THE WITNESS: I don't want to give  
21 up the answer.

22 VICE CHAIR HANSON: In my own mind I  
23 was thinking Kennebec has 700 -- I looked it up as  
24 Mr. Burg was asking questions. They have service  
25 to 751 total access lines, and I didn't look up

1 Stockholm's but I recall it was like 746 or 714,  
2 somewhere, 741, somewhere in that neighborhood.

3 Where do you draw the line? Is it 750 or 820?

4 THE WITNESS: I wouldn't draw the  
5 line on a company size basis. I would draw the  
6 line on demand versus costs. And in this case  
7 we're talking about end-user costs that would flow  
8 through the end-user. And that is affected by how  
9 many lines you have, but it is not necessarily a  
10 direct correlation between lines and implementation  
11 costs.

12 So when I suggested those three as candidates  
13 that distinguish themselves I was looking at, you  
14 know, what the costs per end-user would be versus  
15 what the demand might be in that area and suggested  
16 that they stood apart from the rest of the group.

17 Like you, at lunchtime I did a little  
18 research. I had it in my mind that Kennebec was a  
19 candidate, you know, for that same group, but there  
20 was -- I had some uncertainty about my confidence  
21 level in their costs, what they've provided as cost  
22 estimates. I reviewed that at lunchtime and I  
23 would be happy to include Kennebec in the group  
24 that would distinguish itself and would suggest  
25 that -- you know, a lengthier suspension for them,

1 perhaps in the same time frame, the end of the  
2 first quarter 2005 and give them the opportunity to  
3 assess the situation.

4 VICE CHAIR HANSON: So ultimately it  
5 is true we should be looking at the consumers when  
6 we're examining these issues? We should consider  
7 demand as you have stated as one of the items that  
8 we should take into consideration, and I would  
9 assume economic burden as how that affects  
10 ultimately the consumer?

11 THE WITNESS: Yeah. The standard is  
12 adverse impact on users generally or something to  
13 that effect.

14 VICE CHAIR HANSON: One of the other  
15 items is technological feasibility, and, of course,  
16 I don't know that that's being argued anywhere, but  
17 certainly public interest and convenience, cost to  
18 consumer are all items that we should be looking  
19 at.

20 One last -- I believe one last series of  
21 questions, using Kennebec as an example. If a  
22 Kennebec customer switched his wireline number to a  
23 wireless and then moved to Sioux Falls, who would  
24 be responsible for the transport obligations of  
25 that?

1 THE WITNESS: If a customer wished  
 2 to do that, and there may be a few that would, but  
 3 understand that when a customer did that they would  
 4 not be able to receive local calls from  
 5 Sioux Falls. They'd only be able to receive local  
 6 calls from Kennebec, Kennebec's rate center.

7 VICE CHAIR HANSON: George's family  
 8 is all -- fictitious George is all around Kennebec  
 9 and he's moving with his spouse who is also from  
 10 Kennebec. And Susie's got a lot of family there,  
 11 and they want to be able to make those calls.

12 THE WITNESS: To the extent that  
 13 they're making calls to Kennebec on our network,  
 14 Western Wireless is paying to transport those calls  
 15 back to Kennebec.

16 VICE CHAIR HANSON: So they're using  
 17 their number from the Kennebec exchange.

18 THE WITNESS: Right.

19 VICE CHAIR HANSON: Isn't Kennebec  
 20 paying?

21 THE WITNESS: No. Kennebec would  
 22 only pay for -- or pay the transport, be  
 23 responsible for the transport from calls that are  
 24 originated by Kennebec customers in the Kennebec  
 25 rate center to George and his family.

1 VICE CHAIR HANSON: I didn't  
 2 understand it quite that way. Okay. What happens  
 3 if they move to Montana?

4 THE WITNESS: Well, then nobody in  
 5 Montana is going to be able to call them locally.  
 6 And this is an anomaly of number porting. And, you  
 7 know, I'm not saying it couldn't happen, but a  
 8 customer would come in to us that wanted to port a  
 9 phone number. I can't think of the circumstance we  
 10 would recommend to that customer if they were  
 11 relocating that they would keep the number from  
 12 where they were relocating from.

13 I mean, but again ultimately it boils down to  
 14 customer choice. And the fact that a customer  
 15 ports their number and remains a neighbor in the  
 16 same rate center or a customer ports their number  
 17 and moves across town or a customer ports their  
 18 number and is on temporary assignment in, you know,  
 19 Sioux Falls, to me that's part of the power of  
 20 choice is that the customer gets to make that  
 21 choice.

22 The fact that the customer is next door or  
 23 across town or in Sioux Falls didn't change the  
 24 routing circumstances we've been talking about here  
 25 for a few days.

1 VICE CHAIR HANSON: I may need some  
 2 further clarification in my mind. And I won't ask  
 3 you to do it here, but I am curious as to the  
 4 financial responsibilities and transporting  
 5 responsibilities of situations of that nature and  
 6 the complexity of challenges that has on our LECs.

7 So if you have anything further to share on  
 8 that, I'd appreciate hearing it right now. I'll  
 9 look forward to someone else sharing some  
 10 information later.

11 THE WITNESS: I could take you  
 12 through it pretty quickly. There are these  
 13 diagrams that have been up here this morning that  
 14 speak exactly to that in terms of responsibility  
 15 and options that -- a couple of the options that we  
 16 have talked about. They are an abstract form.  
 17 They're not the nice turkey rainbow that we've seen  
 18 before, but they take it down to a really simple  
 19 level as to what we're talking about in terms of  
 20 how calls are routed and who's responsible for the  
 21 costs associated with -- based on where a call  
 22 originates.

23 If you don't mind --

24 VICE CHAIR HANSON: If you'd like to  
 25 do it quickly, yes.

1 THE WITNESS: This is today's world  
 2 where we have no ports. And this blue area here is  
 3 the --

4 VICE CHAIR HANSON: Excuse me for  
 5 interrupting. That is an exhibit?

6 MR. WIECZOREK: It is an exhibit,  
 7 and I also have extra copies if it's easier to look  
 8 at an extra copy rather than dig it out of the  
 9 exhibits.

10 VICE CHAIR HANSON: It's on the back  
 11 of your testimony, your written testimony.

12 (Discussion off the record)

13 THE WITNESS: This blue area here  
 14 represents the rate center that we're talking  
 15 about. And in that rate center there's a switch, a  
 16 telco switch, and we have two wireline customers  
 17 here. They may be neighbors. And today a local  
 18 call goes -- you know, this customer picks up the  
 19 phone, calls the neighbor. The call goes to the  
 20 switch and terminates on the neighbor's telephone  
 21 and away we go.

22 That neighbor might also have a wireless phone  
 23 and using it in the same area. Today when this  
 24 wireless -- when this person calls this person from  
 25 a wireless phone, wireless phone goes to the cell

1 site, the cell site is connected to Western  
 2 Wireless's switch. In order for Western Wireless  
 3 to get that call delivered to this phone we  
 4 transport it to the LATA tandem, and we hire Qwest  
 5 to deliver it to the telco end office. And then  
 6 the telco delivers it to the phone.

7 Now in terms of compensation on that, first of  
 8 all, the routing responsibility is Western's  
 9 because it's our customer originating the call or  
 10 our network originating the call. And, of course,  
 11 it has to get back to our switch. Now we hire  
 12 Qwest to do this for us because it's cheaper for us  
 13 to do it that way when traffic volumes are low.  
 14 And so we pay them roughly three-tenths of a cent  
 15 to take the call from our interconnection here and  
 16 deliver it here.

17 And then per our Interconnection Agreements in  
 18 South Dakota we pay the telephone company for  
 19 termination of the call, the end office switching  
 20 termination of the call to that customer. So  
 21 that's what's happening today.

22 Now if this cell phone doesn't have a local  
 23 number and the neighbor wants to call the neighbor  
 24 but they want to call them on their cell phone,  
 25 that's going to be a toll call. This customer's

1 THE WITNESS: In most cases. Let's  
 2 talk about this one first because this is what is  
 3 represented in the Interstate exhibit that was what  
 4 we had proposed as our solution.

5 In this condition you've got a circumstance  
 6 where the neighbor now has ported their numbers to  
 7 wireless and, you know, we have a wireless phone  
 8 represented here as a neighbor and a wireline here.  
 9 Again, this person calls the neighbor on the same  
 10 phone number they called before, and what we're  
 11 suggesting is that the telephone company who's  
 12 still responsible for delivering that local phone  
 13 call would route the call to the LATA tandem, in  
 14 essence, hire Qwest to deliver the call to Western  
 15 Wireless and then Western Wireless would terminate  
 16 the call here.

17 And the reverse in this -- in this case it is  
 18 exactly the reverse. The wireless user contacts  
 19 the landline user. The call goes through here.  
 20 Western Wireless then hires Qwest to move the call  
 21 this way. And so, I mean, there's symmetry in that  
 22 when the call originates on Western Wireless's  
 23 network we hire Qwest to deliver it to the telco.  
 24 When the local call originates on the telco the  
 25 telco hires Qwest to deliver the call to Western

1 going to have to dial 1 plus to make that phone  
 2 call. That call is going to go to the telco end  
 3 office. The telco's going to see it's a 1 plus  
 4 toll call and they're going to route that to the  
 5 SDN tandem where it will be picked up by a long  
 6 distance carrier, go through the long distance  
 7 carrier's network, delivered to the Qwest tandem,  
 8 delivered to us, and delivered to the phone.

9 In that scenario compensation works quite a  
 10 bit differently because it's toll. You've got the  
 11 originating carrier for a toll call collects access  
 12 on that. The interexchange carrier collects retail  
 13 long distance. The terminating carrier, in this  
 14 case Qwest, the transit carrier, collects  
 15 terminating transit, and then we terminate the  
 16 call. That's the circumstances that exist today.

17 COMMISSIONER BURG: Before you move  
 18 that, if they both had a cell phone, it just goes  
 19 to the cell tower and back; right?

20 THE WITNESS: If there were two  
 21 cellphones here, actually back to the switch and  
 22 out the other.

23 COMMISSIONER BURG: Still have to go  
 24 through the switch, can't just be handled through  
 25 the tower; right?

1 Wireless. That is the proposal we made.

2 And again --

3 VICE CHAIR HANSON: May I ask a  
 4 question at this point, and perhaps you'll answer  
 5 it on the next one. In the example I gave where  
 6 the person with the cell -- with the wireless moved  
 7 outside of the coverage area, and the person who's  
 8 still living inside the coverage area makes a phone  
 9 call, is there going to be an increase in cost to  
 10 the LEC?

11 THE WITNESS: No. If this phone --  
 12 and this is a real -- George's family. George  
 13 moves from Kennebec's rate center, Presho, and  
 14 moves to Sioux Falls where the tandem happens to be  
 15 located. The situation in terms of routing doesn't  
 16 change at all. The call will still be treated as  
 17 local because the rate center of the call is here.  
 18 And the telco will still have the responsibility of  
 19 getting that to Western's point of interconnection  
 20 here.

21 They can still hire Qwest to do it at the same  
 22 rate, the same circumstance. Qwest is still going  
 23 to deliver that to Western Wireless. Western  
 24 Wireless is just going to use a different cell site  
 25 to terminate to the wireless phone. So from a LEC

1 or telco routing perspective, the circumstances  
 2 aren't any different whether this call is made to  
 3 the neighbor that's physically located 100 yards  
 4 away or made to that phone when it's 100 miles  
 5 away.  
 6 VICE CHAIR HANSON: Or in a  
 7 completely different area, Florida.  
 8 THE WITNESS: No difference.  
 9 VICE CHAIR HANSON: Okay.  
 10 COMMISSIONER BURG: Just that  
 11 there's more cost; right?  
 12 THE WITNESS: No more cost. No.  
 13 The cost would remain the same. When somebody is  
 14 in Florida what happens is, again, they'll be  
 15 dialing a local number. That gets routed to the  
 16 tandem, gets delivered to Western Wireless.  
 17 Western Wireless turns around and puts it on an  
 18 interexchange carrier network, and Western Wireless  
 19 pays that cost.  
 20 VICE CHAIR HANSON: In this  
 21 situation George is in Florida making the call. Is  
 22 he originating with a Kennebec phone number --  
 23 THE WITNESS: Once the number was  
 24 ported, it would be a Western Wireless phone  
 25 number, and nowhere in the national routing

1 reference tables would Kennebec even show up as the  
 2 owner of that call or that traffic in any way.  
 3 What would happen is if they made that call  
 4 from Orlando back to this number or back to  
 5 anywhere in South Dakota, the carrier in Orlando,  
 6 the wireless carrier in Orlando, would hand that  
 7 call off to an interexchange carrier in Florida.  
 8 That interexchange carrier would deliver that call  
 9 back to this Qwest tandem, and Qwest would deliver  
 10 it to Western Wireless, if it was to another  
 11 wireless call, and Qwest would deliver it --  
 12 actually Qwest would deliver it to Presho as a  
 13 terminating access call, and Presho would collect  
 14 terminating access on that call. I'm sorry. I've  
 15 confused myself.  
 16 Presho's not in the -- if we've ported the  
 17 number, Presho's not in the deal anymore. The call  
 18 would terminate here to Western Wireless's point of  
 19 interconnection, and Western Wireless would  
 20 terminate it. So the wireless phone if the call  
 21 was made from Florida on the wireless phone, the  
 22 long distance carrier would terminate it to the  
 23 Presho exchange, and it would terminate to the  
 24 called wireline number. In that circumstance  
 25 Presho would collect terminating access from the

1 long distance carrier.  
 2 VICE CHAIR HANSON: Okay. Thank  
 3 you.  
 4 THE WITNESS: One other scenario  
 5 which we've also talked about and which is in place  
 6 in many -- or several but not all conditions. And  
 7 that's where we've added one thing to this diagram,  
 8 and it's this direct connection between the  
 9 wireless switch and the telco switch.  
 10 These are in places where it makes economic  
 11 sense to have them in place, where there's a fixed  
 12 cost associated with direct connects. We know that  
 13 from looking at the cost estimates made by the  
 14 Petitioners yesterday. There's investment costs  
 15 and then there's a recurring fixed cost, which is  
 16 high, and in order to justify that cost you've got  
 17 to send a lot of traffic over that facility.  
 18 Because what you get when you get a direct connect  
 19 is you get a certain amount of capacity, and you  
 20 pay a certain amount of money. And if you don't  
 21 use much of the capacity, your cost per minute is  
 22 hyperinflated. But if you are using a lot of the  
 23 capacity, if you're designing for that volume of  
 24 traffic, your cost per minute is actually less than  
 25 hiring Qwest to do the work for you.

1 And, again, in certain circumstances we do  
 2 have this, and, in fact, it was that level of  
 3 traffic exchange we have with James Valley that  
 4 helped bring that deal to closure. Again, unique  
 5 and different because Western has a different  
 6 traffic relationship with each one of these  
 7 carriers.  
 8 COMMISSIONER BURG: Can I ask one  
 9 question?  
 10 VICE CHAIR HANSON: Thank you, John.  
 11 COMMISSIONER BURG: Would James  
 12 Valley -- in the case of James Valley do they pay  
 13 anything for the use of that line if it originated  
 14 on their landline?  
 15 THE WITNESS: What we've agreed with  
 16 James Valley was to -- actually we've agreed --  
 17 Northern Valley is in the middle of that  
 18 relationship as a CLEC that is providing this  
 19 circuit for us, but what we've agreed to is Western  
 20 Wireless is going to pay a certain rate which  
 21 may -- which isn't necessarily the full cost of  
 22 this circuit, and then the traffic exchanged across  
 23 that circuit, if the traffic is going from Western  
 24 Wireless to James Valley, James Valley would  
 25 collect reciprocal compensation, and if the traffic

1 is going from James Valley to Western Wireless,  
 2 Western Wireless would collect reciprocal  
 3 compensation.  
 4 VICE CHAIR HANSON: I fear I made a  
 5 friend in Kennebec, and I may have alienated all of  
 6 the rest.  
 7 CHAIRMAN SAHR: Vice Chairman  
 8 Hanson, do you mind if I ask a question about the  
 9 post-port tandem routing?  
 10 VICE CHAIR HANSON: Please do.  
 11 CHAIRMAN SAHR: This may not be the  
 12 right diagram to discuss this issue, but since  
 13 we're going through some of these scenarios, what  
 14 about the situation where I have a cell phone or a  
 15 wireless phone and the number is not local for that  
 16 particular community as far as the landlines are  
 17 concerned, and then I port my landline to my  
 18 wireless phone and then I've essentially gone from  
 19 people having to make a toll call to people being  
 20 able to call me as if it's a local call?  
 21 Is there any sort of associated loss to  
 22 revenue, and who bears that, if there is?  
 23 THE WITNESS: Yeah. We have that  
 24 circumstance today and let me take it in pieces.  
 25 The first circumstance you said was we have a

1 mobile user who does not have a local number. And  
 2 the way things work for that, if it's a wireline  
 3 call, that mobile user, that's going to look like a  
 4 toll call. This user is going to pay toll charges  
 5 to their retail toll provider. The telephone  
 6 company is going to collect originating access on  
 7 that, whatever their originating access rate is.  
 8 So that's kind of compensation mechanism there.  
 9 Then you asked what would happen if the  
 10 wireline customer was able to port their number to  
 11 the mobile line and thereby making that a local  
 12 call? Well, a local call then won't have any  
 13 incremental charges associated with it. There will  
 14 be no toll provider involved. And what happens  
 15 then is that the originating carrier has an  
 16 obligation to deliver the call to the terminating  
 17 carrier so this will route this way, you know,  
 18 three-tenths of a cent per minute and Western will  
 19 terminate the call.  
 20 So the revenue loss when a customer ports  
 21 their number from any -- well, from any company  
 22 really to another company is you not only lose, you  
 23 know, the obvious monthly recurring charge, but you  
 24 in this case in the sense that it's no longer a  
 25 toll number, the telephone company is no longer

1 going to be able to collect access on calls because  
 2 you've traded a long distance number for a local  
 3 number.  
 4 And, you know, again, that's the whole  
 5 argument -- not argument, but the whole basis of  
 6 connecting ported numbers to a rate center. You're  
 7 not allowed to port numbers out of a rate center  
 8 and change the way rating is done on calls by doing  
 9 that. You have to maintain the integrity of the  
 10 current rate centers and thereby the current rating  
 11 scheme, whether it's local or toll.  
 12 CHAIRMAN SAHR: Thank you.  
 13 VICE CHAIR HANSON: I'm done. Thank  
 14 you.  
 15 MR. SMITH: Jim.  
 16 COMMISSIONER BURG: I had just a  
 17 couple of quick ones. One of them was as a result  
 18 of Commissioner Hanson's questions you went through  
 19 a discussion about, you know, what the different  
 20 people could do. The problem I really have with  
 21 the whole thing is that the people that caused this  
 22 additional cost don't ever really see that cost.  
 23 There's no incentive to not do uneconomic things  
 24 for them. Because it's not reflected that I can  
 25 see. Is that correct or not?

1 THE WITNESS: Anybody who ports  
 2 their number will be paying port charges up until  
 3 the time they port and will be paying port charges  
 4 to the company they port to. And so, you know,  
 5 they are contributing to the cost of local number  
 6 portability.  
 7 COMMISSIONER BURG: But aren't there  
 8 situations where they could be saving money by  
 9 porting some of the things we've had, adding a lot  
 10 of cost to all parties, maybe including Western  
 11 Wireless, and they don't see those additional  
 12 costs?  
 13 THE WITNESS: Well, I mean, I think  
 14 that's part of the value proposition that they look  
 15 at, you know. And as a competitor I know that's  
 16 what we look at in terms of what we offer in the  
 17 marketplace is what incentives, what value do we  
 18 have to put in front of a consumer so that they'll  
 19 choose us instead of someone else.  
 20 And I think that when we put a value  
 21 proposition on the table we have to look at our  
 22 bottom line and say can we afford to make that  
 23 offer.  
 24 COMMISSIONER BURG: I wanted to ask  
 25 just one more question to make sure I understand

<p>679</p> <p>1 this completely. If I just take the first page, 2 we'll just take Brookings. It could fit for any of 3 them. 4 If I understand this right, if you go to the 5 complete lower right-hand number, the .96 or just 6 under a dollar is what Western Wireless's system 7 that they're proposing would cost that customer per 8 month; is that correct, for local number 9 portability? 10 THE WITNESS: That would be 11 including the transport costs. The number above it 12 would be excluding transport. And that also 13 includes -- and then the numbers -- let's take the 14 numbers. .96 includes transport, and it includes a 15 12 percent allotment for taxes, excise taxes, sales 16 taxes, surcharges. 17 The .76 does not include transport, but does 18 include the allotment for taxes. The .85 includes 19 transport but no allotment for taxes. And the .68 20 is no transport and no allotment for taxes. 21 COMMISSIONER BURG: But for you for 22 what I would call your scenario of the ideal setup 23 would be the .96, everything's covered, and that's 24 what the local number portability cost would be to 25 the customers in the Brookings telephone system.</p>	<p>681</p> <p>1 Western Wireless's ports per year. 2 COMMISSIONER BURG: So you think 3 you'll get 496 ports per year. So yours is based 4 on -- 5 THE WITNESS: It represents about 6 3 percent of their landlines. 7 COMMISSIONER BURG: There's a huge 8 discrepancy between what the companies think would 9 be porting and what you think would be porting per 10 year; is that correct? 11 THE WITNESS: For Brookings there 12 appears to be. 13 COMMISSIONER BURG: There is a huge 14 difference. I don't know how we rectify that. I 15 just wanted to make sure I understood. 16 MR. SMITH: I had a couple of 17 questions. On the \$1.70 surcharge that you have, 18 do you know what portion of that is attributable to 19 LNP? 20 THE WITNESS: I don't know exactly. 21 I would say more than half. 22 MR. SMITH: More than half? 23 THE WITNESS: Uh-huh. 24 MR. SMITH: So your LNP surcharge, 25 then that would be somewhere along about 85 cents,</p>
<p>680</p> <p>1 THE WITNESS: This is the local 2 number portability costs that's been derived to 3 compare with what the Petitioners put forward. As 4 I understand their testimony yesterday, they said 5 this would not necessarily equate to the end-user 6 charge. 7 COMMISSIONER BURG: No. If you were 8 going to recover it, it would. Anyway -- 9 THE WITNESS: Yeah. 10 COMMISSIONER BURG: Well, I mean, 11 I'm just taking your description. Local number 12 portability costs per line per month including 13 transport. And, you know, cost, whether you 14 recover it all through rates, you know, is another 15 decision. 16 So looking at basically just under a dollar 17 per month per customer for every customer in the 18 Brookings system in order to port 24 people a year? 19 Is that what -- 20 THE WITNESS: No. In order to port 21 496 people a year. 22 COMMISSIONER BURG: Ports per year. 23 What's the 24? 24 THE WITNESS: The 24 is the 25 Petitioner estimates of ports per year. The 496 is</p>	<p>682</p> <p>1 you think? 2 THE WITNESS: Yes. In that 3 neighborhood. 4 MR. SMITH: Have you spoken at all 5 with SDN? The Qwest rate you said for transiting 6 is what, three-tenths of a percent? Have you 7 spoken at all with SDN about what their rate is? 8 Is that something that's available? Is that 9 published in their tariff? 10 THE WITNESS: To answer both of your 11 questions, we have approached SDN about using them 12 as a transit provider. They haven't been able to 13 provide us with a quotation yet. So I would guess 14 it's not a published price. It's not something I 15 don't think that they're in the business of doing 16 today as being a transit provider for local 17 traffic. 18 MR. SMITH: Okay. I mean, but do 19 you even know whether they are available to do 20 this? 21 THE WITNESS: I'm highly confident 22 that they have the network resources to do this. 23 Whether it's part of their business plan, I have no 24 idea. 25 MR. SMITH: And about the transport</p>

1 costs or transit costs, whatever we called them  
2 here, you talked about the overall LNP cost  
3 situation in terms of -- and its relationship to  
4 the policy that the FCC implemented, you know,  
5 basically as being one where the FCC sets forth a  
6 policy objective of LNP.

7 That same obligation is on all carriers, and  
8 so to the extent that you lose here, you gain here,  
9 I guess, in the sense of it's a burden on everyone.  
10 I guess the question I would have is could you  
11 address maybe how that applies to the transport  
12 cost issue we're talking about here? Is that a  
13 reciprocal cost situation in this case?

14 THE WITNESS: The transport costs?

15 MR. SMITH: Attributable to getting  
16 calls, ported calls, to the LATA -- or to the  
17 tandem.

18 THE WITNESS: You know, I view it as  
19 reciprocal. And, again, it boils down to a simple  
20 concept that with respect to a local call it's the  
21 originating carrier's responsibility to deliver  
22 that, and the burden is reciprocal for all  
23 originating carriers.

24 And generally on local traffic the traffic is  
25 balanced, and there is no, you know, additional

1 exchange of per minute compensation. But, I mean,  
2 we have Interconnection Agreements to cover the  
3 termination of the traffic. What we don't have is  
4 arrangements in place to cover the origination of  
5 traffic to ported numbers. And I'm suggesting that  
6 the approach I described was reciprocal and that  
7 Western would pay when it originated and the telco  
8 would pay when it originated.

9 MR. SMITH: Just one last one. I  
10 don't want to be unfair or appear hostile with  
11 this, but in terms of, you know, what -- Western  
12 Wireless has another pending Docket, the ETC Docket  
13 in which Western Wireless is seeking to obtain USAC  
14 funds for exact -- all the areas we're talking  
15 about here today. And I guess, you know, one  
16 question I had following up on something that Jim  
17 asked yesterday of one of the witnesses, I mean, is  
18 maximizing USAC funds part of the strategic plan of  
19 Western Wireless?

20 Maybe you don't even know. Is that something  
21 in the board room or in the planning sessions in  
22 the company, is that part of a strategic plan of  
23 the company?

24 THE WITNESS: I only know vaguely  
25 about what our approach is and our attitude is

1 towards USAC. But I would say, you know, the  
2 opportunity to, you know, receive those funds and  
3 reinvest them is -- will help drive our business  
4 and make it stronger in rural areas.

5 MR. SMITH: It's more revenue to the  
6 company.

7 THE WITNESS: It's more than that,  
8 but, yeah.

9 MR. SMITH: And because the  
10 incurrence of additional costs by the ILECs here  
11 will presumably result in some increase in USAC  
12 funds for them, high-cost support in some ways is  
13 going to increase, in turn that's going to increase  
14 the USAC funds that you received because your  
15 costs -- or your rates are directly tied to theirs.  
16 Is that true?

17 THE WITNESS: You know, until  
18 yesterday when I heard that, that had never  
19 occurred to me.

20 MR. SMITH: Okay. That's really  
21 what I'm asking you. Is that part of the objective  
22 here, or is that just an unintended consequence?

23 THE WITNESS: Byproduct. An  
24 unintended consequence. Our objective here is to  
25 complete.

1 MR. SMITH: Thanks. That's all I  
2 had.

3 MR. SMITH: Ben.

4 MR. WIECZOREK: How about redirect?

5 MR. SMITH: Excuse me. I'm sorry.  
6 I have tell you what I was thinking, Tal. I was  
7 trying to think -- you know, we were talking about  
8 the specific costs, but we've already done that.

9 MR. COIT: Just a point of  
10 clarification, and this is something that we talked  
11 about when we were discussing how the testimony was  
12 going to proceed, I don't know what he's going to  
13 cover in his redirect but I'm assuming when it  
14 comes around the table again to cross that we will  
15 get some opportunity to talk about the routing that  
16 was raised by Commissioner questions.

17 MR. SMITH: I've always taken the  
18 position here that none of the attorneys can  
19 control what the Commissioners ask. I can't even  
20 do that. And so I think all the parties have to be  
21 able to responsively examine what they ask.

22 MR. COIT: I would appreciate being  
23 able to ask questions about this.

24 MR. SMITH: That's the way we've  
25 always done it in all the hearings I've been

1 involved with.  
 2 Mr. Wieczorek.  
 3 MR. WIECZOREK: Thank you.  
 4 REDIRECT EXAMINATION  
 5 BY MR. WIECZOREK:  
 6 **Q** I'd like to clarify a couple of issues. First you were  
 7 asked about the Interstate diagram. Do you have that  
 8 in front of you?  
 9 **A** Yes.  
 10 **Q** That colorful turkey diagram I think you called it. It  
 11 looks like -- that's the multicolored diagram with all  
 12 the lines?  
 13 **A** This one?  
 14 **Q** Yes. At the bottom of that there are some numbers --  
 15 well, did you draft pages 1 and 2 of exhibit I believe  
 16 it's Western Wireless 5?  
 17 **A** I did.  
 18 **Q** And are they representations of some of the existing  
 19 infrastructure as to page 2 and proposed point of  
 20 interconnections that these companies -- or that have  
 21 been proposed on behalf of Interstate and their cost  
 22 structure?  
 23 **A** Yes. Page 1 represents information provided through  
 24 the Petitioner's testimony and discovery, and page 2  
 25 represents similar -- information provided from similar

1 sources as well as my knowledge of our connections with  
 2 these telephone companies.  
 3 **Q** And at the bottom of that page 2 under what was the  
 4 suggested approach by Western Wireless you have some  
 5 cost numbers. Did you come up with those cost numbers?  
 6 **A** I did.  
 7 **Q** Were they taken from your prefiled testimony,  
 8 Exhibit 5B?  
 9 **A** Yes, they are.  
 10 **Q** Okay.  
 11 MR. WIECZOREK: I'd move for the  
 12 admission of Exhibit 5 now.  
 13 MR. SMITH: Any objection?  
 14 MR. WIECZOREK: It's the  
 15 Interstate --  
 16 MR. SMITH: It's the peacock and  
 17 the --  
 18 MR. DICKENS: Yes. I think this  
 19 just falls in the same category as the other  
 20 documents that weren't filed as part of their  
 21 direct case.  
 22 MR. SMITH: Overruled. I'm going to  
 23 admit Exhibit 5. I think it's just an illustration  
 24 of --  
 25 COMMISSIONER BURG: That's both

1 pages now?  
 2 MR. SMITH: Both pages. I bounced  
 3 it the other day because those numbers at the  
 4 bottom hadn't been -- no foundation had been laid  
 5 for those.  
 6 **Q** Let's go back to what's been put into evidence as  
 7 Western Wireless Exhibit 9, which is your colored sheet  
 8 that we provided today with all the various cost  
 9 scenarios that have been given.  
 10 Just for clarification on some of the  
 11 questions that you were just asked, at the very bottom  
 12 of the page you have LNP costs per line per month  
 13 including and excluding transport; correct?  
 14 **A** Correct.  
 15 **Q** And going to what is the fifth column over and going  
 16 down to the bottom, you have a 69 cent cost item?  
 17 **A** Yes.  
 18 **Q** Okay. And that would include the cost to do LNP and  
 19 all taxes and excise taxes that would be put on that  
 20 cost based on if Brookings provided LNP and had the  
 21 number of ports it projected; correct?  
 22 **A** That's correct.  
 23 **Q** Actually the last column the number is slightly higher  
 24 than 96 cents. Mr. Burg talked about if you include  
 25 transport. Why is that higher than the previous

1 number?  
 2 **A** Well, the difference between those two columns is that  
 3 the right-most column reflects Western's forecast of  
 4 port activity, and the column preceding it forecasts  
 5 the -- uses the Petitioner's forecast of ported  
 6 activity.  
 7 **Q** The port activity shown at the very bottom of that last  
 8 column, 496, is that just Western's port activity?  
 9 **A** That's actually port activity for all intermodal ports  
 10 forecasted for the year.  
 11 **Q** So for all CMRS carriers in that area?  
 12 **A** Yes.  
 13 **Q** And Mr. Dickens asked you a question. I want to make a  
 14 clarification here. We've been talking about  
 15 Interstate that's on the second page of Exhibit 9.  
 16 **A** Before you do that, just let me clarify how that port  
 17 number was derived.  
 18 **Q** Sure.  
 19 **A** The assumption was made that Western Wireless has  
 20 approximately a 45 percent market share in most of  
 21 these areas, and so if you wanted to get to just  
 22 Western Wireless's port forecast, it would be  
 23 45 percent of that number.  
 24 **Q** And I believe Mr. Dickens showed you what's been  
 25 entered into evidence by -- as part of Mr. Watkins'

691

1 testimony, and that shows port projections just for  
 2 Western Wireless.  
 3 That would be the attachment to Exhibit 1 of  
 4 Mr. Watkins' testimony; correct?  
 5 A That's right. Those just reflect what Western Wireless  
 6 expects to obtain in ports from these carriers.  
 7 Q So you would expect if local number portability was  
 8 provided by these carriers that there would actually be  
 9 far more ports than just reflected on that exhibit;  
 10 correct?  
 11 A As much as we'd like to get them all, we just extended  
 12 our wireless market share and assumed that we would get  
 13 our per rate share of intermodal ports in these areas  
 14 so that total ports would be higher in every case than  
 15 Western's share of the ports.  
 16 Q There was also a question, and I believe it was by  
 17 Commissioner Burg, over the benefit of cellular service  
 18 or the ability to port in the rural communities. I'm  
 19 going to mark an exhibit and ask you to identify it.  
 20 (Exhibit WWC 13 is marked for identification)  
 21 Q Can you identify what has been marked as Exhibit  
 22 No. 13?  
 23 A This is a recently released study, 2004 Rural Youth  
 24 Telecommunications Survey, that was sponsored by the  
 25 NTCA and the Foundation For Rural Service.

692

1 Q And what is the NTCA?  
 2 A National Telecommunications Cooperative Association.  
 3 Q And are you familiar with the types of companies that  
 4 are members of that association?  
 5 A Well, I would suspect some of the -- many of the  
 6 companies here today as Petitioners are members of the  
 7 NTCA, but these are generally rural telephone companies  
 8 that are designed as cooperatives.  
 9 Q Okay. Would you turn to what is page 1 of the actual  
 10 survey after the cover page. Are you there?  
 11 A Yeah.  
 12 Q And if you go down to the Confronting The Rural Brain  
 13 Drain section?  
 14 A Uh-huh.  
 15 Q Could you read that last sentence, please.  
 16 A "The ability to offer the same state-of-the-art  
 17 telecommunications services as are available in  
 18 nonrural areas could play a significant role in  
 19 increasing the attractiveness and livability of rural  
 20 communities."  
 21 Q Is LNP one of those state-of-the-art telecommunication  
 22 services?  
 23 A LNP is one of the services that are today available in  
 24 urban areas and not available in rural areas, yes.  
 25 Q Could you turn to page 3 of that document then? 3 on

693

1 the bottom of --  
 2 A Yes.  
 3 Q You see at the top where it says Voice Still King?  
 4 A Yes.  
 5 Q And then it goes on to talk about the increase in the  
 6 use of text messaging. Does Western Wireless provide  
 7 test messaging?  
 8 A Yes, we do.  
 9 Q Do you know whether any of the rural LECs provide text  
 10 messaging?  
 11 A I am not aware if they do.  
 12 Q Is this one of the benefits when you talk about the  
 13 package that's offered by the service where it's the  
 14 consumer's choice that you would include?  
 15 A Absolutely. This and your mobile access to the  
 16 Internet, you know, other more traditional voice mail  
 17 products. But, yeah, it's all part of the package that  
 18 we present as our valued proposition.  
 19 Q Then I want you to turn to -- there were some questions  
 20 on Exhibit 11, which is the survey of rural customers  
 21 by Western Wireless.  
 22 A Yes.  
 23 Q There was a question concerning chart 1 and the number  
 24 of people that might be interested in replacing the  
 25 landline phone. Out of the survey how many were

694

1 undecided whether they would do that?  
 2 A 25 percent were undecided.  
 3 Q What impact do you believe would giving the option for  
 4 people to take their local number with them to a  
 5 wireless service have on those 25 percent?  
 6 A Again, it's something that when the survey was  
 7 conducted it wasn't available to most of these rural  
 8 consumers. You know, I would think that that would --  
 9 knowing that they could do that would move some of  
 10 those 25 percent into the first column, which is  
 11 16 percent, which is -- again, this survey was done  
 12 subsequent to when we had submitted our forecasts for  
 13 porting volumes, but this survey does serve to  
 14 validate, I think, the forecast that we have, which is  
 15 over a period of five years we expect to see a  
 16 15 percent intermodal migration.  
 17 This one happens to say 16 percent. And if  
 18 you were to assume that that 25 percent of unsure  
 19 customers became aware of number portability, I would  
 20 think that some of those would like the opportunity to  
 21 use their cell phone as their only phone.  
 22 Q There was -- I'm going to go way back to this morning  
 23 and try to cover some of the issues raised in the  
 24 cross-examination. There was some cross-examination  
 25 about whether the Interconnection Agreement being

1 discussed provided for two-way trunks with Qwest.  
 2 Do you remember that?  
 3 A Yes, I do.  
 4 Q Okay. Was that part of the negotiations?  
 5 A Yes. Actually the final agreement ended up with  
 6 language that allows -- provides for Western Wireless  
 7 to use the tandem trunking, but at the request of the  
 8 LECs we removed the language that allowed them -- or  
 9 that permitted them to use indirect routing.  
 10 MR. DICKENS: Excuse me. I'm sorry.  
 11 I would object and move to strike the part about  
 12 Mr. Williams' answer about what the negotiating  
 13 positions of the parties were before the agreement  
 14 was signed. I think we've established that that is  
 15 not relevant, pursuant to the ruling you made  
 16 Monday.  
 17 MR. WIECZOREK: Well, the  
 18 cross-examination crossed him on the fact it wasn't  
 19 in the agreement and implied that Western Wireless  
 20 didn't want it when they were negotiating the  
 21 agreement. So I'm just clarifying that Western  
 22 Wireless suggested that in the agreement, and it  
 23 wasn't them -- it wasn't Western Wireless that took  
 24 it out.  
 25 MR. SMITH: Since we're not -- I

1 MR. SMITH: What is that again?  
 2 MR. WIECZOREK: It's the Qwest  
 3 comments filed with the Minnesota Commission. I'll  
 4 mark it as Exhibit 14.  
 5 MR. SMITH: Does this have a number?  
 6 MR. WIECZOREK: That is 13.  
 7 (Exhibit WWC 14 is marked for identification)  
 8 MS. POLLMAN ROGERS: Excuse me a  
 9 minute. Is there a chance we could have a moment  
 10 to review this for the purposes of potential  
 11 objection prior to allowing questions on it? I  
 12 have not seen this before.  
 13 MR. SMITH: We're going to recess  
 14 for -- we eventually have to take a break. How  
 15 long do you need to review it?  
 16 MR. DICKENS: It looks to be  
 17 about -- it looks to be about 50 pages in total, 35  
 18 to 50 pages so 15 minutes.  
 19 CHAIRMAN SAHR: That's fine.  
 20 MR. SMITH: We'll take a 15-minute  
 21 break.  
 22 (A short recess is taken)  
 23 MR. SMITH: We're back on the  
 24 record. Mr. Wieczorek, do you want to proceed?  
 25 MR. WIECZOREK: Yes. Thank you,

1 don't think we're talking about what the -- what  
 2 any rights or obligations are under the agreement,  
 3 I'm going to allow it.  
 4 Q Did you complete your answer before the objection?  
 5 A Yes, I did.  
 6 Q Thank you. There was a reference that you made at one  
 7 point in your testimony concerning that Qwest could  
 8 provide the two-way trunks within three weeks.  
 9 Have you had direct discussions with Qwest  
 10 regarding that in South Dakota?  
 11 A No, I have not. My source for that really was  
 12 two-fold. One was my familiarity with Qwest's  
 13 provisioning intervals for those kind of circuits, but  
 14 more significantly it was a statement that Qwest made  
 15 in testimony or comments made in Minnesota for  
 16 implementing the very same circumstances we're talking  
 17 about here.  
 18 Q Okay.  
 19 MR. WIECZOREK: I was going to mark  
 20 the Qwest comments and with this proviso, that I am  
 21 not marking them so I can argue later that this  
 22 proves that this can be done in South Dakota. I'm  
 23 marking them for the reference in support for what  
 24 he's testified to, and just to show that there are  
 25 potentially other available options.

1 Mr. Smith.  
 2 Q (MR. WIECZOREK) What has been marked as Exhibit 14,  
 3 are you familiar with that document?  
 4 A I am.  
 5 Q And can you for the record state what that document is?  
 6 A These are the comments of Qwest's regarding a MIC  
 7 petition in Minnesota. The MIC petition is for  
 8 approximately a 67-day suspension of number portability  
 9 obligations so that they can implement the proposal by  
 10 MIC, which is a tandem routed solution for the  
 11 transport of calls to ported numbers. And these were  
 12 Qwest's comments on that petition.  
 13 Q You're on that service list; correct?  
 14 A I am.  
 15 Q Is that a true and correct copy of Qwest's comments,  
 16 Exhibit 14?  
 17 A Yes. It appears to be.  
 18 Q On the second page of the actual comments after the  
 19 certificate of service about halfway down you -- let me  
 20 preface it this way. You made a statement earlier, and  
 21 I don't want to leave the false impression that you've  
 22 talked to Qwest about implementing something similar in  
 23 South Dakota.  
 24 Have you talked to Qwest about implementing  
 25 something similar in South Dakota?

1 A We have not.  
 2 Q But you mentioned a three-week time frame. Can you  
 3 explain to the Commission how you reference that  
 4 three-week time frame?  
 5 A Well, Qwest has in their comments here proposed that  
 6 they could accomplish a three-week implementation that  
 7 included the conversion of existing one-way trunk  
 8 groups to two-way trunk groups so that they could  
 9 transit land to mobile calls to ported numbers.  
 10 Q And in the Minnesota filing how long did they project  
 11 it would take and for how many trunks?  
 12 A I think there were 106 trunks to approximately 40  
 13 telephone companies, and Qwest said that they would be  
 14 able to implement that within three weeks of a signed  
 15 agreement.  
 16 Q Also attached to those comments are some exhibits.  
 17 Could I ask you to turn to the first exhibit?  
 18 A Yes.  
 19 Q Well, is this exhibit similar to the routing proposal  
 20 that Western Wireless has made, which is page 2 of  
 21 Western Wireless Exhibit 5?  
 22 A Yeah. This exhibit is similar to Western Wireless's  
 23 routing proposal, similar to the diagram there. What  
 24 they have included -- what Qwest has included is a  
 25 reference to the ONVOY tandem which -- and Qwest

1 included this to demonstrate that they weren't the only  
 2 option for this kind of service in Minnesota. The  
 3 ONVOY tandem and ONVOY's role in Minnesota is similar  
 4 to what SDN provides here in South Dakota.  
 5 MR. WIECZOREK: Commission, I'd  
 6 actually move for admission of Western Wireless 13  
 7 and 14 at this time.  
 8 MR. SMITH: Ben.  
 9 MR. DICKENS: Thank you. I have no  
 10 objection to the content of either of these  
 11 exhibits. I do have a comment, though, about what  
 12 I think is a troubling trend in the process, and  
 13 that is that we keep getting documents on direct as  
 14 part of their direct case that I think could have  
 15 been filed earlier.  
 16 And so I don't have an objection to either  
 17 exhibit, but I would like the Commission to  
 18 remember when it's our turn next week in case we  
 19 find it necessary to supplement our case with more  
 20 documents that what was sauce for the goose should  
 21 be sauce for the gander. Thank you.  
 22 MR. SMITH: I think that's fair.  
 23 MR. WIECZOREK: I would ask whether  
 24 I'm the goose or the gander.  
 25 MR. SMITH: I'm not sure.

1 MR. WIECZOREK: That troubles me.  
 2 MR. DICKENS: I didn't know myself  
 3 when I said it.  
 4 MR. SMITH: With that in mind, I'll  
 5 admit the exhibits. Does anyone else have an  
 6 objection?  
 7 MR. COIT: No objection.  
 8 MR. SMITH: I'll admit WWC 13 and  
 9 14.  
 10 Q I want to go back to some of the other discussion. I  
 11 believe this was on cross by Mr. Coit. He asked  
 12 whether -- and I'm not sure that he used the term  
 13 willing or whether you were providing dipping or LNP  
 14 queries for type 1 numbers. Do you remember that?  
 15 A I do remember him asking me --  
 16 MR. COIT: Excuse me. I don't think  
 17 I referenced that in relation to any type 1  
 18 interconnects. I just referenced it in regards to  
 19 queries in general.  
 20 MR. WIECZOREK: Okay.  
 21 Q As to queries in general.  
 22 MR. WIECZOREK: Thank you, Mr. Coit.  
 23 Q Western Wireless isn't in the business of being a  
 24 default LNP query organization, is it?  
 25 A Absolutely not.

1 Q In what cases has Western Wireless stepped in to try to  
 2 fulfill that type of role?  
 3 A Well, we've been -- since May 24 when rural portability  
 4 was implemented we've been -- we've been porting out  
 5 numbers to other wireless carriers. We have still been  
 6 receiving traffic calls to numbers that are no longer  
 7 part of our network. And in most cases we did not get  
 8 any information from telephone companies that they were  
 9 going to be misrouting this traffic. The information  
 10 came from customer -- wireline customer complaints that  
 11 were then forwarded to our wireless consumers who  
 12 then -- or former wireless consumers who are now  
 13 somebody else's who said I can't get calls to my number  
 14 anymore and it turned out that this traffic again was  
 15 being misrouted.  
 16 Since the call was no longer active on our  
 17 switch, they were getting inactive -- you know, the  
 18 number is no longer in service. We found that the  
 19 source of the traffic was independent telephone  
 20 companies who weren't performing their obligations as  
 21 an originating carrier and performing N-1 queries so  
 22 that they could identify where to route the call to.  
 23 In every case where we faced this scenario  
 24 rather than continue to have customers experience calls  
 25 that won't complete -- these are landline customers',

1 telco customers' calls who won't complete -- we have  
 2 gone through the process of implementing translations  
 3 on each one of these incoming trunk groups where this  
 4 problem has occurred, and we've had to implement those  
 5 in such a way where we have to do a query for all the  
 6 traffic coming across that trunk group to determine  
 7 which components of that traffic have been misrouted  
 8 and need to be rerouted to the proper carrier.

9 We're doing this, first of all, on ad hoc and  
 10 emergency basis. It is not a business we are in. It  
 11 is not a business we are required to perform. And we  
 12 find ourselves trying to cover for carriers that aren't  
 13 meeting their obligations. It's happening here in  
 14 South Dakota as well as many other states.

15 Q Then there was a question -- and I'm going to put up  
 16 the old Interstate chart. There was a question by  
 17 Mr. Dickens -- and before we look at the chart I'd like  
 18 you to look at Exhibit 9, which is your multicolored  
 19 chart, and let's just look at Interstate since we have  
 20 a diagram to follow.

21 A Okay.

22 Q There was a question by Mr. Dickens whether Western  
 23 Wireless would be willing to pay transport costs for  
 24 porting the numbers, and do you recall how you answered  
 25 that question?

1 A No.

2 Q I believe you confirmed that Western Wireless would be  
 3 willing to do that as part of getting ports and phone  
 4 service.

5 A Yes.

6 Q Okay. And the clarification I want to make is if you  
 7 look at Interstate's monthly recurring transport costs  
 8 as projected by Interstate, there are 157,000, and  
 9 that's not the number Western Wireless is saying it's  
 10 going to pay, is it?

11 A Absolutely not. I think if we were ordered to pay this  
 12 transport -- and, again, this is under consideration  
 13 with the FCC right now -- the number we would be paying  
 14 would be the -- or we would pay at that point would be  
 15 the transit we have suggested in our cost study.

16 Q Okay. So the number that you're talking about is  
 17 the -- on your chart is the \$118 number or that portion  
 18 of the actual transport-related ports to you?

19 A \$118 on the basis of 24 ports per year or 2,228 on the  
 20 basis of 453 ports per year.

21 Q That would be under a system as represented by  
 22 Exhibit 5B, which is the poster up now, correct?

23 A Yes. Tandem routing option.

24 Q That's not on the peacock system, as I believe  
 25 Mr. Smith has called the other diagram?

1 A Not on the dedicated route system, correct.

2 Q And, finally, there was a question of whether you'd do  
 3 similar type of arrangements with the other Petitioners  
 4 as you did with James Valley, and you stated there it  
 5 depends on the system and it depends on what's there.

6 And let me just ask you, by way of example,  
 7 would a similar type system like what you've done with  
 8 James Valley work with somebody like Interstate?

9 A Well, actually with Interstate we have another unique  
 10 opportunity. With Interstate we already have direct  
 11 connections, three of them, I believe, with Interstate.  
 12 So there's no need for anybody to incur additional  
 13 transport. We could utilize the existing connections  
 14 and achieve the same thing we're achieving with  
 15 James Valley.

16 Q Okay. So it would be --

17 A There would be no transport in that circumstance paid  
 18 to any third party.

19 MR. WIECZOREK: That's all I have.

20 MR. SMITH: Thank you. Mr. Dickens.

21 MR. DICKENS: Thank you.

22 RE-CROSS-EXAMINATION

23 BY MR. DICKENS:

24 Q Mr. Williams, going back to the subject that you were  
 25 discussing with Mr. Wieczorek or some questions you

1 were answering of Mr. Wieczorek a moment ago regarding  
 2 the subject of what you say is a failure of my client's  
 3 obligations to perform their proper routing.

4 A Yes.

5 Q You're not contending that you didn't receive notice  
 6 from my client with whom you have direct connections  
 7 that they were unable to do those dips and requesting  
 8 you to continue to help them out in that regard?  
 9 You're not contending that, are you?

10 A After the fact we did receive notice, and I've  
 11 responded to that notice.

12 Q About a month later, wasn't it?

13 A Our response was a month later in terms of written  
 14 response. Our response in terms of tending to the call  
 15 routing needs was as quickly as we could get to it.

16 Q Let me ask you a question about the -- if I can find  
 17 the right diagram. You talked a bit about this with  
 18 your counsel and some of the Commissioners today. I  
 19 think Commissioner Hanson asked you if the -- if my  
 20 clients would have to pay anymore when one of your  
 21 customers ported their number to your phone, to one of  
 22 your phones, and the routing arrangement changed.

23 I thought initially you said no. I may be  
 24 mistaken. But just to make sure that the record is  
 25 clear, today if this phone carries a number that's not

1 associated with the local calling area, it goes over  
 2 SDN facilities and gets handed off to the IXCs and  
 3 comes back via IXC trunks and handed off to you and our  
 4 clients get access on that --  
 5 A Originating access.  
 6 Q Okay. When the call gets ported to you our clients  
 7 lose the access. Under your proposal they would pay  
 8 Qwest some amount to take the call up to the  
 9 Sioux Falls switch and hand it to your switch. It  
 10 would come back, and since it would be a local number,  
 11 wouldn't they pay you reciprocal compensation on that  
 12 too?  
 13 A I mean, that's correct. You can't collect access to  
 14 calls from a customer that's not yours.  
 15 Q Right. I'm just trying to clarify actually what's  
 16 happening.  
 17 A Right.  
 18 Q So our client would lose access?  
 19 A Lose the customer.  
 20 Q Lose the customer --  
 21 A Therefore, they wouldn't collect any access on calls.  
 22 Q Right. They would pay Qwest and they would pay you  
 23 recip. comp for terminating the call?  
 24 A Yes. They would pay us recip. comp on traffic that's  
 25 originated on their network and terminated on ours, and

1 they would use -- if they use Qwest, they would use an  
 2 efficient means for delivering the local traffic.  
 3 Q I think it might have been Chairman Sahr that asked you  
 4 if you were willing to participate in a work group to  
 5 discuss various options for implementing LNP. Do I  
 6 recall correctly that you said no?  
 7 A I didn't mean to say no. I think I suggested that -- I  
 8 think Chairman Sahr suggested that a work group might  
 9 be a way to facilitate progress on this, and he sought  
 10 my opinion on whether that would be a means, and I  
 11 suggested that I thought progress would be better made  
 12 by establishing a firm date on which things needed to  
 13 be implemented and that the business dynamics would  
 14 lead to whatever dialogue was necessary to get  
 15 implementation to occur.  
 16 Q But if the Commission asked you to participate in a  
 17 work group, you would?  
 18 A We would.  
 19 Q Okay. I want to go back to the City of Faith example  
 20 that we talked about earlier, and I think you had some  
 21 exchange with the Commissioners about the City of  
 22 Faith. And my recollection is you indicated that you  
 23 thought it would be okay for the City of Faith and a  
 24 couple of other carriers to delay implementation until  
 25 March of '05 more or less?

1 A Yeah.  
 2 Q Okay. I also recall that you were projecting zero  
 3 ports for five years for the City of Faith. Is that  
 4 correct?  
 5 A Projecting zero ports, yes, from Western Wireless.  
 6 Q So what's the public benefit there of requiring Faith  
 7 to go LNP?  
 8 A Well, although Western Wireless may not have an  
 9 interest in -- or may not expect to be porting from  
 10 Faith, there may be other carriers that would expect to  
 11 port from Faith.  
 12 Q Do you think that would be a large number of ports, a  
 13 couple a year?  
 14 A Obviously our projections would show that, you know,  
 15 we're not expecting to port from Faith.  
 16 Q Have you examined what your coverage footprint looks  
 17 like in Valley?  
 18 A I have in the past, yes.  
 19 Q Mr. Oleson, who is Valley's manager, who I think is  
 20 scheduled to testify next, would it surprise you if he  
 21 said you covered about 15 percent of his service area  
 22 with your footprint?  
 23 A Yes. That would surprise me.  
 24 Q What do you think it is?  
 25 A I'm going to say north of 50 percent.

1 Q Okay. Well, let me try it a little bit differently.  
 2 There are some communities that are completely unserved  
 3 by your signal in South Dakota in the Petitioner's  
 4 areas, aren't there?  
 5 A I know we have some areas that aren't served by our  
 6 signal in South Dakota.  
 7 Q Would you accept, subject to check, that Blunt and  
 8 Venture's service area is such a city?  
 9 A We could use it as a hypothetical, if you'd like.  
 10 Q All right. Hypothetically would you assume that  
 11 there's no cellular coverage in Blunt for the purposes  
 12 of my question?  
 13 A Well, if Blunt is -- I don't know if there is or isn't  
 14 service coverage in Blunt.  
 15 Q At this point we're dealing in hypotheticals. If you  
 16 would just accept my --  
 17 A If the assumption is there's no service --  
 18 Q If there's no service in Blunt, what's the public  
 19 benefit of requiring Venture to go LNP? What would it  
 20 be? What would the public benefit be of requiring  
 21 Venture to go LNP? I'm speaking to those customers  
 22 that live in Blunt.  
 23 A Those customers that live in Blunt there might not be a  
 24 benefit if they don't have coverage of another service  
 25 provider. But our service area and our coverage isn't

1 a static thing. We are always upgrading our network  
 2 and expanding our coverage so it's likely some day, and  
 3 I don't know when since we're talking about  
 4 hypothetical, that, you know, coverage circumstances  
 5 will change.  
 6 Q Earlier today there was an exchange about your  
 7 surcharge that you charge your customers, and I believe  
 8 that you indicated it included several items such as  
 9 CALEA, LNP cost, and number pooling costs, among  
 10 others?  
 11 A Correct.  
 12 Q Do I correctly recall that was about \$1.70? Is that  
 13 what you said?  
 14 A \$1.70.  
 15 Q Can you tell us what component of that 1.70 is  
 16 associated with LNP cost recovery?  
 17 A I think I said earlier, it was more than -- you know,  
 18 more than 50 percent but, you know, 50 to 70 percent  
 19 maybe would be the range. But that's the best I could  
 20 estimate.  
 21 Q Has number pooling been implemented in South Dakota?  
 22 A Not in South Dakota, although I know we are -- well, I  
 23 mean, we are donating blocks back to the pooling  
 24 administrator in all the areas where we have blocks to  
 25 donate. That's an obligation of all carriers that have

1 implemented number portability.  
 2 Q Let me talk to you about your proposal to utilize the  
 3 Qwest facilities to deliver calls to your network.  
 4 Qwest is not a party to this proceeding, is it?  
 5 A No.  
 6 Q Do you think the Commission can order Qwest to transit  
 7 the traffic if it's not a party here?  
 8 A I think Qwest is already obligated to transit the  
 9 traffic. It's just a matter of going through the  
 10 administrative process of causing it to happen.  
 11 Q Do you think Qwest ought to be a part of that work  
 12 group if the Commission orders one?  
 13 A Qwest I think would find that work group very  
 14 interesting.  
 15 Q They're not too excited about offering service on a  
 16 TELRIC basis in Minnesota, are they?  
 17 A Not at the TELRIC level that the MIC companies are  
 18 seeking, which is less than what Western currently pays  
 19 in Minnesota.  
 20 MR. DICKENS: One second.  
 21 Q I just have a last question or two about Qwest. Did  
 22 Qwest present you with a proposal, or did you present  
 23 Qwest with a proposal to use their facilities for the  
 24 service we've been talking about today?  
 25 A Qwest's transit services are listed both in their

1 tariff and in their SGAT and on their website.  
 2 Q Did you talk with them or exchange correspondence about  
 3 this idea?  
 4 A No.  
 5 Q Okay.  
 6 MR. DICKENS: Those are all the  
 7 questions we have. Thank you.  
 8 MR. SMITH: Mr. Coit.  
 9 MR. COIT: Yes. I have a few.  
 10 RE-CROSS-EXAMINATION  
 11 BY MR. COIT:  
 12 Q I can't remember. This is an exhibit to your  
 13 testimony; is that right, Mr. Williams?  
 14 A It is an exhibit to my original prefiled testimony --  
 15 MR. WIECZOREK: 6 to the prefiled.  
 16 Q So it's Exhibit 6, this particular diagram or all three  
 17 of them?  
 18 MR. WIECZOREK: All three.  
 19 A Part of Exhibit 1, but it was referenced as Exhibit 6  
 20 in the prefiled.  
 21 Q In regards to Exhibit 6, the post-port tandem routing  
 22 diagram, I believe you testified earlier in response to  
 23 a question from a Commissioner that you didn't see  
 24 where -- let's say, for example, this is Kennebec.  
 25 A Okay.

1 Q That you didn't see where Kennebec's responsibility in  
 2 terms of being an originating carrier and taking a call  
 3 from one of its customers to a wireless customer on  
 4 your network was any different than the responsibility  
 5 that you would incur carrying this call from this  
 6 wireless user back to a landline customer; is that  
 7 correct?  
 8 A How I characterized it was the responsibilities for  
 9 local calls were not any different, correct.  
 10 Q So the responsibility for local calls were not any  
 11 different. Now if we were to look at Western  
 12 Wireless's service area in relationship to this  
 13 diagram, you could really draw a circle around this  
 14 cloud, couldn't you?  
 15 A Well, I mean, the green is actually representative of  
 16 the Western Wireless service area. I mean, it's a  
 17 conceptual diagram, but, yeah, the wireless service  
 18 area is shown there to be larger than the Kennebec --  
 19 Q The green cloud on this diagram is representative for  
 20 the purposes of this as being your service area.  
 21 A Correct.  
 22 Q And this checkered blue and white area would be the  
 23 Kennebec service area, for example?  
 24 A For example.  
 25 Q Now when you take a call from this -- a local call from

715

1 this wireless end-user say to a Kennebec landline  
 2 subscriber you're originating and terminating that call  
 3 within your service area; correct?  
 4 A That's correct.  
 5 Q And is that what Kennebec is doing when it takes a call  
 6 from its landline customer to the LATA tandem?  
 7 A They are originating and -- that call is originating  
 8 and terminating based on the same rate center and we  
 9 have -- and the routing of that call may include  
 10 routing outside of their service area.  
 11 Q So Western Wireless is taking a call from a wireless  
 12 subscriber in its area to a termination point somewhere  
 13 in its own area.  
 14 A Not in all cases, but in some cases. There are places  
 15 where we terminate where traffic is local where we  
 16 don't have service.  
 17 Q But Kennebec would be responsible for taking that local  
 18 call from its area 165 or 180, whatever it is, all the  
 19 way to Sioux Falls? That's your testimony?  
 20 A Whether it goes to Sioux Falls or not, it's  
 21 three-tenths of a cent. That's my testimony.  
 22 Q We've had quite a bit of discussion about direct  
 23 connects, and you had indicated in some of your earlier  
 24 testimony that there may be locations where the volume  
 25 of traffic would justify a direct connection; is that

716

1 correct?  
 2 A That's correct.  
 3 Q And I guess I would ask today how many direct connects  
 4 does Western Wireless have in South Dakota? Do you  
 5 know? Estimate?  
 6 A 20, 25, some of those with Qwest, some of those with  
 7 SDTA members.  
 8 Q Do you know how many with SDTA members?  
 9 A Half of those.  
 10 Q And you also have some requests pending for some direct  
 11 connects, do you not?  
 12 A I believe so.  
 13 Q Now with respect to the James Valley settlement, and we  
 14 don't have any written terms on that, but it's my  
 15 understanding that a part of that agreement is is that  
 16 Western Wireless will be paying for a DS-1 facility  
 17 between Groton and Aberdeen; is that correct?  
 18 A Generally, yeah.  
 19 Q And that facility would be purchased from Northern  
 20 Valley Communications?  
 21 A That's correct.  
 22 Q And that facility then would go from the Groton switch  
 23 to a point of presence that Western Wireless has  
 24 somewhere in Aberdeen?  
 25 A Yes. We're connecting with our point of presence in

717

1 Aberdeen to Northern Valley's point of presence in  
 2 Aberdeen.  
 3 Q Where is your point of presence in Aberdeen?  
 4 A I believe it's at the Qwest central office there.  
 5 Q And it's been represented to you that Northern Valley  
 6 Communications is an affiliate of James Valley, an  
 7 affiliate company?  
 8 A That's my understanding.  
 9 Q And do you know whether Northern Valley Communications  
 10 presently provides any service in Aberdeen?  
 11 A I believe they do.  
 12 Q Local exchange service?  
 13 A I believe they do.  
 14 Q So that's part of their service area?  
 15 A Part of Northern Valley's service area?  
 16 Q Yeah.  
 17 A If they're a CLEC there, it is.  
 18 Q So Western Wireless is meeting up or basically is  
 19 buying a DS-1 facility that extends into Groton from a  
 20 point of presence that it has in Aberdeen; correct?  
 21 A Correct.  
 22 Q Is that accurate?  
 23 A Yeah. We've agreed to pay a certain amount for that  
 24 facility.  
 25 Q But it's you that will pay that, not Northern Valley or

718

1 James Valley.  
 2 A That's right.  
 3 Q Now going to the post-port direct routing diagram  
 4 that's part of your Exhibit 6, now this -- looking at  
 5 this diagram, this line here that just rests below the  
 6 telco rate center end office and in between the LATA  
 7 tandem and the CMRS switch, is that the direct connect  
 8 we're talking about?  
 9 A Yeah. I think -- let me contrast that with what  
 10 James Valley had originally proposed we do. What we  
 11 are installing --  
 12 Q That was not my question. My question is is this the  
 13 direct connect? On this diagram --  
 14 A In functionality it is similar to that, except the  
 15 difference being that it's going to a single  
 16 James Valley office that would be able to receive  
 17 traffic from all of James Valley's exchanges.  
 18 Q Excuse me. Moving off of the James Valley scenario, if  
 19 we look at the other direct connects that are already  
 20 established in South Dakota --  
 21 A Uh-huh.  
 22 Q -- if you were to look at this diagram not as a  
 23 post-port direct routing but to just kind of illustrate  
 24 direct routing, just looking at this bottom piece today  
 25 in terms of how you receive some local traffic, I guess

719

1 my first question would be when you establish a direct  
 2 connect what gets delivered over those direct connect  
 3 facilities to you? What sort of traffic?  
 4 **A** Well, it depends on which carrier you establish those  
 5 with.  
 6 **Q** But if you've got like say, for example, Golden West  
 7 over here in the blue and white checkered area and  
 8 you've got to direct connect with them, what sort of  
 9 traffic -- local traffic? Are they going to deliver  
 10 local traffic up that direct connect?  
 11 **A** Yes. Local traffic.  
 12 **Q** And when you establish that direct connect you're going  
 13 to purchase some DS-1 facilities from Golden West to  
 14 basically get to this rate center, whether that's a  
 15 host or some sort of local tandem, whatever. You're  
 16 going to purchase DS-1 facilities to that office;  
 17 correct?  
 18 **A** The office or tandem or whatever it might be.  
 19 **Q** So when you buy that -- generally if you look at those  
 20 interconnects that you have today, those direct  
 21 interconnects when you're connecting up with a LEC,  
 22 where does that span go? From the ILEC end office  
 23 where does it go? What are you buying access to  
 24 basically?  
 25 **A** Well, generally buying access to terminate traffic to

720

1 the telco.  
 2 **Q** But where does the span end? If you're buying a direct  
 3 connect --  
 4 **A** It will end at typically one of our points of  
 5 interconnection.  
 6 **Q** Well, your actual point of interconnection would be in  
 7 the rate center; correct?  
 8 **A** Well --  
 9 **Q** If you buy the facilities --  
 10 **A** Some carriers that's the case, yes.  
 11 **Q** Some carriers it is. Some it isn't. You'll have a  
 12 point of interconnection somewhere else --  
 13 **A** Right.  
 14 **Q** -- right? But typically would you say, if not in all  
 15 cases, that that point of interconnection is going to  
 16 be within the rural LECs, the local exchange carrier's  
 17 service area?  
 18 **A** Yes.  
 19 **Q** And then let's say you've got a border here and this is  
 20 the service area so your point of interconnect is  
 21 actually here in this mid-span.  
 22 **A** Some circumstances it is.  
 23 **Q** And you may have Qwest providing this, or you may have  
 24 SDN providing this; correct?  
 25 **A** Or it may be on our own network, yes.

721

1 **Q** So up to this point of interconnect the LEC doesn't pay  
 2 any of that, does it? For that dedicated facility the  
 3 LEC doesn't pay for any portion of that, does it?  
 4 **A** Well, we split those facilities on a shared traffic  
 5 basis.  
 6 **Q** But that's just for this piece of facility that the LEC  
 7 is providing you; correct?  
 8 **A** Well, we pay -- we split the facility costs and, again,  
 9 it's different with different LECs, but --  
 10 **Q** You're buying a DS-1 facility, and you're purchasing  
 11 facilities from some -- probably an interexchange  
 12 carrier or you've got them yourself and that's all the  
 13 way to this point of interconnect if we assume there's  
 14 a meet point at the boundary of the ILEC and then  
 15 you're buying a DS-1 facility from the LEC. This is  
 16 the facility that's shared, the facility from the LEC  
 17 to the point of interconnect; correct?  
 18 **A** That's correct.  
 19 **Q** So when we go to this post-port routing diagram and you  
 20 require the ILEC to pay for this transport all the way  
 21 into the LATA tandem, that's different than a direct  
 22 connect scenario, isn't it, in terms of the  
 23 responsibility of that LEC?  
 24 **A** When there's no direct connection, there is a different  
 25 routing responsibility for both carriers.

722

1 **Q** There was a question asked on redirect regarding the  
 2 Interconnection Agreement and the fact that -- there  
 3 was reference to a proposal within the Interconnection  
 4 Agreement negotiations to convert those facilities from  
 5 one-way to two-way or at least propose them as  
 6 bidirectional facilities within the interconnection  
 7 negotiations. Do you recall that?  
 8 **A** No. I do recall a question about land to mobile  
 9 routing through a tandem, but that didn't cover those  
 10 topics.  
 11 **Q** So you didn't give some indication that during the  
 12 interconnection negotiations you had proposed as part  
 13 of those interconnection negotiations that the  
 14 facilities should be two-way?  
 15 **A** The proposal as part of the negotiations was for both  
 16 parties to avail themselves of tandem routed calling.  
 17 **Q** And then with respect to your situation at -- well, I  
 18 guess I would first start by asking, do you recall when  
 19 we -- when you as Western Wireless commenced those  
 20 negotiations with the South Dakota industry on the  
 21 inter --  
 22 **A** Certainly long before we were worried about LNP. 2002,  
 23 could it have been? The summer of 2002 maybe.  
 24 **Q** And when that was proposed within the agreement that  
 25 you initially presented to the independent LECs was it

1 proposed as an option?

2 A Well, it would be our preferred approach to have both

3 parties have flexibility to use tandem routed calling.

4 And it was proposed in that way.

5 Q And at that particular point in time you as a company

6 were already using Qwest to terminate your wireless to

7 landline traffic; correct?

8 A Yes. And we still use them today.

9 Q Okay. And the ILECs, in terms of delivering any local

10 traffic to Western Wireless were not doing that; is

11 that correct?

12 A That's correct.

13 Q They were utilizing direct connect facilities; is that

14 correct, for local traffic?

15 A When they were available, yeah, or EAS routes in some

16 cases.

17 Q And wouldn't you say that there's kind of an inherent

18 conflict, I guess, between negotiating an agreement

19 that deals with taking direct connect facilities to

20 some point of interconnection within the service area

21 of a rural LEC versus this two-way Qwest tandem

22 proposal that you've mentioned?

23 A From my perspective I don't see that there would be a

24 conflict. They could be complimentary. Western's

25 intent is to find the most economical means to exchange

1 traffic.

2 Q Would you say that language regarding the establishment

3 of two-way facilities is consistent with the language

4 that's in the current agreements dealing with

5 establishment of points of interconnection within the

6 exchange local calling areas of the ILECs?

7 A What's in the agreement is the exchange of traffic when

8 Western Wireless has NPA NXXs that are assigned to the

9 rate centers.

10 Q Just a couple more. You referenced about additional

11 transport costs and no additional transport costs being

12 imposed on the ILECs. And I can't recall specifically

13 under what circumstances that was referenced, but would

14 you agree that if you move the point of interconnection

15 between Western Wireless and the ILECs or you reduce

16 the number of points of interconnection, that that

17 could affect the ILEC's transport -- the local

18 transport within the ILEC network in terms of how far

19 they have to take the traffic or over how many route

20 miles they have to take the traffic?

21 A I would agree. And, in fact, the FCC identified that

22 in their intermodal order in November and thought it

23 was significant enough to draw a distinction between

24 the routing of the traffic and any rating and

25 compensation issues associated with that traffic.

1 Q So not only can moving the POI affect, you know,

2 responsibilities to some LATA tandem somewhere, it can

3 also affect transport costs within the ILEC's own

4 network on the other side of the host or the tandem

5 that's connected to it; correct?

6 A You know, at some levels of traffic that would be the

7 case.

8 Q And if that's the case, then reciprocal transport and

9 termination rates that are negotiated may have to be

10 adjusted?

11 A Well, if --

12 MR. WIECZOREK: I'm going to object

13 as it's beyond the scope of any questions asked on

14 direct or cross after Mr. Coit had his original

15 cross.

16 MR. SMITH: Overruled.

17 A Ask that --

18 Q Do you need me to repeat it?

19 MR. COIT: Maybe you want to read

20 it back, Cheri.

21 (Reporter reads back last question)

22 A I think the agreements accommodate a change of law

23 provision and if -- you know, I mean, you would have

24 to -- the companies would have to speak with counsel

25 about whether LNP constitutes a change of law or

1 whatever other accommodations would need to be foreseen

2 in those agreements.

3 Q There was some questions by the Commissioners

4 concerning the benefit of LNP and individual company

5 service areas. I'm going to try to make this question

6 understandable, but if you need me to repeat it, please

7 do so.

8 Would you agree that the level of

9 significance that a particular customer may give to the

10 ability to port their number from a wireline to a

11 wireless phone may be less if the signal quality within

12 that consumer's area, particularly at that consumer's

13 residence, is less than adequate?

14 A I think every consumer will make -- I mean, will make

15 that decision for themselves. We don't all have the

16 same standards or expectations of what constitutes

17 service quality, and we don't all value it the same

18 relative to other dimensions of our service. So I

19 think, again, that choice is best left to each

20 individual consumer.

21 Q In a related -- I guess a related question. Let's

22 assume that you're a wireline subscriber and you're

23 paying a surcharge on your bill to support intermodal

24 LNP and because of where you're located and the quality

25 of signal coverage you cannot even make wireless calls

1 at your residence.  
 2 Do you feel in those circumstances that that  
 3 customer it's justified to impose the LNP surcharge on  
 4 that customer?  
 5 A I think that customer may be frustrated by the fact  
 6 they might not have the service options they like, but  
 7 they will also accrue to them the benefits of general  
 8 competition in the marketplace.  
 9 MR. COIT: That's all the questions  
 10 I have.  
 11 MR. SMITH: Thank you. I forgot.  
 12 Brett, do you have anything?  
 13 MR. KOENECKE: I sure don't. Thank  
 14 you for asking.  
 15 MS. WIEST: No.  
 16 MR. SMITH: Commissioners, any last  
 17 questions?  
 18 COMMISSIONER BURG: I do. Some of  
 19 these discussions brought up several. I just want  
 20 to clarify one. Do you remember the discussion you  
 21 had with Commissioner Hanson about the process of  
 22 porting?  
 23 THE WITNESS: Yeah. Long-winded  
 24 discussion.  
 25 COMMISSIONER BURG: Long-winded one.

1 back to this one a little bit because some  
 2 discussion after I brought it up before.  
 3 Now that 496 point you got down there, how did  
 4 you arrive at that?  
 5 THE WITNESS: Well, here's what we  
 6 did. We forecasted the ports that we expected as  
 7 Western Wireless. In other words, these are our --  
 8 we forecast the internally, for our purposes what  
 9 we thought we would be able to win in these service  
 10 areas. And then we assumed we had a 45 percent  
 11 market share. And so our port estimate divided by  
 12 .45, and that took us to 496.  
 13 COMMISSIONER BURG: And this isn't  
 14 cell service in the Brookings exchange, this is  
 15 just ports; is that correct?  
 16 THE WITNESS: Yes. This would be  
 17 ports in a year.  
 18 COMMISSIONER BURG: So you're  
 19 thinking that in a year there's going to be over  
 20 1,000 ports in Brookings?  
 21 THE WITNESS: No. I'm sorry. The  
 22 496 represents all the ports we would expect in  
 23 Brookings.  
 24 COMMISSIONER BURG: Not just yours?  
 25 THE WITNESS: Our share would be 45

1 Did I gather from that, you know, if somebody  
 2 orders ahead of time, they can get it when they  
 3 want it -- in other words, I'm looking at the  
 4 four-day window, they're talking about the two-day,  
 5 and there's some discussion about two and a half  
 6 hours. But that would only be --  
 7 In other words, if I said I want it on July 1,  
 8 I should be able to get it on July 1 under the  
 9 four-day --  
 10 THE WITNESS: Yeah. If you wanted  
 11 it at some future date, I think the limit is no  
 12 longer than 30 days in the future, but they have  
 13 that scheduling flexibility.  
 14 COMMISSIONER BURG: But if I want to  
 15 make sure I don't lose service and I say I'm going  
 16 to order it now and I want it effective July 1, I  
 17 should be able to get it July 1?  
 18 THE WITNESS: Should be able to,  
 19 yes.  
 20 COMMISSIONER BURG: If I wanted to  
 21 get it tomorrow, I could have to wait four days?  
 22 THE WITNESS: If it was a wireline  
 23 to wireless port.  
 24 COMMISSIONER BURG: I just wanted to  
 25 clarify that's the way it would work. I want to go

1 percent of that number.  
 2 COMMISSIONER BURG: Okay. I thought  
 3 you said it the other way around.  
 4 THE WITNESS: I think I might have.  
 5 COMMISSIONER BURG: I thought you  
 6 said this is 45 percent. Even that looks like a  
 7 pretty large take.  
 8 The other one, I already discussed this one a  
 9 little bit, but this one -- of course, I didn't  
 10 have time to read it, but does this one mention LNP  
 11 any place in this whole survey?  
 12 THE WITNESS: It's not specific to  
 13 LNP. It does talk about mostly the youth market  
 14 and what the technology concerns should be for  
 15 rural telephone companies to compete for that youth  
 16 market.  
 17 COMMISSIONER BURG: But you're  
 18 introducing it as support for these Dockets of LNP;  
 19 right?  
 20 THE WITNESS: I think it  
 21 demonstrates that the youth demand for wireless as  
 22 a competitive service is significant.  
 23 COMMISSIONER BURG: What local  
 24 landline number is a teen going to port?  
 25 THE WITNESS: Well, a teen or a

1 20-something could port a couple of different  
2 examples off the top of my head. If a teen has a  
3 teen line at home while they're in high school and,  
4 you know, they move out of the house when they're  
5 18, they could retain that same phone number and  
6 put it on a wireless phone. That would be an  
7 example.

8 You know, younger people, you know, they tend  
9 not -- they tend to have temporary housing as their  
10 first home or residence in an area. They might  
11 have two or three of those temporary housing  
12 scenarios, apartments or what have you. As they  
13 move around town, they might want to take their  
14 apartment phone number --

15 COMMISSIONER BURG: But you've kind  
16 of testified they aren't going to have apartment  
17 phones, they're only going to have wireless.

18 THE WITNESS: Some will, some won't,  
19 some do today.

20 COMMISSIONER BURG: Most teens I  
21 know never pay a landline bill, don't have a  
22 landline number to port.

23 THE WITNESS: Becoming much more  
24 common, yes.

25 COMMISSIONER BURG: It sort of

1 MR. SMITH: I have one last  
2 question. In the Exhibit Western Wireless 14 there  
3 are a series of communications involving Qwest and  
4 I guess members of MIC, and I note dates on some of  
5 these date back quite a while. I mean, they're  
6 back into at least March.

7 THE WITNESS: Right.

8 MR. SMITH: This goes to the time  
9 period that you thought was appropriate to allow  
10 for reaching a solution. Given that and given that  
11 they're still locked up and requesting another 67  
12 days in Minnesota or whatever it is, is that 60-day  
13 period really realistic do you think? I mean, it  
14 looks like there's a lot -- given the amount of  
15 wrangling and stuff on this, it looks like there's  
16 a lot more there than one's going to be able --

17 THE WITNESS: They're arguing about  
18 the difference between seven-tenths of a cent and  
19 two-tenths of a cent. They're not arguing about  
20 the difference between \$720,000 versus a couple  
21 thousand dollars.

22 Even if they adopted Qwest's proposal here,  
23 the rates you see for transport or transit would  
24 be -- you know, they might be twice what I have  
25 proposed here, and they'd still be 1 percent of

1 drives the dilemma that I have. What I'm hearing,  
2 that group of people and even a lot more, they'd  
3 rather see the money available in the  
4 telecommunications business spent to get better  
5 wireless service, not to spend the money on things  
6 that could allow them to port a number they don't  
7 even have.

8 I mean, that's the dilemma I see with the kind  
9 of costs that we're seeing here is, is that the  
10 best place to put those dollars when we are  
11 getting -- we haven't gotten any complaints that  
12 I'm aware of about inability to port, but we get  
13 lots of them on the ability to get a good signal.

14 THE WITNESS: We've already spent  
15 those dollars to implement number portability as we  
16 were obligated to do.

17 COMMISSIONER BURG: Right. Are you  
18 just saying you're wanting everybody else to have  
19 to spend them because you did even if they don't  
20 have value?

21 THE WITNESS: What I'm saying is I  
22 want to compete for their customers on an equal  
23 footing.

24 COMMISSIONER BURG: That's all I  
25 have.

1 what the Petitioners have proposed.

2 There are Interconnection Agreements available  
3 today in South Dakota that can be opted into within  
4 a matter of days, and Western Wireless has such an  
5 agreement. That agreement calls for transit at  
6 three-tenths of a cent, and there's nothing to  
7 prevent any carrier from opting that into  
8 agreement.

9 MR. SMITH: I note in one document,  
10 and, again, we haven't had any time to look at it,  
11 it appeared as though Qwest was objecting to the  
12 use of toll trunks for this. Is that what went  
13 down?

14 THE WITNESS: What Minnesota has is  
15 what South Dakota has in that these trunks that  
16 today deliver wireless traffic to telephone  
17 companies using the Qwest tandem used to be two-way  
18 trunks, and today they're one-way trunks. And what  
19 Qwest is suggesting is that we -- they revert those  
20 trunks back to two-way trunks so traffic can flow  
21 both ways.

22 What isn't particularly well-addressed in this  
23 is that Qwest also -- and the Minnesota telcos also  
24 see this as a means by which they can avoid the  
25 phantom traffic problem that they're having today,

1 which is, as we heard, traffic delivered over these  
2 trunks terminating to them that they're not able to  
3 bill and record for. And the process of converting  
4 these trunks to two-way they could also be upgraded  
5 to SS7 and signaling information associated with  
6 SS7 would eliminate the phantom traffic problem.

7 MR. SMITH: I guess back to that,  
8 though, you know, because assuming there's some  
9 cutoff point here money-wise as we've talked about,  
10 when it becomes -- I can't remember the exact  
11 language of the standard, but a significant adverse  
12 economic impact on the end-user, you know, then --  
13 I mean, at some point if the Qwest number that's  
14 ultimately negotiated results in, you know, an  
15 extra 50 cents on here, which I don't necessarily  
16 say that it would but here we'd be looking at -- on  
17 this one here, for example, on Interstate we're  
18 looking at what the difference between with or  
19 without transport is about 18 cents; right?

20 THE WITNESS: Yeah. Well, 16 to 18  
21 cents, yes.

22 MR. SMITH: So if you're talking on  
23 Interstate I see 80 on the bottom and then 62 so,  
24 you know at some point -- and this one may not be a  
25 good example because those numbers are pretty low.

1 additional 60-whatever number of days, is 60 days a  
2 reasonable period of time to think one can  
3 negotiate a solution like this in South Dakota?

4 Is that realistically adequate, or do you  
5 think the plowing of the ground -- do you think  
6 Minnesota will create enough of a -- will resolve  
7 enough of the issues in the Qwest organization  
8 where it would be easier and quicker?

9 THE WITNESS: Qwest in Minnesota  
10 said they were eager to provide this service. And  
11 we -- you know, we don't propose that Qwest is the  
12 only answer to do this. I mean, we talked about a  
13 way that SDN could provide this service today, and  
14 because of the very low volumes of traffic that the  
15 costs that would be absorbed by the telcos would be  
16 tiny. That could go on for some number of months  
17 before, you know, a Qwest agreement would need to  
18 be put in play to achieve similar -- a similar cost  
19 structure.

20 So I think -- what I proposed was 60 days from  
21 the date your order is going to be. That is the  
22 assumption that while we're waiting for the order  
23 that activity is happening and that people are  
24 moving towards implementation. You know, from a  
25 cold start to do -- from where these companies are

1 But at some point you take that 20 cents or  
2 whatever it's going to be or 25 cents and double it  
3 or triple it, you know, it's going to punch it over  
4 that magical line, whatever we think that is.

5 THE WITNESS: Well, and that would  
6 be true -- again, if you doubled the transit rate  
7 per minute, which I have used in my proposal, you  
8 would get about a 5 to 8 percent increase in these  
9 numbers, not a -- as you suggested, a 30 or 40  
10 percent increase.

11 But, you know, I have conviction -- and in  
12 fact, just to clarify what's going on in Minnesota  
13 today, what's going on in Minnesota today is two  
14 things. Should they get their 67-day extension or  
15 whatever it is and what rate should Qwest -- should  
16 Qwest be ordered to provide this service at a rate  
17 other than what they've offered.

18 MR. SMITH: Uh-huh.

19 THE WITNESS: And the staff  
20 recommendation in Minnesota was that Qwest should  
21 be offering that rate, I believe, at the TELRIC  
22 rate.

23 MR. SMITH: Back to the original  
24 question, though. Given the amount of time that  
25 has been spent in Minnesota and the requests for an

1 today and to expect them 60 days from now to be  
2 ready, that would be not impossible but stretching  
3 the limits. But if it's 30 days more for your  
4 decision, 90 days is realistic.

5 MR. SMITH: Thank you. Are there  
6 any other questions?

7 (No audible response)

8 MR. SMITH: You're excused.

9 THE WITNESS: Thank you.

10 MR. SMITH: Thank you. Are you  
11 counsel for the next witness?

12 MS. POLLMAN ROGERS: Yes, I am.

13 MR. SMITH: Thanks. Ms. Rogers,  
14 call your next witness.

15 MS. POLLMAN ROGERS: We'll have to  
16 mark exhibits.

17 (Discussion off the record)

18 (Valley Exhibits 1 through 3 are marked for  
19 identification)

20 MR. SMITH: We're back on the  
21 record.

22 Ms. Rogers, you may proceed with Mr. Oleson.

23 MR. POLLMAN ROGERS: This will be in  
24 Docket TC04-050, Valley Telecommunications  
25 Cooperative's petition, and we would call

1 Steve Oleson to the stand.  
 2 STEVEN OLESON,  
 3 called as a witness, being first duly sworn in the  
 4 above cause, testified under oath as follows:  
 5 DIRECT EXAMINATION  
 6 BY MS. POLLMAN ROGERS:  
 7 Q Good afternoon.  
 8 A Good afternoon.  
 9 Q Had a long day so far.  
 10 A A long three days.  
 11 Q Long three days. Could you please state your name and  
 12 address for the record.  
 13 A My name is Steven Oleson. I'm general manager of  
 14 Valley Telecommunications in Herreid, South Dakota.  
 15 Q I asked you to look at what we have marked as  
 16 Valley Exhibits 1 and 2. Could you please take a look  
 17 at those.  
 18 (Witness examines documents)  
 19 Q Are you familiar with those documents?  
 20 A Yes, I am.  
 21 Q Is Valley Exhibit 1 the direct prefiled testimony you  
 22 filed in this case?  
 23 A Yes, it is.  
 24 Q And Valley Exhibit 2 would be the rebuttal testimony  
 25 you prefiled in this case?

1 approximately 25 percent or less cellular coverage plus  
 2 the cost of local number portability deployment, that  
 3 Valley be granted an extension for the deployment of  
 4 local number portability.  
 5 Q Thank you.  
 6 MS. POLLMAN ROGERS: I would tender  
 7 the witness for cross-examination.  
 8 MR. SMITH: Mr. Lewis.  
 9 CROSS-EXAMINATION  
 10 BY MR. LEWIS:  
 11 Q Thank you. Good day, Commission and counsel. Good day  
 12 or end of day, I should say.  
 13 A I hope so.  
 14 Q It's Mr. Oleson?  
 15 A Oleson.  
 16 Q Great. Sir, I represent Western Wireless. My name is  
 17 Paul Lewis, and I have a series of questions concerning  
 18 this LNP Docket. I'll jump right into it.  
 19 For a while now LNP initiation has been on  
 20 the horizon, and do you understand that in 1996 number  
 21 portability became required by the FCC; true?  
 22 A Yes.  
 23 Q And now today due to the order dated November 10, 2003  
 24 the FCC has mandated compliance for your company by the  
 25 24th of May, 2004 unless you otherwise have received an

1 A Yes, it is.  
 2 Q Did you prepare those documents or direct the  
 3 preparation of these documents?  
 4 A Yes, I did.  
 5 Q Do you have any corrections or additions you would like  
 6 to make to these documents?  
 7 A Yes, I do.  
 8 Q What would that be?  
 9 A On the direct prefiled testimony on page 3 the  
 10 number -- what are the number of wireless carriers  
 11 authorized to serve in our company's service area, I  
 12 put two. There is three. And the additional carrier  
 13 is CommNet Cellular.  
 14 Q Any other additions or corrections?  
 15 A No.  
 16 Q If I would ask you the questions that I asked -- that  
 17 were asked in Valley's Exhibits 1 and 2 today, would  
 18 your answers be the same?  
 19 A Yes.  
 20 Q With the correction we just made?  
 21 A Yes.  
 22 Q Would you provide us with a brief summary of your  
 23 prefiled testimony, please.  
 24 A Yes. I believe that due to requests for local number  
 25 portability and the fact that Valley's service area has

1 exception. Is that true as well?  
 2 A Yes.  
 3 Q So from December of 2003 until May of 2004 in  
 4 investigating your LNP initiation or implementation  
 5 options did you ever contact Western Wireless to  
 6 explore or talk about cost-effective ways to put LNP  
 7 into service?  
 8 A No, I did not.  
 9 Q Sir, do you have any exchanges in North Dakota?  
 10 A No, we do not.  
 11 Q One of the arguments you've heard before this  
 12 Commission concerning LNP implementation is undue  
 13 economic burden that will be placed on consumers and  
 14 companies such as your own. Have you been aware of  
 15 that?  
 16 A Yes.  
 17 Q And you realize that Congress clearly envisioned that  
 18 requiring LNP implementation would cause you to incur  
 19 additional costs, don't you?  
 20 A I believe so.  
 21 Q Do you also realize that Congress in anticipation of  
 22 those costs provided for an end-user surcharge in which  
 23 you could recoup those costs for LNP implementation?  
 24 A I believe I am aware of that.  
 25 Q Sir, today, you know, we've talked a lot about choice,

743

1 and I'd like to ask you a few questions about the  
 2 services you provide.  
 3 Do you have dial-up networking available to  
 4 your customers for Internet access?  
 5 A Yes, we do.  
 6 Q Do you also provide DSL?  
 7 A Yes, we do.  
 8 Q And do you provide cable TV?  
 9 A Yes, we do.  
 10 Q So one of the concerns that the committee has  
 11 manifested is choices for customers and wouldn't you  
 12 agree that when you provide dial-up and DSL you  
 13 inherently are giving your customers a choice?  
 14 MS. POLLMAN ROGERS: Just a minute.  
 15 Before you answer the question could you please  
 16 clarify who you're referring to as committee?  
 17 MR. LEWIS: I'm sorry. The  
 18 Commission here today.  
 19 MS. POLLMAN ROGERS: And your  
 20 question was prefaced on --  
 21 MR. LEWIS: Discussions concerning  
 22 consumer choice.  
 23 MS. POLLMAN ROGERS: That they  
 24 brought up?  
 25 MR. LEWIS: Yes. Commissioner Burg

744

1 brought that up specifically commenting about  
 2 choice and whether choice was good for consumers.  
 3 MS. POLLMAN ROGERS: But you were  
 4 referring to the Commission?  
 5 MR. LEWIS: Yes.  
 6 Q So wouldn't you agree that giving DSL services in  
 7 addition to that dial-up, that gives your customers  
 8 choices?  
 9 A Yes.  
 10 Q And that DSL service is -- you charge kind of a premium  
 11 fee for that, do you not, because in essence you get  
 12 quicker connectivity, you don't have risks of being  
 13 disconnected like you do with dial-up?  
 14 A Yes.  
 15 Q So it's more convenient for customers?  
 16 A Yes.  
 17 Q Now I see in your testimony on page 2 that you're  
 18 working to deploy video over DSL and you're researching  
 19 the possibility of voice over Internet protocol. Is  
 20 that true?  
 21 A Are you referring to my prefiled or rebuttal?  
 22 Q It's your direct testimony, sir. That would be your  
 23 regular testimony, and it's on page 2, if you have the  
 24 same sequence as we do.  
 25 A Okay. Yes, I see that.

745

1 Q And wouldn't it be fair to say that in your researching  
 2 of voice over Internet protocol options that you'd like  
 3 to give to your customers it gives them more of a  
 4 choice or more of a way of making a call over Internet  
 5 access?  
 6 A I guess I can't say that. We haven't investigated that  
 7 part.  
 8 Q So now when you say video over DSL that's in essence  
 9 TV, is it not?  
 10 A Yes, it is.  
 11 Q So you are competing in your area to provide television  
 12 service, are you not?  
 13 A Yes.  
 14 Q So in essence it's a choice for your customers; true?  
 15 A Yes.  
 16 Q By this choice in your service area that you're giving  
 17 your customers it is limited to basically the Valley  
 18 Co-op service area, is it not?  
 19 A Yes, it is.  
 20 Q And this is just like what Western Wireless is trying  
 21 to do in implementing local number portability, but  
 22 their service area is on a national level, is it not?  
 23 A I don't know as if I could state that.  
 24 Q But you are trying to give your customers choices just  
 25 as Western Wireless is trying to give their customers

746

1 choices?  
 2 A We are trying to give our customers choices, yes.  
 3 Q Thank you. You've noted in your direct testimony on  
 4 page 1 that cellular companies have a more extensive  
 5 calling area than your exchange boundaries. Do you  
 6 agree with that statement?  
 7 It's at the bottom of page 1 of your direct,  
 8 if we have the numbering sequence correct.  
 9 A Yes.  
 10 Q So wouldn't you agree that part of those choices, that  
 11 it's beneficial for the public to have a carrier with a  
 12 larger local calling area?  
 13 A Yes.  
 14 Q And, in essence, you have an extended area of service,  
 15 do you not?  
 16 A Yes, we do.  
 17 Q Sir, where are those to? Who do you provide those  
 18 extended service locations to? What towns?  
 19 A I guess I'm not sure I have that information.  
 20 Q But would you agree with me that extended area service  
 21 is driven by customer demand? They want to have the  
 22 option to be able to make the call outside the area and  
 23 have it as a local call?  
 24 A Those areas were established before I took over. I do  
 25 not know what drove them to have the expanded area.

1 **Q** But to date Valley still maintains those areas.  
 2 **A** Yes, we do.  
 3 **Q** And you charge a little bit more in the line charge for  
 4 that, do you not? It's not a toll call, but you charge  
 5 a little bit more to have that service?  
 6 **A** Not that I'm aware of.  
 7 **Q** Okay. But your customers do pay and enjoy that option,  
 8 do they not, pay for and enjoy that option?  
 9 **A** They do have that option.  
 10 **Q** So if we look at just simple pocketbook economics, you  
 11 know, what hits us in our back pocket, it would  
 12 actually be a benefit for people to be able to keep  
 13 their phone number and get extended area service  
 14 without any additional charges, wouldn't you agree?  
 15 **A** I am not -- no, I wouldn't. With the lack of cell  
 16 service in our area basically that would not be a true  
 17 statement.  
 18 **Q** But hypothetically if we expanded that cell service, it  
 19 would be a benefit, would it not?  
 20 **A** If someone expanded cell service, it could be.  
 21 **Q** You have not done any independent or internal surveys  
 22 of your customers to determine what they would like or  
 23 would be willing to pay to have the option of local  
 24 number portability, have you?  
 25 **A** No, we have not.

1 **Q** And you're not presenting any demographic information  
 2 today to the Commission on the average income and  
 3 interests of your customers, are you?  
 4 **A** I'm not presenting that, but I do have that  
 5 information.  
 6 **Q** And regarding the deployment of local number  
 7 portability, Valley conducted no independent cost  
 8 analysis on your own, your own office? You did no cost  
 9 analysis, you were primarily relying on Mr. Bullock,  
 10 were you not?  
 11 **A** Yes, we are.  
 12 **Q** And you used Mr. Bullock's numbers to constitute your  
 13 filing to the Commission to create what you've referred  
 14 to in your rebuttal testimony as complete a petition as  
 15 possible. Is that true?  
 16 **A** I believe that's true.  
 17 **Q** In your testimony you've stated that demand for local  
 18 number portability appears to be minimal. Do you agree  
 19 with that?  
 20 **A** Actually I think if you look in our testimony we have  
 21 had no -- we have had an inquiry but no requests.  
 22 **Q** Okay. So you say virtually there's been no active  
 23 requests --  
 24 **A** That's correct.  
 25 **Q** -- for local number portability. Sir, didn't you know

1 that your cost analyst, Mr. Bullock, estimated at least  
 2 60 ports per year in your area?  
 3 **A** That's a question I would defer to Mr. Bullock.  
 4 **Q** But you did admit that you did rely upon his numbers  
 5 for your petition filings.  
 6 **A** Yes, we did.  
 7 **Q** How many host offices does Valley Telecommunications  
 8 have?  
 9 **A** One.  
 10 **Q** And how many points of interconnect are at that one  
 11 office, POIs at that one office?  
 12 **A** I'm not sure I understand your answer -- or your  
 13 question.  
 14 **Q** I'm just curious as to, you know, you have one host  
 15 office available for your exchange; correct?  
 16 **A** Yes.  
 17 **Q** Do you have any active points of interconnect at that  
 18 host office?  
 19 **A** To who?  
 20 **Q** To Western Wireless or any other cellular carrier.  
 21 **A** No, we do not.  
 22 **Q** Right now can you represent before this Commission that  
 23 you are able to afford the implementation of LNP  
 24 services? You are basically, aren't you, able to  
 25 afford it?

1 **A** I guess I -- I would refer that to Mr. Bullock.  
 2 **Q** And today you're not going to contend before the  
 3 Commission that the implementation of LNP is not  
 4 technically feasible, are you?  
 5 **A** Repeat the question, please.  
 6 **Q** You're not going to represent before the Commission  
 7 today that technically LNP cannot be implemented, are  
 8 you? You're not going to say to them, hey, we can't do  
 9 this, it's too technically difficult?  
 10 **A** No.  
 11 MR. LEWIS: Thank you. No further  
 12 questions.  
 13 MR. SMITH: Are you a party in this  
 14 one?  
 15 MR. KOENECKE: I think so.  
 16 MR. SMITH: I forgot. I'm sorry.  
 17 CROSS-EXAMINATION  
 18 BY MR. KOENECKE:  
 19 **Q** Mr. Oleson, my name is Brett Koenecke and I'm a lawyer  
 20 from Pierre and I represent Midcontinent Communications  
 21 today. I've got a couple of questions.  
 22 I've been feverishly trying to determine in  
 23 the file as kept by my partner, Dave Gerdes, whether  
 24 you object or would oppose local number portability for  
 25 wireline to wireline service. Can you tell me an

1 answer to that question?  
 2 A I don't believe I'd have any reason.  
 3 Q Okay. So as I've read the documents --  
 4 A I don't know as if there's been any cost studies done  
 5 for that so I guess I wouldn't have that answer.  
 6 Q As I read your documents, everything seems to be  
 7 predicated on wireline to wireless. Have I missed  
 8 anything in that regard?  
 9 A No.  
 10 MR. KOENECKE: Thank you very much.  
 11 That's all I have.  
 12 MR. SMITH: Ms. Wiest.  
 13 MS. WIEST: Thank you.  
 14 CROSS-EXAMINATION  
 15 BY MS. WIEST:  
 16 Q What's your current local rate?  
 17 A \$15.50.  
 18 Q I see you updated your testimony, and there are three  
 19 carriers authorized to provide service in your area; is  
 20 that correct?  
 21 A With some qualifications. We currently have CommNet  
 22 Cellular within our territory, and I'm not sure --  
 23 Commissioner Sahr may know more about it than I do --  
 24 whether they are currently operating or not.  
 25 Q And with respect to Verizon and Western Wireless -- you

1 said you have 25 percent or less cellular coverage.  
 2 First of all, who is providing that, the service, that  
 3 coverage?  
 4 A Western Wireless and Verizon.  
 5 Q They both are providing coverage to your area?  
 6 A In small sections of our area, yes.  
 7 Q And can you tell me where that coverage is located?  
 8 A Verizon has a tower in the edge of our exchange in  
 9 Glenham.  
 10 Q Okay.  
 11 A And Western Wireless has a tower north of our exchange  
 12 of Hosmer.  
 13 Q And have people in your area, do you know, complained  
 14 about the lack of cellular coverage in your area?  
 15 A Very much so.  
 16 Q And has the cellular companies responded to that to  
 17 increase any of that?  
 18 A To my knowledge, no.  
 19 Q So is there any reason to expect that your cellular  
 20 coverage will increase in the near future?  
 21 A I have had no indication that it will.  
 22 MS. WIEST: That's all I have.  
 23 MR. SMITH: Thank you. Do  
 24 Commissioners have any questions of Mr. Oleson?  
 25 Commissioner Hanson, do you have a question?

1 You're giving me a look.  
 2 VICE CHAIR HANSON: It wasn't  
 3 intentional. Mr. Oleson, almost kiddingly I'd ask  
 4 you if there were any questions that we asked Randy  
 5 that you disagree with, but I'd like to know is  
 6 there anything that you'd like to say that you  
 7 haven't been asked?  
 8 THE WITNESS: I guess in Valley's  
 9 situation I believe with the amount of cell  
 10 coverage that we currently have local number  
 11 portability is not feasible. And as I answered to  
 12 her, we have no indications in the future that  
 13 anybody plans on serving us.  
 14 VICE CHAIR HANSON: So it's  
 15 economically feasible, but you don't have an  
 16 indication for -- when you say serving us you're  
 17 talking about cellular?  
 18 THE WITNESS: Cellular, yes.  
 19 VICE CHAIR HANSON: Okay. All  
 20 right. Thank you.  
 21 MR. SMITH: Ms. Rogers. Rich, I  
 22 forgot to ask you earlier if you had anything.  
 23 MR. COIT: No questions.  
 24 MR. SMITH: I think -- did you offer  
 25 the exhibits?

1 MS. POLLMAN ROGERS: No. First of  
 2 all, I would offer Valley Exhibits 1 and 2.  
 3 MR. LEWIS: No objections.  
 4 MR. KOENECKE: No objection.  
 5 MS. WIEST: No objection.  
 6 MR. SMITH: Valley Exhibit 1 and 2  
 7 are admitted.  
 8 REDIRECT EXAMINATION  
 9 BY MS. POLLMAN ROGERS:  
 10 Q How long have you been the manager of Valley?  
 11 A A year and a half.  
 12 MS. POLLMAN ROGERS: Mr. Lewis; is  
 13 that right?  
 14 MR. LEWIS: Correct.  
 15 Q Mr. Lewis asked you about some of the other services  
 16 that you provide up there with regard to video and DSL  
 17 and those types of services. Would it be fair to say  
 18 that in those instances the customer pays for what  
 19 services they choose to avail themselves of?  
 20 A I believe in all instances they do.  
 21 Q And in response to the last set of questions do I  
 22 understand you to say that deployment of LNP in your  
 23 service area would be too expensive for a benefit that  
 24 no one has demanded?  
 25 A Yes. That would be true.

1 MS. POLLMAN ROGERS: Thank you.  
 2 That's all I have.  
 3 MR. SMITH: Mr. Lewis, any further  
 4 questions?  
 5 RE-CROSS-EXAMINATION  
 6 BY MR. LEWIS:  
 7 **Q** Sir, were you in the room earlier when Mr. Dickens  
 8 posed his hypothetical concerning the coverage of Blunt  
 9 or the lack thereof?  
 10 We were dealing with -- it was a hypothetical  
 11 that he posed about -- I understand Blunt's not in your  
 12 service territory --  
 13 MS. POLLMAN ROGERS: I'm going to  
 14 object to this as beyond the scope of the redirect.  
 15 MR. SMITH: Response, Mr. Lewis?  
 16 MR. LEWIS: I'll rephrase.  
 17 **Q** Given the lack of your coverage, your cellular coverage  
 18 in your area -- I would like to pose a hypothetical.  
 19 If a tower went up tomorrow in the Valley area, the  
 20 exchange area, to provide coverage, would you provide  
 21 LNP coverage -- or service?  
 22 **A** I guess I'm not sure how to answer that. One tower  
 23 would -- with the size of our territory would not be a  
 24 sufficient means for us to make it workable. I don't  
 25 believe it would be.

1 way you want to spend your birthday.  
 2 MR. SMITH: We have people who have  
 3 come to town to testify today.  
 4 MS. POLLMAN ROGERS: I believe  
 5 they're all available tomorrow.  
 6 MR. SMITH: We can go off the  
 7 record. We'll go into recess.  
 8 (A short recess is taken)  
 9 (Exhibits Faith 1 through 3 are marked for identification)  
 10 MR. SMITH: Back on the record.  
 11 We're now going to consider Docket No. TC04-051,  
 12 the petition of the City of Faith for suspension of  
 13 LNP obligations.  
 14 Ms. Rogers.  
 15 MS. POLLMAN ROGERS: Yes. We would  
 16 call Shane Ayres to the stand.  
 17 SHANE AYRES,  
 18 called as a witness, being first duly sworn in the  
 19 above cause, testified under oath as follows:  
 20 DIRECT EXAMINATION  
 21 BY MS. POLLMAN ROGERS:  
 22 **Q** Would you please state your name and business address  
 23 for the record.  
 24 **A** Yeah. Shane Ayres. I work for the City of Faith,  
 25 Faith, South Dakota.

1 **Q** So your answer is then you wouldn't go ahead and  
 2 provide LNP service?  
 3 **A** I'm not saying we wouldn't, but I'm not sure that it's  
 4 feasible.  
 5 MR. LEWIS: No further questions.  
 6 MR. SMITH: Any questions from other  
 7 parties?  
 8 MS. AILTS WIEST: None.  
 9 MR. SMITH: Commissioners?  
 10 REDIRECT EXAMINATION  
 11 BY MS. POLLMAN ROGERS:  
 12 **Q** Again, just following up, you mean one tower would not  
 13 provide sufficient additional coverage to make this a  
 14 viable service for your customers.  
 15 **A** That's correct.  
 16 MS. POLLMAN ROGERS: That's all.  
 17 MR. SMITH: Mr. Lewis, anything  
 18 further?  
 19 MR. LEWIS: No.  
 20 MR. SMITH: Thank you. You're  
 21 excused, Mr. Oleson. Thank you for having the  
 22 patience to wait all day.  
 23 Should we proceed with any other witnesses  
 24 today, or has everyone had enough?  
 25 CHAIRMAN SAHR: Only if that's the

1 **Q** What is your actual occupation with Faith?  
 2 **A** Finance officer.  
 3 **Q** And as part of your duties as finance officer are you  
 4 also in charge of Faith Municipal Telephone Company?  
 5 **A** Yes. On a day-to-day basis.  
 6 **Q** You have in front of you what have been marked as Faith  
 7 Exhibit 1 and Faith Exhibit 2. Would you take a look  
 8 at those documents.  
 9 (Witness examines documents)  
 10 **Q** Is Exhibit 1 the direct prefiled testimony that you  
 11 filed in this case?  
 12 **A** That's right.  
 13 **Q** And Exhibit 2 would be your prefiled rebuttal  
 14 testimony?  
 15 **A** Correct.  
 16 **Q** Do you have any corrections or additions you wish to  
 17 make to these exhibits?  
 18 **A** No, I do not.  
 19 **Q** And you have reviewed them. If I asked you the  
 20 questions that are these documents, would your answers  
 21 be the same today?  
 22 **A** Yes.  
 23 **Q** Would you please give a brief summary of your prefiled  
 24 testimony.  
 25 **A** The summary is that the City of Faith being of low

1 access lines it would not be in the public interest or  
 2 it would be economically burdensome -- and economically  
 3 burdensome to the City of Faith and the consumers of  
 4 Faith.  
 5 **Q** If you were required --  
 6 **A** If we were required to implement LNP.  
 7 MS. POLLMAN ROGERS: With that, I  
 8 would offer Faith Exhibits 1 and 2.  
 9 MR. LEWIS: No objection.  
 10 MR. KOENECKE: No objection.  
 11 MS. WIEST: No objection.  
 12 MR. SMITH: Faith 1 and 2 are  
 13 admitted.  
 14 MS. POLLMAN ROGERS: I would tender  
 15 the witness for cross. Mr. Koenecke.  
 16 MR. KOENECKE: Thank you. I'll be  
 17 brief.  
 18 CROSS-EXAMINATION  
 19 BY MR. KOENECKE:  
 20 **Q** I'm Brett Koenecke, a lawyer from Pierre. I represent  
 21 Midcontinent Communications. Do I understand your  
 22 objections to local number portability to extend to  
 23 wireline to wireline portability, or is it just  
 24 wireline to wireless portability?  
 25 **A** Yes. I believe it is both.

1 **Q** It's both?  
 2 MR. KOENECKE: Okay. That's all I  
 3 have.  
 4 MR. SMITH: Are you done?  
 5 MR. KOENECKE: Yes.  
 6 MR. SMITH: Mr. Lewis.  
 7 CROSS-EXAMINATION  
 8 BY MR. LEWIS:  
 9 **Q** Good evening, Mr. Ayres. I see by your testimony  
 10 basically you've stated Faith has already established  
 11 of point of interconnect with SDN and Qwest, have you  
 12 not?  
 13 **A** That's correct.  
 14 **Q** On page 2 of your direct testimony you've stated that  
 15 wireless carriers have requested LNP connections with  
 16 you folks. Is that true also?  
 17 **A** That's right.  
 18 **Q** You were in the room earlier today. Were you able to  
 19 hear some of Mr. Williams' testimony?  
 20 **A** Yes.  
 21 **Q** Did you hear Mr. Williams mention that he would be  
 22 willing to consider a suspension of the LNP  
 23 implementation until March 31, 2005 for Faith?  
 24 **A** Yes, I did.  
 25 **Q** Would you be willing to immediately negotiate with

1 Western Wireless or any other cellular company in an  
 2 attempt to achieve a lower cost method of LNP  
 3 implementation?  
 4 MS. POLLMAN ROGERS: I'm going to  
 5 object to that question. That goes way beyond the  
 6 scope of direct examination here.  
 7 MR. SMITH: Overruled.  
 8 **A** Could you repeat that one more time?  
 9 **Q** Sure. Would you be willing to immediately negotiate  
 10 with Western Wireless or any other cellular company in  
 11 an attempt to achieve a lower cost-effective method of  
 12 LNP implementation?  
 13 Your answer isn't legally binding. It's just  
 14 would you be willing to enter into negotiations to  
 15 achieve this goal?  
 16 **A** I think we'd be willing to look at something, I mean,  
 17 if it brings the cost down. That would be my answer.  
 18 MR. LEWIS: Thank you. No further  
 19 questions.  
 20 MR. SMITH: Ms. Wiest.  
 21 MS. WIEST: Thank you.  
 22 CROSS-EXAMINATION  
 23 BY MS. WIEST:  
 24 **Q** What is your current local rate?  
 25 **A** 9.50.

1 **Q** How many wireless carriers have the authority to serve  
 2 your area? Do you know?  
 3 **A** I believe there are two.  
 4 **Q** Who are they?  
 5 **A** Western Wireless and Verizon.  
 6 **Q** Are both of those carriers actually serving your area?  
 7 **A** Yes.  
 8 **Q** And you stated that wireless carriers have requested  
 9 LNP. Do you remember who?  
 10 **A** I believe both Verizon and Western Wireless have.  
 11 **Q** And did you respond to that?  
 12 **A** Yes.  
 13 **Q** And I don't know if you know this or not but do you  
 14 know what type of switch Faith has?  
 15 **A** Yes. A Mytel switch.  
 16 **Q** Is it your intention to upgrade that switch or get a  
 17 new switch in the near future, or do you know?  
 18 **A** I would have to say as soon as we can plan for that and  
 19 as far as the funds are available, yes.  
 20 **Q** Is it your understanding that you'll need one by 2007,  
 21 the end of 2007?  
 22 **A** I don't know if we will need one. I think that the  
 23 idea is that we will lose support for that switch.  
 24 **Q** Okay.  
 25 MS. WIEST: That's all I have.

1 Thank you.  
2 MR. SMITH: Commissioners, do you  
3 have questions?  
4 COMMISSIONER BURG: I guess just a  
5 couple of clarifying. How many consumers do you  
6 have? How many lines do you have in Faith?  
7 THE WITNESS: Last I checked it was  
8 less than 400.  
9 COMMISSIONER BURG: Is there anybod  
10 that actually is providing cell service for Faith  
11 now? I mean, do people have decent cell service  
12 available?  
13 THE WITNESS: I would say it's  
14 spotty.  
15 COMMISSIONER BURG: Where is the  
16 nearest tower? Do you know?  
17 THE WITNESS: There is a Verizon  
18 tower within -- on Faith Rural. I guess they lease  
19 that.  
20 COMMISSIONER BURG: How far away  
21 from Faith City is that?  
22 THE WITNESS: It's within city  
23 limits.  
24 COMMISSIONER BURG: That's all I  
25 have.

1 MR. SMITH: Other questions from the  
2 Commission? Ms. Rogers?  
3 MS. POLLMAN ROGERS: I don't have  
4 anything on redirect.  
5 MR. SMITH: Rich.  
6 MR. COIT: No questions.  
7 MR. LEWIS: Nothing further.  
8 MR. SMITH: Thank you. Ms. Wiest,  
9 anything further?  
10 MS. WIEST: No.  
11 MR. SMITH: Thank you, Mr. Ayres.  
12 You're excused.  
13 (Discussion off the record)  
14 (Proceedings are in recess)
