=====

TRANSCRIPT OF PROCEEDINGS, held in the  
above-entitled matter, at the State Capitol Building,  
500 East Capitol Avenue, Pierre, South Dakota, on the  
21st day of June through the 1st day of July 2004.

1 (Exhibits Golden West 1 - 3 are marked for identification)  
 2 (Exhibits Armour 1 - 3 are marked for identification)  
 3 (Exhibits Sioux Valley 1 - 3 are marked for identification)  
 4 MR. SMITH: Good morning, everyone.  
 5 The hearing is reconvened in the LNP Dockets, and  
 6 this morning we will begin with the Dockets that we  
 7 weren't able to begin with yesterday, and those are  
 8 TC04-045, Golden West Telecommunications, TC04-044,  
 9 Sioux Valley, and TC04-046, Armour, Bridgewater,  
 10 and Union.  
 11 Ms. Rogers.  
 12 MS. POLLMAN ROGERS: Thank you. I  
 13 believe that we will begin with Golden West, Vivian  
 14 Kadoka, which is Docket number TC04-045 if that's  
 15 acceptable. Is that the order?  
 16 MR. SMITH: I gave that order, but  
 17 you can take them in any order.  
 18 MR. WIECZOREK: Could I raise a  
 19 procedural issue? This witness will testify in  
 20 three Dockets. I would think it makes much more  
 21 sense if we just cover all three Dockets through  
 22 his first testimony so I don't have to  
 23 cross-examine him separately on every one of them  
 24 to build my record for each Docket.  
 25 MR. SMITH: That's fine. Is that

1 okay with you?  
 2 MS. POLLMAN ROGERS: Yes.  
 3 MR. SMITH: Are the other two  
 4 Alliance and Splitrock? No.  
 5 MS. POLLMAN ROGERS: Armour  
 6 Bridgewater-Canistota, which is TC04-046. Actually  
 7 Mr. Snyders would probably just as soon Denny  
 8 testify on his. And the third is Sioux Valley  
 9 Docket TC04-044.  
 10 MR. SMITH: Okay.  
 11 MR. WIECZOREK: Yeah. Those are the  
 12 three, and for the Commission to understand, I just  
 13 don't see how we can break them apart. I'm going  
 14 to ask him general questions we can apply to all  
 15 Dockets, and I think that would expedite things.  
 16 MR. SMITH: I agree.  
 17 MS. POLLMAN ROGERS: Okay. We will  
 18 call Dennis Law.  
 19 DENNIS LAW,  
 20 called as a witness, being first duly sworn in the  
 21 above cause, testified under oath as follows:  
 22 DIRECT EXAMINATION  
 23 BY MS. POLLMAN ROGERS:  
 24 Q Good morning.  
 25 A Good morning.

1 Q Please state your name and business address for the  
 2 record.  
 3 A My name is Dennis Law. My business address is 525 East  
 4 Fourth Street, Dell Rapids, South Dakota.  
 5 Q Denny, what is your occupation?  
 6 A I am a regional manager for Golden West  
 7 Telecommunications.  
 8 Q And would that include all of the companies we just  
 9 mentioned in all three Dockets?  
 10 A That would include all of those companies. I have  
 11 different titles depending on which company it is, but  
 12 that is my position.  
 13 Q Okay. I am going to have you look at, first of all,  
 14 what have been marked as Exhibits 1 and 2 -- I think  
 15 they're Golden West Exhibits 1 and 2. Do you have  
 16 those or do you see those?  
 17 A I have those.  
 18 Q And can you identify those?  
 19 A That would be the prefiled testimony in the Golden West  
 20 case, Golden West Vivian and Kadoka, the prefiled  
 21 testimony of George Strandell.  
 22 Q And George Strandell is whom?  
 23 A George Strandell is the CEO of Golden West  
 24 Telecommunications.  
 25 Q George was unable to be here today, and so you are in a

1 position to adopt this testimony and be cross-examined  
 2 on it; is that correct?  
 3 A Yes. That is correct.  
 4 MS. POLLMAN ROGERS: At this time I  
 5 would move that -- I guess I have to admit them  
 6 into the record first, don't I? I'm going to move  
 7 that Denny Law adopt the prefiled testimony of  
 8 George Strandell, both the direct testimony and the  
 9 rebuttal testimony of George Strandell.  
 10 MR. WIECZOREK: I have no objection.  
 11 MS. AILTS WIEST: No objection.  
 12 MR. SMITH: Are you in this one?  
 13 MR. KOENECKE: No. Just Sioux  
 14 Valley. That's the only one I'm in.  
 15 MR. COIT: No objection.  
 16 MR. SMITH: What were the numbers on  
 17 those?  
 18 MS. POLLMAN ROGERS: TC04-045.  
 19 MR. SMITH: What did you call the  
 20 exhibits?  
 21 MS. POLLMAN ROGERS: Golden West  
 22 Exhibit 1 and 2.  
 23 MR. SMITH: Okay. And those Golden  
 24 West Exhibits 1 and 2 are admitted.  
 25 Q Looking first at Golden West Exhibit 1, are you

1 familiar with this document?  
 2 A Yes, I am.  
 3 Q Have you had an opportunity to review it?  
 4 A Yes, I have.  
 5 Q Do you have any corrections or additions to Exhibit 1?  
 6 A I do on Exhibit 1 for Golden West. On page number 1,  
 7 line 17, correction to the access line counts and the  
 8 lifeline customers as described. In line 17 the  
 9 correct access line count is 17,704, and in reference  
 10 to the lifeline customers, the correct number is 2,033,  
 11 2,033.  
 12 I also have corrections on page 2, beginning  
 13 on line 4 in reference to Vivian Telephone Company  
 14 access lines. The correct access line number is  
 15 18,973, and in reference to the lifeline customers for  
 16 Vivian Telephone Company the correct number is 2,471.  
 17 My final correction is in line 10, also on  
 18 page 2 for Kadoka Telephone Company. The correct  
 19 access line number is 559, and the lifeline customers  
 20 is 52. And those are all of my corrections to that  
 21 exhibit.  
 22 Q Thank you. We have made a Motion, and I believe that's  
 23 been granted that you are in essence adopting the  
 24 testimony of George. If I asked you, Denny, the  
 25 questions contained in Golden West Exhibits 1 and 2

1 today, would your answers be the same with these  
 2 corrections?  
 3 A Yes, they would.  
 4 Q Could you briefly summarize your testimony in the  
 5 Golden West Docket?  
 6 A A brief summary of the testimony for Golden West would  
 7 be that we feel that the local number portability issue  
 8 in this Docket is a high-cost low demand avenue that we  
 9 are not in favor of implementing at this time.  
 10 Q Now I'm going to turn your attention to Exhibits Armour  
 11 1 and 2, which would be in Docket TC04-046. Can you  
 12 identify those, please.  
 13 A Yes, I can. That would be my direct prefiled testimony  
 14 and rebuttal testimony on behalf of Armour,  
 15 Bridgewater-Canistota and Union Telephone Companies.  
 16 Q And this is prefiled testimony of yourself, right?  
 17 A In my own name, yes.  
 18 Q Okay. Good. Are there any additions or corrections to  
 19 this testimony?  
 20 A There is one correction to the Exhibit 1, direct  
 21 prefiled testimony. There's no page numbers on my  
 22 file, but I am looking at the next to the last page.  
 23 Line number 10 says, "Effective December 13, 2007 is an  
 24 additional complication." The correction to that is it  
 25 should be December 31, 2007, not December 13. That is

1 my only correction to this testimony.  
 2 Q If I asked you the same questions contained in Armour  
 3 Exhibits 1 and 2 today, would your answers be the same?  
 4 A Yes, they would.  
 5 Q Would you briefly summarize your testimony in this  
 6 Docket?  
 7 A A brief summary of this testimony would be that Armour,  
 8 Union and Bridgewater-Canistota feel that the economic  
 9 burden of implementing local number portability greatly  
 10 outweighs any demand or consumer benefit for these  
 11 areas and is further complicated by the fact that  
 12 currently these three companies deploy a switching  
 13 technology which will in essence be obsolete in a few  
 14 years.  
 15 MS. POLLMAN ROGERS: I would offer  
 16 Armour Exhibits 1 and 2.  
 17 MR. WIECZOREK: No objection.  
 18 MS. AILTS WIEST: No objection.  
 19 MR. SMITH: Mr. Coit.  
 20 MR. COIT: No objection.  
 21 MR. SMITH: Armour's Exhibits 1 and  
 22 2 are admitted.  
 23 Q Finally, I would direct your attention to Sioux Valley  
 24 Exhibits 1 and 2. Can you identify those documents?  
 25 A That would be my direct prefiled testimony and rebuttal

1 testimony in the Docket concerning Sioux Valley  
 2 Telephone Company.  
 3 Q What's your position with Sioux Valley?  
 4 A My title at Sioux Valley Telephone is general manager.  
 5 Q Do you have any additions or corrections to this  
 6 testimony?  
 7 A I have no additions or corrections to this testimony.  
 8 Q If I asked you the questions contained in Exhibits 1  
 9 and 2 today, would your answers be the same?  
 10 A Yes, they would.  
 11 Q Could you briefly summarize your prefiled testimony in  
 12 the Sioux Valley Docket?  
 13 A Sioux Valley Telephone Company feels that the  
 14 implementation of local number portability would be an  
 15 undue economic burden on the company and its consumers  
 16 for virtually a minimal benefit.  
 17 MS. POLLMAN ROGERS: I would offer  
 18 Sioux Valley Exhibits 1 and 2.  
 19 MR. WIECZOREK: No objection.  
 20 MR. KOENECKE: No objection.  
 21 MS. AILTS WIEST: No objection.  
 22 MR. COIT: No objection.  
 23 MR. SMITH: Sioux Valley 1 and 2 are  
 24 admitted.  
 25 MS. POLLMAN ROGERS: I would tender

1 the witness for cross-examination on all three  
2 Dockets.

3 MR. COIT: No questions.

4 MR. SMITH: Mr. Wieczorek.

5 MR. WIECZOREK: Thank you,

6 Mr. Smith, Commission.

7 CROSS-EXAMINATION

8 BY MR. WIECZOREK:

9 Q I'd like to touch on a couple of things just based on  
10 your opening. First of all, you're testifying on  
11 behalf of a number of companies here today; correct?

12 A Yes, I am.

13 Q There will be some questions I'll ask that will be  
14 company-specific and I'll use the company name then and  
15 just answer them for that company, if you would,  
16 please. And I might ask some general questions as to  
17 all the companies you're testifying for, and then I'll  
18 be looking for the answer if it's true for all the  
19 companies, all right?

20 A Fine.

21 Q If you're confused as to whether I'm asking about a  
22 specific company or all the companies, just ask me and  
23 I'll try to clarify.

24 A I will.

25 Q When you gave your opening statement concerning the

1 Q Okay. Would you agree with me that those three  
2 companies' population density per square mile is much  
3 lower than say your Sioux Valley exchange?

4 A I would agree.

5 Q And probably -- well, and even the Union Telephone  
6 Company has -- the same question.

7 A I expect that's correct, yes.

8 Q Let's stay with the Golden West -- the companies that  
9 are part of the Golden West Docket right now. Do you  
10 understand how the cost analysis for transport has been  
11 done by your cost expert in this case?

12 A I have been told the methodology. Can I review it on a  
13 piece-by-piece basis? No. That is what we hired them  
14 for.

15 Q The methodology as you understand it, could you  
16 describe it for me?

17 A Could you be more specific in your question regarding  
18 transport and methodology, please.

19 Q Well, how are you proposing to transport routing calls,  
20 over what kind of lines?

21 A Transport to the specific wireless carrier involved?

22 Q Sure.

23 A The transport -- I will have to refer that question to  
24 my cost consultant.

25 Q Okay. Your rebuttal testimony -- and I think the

1 Docket 04-046, which has Armour Independent,  
2 Bridgewater-Canistota Independent and Union Telephone  
3 Company you stated there was an obsolete switch but you  
4 stated that one of the switches was going to become  
5 obsolete or the switching mechanism used but you only  
6 referenced Armour, Bridgewater, and Canistota.

7 Is that switching issue also in existence for  
8 Union?

9 A That switching existence would also be in existence for  
10 Union Telephone Company, yes.

11 Q Now Golden West -- since you talked about Golden West  
12 first, I'll talk about Golden West first. Golden  
13 West -- or the Docket we refer to as the Golden West  
14 Docket is actually three different companies; correct?

15 A Correct.

16 Q And all of those companies are -- their exchanges in  
17 South Dakota are located west of the Missouri River; is  
18 that correct?

19 A No, that is not correct.

20 Q Is there some exchanges Vivian has across the River?

21 A Vivian Telephone Company has several exchanges in  
22 eastern South Dakota.

23 Q These exchanges, do you know how many square miles  
24 these three companies cover all together?

25 A Approximately 23,000 square miles in South Dakota.

1 rebuttal testimony in all three Dockets is virtually  
2 identical. Would you agree with me?

3 A I believe so.

4 Q That talks about how there was an investigation done on  
5 your different options. Besides the option being  
6 presented today by your cost expert on behalf of all  
7 three Dockets, has any of the companies reviewed a  
8 different way to transport routed traffic?

9 A No, we have not.

10 Q Do you know how many T-1s your cost consultant is  
11 recommending be installed for any of the companies?

12 A I do not know a specific number for any specific  
13 company, no.

14 Q Do you know where he's recommending T-1s be installed  
15 to and from?

16 A I do not.

17 Q I want to talk specifically about the Armour  
18 Independent, Bridgewater-Canistota, and Union filing.  
19 Do you have that in front of you, Exhibit 1, your  
20 direct?

21 A I do.

22 Q If you'll turn to that first page, my pages aren't  
23 numbered, but it's the first text page, it starts -- in  
24 your response to the second question that starts on  
25 line 6 you identify access lines and lifeline

1 customers. Do you see that?  
 2 A I do.  
 3 Q It just struck me that Union Telephone Company has  
 4 almost 1,600 access lines; correct?  
 5 A Correct.  
 6 Q And 38 lifeline customers. Do you see that?  
 7 A Yes.  
 8 Q And Armour with only 583 access lines has 33 lifeline  
 9 customers. Do you see that?  
 10 A Yes, I do.  
 11 Q You'd agree with me that the area that Union Telephone  
 12 Company covers is a higher income area?  
 13 A I have no knowledge of what the income difference would  
 14 be between Armour, Union, or Bridgewater-Canistota  
 15 service areas.  
 16 Q But you'd agree with me that the Union Telephone  
 17 Company has a far less number percentagewise of  
 18 lifelines?  
 19 A I would agree.  
 20 Q You're not representing to this Commission that all of  
 21 these companies -- meaning all the three Dockets you're  
 22 testifying in -- have the same demographic makeup are  
 23 you?  
 24 A No, I'm not.  
 25 Q You'd agree with me there's substantial differences

1 between the areas these companies serve?  
 2 A Specifically which substantial differences would you be  
 3 referring to?  
 4 Q Well, your areas closer to Sioux Falls we've already  
 5 talked about have a higher population per square mile;  
 6 correct?  
 7 A Certain segments of the company have different  
 8 densities, which would be the case whether it was  
 9 Golden West, Vivian, Sioux Valley. If you look at  
 10 individual exchanges or companies, the densities would  
 11 be different, yes.  
 12 Q And you're saying you don't have any information on  
 13 income on any of your companies' customers?  
 14 A Not on customers, no.  
 15 Q In this investigation you did on LNP that you've  
 16 represented was done in your prefiled testimony, did  
 17 you do any formal surveys of your clientele as to their  
 18 desire for LNP?  
 19 A We have not.  
 20 Q Let's talk about the Sioux Valley Docket specifically.  
 21 A Okay.  
 22 Q Does Sioux Valley have exchanges into Minnesota?  
 23 A Sioux Valley has access lines that are located within  
 24 Minnesota, but those access lines are served by a  
 25 switch which is located in South Dakota.

1 Q And I think we've already talked about the fact that  
 2 your rebuttal testimony in all of these Dockets is  
 3 virtually identical. I'm actually looking at the  
 4 Sioux Valley, but I'd like to ask you a question that  
 5 applies to all companies. I'm looking at your rebuttal  
 6 testimony of Sioux Valley. I've got page numbers on  
 7 that one. I thought that might be easier. Page 2.  
 8 A Okay.  
 9 Q The bottom of page 2, starting on line 22 you talk  
 10 about the routing methods reflected in the cost exhibit  
 11 attached to Sioux Valley's petition. And, again you'd  
 12 agree with me that -- well, let's back up. Is it your  
 13 understanding that -- I'm talking about your rebuttal.  
 14 A I am. Unfortunately, I pulled Armour's so I saw  
 15 Armour's and questioned what I had. One moment.  
 16 Q Sure. You've got a lot of prefiled testimony sitting  
 17 in front of you.  
 18 A Can I clarify, you were asking the bottom of page 2  
 19 beginning at line?  
 20 Q 22.  
 21 A I'm there. Thank you.  
 22 Q Do you see your answer there? And let me ask just a  
 23 question before we get into that. It's your  
 24 understanding that the cost methodology presented by  
 25 your cost experts is the same for all the companies

1 that you're testifying on behalf of here?  
 2 A It's my understanding that it is similar routing on a  
 3 per company basis, recognizing that each company may be  
 4 different in terms of direct connections or other  
 5 facilities already in place.  
 6 Q Okay. Yeah. You'd agree with me that there's  
 7 differences between every company that you're  
 8 testifying here?  
 9 A Yes, I would agree.  
 10 Q Now in your answer at the bottom then of page 2 using  
 11 your Sioux Valley answer it states that, "The routing  
 12 method reflected in the cost exhibit attached to  
 13 Sioux Valley's petitions are based on the current  
 14 routing arrangements that Sioux Valley has in place  
 15 with other carriers."  
 16 Okay. If that routing arrangement were  
 17 changed, you'd agree with me that you could look at a  
 18 different way of costing this service?  
 19 A Certainly there is a potential for other costing  
 20 mechanisms. We have not explored them.  
 21 Q On the next page -- and before I leave that testimony,  
 22 you'd agree with me that that testimony or that  
 23 statement's identical in every one of the rebuttal  
 24 testimonies except you just substitute the company  
 25 names; correct?

781

1 A I would agree.

2 Q And if I asked you the same questions on -- every

3 question in every Docket you're testifying on, you'd

4 respond the same?

5 A I agree.

6 Q At the top of page 3 then, same rebuttal testimony

7 talks -- the first question there talks about Western

8 Wireless's routing proposal having impacts to

9 Sioux Valley beyond LNP.

10 And you answer, "Yes. It is my understanding

11 that Western Wireless's proposal would increase

12 Sioux Valley's cost." Do you see that?

13 A Yes, I do.

14 Q But you understand under Western Wireless's proposal

15 the cost increase would be less than what's being

16 proposed by your own cost analyst?

17 A I understand there are differences in opinion as to

18 what the costs actually are.

19 Q But that's not my question. My question is you've

20 reviewed Ron Williams' testimony; correct?

21 A I'm familiar with Mr. Williams' testimony.

22 Q It says in your rebuttal -- you've reviewed it?

23 A I have.

24 Q You understand the costs projected by Mr. Williams on

25 transport are much lower than what's been projected by

782

1 your cost analyst; correct?

2 A I am aware of that.

3 Q So while it might increase your transport costs from

4 what they exist today, it would increase it less than

5 for you to use your cost analyst's proposal; correct?

6 A I believe Mr. Williams' analysis would bring that

7 about, yes.

8 Q Okay. And you've given the same answer in all three

9 rebuttals; correct?

10 A I would.

11 Q If I asked you the same question regarding the

12 testimony you've provided in all three rebuttals, you'd

13 respond the same; correct?

14 A Yes, I would.

15 Q Except for the cost information that you've provided --

16 or that your cost expert's going to be providing here

17 today, you're not providing any other cost information

18 on what LNP may -- or let me back up. You're not

19 providing any other -- let me start all over rather

20 than just back up.

21 You're not presenting any other potential

22 ways to provide for LNP besides what he's presenting

23 today.

24 A That is correct.

25 Q Going back specifically to the Armour -- and I

783

1 apologize for bouncing around a bit. My notes bounce

2 around a little bit too.

3 The Armour exchange is not contiguous with

4 the Bridgewater Union exchange; correct?

5 A That's correct.

6 Q Neither of those exchanges are contiguous with Union

7 County; correct?

8 A Union County -- can I clarify? Given my general lack

9 of geography knowledge sometimes, Union County I

10 believe is Sioux City and that territory. Is that

11 Union County?

12 Q I apologize. I meant Union Telephone Company.

13 A No, they are not. Bridgewater-Canistota is not

14 contiguous, no.

15 Q And Armour's not contiguous with Bridgewater-Canistota;

16 correct?

17 A Correct.

18 Q Armour's is not contiguous with Union Telephone?

19 A That is correct.

20 Q And Bridgewater-Canistota is not contiguous with Union

21 Telephone?

22 A I would have to clarify that. There may be a small

23 section where they touch. I cannot recall off the top

24 of my head.

25 Q Do they share lines at all?

784

1 A Can you be more specific in regards to lines?

2 Q Do you run traffic from Bridgewater-Canistota exchanges

3 into your Union Telephone exchanges?

4 A There are certain umbilical links for switching and

5 signaling services that connect the Bridgewater

6 exchange or Bridgewater and Canistota switches to the

7 Union switches. The same would also be true for

8 Armour. In terms of lines it's a signaling connection

9 between the switches.

10 Q Okay. So you're not actually running phone lines or

11 calls over those signaling connections?

12 A Not over the signaling connections, no. However, the

13 Hartford switch -- each of the switches are able to

14 stand alone on their own basis, but there are certain

15 items that require them to go to processing for host

16 switching type scenarios, and the Union switching

17 located in Hartford provides that capability.

18 Q You understand that federal law provides for the

19 ability for all three of these companies to recover

20 their investment in LNP through an end-user surcharge;

21 correct?

22 A I am aware of that.

23 Q Okay. And if this Commission required you to

24 install -- your company to install LNP, you guys could

25 pay for that; correct?

785

1 A In terms of the ability to write a check for it or --

2 Q You could finance it or --

3 A Yes.

4 MR. WIECZOREK: That's all I have.

5 Thank you.

6 MR. SMITH: Brett, are you --

7 MR. KOENECKE: I'm in the

8 Sioux Valley.

9 CROSS-EXAMINATION

10 BY MR. KOENECKE:

11 Q Good morning, Dennis. I'm Brett Koenecke, a lawyer

12 from Pierre representing Midcontinent. I've just got a

13 few questions, and they're relative to the Sioux Valley

14 Telephone Docket.

15 I've been reviewing the filings made in this

16 matter, and I think I understand that Sioux Valley

17 objects only to providing local number portability for

18 wireline to wireless modality. Am I correct in that?

19 A I don't know if that's an accurate statement to say we

20 object. Our filing is for a waiver of local number

21 portability requirements. I would have to review our

22 filing again to see if we make specific note of

23 wireless and wireline. I don't recall. I can look if

24 you would like, but I believe we are requesting a full

25 suspension of local number portability requirements.

786

1 Q Thank you. You'd agree with me that the only specific

2 references in your testimony refer to wireline to

3 wireless portability?

4 A Are you referring to my direct prefiled testimony?

5 Q I am.

6 A I do make a reference in my direct prefiled testimony

7 on the second to the last page that asks, "Since the

8 passage of the Telecom Act have any wireline carriers

9 ever requested from LNP from your company," and my

10 response was no.

11 Q That's correct. Thank you. Are you familiar with the

12 exhibits to Sioux Valley's responses to Western

13 Wireless's second set of discovery requests?

14 A To clarify, in responses of Petitioner Western

15 Wireless's second set of discovery requests, correct,

16 TCO4-044?

17 Q Right.

18 A Yes, I am.

19 Q Have you got them in front of you?

20 A Yes, I do.

21 Q Looking at Exhibit 1, can you explain to me what that

22 is, please.

23 A Exhibit 1 is -- the first page is correspondence

24 between myself and our consultant which contained an

25 attachment -- it was an e-mail which contains an

787

1 attachment which was a quote from Sioux Valley

2 Telephone Company's switching vendor for the different

3 software requirements necessary, the cost of the

4 software requirements for LNP capability.

5 Q Sioux Valley would require that software in order to

6 offer local number portability?

7 A That is correct.

8 Q To either intra or intermodal LNP?

9 A That is correct.

10 Q Sioux Valley has no ability to offer LNP to wireline

11 modalities right now; is that correct?

12 A That is correct.

13 MR. KOENECKE: Thank you. I have

14 nothing further.

15 MR. SMITH: Ms. Wiest.

16 MS. AILTS WIEST: Thank you.

17 CROSS-EXAMINATION

18 BY MS. AILTS WIEST:

19 Q Could we start with 045, Golden West?

20 A Sure.

21 Q Could you tell me just your ranges of local rates for

22 that?

23 A Yes, I can. One moment, please. Would you like them

24 by company or just overall?

25 Q Just give me the ranges by company.

788

1 A For Golden West Telecommunications Cooperative a

2 residential rate is \$10.95 per month. Can I also

3 clarify are you looking for business rates as well or

4 just residential?

5 Q Both.

6 A Business rates would be 21.95 per month. For Vivian

7 Telephone Company an average rate would be

8 approximately \$12.50 a month for a residential rate and

9 \$26 a month for a business rate. And for Kadoka

10 Telephone Company the residential rate would be \$9.65 a

11 month, and the business rate, \$16.70 per month.

12 And I would like to clarify that all of

13 those rates listed do not include any subscriber line

14 charge taxes, anything. Those are the basic dial tone

15 rates.

16 Q Thank you. And I believe you said, is this correct,

17 you have 30 wireless carriers authorized to serve your

18 area?

19 A To the best of our knowledge there are approximately

20 30 wireless carriers authorized or able to provide

21 service. We were not able to verify specifically which

22 carriers are offering in which areas.

23 Q And so you don't know which carriers are currently

24 serving any of your areas?

25 A We know of some, but I would not feel comfortable

789

1 saying it's an all inclusive list. Certainly we are  
 2 aware of several, yes.  
 3 **Q** Could you go to page 3, line 4?  
 4 **A** Would that be of the direct prefilled testimony?  
 5 **Q** Yes. I'm sorry. Your direct.  
 6 **A** Yes.  
 7 **Q** You state to the question, "Does your company have any  
 8 direct points of interconnection with wireless and/or  
 9 provide blocks," you say, "Yes."  
 10 Could you elaborate? Do you know how many  
 11 you have?  
 12 **A** I can give you an approximation. In one of my reply  
 13 testimonies we list some of the direct connections.  
 14 One moment, please. In terms of direct connections to  
 15 the best of our knowledge at this time Golden West has  
 16 direct -- Golden West Telecommunications Cooperative,  
 17 excuse me, has direct connections with Verizon  
 18 Wireless --  
 19 **Q** How many --  
 20 **A** -- in the Hot Springs exchange.  
 21 **Q** And how many? Just one? That one?  
 22 **A** Yes. That one in the Hot Springs exchange and that  
 23 would be with Verizon Wireless. Would you like me to  
 24 name by carriers or simply where the cities are  
 25 located?

790

1 **Q** Both.  
 2 **A** Golden West Telecommunications Cooperative also has a  
 3 direct connection with Verizon Wireless in Wall,  
 4 South Dakota. And then in the Martin exchange there is  
 5 a direct connection with Western Wireless.  
 6 **Q** Okay. And that's it?  
 7 **A** To the best of my knowledge.  
 8 **Q** And then -- I'm sorry.  
 9 **A** I'm sorry. There are also connections with Vivian as  
 10 well as Kadoka. Would you like me to go through those?  
 11 **Q** Right.  
 12 **A** For Vivian Telephone Company there are direct  
 13 connections and I'll list the exchanges and these first  
 14 four are all with Verizon. Custer, Murdo, Gregory, and  
 15 Winner. And then in the -- I'm sorry. Still in Vivian  
 16 Telephone Company with Western Wireless there are  
 17 direct connects in Custer and Winner.  
 18 And, finally, for Kadoka Telephone Company  
 19 there is a direct connection with Verizon Wireless.  
 20 **Q** And you don't provide any blocks --  
 21 **A** There is some thousands blocks being provided in  
 22 certain exchanges. I know in one of my documents I  
 23 have a list of which exchanges they are if you'd like,  
 24 I could list to you, but there are at least one  
 25 scenario where there is a type 1 connection.

791

1 **Q** Okay.  
 2 **A** I believe there may be more than one, but off the top  
 3 of my head I know of at least one.  
 4 **Q** Okay. Thank you. And if you could just go to your  
 5 rebuttal.  
 6 **A** Yes.  
 7 **Q** I believe on page 2, line 11 where you state that the  
 8 Interconnection Agreement you're not required to -- did  
 9 not agree to route traffic destined for Western  
 10 Wireless to the serving tandem. Is there any reason  
 11 why you couldn't do that?  
 12 **A** In reference to --  
 13 **Q** The Qwest tandem.  
 14 **A** But in reference to local number portability, or in  
 15 reference to the Interconnection Agreement that we  
 16 currently have in place?  
 17 **Q** In reference to local number portability.  
 18 **A** That we could not route it to the Qwest tandem?  
 19 **Q** Right.  
 20 **A** From a cost perspective I'm not sure that would be a  
 21 very cost-effective way to do that. In addition,  
 22 currently all trunks that we have with Qwest are  
 23 one-way.  
 24 **Q** How about from a technical? Could it be done?  
 25 **A** Leaving cost out as a factor, yes, technically we could

792

1 connect to a Qwest tandem.  
 2 **Q** Thank you. And did your company file separate cost  
 3 studies as required by the Commission at its  
 4 April 6, 2004 --  
 5 **A** File separate cost studies in terms --  
 6 **Q** For these companies.  
 7 **A** In terms of local number portability?  
 8 **Q** For these three companies.  
 9 **A** I believe we provided separate data for each company in  
 10 response to staff questions.  
 11 **Q** It wasn't provided in the Docket, though; correct? It  
 12 was Answers to Interrogatories from Western Wireless?  
 13 **A** I believe that is correct that we provided individual  
 14 company sheets that listed the cost data. I may have  
 15 been incorrect in terms of who we responded with that  
 16 data, but yes.  
 17 **Q** So there's nothing in the record with respect to the  
 18 separate costs; correct?  
 19 **A** Not to my knowledge.  
 20 **Q** And why were the companies consolidated for LNP cost  
 21 purposes? Could you explain the economies of scale  
 22 that you believe are involved?  
 23 **A** Sure. The companies are grouped together in a variety  
 24 of methods, both involving switching technologies and  
 25 platforms. For example, in the Golden West Vivian

1 Kadoka environment all of those companies use Nortel  
2 DMS switches.

3 Another reason those were grouped together  
4 was from a -- outside of the common platform, the  
5 geographic scope, the customer service areas, all of  
6 those reasons, but primarily from a switching platform  
7 they were lumped together. And in addition it actually  
8 drove our costs to provide LNP down probably. From a  
9 cost perspective in the software that we purchased from  
10 our vendor they allowed us to lump those companies  
11 together for the purchase at one time. That would be  
12 for Golden West Vivian and Kadoka.

13 In terms of Union, Armour,  
14 Bridgewater-Canistota, it's somewhat similar. Those  
15 three companies use the same switching platform, which  
16 is the Mytel switches, which has some separate issues  
17 all of their own. But it uses the Mytel switches. At  
18 the same time, customer service, currently all of the  
19 customer service for the Union, Armour, and  
20 Bridgewater-Canistota operating companies all occur out  
21 of the Hartford office. So it just made sense to  
22 consolidate all of those together.

23 Probably finally in terms of Union, Armour,  
24 and Bridgewater-Canistota hypothetically one domino  
25 tips it over, which is if the Commission were to

1 certain carriers that do not serve on that list that do  
2 not serve all of Sioux Valley's territory.

3 **Q** But they all provide some service in some area?

4 **A** Depending upon which location you're in, in Sioux  
5 Valley you may be able to receive one or more of the  
6 five.

7 **Q** Okay. Thank you. And then let's just go to Armour,  
8 Bridgewater-Canistota, Union. And if you could, just  
9 tell me your local rate for that, those companies.

10 **A** I'll start with Armour. For Armour the residential  
11 rate is \$9 per month, the business rate is \$14 per  
12 month. For Bridgewater-Canistota, the residential rate  
13 is \$12 per month, and the business rate is \$26.60 per  
14 month. And for Union Telephone Company the residential  
15 rate is \$12.40 a month, and the business rate is \$16.50  
16 a month.

17 And, again, I would clarify those do not  
18 include any additional charges. That is simply the  
19 dial tone cost.

20 **Q** Similarly on page 2 of your direct testimony you list  
21 five wireless carriers. Those are carriers currently  
22 serving your area but not necessarily all areas?

23 **A** That would be correct.

24 **Q** And then I just had a couple of questions on your -- if  
25 you could explain further the situation with the Mytel

1 hypothetically order Armour Independent Telephone  
2 Company to implement local number portability, it would  
3 require all three of those companies due to their  
4 switching architecture today to purchase the hardware  
5 and software necessary to provide LNP, even if  
6 hypothetically Union and Bridgewater-Canistota were not  
7 ordered to provide it.

8 **Q** Okay. Thank you. Can we go on to Sioux Valley,  
9 please. And, again, could you give me your current  
10 local rate for that?

11 **A** Average rate spread amongst the exchanges for  
12 Sioux Valley Telephone Company, the residential line is  
13 approximately \$16.50, and a business line average rate  
14 could be approximately \$21.

15 **Q** Thank you. Could you please go to page 2 of your  
16 direct testimony. There aren't any numbers on the  
17 lines or the pages, I guess. When you state what is  
18 the number of wireless carriers providing service --  
19 and you list five carriers; is that correct?

20 **A** Correct.

21 **Q** Is it your understanding that all five carriers are  
22 currently providing service throughout the Sioux Valley  
23 area?

24 **A** No. It's my understanding that all five of those  
25 carriers serve portions or perhaps all, but there are

1 switch, I believe the testimony is that it will be --  
2 support for the switch will be discontinued by 2007.  
3 And so what will you have to do at that time or prior  
4 to that time?

5 **A** Either at that time or prior to that point in time we  
6 will have to make a decision as to the future of that  
7 switching platform.

8 **Q** Uh-huh.

9 **A** Historically we cut telephone companies, certainly  
10 local telephone companies in this area -- if a vendor  
11 says they are no longer going to support a product for  
12 something as important in our network as our switches,  
13 typically we do not remain with that product and are  
14 forced to seek alternatives or different solutions.

15 I anticipate that prior to the support  
16 expiring for the Mytel switches that we will have come  
17 up with a different switching solution. There are  
18 several solutions available for that, whether it's  
19 complete replacement of those switches or a shift of  
20 where those lines come from. I mean, we'll look at  
21 every opportunity or a different way to look at it.

22 But in our minds the life cycle on those  
23 switches probably at this point with the knowledge we  
24 have from the manufacturer will probably sunset  
25 December 31, 2007.

1 MS. ALTS WIEST: Thank you. That's  
 2 all I have.  
 3 MR. SMITH: Do the Commissioners  
 4 have any?  
 5 COMMISSIONER BURG: I don't have  
 6 any.  
 7 VICE CHAIR HANSON: No.  
 8 CHAIRMAN SAHR: I have a couple.  
 9 Good morning, Mr. Law.  
 10 THE WITNESS: Good morning.  
 11 CHAIRMAN SAHR: Yesterday  
 12 Mr. Williams talked a little bit about his thoughts  
 13 on the question of cost-causers and perhaps maybe  
 14 more of a policy discussion of who should and  
 15 shouldn't be bearing costs and kind of what the  
 16 impact is on providers.  
 17 Were you here for that conversation?  
 18 THE WITNESS: Yes. I was here.  
 19 CHAIRMAN SAHR: Do you have any  
 20 comments on that?  
 21 THE WITNESS: Only that it's a  
 22 unique way to come up with a variety of  
 23 different -- trying to apply costs. And in my own  
 24 mind I have often wondered if instead of dividing  
 25 the cost of local number portability divided by the

1 total number in our case of the access lines in our  
 2 serving area, if you actually divided by the number  
 3 of potential ports you thought you were going to  
 4 have, regardless of whether they were part of  
 5 Mr. Williams' testimony or whether they were  
 6 developed by the local telephone companies, you'd  
 7 certainly come up with an interesting number.  
 8 If it was a couple hundred thousand dollars to  
 9 implement local number portability and there were  
 10 400 ports, it certainly puts a different  
 11 perspective on a cost per port basis.  
 12 CHAIRMAN SAHR: Thank you. And have  
 13 you ever done any -- do you know if any of the  
 14 providers that you're familiar with have done any  
 15 sort of cost studies on the impact of additional  
 16 charges on consumer bills? And I guess what I'm  
 17 getting at is, you know, at what point on the bill  
 18 does it become unduly burdensome?  
 19 I'll even let you just generally comment on  
 20 that, and if you know any particulars on any  
 21 studies or surveys, I'd appreciate that.  
 22 THE WITNESS: I have no formal  
 23 studies or surveys that I could point to that -- I  
 24 could only offer an opinion as to unduly burdensome  
 25 as everyone knows is a very gray area. Speaking

1 from experience, and I'm confident the Commission  
 2 hears the same things, whenever there is any  
 3 movement in a customer's bill it causes some type  
 4 of response.  
 5 Typically if the movement is upward or  
 6 increased, it causes a greater response than if it  
 7 is a decrease, unfortunately. But any movement,  
 8 whether it is cents, dollars, or any other metric  
 9 typically causes a reaction to phone customers.  
 10 CHAIRMAN SAHR: And then my final  
 11 question or questions, I'd like to ask about  
 12 interim number portability. And this is something  
 13 we heard a little bit of testimony on on Monday  
 14 where there is the ability in an intramodal setting  
 15 to basically do what I would term, perhaps  
 16 inaccurately, call-forwarding.  
 17 THE WITNESS: I'm aware of that.  
 18 CHAIRMAN SAHR: Are you familiar  
 19 with that?  
 20 THE WITNESS: I'm aware of it. I'm  
 21 not familiar with it from the perspective of none  
 22 of the Golden West Companies currently are involved  
 23 in that type of application in porting of any  
 24 numbers to a competitive provider.  
 25 CHAIRMAN SAHR: And I believe it was

1 Mr. Simmons from Midcontinent had testified that  
 2 that would be a low cost or virtually no cost  
 3 alternative on a wireline to wireline porting  
 4 basis.  
 5 Do you have any comments about that?  
 6 MS. POLLMAN ROGERS: Excuse me.  
 7 Perhaps clarify for the benefit of this witness, I  
 8 believe that was in the other Docket that that  
 9 testimony was presented, not in the LNP Docket but  
 10 the first Docket, and I don't know that this  
 11 witness is aware of that.  
 12 CHAIRMAN SAHR: Well, he can say I  
 13 don't know anything about wireline to wireline  
 14 porting, and that's fine, and that will get him off  
 15 the stand. But the question I have is it's kind of  
 16 a follow-up to Mr. Koenecke's earlier question is  
 17 I'm just curious because we heard on Monday that  
 18 this is an option and apparently a fairly low-cost  
 19 option to do wireline to wireline porting, and I'm  
 20 just curious to see if that is an available option.  
 21 And if he doesn't know I'm -- and I should  
 22 also say that he may not have had -- I realize he  
 23 may not have had a chance to review the testimony,  
 24 but at the same time it does seem like it might be  
 25 an apples to apples type question as long as he has

1 some knowledge base for it.  
 2 THE WITNESS: I don't have  
 3 sufficient knowledge base, Commissioner, to give a  
 4 response to that question.

5 CHAIRMAN SAHR: And what they had  
 6 talked about there is -- and this may help, and if  
 7 it doesn't, then I will move on. But what they had  
 8 talked about is that interim number portability is  
 9 most commonly provisioned using the remote  
 10 call-forwarding method, RCF, which requires the  
 11 customer's directory number to be retained in the  
 12 original provider's switch and a second shadow  
 13 number to be assigned in the requester's switch.

14 Does that help at all?

15 THE WITNESS: It does help some. My  
 16 concern with that is from a switching perspective  
 17 please recognize I will preface my testimony by  
 18 saying my title is general manager, not system  
 19 engineer, switching technician, or any other from  
 20 that perspective, but I will tell you my concern of  
 21 that from a switching perspective is the use of  
 22 ports on our network.

23 I'll say ours. It could be any of the  
 24 companies I'm representing today. In a  
 25 call-forwarding basis there's a question on that as

1 curious to see, it does appear to be labeled as an  
 2 interim solution in its title itself so I  
 3 appreciate your characterizations and help on that  
 4 issue. Thank you.

5 MR. SMITH: Mr. Law, I have a couple  
 6 of questions. Do any of these companies have any  
 7 extended area of service relationships in the  
 8 Sioux Falls or Rapid City areas?

9 THE WITNESS: Specifically to those  
 10 exchanges, the Sioux Falls and the Rapid City  
 11 exchange, I am not aware in Golden West. I do not  
 12 believe there is EAS from the Golden West -- any of  
 13 the Golden West exchanges with the perhaps possible  
 14 exception of New Underwood. And I could check that  
 15 if you'd like, but that would be the only Golden  
 16 West exchange that could potentially have EAS.

17 In the case of Sioux Falls it is somewhat of a  
 18 different application. In the Union Telephone  
 19 Company environment there is an EAS agreement  
 20 between Union Telephone Company for the Hartford  
 21 and the Wall Lake exchanges with Qwest. And I'd  
 22 like to emphasize that the agreement is with Qwest  
 23 for EAS to the Sioux Falls exchange. So that is  
 24 one.

25 In the Sioux Valley Telephone Company

1 to how that would scale from a growth perspective.  
 2 And my concern is this, and that is say you port  
 3 428-5000, pick a Dell Rapids, South Dakota number.  
 4 Once that number is ported to me -- once that  
 5 number is ported, if all I am doing is remote  
 6 call-forwarding that number to a different  
 7 provider, every time anyone outside of my  
 8 network -- it could be somebody in Omaha calling  
 9 428-5000.

10 What they will first do is that number will  
 11 get pointed to me, in essence, and then I would end  
 12 up ultimately forwarding that call to the required  
 13 LNP provider -- I'm sorry. The intramodal provider  
 14 in my system, tying up switch ports, things along  
 15 that line.

16 What type of impact that has, I cannot address  
 17 that from a cost perspective. It strikes me as a  
 18 possibility for what I would term to be a band-aid  
 19 solution. I don't mean any disrespect by that, but  
 20 a band-aid solution. But it would require further  
 21 study.

22 CHAIRMAN SAHR: Thank you. I  
 23 appreciate the comments and working with me through  
 24 that issue. And I may see if your cost consultant  
 25 has any thoughts on that as well. Because I'm

1 environment three communities are able to call  
 2 the -- to call Qwest. That would be Colton,  
 3 Dell Rapids, and Valley Springs. And in each of  
 4 those arrangements Sioux Valley Telephone Company  
 5 has an EAS agreement with Qwest.

6 MR. SMITH: Thank you. Ms. Rogers.

7 REDIRECT EXAMINATION

8 BY MS. POLLMAN ROGERS:

9 Q Just a couple of things on redirect. There were some  
 10 questions I think that you were asked about substantial  
 11 differences between the companies with regard to I  
 12 think the question maybe had to do with density or  
 13 density per line and things like that.

14 All of the companies on behalf of whom you're  
 15 testifying today are classified as rural under the  
 16 '96 Act, aren't they?

17 A Correct.

18 Q You were asked about some of your testimony concerning  
 19 the cost. Deployment of LNP would increase the cost to  
 20 all of your companies?

21 A That is correct.

22 Q And, in fact, with regard to those companies as it  
 23 relates to the implementing of Western Wireless's  
 24 transport routing proposal, you're aware of what I'm  
 25 talking about there?

1 A I'm familiar.  
 2 Q And specifically in relation to that, why would you say  
 3 that that increases your company's costs?  
 4 A Is your question how does Western Wireless's proposal  
 5 for LNP increase any respective company's cost?  
 6 Q Yes.  
 7 A In comparison to the costs that we have identified in  
 8 local number portability?  
 9 Q Well, I'm referring to the discussion regarding the  
 10 cost to your companies as it relates to implementing  
 11 the Western Wireless transport routing proposal. Even  
 12 under their proposal it would increase your company's  
 13 cost --  
 14 A All costs would increase. Western Wireless's cost  
 15 differs. Specifically in respect to the transport  
 16 there are some large differences between what the cost  
 17 may be of the transport, while a large item is not the  
 18 only item that would increase our cost.  
 19 Q And, in fact, under Western Wireless's proposal they  
 20 would have your companies assuming a greater  
 21 responsibility for the transport; isn't that --  
 22 MR. WIECZOREK: I'd object as  
 23 leading.  
 24 MR. SMITH: Overruled.  
 25 A That is correct.

1 Q I believe one of the Commissioners asked you about --  
 2 or someone in this discussion asked you about the  
 3 demand for local number portability. What has been  
 4 your experience with regard to demand by your customers  
 5 for LNP?  
 6 A I have received no requests from any customers from the  
 7 affected companies for local number portability.  
 8 Q And there was also some discussion -- I think you were  
 9 present when Western Wireless's expert witness  
 10 discussed the possibility of, just as an example, a \$2  
 11 LNP suspension threshold. Do you remember that  
 12 discussion?  
 13 A I do.  
 14 Q As a percentage, even \$2 could be a substantial  
 15 increase at least for some of your local rates.  
 16 Wouldn't that be true?  
 17 A I think as a percentage it's a substantial increase for  
 18 any of our local rates.  
 19 Q Okay.  
 20 MS. POLLMAN ROGERS: That's all.  
 21 Thank you.  
 22 MR. SMITH: Mr. Coit.  
 23 MR. COIT: No questions.  
 24 MR. SMITH: Mr. Wieczorek.  
 25 MR. WIECZOREK: A couple follow-up

1 questions.  
 2 RECROSS-EXAMINATION  
 3 BY MR. WIECZOREK:  
 4 Q Ms. Rogers asked you about the transport costs under  
 5 Western Wireless's plan. You understand the transport  
 6 costs as reflected under Western Wireless's proposal  
 7 are less than the transport costs as projected by your  
 8 own cost analysis under his proposal; correct?  
 9 A I am aware that the number that Western Wireless has  
 10 reflected is a lower number, but how they came about  
 11 those costs, I cannot testify to that.  
 12 Q So to the extent you just answered your question saying  
 13 it's going to increase your transport costs, you don't  
 14 even know that.  
 15 A Western Wireless has reflected a significantly lower  
 16 number for transport than reflected in many, if not  
 17 all. I can't clarify for all of the filed companies.  
 18 But based on the responses I heard in testimony  
 19 yesterday from Mr. Williams, it's my understanding that  
 20 the telephone -- local exchange carrier telephone  
 21 companies would be required to carry more of the burden  
 22 back to what I will term to be the Qwest tandem.  
 23 Q Right. But you wouldn't have to spend the transport  
 24 costs that your cost analyst has projected. You  
 25 understand that, don't you?

1 A I think that is a point of debate.  
 2 Q Going back to the Armour Bridgewater Union companies,  
 3 you talk about the Mytel switch.  
 4 A Yes.  
 5 Q Considering that you believe the switch is going to  
 6 have no service in 2007, when are you looking at  
 7 upgrading those switches?  
 8 A Sometime prior to -- upgrading perhaps by means  
 9 of replacement would occur sometime prior to  
 10 December 31, 2007.  
 11 Q Okay. When integrating that upgrade would providing  
 12 LNP be a good use of your money?  
 13 A Could you repeat that question, please.  
 14 Q Well, you could upgrade that switch and buy the whole  
 15 software package. Wouldn't that be a good use of your  
 16 money, buy it all at one time?  
 17 A I anticipate whatever switching platform we choose to  
 18 provide it will have a number of features and sets to  
 19 it, of which local number portability may be one of  
 20 them.  
 21 Q You talked about the advantages of scale, but do you  
 22 understand that your cost expert has not scaled your  
 23 management costs across all the companies you're  
 24 testifying for?  
 25 A I can't address his specific cost on that item, no.

1 Q Well, you have a job -- you have job positions with all  
 2 of these companies you're testifying for at some level?  
 3 A That is correct.  
 4 Q Well, if you're an employee, essentially, of all of  
 5 these different companies on some level, why wouldn't  
 6 you scale those internal business procedure charges  
 7 across all of your companies and not just these  
 8 pockets?  
 9 A Because part of the reason that we clustered the  
 10 responses or the questions -- why we clustered the  
 11 Dockets together for several of the operating companies  
 12 is that each of the operating companies has unique  
 13 environments, as I discussed earlier, whether it be  
 14 Union, Armour, Bridgewater, or Golden West Vivian and  
 15 Kadoka. Consequently many of those items are not  
 16 shareable across all common boundary lines and be would  
 17 applied to specific companies.  
 18 Q But your management shares across all boundaries;  
 19 right?  
 20 A Assuming I did not have to spend any additional hours  
 21 trying to work on different options for respective  
 22 companies, that would be true.  
 23 Q Right. But when you get trained as a manager to  
 24 implement LNP for Armour you don't have to be retrained  
 25 for Sioux Valley, do you?

1 A Depending on the application and how that environment  
 2 works, potentially, but not in all cases.  
 3 Q Have you looked into that at all?  
 4 A Have I looked into what?  
 5 Q Whether you would need to be trained separately for  
 6 every company.  
 7 A Depending --  
 8 Q Have you looked into that?  
 9 A No, we have not.  
 10 Q You said something to the effect of there's been no  
 11 demand but did you know that your own cost expert has  
 12 estimated 1,200 ports in the first five years for  
 13 Golden West?  
 14 A I'm familiar with that number.  
 15 Q And has estimated 10 percent of your lines out of  
 16 Golden -- out of the Armour Bridgewater port in the  
 17 first five years.  
 18 A I was not aware that was the specific number, but if  
 19 that's what he used, the consultants used, that's fine.  
 20 Q Okay. And you also projected 10 percent ports in the  
 21 first five years of your lines out of Sioux Valley.  
 22 A I wasn't aware of the specific number, but I wouldn't  
 23 dispute that.  
 24 Q And then there's a question about cost-causer issues.  
 25 A Yes.

1 Q You know that the people that are Qwest customers have  
 2 paid their costs for LNP even if they haven't  
 3 transported; correct?  
 4 MS. POLLMAN ROGERS: I'm going to  
 5 object to this as being beyond the scope of  
 6 redirect.  
 7 MR. SMITH: Overruled.  
 8 A Could you repeat your question, please.  
 9 Q Sure. You understand that all Qwest customers have  
 10 been paying for LNP costs already?  
 11 A I'm aware there was an LNP charge on Qwest bills, but I  
 12 don't receive a Qwest bill so I don't know specifically  
 13 but I'm aware there was a charge.  
 14 Q From listening to Mr. Williams yesterday you understand  
 15 that cell phone users are paying for LNP surcharges.  
 16 A I am aware of that.  
 17 MR. WIECZOREK: That's all I have.  
 18 MR. SMITH: Are there any further  
 19 questions?  
 20 MR. KOENECKE: No.  
 21 MS. AILTS WIEST: No.  
 22 MS. POLLMAN ROGERS: I have just one  
 23 clarifying question. I think we can take care of  
 24 the concern -- or the questions concerning  
 25 transport.

1 REDIRECT EXAMINATION  
 2 BY MS. POLLMAN ROGERS:  
 3 Q My question to you is, Denny, if your company's  
 4 responsibilities for transport costs -- if ordered to  
 5 implement LNP -- increase, that would increase your  
 6 company's costs; correct?  
 7 A Yes.  
 8 MS. POLLMAN ROGERS: That's all.  
 9 Thank you.  
 10 MR. WIECZOREK: Nothing further.  
 11 MR. SMITH: You're excused, Mr. Law.  
 12 Call your next witness.  
 13 (Discussion off the record)  
 14 MR. SMITH: Ms. Rogers, you may call  
 15 your next witness.  
 16 MS. POLLMAN ROGERS: Thank you. In  
 17 the matter of Alliance Cooperative, Inc. and  
 18 Splitrock Properties, Inc., which is TC04-045, we  
 19 would call Don Snyders to the stand.  
 20 (Exhibits Alliance 1 through 3 are marked for identification)  
 21 DON SNYDERS,  
 22 called as a witness, being first duly sworn in the  
 23 above cause, testified under oath as follows:  
 24  
 25

DIRECT EXAMINATION

BY MS. POLLMAN ROGERS:

1 Q Good morning.  
 2 A Good morning.  
 3 Q Would you please state your name and address for the  
 4 record.  
 5 A My name is Don Snyders. My business address is  
 6 612 Third Street, Garretson, South Dakota.  
 7 Q What is your occupation?  
 8 A I'm the general manager of Alliance Communications and  
 9 Splitrock Properties.  
 10 Q You are the Petitioner in this Docket on behalf of your  
 11 companies; is that correct?  
 12 A That's correct.  
 13 Q And in the course of this Docket did you file prefiled  
 14 testimony, both direct and rebuttal?  
 15 A Yes, I did.  
 16 Q I would ask you to look at Alliance Exhibits 1 and 2.  
 17 Is that the prefiled testimony you filed in this  
 18 Docket?  
 19 A Yes, it is.  
 20 Q Do you have any additions or corrections to the  
 21 testimony?  
 22 A No, I do not.  
 23 Q If I asked you the questions in the Exhibits 1 and 2

1 Q Brandon. Okay. Which of the two companies is that the  
 2 host switch for?  
 3 A That's the host switch -- actually it's a networking  
 4 for Splitrock Properties and Alliance so the remotes --  
 5 or the satellite offices of the two exchanges and  
 6 properties actually network with the host switch in  
 7 Brandon.  
 8 Q Okay. And then do you have a host switch in Crooks  
 9 too?  
 10 A Actually we have the host switch is in Brandon and in  
 11 Baltic. The tandem switches, if you're referring to  
 12 that, are in Crooks and Garretson.  
 13 Q When you say tandem switch, could you describe which --  
 14 is that your -- describe what you mean when you say  
 15 tandem switch.  
 16 A The tandem switch -- the host switch is a satellite  
 17 host remote situation. The tandem switch is where you  
 18 actually have the traffic going to that exchange.  
 19 Q Okay. Do you have any cell companies that connect into  
 20 that tandem switch?  
 21 A No, we do not.  
 22 Q There's been a cost expert's testimony prefiled that  
 23 hasn't been admitted yet. Do you understand or can you  
 24 explain how your cost expert came up with his numbers  
 25 for Alliance and Splitrock?

1 today, would your answers be the same?  
 2 A Yes, they would.  
 3 Q Would you please provide a brief summary of your  
 4 prefiled testimony?  
 5 A As far as my testimony, we feel that because of the low  
 6 customer demand and high cost of LNP we are not  
 7 interested at this time in implementing LNP.  
 8 MS. POLLMAN ROGERS: I would offer  
 9 Alliance Exhibits 1 and 2.  
 10 MR. WIECZOREK: No objections.  
 11 MR. COIT: No objections.  
 12 MS. AILTS WIEST: No objection.  
 13 MR. KOENECKE: No objection.  
 14 MR. SMITH: Alliance Exhibits 1 and  
 15 2 are admitted.  
 16 MS. POLLMAN ROGERS: Tender the  
 17 witness for cross-examination.  
 18 MR. COIT: No questions.  
 19 MR. SMITH: Mr. Wieczorek.  
 20 MR. WIECZOREK: Thank you.

CROSS-EXAMINATION

BY MR. WIECZOREK:

21 Q Mr. Snyders, do you have a host switch then in  
 22 Garretson?  
 23 A Our host switch is in Brandon.

1 A I would defer all the costs to Mr. Bullock.  
 2 Q Your testimony talks about how you guys investigated  
 3 LNP.  
 4 A True.  
 5 Q Meaning Alliance and Splitrock. Did you do an analysis  
 6 of any other routing proposals besides the one that's  
 7 going to be presented here by Mr. Bullock?  
 8 A No, we did not.  
 9 Q You did no cost studies on any other routing?  
 10 A No.  
 11 Q And you understand there are other routing options?  
 12 A Yes, I do.  
 13 Q And you're not presenting any demographic information  
 14 based on the customer base of either of your companies  
 15 today, are you?  
 16 A No, we're not.  
 17 Q And you have not done independently or internally an  
 18 actual scientific survey of LNP demand for either of  
 19 your companies, have you?  
 20 A We have not done a survey.  
 21 Q You understand that federal law allows you the ability  
 22 to capture or to be reimbursed through an end-user fee  
 23 your costs associated with an LNP?  
 24 A Yes, I do.  
 25 Q Would you turn to your rebuttal testimony, please.

1 Page 3, the top of page 3, please. You'll see there  
 2 where you state, "The routing methods reflected in the  
 3 cost exhibit attached to Alliance's petition are based  
 4 on the current routing arrangements that Alliance has  
 5 in place with other carriers."  
 6 You would agree with me -- or do I understand  
 7 that statement to mean that you only looked at routing  
 8 methods that were available based on current  
 9 contractual relations?  
 10 A Again, you know, I would defer that to our cost  
 11 consultant. I believe the only routing situations that  
 12 he looked at was current routing that we have today.  
 13 Q You receive traffic from CMRS carriers through Qwest;  
 14 is that correct?  
 15 A That's correct.  
 16 Q And is that a two-way or one-way?  
 17 A That's one-way.  
 18 Q Did it used to be a two-way before SDN?  
 19 A Boy, pre-SDN, that's a while back. To be honest with  
 20 you, I don't remember.  
 21 Q Okay. Do you know of any -- do you know how long it  
 22 would take to convert that to a two-way?  
 23 A I do not.  
 24 Q Defer that to your cost expert?  
 25 A I've got to believe it would take some time to do that.

1 A Under the current information that would be accurate.  
 2 Q Okay. You're not -- Western Wireless would be less.  
 3 A With the data that was submitted by Western Wireless,  
 4 that would be true.  
 5 Q And you don't have any information to challenge that  
 6 data, do you?  
 7 A No, I do not.  
 8 MR. WIECZOREK: That's all I have.  
 9 MR. SMITH: Mr. Koenecke.  
 10 CROSS-EXAMINATION  
 11 BY MR. KOENECKE:  
 12 Q Good morning. Brett Koenecke. Do I understand that  
 13 Alliance and Splitrock are unable to provide local  
 14 number portability?  
 15 A That would be correct.  
 16 Q At this point to either wireless or wireline?  
 17 A That would be true.  
 18 MR. KOENECKE: I have nothing  
 19 further.  
 20 MR. SMITH: Ms. Wiest.  
 21 CROSS-EXAMINATION  
 22 BY MS. AILTS WIEST:  
 23 Q Mr. Snyders, what is your current local rate for both  
 24 companies?  
 25 A For Alliance I'll give you a range, if that's okay.

1 As far as how long, I do not know.  
 2 Q Are you still on page 3 of your rebuttal testimony?  
 3 A Yep.  
 4 Q Starting at line 7, your answer talks about the Western  
 5 Wireless proposal would increase Alliance's costs. Do  
 6 you see that?  
 7 A Yes, I do.  
 8 Q You understand that the Western Wireless proposal is  
 9 actually cheaper than the proposal set forth by your  
 10 cost analyst?  
 11 A I understand that the numbers are less than what was  
 12 presented by our cost analyst, yes.  
 13 Q Just so we're straight on this, when you talk about an  
 14 increase in your cost, you mean in reference to your  
 15 cost today before LNP.  
 16 A There would be -- yes. There would be an increase in  
 17 cost for transport.  
 18 Q You're not sitting here testifying to the Commission  
 19 that your proposed costs are less than what Western  
 20 Wireless has said you can do it for?  
 21 A Can you repeat that question.  
 22 Q You're not sitting here telling the Commission that the  
 23 cost analysis done -- the cost proposal done by your  
 24 cost analyst is less than what Western Wireless has  
 25 said it would cost if you do it their way.

1 Q Sure.  
 2 A The range is \$8 to 15.70. That's for residential. And  
 3 then for Splitrock Properties it's 12.70 to 15.70. And  
 4 the business rates would be from 13 to 26, and for  
 5 Splitrock Properties it's 26 to 29.  
 6 Q Thank you. Do you know how many wireless carriers have  
 7 the authority to serve your area?  
 8 A It depends on the area. As far as authority, I've got  
 9 to believe there's quite a few. I don't know exactly  
 10 how many. It could probably be around the Sioux Falls  
 11 area in the 20s.  
 12 Q In the 20s? And that was authority to serve. Do you  
 13 have any idea how many wireless carriers are currently  
 14 serving your area?  
 15 A Offhand it would probably be -- I can probably come up  
 16 with six or seven.  
 17 Q So there would be a number of carriers that have the  
 18 authority to serve but are not currently serving.  
 19 Would that be correct?  
 20 A I know there's a lot of licenses out there that haven't  
 21 been implemented. Again, that would be a guess on my  
 22 part.  
 23 Q Okay. And did your company file separate cost studies,  
 24 do you know, for your two companies?  
 25 A No, we did not.

1 Q Could you explain why the companies were consolidated  
 2 for LNP cost purposes?  
 3 A Pretty much for economies of scale. We have the common  
 4 employees, the networking between the satellite offices  
 5 and the host. We have, you know, intracompany  
 6 networking. It just made sense on our part to combine  
 7 them into one.  
 8 MS. AILTS WIEST: That's all I have.  
 9 Thank you.  
 10 MR. SMITH: Do the Commissioners  
 11 have any questions?  
 12 CHAIRMAN SAHR: Good morning,  
 13 Mr. Snyders.  
 14 THE WITNESS: Good morning.  
 15 CHAIRMAN SAHR: Would you have  
 16 interest in participating in some type of working  
 17 group looking at potential lower cost solutions to  
 18 implement LNP?  
 19 THE WITNESS: If this is where that  
 20 would lead to, I would participate.  
 21 CHAIRMAN SAHR: And do you have any  
 22 suggestions on what type of people might  
 23 participate in that type of working group?  
 24 THE WITNESS: Without giving that a  
 25 lot of thought, probably not at this time.

1 MR. WIECZOREK: She asked about if  
 2 he knew of anybody looking for LNP.  
 3 MR. SMITH: Overruled.  
 4 A Can you restate your question, please.  
 5 Q Did you know that your cost expert has projected 900  
 6 ports in the first five years in your company's areas?  
 7 A Yeah. He's projecting 180 per year.  
 8 MR. WIECZOREK: Thank you.  
 9 MR. SMITH: Additional questions?  
 10 MR. KOENECKE: I've got one.  
 11 RE-CROSS-EXAMINATION  
 12 BY MR. KOENECKE:  
 13 Q You've had no requests for LNP from any of your  
 14 customers? Is that what I understood?  
 15 A That is correct.  
 16 Q What would you tell somebody if they asked?  
 17 A At this time we don't have that capability.  
 18 MR. KOENECKE: Thank you.  
 19 MR. SMITH: Anything further?  
 20 MS. POLLMAN ROGERS: No.  
 21 MR. SMITH: You may step down,  
 22 Mr. Snyders. Thank you. Go off the record a  
 23 second.  
 24 (Discussion off the record)  
 25 (Exhibits McCook 1 and 2 are marked for identification)

1 CHAIRMAN SAHR: Thank you.  
 2 MR. SMITH: Ms. Rogers.  
 3 REDIRECT EXAMINATION  
 4 BY MS. POLLMAN ROGERS:  
 5 Q If there were demand from your customers for LNP, you  
 6 would hear about it or know about it, would you not?  
 7 A That would be correct.  
 8 Q Do you know whether conversion to a two-way trunking  
 9 system is even possible under the Qwest tariff?  
 10 A Again, you know, I'm general manager, not a networking  
 11 guy. I do not know that we would have that capability.  
 12 Q Now if you are required to accept the responsibility  
 13 for transport that you currently do not have, that  
 14 would be an increase in your costs?  
 15 A That would be correct. We would have to transport that  
 16 call, and it would be additional cost in doing that.  
 17 MS. POLLMAN ROGERS: Thank you.  
 18 That's all.  
 19 MR. SMITH: Mr. Wieczorek.  
 20 RE-CROSS-EXAMINATION  
 21 BY MR. WIECZOREK:  
 22 Q Did you know that your cost expert has projected 900  
 23 ports within the first five years?  
 24 MS. POLLMAN ROGERS: Objection.  
 25 That's beyond the scope of the redirect.

1 MR. SMITH: Ms. Rogers, you may call  
 2 your next witness.  
 3 MS. POLLMAN ROGERS: We are in  
 4 Docket TCO4-049, which is in the matter of the  
 5 petition of McCook Cooperative Telephone Company  
 6 for suspension of 251(b)(2).  
 7 I would call Bryan Roth to the stand.  
 8 BRYAN ROTH,  
 9 called as a witness, being first duly sworn in the  
 10 above cause, testified under oath as follows:  
 11 DIRECT EXAMINATION  
 12 BY MS. POLLMAN ROGERS:  
 13 Q Good morning, Bryan.  
 14 A Good morning.  
 15 Q You had a late night last night because you had a board  
 16 meeting and then drove to Pierre; is that correct?  
 17 A It wasn't too bad.  
 18 Q Would you please state your name and address for the  
 19 record.  
 20 A My name is Bryan Roth, and I'm the general manager of  
 21 McCook Cooperative Telephone, 3030 South Nebraska,  
 22 Salem, South Dakota.  
 23 Q On the table in front of you is what has been marked as  
 24 McCook Exhibit 1. Can you identify that?  
 25 A Yes.

1 Q What is it?  
 2 A It is our direct testimony of Tom Bullock, our  
 3 consultant on behalf of McCook Cooperative Telephone  
 4 and on behalf of LNP.  
 5 Q Okay. Then I'd ask you to look at what has been marked  
 6 as McCook Exhibit 2.  
 7 A Okay. That is my prefiled direct testimony.  
 8 (Discussion off the record)  
 9 Q And that prefiled direct testimony was prepared by you  
 10 or under your direction; is that correct?  
 11 A Correct.  
 12 Q Do you have any changes or corrections that you would  
 13 like to make to that prefiled testimony at this time?  
 14 A No, I don't.  
 15 Q And if I were to ask you the questions contained in  
 16 this direct testimony today, would your answers be the  
 17 same?  
 18 A Yes, they would.  
 19 Q Would you briefly summarize your direct testimony?  
 20 A Basically what the testimony -- I feel in the absence  
 21 of customer requests for LNP, the high cost, and the  
 22 low demand of it McCook Cooperative Telephone should  
 23 not be required to provide intercompany LNP.  
 24 MS. POLLMAN ROGERS: I would offer  
 25 McCook Exhibit 2 at this time.

1 MR. LEWIS: No objection.  
 2 MS. AILTS WIEST: No objection.  
 3 MR. COIT: No objection.  
 4 MR. SMITH: McCook 2 is admitted.  
 5 MS. POLLMAN ROGERS: I would tender  
 6 the witness for cross-examination.  
 7 MR. COIT: No cross here.  
 8 CROSS-EXAMINATION  
 9 BY MR. LEWIS:  
 10 Q Good morning, Commission, counsel, and good morning to  
 11 you, Mr. Roth.  
 12 A Good morning.  
 13 Q My name is Paul Lewis, and I represent Western Wireless  
 14 in this Docket. I have a series of questions I'd like  
 15 to visit with you about.  
 16 A Okay.  
 17 Q Sir, would you agree that the petition that you filed  
 18 before this Commission is as complete and accurate as  
 19 possible?  
 20 A Yes.  
 21 Q And within that petition it contains numbers that were  
 22 compiled by your cost analyst; correct?  
 23 A Correct.  
 24 Q Now did you and members of your office conduct any  
 25 independent surveys to find out for yourself what these

1 numbers were, or did you just completely rely on your  
 2 cost analyst to compile those numbers?  
 3 A We provided them with some of the information.  
 4 Q But he basically did all the crunching?  
 5 A He compiled the numbers, correct.  
 6 Q Okay. Thank you. Mr. Roth, do you understand the  
 7 methodology that was used by your cost analyst in  
 8 coming up with these numbers?  
 9 A No.  
 10 Q Now in your testimony on page 2 of your direct you  
 11 stated that no one has requested LNP; is that correct?  
 12 A None of our customers have requested LNP from us.  
 13 Q Right. Within your exchange area.  
 14 A Correct.  
 15 Q Okay. In those numbers that were submitted by your  
 16 cost analyst he estimated at least 48 ports per year  
 17 would be ported over to a wireless carrier. Are you  
 18 familiar with that?  
 19 A Yes.  
 20 Q So does it surprise you to know that you're going to  
 21 lose over the next five years approximately 11 percent  
 22 of your wireline customers to wireless?  
 23 A Does it surprise me?  
 24 Q Yes. In light of your first response saying that, you  
 25 know, you've had really no demand.

1 A I did not come up with the percentage or whatever the  
 2 number that they used for that, and I relied on my cost  
 3 consultant to come up with that. So it was -- I was  
 4 surprised, yes.  
 5 Q Okay. So by virtue of this number you'd agree that  
 6 there is demand out there.  
 7 A Not from what I have seen.  
 8 Q Today -- well, previously, and I've seen you in the  
 9 gallery on other managers' testimony, there's been talk  
 10 about technical feasibility concerning LNP --  
 11 MS. POLLMAN ROGERS: I object to  
 12 that. There has not been any testimony concerning  
 13 technical feasibility this morning since he's been  
 14 in the room and this is the only day he's been  
 15 there.  
 16 MR. LEWIS: Oh, no. He's been in  
 17 the room yesterday --  
 18 MS. POLLMAN ROGERS: No. He was not  
 19 here yesterday.  
 20 MR. LEWIS: I apologize. I  
 21 apologize. Let me rephrase the question.  
 22 Q To your knowledge do you maintain that LNP is  
 23 technically infeasible or feasible? Is it possible or  
 24 not?  
 25 A Technically feasible?

1 Q Yes.  
 2 A Yes.  
 3 Q You would agree it is technically feasible?  
 4 A From what I know, yes.  
 5 Q You're also aware that on November 10 of 2003 the FCC  
 6 mandated compliance of local number portability unless  
 7 your specific exchange area has received an exception.  
 8 You're aware of that, are you not?  
 9 A I'm not aware of the dates and everything with it, yes.  
 10 Q Since that time up until this Commission meeting have  
 11 you made any attempt to contact Western Wireless to  
 12 talk about cost-effective ways of implementing?  
 13 A I believe my attorney has directed a letter after we  
 14 received the request.  
 15 Q Are you also aware that Congress and federal law has  
 16 basically allowed you to recoup some of the expenses  
 17 for LNP through a customer surcharge?  
 18 A Yes.  
 19 Q And if this Commission required you to implement LNP,  
 20 would your company be able to finance that?  
 21 A Yes, we would.  
 22 Q You've noted in your direct testimony on page 1 that  
 23 cellular companies have a more extensive calling area  
 24 than what you currently have. Is that true?  
 25 A And when I say extensive I guess I mean larger. It is

1 willing to pay?  
 2 A No.  
 3 Q And you're not here today to present before the  
 4 Commission any type of demographic information, are  
 5 you?  
 6 A No.  
 7 Q One last question. Do you have a direct point of  
 8 interconnect with a wireless carrier?  
 9 A Yes, we do.  
 10 MR. LEWIS: Okay. No further  
 11 questions. Thank you.  
 12 MR. SMITH: Mr. Koenecke.  
 13 MR. KOENECKE: I'm not a party this  
 14 time.  
 15 MR. SMITH: You're not. Pardon me.  
 16 Ms. Wiest.  
 17 MS. AILTS WIEST: Thank you.  
 18 CROSS-EXAMINATION  
 19 BY MS. AILTS WIEST:  
 20 Q Mr. Roth, what is your current local rate?  
 21 A For?  
 22 Q Residential and business.  
 23 A I believe we provided that in a response to the PUC,  
 24 but I have different local rates depending where it's  
 25 located.

1 larger. We're a small, rural ILEC.  
 2 Q Does your company, Mr. Roth, provide any extended area  
 3 service?  
 4 A Yes.  
 5 Q And would you agree that that's driven by customer  
 6 demand?  
 7 A I suppose it would be possible. It was there prior to  
 8 me getting there so I don't know if customers demanded  
 9 it or not.  
 10 Q But you still maintain the service.  
 11 A Sure.  
 12 Q Okay. Do you charge more for that service? And I'm  
 13 not talking about as a toll call. I'm talking about  
 14 for the line that goes into the house. Do they  
 15 actually pay more for that extended area service?  
 16 A It's figured in our base rates that we have right now.  
 17 We've got different EAS to different communities, but  
 18 we don't offer them an option whether they can have EAS  
 19 or not to our specific exchanges.  
 20 Q So if I didn't have EAS, my bill would be less than  
 21 someone who had EAS?  
 22 A Not necessarily.  
 23 Q Okay. Thank you. Have you done any independent or  
 24 internal surveys on your own to find out the  
 25 demographics of your customers and what they'd be

1 Q Do you have a range?  
 2 A For residential it would be \$14 to 14.20. And business  
 3 rates range from \$16 to \$28.  
 4 Q Thank you. And how many wireless carriers have the  
 5 authority to serve your area? Do you know?  
 6 A No. I can't really, I guess, answer that specifically.  
 7 I would imagine there's probably six.  
 8 Q Six?  
 9 A That would have licenses.  
 10 Q And you couldn't list who those were?  
 11 A We'd have Verizon, Western Wireless. I think RCC is in  
 12 part of that. I suppose Sprint would come in there.  
 13 There's Nextel has some service in our areas.  
 14 Q And those that you listed, those are the wireless  
 15 carriers that are currently serving your area?  
 16 A Portions --  
 17 Q To your knowledge?  
 18 A Portions of it, yes.  
 19 Q And you just stated that you had one point of  
 20 interconnection?  
 21 A Correct.  
 22 Q Where is that, and to which wireless carrier?  
 23 A It's Verizon into the Salem exchange.  
 24 MS. AILTS WIEST: Thank you. That's  
 25 all I have.

833

1 MR. SMITH: Commissioners?  
 2 Ms. Rogers?  
 3 MS. POLLMAN ROGERS: I have nothing.  
 4 MR. SMITH: You're excused.  
 5 (Discussion off the record)  
 6 MR. SMITH: Ms. Rogers, you may call  
 7 your next witness.  
 8 MS. POLLMAN ROGERS: Our next  
 9 witness is Tom Bullock.  
 10 (Exhibits Bullock 1 and 2 are marked for identification)  
 11 (Exhibit Tri-County 1 is marked for identification)  
 12 TOM BULLOCK,  
 13 called as a witness, being first duly sworn in the  
 14 above cause, testified under oath as follows:  
 15 DIRECT EXAMINATION  
 16 BY MS. POLLMAN ROGERS:  
 17 **Q** Good morning.  
 18 **A** Morning.  
 19 **Q** Would you please state your name and address for the  
 20 record.  
 21 **A** Sure. My name is Tom Bullock, and my business address  
 22 is 233 South 13th Street, Suite 1225, Lincoln,  
 23 Nebraska.  
 24 **Q** What is your occupation, Mr. Bullock?  
 25 **A** I'm a consultant with Telec Consulting Resources.

834

1 **Q** And did you act as a cost consultant for several of the  
 2 Petitioners in these Dockets?  
 3 **A** Yes, I did.  
 4 **Q** And that would include Sioux Valley, Golden West Vivian  
 5 and Kadoka, Armour, Union, Bridgewater-Canistota,  
 6 McCook, Valley, Faith, Alliance, Splitrock, and  
 7 Tri-County?  
 8 **A** All of those, yes.  
 9 **Q** Did I miss any?  
 10 **A** No. That's the list.  
 11 **Q** All right. Now, Mr. Bullock, can you give me just a  
 12 brief background -- well, let's go through the exhibits  
 13 first. Should we do that?  
 14 Now in this Docket you prefiled some  
 15 testimony; is that correct, or in these Dockets?  
 16 **A** Yes.  
 17 **Q** And in front of you I believe you have what have been  
 18 marked as Bullock Exhibits 1 and 2?  
 19 **A** I see those.  
 20 **Q** Could you please explain what those are?  
 21 **A** Bullock Exhibit 1 is my introductory testimony, direct  
 22 testimony on behalf of all of the companies that were  
 23 just listed in the eight Dockets in which their  
 24 petitions were filed. Bullock 2 is my rebuttal  
 25 testimony in those same Dockets.

835

1 **Q** Okay. And let's talk about those exhibits first. Do  
 2 you have any corrections or additions to Bullock  
 3 introductory Exhibits 1 and 2?  
 4 **A** Yes, I do. In my rebuttal testimony on page 3  
 5 beginning with line 14 this is in response to a  
 6 question about S-O-A, SOA costs. My statement is --  
 7 well, let me begin with line 12 on Exhibit 2 that was  
 8 attached to my direct testimony, "Most of the RLECs did  
 9 not include any nonrecurring costs on the line entitled  
 10 SOA nonrecurring setup charge. The only exceptions are  
 11 Sioux Valley and the merged operation of Golden West,  
 12 Vivian, and Kadoka."  
 13 That is not correct. I should have also  
 14 included a third exception, namely, Alliance and  
 15 Splitrock, in order to be consistent with the cost  
 16 analysis that was actually done.  
 17 My next correction is, as Steve Oleson  
 18 testified yesterday for Valley, there is a third  
 19 wireless carrier operating in his area, namely CommNet  
 20 Cellular. And so to account for that, we would like to  
 21 revise some cost estimates.  
 22 **Q** And those would also be on the cost estimates attached  
 23 to Valley's individual testimony? Were they all  
 24 attached to your introductory and rebuttal?  
 25 **A** The latter, attached to my testimony.

836

1 **Q** Okay. All right.  
 2 **A** Another correction, 3, for Alliance and Splitrock, I  
 3 learned last week that I had received incorrect counts  
 4 of equipped lines in the DMS-10 switches for Alliance  
 5 and Splitrock, and the net effect for that correction  
 6 will be to reduce their switch upgrade costs somewhat.  
 7 MS. AILTS WIEST: What exhibit are  
 8 we talking about?  
 9 MS. POLLMAN ROGERS: We're talking  
 10 about exhibit --  
 11 MR. WIECZOREK: Are you talking  
 12 R-1-TB?  
 13 THE WITNESS: That's one of them.  
 14 The other would be the Exhibit 2 that was filed for  
 15 Alliance and Splitrock with my direct testimony.  
 16 MS. AILTS WIEST: So for Exhibit 2  
 17 attached to your introductory direct testimony for  
 18 lines merged would a number be changed on that  
 19 exhibit?  
 20 THE WITNESS: Yes.  
 21 MS. AILTS WIEST: What would that  
 22 be?  
 23 THE WITNESS: The switch upgrade  
 24 cost would be reduced.  
 25 MS. AILTS WIEST: To what?

1 THE WITNESS: I haven't done the  
 2 calculations yet.  
 3 MS. POLLMAN ROGERS: It would be  
 4 Mr. Bullock's intention to submit updated exhibits  
 5 as he just learned this when he got here yesterday.  
 6 THE WITNESS: Actually I received  
 7 the information late last week.  
 8 MS. AILTS WIEST: Be reduced by a  
 9 lot?  
 10 THE WITNESS: Somewhat. I did a  
 11 quick calculation that I'm not going to swear to.  
 12 If I can suspend my oath for just this one  
 13 response, the net result --  
 14 CHAIRMAN SAHR: Excuse me. I don't  
 15 know if -- you're under oath right now.  
 16 THE WITNESS: Okay.  
 17 CHAIRMAN SAHR: So you can clarify  
 18 it and say that perhaps you haven't --  
 19 THE WITNESS: Subject to later  
 20 correction.  
 21 CHAIRMAN SAHR: Or you may make  
 22 corrections or you can clarify it otherwise, but  
 23 unless we permit you to go off the record where you  
 24 will not be under oath because you won't be  
 25 participating in the proceeding, you are under the

1 oath unless your attorney requests and is granted  
 2 the ability to take you off the record.  
 3 MR. SMITH: Mr. Bullock, let me just  
 4 assure you that being wrong isn't the same as  
 5 committing perjury. And you don't need to worry  
 6 about that. I think the important thing, though,  
 7 is if you're not sure -- if you haven't had  
 8 sufficient time, just characterize your answer with  
 9 the level of certainty that you have right now.  
 10 THE WITNESS: My recollection is  
 11 that the bottom line result would be to reduce the  
 12 monthly per line cost for Alliance and Splitrock  
 13 without transport and without surcharges and taxes  
 14 from I think the current figure is 73 cents to --  
 15 and here's where my recollection is not absolutely  
 16 certain, to approximately 70 cents.  
 17 MS. POLLMAN ROGERS: What we would  
 18 request permission to do would be to file a  
 19 supplemental exhibit to reflect those changes.  
 20 MS. AILTS WIEST: I was just  
 21 curious, though, if he got it last week, why don't  
 22 we have it now or why didn't we get it Monday?  
 23 MR. WIECZOREK: Or even submit it  
 24 right now, the revised right now.  
 25 MS. POLLMAN ROGERS: I was not aware

1 of it.  
 2 THE WITNESS: I don't have an answer  
 3 for that.  
 4 MS. POLLMAN ROGERS: I mean, we want  
 5 to be able to provide the Commission with the most  
 6 accurate and current figures available, and so we  
 7 would renew our request to be able to submit an  
 8 updated cost exhibit. I really don't believe that  
 9 that change is real significant so that would be  
 10 our request.  
 11 MR. WIECZOREK: Can I just ask the  
 12 witness a couple of clarifying questions?  
 13 MR. SMITH: Please.  
 14 MR. WIECZOREK: Are your revisions  
 15 going to reduce your costs in all cases?  
 16 THE WITNESS: The revision I was  
 17 speaking of is with respect to Alliance and  
 18 Splitrock.  
 19 MR. WIECZOREK: Right. That will  
 20 reduce your cost estimates for Reliance?  
 21 THE WITNESS: Yes.  
 22 MR. WIECZOREK: The other number  
 23 revision you talked about earlier, will that also  
 24 result in reduction in the line item -- the line  
 25 costs for -- the LNP cost per line?

1 THE WITNESS: I'm sorry. Which  
 2 correction?  
 3 MR. WIECZOREK: The other correction  
 4 to your spreadsheets, your number corrections.  
 5 Valley -- you're talking about correcting a number  
 6 of spots on this spreadsheet, I understand it, your  
 7 cost analysis.  
 8 MS. POLLMAN ROGERS: I think I can  
 9 probably respond to that. The figures that are  
 10 placed on the spreadsheet that you're referring to  
 11 were taken from Exhibit 2 that was attached. So to  
 12 the extent -- I mean, it would be the same change  
 13 in Exhibit 2 and then reflected on the spreadsheet  
 14 for the respective company because it's broken out  
 15 by companies.  
 16 MR. WIECZOREK: What I'm getting at  
 17 is this, Commission, that, I mean, if his changes  
 18 frankly will reduce his bottom line, he can make  
 19 them and I'd have no objection to him submitting  
 20 that amendment as long as I get a letter not to be  
 21 produced into evidence but just a letter explaining  
 22 where he made his changes.  
 23 If he's going to make changes that increase  
 24 his costs, I believe I'd also request a letter  
 25 explaining why he increased his costs, and I'd also

841

1 then request just like we have with Mr. DeWitte  
 2 when he changes his I'd get the opportunity to make  
 3 a determination whether I think I need to  
 4 cross-examine him on any increased costs.  
 5 Frankly, if he's going to reduce costs, I  
 6 don't think I'm going to want to cross-examine him  
 7 on reduced costs.  
 8 MR. SMITH: With Valley, I  
 9 understand there you stated there was an additional  
 10 company?  
 11 THE WITNESS: That's correct.  
 12 MR. SMITH: Would that increase the  
 13 number of ported numbers?  
 14 THE WITNESS: It would increase our  
 15 estimate of a couple of cost categories.  
 16 MR. SMITH: So I think in the case  
 17 of Valley your changes would probably result in  
 18 increased costs.  
 19 THE WITNESS: That's correct. I  
 20 have a couple more.  
 21 MS. POLLMAN ROGERS: Just a minute.  
 22 Where are we here? Should I have him go through  
 23 all of these?  
 24 MR. SMITH: I think so. And then  
 25 we'll make a decision. I mean, I think in the case

842

1 of the other -- Mr. DeWitte, you know, we went  
 2 through a process of trying to make the documents  
 3 reflect the testimony, and I don't know that that's  
 4 not a sensible thing to do here. But let's see  
 5 what we have here. Go ahead.  
 6 A Okay. My fourth correction is that for Golden West  
 7 Vivian and Kadoka I recently learned that Vivian and  
 8 Kadoka have some newly installed direct trunk links to  
 9 Verizon at Wall and at Kadoka, and the net result of  
 10 that would be a reduced transport cost estimate to  
 11 account for those existing direct trunks.  
 12 Q And that would be consistent with the testimony  
 13 presented by Mr. Law this morning?  
 14 A Correct.  
 15 Q Okay.  
 16 A And, finally, for the same group of companies,  
 17 Golden West Vivian, and Kadoka, as Denny Law testified  
 18 earlier, the company made an error in reporting their  
 19 count of access lines for all three companies, and I  
 20 can't predict the net result of that change. Some  
 21 estimates may go up, some may go down.  
 22 MR. SMITH: That's the reduction  
 23 from the 18,000 down to 17 and change?  
 24 MS. POLLMAN ROGERS: That's correct.  
 25 THE WITNESS: Yes.

843

1 A I also have just a couple of general comments about  
 2 costs.  
 3 Q Now is this on your direct and rebuttal testimony?  
 4 That's what we're referring to right now.  
 5 A Yes.  
 6 MR. WIECZOREK: Corrections?  
 7 Q Does that conclude your corrections to your testimony?  
 8 A Yes.  
 9 Q Okay.  
 10 A Specifically regarding --  
 11 Q Just wait one minute.  
 12 MS. POLLMAN ROGERS: With that, we  
 13 would renew our request to be able to provide  
 14 supplemental or supplemented or updated cost  
 15 exhibits that reflect the evidence that has come in  
 16 and the corrections that he's referred to that  
 17 would be reflected in those cost exhibits.  
 18 MR. SMITH: Let me ask, would you  
 19 want to do that via changing what's in the original  
 20 documents or submitting just a new exhibit that is  
 21 labeled corrected spreadsheets or whatever?  
 22 MS. POLLMAN ROGERS: How were we  
 23 doing it in the other case with Mr. DeWitte?  
 24 MR. SMITH: I think we substituted  
 25 in that case.

844

1 MR. WIECZOREK: We haven't  
 2 substituted yet because he's still correcting it.  
 3 Didn't he take his testimony with him?  
 4 MR. SMITH: It disappeared. I'll  
 5 put it that way.  
 6 MS. AILTS WIEST: I can't remember.  
 7 He already submitted one correction, and I don't  
 8 know if that was substituted or added.  
 9 MR. WIECZOREK: I don't think --  
 10 frankly, my recollection is I'm not sure that we  
 11 substituted or added anything yet because we found  
 12 three or four more mistakes on it, and I thought  
 13 what he did was he was going to go back, do it  
 14 again, and submit it.  
 15 MS. POLLMAN ROGERS: Well, my  
 16 suggestion was whatever procedure we followed  
 17 there, we follow the same one here.  
 18 MR. SMITH: These are going to be  
 19 quite incremental changes, are they not? They're  
 20 not going to be order of magnitude type things?  
 21 THE WITNESS: They will be fairly  
 22 insignificant changes to the bottom line.  
 23 MR. WIECZOREK: What we did with  
 24 Mr. DeWitte, as I recall, is I made the request at  
 25 least two days before he come back for Santel I'd

1 have his changes with an explanation of where he  
 2 made his changes so after Santel I could  
 3 cross-examine him.  
 4 I guess what I would ask is that I would have  
 5 Mr. Bullock's changes Tuesday morning. Then  
 6 Wednesday morning I could tell you whether I feel I  
 7 need to cross-examine him. And the only reason I  
 8 say it would take that long, I'd like to review  
 9 them with Mr. Williams to see if there are any  
 10 changes.  
 11 Quite frankly, if the changes are minute in  
 12 the bottom line, it's probably not going to be  
 13 trouble, but I'd like to leave that opportunity  
 14 open if all the sudden there is a large jump.  
 15 MR. SMITH: I agree. I think you  
 16 must have the opportunity to be able to  
 17 cross-examine as to any changes if you deem it  
 18 necessary. I think that goes with any of these  
 19 situations.  
 20 So, as I understand it, what you're going to  
 21 do is do recalculations over the weekend and you'll  
 22 submit a revised document, and if you could, if you  
 23 could do that in a way that would reflect the  
 24 changes, that would be good, whether they're  
 25 highlighted, the numbers that have been changed, or

1 some method that identifies what you've done.  
 2 Is that fair?  
 3 MR. WIECZOREK: That's fair. And  
 4 the earlier I get it, would be e-mailed to me, I  
 5 can try to review it first thing Monday and I can  
 6 send it on to Mr. Williams and perhaps we can tell  
 7 the Commission Tuesday morning whether we feel we  
 8 need to have Mr. Bullock back for  
 9 cross-examination.  
 10 MR. SMITH: Okay.  
 11 MS. POLLMAN ROGERS: Thank you.  
 12 Q Mr. Bullock, with regard to --  
 13 MS. POLLMAN ROGERS: If it's all  
 14 right to you, I'm going to handle the direct and  
 15 rebuttal and general first, and we'll go through  
 16 the individual.  
 17 Q With regard to your introductory testimony submitted on  
 18 behalf of all of the companies and also with regard to  
 19 your rebuttal testimony, I'm going to ask you if you  
 20 could summarize those, please.  
 21 A Before I begin my summary, there are a couple of other  
 22 points I'd like to make about switch upgrade costs,  
 23 specifically for Faith and for Tri-County.  
 24 Q I think we can -- I would ask you to summarize your  
 25 testimony now. We can cover any comments with regard

1 to specific companies when we -- or any testimony with  
 2 regard to specific companies when we deal with that  
 3 company.  
 4 A That's fine.  
 5 Q In my direct testimony I'm providing support for the  
 6 argument that the Petitioners have made that the cost  
 7 of implementing LNP is an economic burden. I've also  
 8 presented in my direct testimony an overview of LNP  
 9 network architectural elements and processes involved  
 10 with LNP. I'd refer you to what's called Exhibit B to  
 11 my introductory direct testimony for that, for a  
 12 diagram of the network architecture and processes  
 13 involved with LNP.  
 14 In my direct testimony I give a description  
 15 of the various cost categories that we've considered in  
 16 estimating implementation costs and also present the  
 17 process that Telec Consulting used to develop those  
 18 cost estimates.  
 19 We started with a series of meetings and  
 20 discussions with small rural telephone companies that  
 21 does not include the companies on whose behalf I'm  
 22 testifying, and we received from that initial group of  
 23 telephone companies, many in Nebraska, some in  
 24 South Dakota, estimates of LNP implementation costs  
 25 directly from those companies and made the observation

1 at that time that several companies' managers were  
 2 having a hard time understanding what kinds of costs  
 3 they would be incurring.  
 4 And so we kind of combined the experience and  
 5 expertise of the various companies' managers and  
 6 attempted to construct a model for calculating or  
 7 estimating costs that would more or less regularize our  
 8 cost estimates to achieve some degree of uniformity in  
 9 approach towards developing our cost estimates.  
 10 Then for the companies on whose behalf I am  
 11 testifying we asked specific questions of the  
 12 companies, such as how many access lines do you have,  
 13 how many employees do you have in certain job titles,  
 14 and what's the average wage rate, how many wireless  
 15 carriers do you have currently operating in your  
 16 service area, things like that, and used that basic  
 17 information to calculate estimated costs for the  
 18 various cost categories, which I'll describe in a  
 19 minute.  
 20 And these calculations were the basis of our  
 21 original Exhibit 1 that was filed with the petitions in  
 22 March, I think. Then the final stage of cost  
 23 development were a series of refinements to those  
 24 initial estimates that are summarized in the Exhibit 2  
 25 document that were provided with my direct testimony.

1 The cost categories that we analyzed are,  
2 first, switch upgrade costs. For Exhibit 1 we simply  
3 asked the companies to estimate those costs. They  
4 reported cost figures to us, and that's what appears on  
5 Exhibit 1.

6 For Exhibit 2 we investigated the pricing  
7 policies of the individual switch manufacturers that  
8 the telephone companies utilize in their networks and  
9 collected a little more information from the companies  
10 to allow us to apply those pricing policies. And  
11 Exhibit 2's switch upgrade costs reflect that process.

12 The second cost category is what we call  
13 internal business procedure changes. I think you've  
14 heard Mr. Williams describe the hundreds of tasks that  
15 have to be performed to implement LNP. What this cost  
16 category is intended to represent is the planning for  
17 implementation of these new procedures that have to  
18 occur in order to enable a telephone company to port  
19 numbers.

20 Switch technicians have to be trained on how  
21 to interact with customer service representatives to  
22 the processing of a service order to port a number.  
23 The customer service people have to know what to do  
24 with a local service request that they receive from a  
25 carrier who wants to port a number and how to fill out

1 switch technician, and a customer service  
2 representative, if the company had those job titles.  
3 If they didn't have those job titles, we took the 120  
4 hours and assigned them to different job titles.

5 The fourth cost category is what we call  
6 other internal costs. We used the same approach for  
7 both Exhibit 1 and Exhibit 2. Attached to my direct  
8 testimony is a document we call Exhibit E, and this is  
9 a chart that shows the number of man hours that we  
10 estimate would be required in order to analyze and fill  
11 out the forms that companies receive from wireless  
12 carriers as part of the arrangement that must be  
13 established between companies in order to facilitate  
14 porting.

15 This includes what are called trading partner  
16 profiles and number portability agreements. Actually  
17 in my rebuttal testimony I've included as attachments  
18 examples of those kinds of documents that companies --  
19 that rural telephone companies have received from  
20 wireless carriers.

21 The fifth cost category is LNP query costs.  
22 What we assumed is that companies would utilize the  
23 services of a well established query service provider  
24 that many small telephone companies do business with  
25 today. We've signed a nondisclosure agreement with

1 the firm order confirmation that is the reply to that.  
2 You have to establish a mechanism for interfacing with  
3 the number portability administration center through an  
4 SOA capability.

5 Anyway, the internal business procedure  
6 changes are the upfront investment costs, and what we  
7 estimated is strictly labor costs, calculated -- or we  
8 estimated -- I'm sorry, estimated numbers of man hours  
9 required and simply multiplied those man hours by  
10 average wage rates and totalled it all up and that's  
11 what we show for internal business procedure change  
12 cost estimates.

13 The third category we call intercarrier  
14 testing -- I'm sorry. Let me back up a second.

15 For the internal business procedure changes  
16 we used the same mechanism for both Exhibit 1 and  
17 Exhibit 2. For the cost category called intercarrier  
18 testing, again we applied the same methodology for  
19 Exhibit 1 and Exhibit 2. We estimated that a total of  
20 120 man hours would be required to test call routing,  
21 the interaction among switches. When you're dealing  
22 with another carrier things get more complicated.  
23 Things are not confined to your own switch network  
24 anymore. We estimated 120 man hours split among three  
25 different job titles; customer service supervisor, a

1 this outfit so I can't reveal their identity and their  
2 pricing in public, but this company charges a monthly  
3 minimum for query charges. We did not estimate  
4 quantities of queries that would be performed. We  
5 simply used the monthly minimum.

6 In Exhibit 1 we made the mistake of  
7 calculating our LNP query costs based on a monthly  
8 minimum per company. We corrected that mistake in the  
9 Exhibit 2s filed with my direct testimony, taking into  
10 account the fact that this monthly minimum does not  
11 apply on a per company basis but on a per switch basis.  
12 And so the result of that was, for companies that have  
13 more than one switch, an increase in query costs.

14 The sixth cost category is service order  
15 administration costs or SOA. For Exhibit 1 we obtained  
16 information from a couple of commercial SOA service  
17 providers that I would say larger telephone companies  
18 utilize, both wireline and wireless. We learned about  
19 these through telephone companies that we work with who  
20 have CLEC operations and have implemented LNP that  
21 utilize these providers of SOA services.

22 And for Exhibit 1 we simply took the average  
23 of the initial cost and the average of the monthly  
24 recurring costs for these two SOA services that we  
25 learned about. For Exhibit 2 we had learned about some

1 lower cost options available for SOA services through  
2 yet another provider of services and we -- well, let me  
3 start again.

4 The two lower cost options that we used for  
5 Exhibit 2 have different pricing structures. One of  
6 them depends on the volume of porting activity that you  
7 have. There's a charge per porting transaction, which  
8 is not the same thing as port as a number port. I've  
9 seen estimates from consultants that indicate porting  
10 out a number can require from one to three  
11 transactions. Porting in a number from a carrier can  
12 require three or four or five transactions. And so  
13 under this kind of pricing option your expenses for SOA  
14 services rely on a projected volume of porting  
15 activity.

16 There is another option that we looked at  
17 that involves a flat monthly rate, and what we did was  
18 projected the volume of porting activity and then  
19 simply -- for each company, based on their count of  
20 access lines, and then chose between these two lower  
21 cost options which one would be most cost-effective,  
22 the lowest cost for that particular company.

23 And in my Exhibit F it's called to my direct  
24 testimony I have a chart that lays out the estimated  
25 porting volumes for companies of different sizes in

1 transport. And what we have assumed in both Exhibit 1  
2 and Exhibit 2 is that direct trunk links would be  
3 installed between the ILEC's network and each wireless  
4 carrier that's currently providing service in the  
5 ILEC's territory.

6 On both Exhibit 1 and Exhibit 2 there are  
7 some derived numbers derived from the 10 cost  
8 categories that I just described in order to calculate  
9 an estimate of a cost per line per month, taking into  
10 account all of the costs I've just described.

11 In accordance with the FCC's cost recovery  
12 guidelines with respect to the end-user charge, we  
13 included an 11 and a quarter percent rate of return for  
14 the upfront investment. However, we did not make any  
15 provisions for reductions in access line counts, and so  
16 as a result of this second failure to account for  
17 reductions in access line counts, our costs are  
18 actually lower -- I should say our cost estimates are  
19 lower than they would be had we taken that into  
20 account.

21 And, finally, on both Exhibit 1 and Exhibit 2  
22 we show cost estimates, both without transport and  
23 costs with transport because we believe that this tenth  
24 category, transport, is in an entirely different  
25 category from all of the other LNP related costs.

1 terms of access line counts.

2 The seventh cost category we call customer  
3 notification, and this is our estimate of sending out a  
4 one-time mailing to all customers notifying them of  
5 what LNP is and that there would be a new charge  
6 appearing on their bill to recover costs of LNP.

7 The eighth cost category we called switch  
8 maintenance. For Exhibit 1 we obtained estimates from  
9 the telephone companies of switched maintenance costs,  
10 and then in the course of developing our Exhibit 2 cost  
11 estimates we had these conversations with the switch  
12 manufacturers and learned that, in fact, none of the  
13 switch manufacturers would increase their software  
14 maintenance contract agreements. None of them would  
15 increase the cost of maintaining a software maintenance  
16 agreement, and so we changed those switch maintenance  
17 costs to zero on Exhibit 2.

18 The ninth cost category we call other  
19 recurring costs, I believe. I just have the word other  
20 written here in my notes. For Exhibit 1 we didn't  
21 include any costs in that category. For Exhibit 2 we  
22 estimated labor costs of processing a certain number of  
23 ports per month using the same estimates of porting  
24 volumes that we had for the SOA costs.

25 And, finally, the tenth cost category we call

1 In my rebuttal testimony I have included an  
2 attachment or an exhibit that's called R-1-TB where I  
3 show side-by-side comparisons of the numbers from our  
4 Exhibit 2 and also from Western Wireless Exhibit 5 that  
5 was attached to Ron Williams' direct testimony.  
6 Another attachment to my rebuttal testimony is the  
7 examples of porting agreements and trading partner  
8 profiles. Those are R-2-TB and R-3-TB. I also stated  
9 in my rebuttal testimony some reasons why we decided to  
10 use T-1 circuits and direct trunk links between the  
11 ILEC network and CMRS carriers, and I'd like to  
12 elaborate on those.

13 Off the top of my head last night as I was  
14 thinking about this question and anticipating some  
15 questions from the Western Wireless folks I could only  
16 think of five good reasons why we might want to use T-1  
17 circuits and direct trunks to connect the ILEC network  
18 to the wireless switches.

19 The first one is if you don't go through a  
20 tandem switch, whether it's Qwest or SDN or somebody  
21 else, you're eliminating a potential point of failure.  
22 If you direct connect -- if you connect directly to the  
23 wireless carrier's switch, you're going to establish an  
24 operationally more reliable connection.

25 The second reason is that direct trunks for

1 delivery of traffic from the ILEC network to the  
2 wireless carrier is consistent with existing  
3 Interconnection Agreements.

4 The third reason we decided to price our  
5 transport this way is that it's a known entity. We can  
6 look up tariffs for T-1 circuits, and it is what it is.  
7 That's the price you pay for a T-1 circuit from point A  
8 to point B.

9 A fourth reason is that circuits that come  
10 into the ILEC network -- I should say trunk links that  
11 are established to the ILEC network directly from the  
12 individual wireless carriers can be more easily  
13 monitored for call detail and billing purposes.  
14 Whether you're billing one way or the other way, you  
15 know who your trunk link is connected to, as opposed to  
16 going through a tandem there's a possibility that you  
17 might lose some information that reveals the identity  
18 of where the traffic is coming from.

19 And, finally, and I think this is  
20 particularly important, at this time I think it's safe  
21 to say that nobody can predict the volume of traffic  
22 that we're going to see between wireless carriers and  
23 rural ILECs. We were talking about the example here of  
24 LNP generated traffic. It's quite conceivable that  
25 there could be more. If we use this thing as kind of a

1 marked, and they're marked with names that  
2 correspond to the company names.

3 MR. WIECZOREK: All right.

4 MR. KOENECKE: That's acceptable.

5 MS. AILTS WIEST: No objection.

6 MR. SMITH: Okay. Bullock 1 and

7 Bullock 2 are admitted. Do you want to go through  
8 each one and get them all in now, or do you want to  
9 go through the round with this and then move to  
10 each company?

11 MR. WIECZOREK: I think you want to  
12 put them all in because I'm going to walk through  
13 the companies as part of my cross.

14 MR. SMITH: Okay. Why don't you  
15 proceed with each company.

16 Q (BY MS. POLLMAN ROGERS) Okay. The other exhibits  
17 would include McCook Exhibit 1 -- let me preface by  
18 saying in addition to your direct and rebuttal  
19 testimony filed on behalf of the whole group of  
20 companies you represented, you also filed a direct  
21 testimony in each of the individual Dockets of your --  
22 the companies that you're representing; is that  
23 correct?

24 A Yes. That's correct.

25 Q And so I would ask you to look -- and I think you have

1 precedent, there's no telling what could happen. And  
2 so assuming that the only traffic that we're talking  
3 about that might be changed between wireless and  
4 wireline carriers on a local basis where there's no  
5 interexchange carrier, assuming that that level of  
6 traffic is going to be only the level of traffic  
7 attributable to delivering calls to ported numbers, I  
8 think is a faulty assumption.

9 And that concludes my summary.

10 MS. POLLMAN ROGERS: Thank you. We  
11 would offer Bullock Exhibits 1 and 2 with the  
12 proviso that we will provide any updates to the  
13 cost estimates attached to those exhibits prior to  
14 Tuesday morning's resuming hearings.

15 MR. COIT: I don't have any  
16 objection.

17 MR. WIECZOREK: Just so I make sure  
18 I know what's offered, are you going to mark and  
19 offer his specific testimony that he gave in direct  
20 for each company too?

21 MR. SMITH: We're just looking at 1  
22 and 2 now.

23 MR. WIECZOREK: I have no objections  
24 to 1 and 2.

25 MR. SMITH: Those are all separately

1 before you McCook Exhibit 1.

2 A Uh-huh.

3 Q Alliance Splitrock Exhibit 3?

4 A Yes.

5 Q Valley Exhibit 3?

6 A Yes.

7 Q Faith Exhibit 3?

8 A Yes.

9 Q Golden West Exhibit 3 -- that would be Golden West  
10 Vivian Kadoka Exhibit 3?

11 A Yes.

12 Q Armour, Bridgewater-Canistota, Union Exhibit 3?

13 A Yes.

14 Q Sioux Valley Exhibit 3?

15 A Yes.

16 Q And Tri-County Exhibit 1?

17 A Correct.

18 Q And are those the prefiled testimony that you filed in  
19 each of these Dockets on behalf of each of these  
20 individual companies?

21 A Shall I read them all?

22 Q No. I'm just asking you if those are the -- if that's  
23 the prefiled testimony that you filed.

24 A Yes.

25 Q If you want to take time to look at them, that's --

1 yes. Is that your question?  
 2 A I'm assuming that the title page reflects what's behind  
 3 the title page. I'll say these are my direct  
 4 testimony.  
 5 Q Okay. We will save any additions, anything that you  
 6 said, we'll discuss those when we get into the  
 7 individual Dockets with regard to the corrections that  
 8 you've already alluded to, if that's satisfactory.  
 9 MR. WIECZOREK: I think it would go  
 10 much quicker if he makes any changes he's got now  
 11 so I can cross-examine him as we go through, and  
 12 I'll do it all at once rather than cross-examine  
 13 and come back.  
 14 MR. SMITH: Yeah. I think we should  
 15 note those --  
 16 Q Are there any -- let's see. We alluded to the  
 17 correction to Valley with regard to the addition of the  
 18 third wireless carrier. Are there any other  
 19 corrections or additions -- and that would be included  
 20 in Valley Exhibit 3, that correction; is that correct?  
 21 A We're introducing a new Exhibit 3 or --  
 22 Q No. My question was you'll recall in describing  
 23 additions and corrections to your general testimony you  
 24 alluded to a correction to Valley's figures, and that  
 25 addition was adding another wireless carrier.

1 Would that addition or correction need to be  
 2 made in Valley Exhibit 3?  
 3 A Yes.  
 4 Q Okay. And then you also --  
 5 MR. WIECZOREK: I'm sorry. I guess  
 6 I'm going to object if I don't have a line and page  
 7 number where he's making these additions.  
 8 MS. POLLMAN ROGERS: I think that  
 9 would be on Exhibit 2 of each of the individual  
 10 documents.  
 11 MR. SMITH: I'm still trying to find  
 12 the Docket. Are we on Valley now still?  
 13 MS. AILTS WIEST: There's an exhibit  
 14 to a specific 2, though.  
 15 MR. WIECZOREK: It doesn't appear in  
 16 the testimony, the reference --  
 17 MR. SMITH: I found it. Now what's  
 18 the issue?  
 19 MS. POLLMAN ROGERS: We were going  
 20 through the changes or additions that would need to  
 21 be made to the individual testimonies, and  
 22 Mr. Bullock pointed out initially that in the case  
 23 of Valley there is a third wireless carrier of  
 24 which he was not aware. And so that would change  
 25 some of the figures on Exhibit 2.

1 That Exhibit 2 is the same exhibit that is on  
 2 the general testimony, but it would need to be --  
 3 the correction would need to be reflected in that  
 4 as well.  
 5 MR. SMITH: And you don't have those  
 6 numbers today.  
 7 MR. WIECZOREK: Yeah. I guess what  
 8 I see -- the numbers or the reference to the number  
 9 of companies he used is not in exhibit -- not in  
 10 his prefiled testimony, which I don't really have  
 11 an issue with. But if the only changes to his  
 12 Exhibit 2 and all of those numbers fall down to  
 13 R-1-TB, couldn't we just accept the changes he  
 14 makes to R-1-TB as being his final numbers and  
 15 catching all of his corrections rather than trying  
 16 to walk through and correcting all of these  
 17 numbers?  
 18 MR. SMITH: As far as I'm concerned,  
 19 we can. That's basically what we were doing with  
 20 DeWitte's.  
 21 MR. WIECZOREK: I would accept that  
 22 approach and have no objections if we just did it  
 23 that way.  
 24 MR. SMITH: Anybody have an  
 25 objection to that?

1 MS. AILTS WIEST: That's fine.  
 2 MR. KOENECKE: No.  
 3 MR. SMITH: Okay.  
 4 MS. POLLMAN ROGERS: So we're going  
 5 to make the changes on the -- whatever this one is.  
 6 MR. WIECZOREK: R-1-TB.  
 7 Q Okay. So the changes or the corrections that we  
 8 discussed before in your introductory testimony would  
 9 carry over on each of the exhibits we're talking about  
 10 now. Is that basically correct?  
 11 A I think it might be useful for me to point out that in  
 12 the next of these individual company-specific cost data  
 13 direct testimony documents there are references to  
 14 costs, and if no one is concerned with the  
 15 inconsistency that will result, then we can simply  
 16 adjust the dollar amounts on the attachments that  
 17 summarize the costs.  
 18 MR. WIECZOREK: I have no objection  
 19 to that as long as he has talked about the costs  
 20 that are going to be changed on R-1-TBRA that I  
 21 don't feel we have to go through all the old  
 22 prefiled testimony and change it all to be the  
 23 same.  
 24 MR. SMITH: Any objections to that?  
 25 MS. AILTS WIEST: No.

1 MR. SMITH: Okay.  
 2 MS. POLLMAN ROGERS: With that, I am  
 3 going to offer McCook Exhibit 1, Alliance Splitrock  
 4 Exhibit 3, Valley Exhibit 3, Faith Exhibit 3,  
 5 Golden West Exhibit 3, Armour Bridgewater-Canistota  
 6 Union Exhibit 3, Sioux Valley Exhibit 3, and  
 7 Tri-County Exhibit 1 into evidence.  
 8 MR. COIT: No objection. He always  
 9 looks over here.  
 10 MR. WIECZOREK: Only because you  
 11 complained he was calling on me first. No  
 12 objections.  
 13 MR. KOENECKE: No objections.  
 14 MS. AILTS WIEST: No objections.  
 15 MR. SMITH: Hearing no objections,  
 16 all of the aforementioned exhibits are admitted  
 17 into evidence.  
 18 MS. POLLMAN ROGERS: I would tender  
 19 the witness for cross-examination.  
 20 CROSS-EXAMINATION  
 21 BY MR. WIECZOREK:  
 22 Q Mr. Bullock, my name is Talbot Wieczorek. I represent  
 23 Western Wireless in these proceedings.  
 24 A Good morning.  
 25 Q Good morning. I've got some questions. Let's start

1 the Commission is going to have a real hard time  
 2 understanding what we're talking about if we mean  
 3 different things by the same words.  
 4 Q Maybe we can use my example. There's a poster board up  
 5 there that shows a blown-up what has been marked as  
 6 Western Wireless Exhibit 5, and that's the first page  
 7 of Exhibit 5.  
 8 A The peacock.  
 9 Q You were here for that discussion.  
 10 A I've heard it described.  
 11 Q Are you recommending an identical type of approach?  
 12 A Well, first of all, when I read the names of the host  
 13 offices that are depicted here, there is no indication  
 14 as to whether a particular host office -- or, I'm  
 15 sorry, a particular end office as they're labeled here  
 16 is a host or is a remote or is a tandem or is a  
 17 satellite. They're simply named as end offices.  
 18 And the picture shows a connection between  
 19 each one of those end offices and each wireless carrier  
 20 shown along the bottom of the picture. We did not use  
 21 that kind of an approach.  
 22 Q Right. And I apologize. I know you've been here for  
 23 at least a day. Were you here when Mr. DeWitte  
 24 testified about this type of approach that's  
 25 illustrated on Exhibit 5?

1 with, as I understand your plan -- I'd just like to get  
 2 a basic so I understand what your cost -- what you've  
 3 cost out in this situation and so if I'm -- I'm going  
 4 to walk through it as I understand it, and you correct  
 5 me if I'm misstating it.  
 6 As I have gone through not just your  
 7 testimony but through the discovery documents you've  
 8 provided, which are voluminous, from every host office  
 9 is what you're recommending would be a T-1 line to  
 10 every cell provider who has service in that area?  
 11 A That's close. First of all, we took a count of host  
 12 remote architecture.  
 13 Q Okay.  
 14 A And did not -- I'm going to --  
 15 Q Let me walk through it, as I understand it. Let me go  
 16 to the host remote. You'd recommend one T-1 line from  
 17 every host remote to the host office, and then from the  
 18 host office a T-1 for every wireless company; is that  
 19 correct?  
 20 A No. I think it might be helpful if we do a little  
 21 review of switching network architecture so that we all  
 22 have a common understanding of what these words mean.  
 23 Host, remote, satellite, tandem have been used today  
 24 and through the testimony that I've heard in  
 25 inconsistent ways. And I think we do not benefit --

1 A I heard a portion of his testimony.  
 2 Q Yeah. He basically testified that he would use a T-1  
 3 from every -- I guess I was using the generic term  
 4 exchange, and I believe that's the term he used to,  
 5 directly to a point of interconnection or a POI with  
 6 every wireless carrier.  
 7 Did you hear that portion of the testimony?  
 8 A Yes.  
 9 Q Okay. And that's not the approach you're taking?  
 10 A That's correct.  
 11 Q As I understand -- and you're the technical guy, and  
 12 I'm just trying to follow this, but you're recommending  
 13 essentially a T-1 from an exchange but not directly to  
 14 every wireless carrier; is that correct?  
 15 A What we're recommending -- what we're -- what we have  
 16 assumed in the process of estimating transport costs is  
 17 that there would be a T-1 circuit installed between  
 18 each host or stand-alone switch that is not subtended  
 19 from a local tandem to each wireless carrier that's  
 20 currently providing service in the ILEC's territory  
 21 that does not already have a direct trunk link into the  
 22 ILEC's network.  
 23 Q Okay. All right. So let's take a real easy example.  
 24 Let's take Faith, since they only have one exchange is  
 25 my understanding.

1 A One exchange, one switch.  
 2 Q Okay. So yesterday you were here when the manager or I  
 3 believe it was city finance officer testified  
 4 concerning Faith. He said there are two cell companies  
 5 in the area, but I see on the documents as I went  
 6 through it that you'd recommend three T-1s. Why is  
 7 that?  
 8 A My notes show two T-1s.  
 9 Q Well, did you adjust that at some time because that's  
 10 not what was produced to me?  
 11 MS. POLLMAN ROGERS: Are you  
 12 referring to exhibit R-1-TB?  
 13 MR. WIECZOREK: No. I am referring  
 14 to some discovery because his R-1-TB --  
 15 MS. POLLMAN ROGERS: I'm sorry.  
 16 MR. WIECZOREK: -- doesn't believe  
 17 provides that kind of a breakdown.  
 18 MS. POLLMAN ROGERS: So perhaps you  
 19 could show the witness what it is -- to what it is  
 20 you are referring.  
 21 MR. WIECZOREK: I'll show him quick.  
 22 MS. POLLMAN ROGERS: Maybe you could  
 23 tell us as well.  
 24 MR. WIECZOREK: Your discovery  
 25 responses. I've got binders full of the

1 information that he provided through discovery and  
 2 I wasn't going to mark it all but I had to look at  
 3 the numbers for the raw numbers from some of it.  
 4 MS. POLLMAN ROGERS: Are we talking  
 5 about Western Wireless discovery request 1, your  
 6 first discovery request?  
 7 THE WITNESS: I think this is the  
 8 initial response to the initial discovery requests  
 9 from Western Wireless.  
 10 A And I think there's an error on that. My estimate that  
 11 I've shown on Exhibit 2 filed with my direct testimony,  
 12 for example, for Faith for nonrecurring transport  
 13 charges is \$1,401. And that is the cost of two -- that  
 14 is the installation charge for installing two T-1  
 15 circuits from Faith to Rapid City.  
 16 Q All right. So you'd have those -- then the two T-1s  
 17 and you use two T-1s because there's two cell providers  
 18 in the area?  
 19 A Correct.  
 20 Q All right. And let's just continue to use Faith since  
 21 it's small and hopefully easy.  
 22 A Good place to start.  
 23 Q Yes. And then the transport you have under recurring  
 24 is what --  
 25 MR. SMITH: Mr. Bullock, is there a

1 way you can get that mike around to where it's in  
 2 front of your face? Thank you.  
 3 Q The monthly recurring charge is the monthly charge for  
 4 those two T-1s?  
 5 A \$4,052.  
 6 Q Right. So divide it by two for the cost per each T-1?  
 7 A Or price each T-1 and multiply by two for the cost of  
 8 two of them.  
 9 Q Sure.  
 10 A Yeah. \$4,052 is the price of two from Faith to  
 11 Rapid City.  
 12 Q And I apologize, but the breakdown of your numbers at  
 13 least that I can find, I only have the one set and if  
 14 some of these numbers are wrong -- flip in your book.  
 15 At least the last numbers that I have that you have for  
 16 Golden West -- let's make sure I get the right  
 17 Golden West, Golden West WVK, as you refer to them on  
 18 yours merged.  
 19 Now you have a Philip --  
 20 MS. POLLMAN ROGERS: Excuse me. I  
 21 want to make sure I'm on the same page. Are you  
 22 referring now to this exhibit? Is that what you're  
 23 referring to?  
 24 MR. WIECZOREK: His exhibit,  
 25 Commissioners, does not have any breakdowns of the

1 number of T-1s he's requiring. I'm referring to  
 2 some of the discovery so I understand where some of  
 3 the numbers to the Exhibit R-1-TB came from.  
 4 MR. SMITH: Is that what you're  
 5 looking at, or are we looking at Exhibit 2?  
 6 MS. POLLMAN ROGERS: I guess that  
 7 was my question. I'm having a little trouble  
 8 following.  
 9 MR. SMITH: Are we on R-1?  
 10 MR. WIECZOREK: I guess I'm not sure  
 11 what Exhibit 2 you're looking at. Oh, you're  
 12 talking about Exhibit 2 with the direct? No. I'm  
 13 working --  
 14 Q Let me ask you this, Mr. Bullock. It's my  
 15 understanding R-1-TB incorporates the most recent  
 16 information you have on the costs of all the companies  
 17 you represent with the exception, of course, of the  
 18 corrections that you say that you've caught just  
 19 recently?  
 20 A That's correct.  
 21 Q So I am going to work exclusively off of this document  
 22 since it has all the companies, and it's the most  
 23 recently correct.  
 24 MR. SMITH: Thank you.  
 25 MR. WIECZOREK: I'll refer to some

1 of the discovery because the raw numbers don't  
 2 appear in that document.  
 3 **Q** So in the Golden West merged under Philip you call for  
 4 five T-1s at least in the last discovery responses I  
 5 have. Do you still call for five T-1s?  
 6 **A** Yes.  
 7 **Q** Now would those be the five T-1s -- would those five  
 8 T-1s supposedly go to cellular companies operating in  
 9 that area?  
 10 **A** Yes. We made the assumption that when a telephone  
 11 company reported to us the number of wireless carriers  
 12 operating in their service territory that all carriers  
 13 operated in all exchanges of the rural telephone  
 14 company. We made that assumption. That's true.  
 15 **Q** So you don't have any idea whether there's actually  
 16 five cellular companies operating in the Philip  
 17 exchange area, do you?  
 18 **A** As a way of checking this assumption I went to the  
 19 Cellular One website and looked at the map of  
 20 South Dakota and made the observation that the entire  
 21 state is covered with service availability and that,  
 22 for example, Western Wireless would have the capability  
 23 of providing either roaming or direct service in all  
 24 parts of the state.  
 25 **Q** Well, so are you saying if there's a cellular company

1 **Q** And so you also report the need for five T-1s in Wall.  
 2 **A** Uh-huh.  
 3 **Q** That's a yes?  
 4 **A** Yes. Five in Wall.  
 5 **Q** What are the supposed five cell companies operating in  
 6 the Wall area?  
 7 **A** The five companies that were reported to us for  
 8 Golden West -- yeah. That's a Golden West.  
 9 **Q** Right. I'm still on the same exchanges. I'll tell you  
 10 if I move to a different number.  
 11 **A** Verizon, Western, Viaero, Qwest, and AT&T. Those are  
 12 the five wireless companies that were reported to us as  
 13 providing service in Golden West's territory.  
 14 **Q** Do you know whether AT&T simply roams off of existing  
 15 towers of Cellular One and Verizon?  
 16 **A** No, I don't.  
 17 **Q** So if you actually installed that T-1 in Wall and all  
 18 that AT&T does is roam, that T-1 would just sit empty;  
 19 correct, if there's no direct AT&T traffic?  
 20 **A** I don't know.  
 21 **Q** You report four T-1s necessary for the Pine Ridge  
 22 exchange.  
 23 **A** That's right.  
 24 **Q** What four cell companies supposedly are operating on  
 25 Pine Ridge?

1 out of California, just out of California but that can  
 2 roam nationwide, it should have a point of interconnect  
 3 with every one of these exchanges?  
 4 **A** No.  
 5 **Q** Well, but that's essentially what you're saying here,  
 6 that -- you've picked five for Philip. Where are these  
 7 five companies coming from? Wouldn't you agree that if  
 8 you are on roam on a Western Wireless tower and you  
 9 have that direct point of interconnect, you're going to  
 10 send that over that same point of interconnect, you're  
 11 not going to put it over another point of interconnect  
 12 just because it's on roam with Cellular One?  
 13 **A** No. You're correct.  
 14 **Q** So how are you getting these numbers of T-1s in all of  
 15 these exchanges?  
 16 **A** Well, I'd go back to my earlier statement that we made  
 17 the assumption that when a company reported to us the  
 18 quantity of wireless carriers providing service in the  
 19 territory of that rural telephone company that all of  
 20 the reported wireless carriers provided service to all  
 21 of the exchanges.  
 22 **Q** That's an assumption.  
 23 **A** That's right.  
 24 **Q** You have nothing to back that up.  
 25 **A** That's right.

1 **A** It would be four of the five that I just read off.  
 2 **Q** Excluding which one?  
 3 **A** One company has a direct connection.  
 4 **Q** Western Wireless has a direct connection down there,  
 5 doesn't it?  
 6 **A** I could find that somewhere in my notes.  
 7 **Q** All right. Assume Western Wireless has a direct  
 8 connection.  
 9 **A** Okay.  
 10 **Q** Do you know whether AT&T simply roams on Western  
 11 Wireless's system down there?  
 12 **A** I don't.  
 13 **Q** So if AT&T roams off of Western Wireless, a direct  
 14 connection already exists, doesn't it?  
 15 **A** That would be right.  
 16 **Q** And if you eliminate these T-1s, every time you  
 17 eliminate these T-1s your monthly transport costs drops  
 18 also, doesn't it?  
 19 **A** That's true.  
 20 **Q** You did no independent verification of what cell  
 21 companies were operating in any of the areas you did  
 22 your cost analysis for, did you?  
 23 **A** We asked the companies to report.  
 24 **Q** That's not my question. Did you do an independent  
 25 verification that they're actually operating in those

1 areas?  
 2 A No.  
 3 Q Were you here the other day when Mr. Houdek testified  
 4 on behalf of Venture?  
 5 A I believe so.  
 6 Q Did you know that in their analysis they were actually  
 7 counting cellular companies that didn't even have a  
 8 license to broadcast in the requiring POIs?  
 9 MS. POLLMAN ROGERS: I'm going to  
 10 object to that question as, first of all, not  
 11 relevant, and I'm not sure if this witness was  
 12 present when that testimony was discussed.  
 13 MR. SMITH: I'm going to sustain  
 14 that.  
 15 Q So today you cannot verify to this Commission how many  
 16 of these point of interconnects are actually needed.  
 17 A I don't have independent knowledge of which of these  
 18 wireless carriers operate in individual exchanges.  
 19 Q Right. And, in fact, it's not even -- you would agree  
 20 with me that roam wouldn't count as operating under  
 21 your proposal to require a point of interconnect;  
 22 correct?  
 23 A That's true. Roaming is not direct coverage.  
 24 Q Yes. Looking again at your Exhibit R-1-TB.  
 25 A Uh-huh.

1 A Whether McCook has a direct interconnect with --  
 2 Q With Alliance.  
 3 A Alliance? Alliance Telephone Company?  
 4 Q Yes.  
 5 A No, I don't.  
 6 Q Well, I'm sure you would agree there's probably  
 7 people -- those areas are fairly close -- that call  
 8 each other in those areas?  
 9 A I'm not familiar with their proximity.  
 10 Q Assume people in the Alliance Telephone area actually  
 11 call people in the McCook area. You're not suggesting  
 12 they get a direct interconnect because it's a more  
 13 reliable interconnection, are you?  
 14 A Is this a toll call?  
 15 Q Yeah. Let's assume it's a toll call. I mean, I'm just  
 16 talking about the elements you laid down. You said the  
 17 direct interconnect's more reliable, and that's one of  
 18 the issues. But you would agree direct interconnects  
 19 are not needed between every phone company.  
 20 A In telephone toll traffic there's a considerable track  
 21 record of interexchange carriers providing toll  
 22 service, and I think it's safe to assume that the bugs  
 23 have been worked out of the interfaces that are  
 24 required between exchange access service providers such  
 25 as the local telephone companies were talking about

1 Q Under your LNP nonrecurring costs you have a cost line  
 2 item that says customer notification costs. Do you see  
 3 that?  
 4 A Yes.  
 5 Q And that's to do the -- like a flyer explaining LNP and  
 6 why that's appearing on the bill; correct?  
 7 A Right.  
 8 Q And 1,400 is a reasonable amount to provide that kind  
 9 of a flyer. Wouldn't you agree, \$1,400?  
 10 A For McCook?  
 11 Q Yes.  
 12 A That's what we estimated their cost of producing the  
 13 mailing, paying postage.  
 14 Q Yeah. It wouldn't be appropriate to set one standard  
 15 fee for that for each of your carriers because they  
 16 differ in size?  
 17 A Different numbers of customers that would have to  
 18 receive the notice.  
 19 Q You were here earlier when some of the managers  
 20 testified about the numbers of different direct  
 21 interconnects. You said direct interconnects are more  
 22 reliable; correct?  
 23 A Yes.  
 24 Q Do you know whether McCook has a direct interconnect  
 25 with Alliance?

1 here today and interexchange carriers such as AT&T and  
 2 Sprint that reliably pass information back and forth to  
 3 enable the proper routing of calls and the proper  
 4 rating and identity of the calling party.  
 5 In terms of the exchange of local traffic  
 6 through an intermediate tandem service provider, I'm  
 7 not so sure that's a safe assumption to make.  
 8 Q Yeah. But you're endorsing and trying to have this  
 9 Commission adopt what you're proposing here by the  
 10 argument it's not just for LNP, it could be for other  
 11 calls too.  
 12 A I'm not trying to convince the Commission of any  
 13 particular notion with respect to transport, except to  
 14 give an estimate of what transport of local traffic  
 15 between a local exchange company and a number of  
 16 wireless providers might be.  
 17 Q Okay. One of the second five items you hit was this,  
 18 you have existing agreements that your proposed method  
 19 follows; correct?  
 20 A You mean, the existing Interconnection Agreements?  
 21 Q Right. And so, in fact, the only method you looked at  
 22 for solving this LNP transport problem was the method  
 23 that you're suggesting today here for the Commission;  
 24 correct?  
 25 A That's true.

- 1 Q Because the interconnect agreement -- well, I'll back  
2 up. You didn't even look at what Western Wireless has  
3 proposed when you were doing your cost analysis because  
4 it's your belief the Interconnection Agreement doesn't  
5 allow that. Is that a fair statement?
- 6 A I would say that the reason that we used the approach  
7 we did in estimating transport costs -- I should say  
8 the reasons that we used the approach we did in  
9 estimating transport costs are the reasons that I  
10 outlined earlier.
- 11 Q Right. But the reason you eliminated -- you wouldn't  
12 have even looked at the Western Wireless one because it  
13 doesn't fit within your five criteria. Let's just ask,  
14 did you look at the option that Western Wireless has  
15 proposed when you were doing your cost analysis?
- 16 A It occurred to us that traffic between -- traffic  
17 originating in a wireline exchange carrier destined for  
18 a wireless carrier could go through an intermediate  
19 tandem provider, but when the question arose what's  
20 that going to cost, we did not find any evidence that  
21 there is a current service offering available from  
22 Qwest or SDN and so we didn't think it was a reasonable  
23 approach to imagine that such a service offering might  
24 exist or might be negotiated.
- 25 Q Do you ever call vendors and get ideas of what they

- 1 might have or what they might do on services?
- 2 A No.
- 3 Q You never call vendors?
- 4 A Well, we didn't call Qwest and ask them if they would  
5 be interested in providing a local transport tandem  
6 service.
- 7 Q You also talked about the tariffs because you know the  
8 tariffs are T-1 and, in fact, that's how you get your  
9 recurring costs is because there's a set minimum tariff  
10 on a T-1 line; correct?
- 11 A That's right.
- 12 Q No matter if there's nothing going through that or if  
13 there's -- well, there's a certainly capacity of that  
14 T-1, correct, but if there's nothing going through it,  
15 you pay that every month; right?
- 16 A That's true.
- 17 Q Did you ever look up the Qwest tariffs to see what you  
18 might be able to get on Qwest charges if you routed the  
19 traffic as suggested by Western Wireless?
- 20 A We looked at their -- I think it's called local  
21 interconnection service, license service, and concluded  
22 that that did not address the needs of the rural  
23 telephone companies that are spread across the state,  
24 that it is a -- that it is confined to the service  
25 offering as we understand it is confined within a rate

- 1 center or within a local calling area such as, you  
2 know, Sioux Falls.
- 3 Q But you never called Qwest to see if they had a  
4 different rate or would be willing to carry the  
5 traffic; correct?
- 6 A We relied on publicly available information.
- 7 Q Yeah. Do you work for any companies in the State of  
8 Minnesota, any ILECs?
- 9 A No. Let me make one modification to the answer. We're  
10 working on behalf of Hills Telephone Company.
- 11 Q Okay. Has Hills Telephone Company joined in the  
12 Minnesota Independent Coalition petition in front of  
13 the Minnesota --
- 14 A I believe so.
- 15 Q Have you ever looked at what Minnesota Independent  
16 Coalition is recommending as a solution for LNP?
- 17 A No. And the reason I bring up Hills is --
- 18 Q There's not a question pending. You stated on one of  
19 your internal costs that you figured 120 man hours to  
20 do a certain task. Do you remember that?
- 21 A Intercarrier testing.
- 22 Q Okay. And you used 120 man hours for every company?
- 23 A Uh-huh. That's right.
- 24 Q So you used 120 man hours for Faith, which has just the  
25 one switch; correct?

- 1 A Correct.
- 2 Q And you used 120 man hours for the Golden West  
3 Companies which have multiple switches.
- 4 A Correct.
- 5 Q No economies of scale there.
- 6 A It's pretty much the same amount of work whether you  
7 have 10 switches or one switch to work out the kinks in  
8 understanding what you must do to hand off traffic from  
9 one local service provider to another local service  
10 provider, which is something that if not all, most of  
11 these companies have not done before.
- 12 Q Okay. So all of these Golden West related companies,  
13 they could have 120 hour billing for that because they  
14 could economize of scale on that?
- 15 A Could you repeat that.
- 16 Q Well, there's multiple Golden West -- there's  
17 Golden West the Armour one, Golden West the Kadoka one,  
18 Sioux Valley, which is part of Golden West. So they  
19 could just do the 120 hours one time between those  
20 three Dockets, couldn't they?
- 21 A The reason that Golden West family of companies is  
22 grouped into three groups is that we understood the  
23 Golden West Vivian and Kadoka group to share a staff  
24 among the three of them, the Armour  
25 Bridgewater-Canistota Union group to share a staff

1 among them, and Sioux Valley was separate, a distinct  
 2 staff. And when I say staff I mean switching  
 3 technicians and the people who would be primarily  
 4 involved with this intercarrier testing work.  
 5 **Q** You also talked about man hours to fill out forms and  
 6 enter into agreements with wireless carriers on  
 7 porting; correct?  
 8 **A** Correct.  
 9 **Q** Are you familiar with SDTA here in South Dakota?  
 10 **A** Yes.  
 11 **Q** Do you know that SDTA has negotiated some of these  
 12 agreements with wireless carriers so their individual  
 13 carriers don't have to do that?  
 14 **A** I was not aware of that.  
 15 **Q** That would save everybody costs, wouldn't it, if you  
 16 had one person negotiate on behalf of all the  
 17 companies?  
 18 **A** I would have to know about it before I could answer  
 19 that question.  
 20 MR. WIECZOREK: That's all I have.  
 21 MR. SMITH: It is after noon. Do  
 22 you want to take a break now?  
 23 MR. WIECZOREK: Just with the  
 24 understanding that Mr. Williams has a flight to  
 25 catch so if we take a break and then come back,

1 getting him on the stand --  
 2 CHAIRMAN SAHR: Let's go off the  
 3 record.  
 4 (Discussion off the record)  
 5 (A lunch recess is taken)  
 6 MR. SMITH: We're back in session  
 7 following our noon recess. Mr. Bullock, you're  
 8 still under oath.  
 9 Did I ask you, Mr. Koenecke, if you had  
 10 questions?  
 11 MR. KOENECKE: You did not.  
 12 MR. SMITH: I have done so.  
 13 MR. KOENECKE: I will.  
 14 CROSS-EXAMINATION  
 15 BY MR. KOENECKE:  
 16 **Q** Mr. Bullock, my name is Brett Koenecke. I'm a lawyer  
 17 from Pierre, and I represent Midcontinent  
 18 Communications.  
 19 **A** Good afternoon.  
 20 **Q** How are you today?  
 21 **A** Good.  
 22 **Q** Good. I want to direct your attention to your  
 23 Exhibit 2 of your direct testimony, I believe it is.  
 24 And I'm just looking at the first --  
 25 **A** Excuse me. I may need some help finding what document

1 you're referring to.  
 2 **Q** I'm looking at Alliance merged Exhibit 2, and I'm just  
 3 using it for demonstrative purposes. It would be  
 4 Exhibit 2 is your direct testimony, isn't it?  
 5 **A** Okay.  
 6 MR. SMITH: Which number is  
 7 Alliance?  
 8 MR. KOENECKE: It's just the top  
 9 one.  
 10 **Q** With respect to the costs for local number portability  
 11 that you've outlined there, which of those, if any,  
 12 would be applicable to be representative of the costs  
 13 in wireline to wireline portability?  
 14 **A** I would say all of these costs except transport. My  
 15 understanding is in an environment where you have  
 16 wireline to wireline number porting there is a wireline  
 17 competitor with a physical presence in the exchange  
 18 where the incumbent provides service. Otherwise, the  
 19 new competitor wouldn't be able to provide service  
 20 there without a physical presence. And so the  
 21 transport costs would be greatly reduced.  
 22 **Q** Would they completely go away?  
 23 **A** Any time you connect networks together you bear  
 24 additional costs simply due to connecting them  
 25 together. Competition is not always a cost reducer.

1 Because of the large fixed costs associated with  
 2 offering a service like telecommunications, when you  
 3 connect two competitors together you have costs  
 4 associated with the physical connection.  
 5 So transport wouldn't be zero, but you would  
 6 not have these long distance transport requirements  
 7 that we do if we're talking about a competitor whose  
 8 point of interconnection is far away from the exchange.  
 9 **Q** I didn't see anywhere in your testimony, either direct  
 10 or rebuttal, where you've calculated or made the  
 11 calculations with respect to a wireline to wireline  
 12 portability. Is that correct, you have not made those  
 13 calculations?  
 14 **A** That's true. We did not identify any costs as being  
 15 specifically related to wireline to wireline  
 16 portability.  
 17 **Q** Okay. And that goes for all of the companies on whose  
 18 behalf you're here today?  
 19 **A** Yes. That would be generally true of all of the  
 20 Petitioners.  
 21 **Q** I'm trying to recall where in your matrix of costs the  
 22 T-1s are reflected.  
 23 **A** In the Exhibit 2 documents?  
 24 **Q** Yes.  
 25 **A** We used the term nonrecurring transport charges to

1 refer to the installation costs of the T-1 circuits,  
 2 and we used the term transport to refer to the monthly  
 3 recurring costs of those T-1 circuits.  
 4 **Q** So the nonrecurring transport charges on Exhibit 2 for  
 5 Alliance merged or any other Exhibit 2 would be not  
 6 applicable in wireline-to-wireline LNP?  
 7 **A** There would be -- depending on how far away this local  
 8 wireline competitor's point of interconnection is from  
 9 the incumbent LEC's central office, there would be some  
 10 amount of transport expense. But essentially it would  
 11 be from one side of the exchange to the other side of  
 12 the exchange at most.  
 13 **Q** The estimates that you've put together are simply  
 14 estimates that you've got no experience with in the  
 15 shall we say real world yet; is that correct?  
 16 **A** Well, I have some personal experience with developing  
 17 new procedures in the small organization. I have some  
 18 idea from personal experience how long it takes to  
 19 train people on new processes. But in terms of  
 20 implementing this particular service, I have not  
 21 implemented local number portability in any  
 22 environment.  
 23 MR. KOENECKE: Nothing further.  
 24 Thank you.  
 25 MR. SMITH: Ms. Wiest.

1 carriers and porting back. Not 100 percent.  
 2 We don't expect everyone who ports out to  
 3 come back, but we would assume some portion of those  
 4 who port out to a wireless carrier will change their  
 5 minds and port that number back to a wireline phone.  
 6 **Q** So was your number dependant on the number of wireless  
 7 carriers currently serving the area?  
 8 **A** No.  
 9 **Q** Okay. But it wasn't specific for Western Wireless, it  
 10 was assuming those carriers were operating, a number of  
 11 carriers were operating in the area?  
 12 **A** Well, our estimates of porting volumes are irrespective  
 13 of the identity of any particular wireless carrier.  
 14 **Q** For the nonrecurring transport charges, for each T-1  
 15 was that number you assigned to that \$564; is that  
 16 correct?  
 17 **A** Not in all cases.  
 18 **Q** Is it within that range, around that?  
 19 MR. SMITH: Mr. Bullock, can I have  
 20 you move that mike a little closer too, please.  
 21 Thank you.  
 22 **A** You're talking about nonrecurring?  
 23 **Q** Yes.  
 24 **A** Transport charges per T-1?  
 25 **Q** Yes.

1 MS. AILTS WIEST: Thank you.  
 2 CROSS-EXAMINATION  
 3 BY MS. AILTS WIEST:  
 4 **Q** Mr. Bullock, how did you come up with your estimated  
 5 ports, your estimation for number of ports for each  
 6 company?  
 7 **A** We assumed that if the companies are denied suspension  
 8 of LNP requirements that the wireless competitors, the  
 9 companies that provide service in the telephone  
 10 companies' service areas, are likely to begin a fairly  
 11 aggressive marketing campaign to attract customers and  
 12 that despite the fact that very little interest has  
 13 been expressed up to this point, that we're aware of  
 14 among the customer base of the rural telephone  
 15 companies, such an aggressive marketing campaign may  
 16 generate some interest and may generate some customers'  
 17 porting activity.  
 18 And we also assumed that some of those  
 19 customers would port back to the wireline telephone  
 20 company. Now we didn't do any really scientific  
 21 analysis of this, but we used our judgment. These are  
 22 just judgments, estimates, because there is no -- there  
 23 is no track record in number porting in rural areas.  
 24 We can't base this on experience. But the estimates  
 25 that we have set forth include porting out to wireless

1 **A** I don't see 500. Did you mention \$534?  
 2 **Q** \$564.  
 3 **A** 64. \$564 represents the sum of two numbers.  
 4 **Q** Okay.  
 5 **A** One of those numbers is the price of the nonrecurring  
 6 price of a NECA channel termination, and the other  
 7 number is the price of an RBOC channel termination. So  
 8 the \$564 represents part of the cost of installing a  
 9 T-1 from an independent LEC to an RBOC end point.  
 10 **Q** Okay.  
 11 **A** Some of the T-1s that we priced are within an ILEC's --  
 12 an independent telephone company's service area. These  
 13 are in the cases where we assumed that a phone company  
 14 that currently has a local tandem that's part of their  
 15 network to gather up toll traffic from other end  
 16 offices for delivery to SDN would utilize the same  
 17 local tandem switch for gathering up local traffic for  
 18 delivery over this T-1 off to Sioux Falls or  
 19 Rapid City, whichever half of the state the wireless  
 20 carrier's point of interconnection is assumed.  
 21 Part of our estimate of transport costs  
 22 includes additional T-1 circuits from the end offices  
 23 to the local tandem to carry this new local traffic.  
 24 So in those cases we have the price of a NECA channel  
 25 termination at each end of the T-1.

1 Q Okay.

2 A Now in the case of a T-1 that goes between an

3 independent telephone company and a Qwest end point

4 we've also included the access order charge of \$136 as

5 part of the total price of installing that circuit. So

6 the total for a T-1 circuit going from an independent

7 telephone company to a Qwest end point is \$700.25.

8 Q Thank you. And then when you came up with your cost

9 per line per month is that intended to reflect an

10 actual end-user surcharge?

11 A We calculated two different kinds -- actually four

12 different kinds of LNP costs per line per month

13 amounts.

14 Q Right. If you just look at the one excluding

15 transport?

16 A Okay.

17 Q With or without surcharges and taxes, is that what you

18 would expect to actually be something that a company

19 could charge as a surcharge?

20 A No.

21 Q Okay.

22 A This is intended to represent an estimate of what the

23 surcharge might be. My advice to an independent

24 telephone company would be to not base their surcharge

25 on an estimate that's prepared in advance of

1 A And so there would be no tandem service provider from

2 whom to obtain information.

3 Q And then could you go to page 18 that would be on your

4 introductory, Bullock Exhibit 1. You discuss your

5 options A and option B around lines 15 and 16?

6 A Yes.

7 Q Could you just briefly explain what is the difference

8 between option A and option B? Are either one of those

9 an automated system or not?

10 A Option A is an arrangement whereby the independent --

11 or the service provider who's porting numbers would

12 place a telephone call and speak with a human being and

13 communicate information over the phone about a number

14 porting event.

15 Option B --

16 Q Just one question on that. That wouldn't be the use of

17 the number portability administration help desk, would

18 it? That's something different?

19 A I'm bound by a nondisclosure agreement. I can't

20 reveal --

21 Q Go ahead.

22 A -- the information that I agreed not to disclose.

23 Option B is a service offering whereby the telephone

24 service provider uses a web browser with a job

25 application embedded in it to gain dial-up access to

1 implementation. My advice to them would be to wait to

2 calculate their surcharge amount and file a tariff

3 until after they have implemented LNP and they have

4 actual historical cost information for the

5 implementation phase and some amount of a track record

6 of ongoing costs that they could project into the

7 future, estimate how much ongoing cost would there be

8 over five years and use that as the basis of their

9 tariff filing.

10 Q And I know in your summary statements you listed the

11 advantages of going through direct connections. What

12 would be the advantages of using an SDN or Qwest

13 tandem?

14 A It would probably be lower cost. Depending on the

15 capability of the tandem switch, you might be able to

16 obtain from the tandem provider some information about

17 the source of traffic that's coming to the independent

18 telephone company. I can't think of any other

19 advantages.

20 Q Your second one, how is that an advantage over a direct

21 connection? Wouldn't you be able to do that with a

22 direct connection?

23 A Well, with a direct connection there would be no tandem

24 service provider.

25 Q Yeah. I know.

1 the number portability administration center's computer

2 for the purpose of performing inquiries about pending

3 porting events and entering information into the number

4 portability administration center's computer regarding

5 new porting events.

6 Q Is that considered to be an automated system or not?

7 Do you know?

8 A I am sure some people would consider it to be an

9 automated system, but I should add that on my way to

10 Pierre I stopped in at a telephone company's office

11 where they are using what I call SOA option B and heard

12 a number of complaints about the difficulty that they

13 have in terms of time delays and due to the dial-up

14 nature of the connection some questionable reliability

15 about that connection and, you know, an extended call

16 basis. If you're familiar with dial-up Internet, I'm

17 sure you can appreciate what I'm talking about.

18 Another of their complaints was in order to

19 use this SOA option B they had to go to the back room

20 and find an old computer because it requires an older

21 version of Windows that they -- than what they use in

22 the front office and had to find an old version of

23 Netscape to run it on.

24 Q Uh-huh.

25 A So it utilizes computer technology. You're not

1 entering porting information over a telephone to  
2 another human being. And they also pointed out that  
3 even though they're using this SOA option B, which is a  
4 computer-based mechanic mix, that there are cases where  
5 they have to utilize what I've called SOA option A and  
6 actually place a call to a person and discuss the  
7 information that has been entered on the computer  
8 screen.

9 So I wouldn't call SOA option B a fully  
10 automated SOA.

11 **Q** Just going back to option A, if the FCC would shorten  
12 the porting interval, would the companies still be able  
13 to utilize option A? Do you know?

14 **A** My understanding of the proposal that is currently in  
15 front of the North American Numbering Council regarding  
16 shortening the porting interval for wireline ports from  
17 four days to two days would require investments in  
18 computer systems unrelated to the service order  
19 administration function.

20 **Q** Oh, okay.

21 **A** But the service order administration function would not  
22 really be a factor in the time frames that the current  
23 proposal lays out. The computer system investments  
24 that I'm talking about in association with reducing the  
25 porting interval down to two days are to facilitate a

1 CHAIRMAN SAHR: Yes.  
2 THE WITNESS: And the scenario also  
3 that I think Dennis Law described where a call  
4 originating from let's say California to a number  
5 that has been ported out of switch A and into  
6 switch B would have to terminate first at switch A  
7 and then be call-forwarded over some facility to  
8 switch B, that is switch A, the switch from which  
9 the number has been ported, is still a necessary  
10 part of the call train from calling party to called  
11 party.

12 Further, I think the FCC took note of the fact  
13 that there are some technical shortcomings  
14 associated with what they call interim number  
15 portability or this remote call-forwarding method  
16 and back in the late '90s indicated that it was not  
17 an appropriate mechanism for a reliable  
18 implementation of the number portability capability  
19 as envisioned by the '96 Act.

20 CHAIRMAN SAHR: What are the  
21 limitations in particular?

22 THE WITNESS: When you take this  
23 incoming call from California and terminate it on  
24 switch A, what follows in the handoff or the  
25 forwarding of the call from switch A to switch B is

1 replacement of what we have in our estimates envisioned  
2 as an exchange of facsimiles between a new service  
3 provider and old service provider for the local service  
4 request and confirm order confirmation going back and  
5 forth, to replace that with an electronic interface  
6 between computer systems.

7 And so under that scenario there would be  
8 significant additional costs that are not part of any  
9 of these estimates.

10 MS. AILTS WIEST: Thank you. That's  
11 all I have.

12 MR. SMITH: Commissioners, do you  
13 have questions of Mr. Bullock?

14 Chairman Sahr.

15 CHAIRMAN SAHR: I have a couple.  
16 Mr. Bullock, are you familiar with the idea of  
17 interim number portability?

18 THE WITNESS: Somewhat.

19 CHAIRMAN SAHR: In the wireline to  
20 wireline context could you talk about how that  
21 would work and what the costs might be associated  
22 with that?

23 THE WITNESS: Well, my understanding  
24 is, I think, similar to what I heard you say  
25 earlier about remote call-forwarding.

1 that you lose some information about the original  
2 calling party.

3 CHAIRMAN SAHR: Caller ID?

4 THE WITNESS: Caller ID, calling  
5 name delivery, that sort of thing.

6 CHAIRMAN SAHR: The question that I  
7 think is probably most significant is what are the  
8 cost effects of that type of scenario?

9 THE WITNESS: I think the cost  
10 effects would vary greatly, depending on the  
11 particular calling scenario that you're  
12 envisioning. Is this a call from California to a  
13 South Dakota number that's been ported from a  
14 wireline carrier in a particular exchange to  
15 another wireline carrier in the same exchange, or  
16 are you talking about a call that originates in a  
17 South Dakota exchange to a number in that same  
18 exchange that's been ported to a wireless carrier?  
19 I'm sorry. Are you excluding porting to wireless  
20 carriers in your consideration here?

21 CHAIRMAN SAHR: Yes.

22 THE WITNESS: So you're --

23 CHAIRMAN SAHR: Wireline to  
24 wireline.

25 THE WITNESS: Only?

901

1 CHAIRMAN SAHR: Right.  
 2 THE WITNESS: At the moment I don't  
 3 see any significant cost differences between this  
 4 interim remote call-forwarding mechanism versus  
 5 what's called the long-term number portability  
 6 method with the location routing number  
 7 architecture.  
 8 But, as I said before, I don't have a full  
 9 understanding of the implications. At this point I  
 10 don't see differences.  
 11 CHAIRMAN SAHR: So you're saying  
 12 that it would cost the same as your other cost  
 13 estimates that you've --  
 14 THE WITNESS: I'm saying that I'm  
 15 unable to say it would be different. I'm not  
 16 saying it would be the same. I'm saying I don't  
 17 know enough to identify any differences.  
 18 CHAIRMAN SAHR: Can most of the  
 19 companies currently call-forward --  
 20 THE WITNESS: I know for certain  
 21 that Seaman switches and Nortel DMS-10s -- Seaman's  
 22 DCO switches, which were utilized by Sioux Valley,  
 23 and Nortel DMS-10 switches, which were used by  
 24 several of the Petitioners I'm testifying for, do  
 25 have remote call-forwarding capability.

902

1 I think it's also true that Mytel switches  
 2 have remote call-forwarding capability, but I don't  
 3 have personal experience. I don't know.  
 4 CHAIRMAN SAHR: And I appreciate  
 5 your acknowledging where you're not entirely sure.  
 6 Where that technology is available can you identify  
 7 some other significant costs, or are we talking  
 8 about it being relatively inexpensive or do you not  
 9 know?  
 10 THE WITNESS: As I said before, I am  
 11 not able to identify any significant cost  
 12 differences between the two methods in terms of --  
 13 are you talking about transport or all costs?  
 14 CHAIRMAN SAHR: All costs.  
 15 THE WITNESS: Oh, I'm sorry. With  
 16 the interim number portability technology there is  
 17 no need to buy this LNP software and install it in  
 18 your switch. There is further no need to launch  
 19 queries. What we call the LNP query expenses would  
 20 not occur. I think all of the other cost  
 21 categories would apply.  
 22 CHAIRMAN SAHR: So you're saying the  
 23 savings would be in those areas you'd still have  
 24 transport issues?  
 25 THE WITNESS: Well, in the case of

903

1 wireline-to-wireline porting, as I said before, the  
 2 cost of transporting within an exchange I think  
 3 it's safe to say is far less than transporting  
 4 50 miles, 100 miles, 200 miles across South Dakota.  
 5 CHAIRMAN SAHR: Because in some of  
 6 these Dockets, as I'm sure you know, we are not  
 7 only dealing with wireline to wireless but also  
 8 wireline-to-wireline porting.  
 9 THE WITNESS: Yes.  
 10 CHAIRMAN SAHR: So what I'm trying  
 11 to do is get a grasp on that because I'm  
 12 anticipating that that's going to be proposed as a  
 13 lower cost or very low cost alternative by one of  
 14 the Petitioners. I'm just trying to get your  
 15 opinion as to whether or not that is an accurate  
 16 statement when comparing it to the economic  
 17 benefits that may follow that type of competition.  
 18 THE WITNESS: Yes. As you're  
 19 speaking, I'm thinking, and in our analysis of  
 20 switch upgrade costs in most cases, and I'll  
 21 exclude Mytel for a second because they're  
 22 different, but in the Seaman's and Nortel switches  
 23 with interim number portability you would not -- as  
 24 I said a moment ago, you would not have the LNP  
 25 software that the switch manufacturers sell. That

904

1 would not be required for interim number  
 2 portability.  
 3 Further, you would not be required to perform  
 4 any of these translations involving the location  
 5 routing number. There would not be a location  
 6 routing number in the interim number portability  
 7 situation. And so the entire cost category of  
 8 switch upgrade costs would go to zero.  
 9 CHAIRMAN SAHR: What are the  
 10 potential downsides to an order that would include  
 11 interim number portability? Is there some big  
 12 picture part of this that I'm missing if the costs  
 13 are lower?  
 14 THE WITNESS: You're asking me  
 15 what's the downside, what are the disadvantages --  
 16 CHAIRMAN SAHR: Well, is there some  
 17 reason why -- I'll pose it this way: If we were to  
 18 look on the wireline to wireline context in some of  
 19 these exchanges where the upgrades that you  
 20 outlined would not be necessary and were to  
 21 evaluate that and consider using this remote  
 22 call-forwarding as a method of number portability  
 23 and realizing I do understand the loss of caller ID  
 24 information and those type of things that can  
 25 happen, what are some of the other downsides to

1 pursuing that type of number portability?  
 2 I'm just trying to make sure I get both sides  
 3 of the story here as far as the remote  
 4 call-forwarding's concerned.

5 THE WITNESS: Well, due to the  
 6 nature of the routing of the calls, as I said a  
 7 moment ago, the switch from which the number has  
 8 been ported remains involved in each call to that  
 9 number. There's no way to bypass the old service  
 10 provider's switch.

11 And so in general that represents a kind of  
 12 inefficient utilization of switching resources.  
 13 I'm not certain how significant that is in the case  
 14 of a small telephone company. There may be  
 15 situations where this sort of pass-through traffic  
 16 would create a burden, and I'm assuming there would  
 17 be situations where it would not. But my problem  
 18 is in identifying those for you. I just don't know  
 19 enough about the individual characteristics of the  
 20 companies to be able to identify them.

21 MR. SMITH: Mr. Bullock, I have a  
 22 couple of questions following up on Chairman Sahr.  
 23 I mean, one of the negatives of the interim  
 24 solution -- you basically touched on that -- is  
 25 that the functionality that the FCC construed the

1 wanted to clarify that.  
 2 MR. SMITH: Exactly.  
 3 THE WITNESS: Yes. There would  
 4 still be terminating access revenue for the owner  
 5 of what I've called switch A.

6 MR. SMITH: Thank you. Ms. Rogers.  
 7 REDIRECT EXAMINATION

8 BY MS. POLLMAN ROGERS:  
 9 Q Mr. Bullock, I have just a few questions on redirect.  
 10 First of all, with regard to some questions addressed  
 11 to you concerning CMRS carriers or wireless carriers in  
 12 the service areas of the companies that you represent  
 13 here.

14 My question to you is did you ask for those  
 15 wireless carriers that were licensed to do business in  
 16 the service areas, or did you ask for those who were  
 17 either doing business or providing service within those  
 18 areas?

19 A The questions we put to the telephone companies when we  
 20 asked them to report this information are -- I should  
 21 say the instructions that we provided to the telephone  
 22 companies when we asked them to provide this  
 23 information is contained in what I marked as Exhibit C2  
 24 to my introductory direct testimony. And in that  
 25 exhibit where we describe -- where we're asking the

1 Congress as wanting under its local number  
 2 portability regime is just not really there, is it,  
 3 with the interim solution?

4 THE WITNESS: That's the call that  
 5 the FCC made.

6 MR. SMITH: I mean, do you share  
 7 that opinion?

8 THE WITNESS: Yes.

9 MR. SMITH: So the person who elects  
 10 to use the porting option, he's not going to get  
 11 the same bang for his buck out of an interim  
 12 solution as true LNP.

13 THE WITNESS: I think that's a fair  
 14 statement, yes.

15 MR. SMITH: I mean, there would be  
 16 some burden on the switch with the interim  
 17 solution, but in the case at least of incoming toll  
 18 traffic would there not be an offsetting benefit in  
 19 the form of terminating access revenues?

20 MS. POLLMAN ROGERS: Excuse me just  
 21 a minute. Could we clarify I was of the impression  
 22 that we were talking about wireline to wireline  
 23 here.

24 MR. SMITH: Right.

25 MS. POLLMAN ROGERS: Okay. I just

1 companies to fill in wireless carriers requesting LNP,  
 2 the instruction is, "Enter under primary data the  
 3 number of wireless carriers from whom you have received  
 4 requests for LNP. Please name these carriers in the  
 5 supplemental data column."

6 And there's another question or another  
 7 instruction, "Other wireless carriers operating in your  
 8 area." And the detailed instruction is, "Enter under  
 9 primary data the quantity of other wireless carriers,  
 10 those not included in line 10, providing service in the  
 11 area served by your company and please name them."

12 And then we asked about direct trunking. But  
 13 the phrase we used was --

14 Q Operating in your area.

15 A Providing service in the area served by your company.

16 Q Okay. Providing service. Okay. So if a wireless  
 17 carrier was providing service in the service area of  
 18 one of the companies that you represent, that carrier  
 19 would be sending traffic to and receiving traffic from  
 20 the landline LEC; is that correct?

21 A That was my understanding.

22 Q And they would be using some sort of facilities to do  
 23 this?

24 A Yes.

25 Q You were asked some questions concerning transport

1 costs, and I'd direct you back to your earlier  
2 testimony. And in particular in the summary of your  
3 testimony I believe you stated that you placed the  
4 transport costs for LNP in a different category. I  
5 think that's the way you stated or something to that  
6 effect.

7 My question to you is those transport costs  
8 for LNP that are in a different category, in your  
9 opinion who should bear the cost for the transport  
10 costs?

11 MR. WIECZOREK: I'm going to object.  
12 It's beyond the scope. He was a cost witness.  
13 He's not a public policy witness.

14 MR. SMITH: I'm going to overrule  
15 the objection.

16 A To my understanding there is no obligation placed on  
17 wireline telephone companies to pay the cost of  
18 transporting any kind of traffic beyond the boundaries  
19 of their exchanges.

20 Now when we had some discussion about  
21 wireline-to-wireline porting and I was trying to  
22 characterize transport costs from one side of the  
23 exchange to the other side of the exchange, my  
24 understanding is the two competitors, the incumbent  
25 from the newcomer, would share that transport cost

1 within an exchange. This is local service as both  
2 parties define local service.

3 But when we look at transport costs to  
4 deliver traffic to wireless carriers that have not  
5 already established a point of interconnection within  
6 the boundaries of the exchange where they're porting  
7 numbers from, there is a new cost that goes far beyond  
8 transporting within the exchange.

9 Q And who should bear that cost?

10 MR. WIECZOREK: Same objection.

11 MR. SMITH: Overruled.

12 A I have an opinion about whose responsibility it does  
13 not fall on.

14 Q Okay. I'll ask the question that way. What's your  
15 opinion as to whose responsibility it is not to bear  
16 the transport costs?

17 A It's my position that the wireline local exchange  
18 carrier bears no responsibility for transporting  
19 traffic beyond its exchange boundaries.

20 Q Okay. Thank you. I believe it was Ms. Wiest that  
21 asked you about advantages of utilizing either Qwest or  
22 SDN as a transport and what were some of those  
23 advantages. And when you said -- you maybe listed a  
24 couple of potential advantages, but when you said that  
25 one of those advantages of using Qwest or SDN for

1 transport might be a lower cost, I take it that lower  
2 cost as you were responding to that question does not  
3 address the shift in costs that would occur from  
4 today's architecture to the ILEC with Western  
5 Wireless's transport proposal?

6 A Regardless of the mechanism that's used to deliver this  
7 traffic from the wireline exchange carrier to a  
8 wireless switch, I maintain that it is not the  
9 responsibility of the wireline carrier to pay that  
10 cost.

11 Q I want to draw your attention to a couple of the -- a  
12 couple of your exhibits with regard to some of the  
13 companies, and I think that this was included in some  
14 comments that you were going to make with regard to  
15 your individual company exhibits.

16 First of all, I would draw your attention to  
17 the City of Faith. And I think that you had a comment  
18 to make with regard to the switching costs in the  
19 exhibits for Faith?

20 A I left those notes in my jacket. It's right here.

21 Q Okay.

(Witness retrieves notes)

22 A The City of Faith regarding switch upgrade costs, on  
23 the Exhibit 1 filed with our petition Faith had  
24 reported to us an estimated switch upgrade cost of  
25

1 \$47,802. When we later received the quotation that  
2 Faith had received from a consulting firm, we  
3 discovered that that cost was for providing both LNP  
4 and CALEA capability.

5 And so for our Exhibit 2 filed with my direct  
6 testimony we utilized the methodology that I have  
7 earlier described for Exhibit 2, switch upgrade costs,  
8 which was we used the standard Mytel pricing policy for  
9 LNP capability, and that amount was \$14,668.

10 Q So you actually reduced your switch upgrade costs from  
11 Exhibit 1 to Exhibit 2 to exclude anything other than  
12 the LNP upgrade necessary.

13 A That's true.

14 Q Then I would direct your attention to the comparison  
15 exhibit -- whatever it's called. And I believe it's  
16 Tri-County. It is R-1-TB. Are you with me?

17 A Yes.

18 Q On the switch upgrade costs for Tri-County you have  
19 included \$10,640 to the actual switch upgrade costs.  
20 And I would ask you today would that additional  
21 expenditure allow Tri-County to implement LNP?

22 A No. Tri-County has some ancient DMS-10s and to  
23 actually provide LNP they would have to replace both of  
24 their switches. Their owner told me over the phone --

25 Q I think that might be hearsay so I'll stop you before

1 you go there.  
 2 A Okay.  
 3 Q Would the bottom line then be for Tri-County to  
 4 implement LNP the actual costs would be greater than  
 5 what you have set forth in this exhibit?  
 6 A Definitely. Definitely, yes.  
 7 Q With regard to a question that Mr. Koenecke asked you,  
 8 and I see he's now been replaced, I think I understood  
 9 you to answer this, that all the costs identified in  
 10 your Exhibits 2 with the exception of transport would  
 11 apply to wireline to wireline, and it's my  
 12 understanding that you just did not prepare a separate  
 13 exhibit for those. Is that correct?  
 14 A Yes.  
 15 MS. POLLMAN ROGERS: That's all.  
 16 MR. COIT: No questions.  
 17 MR. WIECZOREK: A couple.  
 18 RE-CROSS-EXAMINATION  
 19 BY MR. WIECZOREK:  
 20 Q If Tri-County would upgrade their switches, that would  
 21 reduce costs on their maintenance of their current  
 22 switches; right?  
 23 A Their current switches would be retired from service.  
 24 Q Right. But I'm assuming these ancient switches have a  
 25 higher maintenance cost and more issues related with

1 them than a new switch would.  
 2 A Part of the reason they're so ancient is there has been  
 3 hardly any maintenance performed on them.  
 4 Q And due. Faith upgrade, that was a switch upgrade that  
 5 was unnecessary for LNP; correct?  
 6 A The original Exhibit 1 included both LNP and a separate  
 7 function.  
 8 Q Okay. When we talked about how many points of  
 9 interconnect you would need we were talking about Wall  
 10 before and Ms. Rogers has taken to you the question  
 11 that you submitted to these managers, you would agree  
 12 with me that you have no idea whether the identified  
 13 wireless carriers providing service provided to you by  
 14 the managers, that you have no idea whether they are  
 15 selling their service and using somebody else's  
 16 infrastructure to route the calls, meaning another  
 17 wireless company to route the calls?  
 18 A The assumption I made was that in response to the  
 19 instructions that I've just read using the phrases  
 20 wireless carriers operating in your area and wireless  
 21 carriers providing service in the area served by your  
 22 company was that the responses that we would receive  
 23 would reflect wireless carriers with towers and radio  
 24 transmission.  
 25 Q But you didn't ask it that way, did you?

1 A That's right.  
 2 Q And, in fact, when we talked about Wall before you  
 3 talked about AT&T wireless being one of the companies?  
 4 A That was reported to us.  
 5 Q And Qwest?  
 6 A Correct.  
 7 Q And I believe there was five companies, Verizon and  
 8 Cell One being the other, and which was the fifth? Do  
 9 you recall?  
 10 A For?  
 11 Q Wall.  
 12 A The company name is Golden West?  
 13 Q It's Golden West, yes. It's the big Golden West  
 14 West River.  
 15 A Golden West Vivian Kadoka?  
 16 Q Right.  
 17 A Viaero, Western, Verizon, Qwest, and AT&T.  
 18 Q Did you go to the FCC and see if any of those people  
 19 had actually a license to broadcast in that area?  
 20 A No.  
 21 Q You didn't do that for any of these cell companies, you  
 22 just took the names of anybody they said was providing  
 23 service and assumed they needed points of interconnect;  
 24 correct?  
 25 A That's true.

1 Q You think the independent rural LECs shouldn't have to  
 2 pay for transport; correct?  
 3 A Correct.  
 4 Q So is it your testimony here that a cellular company  
 5 should have to pay the transport under your plan?  
 6 A It's my position that a local interexchange -- I'm  
 7 sorry. A local wireline exchange carrier bears no  
 8 responsibility for paying the cost of transporting  
 9 traffic beyond its exchange boundaries.  
 10 Q All right. But my question is -- well, let me ask it  
 11 this way: If the cellular companies are going to have  
 12 to -- under your position to get LNP they're going to  
 13 have to pay for their own transport, shouldn't they get  
 14 to pick how to transport as opposed to using your most  
 15 expensive transport mechanism?  
 16 A If it can route traffic correctly, then I would think  
 17 it would be an appropriate mechanism for carrying that  
 18 traffic.  
 19 Q All right.  
 20 MR. WIECZOREK: Thank you. Nothing  
 21 further.  
 22 MR. SMITH: Mr. Koenecke -- or  
 23 Mr. Gerdes.  
 24 MR. GERDES: Mr. Koenecke has no  
 25 questions.

1 MR. SMITH: Ms. Wiest.  
 2 RECROSS-EXAMINATION  
 3 BY MS. AILTS WIEST:  
 4 Q For Tri-County you stated they needed a new switch.  
 5 When did you find that out?  
 6 A I don't have that information in front of me, and my  
 7 recollection is that I learned that about six weeks ago  
 8 approximately.  
 9 Q Then why wasn't it included in --  
 10 A Because I thought it was irrelevant to the LNP  
 11 implementation cost. I wanted to provide it here so  
 12 the Commission would have an understanding that in at  
 13 least one case the cost of implementing LNP can go far  
 14 beyond the costs of providing LNP as defined by the  
 15 FCC's regulations in terms of cost recovery through the  
 16 end-user charge.  
 17 It's not our position that this huge switch  
 18 replacement cost is eligible to be included in an LNP  
 19 end-user charge, but if Tri-County does not receive a  
 20 suspension of the LNP requirements and Tri-County  
 21 proceeds to implement LNP, they have to replace their  
 22 switches, and it will cost them a lot of money to do  
 23 that.  
 24 MS. AILTS WIEST: Thank you. That's  
 25 all I have.

1 to select the mechanism deployed for --  
 2 VICE CHAIR HANSON: Uh-huh. And  
 3 would you agree with that? Wouldn't it follow?  
 4 THE WITNESS: I can't see anything  
 5 wrong with that line of reasoning.  
 6 VICE CHAIR HANSON: So if the  
 7 wireless company were to say --  
 8 THE WITNESS: At this point --  
 9 VICE CHAIR HANSON: -- we want to --  
 10 I'm not sure how much of the testimony you were  
 11 here for but you did refer to the peacock and the  
 12 flip side of the peacock is the wireless proposal.  
 13 So it sounds to me like you're testifying that as  
 14 long as the wireless companies are willing to pay  
 15 for their proposal that that should be okay.  
 16 THE WITNESS: I guess if they're  
 17 paying the freight, they can pick the railroad.  
 18 VICE CHAIR HANSON: Okay. Thank  
 19 you.  
 20 MR. SMITH: With respect to the  
 21 upgrading of Tri-County, I mean, is that a --  
 22 that's a scheduling issue; right? Because they're  
 23 not going to be able to keep operating with that  
 24 equipment forever, or are they?  
 25 THE WITNESS: My understanding is

1 MR. SMITH: Commissioners, do you  
 2 have anything? Commissioner Hanson.  
 3 VICE CHAIR HANSON: I wasn't going  
 4 to ask one, but I am intrigued by Ms. Rogers asking  
 5 you to make some policy statements and decisions  
 6 here and the subsequent questions by Mr. Wieczorek.  
 7 You've testified that an ILEC should not bear  
 8 responsibility for transport of wireless calls  
 9 outside of their service area.  
 10 THE WITNESS: I think my testimony  
 11 was that my position is that a wireline local  
 12 exchange carrier bears no responsibility for the  
 13 cost of transporting any kind of traffic beyond its  
 14 exchange boundaries, whether that be toll or local,  
 15 wireline to wireline or wireless.  
 16 VICE CHAIR HANSON: Subsequently, I  
 17 didn't quite catch Mr. Wieczorek's question of how  
 18 it was phrased but it was something along the line  
 19 of whether or not the company then that is going to  
 20 bear the costs should not have the right to choose  
 21 what type of porting ability there is.  
 22 Is that your testimony?  
 23 THE WITNESS: I think his question  
 24 was if the wireless companies have to pay for  
 25 transport, shouldn't the wireless companies be able

1 that they believe that they are capable of  
 2 providing adequate service to their customers today  
 3 with the equipment that they have, and when I  
 4 inquired about information related to development  
 5 of LNP implementation costs, the person I was  
 6 receiving the information from indicated to me that  
 7 the -- I think it's called the generic, the  
 8 revision level version of the switch that they  
 9 currently have in two locations, both Emery and  
 10 Clayton is so old that this LNP software cannot be  
 11 installed on it.  
 12 MR. SMITH: My point was are those  
 13 switches, though, those old switches -- I mean,  
 14 there's going to come a time when those in the  
 15 ordinary course would be replaced, would there not,  
 16 or are they going to -- at some point don't you get  
 17 to where you can't even find replacement parts?  
 18 And normally businesses eventually upgrade their  
 19 equipment due to depreciation.  
 20 If you don't know the answer to that -- but it  
 21 just -- and I think my point is looking at it this  
 22 way, that if, for example, the Commission might  
 23 choose to say in a situation like Tri-County that  
 24 if those switches were in the ordinary course going  
 25 to be scheduled for replacement in three years,

921

1 that it might make sense to give them some slack on  
 2 implementing number portability until that switch  
 3 replacement was to happen.  
 4 THE WITNESS: I do not know what the  
 5 switch replacement plans are for Tri-County.  
 6 MR. SMITH: Okay. Thank you.  
 7 Anything further?  
 8 MS. POLLMAN ROGERS: That's all.  
 9 Thanks.  
 10 MR. SMITH: You're excused. Thank  
 11 you. At this point do you have any further  
 12 witnesses today, Petitioners, at this time in your  
 13 direct case?  
 14 MS. POLLMAN ROGERS: I don't have  
 15 any further witnesses. I would ask that since  
 16 there has been some testimony on exhibits with  
 17 regard to the Minnesota case, I would ask the  
 18 Commission to take judicial notice of the separate  
 19 suspension orders received by the two parties that  
 20 are -- or two companies that are parties to these  
 21 proceedings and also of the letter that withdraws  
 22 those two companies from the MIC Docket. And that  
 23 would be for Alliance and Sioux Valley -- or Hills  
 24 and Sioux Valley.  
 25 MR. SMITH: Is there an objection?

922

1 MR. WIECZOREK: Well, I haven't seen  
 2 them, but if they're from the file, I don't have an  
 3 objection. I guess I'm just confused because I  
 4 thought I asked Sioux Valley whether they were a  
 5 member of MIC, and I thought they said no. That  
 6 must be my --  
 7 CHAIRMAN SAHR: Just a housekeeping  
 8 question on that. Are the letters part of the  
 9 record too, or do we need to do something different  
 10 with those? I mean, if we take judicial notice of  
 11 something that's in the record, we're okay on that.  
 12 MS. POLLMAN ROGERS: In the record  
 13 in Minnesota.  
 14 CHAIRMAN SAHR: Are the letters  
 15 actually part of the record?  
 16 MS. POLLMAN ROGERS: Yes. And  
 17 actually I can provide you with copies of those.  
 18 Over the weekend we can look at them.  
 19 MR. SMITH: Why don't we deal with  
 20 that on Tuesday. My inclination is if they're  
 21 orders of the Minnesota Commission, I would be  
 22 inclined to notice them as indisputable evidence of  
 23 what happened.  
 24 CHAIRMAN SAHR: That would be my  
 25 inclination. I was just worried about getting the

923

1 paper copied to the Commission and making sure we  
 2 have it available. If there was letters just sent  
 3 in that aren't part of the record and you want it  
 4 part of this proceeding, you'll have to get those  
 5 in.  
 6 Although I can't imagine anything that's  
 7 hopefully going to have an objection. It's  
 8 indicating they're pulled out of the proceeding;  
 9 right?  
 10 MS. POLLMAN ROGERS: Yes. They've  
 11 withdrawn.  
 12 CHAIRMAN SAHR: I think there is  
 13 significance to the letters.  
 14 MR. SMITH: Absolutely.  
 15 MR. WIECZOREK: Could I ask what the  
 16 date of the letters are?  
 17 MS. POLLMAN ROGERS: I think it was  
 18 the first part of the week when you first brought  
 19 forward that action. They did not know they were  
 20 still part --  
 21 MR. DICKENS: June 23.  
 22 MR. WIECZOREK: Two days after this  
 23 proceeding started?  
 24 MS. POLLMAN ROGERS: Yes. They did  
 25 not know they were still in. I think that's what

924

1 they testified to.  
 2 MR. DICKENS: I think you may have  
 3 brought it to their attention, Tal.  
 4 MS. POLLMAN ROGERS: The orders are  
 5 dated May 21.  
 6 MR. WIECZOREK: I definitely know I  
 7 brought it to Mr. Heiberger's attention.  
 8 MS. POLLMAN ROGERS: Heard it  
 9 through the grapevine. I just want to -- before we  
 10 close out here, I wanted to let everyone know I'll  
 11 bring copies on Tuesday.  
 12 MR. WIECZOREK: If those letters  
 13 just went out on the 23rd, I doubt they're actually  
 14 part of the record or been entered in the record in  
 15 Minnesota. I guess I'd like to look at them and  
 16 get a confirmation they've been entered into the  
 17 record in Minnesota.  
 18 MR. SMITH: Are you done then,  
 19 Petitioners, with your direct case for today?  
 20 MS. POLLMAN ROGERS: Yes. For today  
 21 we are done.  
 22 MR. SMITH: Mr. Wieczorek.  
 23 MR. WIECZOREK: I call Mr. Williams  
 24 back to the stand.  
 25 MS. POLLMAN ROGERS: I just want the

1 record to reflect if we do run into a time crunch,  
 2 I believe Mr. Williams will be here next week.  
 3 Even though Mr. Bullock will not be, we can carry  
 4 this over.  
 5 (Discussion off the record)  
 6 (Exhibit WWC 15 is marked for identification)  
 7 DIRECT EXAMINATION  
 8 BY MR. WIECZOREK:  
 9 Q Mr. Williams, your prefiled testimony has already been  
 10 entered into the evidence as Exhibit 1, and pursuant to  
 11 the ruling of the Commission it applies to all of the  
 12 proceedings here. Though we've now had marked Western  
 13 Wireless Exhibit No. 15. Is that in front of you?  
 14 A Yes.  
 15 Q And is it my understanding that this is similar to what  
 16 was previously marked as Western Wireless Exhibit 9,  
 17 being a page or a company-by-company essentially  
 18 diagram showing how the numbers have changed and how  
 19 some of the different revisions have occurred over the  
 20 filings of the testimony here?  
 21 A Yes. It's similar intent using the format that was  
 22 originally put forth by the Petitioners, which is  
 23 slightly different than the format we saw by the prior  
 24 Petitioner group.  
 25 Q And these companies appear on your original testimony

1 testimony.  
 2 A Correct.  
 3 Q So, for example, for Alliance we're basically taking  
 4 the figures that you have there, and that's under --  
 5 Western original estimates?  
 6 A Correct.  
 7 Q And then you're revising them from there?  
 8 A Correct. There are two revision columns. One reflects  
 9 the port projections made by the Petitioners, and the  
 10 other reflects the port projections made by Western  
 11 Wireless.  
 12 Q Can you explain the difference between the Exhibit 9  
 13 and the Exhibit 15?  
 14 A Well, the fundamental difference is this. The  
 15 left-hand column description of the costs and the way  
 16 those costs are organized is different for this group  
 17 of Petitioners than it was for Mr. DeWitte's companies.  
 18 And that's the primary difference in structure.  
 19 The other difference is that this group of  
 20 Petitioners had one less revision cycle than  
 21 Mr. DeWitte's group.  
 22 Q So this is basically similar to Exhibit 9, but it's  
 23 applied to the other companies that we were dealing  
 24 with today?  
 25 A Correct.

1 as attached to Western Wireless Exhibit 1, Exhibit 5A  
 2 to that testimony; correct?  
 3 A Correct.  
 4 Q Is it your desire to modify that testimony by also  
 5 submitting Exhibit No. 15?  
 6 A Yes.  
 7 Q Okay.  
 8 MR. WIECZOREK: Since his testimony  
 9 is already in, Commission, I would make him  
 10 available for cross-examination.  
 11 MR. SMITH: Are you going to offer  
 12 this?  
 13 MR. WIECZOREK: I would offer 15.  
 14 Thank you.  
 15 MS. POLLMAN ROGERS: I'm not going  
 16 to object.  
 17 MR. SMITH: Western Wireless 15 is  
 18 received.  
 19 Who's going here? Ms. Rogers or --  
 20 MS. POLLMAN ROGERS: I'll start,  
 21 yes.  
 22 CROSS-EXAMINATION  
 23 BY MS. POLLMAN ROGERS:  
 24 Q So just for clarification, you had what is called  
 25 Exhibit Williams Direct 5A that was attached to your

1 MR. WIECZOREK: As a way of  
 2 clarification, I should mention that these apply --  
 3 Exhibit 15 contains the companies that Mr. Bullock  
 4 has testified to. Exhibit 9 would be the ones  
 5 Mr. DeWitte testified to.  
 6 And, I'm sorry, one further clarification.  
 7 Mr. Williams, if you'll notice there was some  
 8 handwritten revisions on the chart in front of you  
 9 and he was sitting here this morning, caught the  
 10 mistake, and wrote the revisions in so we wouldn't  
 11 have to modify the record later.  
 12 MR. SMITH: Thank you.  
 13 MS. POLLMAN ROGERS: Excuse me just  
 14 a minute.  
 15 (Pause)  
 16 MS. POLLMAN ROGERS: I think we're  
 17 as unconfused as we can be.  
 18 Q In your original Exhibit 5A under Alliance or even  
 19 under this exhibit under your original estimates you  
 20 had zero or no figures filled in for any of the LNP  
 21 monthly recurring costs including transport; is that  
 22 correct?  
 23 A That's correct. Because at that time the information I  
 24 had from the Petitioners was they were not forecasting  
 25 any ports. So those variable costs then would be zero.

1 Q So then when you revised it how did you determine or  
 2 estimate the number of ports?  
 3 A Well, the 180 number that corresponds to the 180 ports  
 4 per year number in Mr. Bullock's testimony -- or  
 5 revised exhibit.  
 6 Q And so then on your final column on Exhibit 15, which  
 7 is Western revised estimates, you have 293.  
 8 A And that is Western Wireless's projection for how many  
 9 ports would occur in a year.  
 10 Q And that would basically be consistent with Exhibit B  
 11 attached to your responses to Interrogatories?  
 12 A Consistent with but not identical to. Exhibit B  
 13 represents only the ports to Western Wireless, and this  
 14 number reflects all intermodal reports.  
 15 Q All right. So your estimated number here is  
 16 approximately 45 percent of the total?  
 17 A The 293 represents 100 percent of what we're  
 18 forecasting for intramodal ports in a year, whether  
 19 it's Western Wireless or Verizon Wireless or some other  
 20 carrier.  
 21 Q And the 660 ports projected for the next five years on  
 22 this exhibit represents what?  
 23 A Just Western's share.  
 24 Q Thank you. I just wanted those clarified. Another  
 25 thing I note with regard to Exhibit 15 is you'll note

1 that on your switch upgrade costs, on that column I've  
 2 noticed that in your revised estimate you have reduced  
 3 that significantly from the first Exhibit 1, the  
 4 original of Petitioner's estimates; is that correct?  
 5 A That's correct.  
 6 Q And did you contact a vendor, or is that how you came  
 7 up with that information?  
 8 A Well, here's the approach -- this is, I believe, for  
 9 Mr. Bullock's clients. This is the only switch  
 10 estimate cost I made a change to, and I can explain  
 11 that if you wish.  
 12 Q I would like you to explain that. I think Mr. Bullock  
 13 testified that he had contacted the vendors, and that's  
 14 why I'm wondering the basis for your reduction of that  
 15 cost.  
 16 A I used Mr. Bullock's underlying cost information, but  
 17 for Alliance there was a significant difference between  
 18 the number of ports that LNP software was purchased for  
 19 for an upgrade -- or estimated for for an upgrade and  
 20 the actual number of ports in service. There were --  
 21 using Mr. Bullock's number, there was LNP software  
 22 forecasted for 20,012 ports, and there are only 9,842  
 23 lines in service.  
 24 I allowed for a 15 percent growth over five  
 25 years -- that's over and above any line loss -- to

1 11,318 ports for LNP investment. And I took that  
 2 number times the \$4 per port, which is the Nortel  
 3 figure, came up with a number then that I used as an  
 4 appropriate number, and the net difference is reflected  
 5 here.  
 6 Q And Mr. Bullock off the record reminded me that that  
 7 will be one of his corrections too that he will be  
 8 making to this exhibit. I think he maybe alluded to  
 9 that, and that had slipped my mind.  
 10 Overall with the addition of transport costs  
 11 based on a project number of ports your bottom line  
 12 costs for Alliance have increased from the time that  
 13 you submitted Exhibit 5B; is that correct?  
 14 A That's correct. Because 5B was based on the zero port  
 15 estimate of the Petitioners, and this includes the 293  
 16 ports per year.  
 17 Q Now we've noticed that -- or I notice in comparing the  
 18 figures and this on these other sheets attached to  
 19 Exhibit B that -- Exhibit 15, excuse me, that your  
 20 transport costs are less than those contained in  
 21 Mr. Bullock's cost exhibit; is that correct?  
 22 A That's correct. And the primary reason for that is --  
 23 Q I can ask you the question. Thank you. Are you  
 24 assuming the use of the common trunk or your  
 25 transport -- common trunking group in accordance with

1 the transport plan that you've submitted to the  
 2 Commission? Would that be correct?  
 3 A That's correct. We're using the same transport plan  
 4 proposed for all companies.  
 5 Q My question to you is did you personally contact Qwest  
 6 to determine the feasibility or the willingness of  
 7 Qwest to enter into this plan?  
 8 A I did not. My --  
 9 Q Thank you. So you're telling me that you put this  
 10 proposal before the Commission as an alternative for  
 11 transport but that you did not contact Qwest prior to  
 12 doing so. Is that a correct statement?  
 13 A That is a correct statement.  
 14 Q Now I want to go to the next page, which is Armour, and  
 15 this would be combined Armour, Bridgewater-Canistota,  
 16 Union. That's for all three companies; is that  
 17 correct?  
 18 A Yes.  
 19 Q Other than I think you've estimated a slightly higher  
 20 number of ports, but your bottom line cost that you  
 21 have calculated, again, excluding transport, is not  
 22 really significantly different from that in  
 23 Mr. Bullock's estimation, is it? It's pretty close,  
 24 isn't it?  
 25 A It's about a 30 percent difference.

1 Q I mean, both are over a dollar; is that correct?  
 2 A Both are over a dollar.  
 3 Q Okay. We've talked a little bit about Faith, and it is  
 4 my understanding that you basically do not dispute that  
 5 Faith is one of the companies that would have  
 6 significant costs and perhaps should be considered by  
 7 the Commission for suspension even under your cost  
 8 scenarios.  
 9 Is that a correct statement of your  
 10 testimony?  
 11 A I think they've distinguished themselves from most of  
 12 the other Petitioners.  
 13 Q Kind of stands out above the others, doesn't it? In  
 14 the next cost exhibit, which is Golden West, Vivian,  
 15 and Kadoka, Mr. Bullock's original estimate for switch  
 16 upgrade costs was \$126,456, and then he revised that  
 17 for 145,757.  
 18 And on this page and, in fact, most of them  
 19 did you then just select whichever one was cheaper to  
 20 put into your estimate?  
 21 A No. I selected the one I had support for, which was  
 22 the first estimate. I didn't have --  
 23 Q And, in fact, in most cases you chose the one that  
 24 corresponded with Mr. Bullock's first exhibit; is that  
 25 correct?

1 Q So you have no reason to dispute that?  
 2 A Correct.  
 3 Q Okay. So in general, and again I'm looking in  
 4 particular at Valley's, the cost per line per month  
 5 under your estimate including transport is very, very  
 6 similar to that computed by Mr. Bullock.  
 7 A Really the only difference there is, you know, we're  
 8 estimating about twice as many ports, but the estimates  
 9 are very close.  
 10 Q And the other difference would be your other internal  
 11 costs. You didn't base that on a company-specific  
 12 basis; is that correct?  
 13 A I based it on what I thought was achievable for this  
 14 company.  
 15 Q Which was not on company-specific figures?  
 16 A No. It's probably on the high side for this company.  
 17 Q You have no way of knowing that, though, do you?  
 18 A I do. I have been through processes --  
 19 Q Have you been to Valley?  
 20 MR. WIECZOREK: I'd object. The  
 21 witness was answering her question. She should let  
 22 him answer before interrupting.  
 23 A I have been very involved with the processes of  
 24 establishing LNP, including all involvement with each  
 25 and every underlying activity that represents the other

1 A That is correct.  
 2 Q Unless it was cheaper, and then you picked that one  
 3 from the second exhibit; is that correct?  
 4 A In no case did it appear to be cheaper.  
 5 Q Okay. And then again there is not a significant  
 6 difference in your figures on total nonrecurring costs  
 7 excluding transport from Mr. Bullock's -- I'm looking  
 8 at the top portion of that exhibit -- is there? Your  
 9 figures are pretty close?  
 10 A For Golden West?  
 11 Q Yes.  
 12 A Again, about a 20 percent, 25 percent difference.  
 13 Q One of the differences would be your other internal  
 14 costs, and is it my understanding you just used a flat  
 15 fee throughout all of these companies; is that correct?  
 16 A I did. I picked 15,000 as more or less a nonarithmetic  
 17 mean to use for these.  
 18 Q I don't believe I had any particular questions with  
 19 regard to Tri-County other than you did hear  
 20 Mr. Bullock's testimony that it would certainly take a  
 21 substantial larger sum of money to implement LNP in  
 22 that exchange; is that correct? And you have no reason  
 23 to dispute that, do you?  
 24 A I'm not at all familiar with Tri-County's switching  
 25 situation.

1 internal cost item, and I am very familiar with what  
 2 costs would be appropriate in that line item.  
 3 Q You are not personally familiar with the internal  
 4 operations of any of these companies, are you,  
 5 Mr. Williams?  
 6 A No more than has been provided in discovery.  
 7 Q So that would be a no.  
 8 A That would be --  
 9 Q No more than provided --  
 10 A No more than provided in discovery.  
 11 Q The profile or the information that's been provided to  
 12 you through the discovery.  
 13 A Correct.  
 14 MS. POLLMAN ROGERS: I believe  
 15 that's all the questions I have. Thank you.  
 16 MR. COIT: No questions.  
 17 MR. SMITH: Mr. Gerdes.  
 18 MR. GERDES: No questions.  
 19 MS. AILTS WIEST: No questions.  
 20 MR. SMITH: Commissioners.  
 21 COMMISSIONER BURG: I have one. I  
 22 was a little intrigued by something that Mr. Law  
 23 said. He proposed the cost for LNP be calculated  
 24 on per point of number basis.  
 25 What would that figure be for any single

1 exchange you might want to pick, given Western  
 2 Wireless ports per year figure using the number of  
 3 ports you expected there would be?  
 4 THE WITNESS: I have no idea. I  
 5 mean, there's no rationale for -- it's been decreed  
 6 on how those would be paid for.  
 7 COMMISSIONER BURG: But it's also  
 8 been decreed that there's an --  
 9 THE WITNESS: Suspension  
 10 opportunity.  
 11 COMMISSIONER BURG: Suspension  
 12 opportunity. And as you can tell from my line of  
 13 questioning, I'm very concerned about the  
 14 cost/benefit ratio.  
 15 And my last question then, would people port  
 16 if they paid the cost of porting? Would it still  
 17 be a benefit to them? Because your company's made  
 18 the argument all along this is a great benefit to  
 19 get LNP for the people.  
 20 THE WITNESS: One way to look at it  
 21 is I don't think people would use 911 services if  
 22 the users had to pay individually for the cost of  
 23 911.  
 24 COMMISSIONER BURG: I don't agree  
 25 with that at all. We've been through that a lot.

1 Wireless be allowed LNP if they pay for it?  
 2 THE WITNESS: Well, if I can  
 3 describe a scenario that may fit that statement, we  
 4 would have no intention of paying for the upgrade  
 5 of any carrier's switch to meet LNP obligations.  
 6 There is -- right now, as has been explained,  
 7 an open question in front of the FCC as to the  
 8 obligation for paying for transport associated with  
 9 the porting of -- transport to ported numbers. The  
 10 FCC has specifically said that that obligation is  
 11 in no way a justification for suspension or delay  
 12 in the implementation of LNP, but they have said it  
 13 is an unanswered question.  
 14 You know, Western would entertain on an  
 15 interim basis until the FCC made a final decision  
 16 on whose obligation it is to pay for that transport  
 17 to pick up transport under a Qwest tandem-based  
 18 routing proposal identical to the one we've  
 19 proposed, which is identical also to the one  
 20 proposed in Minnesota.  
 21 VICE CHAIR HANSON: Thank you.  
 22 MR. SMITH: Oh, Mr. Wiczorek. I'm  
 23 sorry.  
 24 MR. WIECZOREK: How could you  
 25 forget? I just have a couple redirect.

1 That's a very popular service I think most people  
 2 would be glad to pay for. They do pay for it.  
 3 THE WITNESS: They do, but the  
 4 cost-causer doesn't pay for it.  
 5 COMMISSIONER BURG: Well, when you  
 6 come to safety I'm not sure who the cost-causer is.  
 7 I don't think you have to wait until you need it to  
 8 be -- just like the fire department.  
 9 THE WITNESS: I would agree with  
 10 that.  
 11 COMMISSIONER BURG: I think there's  
 12 a -- I think we're talking about apples and oranges  
 13 there. That's the only question I have. I'm very  
 14 concerned the amount of cost that this will cost  
 15 for the benefits that we see and especially if we  
 16 don't reach those numbers of porting as has been  
 17 the historical record in the other areas -- in the  
 18 MSAs that already have porting.  
 19 That's all I have.  
 20 MR. SMITH: Commissioner Sahr, any  
 21 questions? Anything further?  
 22 CHAIRMAN SAHR: No. Commissioner  
 23 Hanson.  
 24 MR. SMITH: Oh, excuse me.  
 25 VICE CHAIR HANSON: Should Western

1 REDIRECT EXAMINATION  
 2 BY MR. WIECZOREK:  
 3 Q Ms. Rogers asked you something about contacts with  
 4 Qwest, and it looked like you had some information to  
 5 provide there. Have you had any experience with  
 6 Qwest's willingness to enter into these kind of  
 7 relationships?  
 8 A Well, I'll tell you first where the numbers came from,  
 9 came from our own engineering experience in converting  
 10 one-way to two-way trunks with Qwest and then, yes, I  
 11 am familiar that Qwest has stated that they are eager  
 12 to provide this service.  
 13 Q In the Minnesota proceeding?  
 14 A In the Minnesota.  
 15 MR. WIECZOREK: That's all I have.  
 16 MR. COIT: Could I ask one question?  
 17 MR. SMITH: Yes.  
 18 MR. COIT: Recross question.  
 19 RECROSS-EXAMINATION  
 20 BY MR. COIT:  
 21 Q Mr. Williams, we've talked a lot about transport the  
 22 last four or five days. Are you familiar with any  
 23 transiting agreements or tariffs that have provisions  
 24 requiring that when traffic volumes exceed the level  
 25 where a DS-1 facility would be justified that the -- a

1 DS-1 facility should be purchased rather than using the  
 2 common transport facilities?  
 3 **A** Yes. Those agreements are usually triggered by a  
 4 traffic level between two switches, to CLLI codes, that  
 5 exceeds the DS-1s worth of capacity and different  
 6 agreements have different thresholds but six or eight  
 7 or 10 times in a 30-day period.  
 8 **Q** Okay. So are you aware of any Qwest agreements or  
 9 tariffs that include provisions like that?  
 10 **A** Not off the top of my head, but they very well may.  
 11 **Q** And a final question. If a company utilizes a common  
 12 transport facility into a local exchange area, is that  
 13 company actually establishing a point of interconnect  
 14 within that local exchange area for the purpose of  
 15 receiving local traffic?  
 16 **A** I guess I'm not sure the question. Could you repeat  
 17 it?  
 18 **Q** The question would be if a company uses a common  
 19 transport facility into another area to receive local  
 20 traffic, has that company actually established a point  
 21 of interconnect within that local company area?  
 22 **A** I would say not.  
 23 MR. COIT: Okay. Thank you. No  
 24 further questions.  
 25 CHAIRMAN SAHR: Could I ask Cheri if

1 MR. SMITH: The hearing in the LNP  
 2 suspension request cases is reconvened. It's  
 3 Tuesday morning, June 29, at approximately 8:30  
 4 a.m. which is the time and place for the hearing in  
 5 the following Dockets: TC04-025, Kennebec  
 6 Telephone Company; TC04-052, Midstate  
 7 Communications, Inc.; TC04-048, Beresford Municipal  
 8 Telephone Company; and TC04-053, Western Telephone  
 9 Company.  
 10 Petitioners, you may proceed.  
 11 MS. POLLMAN ROGERS: Thank you. In  
 12 Docket TC04-025, which is the petition of Kennebec  
 13 Telephone Company, Petitioners would call Rod Bowar  
 14 to the stand.  
 15 ROD BOWAR,  
 16 called as a witness, being first duly sworn in the  
 17 above cause, testified under oath as follows:  
 18 DIRECT EXAMINATION  
 19 BY MS. POLLMAN ROGERS:  
 20 **Q** Good morning, Rod. Would you please state your name  
 21 and address for the record.  
 22 **A** Rod Bowar, Kennebec, South Dakota 57544.  
 23 **Q** What is your occupation?  
 24 **A** I'm manager of Kennebec Telephone Company.  
 25 **Q** You have next to you there what have been marked as

1 you could go back and read the last question from  
 2 Commissioner Hanson and the response.  
 3 (Reporter reads back requested portion of transcript)  
 4 MR. WIECZOREK: I believe I moved  
 5 15.  
 6 MR. SMITH: 15, I believe I have  
 7 that. I admitted it. We're in recess until 8:30  
 8 Tuesday morning, Tuesday the 29th.  
 9 (Proceedings are in recess)  
 10  
 11  
 12  
 13  
 14  
 15  
 16  
 17  
 18  
 19  
 20  
 21  
 22  
 23  
 24  
 25

1 Kennebec Exhibits 1 and 2. Can you identify those?  
 2 **A** Yes. One is my direct prefiled testimony, and the  
 3 other is my rebuttal testimony.  
 4 **Q** And they were prepared by you or at your direction; is  
 5 that correct?  
 6 **A** Yes.  
 7 **Q** Do you have any additions or corrections to your  
 8 prefiled testimony?  
 9 **A** On the rebuttal I would like to change the address from  
 10 209 South Main to 220 South Main.  
 11 **Q** That would be on line 3 of page 1 of the rebuttal  
 12 testimony?  
 13 **A** Yes.  
 14 **Q** Any other additions or corrections?  
 15 **A** No.  
 16 **Q** If I asked you the questions contained in your prefiled  
 17 testimony, would your responses and answers be the  
 18 same?  
 19 **A** Yes, they would.  
 20 **Q** Would you briefly summarize your testimony.  
 21 MR. WIECZOREK: Before we get into  
 22 the summary, I do have an objection to the direct  
 23 testimony to the extent it refers to a survey and  
 24 their conclusions of the survey based on what  
 25 Sue Vanicek told them about the survey.

1 Sue Vanicek was hired as an independent  
 2 consultant and supposedly to do this survey and  
 3 then informed him of what she perceived the results  
 4 to be and he's just parroting them back. They  
 5 could have called Ms. Vanicek to go through the  
 6 survey. It's hearsay. It's based on her opinion  
 7 as to what the survey says. So to that extent, I  
 8 would object to his direct testimony with the  
 9 exception of page 5 which does not refer to the  
 10 survey, but I object to all the other testimony.

11 The reason I'm raising my objection now is I  
 12 don't want him to get into a summary of that survey  
 13 before I register my objection.

14 MR. SMITH: Are there specific  
 15 places in the direct testimony that you can  
 16 identify as being objectionable?

17 MR. WIECZOREK: Yes. If you follow  
 18 the testimony -- this is the direct testimony. He  
 19 starts talking -- page 1 is general background but  
 20 if you get into page 2 they talk about  
 21 commissioning the survey from Telec Consulting  
 22 Services to conduct a survey of the consumers and  
 23 goes through and explains how it's done and talks  
 24 about the reliability and directly talks about what  
 25 Ms. Vanicek told him about the survey. And it's my

1 Q You read it yourself?

2 A Yes, I did.

3 Q And you are familiar yourself with the contents and the  
 4 results of the survey?

5 A Yes, I am.

6 Q And you had this survey prepared in the ordinary course  
 7 of your business as the manager of Kennebec Telephone  
 8 Company?

9 A Yes, I did.

10 MS. POLLMAN ROGERS: Thank you.

11 MR. WIECZOREK: I would continue to  
 12 raise my objection. It's clear from his testimony  
 13 that he had it prepared for this hearing. I mean,  
 14 if that's all you have to do is have a report  
 15 prepared, he could sit here -- there's no reason to  
 16 call the Telec people on cost. He could sit here  
 17 and say here's the cost and here's the conclusions  
 18 and we wouldn't be allowed the ability to  
 19 cross-examine on cross. He's reviewed the surveys,  
 20 and that's all it takes. He can come in here and  
 21 do the same thing with the cost numbers.

22 MR. SMITH: Do you have an opinion?

23 MS. AILTS WIEST: We don't object at  
 24 this point.

25 MR. SMITH: Is the Telec witness

1 understanding then that he is simply -- on page 3  
 2 parrots back what she has told him about the  
 3 results of the survey.

4 And from the standpoint of just -- it's her  
 5 opinions that he's giving here.

6 MS. POLLMAN ROGERS: Could I please  
 7 ask a couple of questions of the witness to try to  
 8 clarify this?

9 MR. SMITH: Right. And I guess the  
 10 other question I would have is is the witness from  
 11 Telec this morning able to address the issue of  
 12 foundation for those? And, again --

13 MS. POLLMAN ROGERS: I believe  
 14 Mr. Bowar -- I mean, if you would allow me to ask  
 15 him, he has reviewed the survey results himself and  
 16 is familiar with them himself. That in addition to  
 17 the ordinary of course of business exception, I  
 18 believe that there is sufficient foundation to  
 19 overcome a hearsay objection.

20 MR. SMITH: Why don't you go ahead  
 21 and ask him the questions.

22 Q (BY MS. POLLMAN ROGERS) Mr. Bowar, with regard to the  
 23 survey that counsel was referring to, did you  
 24 personally review the results of the survey?

25 A Yes, I did.

1 able to address the survey and the foundation of  
 2 the survey?

3 MS. POLLMAN ROGERS: I believe  
 4 that -- I mean, I'm not sure that this Telec  
 5 witness, the one that is here, in response to your  
 6 question is very familiar with the survey. But  
 7 again, Mr. Bowar is very familiar with it and has  
 8 read it and reviewed it.

9 I would further point out that I believe there  
 10 was a survey by NTCA introduced by Western Wireless  
 11 earlier, and it would appear to me that the same --  
 12 that that was allowed into evidence and this one  
 13 should be as well, especially when Mr. Bowar has  
 14 gone over it and read it himself.

15 MR. SMITH: We're going to go into  
 16 executive session to discuss the Commissioners'  
 17 views on this.

18 (A short recess is taken at which time the  
 19 Commission meets in executive session)

20 MR. SMITH: We have come out of  
 21 executive session. I think it's the wishes of the  
 22 Commission that the testimony be allowed under sort  
 23 of the similar liberal foundation we afforded  
 24 Western Wireless's survey for which there was  
 25 precious little foundation.

949

1 And I think the bottom line expressed by the  
 2 Commissioners is that we're capable of giving the  
 3 testimony the weight it deserves, given the paucity  
 4 of foundational evidence. And with that,  
 5 Ms. Rogers, please proceed.  
 6 MR. WIECZOREK: For the purposes of  
 7 the record can I have a standing objection for any  
 8 references to the survey?  
 9 MR. SMITH: You may.  
 10 MR. WIECZOREK: Thank you.  
 11 **Q** (BY MS. POLLMAN ROGERS) Mr. Bowar, would you briefly  
 12 summarize your prefiled testimony.  
 13 **A** In my prefiled testimony I am explaining how LNP would  
 14 impact my customers. We have conducted a survey and  
 15 the results overwhelmingly indicate that a majority of  
 16 my customers do not want to pay for LNP at any price.  
 17 I also provided demographic information as to the age,  
 18 which is older than average in the nation, and income,  
 19 which is also lower than average in the nation. It  
 20 would make any older customers on fixed incomes pay for  
 21 a service that they will not use and are not  
 22 requesting. Bottom line, LNP implementation would have  
 23 an extreme adverse impact with little or no benefit.  
 24 **Q** Thank you.  
 25 MS. POLLMAN ROGERS: I would at this

950

1 time offer Kennebec Exhibits 1 and 2.  
 2 MR. WIECZOREK: No objection,  
 3 subject to the standing objection on the survey.  
 4 MR. SMITH: So noted.  
 5 MR. WIECZOREK: No objection.  
 6 MR. COIT: No objection.  
 7 MS. POLLMAN ROGERS: I would tender  
 8 the witness for cross.  
 9 MR. SMITH: Kennebec 1 and 2 are  
 10 admitted. Please proceed. Mr. Coit, do you have  
 11 questions?  
 12 MR. COIT: No questions.  
 13 MR. SMITH: Mr. Wieczorek, please  
 14 proceed.  
 15 MR. WIECZOREK: Thank you, Mr. Smith  
 16 Commissioners, counsel.  
 17 CROSS-EXAMINATION  
 18 BY MR. WIECZOREK:  
 19 **Q** Sir, as part of the Telec cost analysis you obtained a  
 20 quote from Oak Hill Consulting, Inc. Do you recall  
 21 that?  
 22 **A** Yes.  
 23 **Q** Do you recall the numbers on that?  
 24 **A** Not right off the top of my head.  
 25 **Q** I'll tell you what. It would probably just be as

951

1 easy --  
 2 MR. WIECZOREK: With my apologies to  
 3 the Commission, I only have one copy in my  
 4 discovery. It was part of their discovery  
 5 responses, but for appropriate referencing purposes  
 6 I think I'm going to mark it so I can refer to it  
 7 as an exhibit number. It's a letter to Mr. Bowar  
 8 from Oak Hill Consulting, Inc. on switch  
 9 upgrade/LNP costs. And I believe it would be  
 10 Western Wireless 16.  
 11 (Exhibit WWC 16 is marked for identification)  
 12 MR. WIECZOREK: Go ahead and review  
 13 the exhibit.  
 14 **Q** Can you identify what has been marked as Western  
 15 Wireless Exhibit No. 16 for the Commission, please.  
 16 **A** Yes. It's from Oak Hills Consulting. It's a quote on  
 17 upgrading our office.  
 18 **Q** Now this quote is not limited to simply LNP software  
 19 upgrades; correct?  
 20 **A** I can't answer that.  
 21 **Q** Well, the cost to upgrade just your host office is  
 22 \$31,400 of this bid; correct?  
 23 **A** Yes.  
 24 **Q** And down on the -- there's also a line that talks about  
 25 LNP, 976 lines; correct?

952

1 **A** Yes.  
 2 **Q** What's the cost for the LNP, 976 lines?  
 3 **A** 3,904.  
 4 **Q** So is it your understanding that the majority of your  
 5 costs for -- which you've included as switch upgrade  
 6 costs is just -- is cost to upgrade your host office as  
 7 opposed to make it LNP compliant?  
 8 **A** No.  
 9 **Q** It's not in your understanding?  
 10 **A** No.  
 11 **Q** Okay. So you understand that \$31,400 of this bid is to  
 12 upgrade your host office; correct?  
 13 **A** Yes.  
 14 **Q** And that's because -- do you have an older host office?  
 15 Well, let me ask it this way: That's a substantial  
 16 portion of the number of LNP upgrade cost. Can you  
 17 explain to the Commission what that cost is about?  
 18 **A** I cannot. Larry Butler is our engineer and he put this  
 19 together. I cannot explain it.  
 20 **Q** Okay. All right. Is this a true and correct copy of  
 21 the letter you received?  
 22 **A** Yes.  
 23 MR. WIECZOREK: All right. I'm  
 24 going to move for the admission of 16, and I'll ask  
 25 the Telec expert to explain it then.

1 MR. SMITH: Is there an objection?  
 2 MS. POLLMAN ROGERS: No.  
 3 MR. SMITH: Western Wireless Exhibit  
 4 16 is admitted.  
 5 Q You claim that there's no desire for LNP within your  
 6 system, but did you know that your cost expert has  
 7 projected 24 ports a year?  
 8 A I'm not sure of the number.  
 9 Q Okay. Do you know he's projected ports to occur?  
 10 A Yes.  
 11 Q And in your rebuttal testimony you talk about the  
 12 system that you're proposing to route traffic is based  
 13 on current routing arrangements; correct?  
 14 A Yes.  
 15 Q Did you look at any other routing arrangements besides  
 16 the one that you have proposed for your cost analysis  
 17 here?  
 18 A No.  
 19 Q Have you done any studies of what it would cost to  
 20 route traffic a different method?  
 21 A No.  
 22 Q You understand that federal law allows you to recover  
 23 the costs of LNP through an end-user charge; correct?  
 24 A I'm not sure whether it's federal law or whether it's  
 25 an FCC regulation.

1 Q But you understand that you've got that right.  
 2 A Yes.  
 3 Q And you also collect high-cost support and switch  
 4 support through USAC payments; correct?  
 5 A Yes.  
 6 Q And you would in calculating that support in the future  
 7 include your switch upgrade costs, wouldn't you?  
 8 A To the extent we're allowed.  
 9 Q Now do you understand that the proposal for how to  
 10 route this traffic envisions using DSL 1 lines to all  
 11 the CMRS carriers for routing ported numbers?  
 12 A I'd like to defer that to Dan Davis, Telec.  
 13 Q You didn't come up with that way of routing the  
 14 traffic, did you?  
 15 A No.  
 16 Q Okay. Did you leave that up to your consultant?  
 17 A Yes.  
 18 Q Your rebuttal testimony also talks about the plan  
 19 that's been proposed by Western Wireless to route the  
 20 traffic. Do you recall that?  
 21 A Yes.  
 22 Q And your concern that the way proposed by Western  
 23 Wireless will add costs to Kennebec. Do you recall  
 24 that?  
 25 A Not exactly, no.

1 Q Do you have your rebuttal testimony in front of you?  
 2 A Yes.  
 3 Q Why don't you just turn to page 3, line 4. Have you  
 4 found it?  
 5 A Yes.  
 6 Q On that page you talk about Western Wireless's proposal  
 7 would increase Kennebec's cost. Do you see that?  
 8 A Yes.  
 9 Q You understand that Western Wireless's proposal is less  
 10 expensive than the proposal proffered by your cost  
 11 expert in this case, don't you?  
 12 A I don't think I can answer that because I haven't had a  
 13 chance to examine it or confer with my consultants on  
 14 Western Wireless's plan.  
 15 Q According to your rebuttal testimony you reviewed  
 16 Mr. Williams' proposal and his testimony and his costs  
 17 were contained in that testimony.  
 18 A Yes. Can I ask you a question? Are you referring to  
 19 what we -- was talked about yesterday on the board?  
 20 I'm confused on what we're talking about here.  
 21 Q Yeah. You were here last week is what you're referring  
 22 to?  
 23 A Yeah.  
 24 Q The Western Wireless proposal is to route through a  
 25 two-way trunk with Qwest. You understand that;

1 correct?  
 2 A That's what we're talking about?  
 3 Q That's what I'm talking about.  
 4 A All right.  
 5 Q But you understand that the Western Wireless, that  
 6 routing proposal is less expensive than the routing  
 7 proposal set forth by Mr. Davis?  
 8 A By what you folks say, yes.  
 9 Q Well, nobody else has told you it's more expensive,  
 10 have they?  
 11 A No.  
 12 MR. WIECZOREK: That's all I have.  
 13 MR. SMITH: Ms. Wiest.  
 14 MS. AILTS WIEST: Thank you.  
 15 CROSS-EXAMINATION  
 16 BY MS. AILTS WIEST:  
 17 Q Mr. Bowar, what is your current local rate?  
 18 A Residence line is \$16. A business line is \$25.  
 19 Q And do you have any direct points of interconnection  
 20 with any wireless carrier?  
 21 A No, we don't.  
 22 Q How many wireless carriers are authorized to serve your  
 23 area? Do you know?  
 24 A Authorized to serve, two that I know of.  
 25 Q That would be the same number that are currently

1 serving?  
 2 A I have a problem with the word current -- they're there  
 3 but the service isn't good.  
 4 Q And how many wireless carriers requested LNP through a  
 5 bona fide request?  
 6 A Two.  
 7 Q How did you respond with that?  
 8 A To the bona fide request?  
 9 Q Yes.  
 10 A We are here today because of the bona fide requests.  
 11 Q Did you respond in writing to that?  
 12 A Yeah. We acknowledged the receipt, yes.  
 13 Q And then going to your survey, your survey showed that  
 14 even though 73 percent of the survey respondents have a  
 15 wireless phone, only 2.6 percent would be willing to  
 16 pay a surcharge of \$2. Is that correct?  
 17 A I think that's correct. I'd have to look here.  
 18 Q What do you think is the main reason for the lack of  
 19 demand?  
 20 A The coverage is not good. There's lack of coverage.  
 21 And lack of demand. My customers see no need for this.  
 22 Q Okay.  
 23 MS. AILTS WIEST: That's all I have.  
 24 Thank you.  
 25 MR. SMITH: Do the Commissioners

1 you.  
 2 MR. SMITH: Maybe a point of  
 3 clarification there, the power to suspend is  
 4 provided by both federal and state statute.  
 5 COMMISSIONER BURG: How is it state  
 6 statute?  
 7 MR. SMITH: It reads almost  
 8 identical to the federal statute.  
 9 COMMISSIONER BURG: On this specific  
 10 issue?  
 11 MR. SMITH: Well, on this specific  
 12 issue among others. There are several  
 13 obligations --  
 14 COMMISSIONER BURG: I wasn't aware  
 15 we had state language.  
 16 MR. SMITH: It's basically an  
 17 enabling statute. I think the words are a little  
 18 out of order from the federal statute but its  
 19 substance is identical.  
 20 COMMISSIONER BURG: Was that part of  
 21 our deregulation legislation?  
 22 MR. SMITH: I'm not sure of the  
 23 effective date whether it was that particular  
 24 package or not. My guess is that it -- I can look  
 25 here and see.

1 have any questions of Mr. Bowar?  
 2 COMMISSIONER BURG: I'm probably  
 3 just going to ask one in general. What's your  
 4 feeling -- and it's going to be pretty broad -- was  
 5 the purpose of this meeting and at the same time as  
 6 what we're saying that both Congress and the FCC  
 7 has seen value to local number portability, it  
 8 appears to me they saw fit to allow another  
 9 analysis by us, especially in certain  
 10 circumstances. And how would you address that?  
 11 THE WITNESS: I'm not quite sure. I  
 12 haven't thought of that.  
 13 COMMISSIONER BURG: I know it's kind  
 14 of a --  
 15 THE WITNESS: I think the FCC has  
 16 finally realized that there are different instances  
 17 that need a suspension because of the costs and the  
 18 lack of demand. And I think that's why they've  
 19 given the authority to the State Commissions to  
 20 grant suspensions.  
 21 COMMISSIONER BURG: Do you see any  
 22 people -- any of your consumers that would benefit  
 23 from this?  
 24 THE WITNESS: No, I don't.  
 25 COMMISSIONER BURG: Okay. Thank

1 MR. COIT: I can answer that if you  
 2 would like me to.  
 3 MR. SMITH: Please do.  
 4 MR. COIT: I think the legislation  
 5 on the state side was passed in 1998, two years  
 6 after the '96 Act.  
 7 MR. SMITH: Okay. That was my  
 8 recollection. There was an entire package passed  
 9 in '98 to basically implement the provisions --  
 10 they appear -- I wasn't here back then but they  
 11 appear to have been for the purpose of enabling you  
 12 to implement the provisions of the federal Telecom  
 13 Act and this was one of those.  
 14 A lot of those provisions pretty much track  
 15 provisions in the federal law. And I think one of  
 16 the reasons is to avoid the problem that the North  
 17 Dakota Commission encountered, which is you have a  
 18 federal statute but no state enabling legislation  
 19 and then you're faced with an issue of whether you  
 20 really have jurisdiction, whether the legislature  
 21 has given you jurisdiction to hear the case.  
 22 COMMISSIONER BURG: Thanks. That's  
 23 good clarification for me.  
 24 MR. SMITH: Commissioner Sahr.  
 25 CHAIRMAN SAHR: Mr. Bowar, you were

1 in the hearing room last week for at least a couple  
2 of days, if not more. Did you have a chance to  
3 review the Western Wireless proposal on routing of  
4 traffic?

5 THE WITNESS: Just on the board  
6 there.

7 CHAIRMAN SAHR: And if this goes  
8 beyond your scope of knowledge, just let me know,  
9 but are there some concerns about phantom traffic  
10 under that proposed routing system?

11 THE WITNESS: This may be beyond my  
12 scope, but, yes, I would have concerns.

13 CHAIRMAN SAHR: And have you ever  
14 looked into -- and it's a little bit hard to ask  
15 you where is your phantom traffic coming from, but  
16 at the same time has there been any sort of  
17 research or has that ever been studied about where  
18 the phantom traffic normally comes from?

19 THE WITNESS: I think there's a  
20 perception today that some of the phantom traffic  
21 is coming from CLECs.

22 CHAIRMAN SAHR: Thank you.

23 MR. SMITH: I have a follow-up  
24 question on the phantom traffic. That phantom  
25 traffic right now is coming to you over the one-way

1 payment of transit costs to Qwest, payment of  
2 reciprocal comp to Western Wireless, aren't those other  
3 things that need to be considered as part of costs?

4 A Yes.

5 Q And even for a moment if we could set aside the  
6 transport issue and costs, which of course we can't,  
7 Kennebec's costs for implementation are high, aren't  
8 they?

9 A Yes.

10 MS. POLLMAN ROGERS: Just one  
11 minute, please.

12 (Pause)

13 Q Under today's environment, Mr. Bowar, when you  
14 originate traffic and it's destined or going to a  
15 location that is outside of your service area, do you  
16 use Qwest or SDN when you originate traffic?

17 A Originate we use SDN.

18 Q Okay. Under today's environment?

19 A Under today's environment.

20 Q You were asked a few questions by the Commission  
21 concerning phantom traffic, and they asked you, I  
22 think, if -- or made mention of the fact that you were  
23 present at the hearings part of the time last week; is  
24 that correct?

25 A Yes. That's correct.

1 Qwest tandem trunk?

2 THE WITNESS: That's correct.

3 MR. SMITH: And if this traffic  
4 were -- if the Western Wireless proposal were  
5 implemented, that would be traffic moving the other  
6 direction in the direction of Western Wireless,  
7 wouldn't it?

8 THE WITNESS: Yes.

9 MR. SMITH: So really that phantom  
10 traffic problem will end up being Western  
11 Wireless's problem.

12 THE WITNESS: Probably.

13 MR. SMITH: Okay. That's all I  
14 have. Ms. Rogers, redirect?

15 MS. POLLMAN ROGERS: Just a couple  
16 of things with regard to redirect.

17 REDIRECT EXAMINATION

18 BY MS. POLLMAN ROGERS:

19 Q Even if the Western Wireless proposal is less costly  
20 for Western Wireless, that doesn't mean it is less  
21 costly for you, does it?

22 A Yes. That's correct.

23 Q It would not mean that?

24 A Yeah. It would not mean that.

25 Q Would you also consider a loss of access revenue,

1 Q And did you hear Mr. Williams make a comment about  
2 phantom traffic when you were in the hearing room?

3 A Yes, I did.

4 Q What was that?

5 A When we were -- during the time Commissioner Burg was  
6 questioning Randy Houdek on the stand, at the time I  
7 did not know who Mr. Williams was, but he turned and  
8 said to the -- when they were discussing if the  
9 transport part was removed Mr. Williams turned to  
10 the -- a blond-headed lady behind him and said, Watch  
11 the phantom traffic go up.

12 Q And you personally heard that statement?

13 A Yes, I did.

14 MS. POLLMAN ROGERS: Thank you.

15 That's all. Thank you.

16 MR. SMITH: Go ahead, Mr. Wiczorek.

17 Mr. Coit, I'm assuming you have nothing.

18 MR. COIT: No.

19 RE-CROSS-EXAMINATION

20 BY MR. WIECZOREK:

21 Q Your direct testimony sitting in front of you, just  
22 turn to page 3. You responded I believe it was to  
23 Commissioner Burg that nobody in your -- none of your  
24 customers really wanted LNP. However, your own survey  
25 shows that almost 12 percent of customers would be

1 willing to pay a dollar per month for LNP; correct?  
 2 A That is correct.  
 3 Q And, in fact, even at \$2 -- well, at \$3 there's still  
 4 1.6 percent of the people that would be interested in  
 5 LNP; correct?  
 6 A That's correct.  
 7 Q And did you do this survey at \$1.50? You don't reflect  
 8 \$1.50 but did you test the \$1.50?  
 9 A No, we did not.  
 10 Q And going back to the 12 percent that would be willing  
 11 to pay a dollar, that's based on your lower  
 12 demographics that you talked about earlier; correct?  
 13 Let me ask it this way: You talked about the income of  
 14 your customer base. Is it a lower base even than most  
 15 of South Dakota?  
 16 A We did a comparison to the nation. I guess I'm not  
 17 sure on South Dakota.  
 18 MR. WIECZOREK: That's all I have.  
 19 MR. SMITH: Ms. Wiest, any  
 20 follow-up?  
 21 MS. AILTS WIEST: No.  
 22 MR. SMITH: Any last questions,  
 23 Commissioners?  
 24 Anything further, Ms. Rogers?  
 25

1 MR. WIECZOREK: I have none.  
 2 MR. SMITH: You're excused,  
 3 Mr. Bowar. Thank you. Petitioners, call your next  
 4 witness.  
 5 MS. POLLMAN ROGERS: My  
 6 understanding is you want to do all the managers  
 7 first; right?  
 8 MR. SMITH: Whatever you want to do.  
 9 That's what we have been doing.  
 10 MR. WIECZOREK: As long as that's  
 11 okay with the Commission, I think that would just  
 12 speed it along.  
 13 MS. POLLMAN ROGERS: We will call  
 14 Mark Benton to the stand.  
 15 MARK BENTON,  
 16 called as a witness, being first duly sworn in the  
 17 above cause, testified under oath as follows:  
 18 DIRECT EXAMINATION  
 19 BY MS. POLLMAN ROGERS:  
 20 Q Good morning. Would you please state your name and  
 21 address for the record.  
 22 A Home address or work address?  
 23 Q Pardon?  
 24 A Home or work address?  
 25 Q Your business, please.

1 REDIRECT EXAMINATION  
 2 BY MS. POLLMAN ROGERS:  
 3 Q You have reviewed the cost estimate prepared by Western  
 4 Wireless's Mr. Williams, haven't you?  
 5 A Yes, I have.  
 6 Q And even under his cost comparison the cost to the  
 7 Kennebec customers would be \$2.60; is that correct?  
 8 A That's correct.  
 9 Q Which would be well over the \$2 mark.  
 10 A Yes.  
 11 Q And, again, that does not even address the issue of  
 12 transport --  
 13 MR. WIECZOREK: I'm going to object.  
 14 That's beyond any cross.  
 15 MR. SMITH: Sustained.  
 16 Q You were talking about the survey with counsel. Aside  
 17 from the survey, have you had anyone come in and  
 18 request LNP?  
 19 MR. WIECZOREK: I'm going to object  
 20 as it's beyond cross.  
 21 MR. SMITH: Overruled.  
 22 A No, I have not.  
 23 MS. POLLMAN ROGERS: Thank you.  
 24 That's all.  
 25 MR. SMITH: Further questions?

1 A Mark Benton, 120 East First, Kimball, South Dakota.  
 2 Q What is your occupation?  
 3 A General manager.  
 4 Q And you're appearing today in Docket TC04-052 which is  
 5 the petition of Midstate Communications?  
 6 A That's correct.  
 7 Q Mr. Benton, can you please look at what have been  
 8 marked as Midstate Exhibits 1 and 2?  
 9 A Yes.  
 10 Q And can you identify those?  
 11 A They are -- in which way, Darla?  
 12 Q Exhibit 1, what is Exhibit 1?  
 13 A Exhibit 1 is direct testimony filed by myself and  
 14 rebuttal testimony also.  
 15 Q And the rebuttal would be Exhibit 2. Okay. And were  
 16 these prepared at your -- by you or under your  
 17 direction?  
 18 A Under my direction, yes.  
 19 Q Are there any corrections or additions to your prefiled  
 20 testimony?  
 21 A Yes. I have one correction to my rebuttal testimony.  
 22 Under line 15 I'd like to change the statement from "no  
 23 experience" to "limited experience with LNP through our  
 24 CLEC Midstate Telecom."  
 25 Q What page was that?

1 A 2.  
 2 Q Page 2, line 15. Okay.  
 3 MR. WIECZOREK: Line 15, page 2?  
 4 A It's the second page --  
 5 MR. SMITH: I think it's on page 1.  
 6 A One after the cover page.  
 7 Q So you're just changing "no" to "limited experience"?  
 8 A Correct.  
 9 Q Any other additions or corrections?  
 10 MR. SMITH: Did you also intend to  
 11 add that phrase "through our CLEC" or not or just  
 12 the word "limited"?  
 13 THE WITNESS: I think it would be  
 14 okay to include the words "through our CLEC."  
 15 MR. SMITH: Okay. Thank you.  
 16 Q That's all the corrections and additions?  
 17 A Yes.  
 18 Q Would you please briefly summarize your prefiled  
 19 testimony.  
 20 A To summarize my testimony, I do not believe  
 21 implementing wireline-to-wireless LNP is in the public  
 22 interest based on the fact that Midstate has not  
 23 received requests to date. The demographics of our  
 24 area do not support implementation and internally we  
 25 struggle with justifying the cost versus the benefit of

1 your CLEC and Midstate share some of the same  
 2 employees?  
 3 A That's correct.  
 4 Q So your employees or at least the ones that work in LNP  
 5 have already been trained and understand how to handle  
 6 LNP?  
 7 A That's correct.  
 8 Q If this Commission ordered you to become LNP compliant,  
 9 Midstate to become LNP compliant, you'd use the same  
 10 people to do your LNP work as you use on your CLEC;  
 11 correct?  
 12 A Certainly.  
 13 Q You also have -- turn to your direct testimony, the  
 14 first page after the cover page. I'd like to have  
 15 clarification of one of your answers.  
 16 The question asks whether you have any direct  
 17 points of interconnect but it also says, Does your  
 18 company provide any blocks of number? And you say Yes.  
 19 Do you have direct points of interconnect?  
 20 A With?  
 21 Q With any wireless carrier.  
 22 A Yes.  
 23 Q Okay. How many direct points of interconnect do you  
 24 have and which wireless carriers?  
 25 A I have two with Western Wireless. I have one. Verizon

1 implementing LNP to our members.  
 2 MS. POLLMAN ROGERS: Thank you. At  
 3 this time I would offer Midstate Exhibits 1 and 2.  
 4 MR. WIECZOREK: No objections.  
 5 MS. AILTS WIEST: No objections.  
 6 MR. COIT: No objections.  
 7 MR. SMITH: Midstate's 1 and 2 are  
 8 admitted.  
 9 MS. POLLMAN ROGERS: I would tender  
 10 the witness for cross-examination.  
 11 MR. WIECZOREK: Thank you.  
 12 MR. COIT: No questions.  
 13 MR. SMITH: Mr. Wieczorek.  
 14 MR. WIECZOREK: Thank you,  
 15 Mr. Smith.  
 16 CROSS-EXAMINATION  
 17 BY MR. WIECZOREK:  
 18 Q You're a CLEC. You have a switch -- is the Pukwana  
 19 switch LNP-capable today?  
 20 A Correct.  
 21 Q And you talk about having limited experience with LNP  
 22 through your CLEC. Are you providing LNP through that  
 23 CLEC?  
 24 A Yes, we are.  
 25 Q So your people have been trained -- well, I'm assuming

1 has two.  
 2 Q Two with Western Wireless and then two with --  
 3 A One with Western, two with Verizon.  
 4 Q Okay. Do you provide any blocks in numbers to any  
 5 wireless carrier?  
 6 A No.  
 7 Q Now you understand that the cost analysis done by your  
 8 expert here was based on the routing methods you  
 9 currently use under current arrangements; correct?  
 10 A Correct.  
 11 Q Did you investigate any other types of routing  
 12 arrangements?  
 13 A Based on our contracts we have today, I suspect we  
 14 could not look at those.  
 15 Q So the answer is no, you didn't investigate any other  
 16 routing arrangements?  
 17 A Not to my knowledge.  
 18 Q Is there anything that would prevent you from routing  
 19 traffic over the point of interconnect you currently  
 20 have with Western Wireless, routing ported traffic over  
 21 that point of interconnect?  
 22 A Can you restate that.  
 23 Q Is there anything that would prevent you from routing  
 24 ported number traffic over that point of interconnect  
 25 you currently have with Western Wireless?

1 A I'd defer to Dan Davis, our expert.  
 2 Q So you don't know?  
 3 A I don't know.  
 4 Q Do you understand that Mr. Davis has projected 60 ports  
 5 a year for your company for the first five years of  
 6 LNP?  
 7 A I think he had to populate it with something. I think  
 8 zero would have raised a red flag.  
 9 Q You understand you have the rights to have an end-user  
 10 surcharge apply to recover your costs for LNP  
 11 implementation?  
 12 A Yes.  
 13 Q And you also collect USAC support for your switches;  
 14 correct?  
 15 A Yes.  
 16 Q And high-cost support also?  
 17 A Yes.  
 18 Q And it would be your intent in calculating for future  
 19 support to include any LNP upgrades, wouldn't it?  
 20 A To the best of my knowledge.  
 21 Q To the best of your knowledge yes?  
 22 A Yes.  
 23 MR. WIECZOREK: That's all I have.  
 24 MR. SMITH: Ms. Wiest.  
 25

1 A That is where we switch our CLEC traffic to  
 2 Chamberlain.  
 3 MS. AILTS WIEST: Thanks. That's  
 4 all I have.  
 5 MR. SMITH: Commissioners, any  
 6 questions for Mr. Benton?  
 7 CHAIRMAN SAHR: I have a couple.  
 8 Good morning, Mr. Benton.  
 9 THE WITNESS: Good morning.  
 10 CHAIRMAN SAHR: You mentioned or it  
 11 was mentioned talking about your competitive  
 12 ventures. Can you just talk a little bit about  
 13 where you're offering service in other people's --  
 14 THE WITNESS: Our CLEC?  
 15 CHAIRMAN SAHR: Yes.  
 16 THE WITNESS: We're offering service  
 17 in Chamberlain and the Oacoma area, which is  
 18 actually considered the Chamberlain exchange.  
 19 CHAIRMAN SAHR: Who is the incumbent  
 20 in that area?  
 21 THE WITNESS: Qwest.  
 22 CHAIRMAN SAHR: And with Qwest and  
 23 Midstate is there number portability?  
 24 THE WITNESS: Yes, there is number  
 25 portability between us.

1 CROSS-EXAMINATION  
 2 BY MS. AILTS WIEST:  
 3 Q Mr. Benton, what is your current local rate?  
 4 A Our local rate is 13.95 for rural. Rural business  
 5 14.95. Business is 19.95, except for Platte is \$24.  
 6 Q And do you know how many wireless carriers have the  
 7 authority to serve your area?  
 8 A Two.  
 9 Q And those would be?  
 10 A Western Wireless and Verizon.  
 11 Q And those wireless carriers are currently serving your  
 12 area?  
 13 A Correct.  
 14 Q And how many wireless carriers have requested LNP  
 15 through a BFR?  
 16 A I believe Western Wireless is the only one that was --  
 17 we considered a legitimate BFR. I think Verizon was  
 18 not.  
 19 Q Why wasn't that legitimate? Do you remember?  
 20 A It was more of a memo form -- a lot of stuff has  
 21 happened so --  
 22 Q Okay. So you considered that you have one?  
 23 A To my knowledge, yes.  
 24 Q And you mentioned the Pukwana switch is LNP capable.  
 25 Why is that switch LNP capable?

1 CHAIRMAN SAHR: And is that  
 2 something that you think makes it easier for a  
 3 competitor to advertise his customers to switch  
 4 from one provider to another?  
 5 THE WITNESS: We have not  
 6 experienced that. We only have eight LNP out of  
 7 our total 878 customers.  
 8 CHAIRMAN SAHR: I'm sorry. Could  
 9 you repeat that?  
 10 THE WITNESS: We only have eight  
 11 that have actually ported out of 787.  
 12 CHAIRMAN SAHR: Most of them have  
 13 taken a new phone number on?  
 14 THE WITNESS: Correct.  
 15 CHAIRMAN SAHR: So your actual  
 16 pragmatic practical experience would be, at least  
 17 on the landline to landline side of things, it did  
 18 not appear to be a huge hurdle for people?  
 19 THE WITNESS: No.  
 20 CHAIRMAN SAHR: Thank you.  
 21 MR. SMITH: Ms. Rogers.  
 22 REDIRECT EXAMINATION  
 23 BY MS. POLLMAN ROGERS:  
 24 Q Just a couple of points of clarification. I was just  
 25 going to clarify that the porting at Pukwana, if there

977

1 is any, that would be wireline to wireline; is that  
 2 correct?  
 3 A That's correct.  
 4 Q So that's where your experience to date has been?  
 5 A Yes.  
 6 Q You talked -- or Mr. Wieczorek asked you about direct  
 7 connections with Western Wireless and Verizon. The  
 8 points of interconnection with Western Wireless were  
 9 established for the purpose of delivering  
 10 landline-originated calls that are local; is that  
 11 correct?  
 12 A That's correct.  
 13 Q And so calls that are not local that are interexchange,  
 14 they're not delivered to these points of  
 15 interconnection, are they?  
 16 A That's correct.  
 17 Q They are delivered to an --  
 18 A IXC.  
 19 MS. POLLMAN ROGERS: Thank you.  
 20 Nothing further.  
 21 MR. SMITH: Mr. Wieczorek?  
 22 MR. WIECZOREK: I just have a short  
 23 follow-up.  
 24  
 25

978

1 RE-CROSS EXAMINATION  
 2 BY MR. WIECZOREK:  
 3 Q Out your 787 CLEC lines how many have you added since  
 4 November of 2003?  
 5 A 170.  
 6 Q Okay. Eight of those then would be ports?  
 7 A Through the two years we've had eight ports.  
 8 Q Okay.  
 9 MR. WIECZOREK: Thank you. That's  
 10 all.  
 11 MR. SMITH: Commissioner Burg?  
 12 COMMISSIONER BURG: Of those ports  
 13 which way were they ported?  
 14 THE WITNESS: They retained their  
 15 Qwest number instead of taking our new NXX.  
 16 COMMISSIONER BURG: Have you had any  
 17 that -- have you had any customers switch back to  
 18 Qwest?  
 19 THE WITNESS: One.  
 20 COMMISSIONER BURG: Did that person  
 21 take their number with them?  
 22 THE WITNESS: They took our number.  
 23 COMMISSIONER BURG: That's what I  
 24 meant. But they ported the other way.  
 25 THE WITNESS: They kept our NXX,

979

1 yes.  
 2 COMMISSIONER BURG: This is probably  
 3 not as much of a question as a comment over the  
 4 weekend that came out or the last week came out  
 5 somebody's probably going to put out a directory  
 6 now that we have LNP and I've had more people say I  
 7 don't want to be in the directory than anything.  
 8 They're unhappy because the directory is talking  
 9 about being printed. So the idea of taking that  
 10 number with them is not receptive to everybody.  
 11 MR. SMITH: I have a clarifying  
 12 question on the date of November. Because it was a  
 13 wireline-to-wireline porting situation was that the  
 14 trigger date for implementing LNP, or had you  
 15 implemented it already?  
 16 THE WITNESS: We implemented day one  
 17 when we started.  
 18 MR. SMITH: So you started before  
 19 November.  
 20 THE WITNESS: Yes.  
 21 MR. SMITH: Okay. Thank you.  
 22 Ms. Rogers, anything else?  
 23 MS. POLLMAN ROGERS: That's all.  
 24 Thank you.  
 25 MR. SMITH: Thank you. You're

980

1 excused, Mr. Benton. Thanks a lot.  
 2 Ms. Rogers, please call your next witness.  
 3 MS. POLLMAN ROGERS: We would call  
 4 Todd Hansen, Beresford.  
 5 TODD HANSEN,  
 6 called as a witness, being first duly sworn in the  
 7 above cause, testified under oath as follows:  
 8 DIRECT EXAMINATION  
 9 BY MS. POLLMAN ROGERS:  
 10 Q Good morning.  
 11 A Good morning.  
 12 Q Would you please state your name and business address  
 13 for the record.  
 14 A My name is Todd Hansen, Beresford Municipal Telephone,  
 15 101 North Third Street, Beresford 57004.  
 16 Q What is your occupation?  
 17 A General manager.  
 18 Q And, Todd, how long have you been employed in that  
 19 capacity?  
 20 A Approximately 60 days.  
 21 Q Okay. You took over for -- your predecessor's retired?  
 22 A That's correct.  
 23 Q That was who?  
 24 A Wayne Akland.  
 25 Q That might be a familiar name down here. So you walked

1 into LNP as part of your duties; is that correct?  
 2 A Yes, I did.  
 3 Q You have in front of you what has been marked as  
 4 Beresford Exhibits 1 and 2, and we are in Docket  
 5 04-048. Can you identify those.  
 6 A Yes. Exhibit 1 is my direct prefiled testimony and  
 7 Exhibit 2 is my rebuttal testimony.  
 8 Q Did you prepare these or were they prepared at your  
 9 direction?  
 10 A Yes, I did.  
 11 Q Do you have any corrections or additions that you would  
 12 like to make to your prefiled testimony?  
 13 A Yes, I do.  
 14 Q What would those be?  
 15 A On the first page, Does your company have any direct  
 16 points of interconnection? Yes, we do. Direct  
 17 interconnection with Sprint.  
 18 Q Okay. And this would be the first page of your direct  
 19 testimony?  
 20 A That's correct.  
 21 Q On line 12?  
 22 A That's right.  
 23 Q Any other additions or corrections?  
 24 A Yes. On the first page, question 16.  
 25 Q The question on line 16, you mean?

1 A That's correct.  
 2 Q And that's the current method of routing calls from  
 3 your subscriber's landline phones to wireless phone  
 4 numbers?  
 5 A Yes. I'd like to add to the answer 751 is routed  
 6 directly to Sprint.  
 7 Q So you would add that on the end of line 21?  
 8 A That's correct.  
 9 Q Any other additions or corrections?  
 10 A No.  
 11 Q And other than those additions and corrections if I  
 12 asked you the questions contained in Beresford Exhibits  
 13 1 and 2 today, would your answers be the same?  
 14 A Yes.  
 15 Q Would you please briefly summarize your prefiled  
 16 testimony?  
 17 A Since we have received no customer requests for LNP it  
 18 would seem that there is little interest, necessity or  
 19 customer demand for the convenience of LNP. As such,  
 20 it would seem to be in conflict with the public  
 21 interest to require the implementation of LNP at this  
 22 time because of the kind of costs that would be  
 23 involved.  
 24 MS. POLLMAN ROGERS: At this time we  
 25 would offer Beresford Exhibits 1 and 2.

1 MR. LEWIS: No objection.  
 2 MR. COIT: No objection.  
 3 MS. AILTS WIEST: No objection.  
 4 MR. SMITH: Thank you. Beresford 1  
 5 and 2 are admitted.  
 6 MS. POLLMAN ROGERS: We would tender  
 7 the witness for cross-examination.  
 8 MR. COIT: No questions.  
 9 MR. SMITH: Mr. Lewis.  
 10 MR. LEWIS: Thank you. Good  
 11 morning, members of the Commission, counsel.  
 12 CROSS-EXAMINATION  
 13 BY MR. LEWIS:  
 14 Q Good morning to you, Mr. Hansen.  
 15 A Good morning.  
 16 Q My name is Paul Lewis and I represent Western Wireless  
 17 in this Docket and I have a few questions for you.  
 18 Sir, you understand that in 1996 the FCC made  
 19 LNP a requirement, did they not?  
 20 A Yes.  
 21 Q And then by virtue of their Order on November 10 of  
 22 2003 they ordered compliance for your company to be  
 23 achieved by May 24, 2004 unless you have an exception  
 24 for that; correct?  
 25 A That's correct.

1 Q You also understand, sir, that federal law or FCC  
 2 regulations allow you to recover some of the costs for  
 3 LNP implementation through a surcharge?  
 4 A I don't know.  
 5 Q Have any wireless carriers requested LNP from you?  
 6 A Not to the best of my knowledge.  
 7 Q Sir, would you refer to your direct testimony on page  
 8 2, line number 7, the question which states, "Have any  
 9 wireless carriers requested LNP?" And your answer on  
 10 line 8 is?  
 11 A It is "Yes."  
 12 Q Thank you.  
 13 A Can I restate that? We have had -- reviewing the file  
 14 we have had bona fide requests from three carriers.  
 15 Q Who would those three carriers be?  
 16 A I believe they're Verizon, Sprint, and Western  
 17 Wireless.  
 18 Q Thank you. Sir, for your cost numbers filed before the  
 19 Commission you basically relied on Mr. Davis's work,  
 20 did you not?  
 21 A Yes.  
 22 Q And do you understand how he came up with the analysis?  
 23 A Generally I do, yes.  
 24 Q So you have a working knowledge of it?  
 25 A A little bit.

1 Q Okay. And in your testimony on page 2 -- and as well  
 2 as what you stated before the Commission a few moments  
 3 ago you said that basically there's no customer  
 4 interest for LNP; correct?  
 5 A To the best of my knowledge, no.  
 6 Q Did you know that your cost analyst estimated at least  
 7 24 ports per year would be requested?  
 8 A I'm aware of those figures.  
 9 Q Would it surprise you to know that over the next five  
 10 years you're going to lose approximately 8 percent of  
 11 your wire lines to porting?  
 12 A I don't know.  
 13 Q You have already established points of interconnection,  
 14 POIs, with SDN and Qwest; correct? Those already  
 15 exist?  
 16 A I believe so.  
 17 Q Today before the Commission do you have any demographic  
 18 information to present concerning your customer  
 19 preferences or --  
 20 A No, I do not.  
 21 Q -- their general demographics? And in addition to that  
 22 you have not done any independent or internal surveys  
 23 from your office to survey your customers on this  
 24 issue?  
 25 A I myself have not.

1 Q Sir, you review your revenue numbers on a regular  
 2 basis, do you not, in your 60 days?  
 3 A No, I do not.  
 4 Q Do you have an understanding what your revenue numbers  
 5 are?  
 6 A To a certain extent.  
 7 Q Okay. Would you agree that USAC is part of those  
 8 revenue numbers?  
 9 A I don't know.  
 10 Q Do you know whether or not you can collect high-cost  
 11 support, switch support through USAC payments if that's  
 12 available through USAC?  
 13 A I've heard the terms, but to be honest, I don't know.  
 14 Q Sir, to date have you investigated any other porting or  
 15 routing options?  
 16 A I have not.  
 17 Q In the course of conversations with your consultants,  
 18 would you agree that LNP is technically feasible?  
 19 A I don't know.  
 20 Q And if the Commission requested -- or if the Commission  
 21 required you to implement LNP, you would have the  
 22 ability to finance and pay for it; correct?  
 23 A That's correct.  
 24 MR. LEWIS: Thank you. No further  
 25 questions.

1 MR. SMITH: Ms. Wiest.  
 2 CROSS-EXAMINATION  
 3 BY MS. AILTS WIEST:  
 4 Q Mr. Hansen, what is your current local rate?  
 5 A \$7 residential, 17.50 business.  
 6 Q And do you know how many wireless carriers have the  
 7 authority to serve your area?  
 8 A I believe there's three.  
 9 Q And those would be the same three that have requested a  
 10 BFR, Verizon, Sprint, and Western Wireless?  
 11 A That's what I'm basing my answer off of, yes.  
 12 Q To your knowledge those carriers are currently serving  
 13 your area?  
 14 A Yes.  
 15 MS. AILTS WIEST: Thank you. That's  
 16 all I have.  
 17 MR. SMITH: Commissioner questions?  
 18 Ms. Rogers.  
 19 REDIRECT EXAMINATION  
 20 BY MS. POLLMAN ROGERS:  
 21 Q In your 60 days on the job have you had any requests  
 22 for LNP?  
 23 A No, I have not.  
 24 Q And in that time you haven't really had the opportunity  
 25 or time to do any surveys or anything like that, have

1 you?  
 2 A No, I have not.  
 3 MS. POLLMAN ROGERS: Thank you.  
 4 That's all.  
 5 MR. SMITH: Mr. Lewis?  
 6 MR. LEWIS: No further questions.  
 7 MR. SMITH: You're excused,  
 8 Mr. Hansen. Thank you for your testimony.  
 9 THE WITNESS: Thank you.  
 10 MR. SMITH: Are we moving to a  
 11 different category here?  
 12 MS. POLLMAN ROGERS: Yes.  
 13 MR. SMITH: Do you want to take a  
 14 short break or do you want to plow forward?  
 15 MS. POLLMAN ROGERS: Let's take  
 16 maybe 5 minutes.  
 17 MR. SMITH: Okay.  
 18 (A short recess is taken)  
 19 MS. POLLMAN ROGERS: Petitioners  
 20 would call Dan Davis to the stand.  
 21 DAN DAVIS,  
 22 called as a witness, being first duly sworn in the  
 23 above cause, testified under oath as follows:  
 24 (Exhibit Western 1, Davis 1 and 2, Midstate 1 through  
 25 3, Beresford 1 through 3, and Kennebec 1 through 3 are

1 marked for identification)  
 2 DIRECT EXAMINATION  
 3 BY MS. POLLMAN ROGERS:  
 4 **Q** Good morning.  
 5 **A** Good morning.  
 6 **Q** Would you please state your name and business address  
 7 for the record.  
 8 **A** Yes. My name is Dan Davis. I am employed with Telec  
 9 Consulting Resources. My business address is  
 10 233 South 13th Street, Suite 1225, Lincoln, Nebraska  
 11 68508.  
 12 **Q** And you are appearing today on behalf of five  
 13 companies; is that correct?  
 14 **A** That is correct.  
 15 **Q** Could you identify them?  
 16 **A** Yes. Kennebec Telephone Company, Midstate  
 17 Communications, Inc., Beresford Municipal Telephone  
 18 Company, Western Telephone Company, RC Communications,  
 19 Inc., and Roberts County Telephone Cooperative  
 20 Association.  
 21 **Q** And could you please just very briefly give us a  
 22 background of your experience.  
 23 **A** I've been employed in the telecommunications industry  
 24 for 19 years. I worked in the areas of regulatory  
 25 policy and analysis at a company called Lincoln

1 Telephone Company, later renamed Aliant Communications  
 2 and was later bought out by ALLTEL Communications.  
 3 During that period of time I also worked as  
 4 the regulatory and finance manager for a start-up CLEC  
 5 organization based in Omaha, Nebraska.  
 6 **Q** You may have stated this, and I did not hear you, but  
 7 how long have you been with Telec?  
 8 **A** I've been with Telec for three and a half years.  
 9 **Q** Thank you. There are several exhibits on the table in  
 10 front of you, and I would first of all direct your  
 11 attention to Davis Exhibits 1 and 2. Could you please  
 12 identify those exhibits?  
 13 **A** Exhibit 1 is my direct testimony that I filed on behalf  
 14 of the companies I just mentioned. Exhibit 2 is my  
 15 rebuttal testimony that I filed in the Dockets that I  
 16 also just mentioned.  
 17 **Q** And in addition to Davis Exhibits 1 and 2, did you also  
 18 file direct testimony in each Docket of the companies  
 19 you represent?  
 20 **A** Yes, I did.  
 21 **Q** I would ask you then to look at Beresford Exhibit 3,  
 22 Kennebec Exhibit 3, Midstate Exhibit 3, and Western  
 23 Telephone Company Exhibit 1.  
 24 **A** I have looked at them.  
 25 **Q** And can you tell me what those documents are?

1 **A** Those documents are the testimony on specific costs for  
 2 the specific companies.  
 3 **Q** Do you have any corrections or additions you would like  
 4 to make to any of your prefiled testimony?  
 5 **A** I believe, yes. On page 9 of Exhibit 1.  
 6 **Q** That would be Davis Exhibit 1?  
 7 **A** Yes. On line 17 where it says, "pages N-1 through N-10  
 8 of Exhibit B" should be changed to "N-1 through N-9 of  
 9 Exhibit A."  
 10 **Q** And do you have any other additions or corrections to  
 11 your prefiled testimony?  
 12 **A** I do not at this time.  
 13 **Q** Mr. Davis, if I asked you the questions contained in  
 14 all of the exhibits we've just been discussing today,  
 15 would your answers be the same?  
 16 **A** Yes, they would.  
 17 **Q** Could you please briefly summarize your prefiled  
 18 testimony?  
 19 **A** Yes. After the FCC released its November 10, 2003  
 20 intermodal local number portability order personnel  
 21 representing each of the RLECs that I represent and  
 22 Telec Consulting personnel began an in depth analysis  
 23 of new processes which would be required to implement  
 24 local number portability and costs that would have to  
 25 be incurred to implement local number portability.

1 This review included the preparation of an estimate of  
 2 costs related to local number portability for each of  
 3 the RLECs. And I refer to the RLECs as basically the  
 4 companies that I represent here today. I will discuss  
 5 them as the RLECs.  
 6 A detailed explanation of the estimate is  
 7 contained in my direct testimony. Each unique  
 8 individual RLEC estimate reflects the cost of local  
 9 number portability as calculated for each company. If  
 10 the RLECs are not responsible for transport costs,  
 11 which we contend that they are not, the estimate -- or  
 12 the estimated costs for local number portability range  
 13 from a per-line per-month cost of \$1.15 for Midstate  
 14 Communications to \$4.56 per line per month for Western  
 15 Telephone Company.  
 16 If for some reason the RLECs would be  
 17 financially responsible for transporting calls using  
 18 DS-1 direct connections, the estimated costs range from  
 19 a low of \$3.04 per line per month for Midstate  
 20 Communications to \$11.58 per line per month for  
 21 Kennebec Telephone Company.  
 22 The estimates are organized between one-time  
 23 nonrecurring costs to implement local number  
 24 portability and monthly recurring local number  
 25 portability costs.

1 In summary, the overall nonrecurring costs  
 2 for local number portability for the RLECs, estimates I  
 3 completed as approximately \$519,000. And just for  
 4 clarification that number does include RC and Roberts  
 5 Communications. And for comparison, the estimated  
 6 costs completed by Mr. Williams for these same  
 7 companies was approximately \$469,000.

8 The cost categories that are included on the  
 9 RLEC's cost exhibits are the same cost categories as  
 10 was explained by Mr. Bullock last week.

11 With respect to transport costs, the RLECs  
 12 calculated transport costs using a DS-1 direct  
 13 connection from each host or stand-alone end office  
 14 switch location. Traffic that originates from a remote  
 15 switch was assumed to be transported on the same DS-1  
 16 as used by its host switch.

17 For example, in the case of Kennebec  
 18 Telephone Company, Presho is remote off of the Kennebec  
 19 host switch. In this example one DS-1 was assumed to  
 20 be placed from the Kennebec host to each wireless  
 21 provider's point of interconnection or POI. A separate  
 22 DS-1 from Presho was not assumed or used in the cost  
 23 calculation.

24 Calls to ported numbers would then be carried  
 25 over these DS-1s to a POI located within an RLEC's

1 3, Midstate 3, Beresford 3 and is it Western 1?  
 2 MS. POLLMAN ROGERS: Yes.  
 3 MR. SMITH: Are admitted.  
 4 MS. POLLMAN ROGERS: Thank you. I  
 5 would tender the witness for cross-examination.  
 6 MR. COIT: No questions.  
 7 MR. SMITH: Mr. Wieczorek.  
 8 MR. WIECZOREK: Thank you,  
 9 Mr. Smith.

CROSS-EXAMINATION

BY MR. WIECZOREK:

11  
 12 Q Mr. Davis, I'm going to ask you some general questions,  
 13 and then I'm probably going to ask cost-specific  
 14 questions to the companies that have either already  
 15 testified or in Western's case isn't submitting  
 16 corporate testimony.

17 If you're ever confused as to whether I'm  
 18 asking about a specific company or just generally, just  
 19 let me know, all right?

20 A Okay.

21 Q The one place I'd like to start is your rebuttal  
 22 testimony, Exhibit R-1.

23 A Okay.

24 Q Which you have in front of you; correct?

25 A I have that in front of me, correct.

1 service area or exchange where the RLEC would then  
 2 connect with the wireless provider who would transport  
 3 the calls back to its switch. This routing arrangement  
 4 was assumed for two reasons. First, routing of local  
 5 calls to a point of interconnection located within the  
 6 RLEC exchange is consistent with the terms of the  
 7 Interconnection Agreement entered into between Western  
 8 Wireless and the RLECs.

9 Second, RLECs do not route local traffic to a  
 10 point of interconnection outside of its local exchange  
 11 or service area. Requiring RLECs to route traffic to a  
 12 point of interconnection outside of its exchange or  
 13 service area would add the responsibility of a LEC from  
 14 providing local exchange service and exchange access to  
 15 providing interexchange service as well.

16 And this concludes my summary.

17 Q Thank you.

18 MS. POLLMAN ROGERS: At this time  
 19 Petitioners would offer Davis Exhibits 1 and 2,  
 20 Beresford Exhibit 3, Kennebec Exhibit 3, Midstate  
 21 Exhibit 3, and Western Telephone Company Exhibit 1.

22 MR. WIECZOREK: I have no objection.

23 MR. COIT: No objection.

24 MS. AILTS WIEST: No objection.

25 MR. SMITH: Davis 1 and 2, Kennebec

1 Q And this is a matrix showing your costs -- or your  
 2 projected costs and then showing the costs as reflected  
 3 on Western Wireless's Exhibit 5A, 5A being the exhibit  
 4 to Mr. Williams' direct, for the record; correct?

5 A That is correct.

6 Q Are these your most up-to-date numbers, the numbers  
 7 reflected on Exhibit R-1?

8 A Yes.

9 Q Okay. And the reason I ask is there was a cost exhibit  
 10 attached to the petition and then some of those numbers  
 11 were modified as part of, I believe, your direct;  
 12 correct?

13 A That is correct.

14 Q But rather than work off of those cost exhibits, if we  
 15 work off of R-1, that should be your most up-to-date  
 16 numbers for all companies?

17 A That is correct.

18 Q So when we're talking about numbers let's refer to R-1.

19 A Okay.

20 Q Now you're not testifying to this Commission that LNP  
 21 is technically infeasible, you're just presenting  
 22 testimony regarding the cost to implement; correct?

23 A Well, I am presenting cost but I believe in my direct  
 24 testimony I did state that I believe that it is  
 25 technically infeasible under the current arrangements.

1 Q Under the current cost?  
 2 A Under the current routing arrangements that are in  
 3 place today, I believe my testimony was that it is  
 4 technically infeasible to route traffic down those  
 5 trunk groups.  
 6 Q Yeah. But that's trunk groups. And I don't want to  
 7 get into any confusion here but what you have proposed,  
 8 your method, that's technically feasible today;  
 9 correct?  
 10 A That is correct, yes.  
 11 Q Okay. And if I understand your testimony correctly,  
 12 you contend that Western Wireless's proposal is  
 13 technically infeasible because of the existing  
 14 agreements.  
 15 A That is correct.  
 16 Q Mr. Bullock's with your company too; correct?  
 17 A That is correct.  
 18 Q And if I understand your and his testimony correctly,  
 19 your prefiled testimony, both you and he are proposing  
 20 your proposed routing, the one that you say is  
 21 technically feasible today -- you guys are proposing  
 22 the identical type of way to route; correct?  
 23 A Correct, yes.  
 24 Q You guys are essentially using the same type of  
 25 breakdown in formula but you're testifying for some

1 Q I would like to start with Western Wireless Exhibit No.  
 2 16. I'll show it to you. To establish your costs you  
 3 asked the companies that you were testifying on behalf  
 4 of to obtain some information on switch upgrades and  
 5 things like that; correct?  
 6 A Correct.  
 7 Q Now that's a letter to the Kennebec manager that sets  
 8 forth some switch upgrade costs; correct?  
 9 A Yes.  
 10 Q And what's the -- I'm sorry. What's the first line of  
 11 that switch upgrade cost?  
 12 A Cost to upgrade the host office.  
 13 Q This upgrade -- so they're upgrading the host office.  
 14 That upgrade doesn't make Kennebec LNP compliant, would  
 15 it, that one-line upgrade?  
 16 A Well, if they don't upgrade this software to this  
 17 generic, they cannot implement local number  
 18 portability.  
 19 Q That's the generic baseline upgrade they need?  
 20 A That's correct.  
 21 Q If I can use the word that's the platform they have to  
 22 launch LNP from?  
 23 A That is correct, yes.  
 24 Q What other benefits will they derive from that upgrade?  
 25 A Actually I don't know.

1 companies and he's testifying for others?  
 2 A That is correct.  
 3 Q You provide -- I believe you actually said in your  
 4 summary that you actually provide services to other  
 5 rural LECs besides the ones you're testifying here for.  
 6 A That is correct.  
 7 Q What other states do you represent rural LECs?  
 8 A Telec Consulting does business in Nebraska,  
 9 South Dakota, Iowa, and Ohio.  
 10 Q Okay. And you have actually some of your companies  
 11 have already started providing LNP; is that correct?  
 12 A I am aware of at least one, yes. Well, in addition to  
 13 Midstate Communications. Just as a matter of  
 14 clarification are you talking about wireline to  
 15 wireline or wireless to -- or wireline to wireline or  
 16 wireline to wireless?  
 17 Q For the purposes of my questions since I represent  
 18 Western Wireless -- I'm sorry, I should have identified  
 19 that, the questions will be based on wireline to  
 20 wireless.  
 21 A Okay.  
 22 Q And, again, if you have a question as to whether it  
 23 goes beyond that, make sure you ask me before  
 24 responding.  
 25 A Okay.

1 Q Okay. So you don't know if that provides extra  
 2 services?  
 3 A I don't know.  
 4 Q Okay. But you're including that as a cost for LNP  
 5 upgrade even though it might include other services?  
 6 A Well, as I stated, without including or upgrading to  
 7 this generic, customers aren't going to get LNP.  
 8 Q Your companies upgrade their switches and software on a  
 9 regular basis, don't they?  
 10 A On a regular basis, I'm assuming, yes.  
 11 Q Can you testify as to how long they could go in their  
 12 current -- with their current software for doing that  
 13 upgrade that's listed on line 1 if they didn't have to  
 14 go LNP compliant?  
 15 A No, I couldn't. I don't know.  
 16 Q Did you ask your client whether they projected doing  
 17 that upgrade at any time in the near future anyway?  
 18 A I did not, no.  
 19 Q Okay. So for Kennebec what you've projected, switch  
 20 upgrade costs of 47,9. How much is that a platform  
 21 upgrade?  
 22 A It was the 31,400 plus the \$6,000 of installation and I  
 23 believe that that pro rata coverage line also would be  
 24 included in the generic upgrade.  
 25 Q Okay. So how much of that then from that platform

1 would be the upgrade just for the LNP software?  
 2 A For the software specifically --  
 3 Q For LNP?  
 4 A -- for LNP was the \$3,904 and the 20 hours of  
 5 translations cost.  
 6 Q And what was that cost?  
 7 A 3,700.  
 8 Q So something less than \$8,000?  
 9 A Yeah.  
 10 Q I'd like to talk about your Midstate's upgrade costs.  
 11 You obtained that information from Midstate also?  
 12 A Yes.  
 13 Q Now you have some of your documents sitting in front of  
 14 you, and not all of these -- the documents that you  
 15 have in front of you is information you obtained from  
 16 the companies so you could establish your basis for  
 17 some of these upgrade costs; correct?  
 18 A I had discussions either with the company or with the  
 19 company's technical engineer.  
 20 Q Okay. What is included in Midstate's switch upgrade  
 21 cost? Can you tell me?  
 22 A They would have to upgrade each one of their switches.  
 23 Q When you say --  
 24 A For the LNP software.  
 25 Q Okay. So when you talk about upgrade each one of their

1 A Okay.  
 2 MS. POLLMAN ROGERS: Just a minute.  
 3 Could we please have some clarification. Who's it  
 4 from?  
 5 MR. WIECZOREK: This is an e-mail  
 6 that's been produced pursuant to discovery to Tom  
 7 Bullock from Peg and it has reasons -- it was  
 8 produced pursuant to discovery by Midstate and it  
 9 has Re: LNP cost estimation supporting  
 10 documentation. It's identified as Peggy Reinesch,  
 11 R-E-I-N-E-S-C-H, office manager Midstate  
 12 Communications.  
 13 MS. POLLMAN ROGERS: Which discovery  
 14 round was that?  
 15 MR. WIECZOREK: Second round of  
 16 discovery.  
 17 Q Could you read it out loud for the record, that first  
 18 item.  
 19 A Sure.  
 20 Q I'll just have you take it out. It will be easier to  
 21 refer to.  
 22 A All right. "Switch upgrade cost Nortel DMS-10,  
 23 \$28,849.60. The activation fee would be waived since  
 24 we are using an SR-10 program at a cost of 91,540 for  
 25 the years 2004 and 2005."

1 switches for the LNP software, could you give me how  
 2 much you calculate that to be?  
 3 A You want switch by switch or in total?  
 4 Q Just a total would be fine because that's how you have  
 5 it on your Exhibit R-1.  
 6 A Okay. 29,460.  
 7 Q Okay. And that covers the activation fee for the LNP  
 8 software?  
 9 A I don't have any activation fee down.  
 10 Q Okay. What else do you have under that then?  
 11 A Switch translations and installation.  
 12 Q Installation of the software?  
 13 A Yes.  
 14 Q Okay. And what else is under that?  
 15 A TAS assistance.  
 16 Q What's TAS assistance?  
 17 A Technical assistance support.  
 18 Q Okay. And then finally -- well, anything else that's  
 19 contained under that?  
 20 A No.  
 21 Q All right. I'm going to show you a copy of an e-mail  
 22 that went to Mr. Bullock providing some information on  
 23 switch upgrade costs. Can you read that first item on  
 24 switch upgrade costs out loud for the record, please.  
 25 It starts with number 1.

1 Q So the first number that I believe you used and related  
 2 to me, is that switch upgrade costs, the 28,849.60?  
 3 A Approximately, yes.  
 4 Q So what does that entail if the activation fee is being  
 5 waived?  
 6 A That's the cost per equipped line. That is what Nortel  
 7 charges their DMS-10 subscribers on an equipped line  
 8 basis.  
 9 Q That's not part of the activation fee?  
 10 A The 29,460 or that first number that I read on that  
 11 e-mail is -- no. There's no activation fee in the  
 12 29,460.  
 13 Q All right. Okay. Then I have some questions on the  
 14 Western telephone switch upgrade costs.  
 15 A Okay.  
 16 Q Do you have your summary?  
 17 A I do.  
 18 Q Okay.  
 19 A Actually I don't have -- are you looking at something  
 20 specific?  
 21 Q Yeah. In fact, why don't I go ahead and mark it. It  
 22 will be easier than you hunting it down.  
 23 A Okay.  
 24 (Exhibit WWC 17 is marked for identification)  
 25 Q This has been marked as Western Wireless Exhibit 17,

1005

1 and, Mr. Davis -- I almost called you Mr. Bullock. I  
 2 apologize. Can you identify what Western Wireless  
 3 Exhibit No. 17 is for the record, please.  
 4 **A** It's the cost to upgrade the Western telephone switch.  
 5 **Q** And this is actually from your files, your information  
 6 of how you calculated this?  
 7 **A** This is also -- I received the information from their  
 8 engineering consultant.  
 9 **Q** Yeah. And then you plugged it in to this calculation  
 10 and you came up with the Western number of \$145,900?  
 11 **A** That's correct.  
 12 **Q** And again on this -- similar to what you had on  
 13 Kennebec you have an upgrade to host switch; correct?  
 14 **A** That is correct.  
 15 **Q** And that is 76,795.  
 16 **A** That's correct.  
 17 **Q** And the install for the upgrade, that's just related to  
 18 the upgrade of the host switch, it's not related to LNP  
 19 software; correct?  
 20 **A** Well, I would answer it in a like manner that I did  
 21 with Kennebec. In order to have the LNP functionality,  
 22 they'd have to upgrade their switch.  
 23 **Q** Okay. And then the spares, is that related to upgrade  
 24 of the host where it says spares, third line?  
 25 **A** Those would -- since they're above the line item called

1006

1 LNP software and installation it would be related to  
 2 the upgrade of the host.  
 3 **Q** Okay. And did you check with Western as to whether  
 4 they got any other services based on this upgrade to  
 5 the host?  
 6 **A** No, I didn't.  
 7 **Q** Did you check with Western as to whether they had  
 8 planned to upgrade this host at any time in the future?  
 9 **A** I did not.  
 10 **Q** So once the host is upgraded the only LNP-related  
 11 cost -- or the only costs related to bringing the host  
 12 LNP compliant are the last three lines on Exhibit 17;  
 13 is that correct? Or the last three items.  
 14 **A** Well, again, they have to upgrade their switch in order  
 15 to have the LNP capability.  
 16 **Q** Right. Have you ever worked with SDTA before?  
 17 **A** SDTA?  
 18 **Q** Yeah. South Dakota Telecommunications Association.  
 19 **A** I've had discussions with Rich Coit before, yes.  
 20 **Q** Well, the reason I ask, under other internal costs you  
 21 have included costs of negotiating porting agreements  
 22 with cellular providers, intercarrier porting forms and  
 23 trading partner profiles as part of the expenses; is  
 24 that correct?  
 25 **A** That is correct.

1007

1 **Q** And in projecting those costs you've assumed every  
 2 company you're testifying for will do that on their  
 3 own; correct?  
 4 **A** I'm not sure if I actually assume that or not.  
 5 **Q** Well --  
 6 **A** I mean, I --  
 7 **Q** There's no reference in any of the materials you  
 8 provided through discovery where you considered  
 9 economies of scale if some of these companies went  
 10 together.  
 11 **A** I don't know. Three days per contract I assumed was  
 12 fairly efficient.  
 13 **Q** Right. And if -- did you know that SDTA often group  
 14 negotiates with cellular providers to save costs to all  
 15 of its members?  
 16 **A** I'm not aware of that.  
 17 **Q** So you didn't take that into consideration, that SDTA  
 18 might negotiate all of these agreements --  
 19 **A** No, I didn't. I didn't ask SDTA to do our cost  
 20 analysis.  
 21 **Q** Now to the extent that a wireless company already has a  
 22 point of interconnect with a switch of one of your  
 23 companies you're testifying on behalf of, there would  
 24 be no additional transport costs; correct?  
 25 **A** I'm going to make sure I understand your question so I

1008

1 can answer it correctly. I mean, do you want me to  
 2 explain to you --  
 3 **Q** How about if I use an example.  
 4 **A** Okay.  
 5 **Q** And though this current situation doesn't exist, I'm  
 6 going to take it as a hypothetical. You used Kennebec  
 7 before.  
 8 **A** Okay.  
 9 **Q** If Western Wireless or any other cellular company, for  
 10 that matter or CMRS provider, had a point of  
 11 interconnect with Kennebec at its switch in Kennebec,  
 12 there would be no related -- there would be no increase  
 13 in transport costs under the method that you have  
 14 proposed.  
 15 **A** That is correct. That was our cost assumption.  
 16 **Q** And the only reason you have transport costs for  
 17 Kennebec is because currently there is not an existing  
 18 point of interconnect at that switch; right?  
 19 **A** Correct.  
 20 **Q** Have you had any conversations or discussions with  
 21 Qwest on routing traffic as proposed by Western  
 22 Wireless in this proceeding?  
 23 **A** No.  
 24 **Q** And in fact, if I understand your summary correctly,  
 25 the only avenue you addressed or did an analysis of is

1009

1 what is in front of us today?

2 A It was based upon what's in the Interconnection

3 Agreement.

4 Q My understanding from reviewing the materials you've

5 submitted through discovery is that you're projecting

6 24 ports for Western telephone; is that correct?

7 A I would not call what I did to be any sort of estimate

8 for demand. Basically what we were trying to show or

9 what I was trying to show is a causal relationship

10 between some level of demand and the resulting cost.

11 There's certainly no empirical evidence that

12 supports any level of demand. I could have picked

13 zero. I could have picked two. I could have picked

14 five. Basically I was just trying to show a

15 relationship between a specific demand level and what

16 the resulting costs would be.

17 Q If I understand what you're saying is you put some

18 ports in there because that would increase some of the

19 porting costs --

20 A Well, I mean, I suppose I could have put zero but then

21 I would have to ask well, what are we here for.

22 Q Okay. And you have not done any kind of -- frankly the

23 question I have, and that is you haven't done any

24 independent studies as to what the actual demand is in

25 any of these areas; correct?

1010

1 A Are you asking if I've done it personally? No, I have

2 not done any analysis personally.

3 Q And short of the discussion on the Kennebec, which was

4 done by Telec, done by Ms. --

5 A Vanicek?

6 Q Thank you. Ms. Vanicek. You haven't done any for any

7 of the companies you're testifying on behalf of --

8 A I have not done any empirical analysis.

9 Q Well, Telec hasn't, besides the one --

10 A That's correct.

11 MR. WIECZOREK: I'm going to move

12 for admission of Western Wireless Exhibit 17.

13 MS. POLLMAN ROGERS: Could you just

14 clarify again, was this attached as one of our

15 exhibits to the discovery?

16 MR. WIECZOREK: Exhibit 17 was

17 presented in a CD format represented as the Telec

18 numbers.

19 MS. POLLMAN ROGERS: To our direct

20 testimony?

21 MR. WIECZOREK: No. It was attached

22 to the discovery.

23 MS. POLLMAN ROGERS: Was it in this

24 format?

25 MR. WIECZOREK: Yes. Identical.

1011

1 MS. POLLMAN ROGERS: I have no

2 objections. Thank you.

3 MR. COIT: No objections.

4 MR. SMITH: Western Wireless 17 is

5 admitted.

6 MR. WIECZOREK: That's all I have.

7 MR. SMITH: Ms. Wiest.

8 CROSS-EXAMINATION

9 BY MS. AILTS WIEST:

10 Q Mr. Davis, could you go to page 3, line 11 of your

11 direct testimony?

12 A Okay. Page 3, line --

13 Q 11. You say, "Many of the RLECs would process LSRs and

14 FOCs through their system manually if LNP would be

15 required to be implemented."

16 A Okay.

17 Q Is that what you assumed for the RLECs in this case,

18 all of them?

19 A Yes.

20 Q Okay. And then if you could go to page 12, line 7,

21 still in your direct.

22 A Okay.

23 Q And above there you're talking about S-O-A or SOA. I

24 believe you stated used the low-cost provider, not the

25 full-scale service bureau. Do you know is the low-cost

1012

1 provider, is that considered to be an automated system?

2 A Not the option that our companies would -- the RLECs

3 that I'm representing would use. No, it would not be

4 an automated process.

5 Q Okay. Thank you. And then just generally talking

6 about your nonrecurring transport charges, is it

7 correct that you took \$700.25 per point of

8 interconnection?

9 A For the nonrecurring costs? Let me verify that that is

10 correct.

11 Q And excluding Midstate.

12 A Okay.

13 Q If you just look at Kennebec or Beresford.

14 A \$700.25 for nonrecurring per DS-1.

15 Q Okay. My question is -- and let's just look at

16 Western. What did you multiply -- you multiplied that

17 times 2; is that correct?

18 A Correct.

19 Q What was that 2 based on?

20 A A DS-1 to each wireless provider.

21 Q So the number you multiply it by is based on the number

22 of wireless providers in the area?

23 A Right. So if the assumption was that there were two

24 wireless providers, we would place a DS-1 to each

25 wireless provider.

1 Q Then could you go to Midstate then. Did you also use  
 2 the 700 number for that?  
 3 A No, I did not.  
 4 Q And how did you come up -- did you use 387?  
 5 A The 387 was the nonrecurring cost in the NECA tariff as  
 6 opposed to NECA tariff and the Qwest tariff.  
 7 Q And what was the difference? Why did you use that?  
 8 A Well, in the Midstate example they have Western  
 9 Wireless and Verizon have direct interconnections.  
 10 Q Right.  
 11 A And, therefore, the assumption was that the direct  
 12 connect would actually not go all the way back to a  
 13 rate center such as Sioux Falls. The assumption was  
 14 that the DS-1s would actually go back to the point of  
 15 interconnection in Kimball or in Platte, wherever the  
 16 point of interconnections are.  
 17 Q And did you multiply that times 10?  
 18 A Yes.  
 19 Q And where did you come up with 10? Because you didn't  
 20 use wireless carriers for the multiplier then?  
 21 A No. That was the number of switches that LNP would be  
 22 deployed in.  
 23 Q And then how many ports, estimated ports, did you use  
 24 for Midstate? Did you use zero?  
 25 A Again, as a point of clarification, are you asking what

1 did I use in my cost analysis?  
 2 Q Yes.  
 3 A Okay. I did not use zero.  
 4 Q Okay. What did you use?  
 5 A Six per month.  
 6 MR. SMITH: I want to make a note on  
 7 the record that Commissioner Burg left.  
 8 Q You used six per month?  
 9 A Yes.  
 10 Q Okay. And then could you explain on your Exhibit R-1  
 11 for Midstate, if you look under LNP monthly recurring  
 12 costs under SOA monthly charge.  
 13 A Okay.  
 14 Q And then why do you have no numbers there or zero?  
 15 A Because Midstate has -- their CLEC has implemented  
 16 local number portability.  
 17 Q Right.  
 18 A They are using an automated SOA, and the assumption was  
 19 is that they would continue to use that automated SOA  
 20 and that they would not have any incremental monthly  
 21 cost.  
 22 Q Now when you were talking about how you came up with  
 23 the number of ports that you used I believe you stated  
 24 it wasn't an estimate for demand. Then how did you  
 25 come up with the different numbers for the different

1 companies?  
 2 A Just basically -- what was it? Basically looked at  
 3 size of companies and used different numbers based upon  
 4 the size. So it was a function of size.  
 5 Q Then did you use a percentage?  
 6 A No.  
 7 Q At all?  
 8 A No. What we did is we said, well, if you're between  
 9 zero and 1,000 lines, there would be two ports per  
 10 month. You know, between 1,000 and 2,000 we would use  
 11 3, and if there were between, you know, like 3 and 4  
 12 then there would be 4.  
 13 Q That's how you --  
 14 A Yeah.  
 15 MS. AILTS WIEST: Okay. That's all  
 16 I have. Thank you.  
 17 MR. SMITH: Commissioner questions  
 18 of Mr. Davis? Ms. Rogers.  
 19 REDIRECT EXAMINATION  
 20 BY MS. POLLMAN ROGERS:  
 21 Q I have just a couple of questions with regard to some  
 22 of your responses on the switch upgrades. Do I  
 23 understand that if, for example, Western Telephone  
 24 Company is required by this Commission to implement  
 25 LNP, the costs that you have included on R-1 would be

1 what they would have to invest in order to provide LNP  
 2 to their customers?  
 3 A That is correct.  
 4 Q And the same would be true with regard to the other  
 5 companies on whose behalf you're testifying?  
 6 A That is correct.  
 7 Q On your Exhibit R-1 you do have some transport costs  
 8 included, and I think you have adequately explained how  
 9 the -- the methodology you used to arrive at that.  
 10 Whose responsibility in your opinion are the  
 11 transport costs?  
 12 A The RLECs contend that it is not the responsibility of  
 13 the RLECs to route traffic outside of their exchange  
 14 area.  
 15 Q So that would be the responsibility then of the  
 16 wireless carrier?  
 17 A That would be correct.  
 18 Q Okay. At the time that you prepared your cost  
 19 estimates did you have any reason to investigate beyond  
 20 the existing contractual relationships between the  
 21 parties?  
 22 A I did not. I mean, I had a legal document in front of  
 23 me, and my assumption was is that I was going to work  
 24 off the routing arrangements that were specified to in  
 25 the Interconnection Agreement that the RLECs negotiated

1017

1 with Western Wireless.  
 2 MS. POLLMAN ROGERS: Thank you.  
 3 That's all.  
 4 MR. SMITH: Mr. Wieczorek?  
 5 MR. WIECZOREK: I have nothing  
 6 further.  
 7 MR. SMITH: Ms. Wiest?  
 8 MS. AILTS WIEST: No.  
 9 MR. SMITH: Any Commissioner  
 10 questions?  
 11 I think the witness is excused. Thank you,  
 12 Mr. Davis.  
 13 THE WITNESS: Thank you very much.  
 14 MR. SMITH: Do the Petitioners have  
 15 any additional witnesses relative to the Dockets on  
 16 today's agenda?  
 17 MS. POLLMAN ROGERS: We have no  
 18 additional witnesses. We would have Pam Harrington  
 19 to call later as soon as she arrives if the  
 20 Commission would like to proceed with that case  
 21 today.  
 22 MR. SMITH: Okay. Mr. Coit, are you  
 23 calling a witness?  
 24 MR. COIT: No.  
 25 MR. SMITH: Mr. Wieczorek?

1018

1 MR. WIECZOREK: At this time we'd be  
 2 willing -- we would call Mr. Williams to address  
 3 the general testimony of Mr. Davis and the  
 4 cost-specific testimony of all the companies he's  
 5 testifying on behalf of except for RC or Roberts  
 6 County.  
 7 I would ask the indulgence of the Commission  
 8 to take a quick break before we begin his  
 9 testimony.  
 10 MR. SMITH: Sounds great to me.  
 11 CHAIRMAN SAHR: Fifteen.  
 12 MR. SMITH: We're in recess for 15  
 13 minutes.  
 14 (A short recess is taken)  
 15 MR. SMITH: Commissioner Burg is  
 16 still not in the room. He had a conference call he  
 17 had to participate in on his NARUC electric  
 18 committee, but we're going to begin without him.  
 19 Mr. Wieczorek, we were going to take  
 20 Mr. Williams' testimony responsive to Mr. Davis and  
 21 the companies that are at issue today.  
 22 MS. ROGERS: You may begin.  
 23 MR. WIECZOREK: Thank you,  
 24 Mr. Smith, Commissioners.  
 25 (Exhibit WWC 18 is marked for identification)

1019

1 DIRECT EXAMINATION  
 2 BY MR. WIECZOREK:  
 3 **Q** Mr. Williams, you've been previously sworn and  
 4 previously testified and had admitted into the record  
 5 your testimony filed in this matter; correct?  
 6 **A** Correct.  
 7 **Q** As you've done previously, have you done a  
 8 sheet-by-sheet comparison of the costs submitted by the  
 9 various companies in this matter in Western Wireless's  
 10 projections?  
 11 **A** Yes, I have. This is identical in format to what I  
 12 presented as responsive to Mr. Bullock's methodology,  
 13 as Mr. Davis and Mr. Bullock used identical methods to  
 14 develop their costs.  
 15 **Q** Okay. And that's been marked as Western Wireless  
 16 Exhibit 18?  
 17 **A** Correct.  
 18 **Q** And as you did with Mr. Bullock, it contains a couple  
 19 of handwritten changes so first, which appear first on  
 20 the Kennebec, why don't you just explain those  
 21 handwritten changes and note them for the record.  
 22 **A** Yes. On the Kennebec cost exhibit I have modified the  
 23 switch upgrade costs based on the discussion from  
 24 earlier this morning regarding switched upgrade costs  
 25 unrelated to LNP. I believe those costs were related

1020

1 to the generic switch upgrade.  
 2 And so I've deducted that from the switch  
 3 upgrade cost line item and shown the adjusted values on  
 4 an estimated LNP cost per month at the bottom of the  
 5 page for Western's estimates.  
 6 **Q** Okay. And the next page is Midstate. Did you also  
 7 make a hand revision on that? If so, could you explain  
 8 where they appear and why you put that?  
 9 **A** Yes. On the Midstate switch upgrade costs my  
 10 understanding is that the SR-10 software maintenance  
 11 package would include LNP. And so I've adjusted an  
 12 approximate amount out that included the LNP software  
 13 upgrade and the installation associated with that  
 14 software and left pretty much the switch translation  
 15 costs in for Midstate.  
 16 In addition, because Midstate has identified  
 17 that they already have direct connects with the two  
 18 wireless carriers that service in the area, it would be  
 19 Western's position that there would not be a need for  
 20 any additional transport that the existing facilities  
 21 could be used for the routing of ported numbers so  
 22 you'll see strikes through the transport costs and  
 23 Western's estimates and again a revised estimated cost  
 24 per month at the bottom of the page.  
 25 **Q** Finally, on the last page, which is Western Wireless,

1 while you don't have a handwritten exchange you do have  
2 some blocked in red and could you just explain what  
3 that signifies?

4 A Yeah. I did not have the cost detail with me when I  
5 did this yesterday. I remembered the nonLNP-related  
6 switch upgrade costs and the costs of installing that  
7 to approximate about \$100,000, and the red reflects a  
8 \$100,000 adjustment from the Petitioner estimates.

9 The actual switch upgrade costs that aren't  
10 directly related to LNP appear to be approximately  
11 \$93,000. So there is a variance here, and this 45,000  
12 would be understated by about \$7,000.

13 MR. WIECZOREK: With those points of  
14 clarification on the handwritten changes I'd move  
15 for the admission of Western Wireless 18.

16 MS. POLLMAN ROGERS: No objection.

17 MS. AILTS WIEST: No objection.

18 MR. COIT: No objection.

19 MR. SMITH: Western Wireless 18 is  
20 admitted.

21 MR. WIECZOREK: And I would make the  
22 witness available for cross-examination.

23 MR. SMITH: Okay. I thought we were  
24 already underway. Please proceed.

25 MS. POLLMAN ROGERS: Thank you.

1 assuming that that is based on your change in the  
2 estimated number of ports?

3 A Actually, that 700 reflects Mr. Davis's estimated  
4 nonrecurring costs for a single DS-1. And the  
5 difference in theory here is that Mr. Davis assumed one  
6 DS-1 per wireless carrier.

7 Q You just assumed it for one?

8 A One common DS-1 for any wireless carriers, given this  
9 volume of traffic.

10 Q So you included in your revised estimate, which is the  
11 one on the far right, the cost of installing one DS-1  
12 or the cost of one DS-1?

13 A This was in essence the cost equivalent -- Mr. Davis's  
14 cost number for upgrading -- and I applied that to the  
15 upgrade of the existing based on our assumption, the  
16 existing Qwest trunk group. But I used Mr. Davis's  
17 nonrecurring costs for that DS-1 for this company.

18 Q And then -- well, it's a pretty minuscule change on the  
19 transport?

20 A I'm sorry. Which transport?

21 Q Just it's the line entitled transport.

22 A That is a volume related based on the difference in  
23 port volume.

24 Q Okay. And how did you estimate your port volume?

25 A In the same manner we did for the other companies. We

CROSS-EXAMINATION

2 BY MS. POLLMAN ROGERS:

3 Q Mr. Williams, I have just a few questions with regard  
4 to your Western Wireless Exhibit No. 18. Let's look  
5 first of all at Beresford. Do I understand that with  
6 regard to the nonrecurring costs, switch upgrades,  
7 those types of things, the only revision that you've  
8 made is on the other internal costs; is that correct?

9 A Yes.

10 Q The only revision to Petitioner's exhibit.

11 A Correct.

12 Q And, again, that is not based on actual costs to the  
13 company; is that correct?

14 A Based on an estimated ceiling of other internal costs.

15 Q So it's not based on the actual costs of the company?

16 A This would be Western's perspective of what the maximum  
17 amount would be for other internal costs for companies  
18 of this size.

19 Q Okay. My question was is it based on Beresford's  
20 company-specific costs? And I understand your response  
21 to be no; is that correct?

22 A It is not developed from Beresford's internal  
23 structure, correct.

24 Q Thank you. The next yellow line here on Beresford is a  
25 revision to the nonrecurring transport charges. I am

1 took an estimate based on Western's belief of the  
2 volume of port activity it would see from these  
3 companies, and then we divided that number by what we  
4 believe our market share to be to get a total  
5 intermodal porting estimate.

6 Q You would agree with me that as you and I sit here  
7 today, we don't know how many ports there would be in  
8 any of these exchanges, would you not?

9 A All we can do is use our best estimates.

10 Q It's an estimate, right. Let's go to Kennebec. You  
11 explained in response to Mr. Wiecezorek that you did  
12 make a change to your switch upgrade costs. Am I to  
13 understand then that what you have included for  
14 Kennebec on Western Wireless 18 would be the cost for  
15 LNP switch upgrade?

16 A Referring to Exhibit 16, what I did was take the  
17 Petitioner estimated 47,979, and I subtracted the  
18 generic host upgrade of 31,400. I did not further  
19 reduce it by the installation or the prorate of  
20 coverage costs which Mr. Davis indicated would also be  
21 related to the switch upgrade generic.

22 Q You're not saying, however, that Kennebec can implement  
23 LNP for \$16,579, are you?

24 A No. What I'm suggesting is that the generic upgrade  
25 was normally considered part of ongoing switch

1025

1 operations, maintenance investments, and includes other  
 2 features and capability sets unrelated to LNP and,  
 3 therefore, shouldn't be included when one's trying to  
 4 estimate the cost of what LNP costs for a company.  
 5 **Q** You don't disagree with the testimony presented that  
 6 the platform or the generic level for Kennebec would  
 7 need to include this cost of upgrading the host office  
 8 of \$31,400. You don't disagree with that, do you?  
 9 **A** I do not dispute that the generic may need to be  
 10 upgraded to support LNP.  
 11 **Q** And that would certainly be a cost to the company of  
 12 Kennebec, would it not?  
 13 **A** Well, it should be a regular recurring cost for the  
 14 company to maintain their switches at the most current  
 15 release.  
 16 **Q** We're not engaged in an LNP surcharge hearing here, are  
 17 we?  
 18 **A** I think what we're engaged in is trying to determine  
 19 what the impact of LNP would be on these companies.  
 20 **Q** And in order to implement LNP the company of Kennebec  
 21 would have to expend \$47,979; isn't that correct?  
 22 **A** That's correct. I would contend they probably --  
 23 **Q** I thank you very much. You've answered my question.  
 24 That's what it would cost the company which is what  
 25 we're considering here; correct?

1026

1 **A** That's the outlay they would have to make to get their  
 2 generics up to level to support LNP software.  
 3 **Q** And the 15,000 on the other internal costs that you're  
 4 using the same approach as you did on the other ones,  
 5 in your other exhibits?  
 6 **A** Correct.  
 7 **Q** Did you hear Mr. Davis explain this morning that his  
 8 estimated port volumes were merely to demonstrate the  
 9 relationship between the ports and the costs?  
 10 **A** I did.  
 11 **Q** And he further testified that the ports he estimated  
 12 did not represent actual estimated demand, didn't he?  
 13 **A** That's what he said.  
 14 **Q** Let's talk about Midstate. I'm, unfortunately, having  
 15 a hard time understanding exactly how you modified the  
 16 switch upgrade costs here.  
 17 But I would go back to the questions I asked  
 18 with regard to Kennebec. You're not disputing that it  
 19 would cost Midstate \$68,160 to implement LNP in the  
 20 rest of its exchanges, are you?  
 21 **A** Well, this is a slightly different situation than  
 22 Kennebec. It appears from the documentation that  
 23 Midstate has a special maintenance package through  
 24 Nortel that accounts for the generic upgrades as well  
 25 as, I believe, implementation of number portability.

1027

1 And so it is fundamentally a different cost  
 2 structure than what's been proposed for Kennebec.  
 3 **Q** You don't know that to be the case, though, do you?  
 4 **A** Well, it is my understanding that SR-10 includes  
 5 generic as well as LNP upgrade maintenance.  
 6 **Q** So if the technician from Midstate would say that he is  
 7 unsure of that, just hypothetically, you would disagree  
 8 with him, or you know something that he does not?  
 9 **A** I'm just stating what my understanding is.  
 10 **Q** And do I understand that you did leave in the switch  
 11 translation?  
 12 **A** Yes. This covers -- the 25,000 was really an estimate  
 13 of switch translation activity that would still need to  
 14 occur on this switch, which is over and above, you  
 15 know, the Nortel software.  
 16 **Q** So you dispute Mr. Davis's estimation or calculation of  
 17 the switch translation costs?  
 18 **A** I think he gave a range of 2,000 to 5,000 per switch,  
 19 and this is closer to the 2,000 level.  
 20 **Q** And so again, you're not sitting here contending that  
 21 Midstate could implement LNP for \$25,000, are you?  
 22 **A** Yes. For what it needs to do with its switches, that's  
 23 correct.  
 24 **Q** So they could just take \$25,000 and go out and upgrade  
 25 their switch and they're good to go? Is that your

1028

1 testimony?  
 2 **A** Based on my understanding of the software maintenance  
 3 arrangement they have with Nortel, I believe that to be  
 4 the case.  
 5 **Q** With regard to Western Telephone Company, I would pose  
 6 the same question. You're not contending that they  
 7 could provide LNP to their customers if ordered to do  
 8 so by this Commission for \$45,987, are you?  
 9 **A** No. Western's situation is similar to the Kennebec  
 10 situation that we discussed.  
 11 **Q** So you're not contending that, that they could  
 12 implement LNP if ordered to do so by this Commission  
 13 for \$45,987?  
 14 **A** I would not contend -- I would not disagree that they  
 15 would need to get their switch generics upgraded to  
 16 support LNP implementation.  
 17 **Q** And that would be a cost to Western Telephone Company;  
 18 is that correct?  
 19 **A** That's correct.  
 20 **Q** In earlier --  
 21 MR. SMITH: I'm going to note for  
 22 the record that Commissioner Burg is back in the  
 23 room.  
 24 **Q** In earlier testimony in front of this Commission you  
 25 did not dispute that Western Wireless should receive an

1029

1 additional suspension of LNP requirement; is that  
 2 correct?  
 3 A You mean to say Western Telephone?  
 4 Q I'm sorry. Yes, I do. Too many Westerns. Western  
 5 Telephone Company. Thank you.  
 6 A Subject to check, I believe it might have been --  
 7 MR. WIECZOREK: I don't think so.  
 8 THE WITNESS: No?  
 9 A I would have to go back and check who I offered as a  
 10 potential distinguishing carrier. I know at the time I  
 11 mentioned that there was a lot of uncertainty about  
 12 Western's switch costs, Western Telephone's switch  
 13 costs.  
 14 Q There was uncertainty at that time or just in your mind  
 15 there was?  
 16 A Well, there was uncertainty in my mind at that point in  
 17 time.  
 18 Q Because there wasn't any evidence presented in the  
 19 record, was there, at that time with regard to Western  
 20 other than the submitted documents?  
 21 A Correct.  
 22 Q Again, just to go back to Midstate for a minute, and as  
 23 you can tell, I'm kind of struggling to track with you  
 24 with regard to your revisions to that estimate. You  
 25 talked about a generic switch upgrade for Midstate's

1030

1 SR-10 switch?  
 2 A No. Actually, as I understand it, Midstate does not  
 3 require a generic upgrade for their switches. The  
 4 issue with Midstate is that they have a -- I'll call it  
 5 an enhanced maintenance package that they have acquired  
 6 through Nortel that in a general sense is intended to  
 7 keep their switches at the most current maintenance  
 8 level that Nortel offers.  
 9 MS. POLLMAN ROGERS: That's all the  
 10 questions I have. Thank you.  
 11 MR. SMITH: Mr. Coit, do you have  
 12 questions?  
 13 MR. COIT: No.  
 14 MR. SMITH: Ms. Wiest?  
 15 MS. AILTS WIEST: No.  
 16 MR. SMITH: Commissioners, do you  
 17 have any questions of Mr. Williams?  
 18 COMMISSIONER BURG: I have one even  
 19 though I'm sorry I missed some of the testimony.  
 20 This is a little more of a general one.  
 21 I understood from Mr. Davis's testimony that  
 22 the numbers he used for probable porting, and  
 23 that's what I would call it, probable porting, had  
 24 no scientific basis, they were only used for  
 25 illustrative purposes. Do you agree with that? Is

1031

1 that what you heard him say?  
 2 THE WITNESS: No reason to dispute  
 3 Mr. Davis's --  
 4 COMMISSIONER BURG: So then I'm  
 5 questioning on yours, how did you arrive at the  
 6 number you thought would be ported? Was there a  
 7 scientific approach to determining how many you're  
 8 estimating would be ported?  
 9 THE WITNESS: Well, our approach was  
 10 based upon our estimates of the circumstances for  
 11 these companies based on what we thought we would  
 12 be able to obtain as a result of both our coverage  
 13 and our view of what their demographics  
 14 represented. And the numbers are close to what we  
 15 expect -- for most of these companies close to what  
 16 we expect in our rural operating areas, which is an  
 17 approximate 15 percent intermodal porting over a  
 18 five-year period.  
 19 COMMISSIONER BURG: But is that  
 20 based on experience you've had in other areas where  
 21 LNP is in place or how are you --  
 22 THE WITNESS: There is no experience  
 23 in intermodal porting to speak of in rural service  
 24 areas at this time. I mean, we've only been at it  
 25 in a partial way for about a month.

1032

1 COMMISSIONER BURG: Have you been  
 2 involved in any urban areas, nonrural areas?  
 3 THE WITNESS: Western Wireless  
 4 really doesn't operate in urban areas. We have  
 5 like a 2 percent overlap in nonrural or MSA areas.  
 6 COMMISSIONER BURG: Did you look at  
 7 what any other companies that do operate in urban  
 8 areas, what kind of take that they had?  
 9 THE WITNESS: Well, we looked at the  
 10 kind of impacts that competition and number  
 11 portability if facilitated from CLEC experiences,  
 12 and those included both a review of urban areas as  
 13 well as a review of competition in selected rural  
 14 areas where it has occurred.  
 15 COMMISSIONER BURG: I guess I'm  
 16 asking it because we've gone all the way from  
 17 almost zero take that companies have experienced  
 18 since the knowledge is out there that LNP is either  
 19 in place or going to be in place to an illustrative  
 20 number that their own consultant has used to a much  
 21 higher number that you've used. And I'm trying to  
 22 kind of figure out how we can get to that number.  
 23 Because to me when we get down to this  
 24 decision it's going to be how many people are going  
 25 to benefit compared to these costs that are asked

1033

1 to be imposed. And right now I'm not real  
 2 comfortable with the numbers that we're seeing with  
 3 the beneficiaries.  
 4 THE WITNESS: Well, you know, the  
 5 most significant track record that has been built  
 6 on number portability has been built on, you know,  
 7 a wireline-to-wireline portability because that's  
 8 the one that's been in place for the longest amount  
 9 of time.  
 10 And I think that would be -- that results in  
 11 somewhere between 3 and a half to 4 and a half  
 12 percent erosion on an annual basis. Now we know  
 13 that there were lots of problems in starting up  
 14 that process, and it took a while to get things  
 15 going, but, you know, we have the benefit today of  
 16 a seven- or eight-year retrospective that resulted  
 17 in an average annual migration, you know, of 3 and  
 18 a half to 4 and a half percent.  
 19 And, you know, that is the one experience that  
 20 we have sufficient statistics to provide an  
 21 indicator for what we expect to happen in the face  
 22 of competition in rural areas.  
 23 COMMISSIONER BURG: Do you think the  
 24 experience in wireline to wireline is comparable to  
 25 what you'll see in wireline to wireless?

1034

1 THE WITNESS: We're expecting it to  
 2 be not quite as aggressive.  
 3 COMMISSIONER BURG: I mean, I think  
 4 there's two things that come into play. One is a  
 5 lot of people, even though they're taking wireless,  
 6 are not giving up their wireline so of course  
 7 they're not going to port that number. And,  
 8 secondly, as I said to Mr. Davis, I think it was,  
 9 or one of the other witnesses, is I've been  
 10 surprised somewhat to me and the people that really  
 11 have a problem with having published phone numbers.  
 12 If you had a ported number, that's already  
 13 published. So you wouldn't have the anonymity that  
 14 people seem to want with their cellphones.  
 15 THE WITNESS: Yeah. The issue of  
 16 directory listings is currently being fought out at  
 17 the national level. I know there's a proposal by  
 18 publishers to create directory listings for  
 19 cellphones and I know the cellular phone industry  
 20 is resistant to that proposal. But I don't know  
 21 that either the proposal or the wireless industry's  
 22 resistance to it has much relevance to number  
 23 portability.  
 24 COMMISSIONER BURG: But if you were  
 25 porting a number you already have a listed phone

1035

1 number immediately; right?  
 2 CHAIRMAN SAHR: Unless it's  
 3 unlisted.  
 4 COMMISSIONER BURG: Yeah. Unless  
 5 you took the position --  
 6 THE WITNESS: Every customer today  
 7 has the choice to list or not list their phone.  
 8 COMMISSIONER BURG: What percent,  
 9 probably 90 plus are listed at least in rural  
 10 areas?  
 11 THE WITNESS: It varies dramatically  
 12 from state to state. In California the listing  
 13 percentages are very low and in other states it's  
 14 very high.  
 15 COMMISSIONER BURG: Okay. Thank  
 16 you.  
 17 MR. SMITH: Other Commissioner  
 18 questions?  
 19 Ms. Rogers, do you have any recross? Did I  
 20 ignore -- did I skip over Talbot? I'm sorry. I've  
 21 got my rotation around the table out of order here.  
 22 MR. WIECZOREK: I'm sorry,  
 23 Mr. Smith.  
 24 REDIRECT EXAMINATION  
 25 BY MR. WIECZOREK:

1036

1 Q Mr. Williams, there's a statement attributed to you,  
 2 something about phantom traffic. Do you perceive some  
 3 type of phantom traffic issue?  
 4 A I don't believe that there's any phantom traffic issue  
 5 in the proposed routing mechanism that Western used. I  
 6 am aware of the phantom traffic issue with respect to  
 7 traffic terminating to the telephone companies, but our  
 8 routing proposal here really addresses traffic that  
 9 would be originating from the telephone companies. And  
 10 I think Mr. Smith characterized it appropriately in his  
 11 questions earlier today.  
 12 MR. WIECZOREK: I don't have  
 13 anything further.  
 14 MR. SMITH: Ms. Rogers?  
 15 MS. POLLMAN ROGERS: I have no  
 16 further questions of this witness. I would in  
 17 response to some of the questions asked by  
 18 Commissioner Burg make available for the Commission  
 19 if they should desire the results of the survey  
 20 that Kennebec Telephone Company did in their area,  
 21 if you so request.  
 22 MR. WIECZOREK: I will tell you I've  
 23 never seen it. It was never produced to me.  
 24 MR. SMITH: I think in order to do  
 25 that it should be marked and we'll have a

1 discussion over whether it's a proper exhibit for  
 2 admission. Otherwise, we have his --  
 3 MS. POLLMAN ROGERS: His  
 4 testimony --  
 5 MR. SMITH: -- his testimony about  
 6 it. But that's up to you. If you want to mark it  
 7 and we'll go through that --  
 8 MS. POLLMAN ROGERS: Why don't --  
 9 let me think about that a little bit. I would like  
 10 to call Mr. Davis back in surrebuttal with regard  
 11 to the costs that were --  
 12 MR. SMITH: Mr. Williams, I think  
 13 you're excused then. Thank you for your testimony.  
 14 MS. POLLMAN ROGERS: Mr. Davis, I  
 15 would remind you that you are still under oath.  
 16 THE WITNESS: Okay.  
 17 DIRECT EXAMINATION  
 18 BY MS. POLLMAN ROGERS:  
 19 **Q** You are familiar with or at least have seen briefly  
 20 Western Wireless Exhibit No. 18?  
 21 **A** Yes, I have.  
 22 **Q** With regard to the revisions made to the switch upgrade  
 23 costs, first of all, for the companies of Kennebec and  
 24 Western Telephone Company you would not agree with  
 25 those revisions, would you?

1 **A** I do not agree with these revisions. I mean, the  
 2 standard that we're talking about here today is an F2  
 3 standard and it's what is the impact on the end-user.  
 4 In order for Western Telephone Company in Kennebec to  
 5 implement local number portability, they will, in fact,  
 6 have to incur the generic upgrade cost, and I believe  
 7 that that would create a burden on the end-user.  
 8 **Q** Now let's look at Midstate. And do you agree with the  
 9 revisions Mr. Williams has made to the switch upgrade  
 10 costs in the Midstate -- in the case of Midstate?  
 11 **A** No. I think there's some disagreement with respect to  
 12 the switch translations costs. The e-mail that we  
 13 looked at earlier, I don't know if that was entered  
 14 into as an exhibit but it referred to one number that  
 15 was \$29,000 approximately. That is for the actual  
 16 Nortel -- I mean, that's what Nortel would charge  
 17 Midstate on a per-equipped-line basis for the LNP  
 18 software.  
 19 There was an additional charge on that same  
 20 e-mail. I believe they referenced the Martin Group for  
 21 switch translations, and I think Mr. Williams said that  
 22 that cost would be between 2,000 and \$5,000. I thought  
 23 he said he used \$2,000. If you look at that number,  
 24 the 2 to \$5,000 range, what we did was we used \$4,000  
 25 per switch for switch translations.

1 Switch translations is a function that is  
 2 separate and apart from the Nortel pricing on the  
 3 per-equipped-line basis and that is actually a price  
 4 that the Martin Group would charge Midstate on a  
 5 per-switch basis for switch translations. It's not  
 6 part of that activation fee that is waived.  
 7 **Q** So based upon that, you would stay with your -- the  
 8 switch upgrade costs that you included in your --  
 9 **A** Based upon the information on that e-mail, I would take  
 10 the \$29,000 and add back the \$4,000 per switch for  
 11 switch translations. So it would be approximately 29  
 12 plus 36,000.  
 13 **Q** The internal business -- or other internal costs  
 14 categories, what did you base your figures upon?  
 15 **A** The actual nonrecurring other internal costs category?  
 16 **Q** Right.  
 17 **A** I included costs associated with negotiating,  
 18 finalizing, and processing porting contracts. The  
 19 other cost information that was in there was completing  
 20 the trading partner profiles. There were costs  
 21 associated with filing tariffs, costs associated with  
 22 reviewing impact contracts, SOA contracts, costs  
 23 associated with reviewing and researching the impact of  
 24 the order.  
 25 **Q** But you included company-specific costs to calculate

1 that amount for each company?  
 2 **A** Yes.  
 3 MS. POLLMAN ROGERS: If I could have  
 4 one moment.  
 5 (Pause)  
 6 **Q** Once again drawing your attention to Midstate, does  
 7 Nortel provide LNP as part of the SR-10 upgrade that  
 8 Mr. Williams has adjusted?  
 9 **A** The SR-10 program is a maintenance program, and the --  
 10 basically what you get if you have the SR-10 program  
 11 is Nortel does not charge this activation fee. You  
 12 still have to purchase the LNP software, which is the  
 13 \$4 per equipped line, and you still have to perform  
 14 switch translations.  
 15 **Q** And I believe you testified earlier that you did not  
 16 include the activation fee in your estimates?  
 17 **A** I did not include the activation fee.  
 18 **Q** Thank you.  
 19 MS. POLLMAN ROGERS: That's all.  
 20 MR. SMITH: Mr. Coit, do you have  
 21 anything?  
 22 MR. COIT: No.  
 23 MR. SMITH: Mr. Wieczorek?  
 24 MR. WIECZOREK: I have none.  
 25 MS. AILTS WIEST: None.

1041

1 MR. SMITH: Commissioners? Can I  
 2 ask one clarifying question.  
 3 If I understood, you said your number, take  
 4 29,000 plus 36,000?  
 5 THE WITNESS: Correct.  
 6 MR. SMITH: So does that mean the  
 7 \$68,000 number should be changed, or is there  
 8 something else in there or is that what it adds up  
 9 to?  
 10 THE WITNESS: What number did you  
 11 come up with?  
 12 MR. SMITH: 65,000. Or is that just  
 13 a rounding issue?  
 14 THE WITNESS: I believe it's awfully  
 15 close to that number. 65,000 would be correct.  
 16 MR. SMITH: Thank you. Further  
 17 questions?  
 18 MS. POLLMAN ROGERS: No.  
 19 MR. SMITH: You're excused,  
 20 Mr. Davis.  
 21 Do you have anything further at this time,  
 22 Petitioners?  
 23 MS. POLLMAN ROGERS: Not with regard  
 24 to these Petitioners, no.  
 25 MR. SMITH: I think maybe we're --

1042

1 are we done for now then? Let's go off the record.  
 2 (Proceedings are in recess)

1043

1 MR. SMITH: The hearing in the LNP  
 2 is reconvened, the hearing in the LNP suspension  
 3 Dockets is reconvened. Today is Wednesday,  
 4 June 30, at approximately 8:30 a.m., and this is  
 5 the -- in Room 113 of the Capitol and this is the  
 6 time and place that has been scheduled for  
 7 TC04-056, RC Communications, Inc. and Roberts  
 8 County Telephone Cooperative Association and  
 9 TC04-085, Cheyenne River Sioux Tribe Telephone  
 10 Authority.  
 11 Mr. Dickens, I presume you're handling things  
 12 for the Petitioners this morning?  
 13 MR. DICKENS: Yes.  
 14 MR. SMITH: You may proceed.  
 15 MR. DICKENS: Thank you. We would  
 16 call Ms. Pamela Harrington to the stand on behalf  
 17 of RC Communications, Inc. and Roberts County  
 18 Telephone Cooperative Association.  
 19 (Exhibits RC 1 through 3 are marked for identification)  
 20 PAMELA HARRINGTON,  
 21 called as a witness, being first duly sworn in the  
 22 above cause, testified under oath as follows:  
 23 DIRECT EXAMINATION  
 24 BY MR. DICKENS:  
 25 Q Ms. Harrington, would you state your name and address

1044

1 for the record, please.  
 2 A Pamela Harrington, general manager of Roberts County  
 3 Telephone Cooperative Association and RC  
 4 Communications, Incorporated, 205 Main Street,  
 5 New Effington, South Dakota 57255.  
 6 Q And you're appearing today on behalf of RC  
 7 Communications, Inc. and Roberts County Telephone; is  
 8 that correct?  
 9 A Yes, I am.  
 10 Q You have before you, Ms. Harrington, two pieces of  
 11 prefiled testimony labeled Exhibits 1 and 2. Do these  
 12 appear to be your direct and rebuttal on this matter?  
 13 A Yes. Yes, they do.  
 14 Q Is this testimony true and correct to the best of your  
 15 knowledge?  
 16 A Yes, it is.  
 17 Q And do you have any additions or corrections today?  
 18 A No, I don't.  
 19 Q If I were to ask you the same questions as are  
 20 contained in your prefiled testimony today, would your  
 21 answers be the same?  
 22 A Yes, they would.  
 23 Q Do you have a summary prepared of your testimony?  
 24 A Basically what the testimony states is that we have had  
 25 no requests or demand for local number portability in

1 our areas, and the cost of implementing it is  
 2 significant and we feel that would be a detriment to  
 3 our customers.  
 4 **Q** Does that conclude your summary?  
 5 **A** Yes, it does.  
 6 MS. POLLMAN ROGERS: I'd like to  
 7 move Roberts County and RC Communications Exhibits  
 8 1 and 2 into evidence at this time.  
 9 MR. LEWIS: No objections.  
 10 MS. AILTS WIEST: No objections.  
 11 MR. COIT: No objections.  
 12 MR. DICKENS: We would tender  
 13 Ms. Harrington for cross-examination.  
 14 MR. SMITH: Are they just labeled RC  
 15 1 and 2 or --  
 16 MR. DICKENS: Well, I think for the  
 17 purposes of speed we labeled them RC 1 and 2.  
 18 MR. SMITH: Okay. RC 1 and 2 are  
 19 admitted.  
 20 MR. LEWIS: Good morning, members of  
 21 the Commission, counsel.  
 22 CROSS-EXAMINATION  
 23 BY MR. LEWIS:  
 24 **Q** And good morning to you, Ms. Harrington.  
 25 **A** Good morning.

1 **Q** My name is Paul Lewis and I represent Western Wireless  
 2 in this local number portability Docket. I have  
 3 several questions for you this morning.  
 4 **A** Okay.  
 5 **Q** Ma'am, you understand that in 1996 number portability  
 6 became a requirement by the FCC?  
 7 **A** Yes.  
 8 **Q** And then by their continuing Order dated November 10 of  
 9 2003 the FCC ordered compliance for your company unless  
 10 you have an exemption in place; correct?  
 11 **A** Right.  
 12 **Q** You stated in your rebuttal testimony on page 1 that  
 13 once the FCC made it clear that wireless carriers would  
 14 be required to port numbers Roberts County took  
 15 immediate steps to investigate the cost and process  
 16 involved with LNP. Is that true?  
 17 **A** Yes, it is.  
 18 **Q** But in investigating your LNP implementation options  
 19 did you ever contact Western Wireless to see what kind  
 20 of cost-efficient options would be available to you?  
 21 **A** No, I didn't.  
 22 **Q** In your opening you had mentioned that the cost of  
 23 implementation of local number portability is  
 24 significant; true?  
 25 **A** Right.

1 **Q** You also understand, though, that federal law -- or FCC  
 2 regulations allow you to recover some of those costs  
 3 through surcharges to implement local number  
 4 portability?  
 5 **A** Yes.  
 6 **Q** Now the numbers that you filed before the Commission  
 7 were basically compiled by your cost analyst,  
 8 Mr. Davis; correct?  
 9 **A** Right.  
 10 **Q** And you relied upon those numbers?  
 11 **A** Yes, I did.  
 12 **Q** And do you understand the methodology that was used by  
 13 your cost analyst in compiling those numbers?  
 14 **A** I would just like to defer that to my cost analyst.  
 15 **Q** Do you understand the basic mechanics of it, though?  
 16 **A** Yes.  
 17 **Q** Okay. On page 2 of your direct testimony you state  
 18 that there's been no requests for local number  
 19 portability; is that correct?  
 20 **A** That is correct.  
 21 **Q** Did you know that your cost analyst estimated at least  
 22 36 ports per year when he came up with your numbers?  
 23 **A** I have read through the costs so I would assume that,  
 24 yes, I would have seen that, but if you were to ask me  
 25 any specific question, I can't answer that without

1 looking at it.  
 2 **Q** Okay.  
 3 **A** Okay.  
 4 **Q** Would it surprise you then to know that over the next  
 5 five years you're going to lose approximately 8 percent  
 6 of your wireline-to-wireless porting?  
 7 **A** That would surprise me, yes.  
 8 **Q** Have any wireless carriers requested LNP service from  
 9 you?  
 10 **A** Yes.  
 11 **Q** And who?  
 12 **A** Western Wireless.  
 13 **Q** Thank you. Do you have any demographic information to  
 14 present today to the Commission concerning your  
 15 customer base?  
 16 **A** I have no specific demographic information. However, I  
 17 do know my customers very well.  
 18 **Q** Have you done any independent internal surveys as part  
 19 of your company to see what your customers would be  
 20 willing to pay or would be willing to go for the  
 21 implementation?  
 22 **A** No, I haven't.  
 23 **Q** On page 1 of your direct testimony it's noted that you  
 24 have extended area service; is that correct?  
 25 **A** Yes.

1 Q To what communities do those go to?  
 2 A In the one company, the cooperative, we have EAS into  
 3 Sisseton, Roscoe, from New Effington, and then from our  
 4 other exchange, Claire City, we have EAS in Sisseton  
 5 and Veblen. And then in RC Communications we have EAS  
 6 from Wilmot and Summit both into Milbank.  
 7 Q So EAS services essentially take a local call outside  
 8 your exchange area, do they not?  
 9 A We meet carriers at the exchange boundary.  
 10 Q But it's not a toll call?  
 11 A Right.  
 12 Q Beyond the exchange boundary?  
 13 A Uh-huh.  
 14 Q And that's driven by customer demand, would you agree?  
 15 A It's been that way ever since I started working there  
 16 20-some years. So I can't testify to if it was  
 17 customer demand or whatever.  
 18 Q But you do provide that service --  
 19 A Yes, we do.  
 20 Q And your customers enjoy that service?  
 21 A Yes.  
 22 Q Would you agree today that LNP is technically feasible?  
 23 A With the proper upgrades, yes.  
 24 Q So if the Commission required you to implement local  
 25 number portability, you would have the ability to pay

1 for it, would you not?  
 2 A Of course we would. We'd have to add it to the  
 3 customer bill.  
 4 MR. LEWIS: Thank you. No further  
 5 questions.  
 6 MR. SMITH: Ms. Wiest?  
 7 CROSS-EXAMINATION  
 8 BY MS. AILTS WIEST:  
 9 Q Ms. Harrington, what is your current local rate?  
 10 A In the cooperative it's 10.50 for residential and 13  
 11 for business, and in RC Communications it is 15.70  
 12 residential and 26 business.  
 13 Q And in your testimony you stated that currently four  
 14 wireless carriers have the authority to serve your  
 15 area. Could you state which carriers those are?  
 16 A Are you talking as an ETC?  
 17 Q Wireless carriers.  
 18 A Oh, just in general providing services?  
 19 Q Yeah.  
 20 A I'm sorry, what was your question?  
 21 Q You stated in your testimony to the best of your  
 22 knowledge there are four wireless carriers authorized  
 23 to serve.  
 24 A Okay.  
 25 Q Can you name those four?

1 A Western Wireless, Rural Cellular Corporation. I guess  
 2 that's the only two I can think of.  
 3 Q And so you don't know which ones -- you don't know the  
 4 other two that have the authority?  
 5 A I'm just a blank on that at the moment.  
 6 Q Okay. And to your knowledge those two carriers are  
 7 currently serving your area?  
 8 A Yes.  
 9 MS. AILTS WIEST: That's all I have.  
 10 Thanks.  
 11 MR. SMITH: Mr. Dickens -- or do the  
 12 Commissioners have any questions? Mr. Coit?  
 13 MR. COIT: No questions.  
 14 CHAIRMAN SAHR: I do have a  
 15 question.  
 16 MR. SMITH: Mr. Sahr.  
 17 CHAIRMAN SAHR: Am I out of order?  
 18 MR. SMITH: No, you're not.  
 19 CHAIRMAN SAHR: Good morning.  
 20 THE WITNESS: Good morning.  
 21 CHAIRMAN SAHR: The cost estimates  
 22 on potential costs that would be borne either by  
 23 your organization or else the consumers range  
 24 anywhere around a dollar, maybe a little bit less,  
 25 up to 6 or \$7. Could you talk a little bit about

1 the impact that this surcharge if it is passed  
 2 through the consumers could have on your customers  
 3 and what sort of contact you expect to get from the  
 4 public?  
 5 THE WITNESS: Well, as far as our  
 6 customers, as you add the surcharges and customers  
 7 port their numbers that cost of the porting -- the  
 8 surcharges would have to go up to the remaining  
 9 customers on our system so, you know, that would be  
 10 a problem, I think. And it will be difficult -- I  
 11 don't know if that's what you're asking.  
 12 CHAIRMAN SAHR: I guess what I'm  
 13 getting at is would you expect to hear from the  
 14 public if you enacted a surcharge of \$1 or even up  
 15 to \$7?  
 16 THE WITNESS: I would think we would  
 17 hear from them, yes.  
 18 CHAIRMAN SAHR: And what do you  
 19 think the comment from the consumers would be?  
 20 THE WITNESS: I don't believe the  
 21 majority would like it.  
 22 CHAIRMAN SAHR: Thank you.  
 23 MR. SMITH: Any other Commissioner  
 24 questions?  
 25 Mr. Dickens.

1 MR. DICKENS: Thank you. I just  
 2 have one question.  
 3 REDIRECT EXAMINATION  
 4 BY MR. DICKENS:  
 5 Q When you were being examined by Mr. Lewis he asked you  
 6 on the subject of EAS service whether customers enjoyed  
 7 that wider area calling.  
 8 Do you recall that question?  
 9 A Yes, I do.  
 10 Q Do you think that wider area calling is necessarily  
 11 better?  
 12 A No, I don't.  
 13 MR. SMITH: Mr. Lewis, do you have  
 14 any recross?  
 15 MR. LEWIS: Nothing further.  
 16 MR. SMITH: Anything else?  
 17 MS. AILTS WIEST: No.  
 18 MR. SMITH: You're excused,  
 19 Ms. Harrington. Thank you for coming today.  
 20 Mr. Dickens, please call your next witness.  
 21 MR. DICKENS: I'd like to call  
 22 Mr. Dan Davis. I'd like to call Mr. Davis to the  
 23 stand.  
 24 MR. SMITH: Thank you. Go ahead.  
 25

1 DIRECT EXAMINATION  
 2 BY MR. DICKENS:  
 3 Q Mr. Davis, I think you've been previously sworn in this  
 4 Docket.  
 5 A Yes.  
 6 Q And you have before you what has been marked as RC  
 7 Communications Exhibit 3 for RC and Roberts County?  
 8 A Yes. That's correct.  
 9 Q Does that appear to be your direct testimony?  
 10 A It is.  
 11 Q Okay. Was that testimony prepared by you?  
 12 A Yes, it was.  
 13 Q Okay. And do you have any changes or additions or  
 14 corrections?  
 15 A No, I don't.  
 16 Q Is it therefore true and correct to the best of your  
 17 knowledge?  
 18 A Yes, it is.  
 19 Q And if I asked you the same questions today as are  
 20 contained in your prefiled testimony, your answers  
 21 would be the same?  
 22 A They would be.  
 23 Q Do you have a summary that you can present of that  
 24 testimony?  
 25 A I do, a very brief summary. I'm here today to testify

1 on the cost estimates for RC Communications and Roberts  
 2 County Telephone Cooperative Association, which I'll  
 3 just refer to as RC Roberts County.  
 4 My summary testimony, which I gave yesterday  
 5 on behalf of the four other RLECs, is the same as for  
 6 RC Roberts, that is the assumptions and cost components  
 7 are the same for RC Roberts as was discussed for the  
 8 four RLECs.  
 9 If RC Roberts is not responsible for  
 10 transport costs, which, again we contend that they are  
 11 not, the estimated cost that I calculated was  
 12 approximately \$1.41 per line per month. If RC Roberts  
 13 would be responsible for transporting calls using DS-1  
 14 direct connections, the estimated cost that I  
 15 calculated was \$7.07 per line per month. The overall  
 16 nonrecurring costs for local number portability for RC  
 17 Roberts based on my estimate was approximately \$74,000  
 18 excluding transport, compared to Mr. Williams' estimate  
 19 of approximately 66 to \$67,000 including transport.  
 20 And with that, that concludes my summary.  
 21 MR. DICKENS: I'd like to move the  
 22 admission of RC Exhibit 3.  
 23 MR. WIECZOREK: No objection.  
 24 MS. AILTS WIEST: No objection.  
 25 MR. COIT: No objection.

1 MR. DICKENS: And tender Mr. Davis  
 2 for cross-examination.  
 3 MR. SMITH: RC Exhibit 3 is  
 4 admitted. Please do.  
 5 MR. WIECZOREK: Thank you,  
 6 Mr. Smith.  
 7 CROSS-EXAMINATION  
 8 BY MR. WIECZOREK:  
 9 Q Mr. Davis, I've got a few questions for you on the RC  
 10 and Roberts County numbers. You were here when  
 11 Ms. Harrington just testified; correct?  
 12 A Yes.  
 13 Q And as she testified this morning, these are actually  
 14 two companies, one's a cooperative, one's a  
 15 corporation?  
 16 A That is my understanding, correct.  
 17 Q Okay. And you're not providing those numbers broken  
 18 out by company, you lumped them together; correct?  
 19 A I did lump them together.  
 20 Q The way you calculated transport for these companies is  
 21 the same way you calculated transport for all the  
 22 companies you've testified on behalf of; correct?  
 23 A Correct.  
 24 Q And like the other four companies, I believe your  
 25 testimony reflected yesterday this was the other cost

1 analysis you did -- well, let me back up. This is the  
 2 only possible way to transport these calls where you  
 3 did a cost analysis; correct?  
 4 A That would be correct.  
 5 Q And the reason you calculated transport costs this way  
 6 is because of the existing Interconnection Agreement?  
 7 A Interconnection Agreements and just the fact that we  
 8 don't route -- or the RLECs don't route local traffic  
 9 to points of interconnection outside their exchange.  
 10 Q Okay. Do you know whether the cooperative and the  
 11 corporation, RC and Roberts County, whether they  
 12 represent themselves in their Interconnect Agreements  
 13 as one or two companies?  
 14 A I believe -- I really don't know. I believe since  
 15 they're two separate legal entities, that they would  
 16 have to have two separate Interconnection Agreements.  
 17 MR. WIECZOREK: That's all I have.  
 18 MR. SMITH: Ms. Wiest?  
 19 MS. AILTS WIEST: No questions.  
 20 MR. SMITH: Commissioners? Is there  
 21 anything further?  
 22 MR. COIT: I don't have any  
 23 questions.  
 24 MR. SMITH: Thank you. You are  
 25 excused, Mr. Davis.

1 Q Well, do you have any specific summary specific to  
 2 Roberts County that you'd like to address to the  
 3 Commission?  
 4 A I think the exhibit speaks for itself. It's similar in  
 5 nature and concept to the other cost exhibits that  
 6 we've produced in this.  
 7 MR. WIECZOREK: I'd make him  
 8 available for cross-examination.  
 9 MR. SMITH: Mr. Dickens?  
 10 CROSS-EXAMINATION  
 11 BY MR. DICKENS:  
 12 Q Using my psychic powers, if you look at the lower  
 13 right-hand corner of your exhibit, it shows that you  
 14 have assumed 65 ports per year?  
 15 A Correct.  
 16 Q In your calculations shown on this spreadsheet did  
 17 you -- and that 65 ports is an annual number; is that  
 18 correct?  
 19 A Annual for all intermodal ports.  
 20 Q Okay. And in the calculation shown on your spreadsheet  
 21 did you reduce the number of lines per year to reflect  
 22 the 65 ports that you projected would occur?  
 23 A No. The methodology to do that would be to take the  
 24 costs over a five-year period, the access lines  
 25 projected over a five-year period, and then use the

1 THE WITNESS: Thank you very much.  
 2 MR. SMITH: Thank you. Does that  
 3 conclude the case-specific hearing for RC and  
 4 Roberts County?  
 5 MR. WIECZOREK: We'll call  
 6 Mr. Williams.  
 7 (Discussion off the record)  
 8 MR. WIECZOREK: May I commence,  
 9 Mr. Smith?  
 10 MR. SMITH: Yes. Please proceed.  
 11 Are you ready, Mr. Dickens?  
 12 MR. DICKENS: Yes.  
 13 DIRECT EXAMINATION  
 14 BY MR. WIECZOREK:  
 15 Q Mr. Williams, you testified yesterday and presented a  
 16 company-by-company spreadsheet which was marked Western  
 17 Wireless Exhibit No. 18. Do you recall that?  
 18 A I do.  
 19 Q Did that have a page that dealt with the Roberts County  
 20 numbers?  
 21 A It did.  
 22 Q And that represented what you believe to be the actual  
 23 costs per line in Roberts County and the co-op;  
 24 correct?  
 25 A Yes, it does.

1 differing costs for each year and the differing access  
 2 lines for each year and then to obtain a present value  
 3 for all of those numbers to come up with an appropriate  
 4 end-user fee.  
 5 Q I think I understand the explanation or methodology,  
 6 but the answer to my question is no; is that correct?  
 7 A Ask your question again.  
 8 Q Okay. The calculation shown on your spreadsheet does  
 9 not reduce the number of access lines of RC and Roberts  
 10 County by the number of ports you assume to occur every  
 11 year; is that correct?  
 12 A That's correct.  
 13 MR. DICKENS: Okay. Those are all  
 14 the questions I have.  
 15 MR. COIT: No questions.  
 16 MS. AILTS WIEST: No questions.  
 17 MR. SMITH: Commissioners, any  
 18 questions?  
 19 Mr. Wieczorek?  
 20 MR. WIECZOREK: No redirect.  
 21 MR. SMITH: Thank you, Mr. Williams.  
 22 Do you have any further witnesses, Mr. Wieczorek?  
 23 MR. WIECZOREK: No, I don't.  
 24 MR. DICKENS: We do not. That  
 25 completes our case.

1061

1 MR. SMITH: Okay. The case is  
 2 completed then in RC Communications and Roberts  
 3 County. Thank you for coming.  
 4 MR. DAVIS: Thank you very much.  
 5 MR. SMITH: Do you want to proceed  
 6 right onto Cheyenne River?  
 7 MR. DICKENS: We need actually a few  
 8 minutes for discussion.  
 9 MR. SMITH: Do you want to reconvene  
 10 at 9:30?  
 11 MR. DICKENS: Yes. That would be  
 12 good.  
 13 MR. SMITH: We're in recess until  
 14 9:30.  
 15 (A short recess is taken)  
 16 (Exhibits Cheyenne River 1 through 5 are marked for  
 17 identification)  
 18 MR. SMITH: We are reconvened in the  
 19 LNP suspension cases following our recess at 10  
 20 after 9:00. And now is the time and place for  
 21 consideration of TC04-085, petition of Cheyenne  
 22 River Sioux Tribe Telephone Authority.  
 23 Mr. Dickens, you may proceed with your case.  
 24 MR. DICKENS: Thank you. Well,  
 25 Commissioners, we have reached an agreement with

1062

1 Western Wireless, and I'll outline the broad terms  
 2 of it and Mr. Wieczorek will keep me straight  
 3 should I stray.  
 4 But in broad terms we have agreed to implement  
 5 local number portability for Western Wireless and  
 6 anyone else that has a direct connect with Cheyenne  
 7 River. There is only one direct connect there now.  
 8 In that respect it looks a little bit like the  
 9 James Valley agreement that was reached the other  
 10 day.  
 11 We do intend to maintain our position  
 12 vis-a-vis transport for other carriers who choose  
 13 to access Cheyenne River's traffic via the indirect  
 14 connection and that will be reflected in a  
 15 settlement agreement that we sign with Western  
 16 Wireless and bring before you in a couple of days  
 17 which we intend to file in the Docket.  
 18 We have further agreed to stipulate the  
 19 testimony, prefiled testimony, of our witnesses and  
 20 Western Wireless's witness in without  
 21 cross-examination, and we have a further correction  
 22 to an exhibit which is marked number 5 that will be  
 23 stipulated in. And I thought just to correct the  
 24 record because the testimony that we are  
 25 stipulating in on our part is not correct at this

1063

1 point and so to correct the record I thought I  
 2 would have Mr. Neff, who is appearing on behalf of  
 3 the Cheyenne River Sioux Tribe, take the stand just  
 4 to explain the corrections that are made to his  
 5 testimony and why those corrections are made, which  
 6 will, I think, explain the reason for the  
 7 settlement also. If that's acceptable, that's what  
 8 we'll do.  
 9 Did I leave anything out, Talbot?  
 10 MR. WIECZOREK: I think we agreed to  
 11 a date to be LNP capable of October 1 this year so  
 12 it would match the same date as James Valley's  
 13 settlement.  
 14 MR. SMITH: Unless the Commissioners  
 15 have an objection, I certainly don't object to  
 16 that. It's an encouraging development. So do you  
 17 want to call Mr. Neff then to correct the exhibit?  
 18 MR. DICKENS: Yes.  
 19 MR. SMITH: And then if you just, at  
 20 that point if the attorneys just want to stipulate  
 21 admission, that's what we'll do.  
 22 MR. DICKENS: Okay. Well, let me  
 23 ask --  
 24 MR. SMITH: Can you identify for us  
 25 just so we know what the exhibit numbers are that

1064

1 relate to which documents, please?  
 2 MR. DICKENS: Yes. Exhibits 1 and 2  
 3 are the direct and rebuttal testimony of  
 4 Mr. Williams. Exhibits 3 and 4 are the direct and  
 5 rebuttal testimony of Mr. Neff. Exhibit 5 corrects  
 6 an exhibit attached to Mr. Neff's direct testimony,  
 7 which is no longer correct, the exhibit that was  
 8 attached to his direct testimony.  
 9 Can we go off the record a second?  
 10 MR. SMITH: Please.  
 11 (Discussion off the record)  
 12 MR. DICKENS: Would that be okay?  
 13 MR. SMITH: Okay.  
 14 MR. WIECZOREK: I have no objection  
 15 to that.  
 16 MR. DICKENS: That's what we'll do  
 17 and get you a signed settlement agreement within 24  
 18 to 48 hours.  
 19 MR. SMITH: Is Western Wireless in  
 20 agreement with stipulating to the exhibits?  
 21 MR. WIECZOREK: Yes. I'd agree to  
 22 Cheyenne River 1 through 5 and, as I understand our  
 23 agreement, Mr. Williams' that's been already  
 24 prefiled will also apply to this Docket.  
 25 MR. SMITH: Is that so stipulated,

1 Counsel?  
 2 MR. DICKENS: Yes.  
 3 MR. SMITH: That being the case, we  
 4 will admit Cheyenne River Exhibits 1 through 5 and,  
 5 as I understand the situation then, this proceeding  
 6 with respect to at least Cheyenne River will be --  
 7 we will be in recess pending -- or we will continue  
 8 the proceeding until a date to be determined in  
 9 order to consider the stipulation.  
 10 Is that a fair statement?  
 11 MR. DICKENS: Just to be clear, I  
 12 don't think that -- I'm trying to think of the  
 13 effect of this. There aren't any other parties to  
 14 this case other than us and Western Wireless.  
 15 MR. SMITH: SDTA.  
 16 MR. DICKENS: We hope he's on our  
 17 side today. So I guess if we sign the settlement  
 18 agreement, I think that would be okay.  
 19 MR. SMITH: Ms. Wiest, do you have  
 20 anything?  
 21 MS. AILTS WIEST: No. We'll wait  
 22 until we see the settlement agreement.  
 23 MR. SMITH: Do we want to schedule a  
 24 date for consideration of the stipulation? I  
 25 really seriously doubt if you'll have it here by

1 hearing time tomorrow. That would seem to be --  
 2 MR. COIT: Can you do it at the  
 3 Commission meeting?  
 4 MR. SMITH: When is that scheduled?  
 5 CHAIRMAN SAHR: Next Tuesday.  
 6 MR. SMITH: We certainly could if  
 7 you think we could make a deadline like that. And  
 8 Monday is the Fourth of July.  
 9 MR. DICKENS: I've got to appear  
 10 before another Commission Tuesday morning so -- we  
 11 may have it to you by the day after tomorrow.  
 12 MR. SMITH: We're way out there.  
 13 This was the last filed petition so we're not under  
 14 any time deadline for this case. We'll be able to  
 15 schedule something.  
 16 CHAIRMAN SAHR: Well, the next  
 17 Commission meeting is July 20.  
 18 MR. SMITH: That would be a  
 19 possibility and actually we may have quite a  
 20 lengthy time.  
 21 CHAIRMAN SAHR: That may make more  
 22 sense to make sure we get the parties adequate time  
 23 to reduce this to writing, cross the Ts and dot the  
 24 Is and give staff the appropriate time. I feel if  
 25 we try to shoehorn this into the July 6 meeting

1 we're asking a lot of the parties and if we have  
 2 the time and are not stuck in a procedural bind why  
 3 not give ourselves two more weeks to consider this.  
 4 And I would echo John's sentiments as well praising  
 5 the parties for sitting down and coming up with a  
 6 solution that will resolve the case.  
 7 COMMISSIONER BURG: Can I ask some  
 8 clarifying questions on this document?  
 9 MR. SMITH: Please.  
 10 COMMISSIONER BURG: And this is  
 11 probably on both this one and James Valley. Does  
 12 the companies pay transport costs? Will Cheyenne  
 13 River or James Valley -- you said it's similar.  
 14 Will they pay transport costs?  
 15 MR. DICKENS: No, Mr. Chairman.  
 16 Right now Western Wireless has an existing direct  
 17 connect into Eagle Butte, the Eagle Butte exchange  
 18 and --  
 19 COMMISSIONER BURG: So then my  
 20 question is, does this column that says with  
 21 transport, does that even apply?  
 22 MR. DICKENS: Well, I don't think it  
 23 would apply to Western Wireless, but it may apply  
 24 to other carriers and we're going to address that  
 25 in the settlement. Because for carriers that don't

1 have a direct connect the transport issue will  
 2 continue to be alive and affected by what you do --  
 3 COMMISSIONER BURG: At least until  
 4 the FCC does something about it.  
 5 MR. DICKENS: Right.  
 6 COMMISSIONER BURG: So for the  
 7 purposes of this, for the stipulation agreement  
 8 with Western Wireless the column with transport  
 9 doesn't apply. Is that my understanding?  
 10 MR. DICKENS: It would not apply to  
 11 Western Wireless.  
 12 COMMISSIONER BURG: So then I go to  
 13 the very last line you've got LNP costs per access  
 14 line. Is that per month, or is that one time?  
 15 MR. DICKENS: I believe that's per  
 16 month, is that correct? Yes.  
 17 COMMISSIONER BURG: So we're adding  
 18 70 cents to their bill for having LNP in Cheyenne  
 19 River?  
 20 MR. DICKENS: Yes.  
 21 COMMISSIONER BURG: It looks like  
 22 16.55 is the monthly total costs then; right?  
 23 MR. DICKENS: Yes.  
 24 COMMISSIONER BURG: That would come  
 25 out to 70 cents a line?

1 VICE CHAIR HANSON: That's right.  
 2 COMMISSIONER BURG: Okay. That  
 3 answered the question I wanted clarified.  
 4 MR. DICKENS: Thank you.  
 5 MR. COIT: I guess I would -- and  
 6 J.D. or Ron, correct me if I'm wrong. The direct  
 7 connect right now is in Eagle Butte; right?  
 8 MR. WILLIAMS: Yeah.  
 9 MR. COIT: They've got a host remote  
 10 situation there. Eagle Butte's the host. They've  
 11 got all the other switches in the back of that  
 12 basically, and it's all part of one calling area.  
 13 So with the direct connect they establish a POI in  
 14 the host area, and there's the local calling area  
 15 behind that that includes all the other CRSTs.  
 16 MR. WIECZOREK: The only point I'd  
 17 make is it's my understanding the switch is already  
 18 LNP compliant essentially so they've already  
 19 incurred most of these costs.  
 20 COMMISSIONER BURG: So these are not  
 21 new costs?  
 22 MR. COIT: Right.  
 23 COMMISSIONER BURG: So that brings  
 24 up why would they be there and have a 70 cent per  
 25 line increase if that's already been --

1 MR. DICKENS: Well --  
 2 MR. COIT: They could file for  
 3 recovery through NECA, I would think.  
 4 MR. DICKENS: Yes. I mean, I  
 5 believe the company's eligible to file for the  
 6 surcharge treatment with NECA. You're a NECA pool  
 7 member, aren't you?  
 8 (Mr. Neff nods head)  
 9 MR. SMITH: Is there anything  
 10 further in this Docket?  
 11 MR. DICKENS: No.  
 12 MR. SMITH: The hearing then in  
 13 TC04-085 is continued until a date can be  
 14 determined following submission of the parties'  
 15 stipulation to the admission. We are adjourned.  
 16 (The proceedings are in recess)  
 17  
 18  
 19  
 20  
 21  
 22  
 23  
 24  
 25

1 (Exhibits Santel 1 through 3 are marked for identification)  
 2 (Exhibits ITC 6 through 8 are marked for identification)  
 3 MR. SMITH: The LNP suspension  
 4 Dockets hearing is reconvened. Today is July 1,  
 5 2004. It's a quarter to 9:00, and this is the time  
 6 and place set for hearing in Santel, which is  
 7 Santel Communications Cooperative, Inc., which is  
 8 TC04-038, and it is also the time that was set for  
 9 the continued hearings in ITC, which is -- the ITC  
 10 suspension Docket, which is TC04-054, and James  
 11 Valley Telephone Company, which is, I think,  
 12 04-077. Is that right?  
 13 MR. GERDES: Yes.  
 14 MR. SMITH: 077. We're first going  
 15 to consider the 054, TC04-054, which is Interstate  
 16 Telephone Company, and as I understand it, this is  
 17 also going to implicate Docket TC03-192, which is  
 18 the contract case between Midco and ITC.  
 19 And I'm not sure which of the parties -- I  
 20 guess, Ben, do you want to lead off for ITC?  
 21 MR. DICKENS: Well, basically I'll  
 22 defer to Mr. Gerdes. We have reached an agreement,  
 23 and Mr. Gerdes can summarize the terms if he would  
 24 like.  
 25 MR. GERDES: Mr. Chairman, members

1 of the Commission, Mr. Smith, the parties have been  
 2 negotiating throughout the course of these  
 3 hearings, and just as a matter of information, we  
 4 have entered into a settlement agreement in the 192  
 5 Docket. It has been signed, and it will be filed  
 6 with the Commission in the usual way, that is  
 7 original and 10 copies to be filed. I have copies  
 8 and so does Mr. Dickens. We both have copies  
 9 available for anybody who wants to see the  
 10 agreement now. But just as a matter of  
 11 information, we have settled that Docket, and the  
 12 agreement will be filed.  
 13 And then we have marked Exhibits 6, 7, and 8,  
 14 which are prepared prefiled testimony of Jerry  
 15 Heiberger, Mary Lohnes, and Tom Simmons, and it is  
 16 our stipulation that these exhibits may be admitted  
 17 into the 054 Docket.  
 18 MR. SMITH: Is Lohnes No. 7?  
 19 MR. GERDES: Heiberger is 6, Simmons  
 20 is 7, and Lohnes is 8. May that be so stipulated?  
 21 MR. DICKENS: Yes. And we have one  
 22 further stipulation.  
 23 MR. GERDES: I think we need to hear  
 24 from Mr. Wieczorek.  
 25 MR. WIECZOREK: I have no objection.

1 Some of it was just handed to me, but I sped read  
 2 it and I have no objections to it being admitted.  
 3 MR. COIT: I have no objections on  
 4 that either.  
 5 MS. AILTS WIEST: No objection.  
 6 MR. SMITH: Okay. ITC Exhibits 6,  
 7 7, and 8 in Docket TC04-054 are admitted.  
 8 MR. GERDES: Secondly, we stipulate  
 9 that the stricken part of Jerry Heiberger's  
 10 testimony in the 192 Docket may be -- well, strike  
 11 that.  
 12 It is our stipulation that all of the evidence  
 13 in the 192 Docket, including that portion of Jerry  
 14 Heiberger's testimony which was stricken, may be  
 15 admitted into evidence in the 054 Docket.  
 16 So stipulated?  
 17 MR. DICKENS: Yes.  
 18 MR. WIECZOREK: No objection.  
 19 MR. COIT: No objection.  
 20 MS. AILTS WIEST: No objection.  
 21 MR. SMITH: Okay. Where is that?  
 22 MR. GERDES: Well, there would be  
 23 the written testimony --  
 24 MR. SMITH: That's ITC 1 in the 192  
 25 Docket.

1 MR. GERDES: Yes. And plus it's  
 2 perhaps partially redundant but we're also talking  
 3 about -- we're talking about both direct and cross  
 4 on all three witnesses, that is Tom Simmons, Mary  
 5 Lohnes, and Jerry Heiberger.  
 6 MR. SMITH: What you stipulated to  
 7 is that all of the testimony in the 192 Docket be  
 8 admitted?  
 9 MR. GERDES: Right.  
 10 MR. SMITH: The entire evidentiary  
 11 record in the 192 Docket will be admitted into the  
 12 054 Docket.  
 13 MR. GERDES: Right. Including the  
 14 portion of Jerry Heiberger's testimony that was  
 15 stricken.  
 16 MR. SMITH: Right.  
 17 MR. WIECZOREK: I do have one  
 18 question. Was there testimony beyond Jerry  
 19 Heiberger's submitted testimony on behalf of ITC in  
 20 the 192 Docket?  
 21 MR. DICKENS: No.  
 22 MR. WIECZOREK: Just Heiberger? No  
 23 objection then.  
 24 MR. SMITH: Do the other parties  
 25 agree to that stipulation?

1 MS. AILTS WIEST: Yes.  
 2 MR. COIT: Yes.  
 3 MR. SMITH: Okay. Then the  
 4 evidentiary record in 192 will be admitted as  
 5 evidence into Docket TC04-054.  
 6 MR. GERDES: And then finally we  
 7 stipulate that if Jerry Heiberger were called and  
 8 testified here today, he would testify that four  
 9 ITC customers have changed their service to  
 10 Midcontinent in the Webster Docket since March of  
 11 2004.  
 12 MR. COIT: Yes.  
 13 MR. WIECZOREK: No objection.  
 14 MR. COIT: No objection.  
 15 MS. AILTS WIEST: No objection.  
 16 MR. SMITH: So stipulated.  
 17 MR. GERDES: I think that is it, is  
 18 it not?  
 19 MR. DICKENS: Yes. I think that's  
 20 everything.  
 21 MR. GERDES: With that, Midcontinent  
 22 rests in the 054 Docket.  
 23 MR. DICKENS: We rest in the 054  
 24 Docket. And I guess we'll file the stipulation  
 25 with the Commission.

1 MR. SMITH: Did you have any -- and  
 2 you don't have anything further relative to that,  
 3 Mr. Wieczorek, do you?  
 4 MR. WIECZOREK: No, I don't.  
 5 MR. SMITH: Okay. As I understand  
 6 it then, the 054 Docket with respect to Midco and  
 7 ITC has not been resolved as of this point?  
 8 MR. GERDES: That's correct. We  
 9 would still intend to brief as will ITC.  
 10 MR. SMITH: Okay. Thank you.  
 11 Mr. Wieczorek, another preliminary matter. We were  
 12 to have the James Valley stipulation presented this  
 13 morning. As I understand it, there's been a  
 14 technical glitch develop.  
 15 MR. WIECZOREK: Yeah. We've flowed  
 16 the language back and forth and we have essentially  
 17 everything agreed to but there's one technical  
 18 question that Mr. Cremer had for his client and his  
 19 client was unavailable yesterday to answer it.  
 20 During my phone conference with Mr. Cremer  
 21 yesterday over the language I informed him that the  
 22 Commission was looking at approving CRST on the  
 23 20th, and he asked me on behalf of him and  
 24 Western Wireless to represent that we don't foresee  
 25 having any problems with presenting on the 20th,

1077

1 the same time you look at CRST.  
 2 MR. SMITH: Is that acceptable to  
 3 the Commissioners?  
 4 VICE CHAIR HANSON: Yes.  
 5 CHAIRMAN SAHR: Yes.  
 6 MR. SMITH: We'll schedule that for  
 7 presentation of the Commission on July 20 in  
 8 connection with -- the Docket number on that is  
 9 TC04-077.  
 10 Does that conclude all the preliminary matters  
 11 then, Mr. Dickens?  
 12 MR. DICKENS: With respect to 054, I  
 13 have a couple of other housekeeping matters I'd  
 14 like to take care of before I slip the surly bonds  
 15 of --  
 16 MR. WIECZOREK: South Dakota?  
 17 MR. DICKENS: I've got an order of  
 18 the Minnesota Commission --  
 19 MR. WIECZOREK: I think it's a  
 20 letter.  
 21 MR. DICKENS: Is it a letter? My  
 22 memory has started slipping too early in the  
 23 morning.  
 24 It is a letter dated June 23 --  
 25 MR. SMITH: '04?

1078

1 MR. DICKENS: Yes. June 23, '04  
 2 that indicates that several companies including  
 3 Hills Telephone Company, Sioux Valley, and  
 4 Interstate Telephone Cooperative along with the  
 5 Minnesota company Winnebago Telephone should not  
 6 have been included. It's a letter from counsel  
 7 that these companies should not have been included  
 8 in the MIC Docket that received some attention  
 9 earlier in the case. And we would like to have  
 10 this marked and received into evidence.  
 11 MR. WIECZOREK: It came up in at  
 12 least a couple different Dockets but it's my  
 13 understanding under what we've agreed to is  
 14 anything marked as an exhibit in one Docket can be  
 15 used in another. So it came up in ITC first so I  
 16 think it makes sense to mark it as an ITC exhibit.  
 17 MR. SMITH: That will be ITC 9.  
 18 (Exhibit ITC 9 is marked for identification)  
 19 MR. WIECZOREK: The Commission might  
 20 recall last week Ms. Rogers brought this up towards  
 21 the end of the week and my only request was we get  
 22 one stamp filed with the Commission. This is stamp  
 23 filed with the Minnesota Commission and rather than  
 24 the Commissioners taking judicial notice  
 25 Mr. Dickens and I talked about it and thought it

1079

1 would be easier to have it marked into evidence so  
 2 the record would be complete with that into  
 3 evidence.  
 4 MR. DICKENS: I further have  
 5 corrected exhibits from Mr. Bullock, and I  
 6 understand these were e-mailed to you, Tal --  
 7 MR. WIECZOREK: I believe so.  
 8 MR. DICKENS: I'd like to offer that  
 9 as an ITC Docket. It would be Exhibit No. 9.  
 10 MR. SMITH: Is there objection to  
 11 ITC Exhibit 9?  
 12 MR. WIECZOREK: I have none.  
 13 MR. COIT: No objection.  
 14 MS. AILTS WIEST: No objection.  
 15 MR. SMITH: ITC 9 is admitted.  
 16 MR. GERDES: No objection.  
 17 MR. DICKENS: Then I have a  
 18 corrected sheet from Mr. Bullock that he indicated  
 19 he would supply. As you may recall he made some  
 20 corrections on the stand to his numbers and he has  
 21 supplied corrected exhibits for Alliance, Golden  
 22 West, and Valley Telephone. It's a three-page  
 23 exhibit. And I'll have to figure out with Cheri  
 24 how we marked that.  
 25 (Discussion off the record)

1080

1 MR. WIECZOREK: It would be my  
 2 preference since it actually amends exhibits that  
 3 are part of his testimony to mark it as a Bullock  
 4 exhibit. I think it would be easier to track it  
 5 that way.  
 6 MR. SMITH: Just call it Bullock 3?  
 7 MR. WIECZOREK: If nobody else has  
 8 an objection.  
 9 MR. SMITH: I think the last I've  
 10 got mark -- and if there is particularly -- Bullock  
 11 1 is Bullock's introductory direct testimony.  
 12 Bullock 2 is his rebuttal, which was common to all  
 13 companies. Whatever you want to do.  
 14 MR. COIT: I think that makes sense.  
 15 MR. SMITH: Call it Bullock 3.  
 16 MR. WIECZOREK: Yeah. He did have  
 17 that spreadsheet, which I believe was TRB 1 that  
 18 this would then modify those numbers on that  
 19 spreadsheet.  
 20 MR. SMITH: Was that an exhibit?  
 21 MR. WIECZOREK: That was an exhibit  
 22 to his rebuttal testimony.  
 23 MR. SMITH: It would definitely make  
 24 sense to call it 3.  
 25 MR. WIECZOREK: That was the one he

1081

1 operated on and said this change should be this  
2 change.

3 MR. DICKENS: Yeah. It relates to  
4 Exhibit 3 which is why it's labeled in that corner.  
5 And I'd move the admission of that.

6 MR. WIECZOREK: No objection.  
7 MR. COIT: No objection.  
8 MS. AILTS WIEST: No objection.  
9 MR. SMITH: Bullock 3 is admitted.  
10 (Exhibit Bullock 3 is marked for identification)  
11 MR. DICKENS: Finally, we have  
12 corrected exhibits and a piece of supplemental  
13 testimony from Mr. DeWitte that he indicated to  
14 staff -- he indicated to staff he would supply a  
15 corrected schedule, I believe; is that right?  
16 MR. DEWITTE: Yes.  
17 MR. DICKENS: That he would supply a  
18 corrected schedule for the changes he's made, and  
19 he also, even though I don't think he was requested  
20 by staff, he also prepared a narrative of the  
21 changes that just explains in English what the  
22 changes are and it's six pages long. And I'd like  
23 to have this marked as an exhibit also. And that  
24 would be for the cases Mr. DeWitte appeared in,  
25 which is Swiftel, Interstate, James Valley, Santel,

1082

1 Stockholm-Strandburg, Venture Communications, and  
2 West River.  
3 (Discussion off the record)  
4 (Exhibits ITC 4A and 4B are marked for identification)  
5 MR. DICKENS: With that, I would  
6 move the admission of ITC 4A and 4B and  
7 Mr. DeWitte is present if anyone wants to question  
8 him about the supplemental exhibits.  
9 MR. GERDES: I have no objections.  
10 MR. WIECZOREK: I have no objections  
11 but would like to ask a couple of clarifying  
12 questions. We were only given this information 10  
13 minutes before we started and Mr. DeWitte was kind  
14 enough to sit and answer some questions for me but  
15 I'd like to clarify a couple of things on the  
16 record and I can either do that when he's on for  
17 Santel or we can put him on now.  
18 MR. SMITH: Do you care, Jeff?  
19 MR. LARSON: No, I don't care if you  
20 want to do it now.  
21 MR. SMITH: Have the exhibits been  
22 offered?  
23 MR. DICKENS: Yes.  
24 MR. SMITH: Is there an objection to  
25 receiving the exhibits, first of all?

1083

1 MR. WIECZOREK: Not as long as I get  
2 to ask a couple of questions, I have no objections.  
3 MS. AILTS WIEST: No objections.  
4 MR. COIT: No objections.  
5 MR. SMITH: ITC Exhibits 4A and 4B  
6 are admitted. Does that conclude your submissions  
7 this morning, Mr. Dickens?  
8 MR. DICKENS: Yes. Thank you very  
9 much.  
10 MR. SMITH: You're welcome.  
11 Mr. Wieczorek, please, you may call Mr. DeWitte  
12 then. Are you ready, or do you need some time?  
13 MR. WIECZOREK: No. Just a couple  
14 of quick clarifying questions so I make sure it's  
15 in the record.  
16 MR. COIT: With respect to ITC  
17 Exhibit 4B, I notice the shading is pretty hard to  
18 read. Is the original colored?  
19 MR. DEWITTE: Yeah. He's going to  
20 mark his original colored.  
21 MR. WIECZOREK: Actually I would  
22 make a request -- these were handed out in  
23 black-and-white this morning. I would make a  
24 request that counsel for parties provide -- I mean,  
25 they can just e-mail us a copy of the spreadsheet

1084

1 so we can all have colored copies if we wanted to.  
2 MR. DICKENS: We would be happy to  
3 do that.  
4 (Discussion off the record)  
5 MR. SMITH: Ben, I don't know if  
6 maybe your time is too crunched. I don't know if  
7 you have your file here but you could probably run  
8 it downstairs and they could spit out some colored  
9 copies for you.  
10 MR. DICKENS: Okay. I'd have to  
11 borrow John's because he's got the only colored  
12 copy.  
13 MR. SMITH: Okay. Do we have a  
14 color copier down there? We have a color printer.  
15 CHAIRMAN SAHR: We can take it  
16 downstairs and they can make colored copies in a  
17 matter of minutes. Maybe we want to do that.  
18 MR. SMITH: I just thought if you  
19 had a disk we could run it into our color printer.  
20 THE WITNESS: Do we want to do that  
21 now?  
22 MR. SMITH: I don't care. If you  
23 want to take 5 we could do that. We could have  
24 colored documents to look at.  
25 CHAIRMAN SAHR: Off the record.

1085

1 (Discussion off the record)  
2 MR. SMITH: We're back on the  
3 record. And, Mr. Wieczorek -- Mr. DeWitte, you're  
4 still under oath and please proceed, Mr. Wieczorek,  
5 cross-examination.

6 MR. WIECZOREK: Thank you,  
7 Mr. Smith.

8 CROSS-EXAMINATION

9 BY MR. WIECZOREK:

10 **Q** Mr. DeWitte, I'm going to refer to your summary  
11 rebuttal testimony, all right?

12 **A** Okay.

13 **Q** And just a couple of initial questions. Although  
14 you've changed some of your transport-related cost  
15 numbers within what's been currently marked as ITC 4B,  
16 and that's the spreadsheet, you have used the same  
17 analysis and procedure that we discussed last week;  
18 correct?

19 **A** Yeah. I used my initial direct trunking analysis for  
20 that. Because all I was doing was correcting the  
21 numbers that pertain to that.

22 **Q** Right. So that analysis was the DS-1 to every exchange  
23 where there wasn't already an existing exchange for  
24 every wireless carrier that had a license in that area;  
25 correct?

1087

1 there could be five CMRS carriers that cover all of  
2 their exchanges. And so the, you know, assumption that  
3 we were trying to bring across is that, you know, we  
4 weren't going to try to take a direct connection for  
5 every possible carrier that could likely be there,  
6 meaning all 11 licensees. We were trying to use a  
7 reasonable number of carriers that may appear in that  
8 area, and five appeared to be the reasonable number for  
9 that number.

10 **Q** All right. But we had this very long discussion that a  
11 number of these carriers are not providing services  
12 today; correct?

13 **A** Correct.

14 **Q** And you have not adjusted your transport by eliminating  
15 any possible carriers; correct?

16 **A** No, I did not eliminate any possible carriers.

17 **Q** And what I want to get clear for the record is any  
18 reduction in transport was simply -- if I recall  
19 correctly was because of mathematical errors or you did  
20 not know of a preexisting DS-1 line to an exchange?

21 **A** Correct. After our discussion there were some errors  
22 in the formulas and so those have been corrected. And  
23 then we reduced the appropriate transport costs for  
24 existing connections that were already there.

25 **Q** Okay. And then on page 4 of 6 you talk about your

1086

1 **A** No, not every carrier that had a license. The ones  
2 that would likely be offering service there. There's  
3 11 licensees for each area, and I only used four or  
4 five.

5 **Q** Okay. And we had the discussion on Interstate. If you  
6 go to page 3 of your testimony you revised the  
7 Interstate -- you revised the Interstate numbers down,  
8 but there was a lengthy discussion on the fact that RCC  
9 was one of the listed companies for -- excuse me. I  
10 think that's -- sorry. I believe I misspoke. You  
11 might want to go to -- let's go to Venture is what I  
12 meant to do. Trying to keep your companies straight,  
13 page 5 of 6.

14 You used five CMRS carriers for Venture, and  
15 that's the same numbers you used last week; correct?

16 **A** Correct.

17 **Q** And there was a lengthy discussion with Mr. Houdek that  
18 one of the CMRS carriers you were using was RCC. Do  
19 you recall that?

20 **A** Yes.

21 **Q** And it was clear last week during the testimony that  
22 RCC does not have a license in the majority of the  
23 exchanges of Venture's. Do you recall that?

24 **A** I recall that, but I left it at five CMRS carriers  
25 strictly because, you know, there's a likelihood that

1088

1 reduction -- also your reduction on Venture because  
2 there is a switch that already has the LNP software  
3 installed.

4 **A** Yes. Venture has an exchange, Sisseton, South Dakota,  
5 which already has the LNP feature bit activated. And  
6 so in order to make sure that, you know, we weren't  
7 overstating the costs on that particular piece, we did  
8 reduce the LNP software cost estimate by Nortel's  
9 formula or pricing, which is \$4 equipped line.

10 **Q** And as I understand it, this LNP feature was purchased  
11 as part of a standard upgrade for that switch, and  
12 that's why it's there -- or a regular upgrade probably.  
13 I don't want to use the word standard.

14 **A** Yeah. They have already purchased the RTU fee for that  
15 as part of -- you know, part of what they purchased. I  
16 don't recall the specifics on exactly when it went in.

17 **Q** Okay. Well, and I'm not trying to be confusing. I  
18 won't use the word standard. I'll just use the word  
19 they were doing an upgrade of that switch and that was  
20 part of the features they purchased when they upgraded  
21 that switch?

22 **A** I believe that's the case, but I don't recall whether  
23 it went in initially or whether it went in as an  
24 upgrade.

25 MR. WIECZOREK: That's all I have,

1 unless, like I said, the color spreadsheet prompts  
 2 me to ask something else.  
 3 MR. SMITH: Okay. Well, we'll await  
 4 that. For now then, Mr. Dickens, did you have any  
 5 redirect of the witness?  
 6 MR. DICKENS: No.  
 7 MR. SMITH: Do any of the other  
 8 parties have questions for Mr. DeWitte relative --  
 9 MR. COIT: I just have one.  
 10 CROSS-EXAMINATION  
 11 BY MR. COIT:  
 12 **Q** Mr. DeWitte, do you know, did Venture -- they purchased  
 13 the Sisseton exchange not all that long ago. Do you  
 14 know, did Venture actually replace the switch that  
 15 Qwest had in there?  
 16 **A** I don't recall that off the top of my head. I don't  
 17 know if they purchased that as part of the exchange or  
 18 not.  
 19 MR. COIT: Thank you.  
 20 MR. SMITH: Ms. Wiest, any  
 21 questions?  
 22 MS. AILTS WIEST: No questions.  
 23 MR. SMITH: Well, for now I guess --  
 24 well, I don't know if you can step down or not.  
 25 Yeah. I guess you can in the LNP Dockets that you

1 testified to, other than Santel for now, with the  
 2 proviso that if the colored exhibit additional  
 3 changes that Mr. Wiczorek wants to question you  
 4 with, we may recall you in these Dockets later.  
 5 Thank you.  
 6 THE WITNESS: Thank you, Mr. Smith,  
 7 Commissioners, staff. Thank you.  
 8 MR. SMITH: With respect to the  
 9 other -- with the case that we've been discussing  
 10 this morning, which is the LNP Dockets other than  
 11 Santel and 192, the hearings are in recess, I  
 12 guess, pending receipt of the colored copies, and  
 13 192 the hearing is concluded.  
 14 At this time then are you ready to go,  
 15 Mr. Larson, or should we take a short break or how  
 16 do you want to go?  
 17 MR. LARSON: I'm ready to go.  
 18 MR. SMITH: Are your exhibits  
 19 marked?  
 20 MR. LARSON: Yes, they are. I think  
 21 I'll be pretty short.  
 22 MR. SMITH: Let's take a short break  
 23 and see if Commissioner Burg will come back.  
 24 (A short recess is taken)  
 25 MR. SMITH: We're back on the record

1 in the LNP suspension cases. At this time it is  
 2 time for the hearing in Docket number TC04-038,  
 3 which is petition for local number portability  
 4 suspension on behalf of Santel Communications  
 5 Cooperative, Inc.  
 6 Mr. Larson, are you ready to proceed?  
 7 MR. LARSON: I am, Mr. Smith.  
 8 MR. SMITH: Please proceed with your  
 9 direct case.  
 10 MR. LARSON: Thank you,  
 11 Commissioners, Chairman. I would call Gene Kroell  
 12 as the first witness.  
 13 GENE KROELL,  
 14 called as a witness, being first duly sworn in the  
 15 above cause, testified under oath as follows:  
 16 DIRECT EXAMINATION  
 17 BY MR. LARSON:  
 18 **Q** Would you please state your name and address for the  
 19 record.  
 20 **A** My name is Gene Kroell. I'm general manager at Santel  
 21 Communications. My office is at 308 South Dumont  
 22 Avenue, Woonsocket, South Dakota.  
 23 **Q** Santel is based in Woonsocket; is that correct?  
 24 **A** Yes, it is.  
 25 **Q** And how many exchanges does Santel serve?

1 **A** We serve 10.  
 2 **Q** And, Gene, I'd like you to look at what has been marked  
 3 as Santel Exhibit 1 and ask is this your direct  
 4 prefiled testimony in this Docket?  
 5 **A** It appears to be.  
 6 **Q** And was this prepared by you or under your direction?  
 7 **A** Yes.  
 8 **Q** And if I asked you the same questions today that's in  
 9 the exhibit, would you respond in the same way?  
 10 **A** Yes. I have no changes.  
 11 **Q** And would you please give us kind of a brief summary of  
 12 your prefiled testimony?  
 13 **A** The summary of my prefiled testimony is Santel  
 14 Communications is a co-op. It's a member-owned  
 15 organization. I own a piece of it, one vote.  
 16 Everybody else the same way. Fairly simple concept of  
 17 doing business, we take the revenue and we subtract the  
 18 expenses and the balance gets allocated to the members  
 19 as capital credits.  
 20 It's their money. They built the company one  
 21 exchange at a time. It started at Forestburg. They  
 22 bought six old exchanges after that, upgraded them, and  
 23 of course in 1996 we purchased three exchanges from US  
 24 West. So basically what we're doing is we're serving  
 25 the part of the country that nobody else wants or

1 wanted.  
 2 Now that we've kind of got this thing  
 3 upgraded where it's running pretty good it appears to  
 4 me that now there's a whole lot more interest than  
 5 there was several years ago. I'm spending members'  
 6 money. I'm very passionate about that. I want to take  
 7 as much of that back to them as I can. The members of  
 8 our co-op feel that they should have the opportunity  
 9 for the direction of where their money is going to be  
 10 spent and not some outside interest.  
 11 And I refer to CALEA as one. That was a  
 12 \$121,000 upgrade to our switch that's absolutely not  
 13 done one thing since June of 2001. I feel the same way  
 14 about this LNP. We haven't had any requests for it.  
 15 If we get into this, we're going to jam it down the  
 16 throats of our members. They're going to come unglued.  
 17 There was quite a surge after the end-user  
 18 charge was raised to \$6.50 about a year ago. We got  
 19 hundreds of telephone calls on that. And, of course,  
 20 it's hard to explain to them that it's caused by  
 21 somebody else, even though it's a line item on the  
 22 bill.  
 23 The other thing is I think there's still some  
 24 issues -- I'm not an expert on this LNP by any sense of  
 25 the means, but I think there's some unanswered

1 MR. SMITH: Mr. Coit, you have no  
 2 questions?  
 3 MR. COIT: (Shakes head).  
 4 MR. SMITH: Mr. Wieczorek, you may  
 5 proceed with your cross-examination.  
 6 MR. WIECZOREK: Thank you,  
 7 Mr. Smith.

CROSS-EXAMINATION

BY MR. WIECZOREK:

10 Q Do you recall that in your responses to discovery that  
 11 you estimated 12 ports per year in your Santel --  
 12 A Just a guess.  
 13 Q Okay. Does that sound about right?  
 14 A It might be all right. It might be long, you know. It  
 15 might be more. I don't have an idea. We have not had  
 16 a request.  
 17 Q Okay. Do you understand -- well, let me back up. The  
 18 cost analysis that's being presented by Mr. DeWitte  
 19 here, have you and Santel performed any other cost  
 20 analysis?  
 21 A No. Being a small company we just can't be experts in  
 22 everything so in most things we do we rely very heavily  
 23 on the consultants.  
 24 Q Okay. Do you understand the proposal that Mr. DeWitte  
 25 is making, the hardware that he's proposing to buy to

1 questions that the FCC through a proceeding they're  
 2 having with Sprint and I think some of this stuff needs  
 3 to get answered before we jump off the dock in this  
 4 particular case.  
 5 You know, we do this with other stuff. Just  
 6 to give you an example, DSL, I didn't buy a truckload  
 7 of DSL and go around and put it in all the exchanges  
 8 and say here it is, you're going to have to pay for it.  
 9 That's not the way it works. We surveyed our  
 10 customers, saw if there was some interest in it. There  
 11 was. We deployed it.  
 12 But we really try to make sure that we felt  
 13 we could pay for this system before we deployed it.  
 14 It's been slower probably than we thought, but it's  
 15 growing every day.  
 16 I guess that's all.  
 17 MR. LARSON: At this time then I  
 18 would offer Santel Exhibit 1.  
 19 MR. WIECZOREK: I have no objection.  
 20 MR. GERDES: No objection.  
 21 MR. COIT: No objection.  
 22 MS. AILTS WIEST: No objection.  
 23 MR. SMITH: Santel 1 is admitted.  
 24 MR. LARSON: And that's all I have.  
 25 MR. COIT: I have no questions.

1 solve the LNP issue?  
 2 A Yes.  
 3 Q Okay. So you understand that it entails a DSL line to  
 4 every one of your exchanges for four different CMRS  
 5 providers?  
 6 A Possible four carriers, yeah.  
 7 Q You talk about possible carriers, and in your direct  
 8 testimony you listed that there were only four wireless  
 9 carriers authorized to serve in Santel's service area;  
 10 correct?  
 11 A Right.  
 12 Q And if I understand that correctly, those are the only  
 13 four carriers who have a license within your areas.  
 14 A I guess I thought there was more licenses than that.  
 15 Well, I know there's more licenses than that. Western  
 16 Wireless, Verizon, Nextel I know are active in the  
 17 Mitchell area today. And we serve everything around  
 18 Mitchell. We serve Ethan, Mt. Vernon, Letcher,  
 19 Artesian.  
 20 Q Is Sprint PCS active?  
 21 A I don't think they're active in our area today.  
 22 Q Okay. But you understand under your proposal you would  
 23 spend \$50,000 to install DS lines to every one of your  
 24 exchanges for that carrier that isn't even active in  
 25 your area.

1 A Yes.

2 Q You testified that you like to protect your members' money; correct?

3 A Absolutely.

4 Q So when Western Wireless filed testimony in here proposing a much lower cost way to provide for LNP did you investigate that?

5 A You know, there's probably five or six ways we can look at it, but it's expense to us.

6 Q Well, and I understand that you're concerned about your members' money, but under your transport-related costs alone you're projecting in excess of \$700,000 in the first year. Do you understand that?

7 A And I'll defer to Mr. DeWitte on that. They're his figures.

8 Q Okay. Well, I represent to you that if you do his figures, it's \$700,000 in the first year.

9 A Okay. I'll take your math.

10 Q Okay. So when Western Wireless proposes an alternative that is a small fraction of that number to protect your customers' money, don't you think it's worth investigating the proposal made by Western Wireless?

11 A I agree with that.

12 Q And if you could -- if you were ordered to provide LNP and the Western Wireless proposal was a fraction of

1 years. We continue this year and will be continuing next year and the year after.

2 Q Okay. And when you deploy broadband, as part of that expense you upgrade your existing lines; correct?

3 A Absolutely.

4 Q So when you talk about the deployment of broadband, that would include -- part of that would be just upgrading your existing lines; correct?

5 A Well, we need to get the fiber deeper in the loop. When I say we're deploying broadband, it's broadband capabilities, but we go to within 18 kilo feet of the customer's residence with a lightweight unit, but it does not necessarily mean that there's any broadband deployed in that particular optical network unit.

6 Q For broadband are you going to charge your customers for that extra service if they use the broadband service?

7 A You bet. They're paying it today.

8 Q Okay. You understand that the consumers in Mitchell and the cellular consumers are paying -- they have been paying for local number portability charges for years?

9 A Consumers in Mitchell?

10 Q Yes.

11 A Could be.

12 Q How about do you understand that the cell phone

1 that \$700,000 where it would save you, let's say, in excess of \$670,000 in that first year, you would be interested in pursuing that type of proposal?

2 A It would certainly be up for discussion.

3 Q Now you received a bona fide request from Western Wireless; correct?

4 A Yes, we have.

5 Q And did you ever contact Western Wireless before filing your petition to talk about whether there's ways to provide LNP that would save your customers money?

6 A We didn't initiate any contact. We got directly with the consultants to see what we were looking at. But, on the other hand, it's a two-way street.

7 Q Well, they made the contact requesting portability; right?

8 A Right.

9 Q And it's reasonable for them to wait for a response from you, wouldn't you agree?

10 A I would agree.

11 Q In your testimony you complain that if you have to install LNP that you'll lose some money that you could use for deploying broadband instead; correct?

12 A That's going to have an effect on it. Our broadband project in the rural areas is not complete by any sense of the means. We have been working on it for several

1 consumers all pay an LNP charge?

2 A Yes.

3 Q But you don't want your consumers to have to pay for LNP?

4 A You know, if we've got 12 people out of 5,000 that are maybe going to port their number over, I don't think \$10,000 would be reasonable for something like that.

5 Q You talked about I believe a \$6 charge that got added to your bill that impacted customers in your --

6 A For LNP?

7 Q No. You just talked generally about your customer reaction to it, and I thought you said it was a \$6 increase in their bill.

8 A I don't recall that.

9 Q I thought in your opening you mentioned an increase that you got a bunch of complaints about.

10 A Oh, the end-user charge of 6.50, the federal end-user charge has gone up since the MAG plan.

11 Q How much did that go up?

12 A It's gone from 3.50 to 6.50 for residences and it's gone from 3.50 to 9.20 for multiline businesses.

13 Q Okay. So you understand that your own expert has projected if you exclude transport costs that the increase will only be 78 cents for your customers; correct?

1 A If that's his figures, yes.  
 2 Q You're not presenting any demographic information on  
 3 average income of your customers to this Commission,  
 4 are you?  
 5 A No.  
 6 Q And you have not done any independent or internal  
 7 survey of your customers as to what they would pay to  
 8 have the option of local number portability, have you?  
 9 A You know, I brought it up at our annual meeting in  
 10 April. We had about 10 percent of the members there.  
 11 It really wasn't a very palatable subject to those  
 12 people.  
 13 Q Did you represent the costs were going to be in excess  
 14 of \$10 a line if you included transport?  
 15 A I really didn't represent anything to them because  
 16 after the backlash we had from the last 50 cents on the  
 17 end-user charge I wasn't going to put any numbers to  
 18 that.  
 19 Q And for LNP you understand that your company can  
 20 recover its investment through an end-user surcharge?  
 21 A All of it, that's unclear to me today.  
 22 Q You collect high-cost support, switch support through  
 23 USAC, don't you?  
 24 A Yes, we do.  
 25 Q And in calculating that support in the future, you're

1 MR. SMITH: You have some questions  
 2 to establish relevancy?  
 3 MR. WIECZOREK: Could I -- it's not  
 4 my question, but I believe it's relevant because  
 5 the numbers assume training necessary for LNP and  
 6 if he's already agreed to LNP, I think it's a  
 7 relevant question that needs to be answered.  
 8 MR. SMITH: What I'm getting at is  
 9 this: I don't know how the companies are managed.  
 10 Are they managed as absolutely separate companies  
 11 or do they share common management, do they share  
 12 facilities? I think that's what I'm getting at.  
 13 MR. GERDES: I'll ask the questions.  
 14 Q Mr. Kroell, Sancom, is that a wholly-owned subsidiary  
 15 of Santel?  
 16 A Yes, it is.  
 17 Q And do the companies share management?  
 18 A Yes. I'm the only employee that works for both  
 19 companies.  
 20 Q I'll ask you the question, is it true that negotiations  
 21 are going on right now between Sancom and Midcontinent  
 22 to establish an Interconnection Agreement which would  
 23 include LNP?  
 24 MR. LARSON: I still object for  
 25 irrelevant.

1 going to include the LNP cost to the extent you're  
 2 allowed, wouldn't you?  
 3 A If it's allowable. I'd defer that to Mr. DeWitte. I'm  
 4 not sure.  
 5 Q Mr. DeWitte calculates your USAC support payments?  
 6 A Yes. His firm does.  
 7 MR. WIECZOREK: That's all I have.  
 8 MR. SMITH: Mr. Gerdes?  
 9 MR. GERDES: I just have one  
 10 question. Well, one topic.  
 11 CROSS-EXAMINATION  
 12 BY MR. GERDES:  
 13 Q Mr. Kroell, Santel has made a filing for a competitive  
 14 entry into the Mitchell exchange of Qwest; is that  
 15 correct?  
 16 A Actually Santel Communications has not.  
 17 Q Well, a company that you own or control has?  
 18 A A subsidiary company has, Sancom Incorporated, but  
 19 Santel the co-op will not be in Mitchell.  
 20 Q Right. And it's true, is it not, that you've entered  
 21 into an agreement with Midcontinent for LNP in the  
 22 Mitchell exchange and that negotiations are going on  
 23 right now for an Interconnection Agreement?  
 24 MR. LARSON: I'd object as  
 25 irrelevant.

1 MR. SMITH: I'm going to overrule  
 2 and let him answer.  
 3 A Yes, we are.  
 4 MR. GERDES: Thank you. That's  
 5 all.  
 6 MR. SMITH: Ms. Wiest?  
 7 CROSS-EXAMINATION  
 8 BY MS. AILTS WIEST:  
 9 Q What is your current local rate?  
 10 A Our current local rate is 16.50.  
 11 Q For residential?  
 12 A For residential. Business is \$27.  
 13 MS. AILTS WIEST: That's all I have.  
 14 MR. SMITH: Commissioners, do you  
 15 have questions?  
 16 VICE CHAIR HANSON: I have just --  
 17 Mr. Kroell, can you tell us -- well, before I ask  
 18 that, how long have you been manager?  
 19 THE WITNESS: Since 1999. I was  
 20 plant manager before that. I've been there 29  
 21 years 8 months total.  
 22 VICE CHAIR HANSON: Okay. You were  
 23 probably around then when EAS was established with  
 24 Huron from Wolsey?  
 25 THE WITNESS: Yes. That happened

1105

1 when we bought the Wolsey exchange. It was part of  
 2 the deal with US West.  
 3 VICE CHAIR HANSON: Okay. So did  
 4 you -- you also have EAS with Howard?  
 5 THE WITNESS: Right.  
 6 VICE CHAIR HANSON: Were you a part  
 7 of the establishment of EAS at any time when you  
 8 went through the process of determining whether you  
 9 were going to provide it or was it just part of a  
 10 purchase?  
 11 THE WITNESS: I guess I was part of  
 12 it. I got into the equipment end of it, that type  
 13 of stuff. Probably not the politics of it.  
 14 But what happens in situations like that is  
 15 telephone boundaries and school district boundaries  
 16 are never the same. That's what drives EAS. And,  
 17 of course, we survey the members and say it's going  
 18 to cost you more to do this if you want to do it.  
 19 And in our case the Artesian and Fedora towns  
 20 are all under the 527 office code. They're the  
 21 only ones that can call Howard, nobody else.  
 22 Wolsey is 883. They can call Huron. They're the  
 23 only ones, nobody else. And it's basically for the  
 24 school boundary, telephone boundary situation.  
 25 VICE CHAIR HANSON: So you didn't go

1106

1 through it. Did I understand you correctly you  
 2 didn't go through a process of determining, for  
 3 instance, other exchanges, Forestburg or something  
 4 of that nature and deciding should they also have  
 5 EAS with Huron? Have you gone through that  
 6 process?  
 7 THE WITNESS: You know, that was  
 8 talked about, but that's about the time that the  
 9 Bell system hit on bad times and any negotiations  
 10 that were going on with other EAS routes they just  
 11 terminated and said we're not going to talk about  
 12 those anymore.  
 13 VICE CHAIR HANSON: Okay. Thank  
 14 you.  
 15 COMMISSIONER BURG: Can I just ask a  
 16 follow-up. Are those two-way or one-way?  
 17 THE WITNESS: They're two-way.  
 18 COMMISSIONER BURG: Wolsey and  
 19 Howard are both two-way?  
 20 THE WITNESS: Yeah.  
 21 COMMISSIONER BURG: Thank you.  
 22 That's all I have.  
 23 CHAIRMAN SAHR: Good morning, Gene.  
 24 Over the past week or so we've heard some  
 25 comparisons to broadband deployment and if you

1107

1 answered this in your prefiled testimony or if it's  
 2 been answered here today, I apologize but I'm just  
 3 trying to evaluate if there's any sort of  
 4 appropriate comparison at all in how we should  
 5 analyze that. So I'm going to ask you a few  
 6 questions about broadband deployment.  
 7 THE WITNESS: Sure.  
 8 CHAIRMAN SAHR: With the broadband  
 9 deployment, that is something that would be  
 10 available to every single -- well, within a certain  
 11 geographic bounds.  
 12 THE WITNESS: Yes.  
 13 CHAIRMAN SAHR: That is something  
 14 that's going to be available and usable by every  
 15 single customer that's within the certain proximity  
 16 to your technology; is that correct?  
 17 THE WITNESS: When we are finished  
 18 with our current construction plan every subscriber  
 19 in our 10 exchanges will have access to broadband.  
 20 CHAIRMAN SAHR: And then when we  
 21 look at -- and this is the part that I apologize if  
 22 you answered this elsewhere but when we look at the  
 23 charge that is paid by the customer, how much of  
 24 that are they paying the actual full cost of  
 25 deployment and how much of that is the cost of

1108

1 deployment I guess socialized among all the  
 2 members? Do you have any idea how that breaks  
 3 down?  
 4 I guess what I'm asking is, is your monthly  
 5 broadband charge, is that pretty much the cost to  
 6 Santel, or a little bit of a mix?  
 7 THE WITNESS: It's a little bit of a  
 8 mix. But, you know, my philosophy is you can't  
 9 make money in a cooperative off of everything you  
 10 do with your customers, you know, the members.  
 11 Very passionate about that on vertical services.  
 12 The first switch we put in cost us \$6,600 for  
 13 the software to do our first calling features, call  
 14 waiting, three-way calling, all of that kind of  
 15 stuff.  
 16 Our company couldn't see why we ought to  
 17 charge 3 and a half, 4 bucks a month for that.  
 18 After all, they own the company. Our board would  
 19 rather have 500 people using something a dollar a  
 20 month than 100 people using it at \$5 a month.  
 21 That's just their philosophy.  
 22 CHAIRMAN SAHR: In my experience  
 23 from my time spent in the area that you serve and  
 24 in the areas just maybe outside your service  
 25 territory or where you're serving more and more

1109

1 often where you're moving into on a competitive  
 2 basis is I personally get a lot of contacts from  
 3 people who are not within your incumbent area who  
 4 would like you to bring broadband services to them.  
 5 Is that something that you've experienced as  
 6 well is a high demand fairly close to your service  
 7 territories?  
 8 THE WITNESS: That's the reason for  
 9 actually activating our subsidiary company, Sancom  
 10 in Mitchell. We have had hundreds and hundreds and  
 11 hundreds of requests.  
 12 We do dial-up Internet now and wireless but  
 13 they want more. They listen to our radio ads.  
 14 We've got 30 vertical services on the switch that's  
 15 available to them, you know, and it's just an  
 16 ala carte deal. They pick what they want. They  
 17 take several, we give them a discount, you know.  
 18 CHAIRMAN SAHR: So in comparison to  
 19 LNP forecast going forward you've got hundreds  
 20 wanting broadband, you've got 12 or whatever number  
 21 we're going to peg it at going forward. It seems  
 22 like the demand for broadband is much higher.  
 23 THE WITNESS: Yes. Because they  
 24 can't get it any other place besides, you know,  
 25 wireless maybe, fixed wireless. But it's a wire

1110

1 product.  
 2 CHAIRMAN SAHR: So in comparison --  
 3 because there are limitations with wireless  
 4 broadband even at certain higher speeds; correct?  
 5 Let me ask compared to wireline based broadband.  
 6 THE WITNESS: You know, the current  
 7 fiber technology today we're talking 75 megabits to  
 8 the premise. You can do a whole lot of things on  
 9 that.  
 10 CHAIRMAN SAHR: So if we look at  
 11 potential impact to consumers as far as having an  
 12 additional charge and perhaps even a bigger picture  
 13 of public interest type of analysis, it sounds like  
 14 you would say that if there are some sort of  
 15 socialized charges involved with broadband as  
 16 opposed to portability, that there's a lot more  
 17 demand and interest and reason for your company to  
 18 incur those costs and even sometimes pass them  
 19 along to consumers on the broadband side as opposed  
 20 to the LNP side? Is that a fair statement?  
 21 THE WITNESS: That's a fair  
 22 statement.  
 23 CHAIRMAN SAHR: Do you have anything  
 24 to add to that?  
 25 THE WITNESS: Sanborn County, if you

1111

1 look in the data census bureau records, is not  
 2 exactly one of the most plush counties in the  
 3 state. To be exact, as far as people in the  
 4 poverty level we're probably about number 4.  
 5 Hanson County is 3. I have no idea who number 1  
 6 and 2 are. In the national news about six months  
 7 ago Dan Rather had a story about Hutchinson County,  
 8 South Dakota has more people per capita 85 years  
 9 and older than any other county in the state.  
 10 Guess who serves that county? Santel.  
 11 CHAIRMAN SAHR: And I assume that  
 12 based on those demographics you would say that any  
 13 additional charges are a challenge for people to  
 14 bear?  
 15 THE WITNESS: Hardship, small towns.  
 16 You know, we've got one exchange with 150 lines in  
 17 it. We've got a lot of people involved with ag.  
 18 That's their main business. Quite a few of them  
 19 are, you know, in a depressed type of economy.  
 20 Their product isn't worth anything.  
 21 CHAIRMAN SAHR: And outside of those  
 22 type of counties, though, you have had some success  
 23 entering in as a competitor in certain markets?  
 24 THE WITNESS: Yes.  
 25 CHAIRMAN SAHR: Do you know as far

1112

1 as the Commission sitting here evaluating, you  
 2 know, what's the appropriate decision for each  
 3 petition and under each individual circumstances,  
 4 how would you suggest that we balance the challenge  
 5 that you are -- have kind of a demographic that  
 6 perhaps is going to have a difficult time paying  
 7 for additional costs, at the same time you are  
 8 really bringing some state-of-the-art services and  
 9 some rather -- I don't know if I want to say  
 10 upscale but into some communities where they can  
 11 bear the costs of these type of things, not just  
 12 broadband but also LNP, do you have any suggestion  
 13 on how we kind of balance that dichotomy between  
 14 your incumbent area and the competitive areas where  
 15 perhaps you might have some people who can afford  
 16 to or be willing to bear the cost of this type of  
 17 surcharge?  
 18 THE WITNESS: As I look in the  
 19 mirror I absolutely have not one reason personally  
 20 to port my number to a wireless phone. My wireless  
 21 phone, everybody's got that number. My wife's  
 22 wireless phone, everybody's got that number. Why  
 23 would I want to change that to a number nobody  
 24 knows, you know.  
 25 Maybe if we were in an area where we had a lot

1 of young people coming in that -- you know, I can't  
 2 imagine why you'd go to a landline company to get a  
 3 number and then the next week go port it to a  
 4 wireless company. It just doesn't make sense.  
 5 Minneapolis, maybe Sioux Falls might be the  
 6 way they do it, but I still don't understand why.  
 7 If I want a wireless phone, I want to go to  
 8 Cellular One or Verizon or whoever the provider is  
 9 and I'm going to get the number from them and sign  
 10 up and I'm still going to give that to everybody.  
 11 In my home today when I'm on the road I call  
 12 forward my number to my cell phone. That way I  
 13 don't miss any calls from the office or at home.  
 14 When I call to the voice mail in my office it  
 15 jingles my cell phone. You know, it's just a great  
 16 network. Spending a lot of money to change it just  
 17 does not make sense to me.  
 18 CHAIRMAN SAHR: Do you think there's  
 19 any differences between the situation involving  
 20 Western Wireless or Cellular One and a situation  
 21 involving a Midcontinent where you have a  
 22 wireline-to-wireline competitor?  
 23 THE WITNESS: You know, I'd look at  
 24 it this way: If we're in a situation where we're  
 25 porting numbers back and forth between a wireline

1 company and a wireline company, we've got the  
 2 equipment in there to do it, why wouldn't we  
 3 include wireless companies in the same arrangement,  
 4 you know.  
 5 It would really not much make sense to me to  
 6 have Midcontinent and us porting numbers back and  
 7 forth or Qwest and us porting numbers back and  
 8 forth and when a wireless company comes along say  
 9 oh, no, we're not going to port your stuff. That's  
 10 not the way it works.  
 11 CHAIRMAN SAHR: Thank you.  
 12 MR. SMITH: Following up on that and  
 13 Mr. Gerdes' questions, is the subsidiary company  
 14 the CLEC company?  
 15 THE WITNESS: Yes.  
 16 MR. SMITH: Is that a part of this  
 17 petition or is it excluded from the petition?  
 18 THE WITNESS: No.  
 19 MR. SMITH: Okay. So the whole CLEC  
 20 operation you're not requesting suspension with  
 21 respect to your CLEC; is that correct?  
 22 THE WITNESS: Right. We're not  
 23 operating -- you know, of course one thing that  
 24 we're looking at from here is we need a Certificate  
 25 of Authority.

1 MR. SMITH: Right. We'll have to  
 2 work on that.  
 3 THE WITNESS: You guys need to work  
 4 on that really.  
 5 MR. SMITH: We've got to get out of  
 6 this room long enough.  
 7 CHAIRMAN SAHR: We've got a quorum.  
 8 MR. SMITH: Do I hear a Motion?  
 9 Thank you. Mr. Larson, redirect?  
 10 MR. LARSON: Thank you, Mr. Smith.  
 11 THE WITNESS: If you do, you're  
 12 walking home.  
 13 MR. LARSON: These are easy.  
 14 REDIRECT EXAMINATION  
 15 BY MR. LARSON:  
 16 Q Mr. Wiczorek asked you about if you had obtained any  
 17 other estimates from any other consultants on the cost  
 18 of this. Why would you do that?  
 19 A To just -- you got two choices. You know, spend your  
 20 money or take it out and give it back to customers.  
 21 You can take it out to a parking lot and set it on  
 22 fire. You know, paying for one study is one thing.  
 23 Paying for five is something else. Like I said, I'm  
 24 passionate about watching the dollars go back to our  
 25 consumers, you know.

1 Q Are you confident with Mr. DeWitte and his company's  
 2 figures?  
 3 A Yes. They do lots of stuff for us, engineering, cost  
 4 separation studies.  
 5 Q And in the situation where if you were forced to  
 6 provide this LNP, you would want to do it in a quality  
 7 fashion, would you not?  
 8 A Absolutely.  
 9 Q Gene, why should your subscribers pay for the cost to  
 10 transport this?  
 11 A That's a good point. Years ago on the Federal  
 12 Communications Commission people like Reed Hunt were in  
 13 there. After deregulation they said the cost-causer  
 14 shall be the cost-payer. Today it's stick it to the  
 15 end-user. You know, that's just exactly what's  
 16 happening. And, you know, we've got people that can't  
 17 afford that.  
 18 Q And, again, if you were to provide LNP, the system that  
 19 Vantage Point has created would work for Santel?  
 20 A Sure.  
 21 Q Do you now route traffic outside of your exchange area  
 22 as toll traffic?  
 23 A Yes.  
 24 Q And you get access charges for that?  
 25 A Yep.

- 1 Q And are those access charges incorporated as part of  
2 your revenue stream?  
3 A Yes, they are.  
4 Q And if you had to now change your whole system, how  
5 would that affect your company?  
6 A The money that goes back to the consumers is just going  
7 to be less and less.  
8 Q And to reiterate, you have had zero requests for this  
9 kind of LNP; is that correct?  
10 A Right.

11 MR. LARSON: I wanted to ask, it is  
12 my understanding that what's been labeled Venture  
13 Exhibit No. 4, which was the letter of June 18 from  
14 Commissioner Powell was introduced, that would  
15 apply to our Docket, would it not?

16 MR. SMITH: It would. Many of the  
17 exhibits that are in here are going to apply to all  
18 of the LNP Dockets and I'm not going to go through  
19 the whole list of them but that certainly was  
20 applicable to all Dockets.

21 MR. LARSON: I think that's all the  
22 questions I have.

23 MR. SMITH: Mr. Coit?  
24  
25

- 1 companies that he's testifying on behalf of in this  
2 Docket?  
3 A Actually, not.  
4 Q So you didn't know the fact that he had projected  
5 1.5 million the first year to James Valley for  
6 transport costs, but James Valley's not going to incur  
7 any of those costs to provide LNP with Western  
8 Wireless?  
9 A I'm not aware of that.  
10 Q You said everybody's got your wife's cell phone number  
11 and everybody's got your cell phone number; right?  
12 A Right.  
13 Q The number's important to you?  
14 A As I use it in the business, yes.  
15 Q Okay. So --  
16 A Personally, I could care less.  
17 Q Yeah. But if you wanted to switch cell phone  
18 providers, you'd like the ability to take that number  
19 with you, wouldn't you?  
20 A You know, switching from wireless carriers to wireless  
21 carriers is one thing. Switching from landline to  
22 wireless is another breed of cats.  
23 Q So is the answer to my question yes, that you'd like to  
24 take that number with you? I'm just asking you to  
25 answer the question.

1 CROSS-EXAMINATION

2 BY MR. COIT:

- 3 Q Hello, Gene.  
4 A Good morning.  
5 Q You talked a little bit about the differences, I guess,  
6 between providing LNP for -- there was a question  
7 regarding provisioning of LNP for wireline to wireline  
8 versus wireline to wireless.  
9 Would you agree that there are differences in  
10 transport costs associated with providing it wireline  
11 to wireline versus providing it wireline to wireless?  
12 A Absolutely.  
13 Q And that's because of differences in service areas, is  
14 it not?  
15 A The way the networks are laid out between companies,  
16 yeah.  
17 Q So there certainly are differences in cost?  
18 A Yeah.

19 MR. COIT: Yeah. Thank you. That's  
20 all I have.

21 MR. SMITH: Mr. Wieczorek?

22 RECROSS-EXAMINATION

23 BY MR. WIECZOREK:

- 24 Q Did you know that Mr. DeWitte proposed the same type of  
25 routing arrangement, transport arrangement for all the

- 1 A I'm going to give you a yes because I actually don't  
2 know.  
3 Q Well, it would be convenient for you to --  
4 A It would be convenient, yes.  
5 Q Okay.  
6 MR. WIECZOREK: That's all I have.  
7 MR. SMITH: Mr. Gerdes?  
8 MR. GERDES: No questions.  
9 MS. AILTS WIEST: No questions.  
10 MR. COIT: No questions.  
11 MR. SMITH: Do the Commissioners  
12 have any final questions?  
13 You're excused.  
14 THE WITNESS: Thank you.  
15 MR. SMITH: Did you have another  
16 question, Mr. Larson?  
17 MR. LARSON: No.  
18 MR. SMITH: Thank you, Mr. Kroell.  
19 Mr. Larson, you may call your next witness.  
20 MR. LARSON: John DeWitte.  
21 MR. SMITH: Mr. DeWitte, you're  
22 still under oath from your previous swearing in.  
23 Please proceed.  
24  
25

DIRECT EXAMINATION

BY MR. LARSON:

Q Would you please state your name and address for the record, please?

A John Michael DeWitte. My address is 1801 North Main, Mitchell, South Dakota.

Q John, could I have you look at what has been marked as Santel Exhibit 2 and Santel Exhibit 3 and tell me is that your direct prefiled testimony and rebuttal testimony?

(Witness examines documents)

A Yes. It appears to be.

Q And did you prepare those documents?

A Yes, I did.

Q And can you briefly describe your qualifications to testify?

A My qualifications are that I'm a registered professional engineer in the State of South Dakota and several other states as well. I've got a degree in computer engineering from Iowa State University and a master's in business administration from Kennesaw State College. I've also got over 20 years of industry experience with telecom equipment manufacturers and in the consulting field.

Q And do you have any corrections to those exhibits?

A The only corrections that I had were in my supplementing rebuttal where I needed to -- there was a missing period and my heading needed to go down one line --

MR. SMITH: May I step in here one minute. Because you weren't here, Jeff, that with respect to the exhibit marked Santel 3 I believe that's been admitted already. That's been admitted as --

MR. WIECZOREK: Interstate 4, I believe.

MR. SMITH: ITC 4 so that's in the record and all the foundation relative to that's been done. And I'm sorry. I believe Exhibit ITC 4B was admitted this morning too and that is already admitted with respect to all of the Dockets to which it pertains. So really in terms of offering and admitting I think we're only left with No. 2; is that true?

MR. WIECZOREK: Yeah. As I understand it, what has been marked as 3 is identical to what he filed as ITC 4 and then we received 4A and 4B today as modifications to that.

MR. SMITH: Is that correct?

THE WITNESS: That is correct.

MR. SMITH: Okay. So those exhibits are in the record.

Q Let me ask then with regard to Santel Exhibit 2, the one that has not been offered, if I were to ask you all of those questions under direct, would you answer the same today?

A Yes, I would.

Q And do you then have any additional summary comments of your testimony as it relates to this that you'd like to make now?

A To summarize, I'd like to just, you know, talk about the methods and procedures that we used to calculate all of the various costs over the past week. You know, we've talked about different methods that could be used. Obviously, you know, Western Wireless has talked about a method that could be used via Qwest. In my direct we talked about the way to use direct trunks. And, of course, there's other -- there are other options that are obviously out there. You know, one of which that hasn't been explored yet is the use of SDN communications as a possible alternative.

So I think that, you know, what we've looked at and talked about over the past few weeks is, yes, there are several different options, however, without having any firm negotiations or, you know, any other

agreements in place, you know, the one thing that still holds true is that if you look at the reciprocal compensation agreement and Interconnection Agreements that are in place today, you know, the direct connection DS-1 alternative will work and will serve the costs. And I believe that, you know, we've discussed that it, you know, certainly has, you know, a large transport component to that. However, in absence of any other firm negotiations, you know, those numbers do still stand.

MR. LARSON: At this time then I would offer Santel Exhibit 2.

MR. WIECZOREK: I have no objection.

MR. COIT: No objection.

MS. AILTS WIEST: No objection.

MR. SMITH: I'm assuming since Mr. Gerdes is not here he doesn't object. Santel 2 is admitted.

MR. LARSON: That's all the questions I have.

MR. SMITH: Thank you. Mr. Coit, do you have any questions?

MR. COIT: No. No cross.

MR. SMITH: Mr. Wieczorek?

MR. WIECZOREK: I have just a couple

1 of matters. One of the ones I'd like to clarify  
 2 and I talked to Mr. Larson about this before the  
 3 hearing began, there was an agreement any of the  
 4 questions I asked for general cross-examination  
 5 last week in the cases when Mr. DeWitte testified  
 6 last week can be applied to this Docket. And I do  
 7 know that Mr. Larson has obtained at least that  
 8 part of the transcript from last week already and  
 9 reviewed it. I just want to make sure that  
 10 appeared on the record. That's my understanding of  
 11 what the agreement was.

12 MR. LARSON: That's correct.

13 MR. WIECZOREK: So I don't want to  
 14 just replot old ground to establish a record.

15 MR. SMITH: In addition to that it's  
 16 at least my recollection that Darla Rogers was  
 17 appearing before Santel throughout that portion of  
 18 the proceeding.

19 MR. LARSON: Correct. With I  
 20 believe Mr. Williams and Mr. DeWitte she appeared  
 21 on my behalf.

22 MR. SMITH: Thank you.

23 CROSS-EXAMINATION

24 BY MR. WIECZOREK:

25 Q My questions are going to be short. We went through

1 A That is correct.

2 Q And I believe Mr. Kroell deferred somewhat to you.

3 This is the only cost analysis that you have done;  
 4 correct?

5 A That is correct.

6 Q Okay.

7 MR. WIECZOREK: That's all I have.

8 MR. SMITH: Thank you. Did

9 Mr. Gerdes --

10 COMMISSIONER BURG: He left.

11 MR. SMITH: Oh, he's gone. Okay.

12 I'm sorry. Ms. Wiest?

13 MS. AILTS WIEST: No questions.

14 MR. SMITH: Commissioners, questions  
 15 of Mr. DeWitte?

16 VICE CHAIR HANSON: No.

17 COMMISSIONER BURG: I don't.

18 MR. SMITH: I just had maybe one.

19 In terms of just the architecture of the Santel  
 20 system, is that a host remote or repeater system?

21 THE WITNESS: Yeah. Actually Santel  
 22 uses a DMS-10 Nortel Networks configuration and the  
 23 host office, the host DMS-10 is in Woonsocket. All  
 24 the other exchanges are remotes.

25 MR. SMITH: Does that architecture

1 several of the companies extensively last week, and you  
 2 have calculated the cost using the same methodology  
 3 that you did for all the other companies; correct?

4 A That is correct.

5 Q And talking about the points of interconnection, while  
 6 Sprint PCS has a license, it is not currently operating  
 7 in the Santel area; correct?

8 A That is correct.

9 Q But in your cost analysis you've included  
 10 transport-related costs for Sprint PCS even though it  
 11 does not operate in the area at this time?

12 A That is correct.

13 Q And so I understand it, for the nonrecurring transport  
 14 for Sprint PCS alone, that's \$50,000, 5,000 times 10?

15 A Let me look at the exhibit. That sounds correct. I  
 16 believe 20,000 is what we had for the nonrecurring for  
 17 that piece -- or 200,000 for the total.

18 Q Right. 200,000 is the total for Exhibit 4B for  
 19 nonrecurring. It's sitting right there in front of  
 20 you, John.

21 A Okay. Thanks. Right. So since there's four carriers,  
 22 50,000 would be correct.

23 Q And so also one-fourth of the costs for the monthly  
 24 nonrecurring would be attributable to Sprint based on  
 25 your projection; correct?

1 lend itself to what we've called the James Valley  
 2 solution?

3 THE WITNESS: Yes. Except one of  
 4 the key differences between this configuration and  
 5 the James Valley configuration is that the -- in  
 6 Santel's case they don't have any combined local  
 7 calling areas, if you will, so, you know, each  
 8 exchange, you know, is its own local calling area.

9 So that aside, you know, which is why we had,  
 10 you know, the separate DS-1s, et cetera, but in  
 11 terms of the architecture with James Valley and  
 12 James Valley being able to use one DS-1 and then  
 13 there's other agreements in place, how to get to  
 14 the other local calling areas, then, yes, it would  
 15 lend itself to that.

16 MR. SMITH: Thank you. Where are  
 17 we? I guess we're back to Mr. Larson. Do you have  
 18 any redirect?

19 MR. LARSON: I have no other  
 20 redirect.

21 MR. WIECZOREK: Done.

22 MR. SMITH: I think you're excused.

23 THE WITNESS: Mr. Chairman,  
 24 Commissioners, staff, thank you.

25 CHAIRMAN SAHR: Thank you.

1 MR. SMITH: Thanks for your  
 2 testimony. Do you want to proceed -- is your case  
 3 in chief concluded then, Mr. Larson?  
 4 MR. LARSON: It is, Mr. Smith.  
 5 MR. SMITH: Tal, do you want to  
 6 proceed immediately with Mr. Williams?  
 7 MR. WIECZOREK: I'm willing if the  
 8 Commission is.  
 9 MR. SMITH: Let's go.  
 10 (Exhibit WWC 19 is marked for identification)  
 11 MR. WIECZOREK: What I've handed out  
 12 that's been marked as Western Wireless Exhibit 19.  
 13 For the purposes of summary this is the same format  
 14 that we've done for every company.  
 15 DIRECT EXAMINATION  
 16 BY MR. WIECZOREK:  
 17 **Q** Mr. Williams, could you explain to the Commission what  
 18 Western Wireless Exhibit 19 is?  
 19 **A** Yes. This is a rendition of the different estimates  
 20 that have been made for number portability  
 21 implementation costs and it includes original  
 22 Petitioner and revised Petitioner estimates as well as  
 23 Western's original estimates and revised estimates  
 24 based upon the Petitioner's forecasted port volume and  
 25 then the far right-hand column contains Western's

1 accurate?  
 2 MR. WIECZOREK: That's correct.  
 3 CROSS-EXAMINATION  
 4 BY MR. LARSON:  
 5 **Q** Mr. Williams, with regard to this exhibit it's my  
 6 understanding what you've done is you go across this to  
 7 the final column that's Western revised estimates is  
 8 you're getting those figures by having the Qwest trunk  
 9 that's now one-way become two-way. Is that accurate?  
 10 **A** That relates to the transport costs, yes.  
 11 **Q** As it relates to the transport costs?  
 12 **A** That's correct.  
 13 **Q** Who owns that trunk?  
 14 **A** Well, I believe it was a meet point facility so both  
 15 carriers are responsible for a portion.  
 16 **Q** But Qwest owns it, do they not?  
 17 **A** Well, Qwest owns the portion to the meet point.  
 18 **Q** And it would require any carrier including Santel to  
 19 negotiate some kind of an agreement in order to change  
 20 the use of that; correct?  
 21 **A** It may or may not. The Qwest facilities are available  
 22 through tariff, and there are also many Interconnection  
 23 Agreements with Qwest in the state that are also  
 24 available for opt-in.  
 25 **Q** Santel would have to negotiate some kind of an

1 estimates based on Western's forecasted port volume.  
 2 MR. WIECZOREK: I would move for the  
 3 admission of Western Wireless 19.  
 4 MR. LARSON: I have no objection.  
 5 MR. COIT: No objection.  
 6 MS. AILTS WIEST: No objection.  
 7 MR. SMITH: Western Wireless 19 is  
 8 received.  
 9 MR. WIECZOREK: I would offer  
 10 Mr. Williams for cross-examination.  
 11 MR. COIT: Jeff, have you got any  
 12 questions?  
 13 MR. SMITH: Do you need a minute?  
 14 MR. LARSON: Yeah. I'd like a  
 15 minute to go over this with my witness.  
 16 MR. SMITH: Do you want to take a  
 17 10-minute break and let him review the document and  
 18 we'll reconvene at a quarter to 11:00?  
 19 (A short recess is taken)  
 20 MR. SMITH: We're back on the  
 21 record. The hearing is reconvened in the Santel.  
 22 Mr. Larson, please proceed with  
 23 cross-examination.  
 24 MR. LARSON: Thank you. I believe  
 25 this was Western Wireless 19, the exhibit; is that

1 agreement with them; correct?  
 2 **A** Or adopt an existing agreement or order out of the  
 3 tariff.  
 4 **Q** You looked at this. Did you consider -- I mean, SDN in  
 5 South Dakota was apparently founded for the purpose of  
 6 consolidating some of these services and creating  
 7 efficiencies and it's available to these ILECs. Did  
 8 you consider that in a solution to the LNP problem?  
 9 **A** Yes, we did. We had some discussions with SDN going  
 10 back nine months ago or so regarding their willingness  
 11 and interest in doing a transit function similar to  
 12 this. They haven't been able to formulate a price or a  
 13 proposal to us for doing that so we -- you know, we  
 14 continue to use the Qwest solution to transit local  
 15 traffic to these telephone companies and what we've  
 16 proposed here is the corollary to that for the  
 17 telephone companies to transit local traffic to us.  
 18 **Q** And if there were end-user charges based on any of  
 19 these figures that are in evidence, can they be  
 20 included in the cost study?  
 21 **A** Well, we had a discussion earlier in this proceeding  
 22 regarding whether these numbers were truly reflective  
 23 of end-user -- potential end-user surcharges that could  
 24 be recoverable through the FCC rules. And as I  
 25 understand it, the consensus was that these are not

1 reflective necessarily of the end-user surcharges.  
 2 **Q** If they're not reflective they could not be recovered  
 3 then?  
 4 **A** Well, I believe the costs here are -- the costs  
 5 represented on this sheet with the exception  
 6 potentially of the transport costs are recoverable  
 7 under the NECA methodology for filing an end-user LNP  
 8 surcharge tariff with the FCC.  
 9 MR. LARSON: That's all the  
 10 questions I have.  
 11 MR. SMITH: I can't remember if I've  
 12 asked you, Rich. Do you have any questions?  
 13 MR. COIT: I don't have any  
 14 questions.  
 15 MR. SMITH: Ms. Wiest, any  
 16 questions?  
 17 MS. AILTS WIEST: No questions.  
 18 MR. SMITH: Commissioners, any  
 19 questions for Mr. Williams?  
 20 COMMISSIONER BURG: I have none.  
 21 VICE CHAIR HANSON: No.  
 22 MR. SMITH: The one -- the only  
 23 question I have and it's not really maybe a  
 24 question but if you recall the other day at the end  
 25 of the day Commissioner Hanson asked you a question

1 participant.  
 2 **Q** I guess I have one follow-up from that. In that  
 3 scenario the transport-related costs that you have in  
 4 your last column, would they increase?  
 5 **A** Not necessarily.  
 6 **Q** They could decrease or increase?  
 7 **A** Well, they could decrease or increase. In order to  
 8 stay the same SDN would have to adopt a rate or post a  
 9 rate that was equivalent to what Qwest had in the  
 10 marketplace.  
 11 **Q** And just so it's clear, the transport-related costs  
 12 that you have in the last column are based on Qwest's  
 13 posted rates?  
 14 **A** Yes. These are the rates we pay for transiting its  
 15 traffic today.  
 16 MR. WIECZOREK: That's all.  
 17 MR. SMITH: Do you have any recross?  
 18 MR. LARSON: No.  
 19 MR. SMITH: Mr. Coit?  
 20 MR. COIT: No.  
 21 MS. AILTS WIEST: No.  
 22 MR. SMITH: Any last Commissioner  
 23 questions of Mr. Williams?  
 24 VICE CHAIR HANSON: No, thank you.  
 25 MR. SMITH: Thank you, Mr. Williams.

1 about the Qwest transport and the transport costs,  
 2 which Chairman Sahr then had the reporter read back  
 3 at the end of the day. Is that testimony  
 4 applicable to Santel?  
 5 THE WITNESS: Yeah. I mean, I would  
 6 believe it to be applicable.  
 7 MR. SMITH: Thank you.  
 8 Mr. Wieczorek?  
 9 MR. WIECZOREK: I just have one.  
 10 REDIRECT EXAMINATION  
 11 BY MR. WIECZOREK:  
 12 **Q** The existing SDN facilities could be used to route this  
 13 traffic; correct?  
 14 **A** Well, yeah. In fact, an option to be considered is  
 15 that these telcos have existing toll trunks via SDN.  
 16 And for very low volumes of traffic it might make sense  
 17 to route traffic via the existing toll trunks with just  
 18 a switch translation modification and have no -- in  
 19 essence no facilities investment and then have the  
 20 telco absorb the -- whatever SDN would charge for  
 21 processing that call.  
 22 The other option would be to establish SDN as  
 23 a transit provider for local traffic in addition to the  
 24 toll transit they currently provide. And that would be  
 25 an option. Obviously SDN would have to be a willing

1 I think you're finally done.  
 2 THE WITNESS: Thank you for the  
 3 opportunity to speak here.  
 4 MR. SMITH: You're welcome.  
 5 Mr. Wieczorek, do you have any further witnesses?  
 6 MR. WIECZOREK: I do not.  
 7 MR. SMITH: Do either of the other  
 8 counsel have any witnesses?  
 9 MR. COIT: No witnesses.  
 10 MS. AILTS WIEST: No.  
 11 MR. SMITH: Do you have any rebuttal  
 12 witnesses?  
 13 MR. LARSON: Let me talk with  
 14 Mr. DeWitte just a second. And it will be just a  
 15 second.  
 16 MR. SMITH: Okay.  
 17 (Discussion off the record)  
 18 MR. LARSON: No, we do not have any  
 19 further testimony.  
 20 MR. SMITH: Thank you. That  
 21 concludes the hearing in Docket TC 04-077, and it  
 22 also concludes the evidentiary portion of the  
 23 hearing in the LNP Dockets, suspension Dockets.  
 24 Shall we broach the subject of -- let me ask  
 25 you this: My assumption -- given the similarity of

1 this to some of the other recent cases is that  
 2 closing arguments, if any, are probably more  
 3 appropriately done at the conclusion of the  
 4 briefing portion of the proceeding? Do all counsel  
 5 concur, assuming you even want to have one that's  
 6 verbal as opposed to just the written briefs?

7 MR. WIECZOREK: Frankly, given the  
 8 fact that all counsel aren't here I wouldn't intend  
 9 on giving any closing since the other counsel  
 10 aren't here.

11 MR. SMITH: Right. Any thoughts --  
 12 a lot of the counsel aren't here. Would you prefer  
 13 in terms of setting up a briefing schedule to wait  
 14 until -- maybe do that via conference call or  
 15 something where everyone can be on the call and we  
 16 can adjust everyone's schedule?

17 MR. COIT: I think that's a good  
 18 idea. I think that the one comment that I would  
 19 have on a briefing schedule is we've got a couple  
 20 of these Dockets, Kennebec and Santel specifically,  
 21 that are under a tighter time frame in terms of  
 22 this Commission getting the decision out. And I  
 23 would prefer that when we do start talking about  
 24 briefing that we keep that in mind. But I think  
 25 working it out via teleconference is a lot better

1 brief break out specific factual issues for each  
 2 one probably in order of the Docket or  
 3 alphabetically, figure out some approach. That  
 4 probably is the easiest to follow.

5 MR. SMITH: Okay. Why don't we try  
 6 to set up a conference call maybe next week in  
 7 order to discuss or finalize the briefing schedule.

8 One last thing on the record before we go off  
 9 the record, what's your prognosis as to when the  
 10 transcript would be completed?

11 (Discussion off the record)

12 MR. SMITH: The hearing in the LNP  
 13 suspension Dockets is concluded and we're  
 14 adjourned.

15 (The proceedings are adjourned)

1 than us sitting here the next half-hour and talking  
 2 about it.

3 MR. SMITH: There's a lot of people  
 4 that aren't here. It's obviously going to have to  
 5 be a fairly compressed time frame at least with  
 6 respect to those two companies. But I would  
 7 presume that most of the issues that the parties  
 8 will want to discuss in their briefs are going to  
 9 apply just as much to Kennebec as they are to all  
 10 the other companies.

11 MR. COIT: That is true, but --  
 12 yeah. I mean, those first briefs are going to be  
 13 important briefs.

14 MR. SMITH: I guess we're going to  
 15 have to do this with all counsel present, but I  
 16 guess my assumption is -- I mean, we're not  
 17 planning on submitting each -- each party  
 18 submitting 22 briefs, are we?

19 MR. COIT: That wasn't my plan.

20 MR. SMITH: Okay. My assumption was  
 21 we would have one brief from each party -- I mean,  
 22 one brief with respect to at each stage of the  
 23 briefing handling all the cases.

24 MR. WIECZOREK: It had been my  
 25 assumption what I'd do is brief it and within one

TESTIMONY

OF

RON WILLIAMS

ON BEHALF OF WWC LICENSE L.L.C.  
(WESTERN WIRELESS)

May 28, 2004

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1           **I.       QUALIFICATIONS AND PURPOSE OF TESTIMONY**

2   **Q.       PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3   A.       My name is Ron Williams. My business address is 3650 131st Avenue South East,  
4           Bellevue, Washington 98006.

5   **Q.       BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

6   A.       I am employed as Director – InterCarrier Relations by Western Wireless Corporation.  
7           My duties and responsibilities include developing effective and economic  
8           interconnection and operational relationships with other telecommunications carriers,  
9           including the establishment of local number portability (“LNP”) arrangements and  
10          interconnection agreements. I work with other departments within Western Wireless  
11          to assess company interconnection and LNP needs and interface with carriers to  
12          ensure arrangements are in place to meet the operational objectives of the company.

13 **Q.       PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND.**

14 A.       I have a BA in Accounting and a BA in Economics from University of Washington. I  
15          also have a MBA from Seattle University.

16 **Q.       FOR WHOM ARE YOU TESTIFYING IN THIS PROCEEDING?**

17 A.       I am testifying on behalf of WWC License L.L.C. (“Western Wireless”), which  
18          provides commercial mobile radio services (“CMRS”) in the state of South Dakota.

19 **Q.       WHAT IS YOUR PROFESSIONAL EXPERIENCE IN THE FIELD OF**  
20 **TELECOMMUNICATIONS?**

21 A.       I have ten years experience working for GTE (now Verizon), including six years in  
22          telephone operations and business development, and four years in cellular operations.  
23          I also have two years experience in start-up CLEC operations with FairPoint  
24          Communications. Since August 1999, I have worked for Western Wireless, first as

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 the Director of CLEC operations and, more recently, in my current position in  
2 Industry Relations and as a project lead for implementation of LNP and  
3 interconnection with other carriers.

4 **Q. HAVE YOU TESTIFIED BEFORE ON BEHALF OF WESTERN WIRELESS?**

5 A. Yes, I have testified as the Company's witness in interconnection arbitration  
6 proceedings in Oklahoma and Utah. I have prefiled testimony in a South Dakota  
7 arbitration that was settled prior to hearings. And, recently, I have testified in LNP  
8 suspension matters in New Mexico and Missouri.

9 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

10 A. The purpose of my testimony is to challenge the Petitioners' request for suspension or  
11 modification of federally mandated number portability obligations. My testimony  
12 will address the following issues:

- 13       ▪ **What are the obligations of Petitioners' to implement LNP and what are**  
14       **the standards for granting relief?**
- 15       ▪ **Are there any real operational or technical roadblocks to Petitioners'**  
16       **implementation of number portability as required by FCC rules?**
- 17       ▪ **Is there any evidence of undue economic burden associated with**  
18       **Petitioners' implementation of local number portability?**
- 19       ▪ **What is the economic impact of delaying Petitioners' implementation of**  
20       **number portability?**
- 21       ▪ **Do Petitioners' make a valid claim that LNP in their service area is not in**  
22       **the public interest?**

23 My testimony addresses the standards that should apply in resolving these Petitions  
24 and presents the positions of Western Wireless on the issues identified above. For  
25 each of the issues, I will identify the applicable standard, establish the facts relevant

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 to a determination, and recommend to the South Dakota Public Utilities Commission  
2 ("Commission") an appropriate resolution.

3 **Q. DO YOU HAVE ANY BACKGROUND OR FAMILIARITY WITH WESTERN WIRELESS'**  
4 **SYSTEM IN SOUTH DAKOTA AND ANY FAMILIARITY WITH THE PETITIONERS'**  
5 **SYSTEMS IN THE STATE?**

6 A. Yes. I have been actively involved in negotiation of interconnection agreements with  
7 most, if not all, of the Petitioners in this case on behalf of Western Wireless.

8 **Q. IS THERE A JURISDICTION ISSUE REGARDING WAIVERS TO LNP**  
9 **IMPLEMENTATION?**

10 A. I cannot give a legal opinion, but I do believe there is an issue as to whether  
11 jurisdiction for LNP implementation waivers is in the FCC or state commissions. It is  
12 my understanding that the FCC's intermodal porting order requires rural ILECs to file  
13 any requests for waiver or extension with the FCC, not individual state commissions.  
14 The FCC asserted jurisdiction over all issues related to CMRS number portability by  
15 citing its authority under Sections 1, 2, 4(i) and 332 of the Communications Act.<sup>1</sup> I  
16 know that many rural ILECs applied to the FCC for a waiver, and the waiver was  
17 granted in January this year. I am attaching the FCC order on rural intermodal LNP  
18 implementation as Exhibit Williams' Direct -1. The instant case before the South  
19 Dakota Commission raises the same issues that have been addressed by the FCC  
20 under its jurisdiction.

21 **Q. HAS THE FCC RECENTLY DECIDED ANY OTHER RURAL LNP IMPLEMENTATION**  
22 **WAIVER OR SUSPENSION REQUESTS?**

---

<sup>1</sup> *First Report and Order and Further Notice of Proposed Rulemaking*, 11 FCC Rcd 8352, ¶ 155 (1996); *see also* Mem. Op. and Order and Further Notice of Proposed Rulemaking, ¶ 8, CC Docket No. 95-116, FCC 03-284 (rel. Nov. 10, 2003) ("*Intermodal Porting Order*")

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. Yes. Within the last couple of weeks the FCC issued two orders denying LNP  
2 implementation suspensions for rural wireless and rural wireline carriers. In an order  
3 released May 10, 2004 the FCC denied waiver and extension requests for three rural  
4 wireless carriers who had claimed they did not receive sufficient notice to implement  
5 and their rural status constituted special circumstances.<sup>2</sup> Similarly, on May 13, 2004  
6 the FCC denied a waiver petition for temporary suspension made by North-Eastern  
7 Pennsylvania Telephone Company (NEP); a rural LEC with eight exchanges.<sup>3</sup> NEP  
8 is planning to implement LNP in conjunction with a switch replacement and argued  
9 that “it did not anticipate that intermodal porting would be an “imminent”  
10 requirement until the Commission’s Intermodal LNP Order released in November  
11 2003.” NEP also stated that service feature issues arose during implementation  
12 planning that would mean that NEP would not meet the May 24, 2004 deadline for  
13 LNP implementation. In denying NEP request, the FCC responded:

14 “We are not persuaded by NEP’s claims that special circumstances exist  
15 warranting a waiver of the May 24, 2004 porting deadline in order to  
16 accommodate NEP’s switch delivery and deployment schedule, and  
17 provide additional time to resolve any service feature issues. We find  
18 that NEP has not presented “extraordinary circumstances beyond its  
19 control in order to obtain an extension of time.” NEP has not shown that

---

<sup>2</sup> In the Matter of Numbering Resource Optimization and Telephone Number Portability, Petitions of Advantage Cellular Systems, Inc., Corr Wireless Communications, LLC, and Plateau Telecommunications, Inc. for Limited Waiver and Extension of Porting and Pooling Obligations, CC Docket No. 99-200, 95-116, FCC 04-1291 (released May 10, 2004).

<sup>3</sup> Exhibit Williams’ Direct -2: In the Matter of Telephone Number Portability, Petitions of The North-Eastern Pennsylvania Telephone Company for Temporary Waiver of its Porting Obligations, CC Docket No. 95-116, FCC 04-1312 (released May 13, 2004).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 challenges it may face are different from those faced by similarly  
2 situated carriers who are able to comply. Generalized references to  
3 limited resources and implementation problems do not constitute  
4 substantial, credible evidence justifying an exemption from the porting  
5 requirements. NEP has known since 1996 that it would need to support  
6 LNP within six months of a request from a competing carrier. Although  
7 wireless LNP was delayed, all carriers have been on notice since July  
8 2002 that wireless and intermodal LNP would become available  
9 beginning in November 2003. Thus, NEP has had sufficient time to  
10 follow through with these mandates and prepare for LNP.”<sup>4</sup>

11 In this situation, which is very similar to the instant petitions, the FCC decision  
12 delivered a clear and consistent message: The standards are very high for obtaining a  
13 waiver of LNP obligations, the onus is on individual carriers to do all in their power  
14 to meet the obligations, and difficulties which are similar to those faced by other  
15 carriers do not constitute special circumstances worthy of any suspension. LNP is an  
16 FCC mandate and it is clear the FCC expects enforcement of its implementation.

17 **II. WHAT IS THE OBLIGATION OF PETITIONERS TO IMPLEMENT LNP**  
18 **AND WHAT ARE THE STANDARDS FOR GRANTING RELIEF?**

19 **Q. ARE PETITIONERS UNDER AN AFFIRMATIVE OBLIGATION TO**  
20 **IMPLEMENT LNP?**

21 **A.** Yes. All LECs have known since 1996 that they would be required to provide LNP.  
22 Section 251(b)(3) of the Communications Act of 1934, as amended (“Act”), requires  
23 all LECs to provide LNP.<sup>5</sup> In its rules implementing the LNP requirements of the  
24 Act, the FCC recognized that the public interest would be served by requiring carriers

---

<sup>4</sup> See supra ¶10

<sup>5</sup> 47 U.S.C. § 251(b)(3).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 to implement LNP in all areas, but conditioned the requirement to implement LNP in  
2 rural areas on a carrier receiving a bona fide request (“BFR”) from another carrier.<sup>6</sup>

3 **Q. DID WESTERN WIRELESS SEND A BFR TO ANY OF THE PETITIONERS REQUESTING**  
4 **THE IMPLEMENTATION OF LNP?**

5 A. Yes. In November 2003 Western Wireless sent all but three of the Petitioners,  
6 Western, Splitrock Properties and Tri-County, a BFR to implement LNP.<sup>7</sup> Western  
7 Wireless’ lawful request to implement LNP provided these carriers with more than 6  
8 months notice to deploy Local Number Portability. These telcos waited 4 months to  
9 seek a suspension of their LNP obligations, hopeful that this tactic would result in  
10 delay of their legal obligations.

11 **Q. WHAT IS THE STANDARD FOR GRANTING THE PETITIONERS’ REQUEST FOR A**  
12 **SUSPENSION OF THEIR LNP OBLIGATIONS?**

13 A. Congress established a very high standard to be met for a LEC to obtain a suspension  
14 of its LNP obligations. Section 251(f)(2) of the Act permits state commissions to  
15 suspend a carrier’s LNP obligations only:

16 to the extent that, and for such duration as, the State commission  
17 determines that such suspension or modification —  
18 (A) is necessary: (i) to avoid significant adverse impact on users of  
19 telecommunications services generally; (ii) to avoid imposing a  
20 requirement that is unduly economically burdensome; or (iii) to  
21 avoid imposing a requirement that is technically infeasible; and  
22 (B) is consistent with the public interest, convenience, and  
23 necessity.<sup>8</sup>  
24

---

<sup>6</sup> 47 C.F.R. § 52.26.

<sup>7</sup> Exhibit Williams’ Direct -3

<sup>8</sup> 47 U.S.C. § 251(f)(2).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 “Congress intended exemption, suspension, or modification of the section 251  
2 requirements to be the exception rather than the rule.... We believe that Congress did  
3 not intend to insulate smaller or rural LECs from competition.”<sup>9</sup>

4 **Q. IF CONGRESS DID NOT INTEND TO INSULATE RURAL TELEPHONE COMPANIES**  
5 **FROM COMPETITION, THEN HOW SHOULD THIS COMMISSION DETERMINE**  
6 **WHETHER OR NOT TO SUSPEND THE PETITIONERS’ LNP OBLIGATIONS?**

7 A. Each Petitioner bears the burden of demonstrating that it meets the statutory standard  
8 for a suspension of its LNP obligations. Although Section 251(f) of the Act provides  
9 that rural carriers may obtain a suspension of their LNP obligations, the FCC has  
10 concluded that a suspension is only appropriate under unique and compelling  
11 circumstances:

12 Thus, we believe that, in order to justify continued exemption once a  
13 bona fide request has been made, or to justify suspension or  
14 modification of the Commission’s section 251 requirements, a LEC  
15 must offer evidence that application of those requirements would be  
16 likely to cause undue economic burdens beyond the economic burdens  
17 typically associated with efficient competitive entry. State  
18 commissions will need to decide on a case-by-case basis whether such  
19 a showing has been made.<sup>10</sup>

20 **Q. IN THE ABSENCE OF THE IMPLEMENTATION DELAY ALREADY GRANTED TO**  
21 **RURAL LECs BY THE FCC, WHAT ARE THE PREVAILING GUIDELINES FOR**  
22 **IMPLEMENTATION OF LNP AND HOW DO THEY RELATE TO THE PETITIONERS’**  
23 **SITUATION?**

24 From the exhibits provided with the Petitions, it is apparent that most ILEC networks  
25 require only switch software upgrades and table translations to make them LNP  
26 capable. The FCC produced guidelines that suggest this type of upgrade can be

---

<sup>9</sup> *Implementation of the Local Competition Provisions in the Telecommunications Act of 1996*, First Report & Order, 11 F.C.C.R. 15499, 16118 (1996) (“*LNP First Report and Order*”).

<sup>10</sup> *LNP First Report and Order* at 16118.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 completed within 60 days. Local Number Portability requirements were established  
2 for all LECs in Section 251(b)(3) of the Telecom Act in 1996<sup>11</sup>. Specific to the  
3 Petitioners in this case, the FCC conditioned the requirement to implement LNP in  
4 rural areas on a carrier receiving a BFR from another carrier.<sup>12</sup> While a rural carrier  
5 has six months from receipt of a BFR to implement LNP, the FCC guidelines for  
6 switch preparation indicate a much shorter time may be necessary:<sup>13</sup>

7 After the deadline for deployment of number portability in an MSA in  
8 the 100 largest MSAs, according to the deployment schedule set forth  
9 in the appendix to this part, a LEC must deploy number portability in  
10 that MSA in additional switches upon request within the following  
11 time frames:

- 12 (A) For remote switches supported by a host switch equipped for  
13 portability (“Equipped Remote Switches”), within 30 days;  
14 (B) For switches that require software but not hardware changes to  
15 provide portability (“Hardware Capable Switches”), within 60  
16 days;  
17 (C) For switches that require hardware changes to provide  
18 portability (“Capable Switches Requiring Hardware”), within  
19 180 days;  
20 (D) For switches not capable of portability that must be replaced  
21 (“Non Capable Switches), within 180 days.

22 The language in the Act is clear: While LNP proceeded by decree for the majority of  
23 telephone subscribers, number portability would be triggered by a Bona Fide Request  
24 process in the rest of the country. Further, the BFR process established an  
25 implementation interval (maximum) of 180 days.

---

<sup>11</sup> 47 U.S.C. § 251(b)(3).

<sup>12</sup> 47 C.F.R. § 52.23(c).

<sup>13</sup> 47 C.F.R. § 52.23(b)(2)(iv).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 The FCC reiterated this rule with respect to intermodal LNP on November 10, 2003

2 (Attached as Exhibit Williams' Direct -4):

3 "Therefore for wireline carriers operating in areas outside of the 100  
4 largest MSAs, we hereby waive, until May 24, 2004, the requirement  
5 that these carriers port numbers to wireless carriers that do not have a  
6 point of interconnection or numbering resources in the rate center  
7 where the customer's wireline number is provisioned."<sup>14</sup>

8 Then, again, on January 16, 2004 the FCC spelled out the date that the  
9 implementation of LNP should occur for the Petitioner in this docket:

10 "Accordingly, IT IS ORDERED that, pursuant to authority contained  
11 in sections 1, 4(i), 251, and 332 of the Communications Act of 1934,  
12 as amended, 47 U.S.C. §§ 151, 154(i), 251, 332, we GRANT a limited  
13 waiver of the wireline-to-wireless porting requirement, until May 24,  
14 2004, for local exchange carriers with fewer than two percent of the  
15 nation's subscriber lines in the aggregate nationwide that operate in the  
16 top 100 Metropolitan Statistical Areas and have not received a request  
17 for local number porting from either a wireline carrier prior to May 24,  
18 2003 or a wireless carrier that has a point of interconnection or  
19 numbering resources in the rate center where the customer's wireline  
20 number is provisioned."<sup>15</sup>

21 There is nothing vague or indefinite about the LNP obligations imposed on the  
22 Petitioners. This eventuality has been foreseeable for the eight years since the  
23 Telecom Act was passed in February 1996. The specific expectations of Western  
24 Wireless' porting interest have been known for more than 6 months since eighteen of

<sup>14</sup> In the Matter of Telephone Number Portability, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, CC Docket No. 95-116, FCC 03-284 at 29 (rel. November 10, 2003). (*Intermodal Porting Order*)

<sup>15</sup> In the Matter of Telephone Number Portability, Small LEC Petitions for relief of the intermodal porting deadline of November 24, 2004, CC Docket No. 95-116,, FCC 04-12 at 12 (rel. January 16, 2004) (See Exhibit Williams' Direct -1)

DOCKET TC04-025 et al

TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS

1 them received BFRs from Western Wireless. The FCC released its *Intermodal*  
2 *Porting Order* more than 6 months ago. With all this advance public notice it is  
3 inconceivable that the Petitioners would not be prepared to implement LNP. Clearly,  
4 the time that has already been provided to these Petitioners should have been  
5 sufficient time to meet their obligations.

6 **Q. SHOULD THE FACT THAT MANY SIMILARLY SITUATED LECS ARE NOT SEEKING A**  
7 **DELAY OR SUSPENSION OF LNP IMPLEMENTATION MERIT CONSIDERATION IN**  
8 **THIS PROCEEDING?**

9 A. Yes. The decision by many other independent telcos to prepare for implementation  
10 rather than seek a delay or suspension is clear evidence that the implementation of  
11 number portability by the May 24, 2004 deadline was achievable. Similarly situated  
12 rural LECs with similar switch equipment are implementing LNP. My staff and I  
13 have been in contact with many LECs in our serving area to work through questions  
14 or concerns in support of their specific implementation efforts.

15 **Q. HAVE OTHER STATE COMMISSIONS RULED ON LEC LNP SUSPENSION REQUESTS?**

16 A. Yes. I am not familiar with all state commissions, but I do understand that the  
17 Pennsylvania Commission concluded that “rural residents have as much right to  
18 competitive choices as their more numerous urban counterparts” and that as a result,  
19 rural LEC suspension Petitioners “must present competent evidence that such relief is  
20 necessary under Section 251(f)(2).”<sup>16</sup> In response to requests for suspension of LNP

---

<sup>16</sup> *Petition of Rural and Small Incumbent Local Exchange Carriers for Commission Action Pursuant to Section 251(f)(2) and 253(b) of the Telecommunications Act of 1996*, Docket Nos. P-00971177 and P-00971188, 1997 Pa. PUC LEXIS 146 at ¶44 (Pennsylvania Public Utility Commission, July 10, 1997).

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 obligations, several state commissions have rejected rural LEC technical and/or  
2 financial arguments in support of their LNP suspension requests.<sup>17</sup> Notably, the  
3 Michigan Public Service Commission denied LNP suspension to two small rural  
4 LECs stating:

5 “The Commission is unconvinced that the burdens will  
6 disproportionately affect the Petitioners as compared with other  
7 carriers. Indeed, the Petitioners have been on notice since 1996 to  
8 prepare for implementation of LNP and replacement of new switches  
9 should have been completed prior to the implementation date .... Any  
10 deferment of the FCC’s number portability requirements beyond that  
11 time [May 24, 2004] would be anti-competitive and anti-consumer.”<sup>18</sup>

12 Although the Petitioners have sought relief from number portability requirements  
13 through this proceeding, there is no reason why the competitive choice, enabled by  
14 number portability, and already available to most people in South Dakota, should be  
15 delayed for the Petitioners’ customers.

16 **Q. HAVE OTHER STATES DEALT WITH LNP SUSPENSION PETITIONS IN A DIFFERENT**  
17 **MANNER?**

---

<sup>17</sup> See, e.g., *Petition by the Alliance of North Carolina Independent Telephone Companies for Limited Modification of the Requirement to Provide Number Portability, Order Dismissing Petition Without Prejudice*, Docket No. P-100, Sub 133r (North Carolina Utilities Comm’n, Oct. 7, 2003)(LNP suspension petition dismissed for failure to meet burden of proof); *Iowa Telecommunications Services*, Docket No. SPU-02-18 (SPU-02-19), 2003 Iowa PUC LEXIS 141 (Iowa Utilities Board, April 15, 2003)(LNP suspension petition denied for failure to meet burden of proof); *In the matter of the application of Waldron Telephone Company and Ogden Telephone Company for temporary suspension of wireline to wireless number portability obligations pursuant to §251(f)(2) of the federal Telecommunications Act of 1996, as amended*. Opinion and Order in Case Nos. U-13956 and U-13958). (Michigan Public Service Commission, February 12, 2004.

<sup>18</sup> In the matter of the application of Waldron Telephone Company and Ogden Telephone Company for temporary suspension of wireline to wireless number portability obligations pursuant to 251(j)(2) of the Federal Telecommunications Act of 1996 as amended. (Opinion and Order in Case Nos. U-13956 and U-13958.) (Michigan Public Service Commission, February 12, 2004.)

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. Yes. Texas is a good example. The Texas Commission Staff was actively involved  
2 in negotiating with rural telephone companies to shorten or withdraw their suspension  
3 requests. The Staff was successful in resolving all ten original petitions<sup>19</sup> but not  
4 before they submitted the following testimony in the docket:

5 "I recommend the denial of the petitions of Valor and KTC to suspend  
6 implementation until March 15, 2005 of the FCC's Intermodal Order ...  
7 I have determined that the Companies have failed to provide sufficient  
8 information and demonstrate the stated factors pursuant to FTA  
9 §251(f)(2) to justify an extension ... The Companies further failed to  
10 demonstrate that implementation of intermodal LNP prior to March 15,  
11 2005 would be inconsistent with the public interest, convenience and  
12 necessity of Texas customers. I further conclude that the Companies  
13 have failed to take steps to comply with the Intermodal Order in a timely  
14 manner after receiving bona fide requests (BFR) for intermodal porting.  
15 As a consequence I recommend that the Companies be held accountable  
16 for non-compliance with FTA § 251(f)(2), if they are not LNP capable  
17 by May 24, 2004. Thus, the Companies would be subject to applicable  
18 FCC enforcement proceedings and/or state commission enforcement  
19 action, if applicable.<sup>20</sup>

20 **III. ARE THERE ANY REAL OPERATIONAL OR TECHNICAL ROADBLOCKS**  
21 **TO THE PETITIONERS' IMPLEMENTATION OF NUMBER**  
22 **PORTABILITY AS REQUIRED BY FCC RULES?**

23 **Q. WHAT HAVE THE PETITIONERS' IDENTIFIED AS ROADBLOCKS TO THE IMPLEMENTATION OF**  
24 **NUMBER PORTABILITY?**

25 A. In their Petitions and through discovery responses, the Petitioners have identified only  
26 a few technical or feasibility issue in the implementation of local number portability:

---

<sup>19</sup> See Texas SOAH Docket No 473-04-3034 PUC Docket 29278 "Petition of Wes-Tex Telephone Cooperative, Inc. et al, for Suspension of Wireless Number Portability Implementation"

<sup>20</sup> Prefiled Direct Testimony of Stephen Mendoza, Telecommunications Division, Public Utility Commission of Texas in the matter of *Petition of Wes-Tex Telephone Cooperative, Inc. et al, for Suspension of Wireless Number Portability Implementation* SOAH Docket No. 473-04-3034, PUC Docket No. 29278, April 30, 2004. p 4 lines 5-21 and P 5 lines 1-8.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

- 1                   ▪ The deadlines imposed for LNP implementation do not provide enough  
2                   time to implement number portability under the FCC rules.
- 3                   ▪ Routing local traffic to numbers that have been ported to wireless carriers  
4                   (which has been mischaracterized as ‘location portability’) when there is  
5                   no direct connection between the Petitioner network and the wireless  
6                   carrier.
- 7                   ▪ Uncertainty associated with obligations of intermodal LNP

8   **Q. DO THESE REPRESENT REAL BARRIERS TO COMPLETING IMPLEMENTATION OF**  
9   **NUMBER PORTABILITY OBLIGATIONS BY MAY 24, 2004?**

10   A. No. The Petitioners have introduced these challenges, which are faced by all carriers  
11   (wireline and wireless, urban and rural) implementing number portability, and have  
12   characterized them as impossible to overcome, “technically infeasible”, and/or  
13   representing “a potential waste of resources ...”. This is simply not the case.

14   **Q. WHAT ABOUT THE TECHNICALLY INFEASIBLE CLAIM?**

15   A. Other rural telephone companies do not concur in this: In recent testimony  
16   concerning an LNP suspension petition in New Mexico, Steven D. Metts, a witness  
17   co-sponsored by the New Mexico Exchange Carriers Group made the following  
18   responsive statement<sup>21</sup>:

19           Q. “Is it your contention that suspension of the FCC requirements is based  
20           upon technological incapability for any of your companies?”

21           A. “No.”

22           Some of the Petitioner’s also concur that the implementation of LNP is not infeasible.  
23           Beresford Telephone, in response to Western’s Discovery Request 9 made this  
24           statement when asked about the feasibility of routing calls to ported numbers when

---

<sup>21</sup> New Mexico Case No. 04-00017-UT, Hearing Transcript Day 1, p 51 lines 10-13, April 6, 2004

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 there is no direct connection between carriers: "...it is not "technically infeasible" to  
2 route such a call".

3 **Q. DOES THE INTERMODAL PORTING OF NUMBERS ORDERED BY THE FCC CONSTITUTE LOCATION**  
4 **PORTABILITY?**

5 A. No, it is not location portability. The intermodal number portability ordered by the  
6 FCC enables, for example, a residential LEC customer to substitute wireless service  
7 for LEC service at the same location where that customer receives landline service.  
8 This constitutes number portability, not location portability. Mr. Watkins' testimony  
9 exaggerates the circumstances but, in the end, concedes the FCC has already  
10 addressed this in the Intermodal Porting Order.<sup>22</sup>

11 **Q. WHAT ABOUT PETITIONERS' CONCERN REGARDING THE ROUTING OF TRAFFIC TO TELEPHONE**  
12 **NUMBERS THAT HAVE BEEN PORTED TO WIRELESS CARRIERS?**

13 A. The Petitioners imply that routing local traffic originating on their networks and  
14 destined for a number ported to a wireless carrier is a difficult and unprecedented  
15 requirement. This is not the case. There are economical ways to accomplish this at a  
16 small fraction of what the Petitioners claim for "transport" costs.

17 **Q. WHY ARE THE PETITIONERS RAISING A CONCERN REGARDING INTERMODAL PORTING AND THEIR**  
18 **LOCAL ROUTING OBLIGATIONS?**

19 A. Under some circumstances, when there is no physical interconnection between a LEC  
20 and a wireless carrier, the LEC will need to route a call to a ported number to the  
21 serving tandem. This is no different than the manner in which wireless carriers  
22 terminate calls to many LEC exchanges in South Dakota today.

23 **Q. WHAT WOULD HAPPEN IF THIS TYPE OF ROUTING OF LOCAL CALLS DID NOT OCCUR?**

---

<sup>22</sup> Watkins' Direct p24 lines 5-7.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. A call that was local before a number ported would either not be completed or would  
2 be required to be dialed as a toll call after the number was ported. Imagine a scenario  
3 where your neighbor had to dial toll to reach your telephone number just because you  
4 changed your service provider. It would make no sense.

5 **Q. IS THIS TYPE OF SEPARATE RATING AND ROUTING OF TRAFFIC A NEW PRACTICE?**

6 A. No. This practice is permitted under industry guidelines associated with the  
7 assignment of telephone numbers by the North American Numbering Plan  
8 Administrator (NANPA)<sup>23</sup>. In fact, Western Wireless has several implementations of  
9 this throughout its service area.

10 **Q. ARE THE PETITIONERS CONCERNS ABOUT THE UNCERTAINTY OF FUTURE FCC RULES ON LNP ANY**  
11 **DIFFERENT THAN THOSE FACED BY OTHER CARRIERS THAT ARE ALREADY IMPLEMENTING LNP?**

12 A. No. While there is some uncertainty in what the FCC will do in the future regarding  
13 compensation matters, there is no uncertainty about the rating and routing obligations  
14 relative to LNP. All carriers face these same hurdles: The rating of calls to a ported  
15 number must remain as they were prior to the number being ported. And, it is the  
16 originating carrier's responsibility to properly route traffic to a ported number. The  
17 FCC didn't mandate a method to accomplish these obligations because there is not  
18 just one way to overcome these hurdles.

---

<sup>23</sup> The Central Office Code (NXX) Administration Guidelines (COCAG), published by the Alliance for Telecommunications Industry Solutions on behalf of the Industry Number Committee, permit a carrier to receive a rate center number assignment and designate a routing point for calls to those numbers that is outside the rate center to which they are assigned.

TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS

1           **IV. IS THERE ANY EVIDENCE OF UNDUE ECONOMIC BURDEN**  
2           **ASSOCIATED WITH PETITIONERS IMPLEMENTATION OF LOCAL NUMBER**  
3           **PORTABILITY?**

4           **Q.       WHAT IS THE STANDARD FOR ESTABLISHING AN “UNDUE ECONOMIC BURDEN”?**

5           A.       Section 251(f)(2) permits the Commission to suspend a LEC’s LNP obligation if such  
6           action is “necessary to avoid imposing a requirement that is unduly economically  
7           burdensome.”<sup>24</sup> The Ohio Commission has held that the statutory phrase, “unduly  
8           economically burdensome,” means economic burdens “beyond the economic burdens  
9           typically associated with efficient competitive entry.”<sup>25</sup> The facts contained in the  
10          Petitions do not meet the standard that would lead one to conclude the economic  
11          burden exceeds that ‘typically associated with efficient competitive entry.’

12          **Q.       HAVE YOU HAD ANY EXPERIENCE IN DEALING WITH THE REAL LIFE COSTS OF**  
13          **LNP IMPLEMENTATION?**

14          A.       Yes I have had experience implementing LNP on Western Wireless’ own network.  
15          This entailed the upgrading of switches, intergrating systems, implementing the LNP  
16          with a CLEC and providing for SOA and LNP queries. I worked on these issues from  
17          an operational, technical, and cost aspect.

18          **Q.       ARE THE LNP COST PROJECTIONS IN THE PETITIONS A REASONABLE APPROXIMATION OF THE**  
19          **COSTS OF IMPLEMENTING LNP FOR THE PETITIONERS?**

20          A.       The cost projections provided by the Petitioners grossly overstate the implementation  
21          and operational costs of LNP. Both non-recurring ‘start-up’ and monthly recurring

---

<sup>24</sup> 47 U.S.C. § 251(f)(2)(A)(ii).

<sup>25</sup> *Western Reserve Petition* at 13.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 costs have been over estimated by the Petitioners; in some cases producing costs  
2 many times a realistic projection.

3 **Q. PLEASE PROVIDE EXAMPLES OF THE OVERSTATEMENT OF CLAIMED LNP IMPLEMENTATION COSTS.**

4 A. Although cost over-statements occur with most Petitioners in many cost categories,  
5 based on evidence provided to date, overstatements of non-recurring LNP  
6 implementation costs occur in the category “Other Internal Costs”. In this category,  
7 the Petitioners have included costs to deal with “porting contracts” and costs related  
8 to the development of “Intercarrier Porting Forms”. These costs are grossly  
9 overstated and, perhaps, should not be included at all: Contracts are not required for  
10 porting between carriers and there are standard industry ‘porting’ forms available to  
11 any carrier for a nominal fee. Some Petitioners have included fees for “SOA Non-  
12 recurring set up charge” or non-recurring “Service Order Administration” when  
13 estimated port volumes provide no justification for an automated SOA interface.  
14 Unfortunately, many of the Petitioners have not provided sufficient information in  
15 response to interrogatories to address the validity of switch upgrade cost claims at this  
16 time. They have instead claimed the cost information is confidential and have refused  
17 to provide it even though Western Wireless has executed a “confidentiality  
18 agreement.”

19 **Q. PLEASE PROVIDE AN EXAMPLE OF THE OVERSTATEMENT OF CLAIMED LNP RECURRING COSTS.**

20 A. Many categories of recurring costs are overstated. These include: “SOA Monthly  
21 Charge” estimates that are based on a vendor quote for an automated interface with a  
22 high minimum monthly charge, “Other Recurring Costs” that are overstated based on  
23 Petitioner’s own estimate of port volume, “Switch Maintenance Costs” which are not

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 justified in relation to LNP, "Business Procedure" and porting process costs for  
2 testing, verification, translations, and administrative which appear to be overstated  
3 and redundant, and Marketing/Informational Flyer costs which are not justified on a  
4 recurring basis.

5 **Q. CAN YOU PROVIDE A SPECIFIC EXAMPLE OF OVERSTATED SOA COSTS?**

6 A. Yes. For example, Beresford Telephone has claimed a non-recurring charge of  
7 \$1,800 and a monthly recurring charge of \$1,200 for Service Order Administration  
8 (SOA) functionality. Beresford is claiming a total first year cost of \$30,600 for SOA.  
9 In response to discovery, Beresford estimated 24 ports per year. Beresford can utilize  
10 the Number Portability Administration Center (NPAC) Help Desk to perform the  
11 SOA function for these 24 ports for a total of \$360. Beresford has overstated first  
12 year SOA costs by more than 80 fold. This single cost overstatement results in an  
13 almost a dollar (\$.85) of claimed LNP cost per line per month. Most of the other  
14 Petitioners have similarly forecasted low porting volumes that do not justify an  
15 automated SOA interface and high minimum monthly recurring charges.

16 **Q. WHAT ABOUT PETITIONER CLAIMS FOR 'TRANSPORT' COSTS?**

17 A. In every instance that I have reviewed, the Petitioner has identified the most  
18 inefficient means of routing traffic to ported numbers as the basis for formulating  
19 start-up and recurring costs. The approach taken by the Petitioners produces costs  
20 that may be as high as 400 times the cost that an efficient operator would incur to  
21 accomplish their routing obligations for similar traffic. For example, West River  
22 Cooperative Telephone assumes the installation of more than 30 T1 circuits to route  
23 traffic in the first year of LNP implementation. West River also estimated 12

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 customers will port each year. Assuming these porting customers to have average  
2 incoming call characteristics, Western Wireless estimates the cost of routing traffic to  
3 these ported numbers to be \$1,120 for the year including non-recurring charges.  
4 West River estimates these same costs to be more than \$467,000.

5 **Q. DO YOU HAVE ANY OTHER COMMENTS ON PROPOSED LNP 'TRANSPORT' COST RECOVERY?**

6 A. Yes. It is unclear that any of the costs included in this line item are recoverable under  
7 the FCC's rules pertaining to recovery via a line-item surcharge on local  
8 telecommunications customers. I believe the FCC views that it is the originating  
9 carrier's responsibility to deliver local traffic for termination and that the costs  
10 associated with fulfilling that responsibility are not a number portability cost.

11 **Q. HAVE YOU PREPARED ALTERNATIVE LNP COST ESTIMATES FOR THE PETITIONERS?**

12 A. Yes. Based on my experience with interconnection and with number portability, I  
13 have attached Exhibit Williams' Direct 5 which reflects the modifications to  
14 Petitioner costs consistent with my testimony.

15 **Q. I NOTE THAT WILLIAMS' DIRECT -5 IS BROKEN INTO TWO PAGES, ONE MARKED**  
16 **AS 5A AND ONE MARKED AS 5B. COULD YOU EXPLAIN THE DIFFERENCES ON**  
17 **THESE TWO PAGES?**

18 A: When the Petitioners in this case provided cost summaries, they did so in two  
19 separate formats. To assist in comparing the costs estimated on 5A and 5B with the  
20 Petitioner cost submissions, we maintained the two distinct formats and presented the  
21 revised estimates.

22 **Q. IN PREPARING WILLIAMS' DIRECT -5, WHAT INFORMATION DID YOU USE?**

23 A. For the most part, I used the same numbers as those being presented by the

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 Petitioners. However, I have changed certain values to more reasonable and realistic  
2 amounts in those areas I have discussed in my testimony. These changes are based on  
3 my experience and also some of the other cost information the Petitioners submitted.  
4 Any number that I corrected in the cost estimate is highlighted on the exhibit for ease  
5 of comparison. In some cases I eliminated a cost. For example, I eliminated the  
6 switch maintenance cost because these costs already exist for the switches now being  
7 used and the fact that the new switch to be put in will be LNP compatible does not  
8 result in additional increase in these costs.

9 **Q. YOU MENTIONED EARLIER IN YOUR TESTIMONY THAT IN EVERY INSTANCE THAT**  
10 **YOU HAVE REVIEWED IN THESE FILINGS THE PETITIONERS HAVE IDENTIFIED**  
11 **THE MOST INEFFICIENT MEANS OF ROUTING TRAFFIC TO PORTED NUMBERS AS A**  
12 **BASIS FOR THEIR LNP COST ESTIMATES. HOW IS IT INEFFICIENT?**

13 A. The routing methods proposed by the Petitioners are inefficient in that they make  
14 little or no utilization of existing equipment and shared facilities currently used to  
15 exchange calls with other carriers. A more efficient and less costly mechanism for  
16 establishing routing for LNP is illustrated in Exhibit Williams' Direct - 6.

17 **Q. WHAT IS YOUR RECOMMENDATION ON PETITIONERS' CLAIMS THAT THE COST OF LNP**  
18 **IMPLEMENTATION IS UNDULY BURDENSOME?**

19 A. The bar has been set very high for granting an exception on the basis of the costs of  
20 implementing local number portability. The Petitioner cost exhibits include inflated  
21 costs that don't stand-up to scrutiny. The Petitioners have failed to demonstrate their  
22 costs are unduly burdensome. Neither have they demonstrated that their costs are any  
23 different than other rural wireless and wireline carriers' that are or have implemented  
24 number portability.

TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS

1 V. WHAT IS THE ECONOMIC IMPACT OF DELAYING PETITIONERS'  
2 IMPLEMENTATION OF NUMBER PORTABILITY?

3 Q. PETITIONERS IMPLY THAT SIGNIFICANT NUMBER PORTABILITY INVESTMENT RISK WILL BE AVOIDED  
4 BY DELAYING IMPLEMENTATION. IS THERE MERIT TO THESE ASSERTIONS?

5 A. No, the implementation cost information provided for the Petitioners indicates that  
6 there is little or no investment that would be avoided by delaying implementation of  
7 number portability.

8 Q. EXPLAIN THE EVIDENCE THAT DEMONSTRATES THE LNP INVESTMENT RISK IS LOW?

9 A. The data presented by the Petitioners lead to the conclusion that granting a delay in  
10 implementation of number portability will not have a material impact on the  
11 investments required. The nature of the LNP implementation and operational cost  
12 provided in the Petitions is predominately related to network investments, basic port  
13 process development, and port-driven variable costs. These are not costs that are at  
14 risk to any foreseeable change in LNP capability requirements. They do not reflect  
15 the potential for reduction at a later time. The transport cost category is so  
16 misconstrued and overstated by the Petitioners that it is meaningless. If routing costs  
17 were properly identified, they would amount to a small fraction of LNP costs and  
18 would not be of material impact.

19 Q. SO, WILL A DELAY SAVE ANY LNP INVESTMENTS?

20 A. No. The investments required by Petitioners will not be reduced by delaying their  
21 obligation to implement LNP. The risk for each of the Petitioners is no more than the  
22 investment risk made by any other carrier who has implemented local number  
23 portability. A delay only serves to deny those competitive carriers that have made

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 LNP investments the opportunity to leverage that investment in Petitioner serving  
2 areas.

3 **Q. DO THE PETITIONERS' HAVE LNP ROUTING OBLIGATIONS THAT TRANSCEND ANY SUSPENSION OF**  
4 **INTERMODAL LNP IMPLEMENTATION?**

5 A. Yes they do. In a Notice of Apparent Liability for Forfeiture, released by the Chief,  
6 Enforcement Bureau of the FCC, the FCC maintains that:

7           Regardless of the status of a carrier's obligations to provide number  
8           portability, all carriers have the duty to route calls to ported numbers.  
9           In other words, carriers must ensure that their call routing procedures  
10           do not result in dropped calls to ported numbers."<sup>26</sup>

11 Granting any further delay to these Petitioners would seem to exacerbate their  
12 problem with respect to routing obligations. Many of the Petitioners provide service  
13 in local calling areas that are common to a Qwest rate center (e.g., James Valley's  
14 Frederick and Mellett exchanges have a local calling area shared with Qwest's  
15 Aberdeen rate center) that will have number portability implemented on or before  
16 May 24, 2004. In the event a number is ported in the Aberdeen rate center, the FCC  
17 has made it clear that a carrier is still obligated to route calls to ported numbers.

18 **Q. DOES THE FACT THAT THE PETITIONERS ARE NOT IMPLEMENTING LNP LIMIT**  
19 **WIRELESS TO WIRELESS NUMBER PORTABILITY?**

20 A. Yes. Since the beginning of the wireless industry, wireless carriers have used number  
21 assigned to them by LECs. These numbers appear in industry routing guides as if  
22 they were affiliated with the LEC switch instead of the wireless carrier's switch. In  
23 these instances, a wireless customer cannot port their wireless number to another

---

<sup>26</sup> In the Matter of CenturyTel, Inc., CenturyTel of Washington, Inc., CenturyTel of Cowiche, Inc., and CenturyTel of Inter Island, Inc. Apparent Liability for Forfeiture, DA 04-1304, Released May 13, 2004, ¶ 4.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 wireless provider unless the LEC is LNP compliant and participates in the port. In  
2 South Dakota, there are at least five thousand Western Wireless numbers that would  
3 fall into this category and other wireless carriers in South Dakota would also likely  
4 have as many numbers that would fall subject to this problem.

5 **VI. DO PETITIONERS MAKE A VALID CLAIM THAT LNP IS NOT IN THE**  
6 **PUBLIC INTEREST IN THEIR SERVICE AREAS?**

7 **Q. DO THE PETITIONERS' CLAIMS OF LACK OF DEMAND FOR NUMBER PORTABILITY RING TRUE?**

8 A. No. The fact is, number portability has proven to be an enabler of competition  
9 wherever it has been implemented. That is the case here in South Dakota. Qwest has  
10 experienced a substantial loss of customers to competitors since the advent of number  
11 portability. There is, however, a difference in what the FCC has ordered to happen on  
12 May 24, 2004. Instead of just adding more competitors to South Dakota's urban  
13 markets, intermodal LNP enables wireless carriers to compete effectively for  
14 customers in areas that have not previously been exposed to competition.

15 **Q. HAS THE FCC MADE ANY RECENT COMMENTS WITH RESPECT TO THE PUBLIC INTEREST AND THE**  
16 **IMPLEMENTATION OF LNP IN RURAL AREAS?**

17 A. Yes. On May 6, 2004, K. Dane Snowden, Chief of the Consumer & Governmental  
18 Affairs Bureau, issued a letter to the President of NARUC. The letter asked NARUC  
19 to encourage state commissions to ensure that waivers are only granted "where  
20 carriers demonstrate undue economic burden or technological infeasibility and, in  
21 reference to the waiver obligations of Section 251(f) of the Act:

22 "strictly apply that statutory standard so that rights of consumers  
23 are protected. I encourage the State commissions to ensure that  
24 carriers seeking waivers demonstrate that they are on a path to

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 compliance so that customers of these carriers will not be forever  
2 denied the rights their fellow consumers enjoy.”<sup>27</sup>

3 **Q. IS THERE ANY REASON WHY THE COMPETITIVE CHOICE, ENABLED BY NUMBER PORTABILITY, AND**  
4 **ALREADY AVAILABLE TO MOST SOUTH DAKOTANS, SHOULD BE DELAYED FOR THE CUSTOMERS OF**  
5 **THESE PETITIONERS?**

6 **A. No.**

7 **Q. ARE THERE ANY INDUSTRY PROJECTIONS FOR THE POTENTIAL OF SUBSTITUTION OF WIRELINE**  
8 **SERVICE BY WIRELESS?**

9 **A. Yes, many industry watchers are projecting that intermodal number portability will**  
10 **open the door to increased competition and accelerated substitution of wireless for**  
11 **wireline services. Here are some excerpts of a Cato Industry report summarizing the**  
12 **impact of wireless substitution<sup>28</sup>: “Wired Magazine recently reported that roughly**  
13 **3% of homes have dropped their landlines and 8% are expected to follow suit in the**  
14 **next five years.” “A more recent study by PriMetrica, Inc. suggested that roughly**  
15 **half of U.S. households would be willing to dump wireline for cellular ...”. “And**  
16 **now comes the number portability decision, which adds more fuel to the VoIP and**  
17 **wireless substitution fire. I think it will certainly increase the move toward**  
18 **substituting wireless for wire-line phones’ notes Rebecca Arbogast, an analyst with**  
19 **Legg Mason.” Finally, common sense tells us that demand for a service greatly**  
20 **increases once the service becomes available.**

21 **Q. HAS WESTERN WIRELESS MADE THE INVESTMENTS NECESSARY TO PROVIDE LNP IN SOUTH**  
22 **DAKOTA?**

---

<sup>27</sup> Attached is Exhibit Williams’ Direct - 7, a copy of the correspondence from the Bureau Chief of the FCC Consumer & Governmental Affairs Bureau to the President of NARUC.

<sup>28</sup> “Number Portability Adds to Wireline Telecom Sector’s Perfect Storm,” Adam Thierer, Director of Telecommunication Studies, Cato Institute, Issue 66, November 20, 2003.

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. Yes. We have upgraded our network, implemented new processes, systems, and  
2 hired supporting resources to implement LNP in South Dakota. In other words, we  
3 have absorbed the costs of implementing LNP under our FCC obligations. Further,  
4 we believe it is unfair that carriers who we compete with, that are similarly obligated,  
5 would be exempted from their obligations and thereby limit our ability to recoup the  
6 LNP investments we have made by restricting our opportunity to leverage those  
7 investments in a competitive marketplace.

8 **Q. HAVE THE PETITIONERS MET THE PUBLIC INTEREST STANDARD FOR GRANT OF A SUSPENSION OF**  
9 **LNP OBLIGATIONS?**

10 A. No. The public interest would not be served by suspending these Petitioners' LNP  
11 obligations. Section 251(f)(2) of the Act requires the Commission to determine that  
12 suspension of a carrier's LNP obligations would be "consistent with the public  
13 interest, convenience, and necessity."<sup>29</sup> The provision of LNP by LECs is a critical  
14 component of a competitive local telephone market. Rural consumers are  
15 increasingly choosing wireless service for their telecommunications needs and may  
16 choose to port their wireline number to Western Wireless upon the implementation of  
17 number portability as mandated by the Federal Communications Commission. The  
18 FCC has observed that the inability of customers to retain their telephone numbers  
19 when changing local service providers hampers the development of local competition:

20 Section 251(b)(2) removes a significant barrier to completion by  
21 ensuring that consumers can change carriers without forfeiting their  
22 existing telephone numbers.<sup>30</sup>

---

<sup>29</sup> 47 U.S.C. § 251(f)(2)(B).

<sup>30</sup> Third LNP Order, 13 FCC Rcd 11701, 11702-04 ¶¶ 3-4 (1998)

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 The fact is, number portability has proven to be an enabler of competition wherever it  
2 has been implemented. The bona fide request process for local number portability  
3 has led to an opportunity for increased competition in rural South Dakota markets on  
4 May 24, 2004, (i.e., the ability of a wireless carrier to compete for service in areas  
5 that have not previously been exposed to competition). The implementation of LNP  
6 is intended to serve the important public interests of improved choice and competition  
7 for consumers.

8 **Q. IS THE PETITIONERS' THREAT OF "CUSTOMER CONFUSION"<sup>31</sup> AMONG TELEPHONE USERS A**  
9 **REALISTIC CONCERN?**

10 A. Only if the Petitioners' are not required to meet their routing obligations as an  
11 originator of local telecommunications traffic. The Petitioners' threat of misrouting  
12 calls to ported numbers as toll calls is in clear violation of the FCC's rules:

13 "a wireless carrier porting-in a wireline number is required to maintain  
14 the number's original rate center designation following the port. As a  
15 result, calls to the ported number will continue to be rated in the same  
16 fashion as they were prior to the port."<sup>32</sup>

17 This is consistent with the Telecom Act's definition of LNP:

18 "The ability of users of telecommunications services to retain, at the  
19 same location, existing telecommunications numbers *without*

---

<sup>31</sup> See, for example, Petitioner TC04-045 by Golden West Telecommunications Cooperative, et al, ¶ 20: "The current technical issues with wireline-to-wireless LNP implementation will lead to customer confusion ... The switch will search for a trunk over which to route the call. If a direct trunk group has not been established ... the party placing the call will likely receive a message that the call cannot be complete as dialed or a message instructing the party to redial using 1+ the area code. Confusion among telephone users will occur ..." And See Steven E. Watkins Direct Testimony, p 7 lls 10-13.

<sup>32</sup> Intermodal Porting Order at ¶ 27.

DOCKET TC04-025 et al

TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS

1           *impairment of quality, reliability, or convenience* when switching  
2           from one telecommunications carrier to another.”<sup>33</sup> [Emphasis added]

3   **Q.**    **ARE THE PETITIONERS’ CLAIMS CONSISTENT WITH FCC POLICY?**

4   **A.**    No. The Petitioners claim they need additional guidance prior to implementing LNP.  
5           Additional guidance is not necessary. Granting the Petitioners’ delay is at odds with  
6           FCC policy and the interests of rural consumers who, like their urban counterparts,  
7           have the expectation of legal right under the Communications Act to port their  
8           numbers to new carriers should they so desire. Tactics to further delay intermodal  
9           LNP will be a disservice to consumers in each of the Petitioners’ own service areas.

10 **Q.**    **IS THERE EVIDENCE THAT THE PETITIONERS ARE NOT ACTING IN GOOD FAITH WITH RESPECT TO**  
11 **FCC OBLIGATIONS TO IMPLEMENT LOCAL NUMBER PORTABILITY?**

12 **A.**    Yes. It is clear from the Petitioners’ response to discovery that few are moving  
13           forward with LNP implementation. All the Petitioners have ‘considered’ some of the  
14           ramifications of LNP and most have ‘reviewed’ and ‘discussed’, but very few have  
15           actually implemented any element of LNP. The fact that most of the Petitioners have  
16           not prepared their network for the implementation of competition through LNP or  
17           their business processes and, apparently, have not budgeted for LNP implementation  
18           in 2004 (even though they received bona fide requests for implementation in 2003)  
19           does not constitute undue economic burden. Neglect of, disregard for, or mis-  
20           management relative to FCC rules should not be used as basis for granting any delay  
21           or suspension of number portability obligations.

22 **Q.**    **WHAT STANCE HAS THE FCC STAFF TAKEN WITH RESPECT TO PETITIONERS’ POSITIONS?**

---

<sup>33</sup> 47 U.S.C. § 153(30)

**DOCKET TC04-025 et al**

**TESTIMONY OF RON WILLIAMS ON BEHALF OF WESTERN WIRELESS**

1 A. Speaking at a forum on LNP issues, Wireless Bureau Assistant Chief David Firth said  
2 that the volume of actual number porting would not be the measure of success, but  
3 giving customers the option to port was most important. He indicated that carriers  
4 outside of the 100 largest MSA's should be testing and preparing for the May 24,  
5 2004 LNP deadline. Responding to questions, Mr. Firth indicated that rating and  
6 routing issues between carriers are not porting issues and are therefore not a valid  
7 reason for refusing to port.<sup>34</sup>

8 **VII. CONCLUSION**

9 **Q. PLEASE SUMMARIZE YOUR TESTIMONY.**

10 Petitioners have not provided evidence or otherwise demonstrated that there is any  
11 technical constraint to the implementation of local number portability by May 24,  
12 2004. Petitioners have not met the standard that would lead one to conclude the  
13 economic burden exceeds that "typically associated with efficient competitive entry."  
14 Nor have Petitioners demonstrated that the implementation of number portability  
15 would conflict with the public interest and the competitive choice guidelines set by  
16 the FCC and this Commission.

17 The Commission should reject Petitioner arguments for delayed  
18 implementation, deny the suspensions, and force the Petitioners to face the  
19 consequences of their LNP preparations or lack thereof.

20 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

21 A. Yes, it does.

**ORDER**

Adopted: January 13, 2004

Released: January 16, 2004

By the Commission:

**I. INTRODUCTION**

1. In this order, we grant a limited waiver of the wireline-to-wireless porting requirement for certain local exchange carriers with fewer than two percent of the nation's subscriber lines in the aggregate nationwide (Two Percent Carriers)<sup>1</sup> that operate in the top 100 Metropolitan Statistical Areas (MSAs).<sup>2</sup> Specifically, we grant Two Percent Carriers that meet the conditions described in this order a waiver until May 24, 2004, to comply with the wireline-to-wireless porting requirement. The waiver applies to all Two Percent Carriers operating within the top 100 MSAs that had not received a request for local number porting from either a wireline carrier prior to May 24, 2003, or a wireless carrier that has a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned (Covered Carriers). To the extent that a Two Percent Carrier operating within the top 100 MSAs does not meet these qualifications, it must comply with the requirements for wireline-to-wireless porting to date.

**II. BACKGROUND**

2. *Intermodal Portability.* Section 251(b) of the Communications Act of 1934, as amended (the Act) requires local exchange carriers (LECs) to provide local number portability (LNP), to the extent technically feasible, in accordance with requirements prescribed by the Commission.<sup>3</sup> Although the Act excludes Commercial Mobile Radio Service (CMRS) providers from the definition of local exchange carrier, and therefore from the section 251(b) obligation to provide number portability, the Commission has extended number portability requirements to CMRS providers.<sup>4</sup> The Commission determined that

<sup>1</sup> See 47 U.S.C. § 251(f)(2).

<sup>2</sup> The Commission received several petitions from small LECs operating in the top 100 MSAs for relief of the intermodal porting deadline of November 24, 2003. See Appendix A.

<sup>3</sup> 47 U.S.C. § 251(b)(2). Under the Act and the Commission's rules, local number portability is defined as "the ability of users of telecommunications services to retain, at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another." 47 U.S.C. § 153(30); 47 C.F.R. § 52.21(k).

<sup>4</sup> Telephone Number Portability, CC Docket No. 95-116, First Report and Order and Further Notice of Proposed Rulemaking, 11 FCC Rcd 8352, 8431, paras. 152-53 (1996) (*First Report and Order*). The Commission indicated that it had independent authority under sections 1, 2, 4(i), and 332 of the Communications Act of 1934, as amended, to require CMRS carriers to provide number portability. *Id.* at para. 153. See 47 U.S.C. §§ 1, 2, 4(i), and 332.

implementation of wireless LNP, which would enable wireless subscribers to keep their phone numbers when changing carriers, would enhance competition between wireless carriers as well as promote competition between wireless and wireline carriers.<sup>5</sup>

3. After extending the wireless LNP deadline on several occasions, the Commission established November 24, 2003 as the date in which wireless carriers in the top 100 MSAs must be capable of wireless-to-wireless and wireless-to-wireline porting and wireline carriers must be capable of wireline-to-wireless porting. On November 10, 2003, we released a Memorandum Opinion and Order and Further Notice of Proposed Rule Making (*Intermodal Order*) further clarifying certain aspects of intermodal porting.<sup>6</sup> In the order, we recognized that many wireline carriers operating outside of the top 100 MSAs may require some additional time to prepare for implementation of intermodal portability.<sup>7</sup> Therefore, we waived, until May 24, 2004, the requirement that wireline carriers operating outside the top 100 MSAs port numbers to wireless carriers that do not have a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned.<sup>8</sup>

4. *Petitions.* As the November 24, 2003 deadline approached, we received a number of petitions for waiver of the intermodal porting requirement (Waiver Petitions) from small LECs operating in the top 100 MSAs (Petitioners).<sup>9</sup> Nearly all of the Petitioners describe themselves as small telephone companies and assert that they are more similarly situated to LECs operating outside the top 100 MSAs than the large carriers operating within the top 100 MSAs.<sup>10</sup> In support of this claim, many of the Petitioners note that the intermodal porting requests that they received from CMRS providers were their first requests for any type of porting.<sup>11</sup> Because they had not previously received requests from other wireline carriers to make their systems LNP-capable, the Petitioners argue that they were at a technological disadvantage compared to most, if not all, of the larger LECs in their MSAs, which had already upgraded their systems to provide wireline-to-wireline porting. Therefore, the Petitioners request additional time to comply with the intermodal porting requirements, many requesting the same period given to LECs operating outside the top 100 MSAs.<sup>12</sup>

5. On November 21, 2003, the Independent Telephone and Telecommunications Alliance, the National Telecommunications Cooperation Association, and the Organization for the Promotion and Advancement of Small Telecommunications Companies (Joint Petitioners) filed an Emergency Joint Petition for Stay and Clarification (Joint Petition) requesting that the Commission stay application of the

<sup>5</sup> *First Report and Order* at 8434-36, paras. 157-160.

<sup>6</sup> Telephone Number Portability, CC Docket No. 95-116, Memorandum Opinion and Order and Further Notice of Proposed Rulemaking, FCC 03-284 (rel. Nov. 10, 2003) (*Intermodal Order*).

<sup>7</sup> *Intermodal Order* at para. 29.

<sup>8</sup> *Id.*

<sup>9</sup> See Appendix A. Sprint Corporation (Sprint) filed oppositions to five of these petitions and comments in support of one of the petitions. See Appendix B. Additionally, Northeast Florida and Valley filed reply comments to Sprint's oppositions to their petitions. *Id.*

<sup>10</sup> See, e.g., Northeast Florida Petition at 3; Yadkin Valley Petition at 2; OTELCO Petition at 2; MoKan Petition at 3.

<sup>11</sup> See, e.g., MoKan Petition at 4; Northeast Florida at 4; United Petition at 2-3; Blountsville Petition at 3-4.

<sup>12</sup> A number of the Petitioners also claim that it was unclear, until the November 10, 2003 *Intermodal Order*, whether they would have had to act on the requests from CMRS providers that do not have points of interconnection or numbering resources in the rate centers where the customers' wireline numbers are provisioned. These Petitioners state that, because the clarification occurred only two weeks before the November 24 deadline, it would be technologically and operationally impossible to become intermodal porting capable by November 24, even with the carriers taking reasonable efforts and acting in good faith.

*Intermodal Order* with respect to Two Percent Carriers until the Commission reconsiders and/or clarifies certain aspects of that decision.<sup>13</sup> Specifically, the Joint Petitioners assert that it is technically infeasible for Two Percent Carriers to comply with the November 24, 2003 deadline,<sup>14</sup> and that the interests of all the parties involved in the port request, including the consumer, will benefit from additional time for Two Percent Carriers to face the operational and network hurdles that must be overcome to achieve a smooth transition.<sup>15</sup> Moreover, the Joint Petitioners argue that Two Percent Carriers need additional time to become capable of wireline-to-wireless porting because many of them had never been requested to support wireline-to-wireline porting and were uncertain of their intermodal porting obligations until the release of the *Intermodal Order* two weeks before the November 24, 2003.<sup>16</sup>

6. *Waiver Standard.* The Commission may, on its own motion, waive its rules when good cause is demonstrated.<sup>17</sup> The Commission may exercise its discretion to waive a rule where the particular facts make strict compliance inconsistent with the public interest.<sup>18</sup> In doing so, the Commission may take into account considerations of hardship, equity, or more effective implementation of overall policy on an individual basis.<sup>19</sup> Commission rules are presumed valid, however, and an applicant for waiver bears a heavy burden.<sup>20</sup> Waiver of the Commission's rules is therefore appropriate only if special circumstances warrant a deviation from the general rule, and such a deviation will serve the public interest.<sup>21</sup>

### III. DISCUSSION

7. We find that good cause exists to grant a waiver of the wireline-to-wireless porting requirement for Covered Carriers until May 24, 2004. Special circumstances exist for Covered Carriers because of the technological and operational limitations they face in implementing the necessary modifications to provide wireline-to-wireless porting. We also find that this additional time is consistent with the public interest. Therefore, we grant the Waiver Petitions and the Joint Petition, in part, to the extent consistent with this order, and otherwise deny them.

8. *Special Circumstances.* We find that special circumstances warrant a limited deviation from the November 24, 2003 deadline for Covered Carriers. Specifically, we recognize that the Covered Carriers' networks have technological limitations that cannot be resolved immediately to comply with the wireline-to-wireless porting requirement. The Joint Petitioners and most of the Petitioners assert that, unlike the large carriers serving within the Top 100 MSAs, a number of Two Percent Carriers in those markets had not received requests from other wireline carriers for wireline-to-wireline porting prior to

---

<sup>13</sup> Emergency Joint Petition for Stay and Clarification filed by the Independent Telephone and Telecommunications Alliance, the National Telecommunications Cooperation Association, and the Organization for the Promotion and Advancement of Small Telecommunications Companies, filed on November 21, 2003 (Joint Petition) at 22. <sup>14</sup> Joint Petition at 4, 7, 12.

<sup>15</sup> *Id.* at 4.

<sup>16</sup> *Id.* at 7-11.

<sup>17</sup> 47 C.F.R. § 1.3; see also *WAIT Radio v. FCC*, 418 F.2d 1153, 1159 (D.C. Cir. 1969), cert. denied, 409 U.S. 1027 (1972) (*WAIT Radio*).

<sup>18</sup> *Northeast Cellular Telephone Co. v. FCC*, 897 F.2d 1164, 1166 (*Northeast Cellular*).

<sup>19</sup> *WAIT Radio*, 418 F.2d at 1159; *Northeast Cellular*, 897 F.2d at 1166.

<sup>20</sup> *WAIT Radio*, 418 F.2d at 1157.

<sup>21</sup> *Id.* at 1159.

May 24, 2003.<sup>22</sup> As a result, in order to offer intermodal portability to their subscribers, these smaller carriers must acquire the hardware and software necessary to provide porting, make the necessary network upgrades, and ensure that their upgraded networks work reliably and accurately.<sup>23</sup> Some of the Petitioners also assert that Two Percent Carriers often lack the experience and technical experience with number porting to quickly implement the necessary upgrades to their systems to ensure accurate porting.<sup>24</sup> Accordingly, we conclude that special circumstances exist to grant Two Percent Carriers who have not previously upgraded their systems to support LNP a limited amount of additional time to overcome the technological obstacles they face to successfully meet a request for wireline-to-wireless porting.<sup>25</sup> Such relief is also consistent with the relief we granted, in the *Intermodal Order*, to similarly situated wireline carriers operating outside the top 100 MSAs.<sup>26</sup>

9. *Public Interest.* We likewise find that the additional time is in the public interest for Covered Carriers to become capable of providing wireline-to-wireless porting. While we continue to deem rapid implementation of number portability to be in the public interest, we also believe it to be just as important that carriers implement and test the necessary system modifications to ensure reliability, accuracy, and efficiency in the porting process.<sup>27</sup> As we found with the waiver granted to wireline carriers outside the top 100 MSAs, a transition period for Covered Carriers will help ensure a smooth transition and provide Covered Carriers sufficient time to make necessary modifications to their systems.<sup>28</sup>

10. We also agree with the Petitioners that consumers will not likely be adversely impacted by the grant of an additional six months to these carriers. According to the Petitioners, many Two Percent Carriers had not received requests or even inquiries from their customers concerning their ability to port their wireline numbers,<sup>29</sup> and some carriers have devised temporary solutions to allow at least some of their customers to port their wireline numbers if they so desire.<sup>30</sup> Therefore, we anticipate that few customers will be adversely impacted by this limited waiver.

---

<sup>22</sup> See, e.g., MoKan Petition at 4; OTELCO Petition at 4, 8; Northeast Petition at 4; Blountsville Petition at 4, 9; Warwick Valley Petition at 4, 9; United Petition at 2-3, 7; YCOM Petition at 3, 8; Rio Virgin Petition at 3, 7; Egyptian Petition at 3, 8; Cascade Utilities Petition at 3, 7-8; and Laurel Highland Petition at 3, 7-8. See also Joint Petition at 7.

<sup>23</sup> See, e.g., Full Service Petition at 2. We note, however, that additional time is not necessary for Two Percent Carriers inside the top 100 MSAs that received a request to port a subscriber's number to another wireline carrier before May 24, 2003. These carriers would already have had to become LNP capable as of November 24, 2003, and therefore, would only need to make accommodations to provide wireline-to-wireless porting. Likewise, carriers would not need additional time for switches that are already LNP capable.

<sup>24</sup> See, e.g., MoKan Petition at 5; Northeast Florida at 5.

<sup>25</sup> See, e.g., MoKan Petition at 5; Northeast Florida at 5. In response to Sprint's oppositions, we note that Two Percent Carriers that were LNP capable as of November 24, 2003, or otherwise received a request from a wireless carrier that has a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned, must continue to comply with the current requirements for wireline-to-wireless porting.

<sup>26</sup> *Intermodal Order* at para. 29.

<sup>27</sup> Joint Petition at 4, 18. See also MoKan Petition at 7 ("Without appropriate testing, there will be delays and errors in porting numbers, which is not in the best interest of the consumer or either carrier involved with the port.").

<sup>28</sup> *Intermodal Order* at para. 29.

<sup>29</sup> See, e.g., MoKan Petition at 6, Northeast Florida at 6.

<sup>30</sup> See, e.g., Full Service Petition at 3 (moving some of its customers from the outdated switch to UNE-P service which allows for number portability until a new switch that supports number portability is installed).

11. We disagree with Sprint's claim that such a waiver would relieve Covered Carriers of their obligations to provide wireline-to-wireless porting.<sup>31</sup> Rather the relief granted in this Order merely gives Covered Carriers additional time to overcome the technological and operations hurdles that large carriers in the top 100 MSAs did not face. Moreover, the waiver will not adversely impact rural customers because of its limited nature.

#### IV. ORDERING CLAUSE

12. Accordingly, IT IS ORDERED that, pursuant to authority contained in sections 1, 4(i), 251, and 332 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 251, 332, we GRANT a limited waiver of the wireline-to-wireless porting requirement, until May 24, 2004, for local exchange carriers with fewer than two percent of the nation's subscriber lines in the aggregate nationwide that operate in the top 100 Metropolitan Statistical Areas and have not received a request for local number porting from either a wireline carrier prior to May 24, 2003 or a wireless carrier that has a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned.

13. IT IS FURTHER ORDERED, pursuant to authority contained in sections 1, 4(i), 251, and 332 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 251, 332, that the petitions listed in Appendix A to this Order ARE GRANTED IN PART AND DENIED IN PART, to the extent provided herein.

ORDER

Adopted: May 12, 2004

Released: May 13, 2004

By the Deputy Chief, Wireline Competition Bureau:

I. INTRODUCTION

1. In this Order, we deny the petition filed by The North-Eastern Pennsylvania Telephone Company (NEP) seeking an extension of the May 24, 2004 deadline for implementing local number portability (LNP or porting).<sup>1</sup> We find that NEP has not demonstrated that special circumstances warrant a waiver or that such an extension is in the public interest. We will not, however, enforce NEP's LNP obligations until sixty days after the release of this Order to provide NEP with an opportunity to make arrangements to come into compliance with its LNP obligations.

II. BACKGROUND

2. *Local Number Portability.* Section 251(b) of the Communications Act of 1934, as amended, (Act)<sup>2</sup> mandates local exchange carriers (LECs) to provide LNP in accordance with the requirements outlined by the Commission.<sup>3</sup> The Commission, in the *Number Portability First Report and Order*, established the parameters for LNP and required commercial mobile radio service (CMRS or wireless)

<sup>1</sup> See Petition of The North-Eastern Pennsylvania Telephone Company Petition for Waiver of Section 52.23(b) of the Commission's Rules, filed March 23, 2004 (NEP Petition). The NEP petition was placed on public notice on March 26, 2004. See *Wireline Competition Bureau Seeks Comment on the Petition of The North-Eastern Pennsylvania Telephone Company for Temporary Waiver of the Commission's Number Portability Requirements*, Public Notice, CC Docket No. 95-116, DA 04-798 (rel. March 26, 2004). Comments were filed by Cellular Telecommunications & Internet Association (CTIA), Dobson Communications Corporation (Dobson), Nextel Communications, Inc. (Nextel) and Verizon Wireless (Verizon), and reply comments were filed by National Telecommunications Cooperative Association (NTCA), NEP, and T-Mobile USA, Inc. (T-Mobile).

<sup>2</sup> 47 U.S.C. §§ 151-174.

<sup>3</sup> 47 U.S.C. §251(b).

providers to become LNP-capable pursuant to sections 1, 2, 4(i), and 332 of the Act.<sup>4</sup> In doing so, the Commission concluded that the public interest is served by making LNP available across different technologies and thereby promoting competition between CMRS service providers and wireline carriers.<sup>5</sup> Initially, CMRS providers were required to become LNP-capable by June 30, 1999.<sup>6</sup> The Commission subsequently extended this deadline, and required CMRS carriers operating in the top 100 Metropolitan Statistical Areas (MSAs) to provide number portability upon request by another carrier by November 24, 2003.<sup>7</sup> CMRS carriers operating outside the top 100 MSAs must become LNP-capable within six months of a request or by May 24, 2003, whichever is later.<sup>8</sup> On November 10, 2003, the Commission concluded that, as of November 24, 2003, LECs must port numbers to wireless carriers where the requesting wireless carrier's "coverage area" overlaps the geographic location of the rate center in which the customer's wireline number is provisioned, provided that the porting-in carrier maintains the number's original rate center designation following the port.<sup>9</sup> The Commission, however, granted wireline carriers operating in areas outside of the 100 largest MSAs, in certain circumstances, a waiver until May 24, 2004 of the requirement to port numbers to wireless carriers.<sup>10</sup> The Commission later granted certain LECs with fewer than two percent of the nation's subscriber lines in the aggregate nationwide (Two Percent Carriers) that operate in the top 100 MSAs a limited waiver of the wireline-to-wireless porting requirement.<sup>11</sup>

3. *NEP's Request for Waiver.* NEP is a rural incumbent LEC providing service in Northeast Pennsylvania.<sup>12</sup> NEP represents that it decided, in 2001, to upgrade its switch network and sought

<sup>10</sup> *Id.*

<sup>11</sup> *Telephone Number Portability*, Order, 19 FCC Rcd 875 (2004).

<sup>12</sup> NEP's existing switch network consists of eight exchanges. These exchanges include the Union Dale, Harford, New Milford, Jackson, Thompson, Pleasant Mount, Clifford, and Forest City exchanges. See NEP Petition at 2, 5.

informal quotes from various switch equipment manufacturers at that time.<sup>13</sup> NEP subsequently concluded that it would be more efficient and economical to replace its existing switches with software based switch (“soft switch”) technology.<sup>14</sup> Accordingly, in March 2003, NEP sought formal quotes and proposals from several switch manufacturers for soft switches.<sup>15</sup> In September 2003, NEP contracted with Taqua, Inc. (Taqua) to purchase eight soft switches to be installed on a phased-in basis, beginning on May 1, 2004 and ending on December 31, 2005.<sup>16</sup> However, according to NEP, certain service feature implementation issues need to be resolved before the first switch can be put into service.<sup>17</sup> NEP requests a waiver to provide additional time to accommodate the deployment schedule for its eight exchanges and to resolve the implementation issues.<sup>18</sup>

4. NEP contends good cause exists for granting an extension of the May 24, 2004 porting implementation deadline.<sup>19</sup> Specifically, NEP maintains that it has been planning and implementing network upgrades since 2001 to address expected network capability requirements.<sup>20</sup> NEP argues that it did not anticipate that intermodal porting<sup>21</sup> would be an “imminent requirement” until the Commission’s *Intermodal LNP Order* released in November 2003.<sup>22</sup> Upon release of the order, NEP contends that it immediately reviewed its number portability plans with Taqua.<sup>23</sup> NEP maintains that, while working with Taqua to resolve certain service feature issues, it became apparent to NEP that it will be unable to meet the May 24, 2004 implementation deadline for all of its switches.<sup>24</sup> Further, NEP states that it will provide the Commission with quarterly progress reports and updates to the deployment schedule, including solutions that will allow NEP to advance its deployment schedule and number portability.<sup>25</sup>

<sup>21</sup> Intermodal porting is porting between wireline and wireless service providers.

<sup>22</sup> *Id.* at 4.

<sup>23</sup> *Id.*

<sup>24</sup> *Id.* at 5.

<sup>25</sup> *Id.* at 6.

5. CTIA, Dobson, Nextel, Verizon, and T-Mobile oppose granting NEP's waiver.<sup>26</sup> They argue that NEP has not demonstrated through substantial, credible evidence that special circumstances justify a waiver of the Commission's LNP rules.<sup>27</sup> They also contend that the public interest would not be served if such waiver is granted.<sup>28</sup> Specifically, they argue that grant of NEP's waiver would undermine the Commission's goal of promoting competition and cause customer confusion.<sup>29</sup>

6. One commenter, NTCA, supports NEP's petition.<sup>30</sup> NTCA maintains that, because NEP is moving toward full compliance with its LNP obligations, the Commission should provide NEP with a temporary waiver.<sup>31</sup> NTCA contends that large carriers, such as Nextel and Verizon, fail to take into account the financial, technical, and staffing realities of small LECs.<sup>32</sup> According to NTCA, it would have been financially irresponsible for NEP to upgrade its equipment prior to having a firm obligation to do so.<sup>33</sup>

7. *Waiver Standard.* The Commission's rules may be waived when good cause is demonstrated.<sup>34</sup> The Commission may exercise its discretion to waive a rule where the particular facts make strict compliance inconsistent with the public interest.<sup>35</sup> In doing so, the Commission may take into account considerations of hardship, equity, or more effective implementation of overall policy on an individual basis.<sup>36</sup> Commission rules are presumed valid, however, and an applicant for waiver bears a heavy burden.<sup>37</sup> Waiver of the Commission's rules is therefore appropriate only if special circumstances warrant a deviation from the general rule, and such a deviation will serve the public interest.<sup>38</sup>

<sup>38</sup> *Id.* at 1159.

8. In seeking an extension of the LNP deployment deadline, a carrier must provide substantial, credible evidence to support its contention that it is unable to comply with the deployment schedule.<sup>39</sup> A request for an extension of a deadline must be filed with the Commission at least sixty days in advance of the deadline.<sup>40</sup>

### III. DISCUSSION

9. We find that NEP has not demonstrated good cause to justify waiving the May 24, 2004 porting deadline. In particular, we agree with those commenters who argue that NEP has not shown through substantial, credible evidence that special circumstances warrant an extension of the porting deadline until December 31, 2005 and that postponing porting as requested will serve the public interest.<sup>41</sup> We decline, however, to enforce NEP's LNP obligations for sixty days following the release of this Order.

10. *Special Circumstances.* We are not persuaded by NEP's claims that special circumstances exist warranting a waiver of the May 24, 2004 porting deadline in order to accommodate NEP's switch delivery and deployment schedule, and provide additional time to resolve any service feature issues. We find that NEP has not presented "extraordinary circumstances beyond its control in order to obtain an extension of time."<sup>42</sup> Rather, NEP consciously made a business decision to upgrade its switches on a certain schedule.<sup>43</sup> NEP has not shown that challenges it may face are different from those faced by similarly situated carriers who are able to comply.<sup>44</sup> Generalized references to limited resources and implementation problems do not constitute substantial, credible evidence justifying an exemption from the porting requirements. NEP has known since 1996 that it would need to support LNP within six months of a request from a competing carrier.<sup>45</sup> Although wireless LNP was delayed, all carriers have been on notice since July 2002 that wireless and intermodal LNP would become available beginning in November 2003.<sup>46</sup> Thus, NEP has had sufficient time to follow through with these mandates and prepare for LNP.<sup>47</sup>

<sup>42</sup> *Number Portability First Report and Order*, 11 FCC Rcd at 8397, ¶ 85.

<sup>43</sup> *See supra* ¶ 3.

<sup>44</sup> *See Western Wireless Order*, 18 FCC Rcd at 24696, ¶ 10 (in denying a waiver request to extend the thousands-block number pooling and LNP deadlines, the Bureau found that "Western ha[d] not demonstrated that it will sustain costs that are different from, or burdensome than, the costs of similarly situated Tier II wireless carriers").

<sup>45</sup> *See Number Portability First Report and Order*, 11 FCC Rcd 8352; *Telephone Number Portability, First Memorandum Opinion and Order on Reconsideration*, 12 FCC Rcd 7236, 7273-75, ¶¶ 60-66 (1997) (*Number Portability Reconsideration Order*).

<sup>46</sup> *See Verizon Wireless LNP Forbearance Order*, 17 FCC Rcd 14972.

<sup>47</sup> *See Western Wireless Order*, 18 FCC Rcd at 24697-98, ¶ 13.  
(continued...)

11. *Public Interest.* We also conclude that an extension of the porting deadline until December 31, 2005 would not serve the public interest because it would unduly delay the benefits of number portability to the public and could cause customer confusion. Portability has promoted, and will continue to promote, competition, especially in underserved areas, by allowing consumers to move to carriers that better serve consumers' needs without having to make the difficult choice to give up their numbers.<sup>48</sup> Thus, we find that the public interest would be served by implementing porting as soon as possible.

12. Furthermore, NEP should have considered the porting requirements, set out by the Commission long ago, when it contracted with vendors to install necessary upgrades. Accordingly, we conclude that granting NEP's request to extend the porting deadline would be inconsistent with the Commission's policy to promote competition, consumer choice, and efficient number use. We therefore deny NEP's request for a waiver of the May 24, 2004 porting implementation deadline.

13. Although we are not persuaded that a waiver of the porting requirements until December 31, 2005 is justified, we decline to enforce NEP's LNP obligations for sixty days following the release of this Order.<sup>49</sup> We find that some limited time to allow NEP to make the necessary preparations to implement LNP is reasonable to ensure compliance with our rules.<sup>50</sup> Non-enforcement for sixty days will also help to avoid any network disruptions, maximize trouble-free operation of LNP, and ensure that customers' requests for services will not be delayed due to carriers' difficulty in obtaining numbering resources.<sup>51</sup>

Appendix B - Initial Regulatory Flexibility Analysis

## I. INTRODUCTION

1. In this order, we provide guidance to the industry on local number portability (LNP) issues relating to porting between wireless and wireline carriers (intermodal porting). First, in response to a Petition for Declaratory Ruling filed on January 23, 2003, by the Cellular Telecommunications and Internet Association (CTIA), we clarify that nothing in the Commission’s rules limits porting between wireline and wireless carriers to require the wireless carrier to have a physical point of interconnection<sup>1</sup> or numbering resources in the rate center where the number is assigned. We find that porting from a wireline carrier to a wireless carrier is required where the requesting wireless carrier’s “coverage area” overlaps the geographic location in which the customer’s wireline number is provisioned, provided that the porting-in carrier maintains the number’s original rate center designation following the port. The wireless “coverage area” is the area in which wireless service can be received from the wireless carrier. In addition, in response to a subsequent CTIA petition, we clarify that wireline carriers may not require wireless carriers to enter into interconnection agreements as a precondition to porting between the carriers. We also decline to adopt a mandatory porting interval for wireline-to-wireless ports at the present time, but we seek comment on the issue as noted below.

2. In the accompanying Further Notice of Proposed Rulemaking (Further Notice), we seek comment on how to facilitate wireless-to-wireline porting if the rate center associated with the wireless number is different from the rate center in which the wireline carrier seeks to serve the customer. In addition, we seek comment on whether we should require carriers to reduce the length of the porting interval for ports between wireless and wireline carriers.

## II. BACKGROUND

### A. Statutory and Regulatory Background

3. Section 251(b) of the Communications Act of 1934, as amended (the Act) requires local exchange carriers (LECs) to provide local number portability, to the extent technically feasible, in accordance with requirements prescribed by the Commission.<sup>2</sup> Under the Act and the Commission’s rules, local number portability is defined as “the ability of users of telecommunications services to retain,

<sup>1</sup> Referred to hereinafter as “point of interconnection.”

<sup>2</sup> 47 U.S.C. § 251(b)(2).

at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another.”<sup>3</sup>

4. The Commission released the Local Number Portability *First Report and Order* in 1996, which promulgated rules and deployment schedules for the implementation of number portability.<sup>4</sup> The Commission highlighted the critical policy goals underlying the LNP requirement, indicating that “the ability of end users to retain their telephone numbers when changing service providers gives customers flexibility in the quality, price, and variety of telecommunications services they can choose to purchase.”<sup>5</sup> The Commission found that “number portability promotes competition between telecommunications service providers by, among other things, allowing customers to respond to price and service changes without changing their telephone numbers.”<sup>6</sup>

5. The Commission adopted broad porting requirements, noting that “as a practical matter, [the porting obligation] requires LECs to provide number portability to other telecommunications carriers providing local exchange or exchange access service within the same MSA.”<sup>7</sup> In addition, the Commission noted the section 251(b) requires LECs to port numbers to wireless carriers. The Commission stated that “section 251(b) requires local exchange carriers to provide number portability to all telecommunications carriers, and thus to Commercial Mobile Radio Service (CMRS) providers as well as wireline service providers.”<sup>8</sup>

6. The Commission adopted rules implementing the LNP requirements. Section 52.21(k) of the rules defines number portability to mean “the ability of users of telecommunications services to retain, at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another.”<sup>9</sup> Section 52.23(b)(1) provides that “all local exchange carriers (LECs) must provide a long-term database method for number portability in the 100 largest Metropolitan Statistical Areas (MSAs) by December 31, 1998 ... in switches for which another carrier has made a specific request for the provision of number portability ...”<sup>10</sup> Finally, Section 52.23(b)(2)(i) of the Commission rules provides that “any wireline carrier that is certified ... to provide local exchange service, or any licensed CMRS provider, must be permitted to make a request for the provision of number portability.”<sup>11</sup>

7. In 1997, in the Local Number Portability *Second Report and Order*, the Commission adopted recommendations from the North American Numbering Council (NANC) for the implementation of

wireline-to-wireline number portability.<sup>12</sup> Under the guidelines developed by the NANC, porting between LECs was limited to carriers with facilities or numbering resources in the same rate center to accommodate technical limitations associated with the proper rating of wireline calls.<sup>13</sup> The NANC guidelines made no recommendations regarding limitations on intermodal porting.

8. Although the Act excludes CMRS providers from the definition of local exchange carrier, and therefore from the section 251(b) obligation to provide number portability, the Commission has extended number portability requirements to CMRS providers.<sup>14</sup> In the Local Number Portability *First Report and Order*, the Commission indicated that it had independent authority under sections 1, 2, 4(i), and 332 of the Communications Act of 1934, as amended, to require CMRS carriers to provide number portability.<sup>15</sup> The Commission noted that “sections 2 and 332(c)(1) of the Act give the Commission authority to regulate commercial mobile radio service operators as common carriers ...”<sup>16</sup> Noting that section 1 of the Act requires the Commission to make available to people of the United States, a rapid, efficient, nation-wide and world-wide wire and radio communication service, the Commission stated that its interest in number portability “is bolstered by the potential deployment of different number portability solutions across the country, which would significantly impact the provision of interstate telecommunications services.”<sup>17</sup> Section 4(i) of the Act grants the Commission authority to “perform any and all acts, make such rules and regulations, and issue such orders, not inconsistent with [the Communications Act of 1934, as amended] as may be necessary in the execution of its functions.”<sup>18</sup> The Commission concluded that “the public interest is served by requiring the provision of number portability by CMRS providers because number portability will promote competition between providers of local telephone services and thereby promote competition between providers of interstate access services.”<sup>19</sup>

9. The Commission determined that implementation of wireless LNP, which would enable wireless subscribers to keep their phone numbers when changing carriers, would enhance competition between wireless carriers as well as promote competition between wireless and wireline carriers.<sup>20</sup> The

<sup>20</sup> *Id.* at 8434-36, paras. 157-160.

Commission noted that “service provider portability will encourage CMRS-wireline competition, creating incentives for carriers to reduce prices for telecommunications services and to invest in innovative technologies, and enhancing flexibility for users of telecommunications services.”<sup>21</sup> Commission rules reflecting the wireless LNP requirement provide that, by the implementation deadline, “all covered CMRS providers must provide a long-term database method for number portability ... in switches for which another carrier has made a request for the provision of LNP.”<sup>22</sup>

10. In the Local Number Portability *Second Report and Order*, after adopting NANC guidelines applicable to wireline-to-wireline porting, the Commission directed the NANC to develop standards and procedures necessary to provide for wireless carriers’ participation in local number portability.<sup>23</sup> The Commission indicated its expectation that changes to LNP processes would need to be made to accommodate porting to wireless carriers. The Commission noted that “the industry, under the auspices of NANC, will probably need to make modifications to local number portability standards and processes as it gains experience in implementing number portability and obtains additional information about incorporating CMRS providers into a long-term number portability solution and interconnecting CMRS providers with wireline carriers already implementing their number portability obligations.”<sup>24</sup> In addition, the Commission noted that the NANC would have to consider issues of particular concern to wireless carriers, including how to account for differences between service area boundaries for wireline versus wireless services.<sup>25</sup>

11. In 1998, the NANC submitted a report on the integration of wireless and wireline number portability from its Local Number Portability Administration (LNPA) Working Group to the Common Carrier Bureau (now known as the Wireline Competition Bureau).<sup>26</sup> The report discussed technical issues associated with wireless-to-wireline porting. The report noted that differences between the local serving areas of wireless and wireline carriers affected the porting capabilities of each type of carrier, making it infeasible for some wireline carriers to port-in numbers from wireless subscribers. The report explained that because wireline service is fixed to a specific location the subscriber’s telephone number is limited to use within the rate center within which it is assigned.<sup>27</sup> By contrast, the report noted, because wireless service is mobile and not fixed to a specific location, while the wireless subscriber’s number is associated with a specific geographic rate center, the wireless service is not limited to use within that rate center.<sup>28</sup> As a result of these differences, the report indicated that, if a wireless subscriber seeks to port his or her number to a wireline carrier, but the subscriber’s NPA-NXX is outside of the wireline rate center where the subscriber is located, the wireline carrier may not be able to receive the ported number.<sup>29</sup> The NANC did not reach consensus on a solution to this issue, and reported that this lack of symmetry, referred to as

“rate center disparity,” raises questions by some carriers about competitive neutrality.<sup>30</sup> The Common Carrier Bureau sought comment on the NANC report.<sup>31</sup>

12. The NANC submitted a second report on the integration of wireless and wireline number portability to the Commission in 1999,<sup>32</sup> and a third report in 2000,<sup>33</sup> both focusing on porting interval issues. The second report provided an analysis of the wireline porting interval and considered alternatives to reduce the porting interval for ports between wireless and wireline carriers.<sup>34</sup> The report recommended that each potential alternative be thoroughly developed and investigated.<sup>35</sup> The third report again analyzed the elements of the wireline porting interval and examined whether the length of the porting interval for both intermodal ports and wireline-to-wireline ports could be reduced.<sup>36</sup> The NANC determined that the wireline porting interval should not be reduced, but it was unable to reach a consensus on an intermodal porting interval.<sup>37</sup> Accordingly, we seek comment on the appropriate interval for intermodal porting.<sup>38</sup>

### B. Outstanding Petitions for Declaratory Ruling

13. On January 23, 2003, CTIA filed a petition requesting that the Commission issue a declaratory ruling that wireline carriers have an obligation to port their customers' telephone numbers to wireless carriers whose service areas overlap the wireline rate center that is associated with the number.<sup>39</sup> In its petition, CTIA claims that some LECs have narrowly construed their LNP obligations with regard to wireless carriers, taking the position that portability is only required where the wireless carrier receiving the number already has a point of presence or numbering resources in the wireline rate center.<sup>40</sup> CTIA urges the Commission to confirm that wireline carriers have an obligation to port to wireless carriers when their respective service areas overlap. CTIA notes that, in several of its decisions, the Commission has found that LNP is necessary to promote competition between the wireless and wireline

<sup>40</sup> *Id.* at 3.

industries. CTIA argues that, without Commission action to resolve the deadlock over the rate center disparity issue, the reality of wireline-to-wireless porting will be at risk because many wireline subscribers will be unable to port their numbers to wireless carriers that serve their areas.<sup>41</sup>

14. CTIA also requests that the Commission confirm that a wireline carrier's obligation to port numbers to a wireless carrier can be based on a service-level porting agreement between the carriers, and does not require an interconnection agreement. According to CTIA, number portability requires only that a carrier release a customer's number to another carrier and assign the number to the new carrier in the Number Portability Administration Center (NPAC) database, which is queried solely to identify the carrier that can terminate calls to the customer.<sup>42</sup>

15. The majority of wireless carriers submitting comments support CTIA's request for declaratory ruling. They agree with CTIA that, without Commission action to resolve the rate center issue, the majority of wireline customers will be prevented from porting their number to a wireless carrier.<sup>43</sup> They call for the Commission to reject any proposal that would restrict porting to rate centers where a wireless carrier has already obtained numbers, contending that such a limitation would be inconsistent with the competitive objectives of intermodal LNP and would waste numbering resources.<sup>44</sup>

16. Wireline carriers generally oppose CTIA's petition.<sup>45</sup> Some argue that requiring LECs to port to carriers who do not have a point of interconnection or numbering resources in the same rate center in which the number is assigned would give wireless carriers an unfair competitive advantage over wireline carriers.<sup>46</sup> LECs argue that, in contrast to wireless carriers who have flexibility in establishing their service areas and rates, wireline carriers are governed by state regulations. Under the state regulatory regime, they rate and route local and toll calls based on wireline rate centers. Consequently, LECs contend, wireline service providers do not have the same opportunity that wireless carriers have to offer number portability where the rate center in which the number is assigned does not match the rate center in which the LEC seeks to serve the customer.<sup>47</sup> Others argue that CTIA's petition would amount to a system of location portability rather than service provider portability, causing customer confusion over

Dortch, Secretary, FCC, CC Docket No. 95-116 (filed Oct. 9, 2003) (Qwest Oct. 9<sup>th</sup> *Ex Parte*); and Letter from Kathleen B. Levitz, Vice President-Federal Regulatory, BellSouth to Marlene H. Dortch, Secretary, FCC, CC Docket No. 95-116 (filed Sept. 9, 2003) (BellSouth Sept. 9<sup>th</sup> *Ex Parte*).

<sup>47</sup> *See, e.g.*, Letter from James C. Smith, Senior Vice President, SBC Telecommunications, Inc. to Michael K. Powell, Chairman, FCC, CC Docket No. 95-116 (filed Aug. 29, 2003) (SBC Aug. 29<sup>th</sup> *Ex Parte*); and BellSouth Sept. 9<sup>th</sup> *Ex Parte*.

the rating of calls.<sup>48</sup> Several LECs also argue that the Commission may not permit intermodal porting outside of wireline rate center boundaries without first issuing a Notice of Proposed Rulemaking.<sup>49</sup> Several rural LECs argue that requiring porting between wireline and wireless carriers where the wireless carriers do not have a point of interconnection in the same rate center as the ported number would raise intercarrier compensation issues, as wireline carriers would be required to transport calls to ported numbers through points of interconnection outside of rural LEC serving areas.<sup>50</sup>

17. On May 13, 2003, CTIA filed a second Petition for Declaratory Ruling. In its petition, CTIA argues that, in addition to the rate center issue that was the subject of its January petition, there are additional LNP implementation issues that have not been resolved by industry consensus and therefore must be addressed by the Commission.<sup>51</sup> Specifically, CTIA requests that the Commission rule on the appropriate length of the porting interval, the necessity of interconnection agreements, a dispute between BellSouth and Sprint concerning the ability of carriers to designate different routing and rating points, definition of the largest 100 Metropolitan Statistical Areas (MSAs), the bona fide request requirement, and whether carriers must support nationwide roaming for customers with ported numbers.

18. On October 7, 2003, we released a Memorandum Opinion and Order addressing carrier requests for clarification of wireless-wireless porting issues.<sup>52</sup> In response to CTIA's May 13<sup>th</sup> petition as well as a Petition for Declaratory Ruling/Application for Review, we concluded that wireless carriers may not impose "business rules" on their customers that purport to restrict carriers' obligations to port numbers upon receipt of a valid request to do so. In addition, we clarified that wireless-to-wireless porting does not require the wireless carrier receiving the number to be directly interconnected with the wireless carrier that gives up the number or to have numbering resources in the rate center associated with the ported number. We clarified that, although wireless carriers may voluntarily negotiate interconnection agreements with one another, such agreements are not required for wireless-to-wireless porting. We confirmed also that, in cases where wireless carriers are unable to reach agreement regarding the terms and conditions of porting, all such carriers must port numbers upon receipt of a valid request from another carrier, with no conditions.

19. We encouraged wireless carriers to complete "simple" ports within the industry-established two and one half hour porting interval and found that no action was necessary regarding the porting of numbers served by Type 1 interconnection because carriers are migrating these numbers to switches served by Type 2 interconnection or are otherwise developing solutions.<sup>53</sup> Finally, we reiterated the requirement that wireless carriers support roaming nationwide for customers with pooled and ported

<sup>53</sup> Type 1 numbers reside in an end office of a LEC and are assigned to a Type 1 interconnection group, which connects the wireless carrier's switch and the LEC's end office switch. Type 2 numbers reside in a wireless carrier's switch and are assigned to a Type 2 interconnection group, which connects the wireless carrier's switch and a LEC access tandem switch or end office switch.

numbers, and we addressed outstanding petitions for waiver of the roaming requirement. We indicated our intention to address issues related to intermodal porting in a separate order.<sup>54</sup>

### III. ORDER

#### A. Wireline-to-Wireless Porting

20. *Background.* In its January 23<sup>rd</sup> Petition, CTIA requests that the Commission clarify that the LNP rules require wireline carriers to port numbers to any wireless carrier whose service area overlaps the wireline carrier's rate center that is associated with the ported number.<sup>55</sup> CTIA claims that, absent such a clarification, a majority of wireline customers will not be able to port their phone number to the wireless carrier of their choice because wireless carriers typically have a point of interconnection or numbering resources in only a fraction of the wireline rate centers in their service areas.<sup>56</sup> Citing prior Commission decisions, CTIA notes that the Commission has cited intermodal competition as a basis for imposing LNP requirements on wireless carriers.<sup>57</sup> CTIA argues that the Commission's objectives with respect to intermodal competition cannot be realized without prompt action.

21. *Discussion.* The Act and the Commission's rules impose broad porting obligations on LECs. Section 251(b) of the Act provides that all local exchange carriers "have the duty to provide, to the extent technically feasible, number portability in accordance with requirements prescribed by the Commission."<sup>58</sup> The Act defines number portability as "the ability of users of telecommunications services to retain, at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another."<sup>59</sup> In implementing these requirements in the Local Number Portability *First Report and Order*, the Commission determined that LECs were required to provide portability to all other telecommunications carriers, including CMRS service providers, providing local exchange or exchange access service within the same MSA.<sup>60</sup> The Commission's rules reflect these requirements, requiring LECs to offer number portability in switches for which another carrier made a request for number portability and providing that all carriers, including CMRS service providers must be permitted to make requests for number portability.<sup>61</sup>

---

<sup>54</sup> Remaining issues from CTIA's January 23<sup>rd</sup> and May 13<sup>th</sup> petitions pertaining to intermodal porting are addressed in this order. Additional issues from CTIA's May 13<sup>th</sup> petition, including the implication of the porting interval for E911, the definition of the 100 largest MSAs, and the bona fide request requirement have been addressed separately. See Letter from John B. Muleta, Chief, Wireless telecommunications Bureau, to John T. Scott, III, Vice President and Deputy General Counsel, Verizon Wireless and Michael F. Altschul, Senior Vice President, General Counsel, CTIA, CC Docket No. 95-116, DA 03-2190, dated July 3, 2003. See also, Numbering Resource Optimization, *Fourth Report and Order and Fourth Further Notice of Proposed Rulemaking*, CC Docket Nos. 99-200 and 95-116 (rel. June 18, 2003).

<sup>55</sup> January 23<sup>rd</sup> Petition at 3.

<sup>56</sup> *Id.* at 18.

<sup>57</sup> *Id.* at 12-16.

<sup>58</sup> 47 U.S.C. § 251(b).

<sup>59</sup> 47 U.S.C. § 153(30).

<sup>60</sup> *First Report and Order* at 8393, 8431, paras. 77 and 152.

<sup>61</sup> 47 C.F.R. § 52.23(b)(1), (b)(2)(i).

22. We conclude that, as of November 24, 2003, LECs must port numbers to wireless carriers where the requesting wireless carrier's "coverage area" overlaps the geographic location of the rate center in which the customer's wireline number is provisioned, provided that the porting-in carrier maintains the number's original rate center designation following the port.<sup>62</sup> Permitting intermodal porting in this manner is consistent with the requirement that carriers support their customers' ability to port numbers while remaining at the same location. For purposes of this discussion, the wireless "coverage area" is the area in which wireless service can be received from the wireless carrier. Permitting wireline-to-wireless porting under these conditions will provide customers the option of porting their wireline number to any wireless carrier that offers service at the same location. We also reaffirm that wireless carriers must port numbers to wireline carriers within the number's originating rate center. With respect to wireless-to-wireline porting, however, because of the limitations on wireline carriers' networks ability to port-in numbers from distant rate centers, we will hold neither the wireline nor the wireless carriers liable for failing to port under these conditions. Rather, we seek comment on this issue in the Further Notice below.

23. We make our determinations based on several factors. First, as stated above, under the Act and the Commission's rules, wireline carriers must port numbers to other telecommunications carriers, to the extent that it is technically feasible to do so, in accordance with regulations prescribed by the Commission.<sup>63</sup> There is no persuasive evidence in the record indicating that there are significant technical difficulties that would prevent a wireline carrier from porting a number to a wireless carrier that does not have a point of interconnection or numbering resources in the same rate center as the ported number. Accordingly, the plain text of the Act and the Commission's rules, requiring LECs to provide number portability applies. In fact, several LECs acknowledge that there is no technical obstacle to porting wireline numbers to wireless carriers whose point of interconnection is outside of the rate center of the ported numbers.<sup>64</sup> Moreover, at least two LECs, Verizon and Sprint, have already established agreements with their wireless affiliates that specifically provide for intermodal porting.<sup>65</sup> In addition, BellSouth indicates in its comments that it has no intention of preventing customers from porting their telephone numbers to wireless carriers upon the customers' requests – regardless of whether or not the

---

<sup>62</sup> We anticipate that a minimal amount of identifying information will be transmitted from the wireless carrier to the LEC when a customer seeks to port. For example, carriers may choose to verify the zip code of the porting-out wireline customer in their validation procedures.

<sup>63</sup> 47 U.S.C. § 251(b)(2), 47 C.F.R. § 52.23.

<sup>64</sup> See BellSouth Comments on CTIA's January 23<sup>rd</sup> Petition at 3; and USTA Comments on CTIA's January 23<sup>rd</sup> Petition at 7-8.

Several interexchange carriers (IXCs) have brought to the Commission's attention a problem IXCs face in identifying whether a customer has switched carriers. This problem can result in customers receiving erroneous bills from IXCs after they have switched local or interexchange carriers, and could also be a problem when customers port from a wireline carrier to a wireless carrier. While we do not address this issue in the instant order, we have sought comment on carrier petitions regarding this matter. See Pleading Cycle Established for Comments on Petition for Declaratory Ruling and/or Rulemaking, filed by AmeriCatel Corporation, and for Comments on Joint Petition for Rulemaking to Implement Mandatory Minimum Customer Account Record Exchange Obligations on All Local and Interexchange Carriers, filed by AT&T Corp., Sprint Corp., and WorldCom, Inc., CG Docket No. 02-386, *Public Notice*, 17 FCC Rcd 25535 (2002).

<sup>65</sup> "Verizon and Verizon Wireless Reach Barrier-Free Porting Agreement in Advance of November 24 Deadline," Press Release from Verizon Wireless dated Sept. 22, 2003, available at <http://news.vzw.com/news/2003/09/pr2003-09-22.html>; and "Sprint Wireless Local Number Portability Plans on Track, on Schedule for November Deadline," Press Release from Sprint dated Oct. 1, 2003, available at [Sprint.com](http://Sprint.com).

carriers' service areas overlap.<sup>66</sup> Accordingly, BellSouth states, number portability can still occur despite the "rate center disparity" issue. We note that, to the extent that LECs assert an inability to port numbers to wireless carriers under the circumstances described herein, they bear the burden of demonstrating with specific evidence that porting to a wireless carrier without a point of interconnection or numbering resources in the same rate center to which the ported number is assigned is not technically feasible pursuant to our rules.

24. Second, neither the Commission's LNP rules nor any of the LNP orders have required wireless carriers to have points of interconnection or numbering resources in the same rate center as the assigned number for wireline-to-wireless porting. In the Local Number Portability *Second Report and Order*, the Commission adopted NANC recommendations regarding several specific aspects of number portability implementation, including technical and operational standards for the provision of number portability by wireline carriers.<sup>67</sup> In this context, the Commission adopted the NANC recommendations concerning the boundaries applicable to wireline-to-wireline porting. Specifically, the Commission adopted NANC recommendations limiting the scope of ports to wireline carriers based on wireline carriers' inability to receive numbers from foreign rate centers.<sup>68</sup>

25. In this order, we address a different issue, wireline-to-wireless porting. The NANC recommendations that were the subject of the *Second Report and Order* included a boundary for wireline-to-wireline porting, but were silent regarding wireline-to-wireless porting issues. In adopting the NANC recommendations, the Commission specifically recognized that the NANC had not included recommendations regarding wireless carriers' participation in number portability and that modifications to existing standards and procedures would probably need to be made as the industry obtained additional information about incorporating CMRS service providers into a long-term number portability solution and interconnecting CMRS carriers with wireline carriers already implementing number portability.<sup>69</sup> However, while the Commission noted that NANC should consider intermodal porting issues of concern to wireless carriers, it did not impose limits on wireline-to-wireless porting while NANC considered these issues, nor did it give up its inherent authority to interpret the statute and rules with respect to the obligation of wireline carriers to port numbers to wireless carriers. Accordingly, we find that in light of the fact that the Commission has never adopted any limits regarding wireline-to-wireless number portability, as of November 24, 2003, LECs must port numbers to wireless carriers where the requesting wireless carrier's coverage area overlaps the geographic location of the rate center to which the number is assigned.<sup>70</sup>

---

<sup>66</sup> See BellSouth Comments on CTIA's January 23<sup>rd</sup> Petition at 3. In recent ex parte filings, BellSouth argues that the Commission cannot proceed to require intermodal porting until it addresses the issues arising from the differences in network architecture, operational support systems, and regulatory requirements that distinguish wireline carriers from wireless carriers. See, e.g., BellSouth Sept. 9<sup>th</sup> *Ex Parte*.

<sup>67</sup> See *Second Report and Order*. Subsequent NANC reports address technical issues associated with wireless-to-wireline porting. In the Further Notice, we seek comment on these technical feasibility issues.

<sup>68</sup> North American Numbering Council Local Number Portability Selection Working Group Final Report and Recommendation to the FCC, Appendix D at 6 (rel. April 25, 1997). This report is available at [www.fc.gov/wcb/tapd/nanc/lnpastuf.html](http://www.fc.gov/wcb/tapd/nanc/lnpastuf.html).

<sup>69</sup> *Second Report and Order* 12 FCC Rcd at 12333-34.

<sup>70</sup> Similarly, wireless-to-wireline porting is required, as of November 24, 2003, where the requesting carrier's coverage area overlaps the geographic location of the rate center to which the number is assigned

26. We reject the argument advanced by certain wireline carriers,<sup>71</sup> that requiring LECs to port to a wireless carrier that does not have a point of interconnection or numbering resources in the same rate center as the ported number would constitute a new obligation imposed without proper notice. In fact, the requirement that LECs port numbers to wireless carriers is not a new rule. Citing the D.C. Circuit's decision in the *Sprint* case specifying the distinction between clarifications of existing rules and new rulemakings subject to APA procedures, Qwest, for example, argues that the permitting wireline-to-wireless porting in the manner outlined above would change LECs' existing porting obligations.<sup>72</sup> As described earlier, however, section 251(b) of the Act and the Commission's Local Number Portability *First Report and Order* impose broad porting obligations on wireline carriers. Specifically, these authorities require wireline carriers to provide portability to all other telecommunications carriers, including wireless service providers. While the Commission decision in the Local Number Portability *Second Report and Order* limited the scope of wireline carriers' porting obligation with respect to the boundary for wireline-to-wireline porting, the Commission, as noted above, has never established limits with respect to wireline carriers' obligation to port to wireless carriers. The clarifications we make in this order interpret wireline carriers' existing obligation to port numbers to wireless carriers. Therefore, these clarifications comply with the requirements of the Administrative Procedure Act as well as the D.C. Circuit's decision in the *Sprint* case.

27. We also reject the argument made by some LECs that the scope of wireline-to-wireless porting should be limited because wireline carriers may not be able to offer portability to certain wireless subscribers.<sup>73</sup> As discussed above, under the Act and the Commission's rules, wireline carriers must port numbers to other telecommunications carriers, to the extent technically feasible. The fact that there may be technical obstacles that could prevent some other types of porting does not justify denying wireline consumers the benefit of being able to port their wireline numbers to wireless carriers. Each type of service offers its own advantages and disadvantages (e.g., wireless service offers mobility and larger calling areas, but also the potential for dropped calls) and wireline customers will consider these attributes in determining whether or not to port their number. In our view, it would not be appropriate to prevent wireline customers from taking advantage of the mobility or the larger local calling areas associated with wireless service simply because wireline carriers cannot currently accommodate all potential requests from customers with wireless service to port their numbers to a wireline service provider. Evidence from the record shows that limiting wireline-to-wireless porting to rate centers where a wireless carrier has a point of interconnection or numbering resources would deprive the majority of wireline consumers of the ability to port their number to a wireless carrier.<sup>74</sup> With such limited intermodal porting, the competitive benefits we seek to promote through the porting requirements may not be fully achieved. The focus of the porting rules is on promoting competition, rather than protecting individual competitors. To the extent that wireline carriers may have fewer opportunities to win customers through porting, this disparity results from the wireline network architecture and state regulatory requirements, rather than Commission rules.

28. We conclude that porting from a wireline to a wireless carrier that does not have a point of interconnection or numbering resources in the same rate center as the ported number does not, in and of itself, constitute location portability, because the rating of calls to the ported number stays the same. As stated above, a wireless carrier porting-in a wireline number is required to maintain the number's original rate center designation following the port. As a result, calls to the ported number will continue to be rated

---

<sup>71</sup> See, e.g., Letter from Gary Lytle, Qwest to Marlene H. Dortch, Secretary, FCC (filed Oct. 17, 2003) (Qwest Oct. 17<sup>th</sup> *Ex Parte*); and SBC Aug. 29 *Ex Parte*.

<sup>72</sup> Qwest Oct. 17<sup>th</sup> *Ex Parte* at 11. See *Sprint Corp. v. FCC*, 315 F. 3d 369 (D.C. Cir. 2003).

<sup>73</sup> See, e.g., SBC Aug. 29<sup>th</sup> *Ex Parte* and BellSouth Sept. 9<sup>th</sup> *Ex Parte*.

<sup>74</sup> January 23<sup>rd</sup> Petition at 6.

in the same fashion as they were prior to the port. As to the routing of calls to ported numbers, it should be no different than if the wireless carrier had assigned the customer a new number rated to that rate center.<sup>75</sup>

29. Some wireline carriers contend that they lack the technical capability to support wireline-to-wireless porting in the manner outlined above, and that they need time to make technical modifications to their systems. We emphasize that our holding in this order requires wireline carriers to support wireline-to-wireless porting in accordance with this order by November 24, 2003, unless they can provide specific evidence demonstrating that doing so is not technically feasible pursuant to our rules.<sup>76</sup> We expect carriers that need to make technical modifications to do so forthwith, as the record indicates that major system modifications are not required and that several wireline carriers have already announced their technical readiness to port numbers to wireless carriers without regard to rate centers.<sup>77</sup> We recognize, however, that many wireline carriers outside the top 100 MSAs may require some additional time to prepare for implementation of intermodal portability. In addition we note that wireless carriers outside the top 100 MSAs are not required to provide LNP prior to May 24, 2004, and accordingly are unlikely to seek to port numbers from wireline carriers prior to that date. Therefore for wireline carriers operating in areas outside of the 100 largest MSAs, we hereby waive, until May 24, 2004, the requirement that these carriers port numbers to wireless carriers that do not have a point of interconnection or numbering resources in the rate center where the customer's wireline number is provisioned. We find that this transition period will help ensure a smooth transition for carriers operating outside of the 100 largest MSAs and provide them with sufficient time to make necessary modifications to their systems.

30. Carriers inside the 100 largest MSAs (or outside the 100 largest MSAs, after the transition period) may file petitions for waiver of their obligation to port numbers to wireless carriers, if they can provide substantial, credible evidence that there are special circumstances that warrant departure from existing rules.<sup>78</sup> We note that several wireline carriers have already filed requests for waiver.<sup>79</sup> We will

---

<sup>75</sup> As noted in paras. 39-40 below, there is a dispute as to which carrier is responsible for transport costs when the routing point for the wireless carrier's switch is located outside the wireline local calling area in which the number is rated. See Sprint Petition for Declaratory Ruling. The existence of this dispute over transport costs does not, however, provide a reason to delay or limit the availability of porting from wireline to wireless carriers.

We recognize that the Act limits wireline carriers' ability to route calls outside of Local Access Transport Area (LATA) boundaries. See 47 U.S.C. § 272. See also, Application by SBC Communications, Inc., Southwestern Bell Telephone, and Southwestern Bell Communications, Inc. d/b/a Southwestern Bell Long Distance Pursuant to Section 271 of the Telecommunications Act of 1996 to Provide In-Region, InterLATA Services in Texas, *Memorandum Opinion and Order*, 15 FCC Rcd 18354 (2000). Accordingly, we clarify that our ruling is limited to porting within the LATA where the wireless carrier's point of interconnection is located, and does not require or contemplate porting outside of LATA boundaries.

<sup>76</sup> 47 U.S.C. § 251(b). We anticipate that, as a general matter, enforcement issues regarding both wireless-wireless and wireless-wireline local number portability at this time are likely to be better addressed in the context of Section 208 formal compliant proceedings or related mediations as opposed to FCC-initiated forfeiture proceedings. In this connection, we note that a violation of our number portability rules would constitute an unjust and unreasonable practice under section 201(b) of the Act.

<sup>77</sup> We note that Verizon has already announced its intention to port numbers without regard to rate centers. See "Verizon and Verizon Wireless Reach Barrier-Free Porting Agreement in Advance of November 24 Deadline," Press Release from Verizon Wireless dated Sept. 22, 2003, available at <http://news.vzw.com/news/2003/09/pr2003-09-22.html>.

<sup>78</sup> 47 C.F.R. § 1.3, 52.25(e). See also *WAIT Radio v. FCC*, 418 F.2d 1153, 1158 (D.C. Cir. 1969), *cert. denied*, 409 U.S. 1027 (1972).

consider these requests separately, and our decision in this order is without prejudice to any potential disposition of these requests.

### B. Interconnection Agreements

31. *Background.* In its January 23<sup>rd</sup> petition, CTIA requests that the Commission confirm that a wireline carrier's obligation to port numbers to a wireless carrier requires only that a carrier release a customer's number to another carrier and assign the number to the new carrier in the Number Portability Administration Center (NPAC) database, which is queried solely to identify the carrier that can terminate calls to the customer. From a practical perspective, CTIA contends, such porting can be based on a service-level porting agreement between carriers, and does not require direct interconnection or an interconnection agreement. Moreover, CTIA argues, because the Commission imposed number portability requirements on wireless carriers pursuant to its authority under sections 1, 2, 4(i), and 332 of the Act, and outside the scope of sections 251 and 252, number portability between wireline and wireless carriers is governed by a different regime than number portability between wireline carriers and is subject to the Commission's unique jurisdiction over wireless carriers.<sup>80</sup>

32. A number of wireless carriers agree with CTIA, arguing that requiring wireless carriers to establish interconnection agreements with wireline carriers from whom they sought to port numbers would delay LNP implementation.<sup>81</sup> Several wireline carriers, however, assert that interconnection agreements for porting are necessary.<sup>82</sup> SBC, for example, argues that under sections 251 and 252 of the Act, LECs must establish interconnection agreements for porting.<sup>83</sup> SBC contends that interconnection agreements guarantee parties their right to negotiate, provide a means of resolving disputes, and allow public scrutiny of agreements.<sup>84</sup> In addition, some LECs argue that, without interconnection agreements, they have no means to ensure that they will receive adequate compensation for transporting and terminating traffic to wireless carriers.

33. Other LECs, on the other hand, disagree that interconnection agreements are a necessary precondition to intermodal porting. Verizon contends that intermodal porting is not a Section 251 requirement and is therefore not necessary to incorporate wireless-wireline porting into Section 251 agreements.<sup>85</sup> AT&T questions whether either service level agreements or interconnection agreements are necessary, contending that because such little information needs to be exchanged between carriers for porting, less formal arrangements may be sufficient.<sup>86</sup> Sprint argues that interconnection agreements are

<sup>82</sup> See Missouri Independent Telephone Company Group Comments on CTIA's May 13<sup>th</sup> Petition; National Telecommunications Cooperative Association Comments on CTIA's May 13<sup>th</sup> Petition; and SBC Comments on CTIA's May 13<sup>th</sup> Petition.

<sup>83</sup> SBC Comments on CTIA's May 13<sup>th</sup> Petition at 8.

<sup>84</sup> *Id.*

<sup>85</sup> Sprint Comments on CTIA's May 13<sup>th</sup> Petition at 18; Verizon Comments on CTIA's May 13<sup>th</sup> Petition at 10.

<sup>86</sup> AT&T Reply Comments on CTIA's May 13<sup>th</sup> Petition at 7-8.

not required for LNP because whether or not a customer ports a number from one carrier to another has nothing to do with the interconnection arrangements two carriers use for the exchange of traffic.<sup>87</sup> Several LECs urge the Commission to let carriers determine on their own what type of agreement to use to facilitate porting.<sup>88</sup>

34. *Discussion.* We find that wireless carriers need not enter into section 251 interconnection agreements with wireline carriers solely for the purpose of porting numbers. We note that the intermodal porting obligation is also based on the Commission's authority under sections 1, 2, 4(i) and 332 of the Act. Sprint argues that interconnection agreements are not required to implement every section 251 obligation.<sup>89</sup> Sprint also claims that because porting involves a limited exchange of data (e.g., carriers need only share basic contact and technical information sufficient to allow porting functionality and customer verification to be established), interconnection agreements should not be required here.<sup>90</sup> We agree with Sprint that wireline carriers should be required to port numbers to wireless carriers without necessarily entering into an interconnection agreement because this obligation can be discharged with a minimal exchange of information. We thus find that wireline carriers may not unilaterally require interconnection agreements prior to intermodal porting. Moreover, to avoid any confusion about the applicability of section 252 to any arrangement between wireline and wireless carriers solely for the purpose of porting numbers, we forbear from these requirements as set forth below.

35. To the extent that the *Qwest Declaratory Ruling Order* could be interpreted to require any agreement pertaining solely to wireline-to-wireless porting to be filed as an interconnection agreement with a state commission pursuant to sections 251 and 252 of the Act, we forbear from those requirements. First, we conclude that interconnection agreements are not necessary to prevent unjust or unreasonable charges or practices by wireless carriers with respect to porting. The wireless industry is characterized by a high level of competition between carriers. Although states do not regulate the prices that wireless carriers charge, the prices for wireless service have declined steadily over the last several years.<sup>91</sup> No evidence suggests that requiring interconnection agreements for intermodal porting is necessary for this trend to continue.

36. For similar reasons, we find that interconnection agreements for intermodal porting are not necessary for the protection of consumers.<sup>92</sup> The intermodal LNP requirement is intended to benefit

<sup>89</sup> See note 87.

<sup>90</sup> Sprint's profile information exchange process is an example of the type of contact and technical information that would trigger an obligation to port. See, Letter from Luisa L. Lancetti, Vice President PCS Regulatory Affairs, Sprint Corp. to John B. Muleta, Chief, Wireless Telecommunications Bureau (filed Sept. 23, 2003); and Letter from Luisa L. Lancetti, Vice President, PCS Regulatory Affairs, Sprint Corp. to John B. Muleta, Chief, Wireless Telecommunications Bureau and William Maher, Chief, Wireline Competition Bureau (filed August 8, 2003).

<sup>91</sup> Implementation of Section 6002(b) of the Omnibus Reconciliation Act of 1993, Annual Report and Analysis of Competitive Market Conditions with Respect to Commercial Mobile Services, *Eighth Report*, FCC 03-150, at 45 (rel. July 14, 2003).

<sup>92</sup> Certain LECs have expressed concern that without interconnection agreements between LECs and CMRS carriers, calls to ported numbers may be dropped, because NPAC queries may not be performed for customers who have ported their numbers from a LEC to a CMRS carrier. See Letter from Mary J. Sisak, Counsel for Centurytel, Inc. to Marlene H. Dortch, Secretary, FCC (filed Oct. 23, 2003). We do not find these concerns to be justified,

consumers by promoting competition between the wireless and wireline industries and creating incentives for carriers to provide new service offerings, reduced prices, and higher quality services. Requiring interconnection agreements for the purpose of intermodal porting could undermine the benefits of LNP to consumers by preventing or delaying implementation of intermodal porting. We also do not believe that the state regulatory oversight mechanism provided by Section 251 is necessary to protect consumers in this limited instance.

37. Finally, we conclude that forbearance is consistent with the public interest. Number portability, by itself, does not create new obligations with regard to exchange of traffic between the carriers involved in the port. Instead, porting involves a limited exchange of data between carriers to carry out the port. Sprint, for example, notes that to accomplish porting, carriers need only exchange basic contact information and connectivity details, after which the port can be rapidly accomplished.<sup>93</sup> Given the limited data exchange and the short time period required to port, we conclude that interconnection agreements approved under section 251 are unnecessary. In view of these factors, we conclude that it is appropriate to forbear from requiring interconnection agreements for intermodal porting.

### C. The Porting Interval

38. CTIA requests that the Commission require wireline carriers to reduce the length of the porting interval, or the amount of time it takes two carriers to complete the process of porting a number, for ports from wireline to wireless carriers.<sup>94</sup> Currently, the wireline-to-wireline porting interval is four business days.<sup>95</sup> The wireline porting interval was adopted by the NANC in its Architecture and Administrative Plan for Local Number Portability, which was approved by the Commission.<sup>96</sup> Upon subsequent review of the porting interval, the NANC agreed that the four business day porting interval for wireline-to-wireline porting should not be reduced; it did not specify a porting interval for intermodal porting.<sup>97</sup> The current porting interval for wireless-to-wireless ports is two and one half hours.<sup>98</sup> We decline to require wireline carriers to follow a shorter porting interval for intermodal ports at this time. Instead, we will seek comment on this issue in the Further Notice. We note that, while we seek comment on whether to reduce the length of the wireline porting interval, the current four business day porting

---

however, because the Commission's rules require carriers to correctly route calls to ported numbers. See Telephone Number Portability, CC Docket No. 95-116, *First Memorandum Opinion and Order on Reconsideration*, 12 FCC Rcd 7236, 7307-08, paras. 125-126.

<sup>93</sup> Sprint Comments on CTIA's May 13<sup>th</sup> Petition at 13-14.

<sup>94</sup> May 13<sup>th</sup> Petition at 7.

<sup>95</sup> Wireline carriers are required to complete the LSR/FOC exchange within 24 hours and complete the port within three business days thereafter. See North American Numbering Council Local Number Portability Selection Working Group Final Report and Recommendation to the FCC, Appendix E (rel. April 25, 1997).

<sup>96</sup> *Second Report and Order*, 12 FCC Rcd 12281 (1997)

<sup>97</sup> Letter from John R. Hoffman, NANC Chair to Dorothy Attwood, Chief, Common Carrier Bureau, (filed Nov. 29, 2000).

<sup>98</sup> See North American Numbering Council Local Number Portability Administration Working Group Report on Wireless Wireline Integration, May 8, 1998, CC Docket No. 95-116 (filed May 18, 1998) (First Report on Wireless Wireline Integration); North American Numbering Council Wireless Number Portability Subcommittee Report on Wireless Number Portability Technical, Operational, and Implementation Requirements Phase II, CC Docket No. 95-116 (filed Sept. 26, 2000); ATIS Operations and Billing Forum, Wireless Intercarrier Communications: Interface Specification for Local Number Portability, Version 2, at § 2 p. 6 (Jan. 2003).

interval represents the outer limit of what we would consider to be a reasonable amount of time in which wireline carriers may complete ports. We note also that whatever porting interval affiliated wireline and wireless service providers offer within their corporate family must also be made available to unaffiliated service providers.<sup>99</sup>

#### D. Impact of Designating Different Routing and Rating Points on LNP

39. CTIA asks the Commission to resolve the intercarrier dispute between BellSouth and Sprint as it affects the rating and routing of calls to ported numbers.<sup>100</sup> CTIA contends that, although the dispute largely concerns matters of intercarrier compensation, to the extent LECs argue that they need not differentiate between rating and routing points for local calls, intermodal porting may not be available to consumers.<sup>101</sup> To ensure that permitting porting beyond wireline rate center boundaries does not cause customer confusion with respect to charges for calls, we clarify that ported numbers must remain rated to their original rate center. We note, however, that the routing will change when a number is ported. Indeed, several wireline carriers have expressed concern about the transport costs associated with routing calls to ported numbers. The National Exchange Carrier Association (NECA) and National Telecommunications Cooperative Association (NTCA), for example, argue in their joint comments, that when wireless carriers establish a point of interconnection outside of a rural LEC's serving area, a disproportionate burden is placed on rural LECs to transport originating calls to the interconnection points.<sup>102</sup> They argue that requiring wireline carriers to port telephone numbers to out-of-service area points of interconnection could create an even bigger burden. Other carriers point out, however, that issues associated with the rating and routing of calls to ported numbers are the same as issues associated with rating and routing of calls to all wireless numbers.<sup>103</sup>

40. We recognize the concerns of these carriers, but find that they are outside the scope of this order. As noted above, our declaratory ruling with respect to wireline-to-wireless porting is limited to ported numbers that remain rated in their original rate centers. We make no determination, however, with respect to the routing of ported numbers, because the requirements of our LNP rules do not vary depending on how calls to the number will be routed after the port occurs. Moreover, as CTIA notes, the rating and routing issues raised by the rural wireline carriers have been raised in the context of non-ported numbers and are before the Commission in other proceedings.<sup>104</sup> Therefore, without prejudging the outcome of any other proceeding, we decline to address these issues at this time as they relate to intermodal LNP.

### IV. FURTHER NOTICE OF PROPOSED RULEMAKING

#### A. Wireless-to-Wireline Porting

41. *Background.* As noted above, some LECs argue that allowing wireless carriers to port numbers wherever their coverage area overlaps the rate center in which the number is assigned would

---

<sup>99</sup> 47 U.S.C. §§ 201(b) and 202(a).

<sup>100</sup> May 13<sup>th</sup> Petition at 25-26.

<sup>101</sup> *Id.*

<sup>102</sup> NECA and NTCA Comments on CTIA's January 23<sup>rd</sup> Petition at 6.

<sup>103</sup> BellSouth Comments on CTIA's May 13<sup>th</sup> Petition at 11-12.

<sup>104</sup> *See, e.g.* In the Matter of Sprint Petition for Declaratory Ruling, Obligation of Incumbent LECs to Load Numbering Resources Lawfully Acquired and to Honor Routing and Rating Points Designated by Interconnecting Carriers, Sprint Petition for Declaratory Ruling, CC Docket No. 01-92 (filed July 18, 2002).

give wireless service providers an unfair competitive advantage over wireline carriers.<sup>105</sup> They contend that while this may facilitate widespread wireline-to-wireless porting, wireless-to-wireline porting can only occur in cases where the wireless customer is physically located in the wireline rate center associated with the phone number.<sup>106</sup> If the customer's physical location is outside the rate center associated with the number, porting the number to a wireline telephone at the customer's location could result in calls to and from that number being rated as toll calls. As a result, the LECs assert, they are effectively precluded from offering wireless-to-wireline porting to those wireless subscribers who are not located in the wireline rate center associated with their wireless numbers.<sup>107</sup> Furthermore, the LECs contend that for them to offer wireless-to-wireline porting in this context would require significant and costly operational changes.<sup>108</sup> Qwest, for example, argues that if the Commission were to make the Local Access Transport Area (LATA) or Numbering Plan Area (NPA) the relevant geographic area for porting, LECs would be required to upgrade switches, increase trunking, and rework billing and provisioning systems.<sup>109</sup>

42. *Discussion.* We seek comment on how to facilitate wireless-to-wireline porting where there is a mismatch between the rate center associated with the wireless number and the rate center in which the wireline carrier seeks to serve the customer. Some wireline commenters contend that requiring porting between wireline and wireless carriers where the wireless carrier does not have a point of interconnection or numbering resources in the rate center creates a competitive disparity because wireline carriers would not have the same flexibility to offer porting to wireless customers whose numbers are not associated with the wireline rate center. We seek comment on the technical impediments associated with requiring wireless-to-wireline LNP when the location of the wireline facilities serving the customer requesting the port is not in the rate center where the wireless number is assigned. We seek comment on whether technical impediments exist to such an extent as to make wireless-to-wireline porting under such circumstances technically infeasible. Commenters that contend there are technical implications should specifically describe them, including any upgrades to switches, network facilities, or operational support systems that would be necessary. Commenters should also provide detailed information on the magnitude of the cost of such upgrades along with documentation of the estimated costs. We also seek comment on whether the benefits associated with offering wireless-to-wireline porting would outweigh the costs associated with making any necessary upgrades. We seek comment on the expected demand for wireless-to-wireline porting. We note that wireline customers who decide to port their numbers to wireless carriers are able to port their numbers back to wireline carriers if they choose, because the numbers remain associated with their original rate centers.

43. In addition to technical factors, we seek comment on whether there are regulatory requirements that prevent wireline carriers from porting wireless numbers when the rate center associated with the number and the customer's physical location do not match. Commenters that suggest such obstacles exist and result in a competitive disadvantage should submit proposals to address these impediments, as well as consider the collateral effect on other regulatory objectives as a result of these proposals. We note that wireline carriers are not able to port a number to another wireline carrier if the rate center associated with the number does not match the rate center associated with the customer's

---

<sup>105</sup> See, e.g., Centurytel Comments on CTIA's January 23<sup>rd</sup> Petition at 5-6; Fred Williams & Associates Comments on CTIA's January 23<sup>rd</sup> Petition at 8; and SBC Comments on CTIA's January 23<sup>rd</sup> Petition at 1.

<sup>106</sup> See, e.g., Qwest Oct. 9<sup>th</sup> *Ex Parte*; and Letter from Herschel L. Abbott, Jr., Vice President-Government Affairs, BellSouth to Michael K. Powell, Chairman, FCC (filed Oct. 14, 2003).

<sup>107</sup> *Id.*

<sup>108</sup> See Letter from Cronan O'Connell, Vice President-Federal Regulatory, Qwest to Marlene H. Dortch, Secretary, FCC (filed July 24, 2003) at 4-5 (Qwest July 24<sup>th</sup> *Ex Parte*); and SBC Aug. 29<sup>th</sup> *Ex Parte*.

<sup>109</sup> See Qwest July 24<sup>th</sup> *Ex Parte* at 4-5.

physical location. We seek comment on whether wireless and wireline numbers should be treated differently in this regard. We also seek comment on whether there are any potential adverse impacts to consumers resulting from wireless-to-wireline porting where the rate center associated with the wireless number is different from the rate center in which the wireline carrier seeks to serve the customer.

44. In addition, we seek comment on whether there are other competitive issues that could affect our LNP requirements. For example, to the extent that wireless-to-wireline porting may raise issues regarding the rating of calls to and from the ported number when the rate center of the ported number and the physical location of the customer do not match, we seek comment on the extent to which wireline carriers should absorb the cost of allowing the customer with a number ported from a wireless carrier to maintain the same local calling area that the customer had with the wireless service provider. Alternatively, we seek comment on the extent to which wireline carriers can serve customers with numbers ported from wireless carriers on a Foreign Exchange (FX) or virtual FX basis.<sup>110</sup> A third option is for wireline carriers to seek rate design and rate center changes at the state level to establish larger wireline local calling areas. We seek comment on the procedural, technical, financial, and regulatory implications of each of these approaches. We also seek comment on the viability of each of these approaches and whether there are any alternative approaches to consider.

## B. Porting Interval

45. *Background.* Over the past several years, the NANC has studied the wireline porting interval and reviewed options for reducing the length of the interval for simple ports.<sup>111</sup> In the Third Report on Wireless/Wireline Integration, the Local Number Portability Administration Working Group analyzed the elements of the wireline porting interval and investigated how reducing the length of the interval for simple ports would affect carriers' operations.<sup>112</sup> The report noted that reducing the porting interval would require wireline carriers to make significant changes to their operations. First, reducing the porting interval would require wireline carriers to automate and make uniform the Local Service Request (LSR)/Local Service Request Confirmation (LSC) Firm Order Confirmation (FOC) process.<sup>113</sup> In addition, the report indicated that wireline carriers would likely have to eliminate or adjust their batch processing operations. The report noted that a change from batch processing to real time data processing would require in-depth system analysis of all business processes that use batch processing systems.<sup>114</sup> Based on its analysis of these and other challenges, the working group concluded that because most wireline carriers already found their processes and systems challenged to meet the current porting interval it was not feasible to reduce the length of the wireline porting interval for simple ports.<sup>115</sup>

46. Because of the number and complexity of changes that would be required in the porting process for wireline carriers, the NANC was not able to reach consensus on reducing the porting interval

---

<sup>110</sup> T-Mobile Comments on CTIA's January 23<sup>rd</sup> Petition at 11.

<sup>111</sup> See Second Report on Wireless Wireline Integration; Third Report on Wireless Wireline Integration.

<sup>112</sup> See Third Report on Wireless Wireline Integration. Simple ports are defined as those ports that: do not involve unbundled network elements, involve an account for a single line (porting a single line from a multi-line account is not a simple port), do not include complex switch translations (e.g., Centrex or Plexar, ISDN, AIN services, remote call forwarding, multiple services on the loop), may include CLASS features such as Caller ID, and do not include a reseller. All other ports are considered "complex" ports. *Id.* at 6.

<sup>113</sup> *Id.* at 13.

<sup>114</sup> *Id.* at 13-14.

<sup>115</sup> *Id.* at 14.

to accommodate intermodal porting.<sup>116</sup> The wireless industry expressed concern that the wireline four business day porting interval does not fit within its business model.<sup>117</sup> In order to accommodate the wireless business model, the NANC attempted to shorten the porting interval for wireline-to-wireless ports by developing a process that will allow the wireless carrier to activate the port before the wireline carrier activates the disconnect in the Number Portability Administration Center (NPAC). This process results in a situation referred to as a “mixed service” condition, whereby the customer can make calls on both the wireline and wireless phones before the port is completed. The NANC reported that this mixed service condition can result in misdirected callbacks in an emergency situation.<sup>118</sup> That is, for example, if the emergency operator attempts to callback a person that made a call from the wireless phone, the call may be routed to the wireline phone. The NANC consulted with the National Emergency Number Association and concluded that, while the mixed service condition is not desirable, the incidence of such is low and would not impede intermodal porting.<sup>119</sup>

47. LECs contend that their current porting interval cannot be reduced readily for intermodal porting, because it is necessary to support the complex systems and procedures of wireline carriers.<sup>120</sup> SBC, for example, explains that the current porting interval not only ensures that the porting out carrier correctly ports a number to the porting in carrier, but also that these carriers accurately update other systems, including E911, billing, and maintenance.<sup>121</sup> Qwest notes that wireline carriers have longer porting intervals due to differences in network and system configurations.<sup>122</sup> Qwest indicates that wireline carriers are often constrained by the provisioning of physical facilities (e.g., loops) to serve customers.<sup>123</sup> Moreover, LECs contend, reducing the length of the current wireline porting interval would require them to make changes to many of their systems and would involve significant expense.<sup>124</sup>

48. Wireless carriers argue that a reduced intermodal porting interval would encourage more consumers to use porting by eliminating confusion about the porting process.<sup>125</sup> They argue that a reduced porting interval is technically achievable and that wireline carriers should be required to make the

<sup>116</sup> Letter from John R. Hoffman, NANC Chair to Dorothy Attwood, Chief, Common Carrier Bureau (filed Nov. 29, 2000).

<sup>117</sup> Wireline carriers are required to complete the LSR/FOC exchange within 24 hours and complete the port within three business days thereafter. See North American Numbering Council Local Number Portability Selection Working Group Final Report and Recommendation to the FCC, Appendix E (rel. April 25, 1997). See also Letter from John R. Hoffman, NANC Chair to Dorothy Attwood, Chief, Common Carrier Bureau (filed Nov. 29, 2000).

<sup>118</sup> See Second Report on Wireless Wireline Integration.

<sup>119</sup> See Letter from John R. Hoffman, Chair, NANC to Dorothy Attwood, Chief, Common Carrier Bureau, FCC, dated Nov. 29, 2000.

<sup>120</sup> See letter from Kathleen Levitz, Vice President-Federal Regulatory, BellSouth to Marlene H. Dortch, Secretary, FCC, dated Oct. 15, 2003.

<sup>121</sup> SBC Aug. 29<sup>th</sup> *Ex Parte*.

<sup>122</sup> Qwest Comments on CTIA’s May 13<sup>th</sup> Petition at 7.

<sup>123</sup> *Id.*

<sup>124</sup> *Id.* at 5.

<sup>125</sup> See, e.g., AT&T Wireless Comments on CTIA’s May 13<sup>th</sup> Petition at 3-6; Sprint Comments on CTIA’s May 13<sup>th</sup> Petition at 6-12; and T-Mobile Comments on CTIA’s May 13<sup>th</sup> Petition at 7-9.

necessary changes to their systems. At least one wireless carrier recognizes, however, that significant changes to LEC systems may be required to achieve reduced porting intervals.<sup>126</sup>

49. *Discussion.* Reducing the porting interval could benefit consumers by making it quicker for consumers to port their numbers. To that end, wireless carriers intend to complete intramodal wireless ports within two and one-half hours.<sup>127</sup> There, however, may be technical or practical impediments to requiring wireline carriers to achieve shorter porting intervals for intermodal porting. We seek comment on whether we should reduce the current wireline four business day porting interval for intermodal porting. If so, what porting interval should we adopt? Commenters proposing a shorter porting interval should specify what adjustments should be made to the LNP process flows developed by the NANC.<sup>128</sup> For example, the wireline NANC LNP Process Flows establish that the FOC must be finalized within 24 hours of receiving the port request.<sup>129</sup> Specific time periods are also established for other steps within the porting process that may require adjustment in the event that a shorter porting interval is adopted.

50. We also seek comment on whether adjustments to the NPAC processes, including interfaces and porting triggers, would be required.<sup>130</sup> In addition, we seek comment on the risks, if any, associated with reducing the porting interval for intermodal porting. We seek comment on an appropriate transition period in the event a shorter porting interval is adopted, during which time carriers can modify and test their systems and procedures.

51. We seek input from the NANC on reducing the interval for intermodal porting. The NANC recommendation should include corresponding updates to the NANC LNP process flows and any recommendations on an appropriate transition period. The NANC should provide its recommendations promptly as we intend to review the record and address this issue expeditiously.

## V. PROCEDURAL MATTERS

### A. Initial Regulatory Flexibility Analysis

52. As required by the Regulatory Flexibility Act, *see* 5 U.S.C. § 603, the Commission has prepared an Initial Regulatory Flexibility Analysis ("IRFA") of the possible significant economic impact on small entities of the proposals suggested in the *Further Notice*. The IRFA is set forth in Appendix B. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments filed in response to the *Further Notice*, and must have a separate and distinct heading designating them as responses to the IRFA.

---

<sup>126</sup> See Sprint Comments on CTIA's May 13<sup>th</sup> Petition.

<sup>127</sup> See First Report on Wireless Wireline Integration; North American Numbering Council Wireless Number Portability Subcommittee Report on Wireless Number Portability Technical, Operational, and Implementation Requirements Phase II, CC Docket No. 95-116 (filed Sept. 26, 2000); and ATIS Operations and Billing Forum, Wireless Intercarrier Communications: Interface Specification for Local Number Portability, Version 2, at § 2 p. 6 (Jan. 2003).

<sup>128</sup> See Local Number Portability Selection Working Group Final Report and Recommendation to the FCC (rel. April 25, 1997).

<sup>129</sup> FOC, or Firm Order Confirmation refers to the response the old service provider sends to the new service provider upon receiving the new service provider's request to port a number, setting a due time and date for the port. See Local Number Portability Selection Working Group Final Report and Recommendation to the FCC (rel. April 25, 1997).

<sup>130</sup> The NPAC, administered by NeuStar, operates and maintains the centralized databases associated with LNP. Interaction with the NPAC is required for all porting transactions.

## B. Paperwork Reduction Analysis

53. This *Further Notice* contains no new or revised information collections.

## C. Ex Parte Presentations

54. This is a permit-but-disclose notice and comment rule making proceeding. Members of the public are advised that ex parte presentations are permitted, provided they are disclosed under the Commission's Rules.<sup>131</sup>

## D. Comment Dates

55. Pursuant to Sections 1.415 and 1.419 of the Commission's Rules, 47 C.F.R. §§ 1.415 and 1.419, interested parties may file comments on or before twenty (20) days from the date of publication of this *Further Notice* in the Federal Register and reply comments thirty (30) days from the date of publication of this *Further Notice* in the Federal Register. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS) or by filing paper copies.

56. Comments filed through the ECFS can be sent as an electronic file via the Internet to <http://www.fcc.gov/e-file/ecfs.html>. Generally, only one copy of an electronic submission must be filed. If multiple docket or rulemaking numbers appear in the caption of this proceeding, however, commenters must transmit one electronic copy of the comments to each docket or rule making number referenced in the caption. In completing the transmittal screen, commenters should include their full name, U.S. Postal Service mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by Internet e-mail. To get filing instructions for e-mail comments, commenters should send an E-mail to [ecfs@fcc.gov](mailto:ecfs@fcc.gov), and should including the following words in the body of the message, "get form <your e-mail address>." A sample form and directions will be sent in reply.

57. Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rule making number appear in the caption of this proceeding, commenters must submit two additional copies for each additional docket or rule making number. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail (although we continue to experience delays in receiving U.S. Postal Service mail). The Commission's contractor, Natek, Inc., will receive hand-delivered or messenger-delivered paper filings for the Commission's Secretary at 236 Massachusetts Avenue, N.E., Suite 110, Washington, DC 20002. The filing hours at this location are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building. Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743. U.S. Postal Service first-class mail, Express Mail, and Priority Mail should be addressed to 445 12th Street, SW, Washington, DC 20554. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center of the Federal Communications Commission, Room TW-A306, 445 12th Street, S.W., Washington, D.C. 20554.

58. Parties who choose to file by paper should also submit their comments on diskette. These diskettes should be submitted to the Commission's Secretary, Marlene H. Dortch, Office of the Secretary, Federal Communications Commission. The Commission's contractor, Natek, Inc., will receive hand-delivered or messenger-delivered diskette filings for the Commission's Secretary at 236 Massachusetts Avenue, N.E., Suite 110, Washington, DC 20002. The filing hours at this location are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be

<sup>131</sup> See generally 47 C.F.R. §§ 1.1202, 1.1203, 1.1206(a).

disposed of before entering the building. Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743. U.S. Postal Service first-class mail, Express Mail, and Priority Mail should be addressed to: 445 12th Street, SW, Washington, DC 20554. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission. Such a submission should be on a 3.5-inch diskette formatted in an IBM compatible format using Word for Windows or compatible software. The diskette should be accompanied by a cover letter and should be submitted in "read only" mode. The diskette should be clearly labeled with the commenter's name, the docket number of this proceeding, type of pleading (comment or reply comment), date of submission, and the name of the electronic file on the diskette. The label should also include the following phrase "Disk Copy - Not an Original." Each diskette should contain only one party's pleading, preferably in a single electronic file. In addition, commenters must send diskette copies to the Commission's copy contractor, Qualex International, Portals II, 445 12th Street, S.W., Room CY-B402, Washington, D.C. 20554.

59. Accessible formats (computer diskettes, large print, audio recording and Braille) are available to persons with disabilities by contacting Brian Millin, of the Consumer & Governmental Affairs Bureau, at (202)418-7426, TTY (202) 418-7365, or at [bmillin@fcc.gov](mailto:bmillin@fcc.gov). This Further Notice can be downloaded in ASCII Text format at: <http://www.fcc.gov/wtb>.

#### **E. Further Information**

60. For further information concerning this Further Notice of Proposed Rulemaking, contact: Jennifer Salhus, Attorney Advisor, Policy Division, Wireless Telecommunications Bureau, at (202) 418-1310 (voice) or (202) 418-1169 (TTY) or Pam Slipakoff, Attorney Advisor, Telecommunications Access Policy Division, Wireline Competition Bureau at (202) 418-1500 (voice) or (202) 418-0484 (TTY).

#### **VI. ORDERING CLAUSES**

61. Accordingly, IT IS ORDERED THAT, pursuant to sections 4(i) and 10 of the Communications Act of 1934, as amended, 47 U.S.C. sections 154(i) and 160, the Petitions for Declaratory Ruling filed by CTIA on January 23, 2003, and May 13, 2003, are GRANTED to the extent stated herein.

62. IT IS FURTHER ORDERED that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, SHALL SEND a copy of this Notice, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

## APPENDIX B

**Initial Regulatory Flexibility Analysis  
Further Notice of Proposed Rulemaking  
CC Docket No. 95-116**

1. As required by the Regulatory Flexibility Act, as amended (RFA),<sup>132</sup> the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this Further Notice of Proposed Rulemaking (Further Notice), CC Docket No. 95-116. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the Further Notice. The Commission will send a copy of the Further Notice, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration. *See* 5 U.S.C. § 603(a). In addition, the Further Notice and IRFA (or summaries thereof) will be published in the *Federal Register*.<sup>133</sup>

**A. Need for, and Objectives of, the Proposed Rules**

2. The Further Notice seeks comment on how to facilitate wireless-to-wireline porting where the rate center associated with the wireless number and the rate center in which the wireline carrier seeks to serve the customer do not match. The Further Notice also seeks comment on whether the Commission should reduce the current four-business day porting interval for intermodal porting.

**B. Legal Basis for Proposed Rules**

3. The proposed action is authorized under Section 52.23 of the Commission's rules, 47 C.F.R. § 52.23, and in Sections 1, 3, 4(i), 201, 202, 251 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 153, 154(i), 201-202, and 251.

**C. Description and Estimate of the Number of Small Entities To Which the Proposed Rules Will Apply**

4. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted.<sup>134</sup> The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."<sup>135</sup> In addition, the term "small business" has the same meaning as the term "small business concern" under Section 3 of the Small Business Act.<sup>136</sup> Under the Small business Act, a "small business concern" is one that: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established

---

<sup>132</sup> *See* 5 U.S.C. § 603. The RFA, *see* 5 U.S.C. §§ 601-612, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Pub. L. No. 104-121, Title II, 110 Stat. 857 (1996).

<sup>133</sup> *See* 5 U.S.C. § 603(a)

<sup>134</sup> *See* 5 U.S.C. § 603(b)(3).

<sup>135</sup> 5 U.S.C. § 601(6).

<sup>136</sup> 5 U.S.C. § 601(3) (incorporating by reference the definition of "small business concern" in the Small Business Act, 15 U.S.C. § 632). Pursuant to 5 U.S.C. § 601(3), the statutory definition of a small business applies "unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definitions(s) in the Federal Register."

by the Small Business Administration (SBA).<sup>137</sup> A small organization is generally "any not-for-profit enterprise which is independently owned and operated and is not dominant in its field."<sup>138</sup> Nationwide, as of 1992, there were approximately 275,801 small organizations.<sup>139</sup>

**5. Incumbent Local Exchange Carriers.** We have included small incumbent local exchange carriers LECs in this RFA analysis. As noted above, a "small business" under the RFA is one that, *inter alia*, meets the pertinent small business size standard (e.g., a telephone communications business having 1,500 or fewer employees), and "is not dominant in its field of operation."<sup>140</sup> The SBA's Office of Advocacy contends that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not "national" in scope.<sup>141</sup> We have therefore included small incumbent LECs in this RFA analysis, although we emphasize that this RFA action has no effect on the Commission's analyses and determinations in other, non-RFA contexts. According to the FCC's *Telephone Trends Report* data, 1,337 incumbent local exchange carriers reported that they were engaged in the provision of local exchange services.<sup>142</sup> Of these 1,337 carriers, an estimated 1,032 have 1,500 or fewer employees and 305 have more than 1,500 employees.<sup>143</sup>

**6. Competitive Local Exchange Carriers.** Neither the Commission nor the SBA has developed a specific small business size standard for providers of competitive local exchange services. The closest applicable size standard under the SBA rules is for Wired Telecommunications Carriers. Under that standard, such a business is small if it has 1,500 or fewer employees.<sup>144</sup> According to the FCC's *Telephone Trends Report* data, 609 companies reported that they were engaged in the provision of either competitive access provider services or competitive local exchange carrier services.<sup>145</sup> Of these 609 companies, an estimated 458 have 1,500 or fewer employees and 151 have more than 1,500 employees.<sup>146</sup>

**7. Wireless Service Providers.** The SBA has developed a size standard for small businesses within the two separate categories of Cellular and Other Wireless Telecommunications or Paging. Under

---

<sup>137</sup> 15 U.S.C. § 632.

<sup>138</sup> *Id.* § 601(4).

<sup>139</sup> Department of Commerce, U.S. Bureau of the Census, 1992 Economic Census, Table 6 (special tabulation of data under contract to Office of Advocacy of the U.S. Small Business Administration).

<sup>140</sup> 5 U.S.C. § 601(3).

<sup>141</sup> See Letter from Jere W. Glover, Chief Counsel for Advocacy, SBA, to Chairman William E. Kennard, FCC (May 27, 1999). The Small Business Act contains a definition of "small business concern," which the RFA incorporates into its own definition of "small business." See 5 U.S.C. § 632(a) (Small Business Act); 5 U.S.C. 601(3) (RFA). SBA regulations interpret "small business concern" to include the concept of dominance on a national basis. 13 C.F.R. § 121.102(b).

<sup>142</sup> FCC, Wireline Competition Bureau, Industry Analysis and Technology Division, *Trends in Telephone Service*, at Table 5.3, p 5-5 (Aug. 2003) (*Telephone Trends Report*).

<sup>143</sup> *Id.*

<sup>144</sup> 13 C.F.R. § 121.201, NAICS code 513310.

<sup>145</sup> Telephone Trends Report, Table 5.3.

<sup>146</sup> *Id.*

that standard, such a business is small if it has 1,500 or fewer employees.<sup>147</sup> According to the FCC's *Telephone Trends Report* data, 719 companies reported that they were engaged in the provision of wireless telephony.<sup>148</sup> Of these 719 companies, an estimated 294 have 1,500 or fewer employees and 425 have more than 1,500 employees.

**D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities.**

8. To address concerns regarding wireline carriers' ability to compete for wireless customers through porting, future rules may change wireline porting guidelines. In addition, future rules may require wireline carriers to reduce the length of the current wireline porting interval for ports to wireless carriers. These potential changes may impose new obligations and costs on carriers.<sup>149</sup> Commenters should discuss whether such changes would pose an unreasonable burden on any group of carriers, including small entity carriers.

**E. Steps Taken to Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered**

9. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.<sup>150</sup>

10. The Further Notice reflects the Commission's concern about the implications of its regulatory requirements on small entities. Particularly, the Further Notice seeks comment on the concern that wireline carriers, including small wireline carriers, have expressed that permitting wireless carriers to port numbers wherever their rate center overlaps the rate center in which the number is assigned would give wireless carriers an unfair competitive advantage over wireline carriers. Wireline carriers contend that while permitting porting outside of wireline rate center boundaries may facilitate widespread wireline-to-wireless porting, wireless-to-wireline porting can only occur in cases where the wireless customer is physically located in the wireline rate center associated with the phone number. If the customer's physical location is outside the rate center associated with the number, porting the number to a wireline telephone at the customer's location could result in calls to and from that number being rated as toll calls. As a result, LECs assert, they are effectively precluded from offering wireless-to-wireline porting to those wireless subscribers who are not located in the wireline rate center associated with their wireless numbers.

11. The Further Notice seeks comment on how to facilitate wireless-to-wireline porting when the location of the wireline facilities serving the customer requesting the port is not in the rate center where the wireless number is assigned. The Further Notice seeks comment on whether there are technical or regulatory obstacles that prevent wireline carriers from porting-in wireless numbers when the rate center associated with the number and the customer's physical location do not match. The Further Notice

<sup>147</sup> 13 C.F.R. § 121.201, NAICS code 513322.

<sup>148</sup> Telephone Trends Report, Table 5.3.

<sup>149</sup> See e.g., Further Notice, paras. 41, 48-49.

<sup>150</sup> See 5 U.S.C. § 603.

asks commenters that contend that such obstacles exist and result in a competitive disadvantage to submit proposals to mitigate these obstacles.

12. In addition, the Further Notice seeks comment on alternative methods to facilitate wireless-to-wireline porting. To the extent that wireless-to-wireline porting may raise issues regarding the rating of calls to and from the ported number when the rate center of the ported number and the physical location of the customer do not match, the Further Notice seeks comment on the extent to which wireline carriers should absorb the cost of allowing the customers with a number ported from a wireless carrier to maintain the same local calling area that the customer had with the wireless service provider. Alternatively, the Further Notice seeks comment about whether wireline carriers may serve customers with numbers ported from wireless carriers on a Foreign Exchange (FX) or Virtual FX basis. The Further Notice seeks comment on the procedural, technical, and regulatory implications of each of these approaches. These questions provide an excellent opportunity for small entity commenters and others concerned with small entity issues to describe their concerns and propose alternative approaches.

13. The Further Notice also seeks comment about whether the Commission should require wireline carriers to reduce the length of the current wireline porting interval for ports to wireless carriers. The Further Notice analyzes the current wireline porting interval and seeks comment about whether there are technical or practical impediments to requiring wireline carriers to achieve shorter porting intervals for intermodal porting. The Further Notice recognizes that, if a reduced porting interval was adopted, carriers may need additional time to modify and test their systems and procedures. Accordingly, the Further Notice seeks comment on an appropriate transition period in the event a shorter porting interval is adopted.

14. Throughout the Further Notice, the Commission emphasizes in its request for comment, the individual impacts on carriers as well as the critical competition goals at the core of this proceeding. The Commission will consider all of the alternatives contained not only in the Further Notice, but also in the resultant comments, particularly those relating to minimizing the effect on small businesses.

**F. Federal Rules that Overlap, Duplicate, or Conflict with the Proposed Rules**

15. None.

**SEPARATE STATEMENT OF  
CHAIRMAN MICHAEL K. POWELL**

Re: *In re Telephone Number Portability; CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues; CC Docket No. 95-116*

After today it's easier than ever to cut the cord. By firmly endorsing a customer's right to untether themselves from the wireline network – and take their telephone number with them – we act to eliminate impediments to competition between wireless and wireline services. Seamless wireline-to-wireless porting is another landmark on the path to full fledged facilities-based competition.

Our action promises significant consumer benefits for wireline and wireless customers. I have heard the concerns expressed by some wireline providers that wireline network architectures and state-imposed rate centers complicate number portability. This proceeding has undoubtedly focused the Commission's attention on these issues. State regulators have long been champions of local number portability and I appreciate their support. I look forward, however, to working with my colleagues in the states to remove additional barriers to inter-modal local number portability such as the difficulty of some providers to consolidate rate centers to more accurately match wireless carrier service areas.

In the end, the consumer benefits associated with inter-modal LNP convince me that the time for Commission action is now. No doubt there will be some bumps in the road to implementation, but I trust that carriers will use their best efforts to ensure consumers have the highest quality experience possible. I look forward to the Commission's November 24<sup>th</sup> trigger for this obligation and to working with my colleagues to ensure that full wireline to wireless portability is a reality for all consumers everywhere.

**SEPARATE STATEMENT OF  
COMMISSIONER KATHLEEN Q. ABERNATHY**

*Re: Telephone Number Portability – CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, CC Docket No. 95-116*

This Order removes the final roadblocks to implementing wireline-to-wireless number portability, which is an important step in facilitating intermodal competition. The Commission mandated local number portability (LNP) within and across the wireline and wireless platforms, where technically feasible, with the goal of maximizing consumer choice. As of November 24, 2003, this goal will become a reality: Most consumers who seek to switch wireless providers or to move from a local exchange carrier to a wireless carrier will be able to retain their existing telephone numbers. While I expressed sympathy in the past to arguments that the November 24 deadline was premature, our present focus must be on implementation, and the foregoing Order provides much-needed clarity regarding the parties' obligations.

I recognize that wireline network architecture and state rating requirements will prevent many (if not most) consumers from porting wireless numbers to wireline carriers. Although, in the short term, wireline carriers will have more limited opportunities to benefit from intermodal LNP than wireless carriers will, I was simply not willing to block consumers from taking advantage of the porting opportunities that are technologically feasible today. I am hopeful that existing obstacles to wireless-to-wireline porting will be addressed as expeditiously as possible through technological upgrades and, where necessary, state regulatory changes.

Finally, I am pleased that the Commission is stepping up its consumer outreach efforts on the issues of wireless and intermodal LNP. To this end, I commend the recent proactive efforts of the Wireless Telecommunications Bureau and the Consumer and Government Bureau to educate the public about our LNP rules. I am also pleased with the recent efforts of industry to reach out to consumers so that they understand what number-porting opportunities are available to them. For consumers to benefit from our expanded LNP regime, it is imperative for them to have sufficient information to make the most appropriate choices for themselves.

**SEPARATE STATEMENT OF  
COMMISSIONER MICHAEL J. COPPS**

Re: *Telephone Number Portability CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues (CC Docket No. 95-116)*

With today's action, consumers are assured that intermodal telephone number portability will begin, at last, to become a reality later this month. After numerous delays, consumers are on the verge of enjoying the significant new ability to take their current telephone numbers with them when they switch between carriers and technologies. This gives consumers much sought-after flexibility and it provides further competitive stimulus to telephone industry competition. This makes it a win-win situation for consumers and businesses alike.

It was some seven years ago, in the 1996 Act, when Congress recognized that the ability of consumers to retain their phone numbers when switching providers would facilitate the development of competition. Congress instructed us to get this job done and to use "technical feasibility" as our guide in making sure the vision became reality. This we have labored mightily to do. As a result, American consumers will be able to take their digits with them, unimpeded by the hassle, loss of identity and attendant expenses that until now have accompanied switching between service providers and technologies.

The bulk of the problems accompanying the challenge of porting numbers are behind us now. A very limited few remain and these are the subject of the Further Notice of Proposed Rulemaking also approved today. I am confident that these can be handled expeditiously if all interested parties work together. Similarly, any minor implementation problems that develop should be amenable to swift and cooperative corrective actions. It has taken considerable cooperation to bring us to this important point, and I believe consumer support for porting will encourage all parties to reach quick resolution of the few remaining challenges.

Finally, it is difficult to see how we are ever going to have true intermodal competition in the telephone industry apart from initiatives like the one we embark on today. Intermodal competition always receives strong rhetorical support. Today it gets some action, too.

**SEPARATE STATEMENT OF  
COMMISSIONER KEVIN J. MARTIN**

*Re: Telephone Number Portability, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, Memorandum Opinion and Order and Further Notice of Proposed Rulemaking, CC Docket No. 95-116*

I am pleased to support this item because it provides important consumer benefits by promoting competition in the wireline telephone market. One of the primary reasons I supported wireless local number portability is the additional competition it is likely to encourage in the wireline market. *See* Press Statement of Commissioner Kevin J. Martin on the Commission's Decision on Verizon's Petition for Permanent Forbearance from Wireless Local Number Portability Rules (July 16, 2002). As I stated last year, the ability to transfer a wireline phone number to a wireless phone is an important part of ensuring that competition with wireline phones continues to grow. I am glad that today the full Commission agrees.

I am disappointed, however, that the Commission was not able to provide this guidance until weeks before the LNP requirement is scheduled to take effect. The Commission has an obligation to minimize the burdens our regulations place on carriers, and I wish we had provided the guidance in this Order considerably sooner.

Finally, I recognize that LNP – although very important for consumers – places real burdens on the carriers, particularly the small and rural carriers. Accordingly, I support the decision to waive our full porting requirements until May 24, 2004, for wireline carriers operating in areas outside of the largest 100 MSAs. I am also pleased that we emphasize that those wireline carriers may file waiver requests if they need additional time.

**SEPARATE STATEMENT OF  
COMMISSIONER JONATHAN S. ADELSTEIN**

*Re: In re Telephone Number Portability; CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues; CC Docket No. 95-116*

I am pleased to support this Order because it clarifies that our rules and policies provide for enhanced number portability opportunities for American consumers. Specifically, we enable consumers to port their wireline telephone numbers to local wireless service providers. We also affirm that wireless carriers are required to port telephone numbers to wireline carriers but recognize that wireline carriers are only able to receive those numbers from wireless carriers on a limited basis. Finally, we rightly seek comment on how to deal with these limitations and further facilitate wireless-to-wireline porting.

I believe that our decision is consistent with Section 251(b) of the Communications Act, which requires local exchange carriers (LECs) to provide local number portability to the extent technically feasible. However, I do recognize that there may be certain limitations on the ability of the nations' smallest LECs to technically provide local number portability. In this regard, I am extremely pleased we made the decision to waive until May 24, 2004, the requirement of LECs operating in areas outside of the largest 100 MSAs to port numbers to wireless carriers that do not have a point of interconnection or numbering resource in the rate center where the LEC customer's wireline number is provisioned.

I recognize that there may be other compelling circumstances that make it disproportionately difficult for these same LECs to provide full number portability. Consequently, I am pleased we agreed to the language in the item recognizing that those wireline carriers may need to file additional waivers of our LNP requirement.

I remain concerned, however, that today's clarification of our LNP rules and obligations will exacerbate the so-called "rating and routing" problem for wireless calls that are rated local, but are in fact carried outside of wireline rate centers. While I appreciate the language in the Order that clarifies that ported numbers must remain rated to the original rate center, the rating and routing issue continues to remain unresolved for rural wireline carriers as well as neighboring LECs and the wireless carriers whose calls are being carried. I believe that we must redouble our efforts to resolve this critical intercarrier compensation issue as quickly and comprehensively as possible.

Finally, I take very seriously the concerns of those wireline carriers that have argued wireline-to-wireless number portability should be limited pending the resolution of issues associated with full wireless-to-wireline porting. While I do not believe that these concerns outweigh the very significant benefits to American consumers that our clarification provides today, I do want to highlight my keen interest in working both with industry and the Chairman and my fellow Commissioners on solutions to address this inequity. The Commission should constantly strive to level the proverbial playing field, and the situation presented by our LNP rules and policies should not be any different.

06 May 2004

Via MAIL and FASCIMILE

The Honorable Stan Wise  
Commissioner, Georgia Public Service Commission  
President, National Association of Regulatory Utility Commissioners  
244 Washington Street, S.W.  
Atlanta, GA 30334

Dear Stan:

I want to express my deep appreciation for the efforts of National Association of Regulatory Utility Commissioners (NARUC) and its members in making the initial deployment of wireless number portability such a success. Since November 24, 2003, more than three million consumers have been able to choose a new wireless carrier or switch between a wireless and wireline carrier without having to sacrifice their telephone number. As you know, after May 24, 2004, consumers outside of the top markets will possess the power to make the same choice. In light of the approaching opportunity for *all* American consumers to take their phone numbers with them, I wanted to write you out of concern about certain rural wireline carriers' requests for waivers of their porting obligations that are pending in many states.

When considering requests to waive these important, consumer-friendly obligations, states should remain mindful of the tremendous customer benefits that porting generates. I know that NARUC and the FCC agree that the ability of wireless and wireline consumers to port their numbers remains central to producing competition, choice, lower costs, and increased innovation. These benefits are particularly important in rural areas where competition may be less robust than in more urban markets.

It is with those policies in mind that I hope that you, in your capacity as NARUC's president, will encourage state commissions to hold carriers that seek waivers of their porting obligations to the appropriate standard of review. At this point, I understand that many rural wireline carriers have sought waivers of their obligations, and that, in some cases, waivers have been granted. Of course, states have jurisdiction to waive porting obligations for certain rural telephone companies under Section 251(f) of the Telecommunications Act of 1996, where carriers demonstrate undue economic burden or technological infeasibility. I think we can agree that the State commissions should strictly apply that statutory standard so that the rights of consumers are protected. I encourage the State commissions to ensure that carriers seeking waivers demonstrate that they are on a path to compliance so that customers of these

carriers will not be forever denied the rights their fellow consumers enjoy. If relief were to be granted in the absence of extraordinary circumstances, or for indefinite periods, it would be a setback for rural consumers. It should be noted that some of the same carriers that now seek to have their porting obligations waived have long known that they would, absent a demonstration of undue burden, be required to provide porting to both wireline and wireless carriers.

As we approach the May 24, 2004 deadline for nationwide local number portability deployment, the FCC looks forward to working with NARUC and the State Commissions to make sure that the interests of the American consumer are protected. Because of the publicity regarding the nationwide implementation of wireless and intermodal LNP, consumers in all markets will expect to receive its benefits. Where it is deemed appropriate to grant relief, it is important that consumers be educated so that they can make informed decisions as to their telephone service.

I would be happy to discuss this issue further with you or any of your members in the coming weeks.

Sincerely yours,

A handwritten signature in black ink, appearing to read "K. Dane Snowden", with a long horizontal flourish extending to the right.

K. Dane Snowden  
Chief  
Consumer & Governmental Affairs Bureau

Past Issues

Studies show that as much as 20 % of minutes processed by end office switches is going unbilled. This unbilled "Phantom Traffic" is the focus of a one-day conference April 7, 2004 in Washington, DC. For more information please see the Conference Brochure

## NECA FILINGS

### **NECA TARIFF FCC NO. 5 Transmittal No. 1018**

3/17/2004 - NECA filed Transmittal No. 1018, revising its Tariff F.C.C. No. 5 to become effective April 1, 2004. This filing makes additions and miscellaneous changes to the listings of companies in the Title Pages, Optional Rate Plan Availability, DSL Access Services Availability and Federal Universal Service Charge sections.

### **NECA TARIFF FCC NO. 5 Transmittal No. 1019**

3/17/2004 - NECA filed Transmittal No. 1019, revising its Tariff F.C.C. No. 5 to become effective April 1, 2004. This filing adds Commonwealth Telephone Company to the list of companies applying Local Number Portability (LNP) End User Charges.

### **NECA TARIFF FCC NO. 5 Transmittal No. 1020**

3/17/2004 - NECA filed Transmittal No. 1020, revising its Tariff F.C.C. No. 5 to become effective April 1, 2004. This filing modifies NECA's Asynchronous Transfer Mode Cell Relay Access (ATM-CRS) and Digital Subscriber Line Access (DSL) Services. Specifically, this filing: 1) reduces the monthly rates for most existing ATM-CRS Port speeds, 2) introduces a third discount commitment level under the DSL Access Services Discount Pricing Arrangement, 3) introduces a non-chargeable optional function associated with ATM-CRS Ports enabling customers to transport Internet Protocol packets over the Telephone Company's network, and 4) removes the local exchange service copper-only requirement for ADSL and SDSL Access Services.

## FCC RELEASES

### LNP

#### **Order, CC Docket No. 95-116, DA 04-726**

3/17/2004 - The FCC has granted the requests of Cellular Telecommunications and Internet Association, Cingular Wireless, LLC, AT&T Wireless Services, Inc. and ALLTEL Communications, Inc. to withdraw their petition for a rulemaking asking the FCC to rescind the rule requiring commercial mobile radio service (CMRS) providers to provide local number portability.

### SECTION 272

#### **Report and Order, CC Docket Nos. 03-228, 96-149, 98-141, 96-149 and 01-337, FCC 04-54**

3/17/2004 - The FCC issued a Report and Order removing prohibition against sharing by BOCs and their section 272 affiliates of operating, installation, and maintenance (OI&M) functions. The Commission concluded that it should retain the prohibition against joint ownership by BOCs and their section 272 affiliates of switching and transmission facilities, or the land and buildings on which such facilities are located. The Commission dismissed as moot petitions filed by SBC and BellSouth, pursuant to section 10 of the Act, seeking forbearance from the OI&M sharing prohibition. The Commission also granted SBC's request for modification of the SBC/Ameritech Merger Order conditions related to OI&M services to the extent that these merger conditions are incorporated into the conditions of the SBC Advanced Services Forbearance Order

## INDUSTRY FILINGS

### USF

#### **Ex Parte, CC Docket Nos. 96-45, 98-171, 90-571, 92-237, 99-200, 95-116 and 98-170**

3/16/2004 - Representatives of Microsoft met with Commissioners Adelstein, Abernathy, Copps and Martin and their staff members to explain that policy makers should keep in mind that regulations adopted to suit the PSTN might not translate well into an IP-centric Framework. In terms of Universal Service funding mechanisms, Microsoft believes that either a numbers-based or connections-based approach would be better than today's mechanism, but should be considered only as an interim step.

### UNBUNDLED NETWORK ELEMENTS

#### **Ex Parte, CC Docket Nos. 01-338, 96-98 and 98-147**

3/17/2004 - In a letter to Commissioner Copps, Earthlink submitted a letter to explain its position on reconsideration of the line sharing unbundled network element rules in light of the D.C. Circuit Court's recent decision in USTA v. FCC. Earthlink states that line splitting is not a functional substitute for line sharing, nor is it a long-term competitive alternative to line sharing.

## FEDERAL REGISTER

### BIENNIAL REVIEW

#### **Notice, WC Docket No. 02-313, FCC 03-337, FR Doc 04-5657**

03/18/04 - The Commission has published a notice in the Federal Register setting the comment dates for its inquiry on whether certain rules should be repealed or modified because they are no longer necessary in the public interest. **Comments are due April 19, 2004. Reply Comments are due May 3, 2004.**

## OTHER NEWS

Speaking at a CITA forum on LNP issues, Wireless Bureau Assistant Chief David Firth said that the volume of actual number porting would not be the measure of success, but giving customers the option to port was most important. He indicated that carriers outside of the 100 largest MSA's should be testing and preparing for the May 24, 2004 LNP deadline and that the Commission would not be very sympathetic to last minute waiver requests. He said that the Bureau in its orders has resolved most of the implementation issues. However, if there were still a lack of clarity on certain issues, such as overlapping boundaries, after May 24 the Bureau would consider issuing further guidelines. Responding to questions, he indicated that rating and routing issues between carriers are not porting issues and are therefore not a valid reason for refusing to port. He said that if carriers are experiencing problems with non-compliance by certain carriers, those are enforcement issues and need to be called to the Commission's attention.

The Western Governors Association has sent a letter to Congressional leaders asking them to urge Congress to examine the current Universal Service Fund distribution formula for non-rural carriers, which serve both rural and non-rural areas. The Governors asked Congress to help remedy the imbalance in the distribution of funds. <http://www.westgov.org/wga/testim/usf-ltr3-17-04.pdf>

Subject: Bona Fide Request for Local Number Portability

Dear Mr. Heiberger:

To ensure the availability of Local Number Portability (LNP) for marketplace competition, the FCC has required carriers to make a specific request for the implementation of LNP. The purpose of this letter is to request provisioning of Local Number Portability (LNP) in areas where Western Wireless (dba CellularOne®) is licensed to do business.

Western Wireless Corporation, on behalf of its subsidiaries and affiliates ("Western Wireless"), hereby submits the enclosed Bona Fide Request ("BFR") to Interstate Telecom Coop, Inc. ("ITC") that it be prepared, no later than May 24, 2004, to support Local Number Portability ("LNP") between Western Wireless and ITC in all its switching centers.

The enclosed form identifies the areas where any serving switches must be opened for porting by May 24, 2004. Please carefully review this form, validate ITC is responsible for the identified switches, and confirm the date by which these switches will be LNP capable.

Also, please confirm the receipt of this request within 10 days.

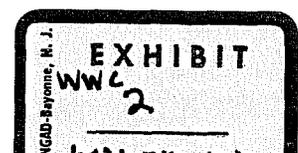

If there are any questions or concerns, please contact me via email at [ron.williams@wwireless.com](mailto:ron.williams@wwireless.com) or via phone at (425) 586-8360.

Sincerely,

A handwritten signature in cursive script that reads 'Ron Williams'.

Subject: Number Portability Operations Agreement

Dear Mr. Heiberger:

Western Wireless has received your confirmation of our Bona Fide Request ("BFR") for Local Number Portability ("LNP") issued to Interstate Telecom Coop, Inc.. We appreciate your prompt response and look forward to working with you to insure successful implementation of number portability in your service area.

Attached hereto is a proposed *Local Number Portability Operations Agreement* to govern the porting of telephone numbers between our networks. The agreement is intended to establish a reasonable process and set of standards for local number portability. While such an agreement is not required to implement porting, Western Wireless believes that such an agreement will ensure a more efficient and effective means for both parties to meet their obligations associated with number portability.

Upon your review of this proposed agreement, please contact me at your earliest convenience so that we can discuss the terms of the agreement and make arrangements on how best to proceed with negotiations. At a minimum, I would like to coordinate with you on a monthly basis on the status of this agreement and the implementation of number portability. Please acknowledge receipt of this agreement and let me know the date and time within the next month that we can discuss further.

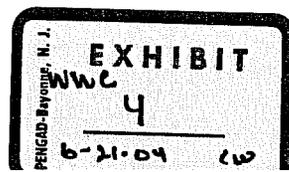

I can be reached by phone at 425-586-8633, by facsimile at 425-586-8118, or via email at [mike.wilson@wwireless.com](mailto:mike.wilson@wwireless.com).

Sincerely,

of Local Number Portability Obligations Pursuant to  
47 U.S.C. § 251(f)(2)

MPUC Docket No.: \_\_\_\_\_

**SUMMARY OF FILING**

The member companies of the Minnesota Independent Coalition listed on Exhibit 1 have petitioned the Minnesota Public Utilities Commission pursuant to 47 U.S.C. § 251(f)(2) and Minn. Rules pt. 7811.2100 to request the suspension or modification of obligations under 47 U.S.C. § 251(b)(2) to provide local number portability to requesting Commercial Mobile Radio Service providers.

In the Matter of the Petition by the Minnesota  
Independent Coalition for Suspension or Modification  
of Local Number Portability Obligations Pursuant to  
47 U.S.C. § 251(f)(2)

MPUC Docket No.: \_\_\_\_\_

**PETITION**

The following Petition is submitted by the member companies of the Minnesota Independent Coalition listed on Exhibit 1 (the "MIC" or the "Companies") to the Minnesota Public Utilities Commission (the "Commission") pursuant to 47 U.S.C. § 251(f)(2) and Minn. Rules pt. 7811.2100, to request the suspension or modification of obligations under 47 U.S.C. § 251(b)(2) to provide local number portability ("LNP") to requesting Commercial Mobile Radio Service ("CMRS") providers.

1. The legal name, address, and telephone number of the LEC and its designated contact person:

See the attached Exhibit 1.

2. The name, address, and telephone number of the attorney if the LEC will be represented by an attorney:

Charles A. Hoffman  
Maslon Edelman Borman & Brand LLP  
3300 Wells Fargo Center  
90 South Seventh Street  
Minneapolis, MN 55402  
(612) 672-8368 — Telephone  
(612) 642-8368 — Facsimile

3. The date of the filing, which is the date the Commission receives the LEC's filing or the date designated by the LEC, whichever is later:

May 10, 2004

4. The proposed effective date of the suspension or modification sought by the LEC:

The Companies requests that the requested suspension of obligations to provide local number portability to CMRS providers take effect as soon as possible, and no later than May 24, 2004.

5. The signature and title of the LEC officer or representative authorizing the petition:

See attached verifications.

6. A description of the obligations the LEC seeks to suspend or modify, including:

(a) specific references to the relevant provisions of section 251, subsection (b) or (c), of the act;

(b) a copy of the relevant bona fide request, if the LEC seeks to suspend or modify the application of the requirement to negotiate; and

(c) a copy of the relevant commission-approved interconnection agreement, if the LEC seeks to suspend or modify the application of any portion of Section 251, subsection (b) or (c), of the act, other than the requirement to negotiate.

The Companies are requesting suspension of certain obligations under 47 U.S.C. § 251(b), to "provide, to the extent technically feasible, number portability in accordance with the requirements prescribed" by the Federal Communications Commission ("FCC").

## I. BACKGROUND

Under the FCC's Order issued on November 10, 2003,<sup>1</sup> the Companies are required, upon receiving a bona fide request ("BFR") from a CMRS provider, to make their switches capable of porting a subscriber's local telephone number to a requesting CMRS provider whose "coverage area" overlaps the geographic location of the rate center in which the customer's wireline number

---

<sup>1</sup> *In re Telephone Number Portability*, Memorandum Opinion and Order and Further Notice of Proposed Rulemaking, CC Docket No. 95-116, FCC 03-284 (2003) (the "Intermodal Number Portability Order").

is provisioned, provided that the porting in [CMRS] carrier maintains the number's original rate center designation following the port."<sup>2</sup> The FCC further ruled in its Order that all LECs serving fewer than two percent (2%) of the nation's access lines are to implement wireless LNP by May 24, 2004, for any BFR received on or prior to November 24, 2003.<sup>3</sup> For BFRs received after November 24, 2003, these LECs will have six months following the BFR to implement wireless LNP.<sup>4</sup>

Each of the Companies serve a number of access lines well below the 2% threshold of 3.76 million access lines. **TRADE SECRET Exhibit 2** sets out the number of access lines served by each of the Companies. The substantial majority of the Companies serve rural communities.

Many of the Companies have received correspondence appearing to request wireless LNP, with an implementation date no later than May 24, 2004, from (1) Sprint PCS; (2) Western Wireless; (3) Midwest Wireless; (4) U.S. Cellular; and/or (5) Verizon Wireless. The majority of the Companies received such requests from only one (1), or at most two (2), of these CMRS providers.

The Companies are not seeking to suspend or modify any obligations arising under Section 251, with respect to any interconnection agreement, nor do they seek to suspend or modify the application of the requirement to negotiate.

7. A detailed description of the modifications or suspensions the LEC is seeking, including the proposed duration of each suspension or modification:

---

<sup>2</sup> Intermodal Number Portability Order, ¶ 22.

<sup>3</sup> 47 C.F.R. § 52.23(c) (requiring LECs to "make a long-term database method for number portability available within six months after a specific request by another telecommunications carrier in areas in which that telecommunications carrier is operating or plans to operate.")

<sup>4</sup> *Id.*

The Companies request that the Commission suspend their obligation to provide wireless LNP to Sprint PCS, Western Wireless, Midwest Wireless, U.S. Cellular, Verizon Wireless, and to any additional CMRS provider which may subsequently submit a BFR for LNP to permit the completion of technical and operational modifications to network connections between the Companies and Qwest Corporation ("Qwest"), which are necessary for effective and efficient number porting to wireless carriers. This period of suspension is also needed to conclude negotiations with Qwest over the terms and conditions, including rates, for the services and facilities necessary to support wireless LNP.

The Companies have been diligently working to put in place the many facility upgrades and contractual arrangements needed to support wireless LNP. In doing so, they have also attempted to address a critical issue in wireless LNP implementation which the FCC has not yet resolved: how can calls be routed, and rated local, when the CMRS provider has no point of interconnection on the LEC's network? The FCC requires that ported numbers remain rated to their original rate center, even while the routing of calls will change when a number is ported.<sup>5</sup> However, in the absence of direct connections, very frequently the only facilities available to the rural Companies in order to route calls to numbers ported to a CMRS provider are access tandem trunk facilities.

For the substantial majority of the Companies, there are no direct connections between CMRS providers and the Companies. Rather, CMRS providers in Minnesota have interconnected their wireless networks with tandem switches owned and operated by Qwest, and route their traffic to the Companies via these connections. However, the substantial majority of the Companies have centralized equal access and therefore do not have the technical ability to

---

<sup>5</sup> Intermodal Number Portability Order, ¶ 39.

route their traffic to the CMRS carriers via Qwest access tandems, because Qwest has configured the facilities as one-way terminating trunks.

The Companies have historically interconnected with Qwest toll/access tandems for the purpose of joint provisioning of toll and toll access (the "Toll Connections"). The Companies do not route originating traffic via the Toll Connections to terminate traffic to CMRS providers.

Historically, each Company has routed its originating traffic which terminates to a CMRS provider, to the Company end-user's presubscribed interexchange carrier (IXC), unless the CMRS provider has established a direct connection to the Company. However, where both the Company central office switch and the CMRS provider switch (an MTSO) subtend a Qwest EAS/local tandem switch in an Extended Area Service (EAS) area mandated by the Commission, then both have historically routed to the Qwest EAS/local tandem switch their traffic which terminates to the other's end users whose phone numbers (NPA/NXXs) are associated with the Commission-mandated EAS area (the "EAS Connections"). There has been no compensation exchanged between the Companies and Qwest for this transit function, except as may be addressed in the Commission's Order establishing the EAS area.

The Companies using centralized equal access have analyzed and investigated how calls to (local) numbers ported to CMRS providers could be routed, for those networks where there are neither direct connections nor EAS Connections, without being rated as toll calls. The Companies believe this can be accomplished efficiently and cost-effectively, if such calls are routed via the same facilities used by the CMRS providers to deliver their traffic to the Companies, and at rates comparable to TELRIC rates charged by Qwest to CMRS providers for the same service. However, these facilities are currently one-way terminating trunks which permit the CMRS providers to deliver their traffic to the Companies, but do not have the

technical capability, as configured by Qwest, to permit the Companies to similarly route traffic bound for CMRS providers via these trunks.

The Companies believe Qwest has configured its toll facilities interconnecting to LECs with non-centralized equal access end offices on a two way basis, which would permit routing to CMRS-ported numbers by those LECs. In addition, Qwest's interconnection agreements with CMRS providers typically appear to contemplate two-way traffic routing to and from the CMRS providers via the access tandem.<sup>6</sup>

The Companies contacted Qwest to request that Qwest accept traffic from the Companies for ported numbers (ported from the Companies to CMRS providers), via existing Company-Qwest trunk groups at Qwest access tandems in Minnesota. The Companies noted that the trunk groups would require both the Companies and Qwest to reconfigure the trunks to accept wireline to wireless ported traffic.

Qwest indicated that it was receptive to developing the requested method of routing CMRS provider-bound traffic from the Companies, but stated that it would not take any steps to make operational changes until the Companies and Qwest have signed agreements identifying the terms of the service. On April 30, Qwest provided the Companies with a proposed agreement, "Service Exhibit 5 EAS and Transit Services Exhibit and Rate Schedule," a copy of which is attached as Exhibit 3 to this Petition (the "Draft Agreement").

The Draft Agreement includes a charge of \$.0089 per minute of use for the "Transit Service," as compared to the substantially lower rate paid by the CMRS providers to Qwest for a virtually identical service, i.e. the aggregate TELRIC rate for transport and tandem switching of \$.00164 per minute of use. In addition, the scope of the Draft Agreement far exceeds the limited

---

<sup>6</sup> See, for example: *Amendment to the Interconnection Agreement between Qwest Wireless L.L.C. and Qwest Corporation for the State of Minnesota*, dated 3/6/02.

issue the Companies asked Qwest to address. The Companies sought only a transit function via Qwest access tandems for the routing of traffic to CMRS providers subtending the tandems. Instead, the Draft Agreement seeks to impose charges (at the inflated rate) on all third-party transit traffic routed to Qwest tandems.

The Draft Agreement further contemplates that the Companies and Qwest each also enter into an underlying "Infrastructure Sharing Master Services Agreement" (to which the Draft Agreement is Exhibit 5).

The Companies have responded to Qwest's proposal and intend to pursue resolution of the outstanding issues at the earliest possible date.

## II. COMPANIES REQUEST

The Companies request suspension of their WLNP obligations, in order to complete (1) negotiations with Qwest regarding the Draft Agreement (and the underlying Infrastructure Sharing Master Services Agreement, as appropriate), and (2) any operational changes necessary to implement WLNP in the manner contemplated.

In order to expedite resolution and wireless LNP implementation, the Companies further request that the Commission order Qwest, on an expedited basis, to (1) limit the scope of the negotiations on the Draft Agreement to the CMRS -routed transit function requested by the Companies; and (2) negotiate rates in good faith, on a non-discriminatory basis.

The Companies anticipate that, if the scope of negotiations are narrowed as requested and proceed on the basis of non-discriminatory rates, these matters could be completed by July 30, 2004. This is an extension of 67 days from the May 24 WLNP implementation date. The Companies would further keep the Commission advised as to the status of these negotiations. If

negotiations are unsuccessful, mediation pursuant to Minn. Rule 7811.1600 may be appropriately ordered.

The Companies wrote to the CMRS providers which requested WLNP implementation by that date (each served with this Petition) asking that they consent to this short delay. Copies of the letters sent to each of the CMRS providers are attached as Exhibit 4. Each of the CMRS providers refused such consent.

8. The number of subscriber lines the LEC has nationwide, at the holding company level, and the LEC's estimate of the total number of all LEC subscriber lines nationwide:

See the attached **TRADE SECRET** Exhibit 2 for the number of subscriber lines served by each Company.

As of December 2002, approximately 188 million local telephone lines were in service nationwide.<sup>7</sup> Each of the Companies provides service to access lines which are well below the 2% threshold of 3.76 million access lines and is therefore eligible to seek relief under Section 251(f)(2) from obligations imposed under 47 U.S.C. § 251(b) and (c).

9. A statement supporting the petition, which must specify why each requested modification or suspension meets the conditions for modification or suspension specified in section 251, subsection (f), paragraph (2), subparagraphs (A) and (B), of the act, and applicable FCC regulations:

47 U.S.C. § 251(f)(2) requires a state public utility commission to suspend or modify obligations under Section 251(b) or (c) of the Act, as applied to any local exchange carrier "with fewer than 2 percent of the Nation's subscriber lines installed in the aggregate nationwide," where the state commission determines that "such suspension or modification –

(A) is necessary –

(i) to avoid a significant adverse economic impact on users of telecommunications services generally;

---

<sup>7</sup> See "Federal Communications Commission Releases Study on Telephone Trends," FCC News Release (rel. Aug. 7, 2003).

(ii) to avoid imposing a requirement that is unduly economically burdensome; or

(iii) to avoid imposing a requirement that is technically infeasible;  
and

(B) is consistent with the public interest, convenience, and necessity.

Under this provision, a state commission must grant an eligible LEC relief from obligations imposed under Section 251(b) and (c) to the extent that the suspension or modification serves the public interest and is necessary (1) to avoid an adverse economic impact on the LEC's subscribers *or* (2) to avoid an unduly burdensome economic requirement on the LEC *or* (3) to avoid a technically infeasible requirement. A petitioning LEC need only show that *one* of these elements applies to its circumstances. Each of the Companies meets this criteria, and granting the requested temporary suspension is consistent with the public interest.

### III. ECONOMIC BURDENS AND TECHNICAL HURDLES.

The Companies have acted reasonably and consistent with the public interest in connection with wireless LNP. Numerous petitions requesting clarification of LNP obligations were (and some still are) pending before the FCC, generating a considerable degree of uncertainty and confusion about requirements for intermodal LNP (wireline to wireless) throughout the industry. It was only with the FCC's November 10, 2003, Intermodal Number Portability Order that a level of certainty arrived to define wireline carriers' obligations to implement wireless LNP.

However, even the Intermodal Number Portability Order left unresolved issues which are critically important, both economically and technically, to rural LECs such as the Companies. The Companies have sought to develop a way of routing calls to CMRS-ported numbers which is technically sound, efficient and not unduly economically burdensome. However, the technical constraints imposed by Qwest on the centralized equal access Companies, combined with

Qwest's unexpectedly broad and discriminatory proposed terms, preclude the Companies from implementing wireless LNP by May 24.

As noted above, the FCC has left unresolved the issue of which carrier will bear the costs of transport when the routing point for the CMRS provider's switch is located outside the LEC's local calling area in which the number is rated.<sup>8</sup> The Companies could not reasonably be expected to pursue installation of direct trunks to the CMRS providers as the method of traffic routing, when facility costs are so high and it is unknown who will bear the costs. Rather, the Companies have focused on the eminently reasonable solution of making use of the very same facilities used by the CMRS providers to deliver traffic to the Companies. The Companies are simply requesting a short, additional period of time in which to put this solution in place.

The short duration of the requested suspension is particularly reasonable, and in the public interest, when considered in the context of how few porting requests are likely to be delayed. Very few of the Companies' subscribers can reasonably be expected to avail themselves of wireless LNP and port their local wireline numbers to a CMRS provider. The Companies have received, even collectively, very few general or specific inquiries from customers relating to wireless LNP.

On a national level, analysts expect anywhere between 2 and 6 million people – between 1.06% and 3.2% of wireline subscribers nationwide – to replace their telephones with wireless telephones in the *next few years*. Thus, only a very small, insignificant number of the Companies' customers, even in aggregate, can be expected to request to switch to wireless service in the requested period of delay.

Accordingly, the broader public interest will be served by temporarily suspending the Companies' wireless LNP obligations in Minnesota, as requested in this Petition.

---

<sup>8</sup> Intermodal Number Portability Order, fn. 75 and ¶¶ 39-40.

10. A statement as to whether the LEC requests the commission to grant a temporary stay under subpart 9 of the obligations the LEC seeks to modify or suspend:

The Companies request that the Commission grant a temporary stay, if this Petition is not finally granted by the Commission before May 24, 2004.

47 U.S.C. § 251(f)(2) and Minn. Rule 7811.2100, subp. 11, require the Commission to act on this Petition within 180 days. Pending such action, the Commission “may suspend enforcement of the requirement or requirements to which the petition applies with respect to the petitioning carrier or carriers.”<sup>9</sup> The FCC has stated that if State commissions exercise this authority, “eligible LECs will have sufficient time to obtain any appropriate Section 251(f)(2) relief as provided by the statute, especially since the state commission can suspend the application of our deployment deadlines to that LEC while it is considering the LEC’s petition for suspension or modification of our requirements.”<sup>10</sup>

Minn. Rule 7811.2100, subp. 9, permits the grant of a temporary stay:

if, based on the standards applied by Minnesota courts for granting temporary injunctions, the Commission determines that a suspension would be appropriate.

Under Minnesota law, in determining whether to grant or deny request for injunctive relief, a court considers the following factors: (1) the parties’ relationship prior to the dispute; (2) the weight of the irreparable harm alleged by the party seeking the injunction compared to the weight of the harm suffered by the other party if the injunction is granted; (3) the likelihood that the party seeking the injunction will prevail on the merits; (4) public policy considerations; and (5) the administrative burden on the court. City of Mounds View v. Metropolitan Airports Commission, 590 N.W.2d 355 (Minn.App.1999).

---

<sup>9</sup> 47 U.S.C. § 251(f)(2).

<sup>10</sup> *In re Telephone Number Portability*, First Memorandum Opinion and Order on Reconsideration, CC Docket No. 95-116, FCC 97-74 (1997), at ¶ 115.

The Companies are entitled to temporary stay of their wireless LNP obligations under this standard. It is virtually impossible for the Companies to meet a provisioning date of May 24, due to the time needed to complete its negotiations with Qwest, and for both Qwest and the Companies to make necessary operational changes.

Public policy will be served by permitting the temporary stay of enforcement, while this Petition is pending. Temporary stay would allow the Commission to engage in a rational analysis of the request, while avoiding the need for the Companies to expend scarce and valuable resources while potentially risking the integrity of high-quality network operations and service to customers.

11. A statement of when and how to challenge the form or completeness of the petition, file initial and reply comments, and petition to intervene, pursuant to subparts 3 to 7:

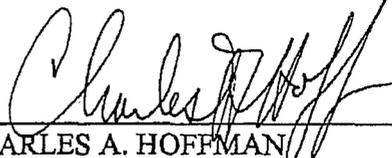

Pursuant to Minn. Rule 7811.2100, subp. 3, a challenge to the form or completeness of this Petition must be received by the Commission and served on the Companies within ten (10) days after the Companies' Petition was filed. The Companies are required to reply to the challenge within five (5) days of the date it receives the filing challenging the Petition. Initial Comments on the Petition must be filed with the Commission within twenty (20) days after the Petition was filed, and must include a recommendation on the type of proceeding the Commission applies to the Petition and reasons for the recommendation. Reply Comments must be filed with the Commission within ten (10) days after the deadline for filing Initial Comments, identified above. Reply Comments must be limited in scope to the issues raised in the Initial Comments. Petitions to Intervene must be filed by the deadline for Reply Comments. An Intervention Petition may be combined with Initial Comments or Reply Comments.

**CONCLUSION:**

The Companies request suspension of their WLNP obligations, in order to complete (1) negotiations with Qwest regarding the Draft Agreement (and the underlying Infrastructure Sharing Master Services Agreement, as appropriate), and (2) necessary operational changes to implement WLNP in the manner contemplated. The Companies further request that the Commission order Qwest, on an expedited basis, to (1) limit the scope of the negotiations on the Draft Agreement to the CMRS -routed transit function requested by the Companies; and (2) negotiate rates in good faith, on a non-discriminatory basis.

**DRAFT  
SERVICE EXHIBIT 5  
EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**1.0 EAS AND TRANSIT SERVICES MINIMUM SERVICE TERM.**

The term of this Service Exhibit 5 shall commence upon the Effective Date of the Agreement (or an amendment hereto, as applicable) and remain in effect for the same period listed in Section 7 of the Qwest Infrastructure Sharing Master Services Agreement. Both parties shall provide the EAS and Transit Services, as further described herein, according to the terms and conditions of this Service Exhibit and the Master Services Agreement.

**OTHER TYPES OF INTERCONNECTION AND SERVICES EXCLUDED.** Nothing in this Agreement will be construed as granting to either party any collocation arrangements through either physical or virtual collocation ("Collocation"), any access to any unbundled network elements ("Unbundled Access"), or access to operational support systems ("OSS Access"), and nothing herein will be construed as waiving or limiting in any way any rights available to either party under the Act with respect to Collocation, Unbundled Access, OSS Access, or other matters, including, but not limited to, ancillary services such as signaling access to call-related databases, directory assistance, white pages directory listings, busy line verify/interrupt, toll and assistance operator services, LIDB, access to poles/ducts/conduits, rights-of-way, 800 and CMDS. The parties reserve the right to negotiate such matters in separate agreements.

This EAS and Transit Services Exhibit is intended solely for the use of ILEC for its operations which are the subject of the Agreement, including the certification that ILEC is a "qualifying carrier" as defined by 47 U.S.C. §259. As such, this Exhibit applies solely to the uses discussed herein, and use of the services in a manner contrary to the restrictions of use in Section 2.0 shall be a material breach of the Exhibit and the Agreement.

Either Party may terminate this EAS and Transit Services Exhibit upon 90 day written notice to the other Party. Upon termination Parties agree that EAS and Transit Services between Parties will be terminated.

**2.0 EAS SERVICES.**

The Parties are incumbent local exchange carriers operating in certain respective communities which are located in adjacent, but not overlapping territories; the Parties do not compete against each other as local exchange carriers in those communities (collectively, the "Communities"), and the Parties are now or have been ordered by the "Insert State" Commission (the "Commission") [compelled by the public interest requirements of the Communities and the demands of their respective customers] to provide Extended Area Service between certain Exchanges of Exchange Carrier and certain Exchanges of QWEST; NOW, THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

The Parties agree to connect their respective networks at mutually agreed upon points so as to furnish Extended Area Service between those Exchanges of Exchange Carrier and those Exchanges of QWEST stated in the Qwest state Exchange and Network Services Tariff, Section 5.1.1. The Parties believe that the traffic exchanged between QWEST and Exchange Carrier will be generally in balance, because they serve the same type of customer base.

Subject to the provisions set forth below, neither Party will charge the other for the transport and termination of EAS Traffic that originated from the end user customers of one Party and terminates to the end user customers of the other Party.

The arrangements that are the subject of this EAS portion of this Exhibit will not be applicable to Exchange Access Service traffic, Telephone Toll Service traffic or to local Traffic not originated by or terminated to the parties in this agreement, e.g., FGA, Wireless, CLEC, and other ILECs. All Exchange Access Service, Telephone Toll Service traffic and local Traffic not originated by or terminated to the parties in the EAS portion of this Exhibit will continue to be governed by the terms and conditions of applicable federal and state tariffs and/or any applicable contractual arrangements made in this Exhibit for transit services.

This Agreement cancels and supersedes all previous settlement and/or compensation terms and rates between the Parties or their respective predecessors relating to the termination of EAS traffic in and/or between the Exchanges set forth in the Qwest state Exchange and Network Services Tariff, Section 5.1.1.

**3.0 TRANSIT SERVICES.**

Transit Service will be provided at each Party's local and access tandem switches, end offices providing local tandem functionality and end offices providing routing due to an unqueried call ported to another local services provider.

The Party originating the traffic acknowledges that it is its responsibility to enter into arrangements with each third party LEC, ILEC, CLEC, Co-Provider or CMRS for the exchange of transit traffic from such originating party and for the billing to the originating carrier for such exchange.

Each Party originating transit traffic acknowledges that the other Party has no responsibility to pay any third party LEC, ILEC, CLEC, Co-Provider or CMRS charges for termination of any transit traffic from such originating Party. Neither Party

**DRAFT  
SERVICE EXHIBIT 5  
EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

will default bill the other Party for unidentified traffic that neither Party can identify, which terminates on their respective networks, unless otherwise provided for in this Agreement. In the event that one Party can identify the traffic, and the other Party requests the transit records, the Parties will negotiate a separate agreement for the provision of those transit records.

Parties will not pay switched access on local calls in either direction between Parties and any third party LEC, ILEC, CLEC, Co-Provider or CMRS when local calls are routed through an access tandem.

**4.0 NETWORK RESPONSIBILITIES.**

**PHYSICAL INTERCONNECTION**

The Parties have interconnected their facilities at the agreed upon meet points within the Exchanges listed and described in the Qwest state Exchange and Network Services Tariff, Section 5.1.1. The Parties agree that meet points within the exchanges listed and described in the Qwest state Exchange and Network Services Tariff, Section 5.1.1 will be limited to the pre-existing meet points within those exchanges. Should either Party request change of existing or add new meet points these meet points will be mutually agreed upon by both Parties. Pre-existing physical interconnection arrangements will remain in place until such time as the Parties mutually agree to convert such physical interconnection arrangements to a type of arrangement other than a meet point. The Qwest state Exchange and Network Services Tariff, Section 5.1.1 may be updated from time to time as additional EAS is ordered by the Commission. The parties intend that, to the greatest extent practicable, all terms, conditions, agreements and arrangements relating to existing physical interconnection, operation, maintenance, methods, practices and provisioning will remain in full force and effect unless and until otherwise agreed to by the Parties.

The Parties will jointly engineer and configure local trunks over the physical interconnection facilities as follows:

Each Party will initially configure a two (2) way trunk group as a direct transmission path between the two Parties.

If the traffic volumes between any two (2) end office switches including other ILEC, CLEC and CMRS switches, at anytime exceeds the centum call second ("CCS") busy hour equivalent of one (1) DS1 (512 CCS), the Parties will, within sixty (60) days of such occurrence, establish a new direct trunk group to the applicable end office(s) consistent with the grades of service and quality parameters set forth in this Exhibit.

Only those valid NXX codes served by an end office may be accessed through a direct connection to that end office.

Each Party will ensure that each tandem connection permits the completion of all traffic to all end offices, which sub-tend that tandem switch.

The provision of additional trunks, if necessary for EAS expansion of EAS voice, will be subject to negotiation between the Parties.

It shall be the responsibility of each Party to program and update its own Switches and network systems pursuant to the Local Exchange Routing Guide (LERG) to recognize and route traffic to the other Party's assigned NXX or NXX-X codes. Neither Party shall impose any fees or charges on the other Party for such activities. The Parties will cooperate to establish procedures to ensure the timely activation of NXX assignments in their respective networks.

Each Party is responsible for administering numbering resources assigned to it. Each Party will cooperate to timely rectify inaccuracies in its LERG data. Each Party is responsible for updating the LERG data for NXX codes assigned to its End Office Switches. Each Party shall use the LERG published by Telcordia or its successor for obtaining routing information and shall provide through an authorized LERG input agent, all required information regarding its network for maintaining the LERG in a timely manner.

Both Parties agree that their network switches involved in the provision of EAS service will be managed in accordance with the applicable Telcordia and other industry standards. The acceptable service levels for local interconnection service and the criteria for applying protective controls in conjunction with EAS service will be administered in the same manner as the network management for Exchange Access Services.

To the extent available, the parties will interconnect their networks using SS7 signaling where technically feasible and available as defined in applicable industry standards including ISDN user part ("ISUP") for trunk signaling and transaction capabilities application part ("TCAP") for common channel signaling based features in the interconnection of their networks.

Each Party will be responsible only for service(s) and facility or facilities which are provided by that Party, its authorized agents, subcontractors, or others retained by such Parties, and neither Party will bear any responsibility for the services and facilities provided by the other Party, its agents, subcontractors, or others retained by such Party.

**DRAFT  
SERVICE EXHIBIT 5  
EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**5.0 OBLIGATIONS OF BOTH PARTIES.**

Parties will provide and maintain the equipment and facilities necessary to permit each other to furnish the services for which the Parties contract.

Parties will provision appropriate trunking to access tandems, local tandems and/or end offices with local tandem functionality, this includes but not limited to provisioning trunking with appropriate traffic use codes.

Parties shall have no obligation to supply a Service where facilities or technical abilities are limited.

Parties will perform Services provided under this Agreement in accordance with operating methods, practices, and standards in effect for each other's End Users.

Parties shall maintain adequate equipment and personnel to reasonably perform the Services. Parties shall connect their End Users to the place(s) where each Party provides the Services and to provide all information and data needed or reasonably requested by each other in order to perform the Services.

**6.0 CHARGES AND PAYMENTS FOR TRANSIT SERVICES.**

The charge for the Transit Services provided by each Party under this Service Exhibit is reciprocal and listed in Schedule A, attached hereto and incorporated herein by reference.

The charges listed in Schedule A shall be subject to adjustment upon sixty (60) days prior written notice by either Party and shall remain reciprocal.

Parties shall be obligated to pay all applicable charges as set forth herein for Transit Services provided by the other Party.

Transit Provider will track usage and bill the originator of the traffic, and the originator of the traffic shall be responsible for and will pay the Transit Provider for all Rates and charges applicable to the calls placed to third party's end users.

Until such time that Qwest has the ability to record the originating traffic, the Parties agree to implement the interim transit charge provisions on Schedule B. When Qwest has actual recordings of originating transit usage available, Qwest will bill transit charges based on Qwest's recording of transit traffic usage.

A completed call shall be computed, calculated and recorded in accordance with the methods and practices of Transit Provider and the operating capacity and ability of Transit Provider's measuring equipment.

The originator of the traffic will pay the Transit Provider for transit traffic at the reciprocal rates specified in Schedule A. It is the responsibility of the originator of the traffic to provide billing information to the third party assuming that recording capabilities exist to obtain that measured data.

If, due to equipment malfunction or other error, Transit Provider does not have available the necessary information to compile an accurate billing statement, Transit Provider may render a reasonably estimated statement, but shall notify originator of the traffic of the methods of such estimate and cooperate in good faith with originator of the traffic to establish a fair, equitable estimate. Transit Provider shall render a statement reflecting actual billable quantities when and if the information necessary for the billing statement becomes available.

Each Party alone and independently establishes all prices it charges its End Users for Services provided by means of this Agreement, and the other Party is not liable or responsible for the collection of any such amounts.

**7.0 DEFINITIONS.**

"Access Services" refers to the tariffed interstate and intrastate switched access and private line transport services offered for the origination and/or termination of interexchange traffic.

"Act", as used in this Exhibit, means the Communications Act of 1934 (47 U.S.C. Section 151 et seq.), as amended by the Telecommunications Act of 1996, and as from time to time interpreted in the duly authorized rules and regulations of the Federal Communications Commission ("FCC") or the Commission.

"Ancillary Traffic", includes all traffic destined for ancillary services, or that may have special billing requirements, including but not limited to the following: Directory assistance, 911/E911, Operator call termination (busy line interrupt and verify), 800/888, LIDB, and Information services requiring special billing.

"Commission", as used in this Exhibit, means the "Insert State" Public Utility Commission of the State of "Insert State".

**DRAFT**  
**SERVICE EXHIBIT 5**  
**EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE**  
**INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

"Co-Provider" means an entity authorized to provide Local Exchange Service that does not otherwise qualify as an incumbent Local Exchange Carrier ("LEC"). "Exchanges", as used in this Agreement, will mean the local telephone exchanges listed in the Qwest state Exchange and Network Services Tariff, Section 5.1.1.

"Extended Area Service" ("EAS"), as used in this Exhibit, means an arrangement for the mutual, reciprocal transport and termination of EAS Traffic between Parties who are not competing with each other, at rates and charges between the Parties established in this Agreement. Calls may be placed between two Exchanges without a Telephone Toll Service charge, to the customers of the Parties.

"Extended Area Service (EAS) Traffic" means traffic (excluding CLEC and CMRS traffic, and information service provider and voice over IP, e.g., competitive local traffic, paging, cellular, PCS) that is originated by an end user of one Party and terminates to an end user of the other Party as defined in accordance with Qwest's then current EAS serving areas, as determined by the Commission.

"Incumbent Local Exchange Carrier" (ILEC), as used in this Exhibit, means with respect to an area, the LEC that: (1) on February 8, 1996, provided Telephone Exchange Service in such area; and (2) (i) on February 8, 1996, was deemed to be a member of the exchange carrier association pursuant to § 69.601 (b) of the FCC's regulations; or (ii) is a person or entity that, on or after February 8, 1996, became a successor or assign of a member described in clause (i) of this paragraph.

"Local Exchange Carrier" (LEC), as used in this Exhibit, means any person that is engaged in the provision of Telephone Exchange Service or Exchange Access Service.

"Telephone Toll Service", as used in this Exhibit, means a type of telecommunication service, commonly known as long-distance service, that is provided on an intrastate or interstate basis between LATAs and within LATAs and that is: (A) not included as a part of basic local exchange service; (B) provided between different exchange areas, and (C) billed to the customer separately from basic local exchange service.

"Termination", as used in this Exhibit, means the switching of EAS Traffic at the terminating carrier's end office switch, or equivalent facility, and delivery of such traffic to the called party's premises.

"Transport", as used in this Exhibit, means the transmission and any necessary tandem switching of EAS Traffic from the interconnection point, or meet point, between the Parties to the terminating carrier's end office switch that directly serves the called party.

"Transit Provider", as used in this Exhibit means the Party that is providing the Transit Service.

"Transit Service" as used in this Exhibit is Transit traffic which is any traffic that originates from one (1) Telecommunications Carrier's network, transits another Telecommunications Carrier's network, and terminates to yet another Telecommunications Carrier's network. For purposes of the Agreement, transit traffic does not include traffic carried by Interexchange Carriers or traffic originated by Qwest when acting as a toll provider. Interexchange Carriers' traffic is defined as Jointly Provided Switched Access. Transit service is provided by Qwest at local and access tandem switches, an end office providing local tandem functionality, as well as end offices providing routing due to an unqueried call ported to another local services provider, to ILEC to enable the completion of calls originated by or terminated to another Telecommunications Carrier (such as a CLEC, an ILEC, an exiting LEC, a co-provider, or a wireless Carrier), which is connected to Qwest's local and access tandem switches, an end office providing local tandem functionality, as well as end offices providing routing due to an unqueried call ported to another local services provider. To the extent that ILEC's Switch functions as a local or Access Tandem Switch, ILEC may also provide transit service to Qwest.

QWEST TRANSIT CHARGE**

TRANSIT RATE	\$ .0089 Per MOU
--------------	------------------

**DRAFT  
SERVICE EXHIBIT 5  
EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**Schedule B  
Interim Transit Charge  
MINNESOTA**

Since Qwest currently does not have the recording capability to record ILEC originated traffic transiting through Qwest's network to a third party, Qwest will bill ILEC based on that ILEC's actual transit minutes provided by the originating ILEC to Qwest on a monthly basis. Data is subject to audit by Qwest no more than twice per year. These MOU will then be multiplied by the transit rate shown on Schedule A. Each month Qwest will bill this amount to the ILEC. If the originating ILEC doesn't provide Qwest with data to bill, Qwest will bill a minimum charge of \$300 per month per ILEC in the rural area and a minimum charge of \$6,000 per month per ILEC in the metro area. This interim method will be utilized until Qwest has actual originating transit routed traffic measurements available.

Subject: Bona Fide Request for Local Number Portability

Dear Mr. Osvog:

To ensure the availability of Local Number Portability (LNP) for marketplace competition, the FCC has required carriers to make a specific request for the implementation of LNP. The purpose of this letter is to request provisioning of Local Number Portability (LNP) in areas where Western Wireless (dba CellularOne®) is licensed to do business.

Western Wireless Corporation, on behalf of its subsidiaries and affiliates ("Western Wireless"), hereby submits the enclosed Bona Fide Request ("BFR") to Swiftel Communications - Brookings Municipal Utilities ("Swiftel") that it be prepared, no later than May 24, 2004, to support Local Number Portability ("LNP") between Western Wireless and Swiftel in all its switching centers.

The enclosed form identifies the areas where any serving switches must be opened for porting by May 24, 2004. Please carefully review this form, validate Swiftel is responsible for the identified switches, and confirm the date by which these switches will be LNP capable.

Also, please confirm the receipt of this request within 10 days.

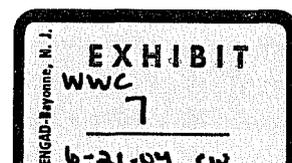

If there are any questions or concerns, please contact me via email at [ron.williams@wwireless.com](mailto:ron.williams@wwireless.com) or via phone at (425) 586-8360.

Sincerely,

A handwritten signature in black ink, appearing to read "Ron Williams", written over a horizontal line.

Ron Williams  
Director - InterCarrier Relations

## Bonafide Request Form (BFR) for Local Number Portability (LNP)

**Purpose:** This form is used to request deployment of long-term Local Number Portability as defined in the FCC mandates (CC Docket 95-116). Specifically, this form requests that ALL codes be opened for portability within the wireline and/or wireless switch CLLI codes designated below.

### TO (RECIPIENT):

**Company Name:** Swiftel Communications -  
Brookings Municipal Utilities  
**Contact Name:** Craig Osvog  
**Contact's Address:** 415 4th St  
Brookings, SD 57006  
**Contact's Email:**  
**Contact's Fax:**  
**Contact's Phone:** 605-692-6211

### FROM (REQUESTOR):

**Company Name:** Western Wireless Corporation  
**Contact Name:** Ron Williams  
**Contact's Address:** 3650 131st Ave. S.E. Suite 400  
Bellevue, Washington 98006  
**Contact's Email:** [ron.williams@wwireless.com](mailto:ron.williams@wwireless.com)  
**Contact's Fax:** 425 586-8118  
**Contact's Phone:** 425 586-8360

### TIMING:

**Date of Request:** November 18, 2003  
**Receipt Confirmation Due By:** December 2, 2003 (Due no later than 10 days after the Date of Request)  
**Effective Date:** May 24, 2004

### Designated Metropolitan Statistical Areas (MSAs):

Note: MSAs and RSAs refer to the U.S. Census Bureau designations. These may differ from the MSAs as separately defined by the wireless or wireline industries.

**MSA/RSA NAME:** RSA 641 - South Dakota 8 - Kingsbury RSA

**Switch CLLI Codes:** OCN 1650  
BROOKINGS BKNGSDXC69G  
BROOKINGS BKNGSDXERS3

### Actions Required of the Recipient:

1. Within 10 days of receipt, provide confirmation to the requestor that this form has been received.
2. For all currently released codes, and those to be released at any future time, within the designated U.S. Census Bureau MSAs or wireline switch CLLI codes (where applicable), open all for porting within the LERG.
3. For all currently released codes, and those to be released at any future time, within the designated U.S. Census Bureau MSAs and wireline switch CLLI codes (where applicable), open all for porting within the NPAC (Number Portability Administration Center).
4. Ensure that all switches handling codes within the designated MSAs are Local Number Portability capable.

December 19, 2003

Jerry Reisenauer  
West River Telephone Cooperative Company  
801 Coleman Ave  
Bison, SD 57620

Subject: Number Portability Operations Agreement

Dear Mr. Reisenauer:

Western Wireless has received your confirmation of our Bona Fide Request ("BFR") for Local Number Portability ("LNP") issued to West River Telephone Cooperative Company. We appreciate your prompt response and look forward to working with you to insure successful implementation of number portability in your service area.

Attached hereto is a proposed *Local Number Portability Operations Agreement* to govern the porting of telephone numbers between our networks. The agreement is intended to establish a reasonable process and set of standards for local number portability. While such an agreement is not required to implement porting, Western Wireless believes that such an agreement will ensure a more efficient and effective means for both parties to meet their obligations associated with number portability.

Upon your review of this proposed agreement, please contact me at your earliest convenience so that we can discuss the terms of the agreement and make arrangements on how best to proceed with negotiations. At a minimum, I would like to coordinate with you on a monthly basis on the status of this agreement and the implementation of number portability. Please acknowledge receipt of this agreement and let me know the date and time within the next month that we can discuss further.

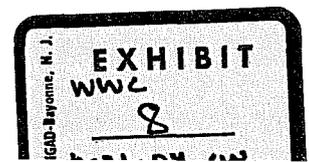

I can be reached by phone at 425-586-8633, by facsimile at 425-586-8118, or via email at [mike.wilson@wwireless.com](mailto:mike.wilson@wwireless.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'M. Wilson', written over a horizontal line.

Mike Wilson  
Manager - Regulatory Compliance

Transmittal No. 1025

Secretary  
Federal Communications Commission  
Washington, D.C. 20554

Attention: Wireline Competition Bureau

The accompanying tariff material, issued on behalf of the National Exchange Carrier Association, Inc. (NECA) bearing Tariff F.C.C. No. 5, Access Service, is sent to you for filing, in compliance with the Communications Act of 1934, as amended.

The filing, to become effective June 1, 2004, consists of tariff pages as indicated on the following check sheet:

Tariff F.C.C. No. 5

532nd Revised Page 1

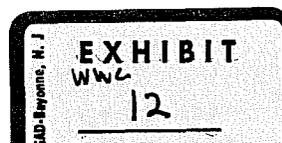

This filing adds Barry County Telephone Company (SAC 310676) to the list of companies applying Local Number Portability (LNP) End User Charges.

In compliance with Section 61.14 of the Commission's Rules, the transmittal, associated files, required Form 159 and \$695.00 filing fee are being transmitted electronically today via the Commission's Electronic Tariff Filing System.

All correspondence and inquiries concerning this filing should be directed to me at the above address or faxed to 973-884-8082.

**NATIONAL EXCHANGE CARRIER ASSOCIATION, INC.**  
**REVISIONS TO ACCESS TARIFF F.C.C. NO. 5**  
**LOCAL NUMBER PORTABILITY CHARGES**  
**TRANSMITTAL NO. 1025**  
**May 17, 2004**

**DESCRIPTION AND JUSTIFICATION**

**1. INTRODUCTION**

The National Exchange Carrier Association, Inc. proposes to modify its Access Tariff F.C.C. No. 5 to reflect the addition of Local Number Portability (LNP) End User Charges for Barry County Telephone Company (Barry), which has received a bonafide request for number portability. The services provided by Barry are consistent with Section 13.14, Local Number Portability Services, of NECA's Tariff F.C.C. No. 5.

**2. LNP DEMAND, COST AND RATE DEVELOPMENT**

The demand for LNP capable access lines and queried calls were projected over 5 years. Barry County Telephone Company does not currently have PBX or PRI-ISDN lines; however, a PBX End User Charge and a PRI-ISDN End User Charge have been calculated for it, at nine times and five times the End User Charge, respectively.

Costs provided by the company include switch up grade costs required to support wireline and wireless LNP capability, and projected ongoing charges over 5 years. LNP End User Charges were set to equate the present value of revenues to the present value of cost outlays. Present values of total costs were obtained using a discount factor of 15.21%, which is the after-tax cost of money (11.25%) grossed up for the tax rate (35%). This gross-up is only applied to the equity portion of the cost of money, because the debt portion is already tax-deductible, but the equity portion is taxable.

The circuit switching costs used in the development of the LNP End User Charges are only those direct costs required to implement LNP. In identifying which of these LNP costs could be included in the rate, the company used two criteria to isolate LNP costs, based on the FCC guidelines: (1) the costs would not have been incurred by the telephone company if number portability was not implemented, and (2) the costs were incurred "for the provision of" number portability. Using these criteria yielded an investment amount of \$39,500. This amount includes switch manufacturer LNP software fees and translation costs.

Beginning year one, expenses recovered by the End User Charge range from \$16,000 to \$19,000 per year, and fall into two categories: a) projected charges to be paid to the query provider for queries that the telephone company initiates in its capacity as an N-1 carrier, and b) database administrator charges, and training costs. Query expenses are

only for queries necessary to complete local and Extended Area Service (EAS) calls originated from the company's end users. End user query expenses were obtained by multiplying query projections by the per query rate, paid by the telephone company to its query provider.

The demand and costs used to develop LNP End User Charges for the company are detailed in Exhibit 1. (See Exhibit 1 attached.)

# 2004 Rural Youth Telecommunications Survey

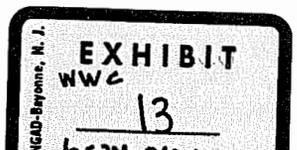

***Teen Preferences Create New Windows  
of Opportunity for Rural Telecom Carriers***

Foundation  
for Rural Service

**NTCA**   
NATIONAL TELECOMMUNICATIONS COOPERATIVE ASSOCIATION  
The Voice of Rural Telecommunications  
[www.ntca.org](http://www.ntca.org)

## ABOUT THE NATIONAL TELECOMMUNICATIONS COOPERATIVE ASSOCIATION

NATIONAL TELECOMMUNICATIONS COOPERATIVE ASSOCIATION

*The Voice of Rural Telecommunications*

[www.ntca.org](http://www.ntca.org)

The National Telecommunications Cooperative Association (NTCA) is the preeminent telecommunications industry organization dedicated exclusively to representing and serving the interests of the nation's small, rural incumbent local exchange carriers (ILECs). These cooperative and commercial community based telecommunications providers play a leading role in advancing the communications revolution currently underway. Their presence in rural communities helps ensure the economic future of those communities, as well as that of the individuals they serve.

NTCA was formed by a group of these rural carriers in 1954 to help ensure their telecommunications interests were fully recognized and understood by federal policy-makers. The mission of NTCA and its members is clear—to ensure their ability to provide rural consumers with access to the most advanced, affordable communications services of the era. For more information about NTCA and its members, visit our Web site at [www.ntca.org](http://www.ntca.org), or call 703-351-2035.

## ABOUT THE FOUNDATION FOR RURAL SERVICE

The Foundation for Rural Service (FRS) was founded in 1994 to help strengthen the ties between rural communities and their families and businesses. Since its establishment by the National Telecommunications Cooperative Association, FRS has worked hard to promote, educate and advocate rural telecommunications issues to the public in order to sustain and enhance the rural way of life throughout America. Besides being heavily involved in youth education and empowerment, the Foundation for Rural Service leads aggressive public information campaigns and assists rural areas with economic and community development projects. For more information on FRS, visit our Web site at [www.frs.org](http://www.frs.org), or call 703-351-2026.

## **2004 Rural Youth Survey Reveals Shift in Teen Preferences; New Windows of Opportunity for Rural Telecom Carriers**

*By Athena Platis, NTCA Wireless Industry Analyst*

Young people are no strangers to telecommunications. One glance at world headlines proves they are using technology to do everything from foiling crimes through the use of mobile telephones embedded with tiny cameras to creating and releasing destructive Internet worms. The National Telecommunications Cooperative Association (NTCA) and the Foundation for Rural Service (FRS) recognize this, and through their annual rural youth survey, have encouraged rural carriers to “connect” with teens<sup>1</sup> in their markets and unlock the potential within.

The purpose of the annual youth survey, now in its third year, is to determine the unique telecom preferences of young consumers from rural areas and convey them to small independent carriers, so that they might modify their product offerings accordingly. Continuing the tradition of past surveys, questionnaires were sent to 2,000 former FRS Youth Tour participants and applicants to the FRS College Scholarship Program. Of these survey sent to youth<sup>2</sup> in rural communities across the United States, 670 were filled out and returned<sup>3</sup>.

### ***Confronting the Rural ‘Brain Drain’***

Rural America is threatened by a “brain drain”—its young people typically go away to college in larger metropolitan areas, and in many cases, leave behind for good their rural homes to live in urban areas after graduation. This loss of an educated labor force could have a potentially dramatic impact on the future viability of rural America. The ability to offer the same state-of-the-art telecommunications services as are available in non-rural areas could play a significant role in increasing the attractiveness and livability of rural communities.

Though telecom carriers of all sizes long have been advised to focus on these young consumers and begin building relationships with their “business customers of tomorrow,” the return on an investment in the youth market likely will materialize much, much sooner. When it comes to telecommunications, teens already are big spenders, and experts predict their wireless spending will increase dramatically over the next year.<sup>4</sup> With this in mind, NTCA and FRS recommend rural telecom carriers use the results of this report<sup>5</sup>, in conjunction with their own market research, to customize their youth-focused offerings and implement or enhance their targeted marketing and sales efforts

---

<sup>1</sup> In this report, the terms “teen” or “youth” are used to refer to those in the 17-20 age group.

<sup>2</sup> The majority of survey respondents-- 69%--attend a four-year college or university, and 18% attend a two-year college. High school students made up 10% of survey takers, with the remaining 3% not currently enrolled in school.

<sup>3</sup> Resulting in a 34% return rate.

<sup>4</sup> Boston-based market research firm Yankee Group estimates that teenaged wireless users in the U.S. generated \$5 billion in service revenues in 2003 and expects that figure to jump to \$21 billion for 2004.

<sup>5</sup> Percentages may not add up to 100 due to rounding.

today, so that they too might reap benefits from the new wave of revenue expected over the next few years.

### ***Wireless Penetration Among Rural Teens Continues to Rise***

An astonishing 86% of survey respondents said they have their own wireless phone, leaving only 14% without. This penetration rate among rural teens, which is significantly higher than estimations for the youth market on a national level,<sup>6</sup> most likely is attributed to the safety and convenience issues associated with life in small towns.

While statistics show that the crime rates in small towns typically are lower than those in urban areas, safety still is a major concern due to the spread-out nature of rural communities, the long distances traveled to go to school or sports activities, and the steady decline of payphones in small communities. When a teen becomes stranded with a flat tire on a rural road at night, a personal, mobile communication device is more than a convenience. It is a safety tool. The fear of scenarios such as this provides much of the push behind wireless penetration in rural youth markets. For this reason, a mobile wireless device increasingly is seen as more of a necessity than a luxury in rural America.

In addition, wireless service can be expected to have a higher penetration rate among college students not living at home than among high school students. Wireless service not only offers increased convenience and privacy, but also can free college students from having to subscribe to the typically high-priced, low-quality, university-provided wireline phone service.

Among those survey respondents who were cellular customers, very few, just 5%, identified themselves as prepaid wireless customers. The other 95% have postpaid wireless service contracts. These numbers have shifted slightly from the 2003 survey, which placed the division at 7% and 93% for prepaid and postpaid wireless customers, respectively. Of those indicating they prepay for wireless service, 50% said they do so because their parents buy their phone and plan. This indicates that parental decision-makers are a major force behind prepaid wireless, a factor that rural carriers should consider when marketing such services.

This year's survey also shows that parents largely support traditional contract wireless services, with 60% of survey takers reporting that their parents buy their phone and pay for their airtime each month. With the role of parents as bill-payers in mind, where and when feasible, rural carriers should consider bundling landline and wireless services into one bill. Since the survey shows parents, generally, are paying for their teens' wireless consumption, it makes sense to consolidate wireless services into a bill they already are paying. Such a convenience could be a significant factor when parents are deciding on a carrier for their child's wireless service.

---

<sup>6</sup> According to a 2003 study the Yankee Group, nationwide, 56% of young people ages 11 to 17 own or share a cellular phone.

### ***Voice Still 'King' in Rural Areas, but Text Messaging Catching On***

The frequency of wireless phone usage among rural youth appears to be on the rise, with 45% of respondents saying they “always” use their wireless phones, up from 38% last year. The number of respondents indicating that they “frequently” use their cellular phones fell to 43%, down from 46% last year. This drop can be contributed partially to a shift in responses from “frequently” to “always,” as noted above.

Ninety-eight percent of survey takers said they use their wireless phones most often for voice calls, proving voice is still the “killer app,” despite increasing industry hype surrounding wireless data services. And young people in rural areas seem to have plenty to say: 30% of the rural teens surveyed said they racked up, on average, between 251 and 500 minutes of use per month on their cellular phones, relatively the same as last year’s 31% result for this category. The percent of survey respondents that identified themselves as users of, on average, between 501 and 750 wireless minutes per month increased slightly, to 23%, up from 20% in 2003.

This slow trend toward increased monthly usage had a mild effect on the lower part of the minute scale, with 22% of respondents indicating they use 250 minutes or less each month, down from 26% the year before. On the high end, responses from those using between 751 and 1,000 minutes also were up slightly, from 12% in 2003 to 14% this year. The results for the 1,001 minutes or more category held steady at 11%.

The survey shows the average monthly bill of rural youth has increased over the last year, with 31% of respondents saying they generally spend between \$51 and \$100 a month on wireless services, up from last year, when the same category generated a response of only 19%. This jump in wireless spending is reflected in the decline in responses for monthly bills ranging from \$26 to \$50. This year that category received only 53% of responses, down from 64% last year. When those without wireless phones were asked for the primary reason they didn’t have one, 58% indicated that service was too expensive.

The survey further shows that the wireless messaging craze has finally hit rural markets, with defined increases in text messaging usage since 2003. Most significantly, 12% of respondents specified that they “frequently” use the text messaging feature on their phones, double last year’s 6%. Forty-six percent of survey respondents said they “never” text message from their mobile phones. This is a significant change from last year, when 62% noted that they “never” sent text messages from their wireless phones.

### ***Local Calling Gains Ground in Promotional Popularity***

When it comes to wireless service promotions, the preference for free nighttime minutes beat out free long-distance, which was last year’s favorite. The free nighttime minutes option was preferred by 38% of survey respondents, up from 27% last year, followed by free long-distance at 21%, down from 31% in 2003. This shift seems to indicate that rural teens are using their wireless phones most frequently for local, rather than long-distance, calling. This would be good news for small wireless operators that can more easily afford to give away in-network minutes and local out-of-network calls than long-distance calls.

If this trend toward local calling continues, rural wireless carriers could find themselves better positioned to compete with the nationwide carriers, which currently are eating into their customer bases with hard-to-match long-distance promotions. The survey also indicates that free roaming, family plans and “buddy plans” proved to be less popular promotions among rural youth, resulting in responses of 13%, 10% and 2%, respectively.

The survey also shows that rural teens continue to prefer larger wireless companies for their wireless carrier of choice, with 75% of respondents indicating they are customers of nationwide carriers, up from 70% last year. As a result, responses from those served by small regional carriers dropped to 20%, down from 23% the year before. While these numbers seem to illustrate small regional wireless carriers are losing ground in the race for share of their own youth markets, the shift in consumer preference from free long-distance to free local could create a foothold for small carriers in the struggle against their larger competitors.

### ***Rural Youth Show Trend Toward Wireless Displacement of Wireline Services***

Survey results indicate that wireless displacement of wireline services is not just a threat, but an emerging reality. In fact, wireline displacement is growing at an alarming rate among rural youth, with 20% of survey takers saying they “rarely” use the landline phone in their residence, up from just 13% last year<sup>7</sup>. Those indicating they “never” use the landline phone in their homes also jumped sharply, from 6% last year to 14% this year. This trend shows the slow but steady progression of the youth market toward complete disassociation from landline phones.

This shift toward wireless not only is logical because of the obvious convenience and mobility factors, but also because cellular phones provide an outlet for personal expression and privacy usually not attainable with landline phones. Recognizing this connection between wireless phones and self-expression is wireless handset maker Nokia. The company is pushing the role of wireless phones in teen culture through the creation of YouthActionNet, an online forum and Web site designed to encourage activism and interaction among young people via high-tech communications tools, such as the Internet and wireless telephony<sup>8</sup>.

The integration of mobile phones and their capabilities into the lifestyles of teenagers makes portability a critical factor. For this reason, it is not surprising to find that, when asked which phone feature was most important, an overwhelming 59% of survey takers said “small size.” The response beat out other options less critical to ease of portability, including color screen, camera features and downloadable ring-tone capabilities. Rural wireless carriers should consider this preference and keep the very “mobile” nature of school-going teens in mind when selecting handsets for their product portfolios.

---

<sup>7</sup> Market research firm In-Stat/MDR finds that 14.4% of U.S. consumers use a wireless phone as their primary phone, versus 85.6% who still use a landline as their primary phone. The firm also reports that of those consumers still using a landline as their primary phone, 26.4% would consider replacing it with a wireless phone, creating a considerable potential for wireline displacement over the next few years.

<sup>8</sup> Nokia, together with the International Youth Foundation, launched YouthActionNet in 2001.

The survey shows that 58% of respondents use their landline phones primarily for local calls, down only slightly from last year's 61%. With so many wireless plans now offering free long-distance calling, it is not surprising that landlines would be reserved almost entirely for local calling. This was underscored by the response rate in the survey, as only 8% of respondents said their primary use for landline is long-distance calling. Of those surveyed, 14% said they use their landline primarily for an Internet connection.

### ***High-Tech Teens Can Deliver Revenue Boon for Rural Carriers; Act as Gateway to Recruiting Older Customers***

One might think that teens provide the impetus for subscribing to wireless telephone service. However, further investigation reveals that many don't even have to ask for the phone, but instead are offered the device by their parents, as 60% of survey takers indicated that their parent or guardian pays for the service. Safety issues and the desire to "keep in touch" were the prime motivating factors behind the parental purchases of wireless service.

As current events and the heightened state of national security direct trends in the demand for mobile wireless service, rural carriers have new opportunities to play a role in personal safety<sup>9</sup>. With this in mind, rural carriers would be wise to add indirect marketing techniques to their existing campaigns in which promotions and sales, though aimed at the youth market, are funneled through their parents.

By incorporating these alternate routes for telecommunications marketing, carriers could expand their reach and, potentially, win more subscribers. In fact, this kind of marketing has the potential to become circular, because parents often come to operate high-tech/telecom devices, and integrate them into their daily lives either by passively watching or actively learning from their tech-savvy children.

Rural carriers should not only target the youth market as a customer base in and of itself, but also should view young people as possible conduits for bringing advanced telecommunications services into the homes and lives of the often less technology-literate middle-aged consumer.

---

<sup>9</sup> Safety is a two-way street, however, and although cellular phones can be life-saving devices, they also have been, for years, viewed as instruments of distraction, most notably when used by drivers in their cars. While driver distraction due to cellular phone use is dangerous enough alone, when inexperience behind the wheel is added into the mix, the result can be especially deadly/dangerous. The National Transportation Safety Board began calling for a ban on cellular phone use by new drivers last year. Similarly, a bill that would make it illegal for 16- and 17-year-old drivers to use cellular phones while driving a car was introduced by the California Senate committee in April 2004. Other state governments are considering similar legislation. Rural wireless carriers can contribute to these safety-focused efforts by developing campaigns, perhaps in cooperation with area high schools and driver education centers, that promote sensible wireless usage and avoiding phone usage while driving. Companies such as Cingular Wireless and NEC America already have similar initiatives in place.

### ***Internet Usage Patterns Hold Steady, but Broadband Penetration is on the Rise***

Forty-five percent of respondents said they use the Internet most often to access educational or reference material. This result is up only slightly from 42% last year, but shows a significant growth trend since 2002, when the category garnered only 32% of the responses. The popularity of educationally focused Web use is logical for this target group, considering 97% of this year's survey takers were enrolled in school<sup>10</sup>. Entertainment content on the Internet maintained its popularity, resulting in 32% of the response, virtually unchanged from 31% in 2003.

Those indicating they accessed music-related Web sites decreased to 12% this year, down from 16% in 2003 and 20% in 2002. This decline should not be attributed to a lack of desire by teenagers to access music online, but instead should be seen as a side effect of the backlash by the music industry over music unlawfully downloaded from the Internet, which has led to the legal prosecution of many young people. The increasing availability of music downloads on mobile handsets undoubtedly is a contributor as well. Teens who said they visited news and sports-related Internet sites most often resulted in only 6% and 5% of responses, respectively.

As for time spent online, 47% said they spend, on average, between one and three hours a day online, up from 43% last year. This was followed by 38% who said they spend less than an hour online, a slight decrease from 40% in 2003. This category was rounded out by the 12% who said they spent between three and six hours a day online, as compared to 13% last year, and the 3% who indicated they spent more than six hours a day surfing the Internet, also a slight decline from last year's 4%.

An overwhelming 83% of teens surveyed said they had Internet access both at home and at school. When it comes to Internet connections, the survey shows an increased penetration of broadband in rural areas. One-fourth, or 25%, of survey-takers, identified themselves as having a DSL (digital subscriber line) Internet connection, up significantly from 16% last year. This shift toward broadband partially is responsible for the decrease in response from dial-up customers, which fell to 50% this year, down from 57% in 2003 and 70% in 2002. The tally for cable and wireless connections remained fairly steady at 13% and 3%, respectively.

### ***Rural Youth Should Be Paramount in Rural Carriers' Business Plans***

NTCA and FRS are committed to helping rural carriers bring advanced telecommunications to rural America, not only to maximize their revenues today, but also to create environments that are technologically advanced enough to attract and keep young people in rural America in the years to come. With this goal in mind, NTCA and FRS advise small rural telecommunications carriers to consider the young consumers in their service areas a top priority when creating product and service offerings, selecting handsets and planning marketing campaigns.

---

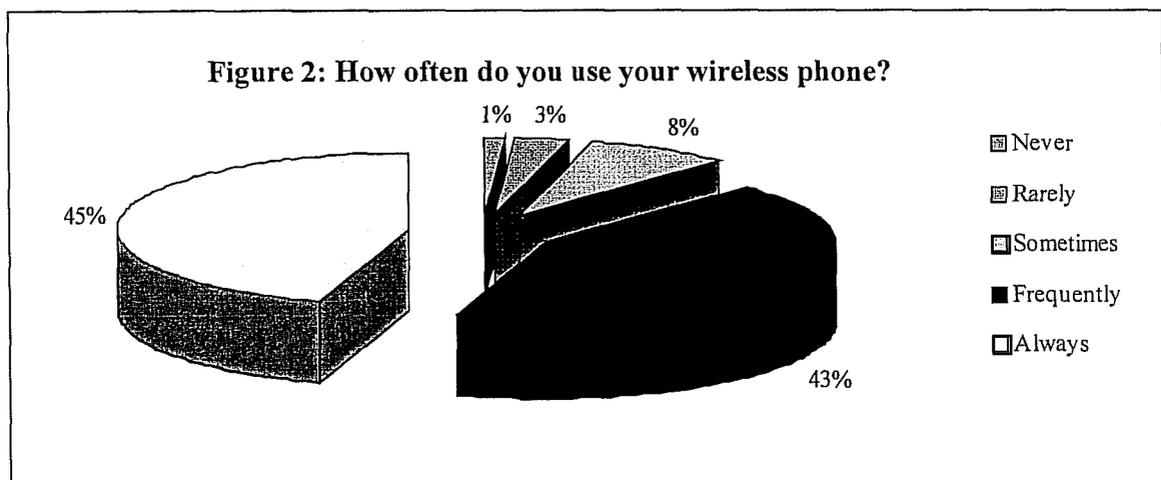

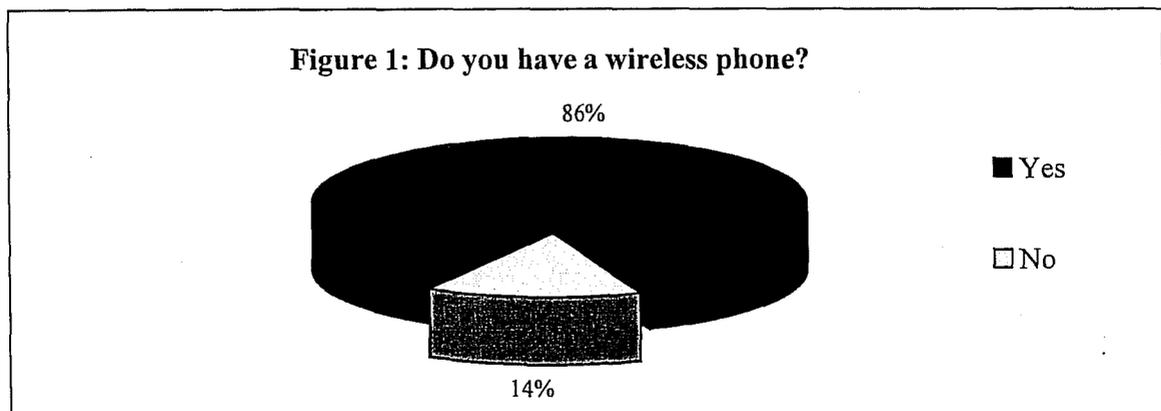

<sup>10</sup> Sixty-nine percent of survey takers said they attended a four-year college/university, followed by 18% attending a two-year college and 10% attending high school. Only 3% indicated they were not currently enrolled in school.

By reacting to the trends and strategies identified in the 2004 Rural Youth Survey, and by gathering their own youth-focused data, rural wireless carriers may find they are more effectively able to combat the growing threat of nationwide carriers offering service in their markets.

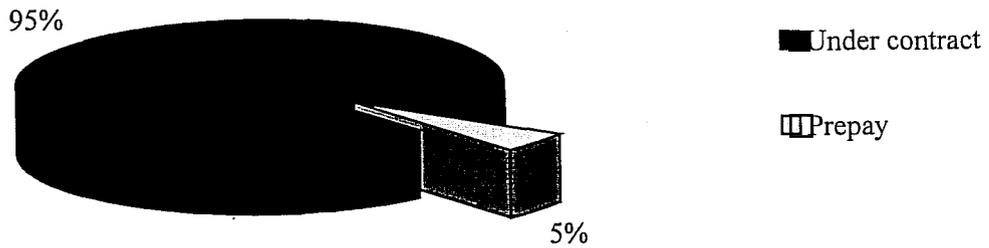

The 2004 Rural Youth Survey shows that wireless penetration in the rural youth market is sky-high and getting higher, and that phones are used most often for local voice calls. However, while wireless may be slowly displacing wireline services as the rural teenager's preferred mode of communication, the forward-thinking, tech-savvy nature of the younger generation should be viewed by rural carriers as an opportunity rather than a threat.

As an added bonus, by recruiting new, young telecom consumers, rural service providers may find they have a gateway for marketing to their existing customer base. By creatively playing up their unique strengths within their markets, such as brand recognition, leveraging strategic local relationships (with schools and universities where possible) and bundling with landline services when possible, rural carriers could find they have significant advantages over their national counterparts.

In the Matter of the Petition by the Minnesota Independent Coalition for Suspension or Modification of Local Number Portability Obligations Pursuant to 47 U.S.C. § 251(f)(2)      MPUC Docket No. P401, et al./M-04-707

**COMMENTS OF QWEST CORPORATION  
REGARDING MIC PETITION**

**INTRODUCTION**

Qwest Corporation ("Qwest") submits these comments on the Petition of Members of the Minnesota Independent Coalition (collectively, "MIC Companies") for Suspension or Modification of Local Number Portability Obligations Pursuant to 47 U.S.C. § 251(f)(2) of the Telecommunications Act of 1996 ("Petition"). Qwest Corporation takes no position regarding the MIC's request for suspension, does not object to a temporary short term agreement that only addresses CMRS transit traffic, but does object to the MIC's request that the Commission require TELRIC like rates for Qwest to provide such services.

Qwest files these comments to outline its position on these issues and to respond to a number of allegations made by the MIC in its petition. First, it is essential to recognize that it is the MIC Companies who have the wireless LNP obligations at issue in this case; these are

not Qwest's obligations.<sup>1</sup> The MIC Companies have a number of alternatives for meeting their wireless LNP obligations. Only one of those alternatives involves purchasing services from Qwest. Finally, the MIC should act to meet those obligations in as expedient a manner as is possible.

Qwest would like to be the provider of transit to allow the MIC Companies to meet their obligations. However, Qwest wants to be compensated appropriately through a market-based rate for providing the service to MIC Members. Qwest's expectation is no different than the expectation of other potential providers of these services to the MIC Companies. In an effort to provide service to the MIC Companies, Qwest has made two alternatives available for providing the service, (1) Qwest has offered an interim ninety day arrangement for wireless LNP transit service, that Qwest would be able to implement for all 106 trunks at issue in this case within three weeks of a signed agreement, and (2) Qwest has proposed a more long term agreement covering the transit function that Qwest provides to MIC Companies and for which the MIC Companies currently are not paying Qwest. Not satisfied with the options Qwest has offered, the MIC Companies seek to have this Commission put its thumb on the scale of these negotiations in an illegal attempt to force Qwest to provide transit service to MIC Companies at illegal and economically unreasonable rates.

In these comments, Qwest makes the following points:

- The MIC Companies have had the obligation to provide LNP since 1996, and have had a specific deadline of May 24, 2004 to implement wireless LNP since

---

<sup>1</sup> Qwest also has wireless LNP obligations, but has met its obligations and is not seeking relief from its obligations from the Minnesota PUC.

November 10, 2003. The MIC Companies first contacted Qwest about routing wireless LNP calls on March 12, 2004, eight years after the passage of the act and four months after the FCC order.

- The MIC Companies have two relevant obligations under the act: (1) updating their switch to be LNP capable; and (2) updating their networks to permit their customers to call the ported number.
- Qwest does business with independents in 14 states. Other independents have very rarely made similar requests to the one made in Minnesota.
- With respect to the obligation to update switches, it appears that certain MIC Companies have not yet complied with their obligations. With one exception, it appears that the MIC Companies have not requested a waiver of the May 24 deadline for upgrading their switches.
- With respect to the routing of traffic, MIC Companies have multiple options for routing such calls. Attached as Exhibit 1 is the diagram presented to the Commission at the May 20, 2004 Commission Meeting, modified to reflect the addition of Onvoy, who is the listed toll tandem provider for most MIC Companies. Among other options, MIC Companies can (1) direct connect with the wireless companies; (2) route the calls through their existing toll tandem provider (usually Onvoy); (3) route the calls through Qwest's tandem; or (4) hand off to another third party.
- Qwest would like to carry this traffic through its tandems. Qwest would like to obtain this business through an agreement with MIC Companies that want such

service, on terms that are economically reasonable. In the event the MIC Companies are not able to agree to terms with Qwest, they have other alternatives for meeting their obligations.

- The MIC Companies have taken the position that Qwest should be required to provide this tandem service at TELRIC type prices. Their position is contrary to law and contrary to agreements reached in other states for the transit of wireless bound traffic.
- The legal framework surrounding the obligations of a tandem provider to an ILEC is covered under 47 U.S.C. § 259, which prohibits governmental requirements of tandem providers that are “economically unreasonable or contrary to the public interest.” 47 U.S.C. § 259(b)(1); 47 C.F.R. § 59.2(a).
- Qwest’s proposed rate is economically reasonable and market based. It is consistent with offerings from other tandem providers and covers Qwest’s costs.
- The MIC Companies have thus far not accepted Qwest’s offers of a permanent or interim solution.

## **BACKGROUND**

### **1. Wireline to Wireless Porting Obligations**

In 1996, Congress passed the Telecommunications Act which imposed a requirement that all local exchange carriers have the “duty to provide, to the extent technically feasible, number portability in accordance with requirements prescribed by the [FCC].” 47 U.S.C. § 251 (b)(2). Under the Act and the Commission’s rules, local number portability is defined

as “the ability of users of telecommunications services to retain, at the same location, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another.”<sup>2</sup>

The FCC released the Local Number Portability *First Report and Order* in 1996, which promulgated rules and deployment schedules for the implementation of number portability and indicated that number portability obligations would include intermodal porting between wireless and wireline carriers.<sup>3</sup> The FCC stated that “section 251(b) requires local exchange carriers to provide number portability to all telecommunications carriers, and thus to Commercial Mobile Radio Service (CMRS) providers as well as wireline service providers.”<sup>4</sup>

On November 10, 2003, the FCC issued an order requiring that wireline local exchange carriers offer local number portability for customers that wish to convert a land line phone number to a wireless provider. The order required that within the top 100 MSA’s, incumbent carriers must make wireline to wireless porting available by November 24, 2003. The FCC delayed the requirement for other areas until May 24, 2004.

## **2. Steps Taken by MIC Companies to Comply with FCC Order**

In order to comply with the directives of the FCC, local exchange carriers must be able to do two things: (1) have a switch that is capable of porting numbers; and (2) be able to route calls from the customer of the local exchange carrier to the wireless provider. The

---

<sup>2</sup> 47 U.S.C. § 153(30); 47 C.F.R. §52.21(k).

<sup>3</sup> Telephone Number Portability, CC Docket No. 95-116, First Report and Order and Further Notice of Proposed Rulemaking, 11 FCC Rcd 8352 (1996) (First Report and Order).

<sup>4</sup> *Id.* at 8431, para. 152.

petition of the ILECs seeks a temporary waiver of its obligation, purportedly based on a desire to obtain more favorable terms for routing ported calls. While Qwest has not reviewed the local exchange routing guide for all of the MIC Companies, at present, it appears that certain MIC Companies have not made the necessary switch upgrades to accomplish wireless porting. For example, the LERG does not reflect that Home Telephone and Cannon Valley are listed as having switches that are LNP capable. Thus, these companies may not be in a position to provide LNP because of their lack of appropriate facilities.

With respect to the second requirement, routing of traffic, local exchange companies have several options for routing such calls, including,

- Direct connections with the wireless company;
- Routing through the Onvoy access tandem;
- Routing through Qwest's tandem;
- Routing through another third party.

(See Exhibit 1). The distinguishing factor between these options is cost. It is important to note that the MIC Companies did not claim that routing through Qwest's tandem was the only *technically feasible* alternative; they stated that it was the *least expensive* alternative. Whether the MIC Companies route through the two available tandem providers, Onvoy (which is principally owned by MIC Companies) or Qwest, the tandem provider, would require ILECs to compensate them.

## DISCUSSION

### 1. Onvoy is a viable alternative for routing wireless LNP calls

Historically, predecessors to Qwest, Northwestern Bell and U S West had provided the majority of tandem switching functions in Minnesota. At that time Qwest and the ILECs had two-way trunks installed between the ILEC end offices and the Qwest tandems. However, when Onvoy (formerly MEANS) was created, most members of the independent industry in Minnesota chose to remove Qwest as their tandem provider, and Onvoy began performing their tandem functions. At that point, the two-way trunks were converted to one-way common trunk groups carrying Qwest and other miscellaneous terminating traffic to the ILECs. Originating traffic from the Onvoy member companies to the world needed to transit the Onvoy tandem.

In fact, ONVOY is listed as the originating tandem for these companies in the LERG (Local Exchange Routing Guide). The LERG is the routing "bible" used within the telecommunications industry to document the proper routing of traffic. The LERG information runs counter to the claims made by Tom Burns that Qwest is the Access Tandem provider for most MIC Companies. For example, the table below lists LERG information for the first five end offices identified by MIC.

CARRIER	END OFFICE	ACCESS TANDEM LISTED IN 3/12/04 LETTER	Actual Originating Toll Tandem Listed in LERG	Owner of Actual Toll Tandem	Originating Local Tandem listed in LERG
Home Telephone	GDMDMNXG75G	ROCHMNRO12T	PLMOMNBN01T	MEANS/ONVOY	None
Cannon Valley Tel	MRTWMNXMDS0	OWTNMNOW12T	PLMOMNBN01T	MEANS/ONVOY	None
Cannon Valley Tel	BRCLMNXBDS0	OWTNMNOW12T	PLMOMNBN01T	MEANS/ONVOY	None
Farmers Mutual Tel	BLHMMNXB56G	STCDMNT012T	PLMOMNBN01T	MEANS/ONVOY	None
Federated Tel	CHOKMNXCDS0	STCDMNT012T	PLMOMNBN01T	MEANS/ONVOY	None

The MIC Companies claim that routing calls through Onvoy is not a viable alternative to them. They have alluded to three reasons why Onvoy is not a viable alternative: (1) Onvoy does not have a direct connection to the wireless providers; (2) technical hurdles prevent the MIC Companies from routing through Onvoy; and (3) such routing would be illegal. Each of these arguments is meritless and is being raised by the MIC Companies in an attempt to force Qwest to provide tandem transit service at economically unreasonable rates.

The fact that Onvoy does not have a direct connection with wireless companies is irrelevant. Onvoy does have a connection to the public switched telephone network. Once Onvoy sends a call on the network, it will be routed to its ultimate destination, including wireless carriers.

The MIC Companies have intimated that technical hurdles exist associated with routing through Onvoy, but have not detailed the alleged technical hurdles. Onvoy is listed as the tandem provider for most of the MIC Companies. Currently, Onvoy must be routing toll calls to the same wireless carriers for which the MIC Companies now seek to send wireless ported traffic. There is no technical limitation preventing this option. Qwest will serve discovery in an attempt to understand the MIC's claims in this regard.

Finally, Mr. Burns alleges that routing through Onvoy would be illegal. This argument is contrary to the position taken by the independents in the Dakota Telecom Complaint proceeding. In that case, the parties reached and the Commission approved, an agreement that included an option to route all traffic through an access tandem.

None of the purported objections to use of Onvoy survive close inspection. Indeed, one would think Onvoy would be a strong bidder for providing transit service to these

customers given their common ownership and the interest any tandem provider would have in providing this service.

## 2. Qwest as an alternative

Qwest would like to earn the business from the MIC Companies of providing the transit traffic that they request and has offered an interim solution for the purpose of allowing the MIC Companies to route wireless LNP traffic within three weeks (Exhibit 2) and a long term agreement to pay Qwest for providing transit service for all transit traffic that the MIC Companies send through Qwest's tandem and for which Qwest currently receives no compensation, (Exhibit 3).<sup>5</sup>

The MIC Companies did not contact Qwest to request transit service until March 12, 2004, or over four months after the FCC Order and over seven years after the FCC issued its *First Report and Order* making clear that porting obligations would apply to wireless as well as wireline carriers.

From that time forward, Qwest has worked quickly to respond to the MIC's request.

The following timeline sets forth the relevant communications:

- March 12 – MIC consultant Tom Burns first contacts Qwest and follows up with additional information over the next few days. (Ex. 4A).
- March 18 – Qwest email identifies issues that would need to be addressed if Qwest were to provide the service. (Ex. 4B).
  - Agreement
  - Trunking established
- March 18 – Burns provides information and suggests solutions to issues raised by Qwest. (Ex. 4C).
- Friday, March 26 – Qwest reiterates the need to develop a contract and Burns requests a proposed contract. (Ex. 4D).

---

<sup>5</sup> Exhibit 3 is a revised version of the agreement that the MIC Companies are receiving for the first time with this filing.

- April 7 – Qwest communicates that it is attempting to finalize a proposed contract and expects that it will take until the end of April due to a desire to provide the service on a 14 state basis. (Ex. 4E).
- April 14 - In response to a Burns inquiry, Qwest confirm it does want to provide the service and will send a draft contract by the end of April. (Ex 4F).
- Between April 14-19 – Burns orally indicates he is requesting service for all MIC Companies he represents, not just the five he identified in earlier communications. (Ex. 4).
- April 19 - Qwest requests information regarding all of the companies included in his request. (Ex. 4G).
- April 23 - Burns provides detail for the first time on the 106 trunks he is seeking to convert. (Ex. 4H).
- April 30 – Qwest sends draft agreement. (Ex. 4I).
- May 6 – MIC sends their version of a proposed CMRS transit services agreement. (Ex. 4J).
- May 7 - Qwest sends proposed interim agreement to allow transit of wireless LNP traffic and allows completion of trunking by May 24 deadline. (Ex. 4K).
- May 10 – MIC rejects interim arrangement and files with commission for extension. (Ex. 4L).
- May 20 – Commission grants temporary stay.
- May 24 – Qwest orally reiterates willingness to enter into temporary arrangement.

The MIC Companies have rejected Qwest's proposals and instead sought a waiver of the May 24 deadline imposed by the FCC. The MIC Companies have taken the position that Qwest is obligated to provide them with transit service and to do so at TELRIC rates. The MIC Companies cite no authority for this position. Indeed they cannot.

TELRIC pricing is a unique cost methodology for determining rates for unbundled network elements pursuant to Section 251 of the Act. There is no specific requirement under Section 251 of the Act for an incumbent local exchange carrier to provide transit services to *anyone*, let alone to ILECs. However, since EAS was begun prior to the Act, existing facilities (as discussed above) were already in place between small ILECs and Qwest. Once other carriers (wireless and wireline) began offering services and interconnecting with

Qwest's network, under both § 251 and § 332 of the Act, Qwest provided transit services where two way trunking existed and appropriate routing was in place, with originating carriers connecting under § 251/252 and § 332 and under rates, terms and conditions in the parties' interconnection agreements. However, Qwest has determined that ILECs are also using Qwest for transit services, with no agreement structure (other than isolated examples) in place and no compensation paid to Qwest by originating carriers.

In examining MIC's requests for transiting services, the appropriate legal framework of this request would be under § 259 of the Act, as its members are requesting, "public switched network infrastructure, technology, information, and telecommunications facilities and functions" *see generally FCC R&O on Implementation of Infrastructure Sharing Provisions in the Telecommunications Act of 1996, CC Docket No. 96-237*. If a carrier is a "qualifying carrier" under § 259(d), it is able to request the transit services. However, § 259(b)(1) also states that a local exchange carrier engaging in such infrastructure sharing is not required to take actions which are economically unreasonable. Thus, Qwest has proposed rates, terms and conditions that, in its business judgment, are economically reasonable. Qwest is also preparing to offer these services to other qualifying carriers throughout its territory, in order to ensure that carriers are treated on a nondiscriminatory basis.

MIC has failed to cite any alternate authority for its request, thus the sole legal framework is the § 259 agreement. Qwest has done nothing more than offer economically reasonable rates, terms and conditions, as it is entitled to do so under §259 and it had met its burden under § 259. MIC's position is that Qwest is required to continue to provide transit services free of charge, which is not supported by any applicable rules or law.

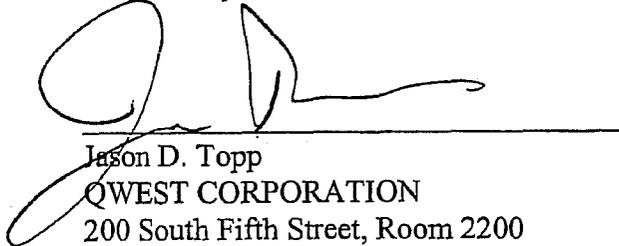

## CONCLUSION

Qwest Corporation does not object to the MIC Companies' request for an extension of the FCC deadline. Qwest hopes to provide the MIC Companies with transit service, but the MIC Companies have not requested and are not entitled to an order requiring Qwest to provide the service on economically unreasonable terms. Qwest respectfully requests that the Commission rule on the appropriateness of the MIC's extension request and then allow the MIC Companies to route wireless LNP traffic using any of the four options available to them. Qwest suggests that any attempt to force the price Qwest offers to the MIC Companies for transiting traffic to TELRIC pricing would be illegal and unnecessarily give MIC Companies an artificial device to force Qwest to provide service on economically unreasonable terms and conditions rather than negotiate a resolution with the tandem provider that they own. Qwest also suggests that any attempt to limit negotiations is unnecessary given that Qwest is willing to provide an interim arrangement until a more permanent agreement can be reached. In the event a more permanent agreement cannot be

reached, Qwest will take appropriate action to obtain compensation for the transiting functions it provides.

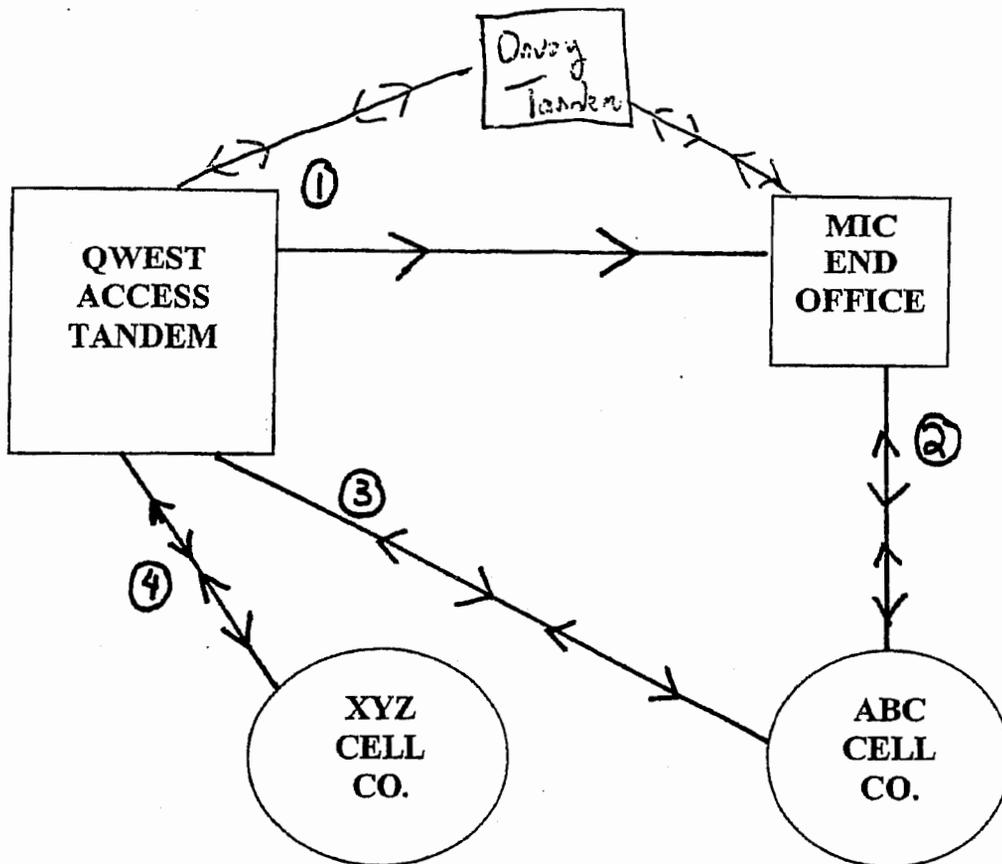

DATED: June 1, 2004

Attorney for Qwest Corporation

1. Facility from Qwest Tandem to MIC – Today, this is one-way traffic.
2. Direct connection between ABC and MIC.
3. ABC is connected to the Qwest Tandem.
4. XYZ is connected to the Qwest Tandem.

## Exhibit 1

This letter is to provide an interim measure for Qwest to provide Transit Service to ILECs for Wireless LNP while Qwest and such ILEC are currently negotiating a Transit Service Exhibit under 259 for all transit traffic in Minnesota.

While Qwest believes it is not under an obligation to provide transit service, Qwest is willing to provide such service to ILECs under a Transit Services Exhibit (the "Exhibit"), as part of an Infrastructure Sharing Master Services Agreement under 47 U.S.C. §259 (the "Agreement"). Since Qwest and such ILEC cannot finalize terms and conditions of the Exhibit and the Agreement in a timeframe to allow the ILECs to comply with the Wireless LNP order, Qwest is offering this interim measure for Transit Service for the Wireless LNP transit traffic.

This interim arrangement would begin effective May 7, 2004 and cease in 90 days should ILEC and Qwest not have a signed Agreement and Exhibit. Should ILEC and Qwest agree to and sign an Agreement and Exhibit, this Wireless LNP transit traffic would be included as a part of all transit traffic.

Since Qwest currently does not have the recording capability to record ILEC originated traffic transiting through Qwest's network to a third party, Qwest will bill ILEC based on that ILEC's actual transit minutes for Wireless LNP provided by the originating ILEC to Qwest on a monthly basis. Data are subject to audit by Qwest no more than once during this 90 day timeframe. These MOU will then be multiplied by the transit rate of \$.0089 per MOU. Each month Qwest will bill this amount to the ILEC. If the originating ILEC doesn't provide Qwest with data to bill, Qwest will bill a minimum charge of \$20 per month per ILEC in the rural area and a minimum charge of \$800 per month per ILEC in the Minneapolis/St. Paul metro area this is only for the 90 day timeframe and only for the ILEC originated transit usage related to Wireless LNP transit traffic. This interim method will be utilized until Qwest has actual originating transit routed traffic measurements available.

In order for Qwest to provision network modifications necessary for ILECs to provide Wireless LNP under this interim measure by a May 21, 2004 timeframe, Qwest will need from each ILEC a signed copy of this letter, 2/6 codes and accurate A-Z locations for each trunk group involved as soon as possible, but no later than close of business Tuesday, May 11, 2004 to ensure completion by the above mentioned timeframe. If this information is not sent to Qwest by close of business on Tuesday, May 11, 2004, Qwest will not be able to meet the May 21, 2004 timeframe for Wireless LNP network modifications and will not be in breach of this interim letter.

**MINNESOTA  
SERVICE EXHIBIT 5  
TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**1.0 TRANSIT SERVICES MINIMUM SERVICE TERM.**

The term of this Service Exhibit 5 shall commence upon the Effective Date of the Agreement (or an amendment hereto, as applicable) and remain in effect for the same period listed in Section 7 of the Qwest Infrastructure Sharing Master Services Agreement. Both parties shall provide the Transit Services, as further described herein, according to the terms and conditions of this Service Exhibit and the Master Services Agreement.

The Parties are incumbent local exchange carriers operating in certain respective communities which are located in adjacent, but not overlapping territories; the Parties do not compete against each other as local exchange carriers in those communities (collectively, the "Communities").

**OTHER TYPES OF INTERCONNECTION AND SERVICES EXCLUDED.** Nothing in this Agreement will be construed as granting to either party any collocation arrangements through either physical or virtual collocation ("Collocation"), any access to any unbundled network elements ("Unbundled Access"), or access to operational support systems ("OSS Access"), and nothing herein will be construed as waiving or limiting in any way any rights available to either party under the Act with respect to Collocation, Unbundled Access, OSS Access, or other matters, including, but not limited to, ancillary services such as signaling access to call-related databases, directory assistance, white pages directory listings, busy line verify/interrupt, toll and assistance operator services, LIDB, access to poles/ducts/conduits, rights-of-way, 800 and CMDS. The parties reserve the right to negotiate such matters in separate agreements.

This Transit Services Exhibit is intended solely for the use of ILEC for its operations which are the subject of the Agreement, including the certification that ILEC is a "qualifying carrier" as defined by 47 U.S.C. §259. As such, this Exhibit applies solely to the uses discussed herein, and use of the services in a manner contrary to the restrictions of use in Section 2.0 shall be a material breach of the Exhibit and the Agreement.

Either Party may terminate this Transit Services Exhibit upon 90 day written notice to the other Party. Upon termination Parties agree that Transit Services between Parties will be terminated.

**2.0 TRANSIT SERVICES.**

Transit Service will be provided at each Party's local and access tandem switches, end offices providing local tandem functionality and end offices providing routing due to an unqueried call ported to another local services provider.

The Party originating the traffic acknowledges that it is its responsibility to enter into arrangements with each third party LEC, ILEC, CLEC, Co-Provider or CMRS for the exchange of transit traffic from such originating party and for the billing to the originating carrier for such exchange.

Each Party originating transit traffic acknowledges that the other Party has no responsibility to pay any third party LEC, ILEC, CLEC, Co-Provider or CMRS charges for termination of any transit traffic from such originating Party. Neither Party will default bill the other Party for unidentified traffic that neither Party can identify, which terminates on their respective networks, unless otherwise provided for in this Agreement. In the event that one Party can identify the traffic, and the other Party requests the transit records, the Parties will negotiate a separate agreement for the provision of those transit records.

Parties will not pay switched access on local calls in either direction between Parties and any third party LEC, ILEC, CLEC, Co-Provider or CMRS when local calls are routed through an access tandem.

**3.0 NETWORK RESPONSIBILITIES.**

If the traffic volumes between any two (2) end office switches including other ILEC, CLEC and CMRS switches, at anytime exceeds the centum call second ("CCS") busy hour equivalent of one (1) DS1 (512 CCS), the Parties will, within sixty (60) days of such occurrence, establish a new direct trunk group to the applicable end office(s) consistent with the grades of service and quality parameters set forth in this Exhibit.

Only those valid NXX codes served by an end office may be accessed through a direct connection to that end office

It shall be the responsibility of each Party to program and update its own Switches and network systems pursuant to the Local Exchange Routing Guide (LERG) to recognize and route traffic to the other Party's assigned NXX or NXX-X codes. Neither Party shall impose any fees or charges on the other Party for such activities. The Parties will cooperate to establish procedures to ensure the timely activation of NXX assignments in their respective networks.

Each Party is responsible for administering numbering resources assigned to it. Each Party will cooperate to timely rectify inaccuracies in its LERG data. Each Party is responsible for updating the LERG data for NXX codes assigned to its End Office Switches. Each Party shall use the LERG published by Telcordia or its successor for obtaining routing information

**MINNESOTA  
SERVICE EXHIBIT 5  
TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

and shall provide through an authorized LERG input agent, all required information regarding its network for maintaining the LERG in a timely manner.

To the extent available, the parties will interconnect their networks using SS7 signaling where technically feasible and available as defined in applicable industry standards including ISDN user part ("ISUP") for trunk signaling and transaction capabilities application part ("TCAP") for common channel signaling based features in the interconnection of their networks.

**4.0 OBLIGATIONS OF BOTH PARTIES.**

Parties will provide and maintain the equipment and facilities necessary to permit each other to furnish the services for which the Parties contract.

Parties will provision appropriate trunking to access tandems, local tandems and/or end offices with local tandem functionality, this includes but not limited to provisioning trunking with appropriate traffic use codes.

Parties shall have no obligation to supply a Service where facilities or technical abilities are limited.

**5.0 CHARGES AND PAYMENTS FOR TRANSIT SERVICES.**

The charge for the Transit Services provided by each Party under this Service Exhibit is reciprocal and listed in Schedule A, attached hereto and incorporated herein by reference.

The charges listed in Schedule A shall be subject to adjustment upon sixty (60) days prior written notice by either Party and shall remain reciprocal.

Parties shall be obligated to pay all applicable charges as set forth herein for Transit Services provided by the other Party.

Transit Provider will track usage and bill the originator of the traffic, and the originator of the traffic shall be responsible for and will pay the Transit Provider for all Rates and charges applicable to the calls placed to third party's end users.

Until such time that Qwest has the ability to record the originating traffic, the Parties agree to implement the interim transit charge provisions on Schedule B. When Qwest has actual recordings of originating transit usage available, Qwest will bill transit charges based on Qwest's recording of transit traffic usage.

A completed call shall be computed, calculated and recorded in accordance with the methods and practices of Transit Provider and the operating capacity and ability of Transit Provider's measuring equipment.

The originator of the traffic will pay the Transit Provider for transit traffic at the reciprocal rates specified in Schedule A. It is the responsibility of the originator of the traffic to provide billing information to the third party assuming that recording capabilities exist to obtain that measured data.

If, due to equipment malfunction or other error, Transit Provider does not have available the necessary information to compile an accurate billing statement, Transit Provider may render a reasonably estimated statement, but shall notify originator of the traffic of the methods of such estimate and cooperate in good faith with originator of the traffic to establish a fair, equitable estimate. Transit Provider shall render a statement reflecting actual billable quantities when and if the information necessary for the billing statement becomes available.

**6.0 DEFINITIONS.**

"Act", as used in this Exhibit, means the Communications Act of 1934 (47 U.S.C. Section 151 et seq.), as amended by the Telecommunications Act of 1996, and as from time to time interpreted in the duly authorized rules and regulations of the Federal Communications Commission ("FCC") or the Commission.

"Ancillary Traffic", includes all traffic destined for ancillary services, or that may have special billing requirements, including but not limited to the following: Directory assistance, 911/E911, Operator call termination (busy line interrupt and verify), 800/888, LIDB, and Information services requiring special billing.

"Co-Provider" means an entity authorized to provide Local Exchange Service that does not otherwise qualify as an incumbent Local Exchange Carrier ("LEC").

**MINNESOTA  
SERVICE EXHIBIT 5  
TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

"Incumbent Local Exchange Carrier" (ILEC), as used in this Exhibit, means with respect to an area, the LEC that: (1) on February 8, 1996, provided Telephone Exchange Service in such area; and (2) (i) on February 8, 1996, was deemed to be a member of the exchange carrier association pursuant to § 69.601 (b) of the FCC's regulations; or (ii) is a person or entity that, on or after February 8, 1996, became a successor or assign of a member described in clause (i) of this paragraph.

"Local Exchange Carrier" (LEC), as used in this Exhibit, means any person that is engaged in the provision of Telephone Exchange Service or Exchange Access Service.

"Transit Provider", as used in this Exhibit means the Party that is providing the Transit Service.

"Transit Service" as used in this Exhibit is Transit traffic which is any traffic that originates from one (1) Telecommunications Carrier's network, transits another Telecommunications Carrier's network, and terminates to yet another Telecommunications Carrier's network. For purposes of the Agreement, transit traffic does not include traffic carried by Interexchange Carriers or traffic originated by Qwest when acting as a toll provider. Interexchange Carriers' traffic is defined as Jointly Provided Switched Access. Transit service is provided by Qwest at local and access tandem switches, an end office providing local tandem functionality, as well as end offices providing routing due to an unqueried call ported to another local services provider, to ILEC to enable the completion of calls originated by or terminated to another Telecommunications Carrier (e.g. a CLEC, an ILEC, an exiting LEC, a co-provider, or a wireless Carrier), which is connected to Qwest's local and access tandem switches, an end office providing local tandem functionality, as well as end offices providing routing due to an unqueried call ported to another local services provider. To the extent that ILEC's Switch functions as a local or Access Tandem Switch, ILEC may also provide transit service to Qwest.

**MINNESOTA

INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**SCHEDULE A  
QWEST TRANSIT CHARGE**

<b>TRANSIT RATE</b>	<b>\$.0065 Per MOU</b>
---------------------	------------------------

**MINNESOTA  
SERVICE EXHIBIT 5  
TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**Schedule B  
Interim Transit Charge  
MINNESOTA**

Since Qwest currently does not have the recording capability to record ILEC originated traffic transiting through Qwest's network to a third party, Qwest will bill ILEC based on that ILEC's actual transit minutes provided by the originating ILEC to Qwest on a monthly basis. Data is subject to audit by Qwest no more than twice per year. These MOU will then be multiplied by the transit rate shown on Schedule A. Each month Qwest will bill this amount to the ILEC. If the originating ILEC doesn't provide Qwest with data to bill, Qwest will bill a minimum charge of \$180 per month per ILEC in the rural area and a minimum charge of \$4500 per month per ILEC in the metro area. This interim method will be utilized until Qwest has actual originating transit routed traffic measurements available.

Re: Routing Wireless Ported Traffic Via Qwest Trunk Groups

Dear Sharon,

I am writing on behalf of the Minnesota Independent Coalition (MIC) regarding the implementation wireline-to-wireless local number portability (LNP). Specifically, MIC requests that Qwest accept traffic from MIC companies for ported numbers (ported from MIC companies to wireless carriers) via existing ILEC-Qwest trunk groups at Qwest access tandems in Minnesota. Most MIC members subtend Qwest's access tandems for terminating traffic, and subtend Onvoy's Centralized Equal Access tandem for originating toll traffic. This ported wireless LNP traffic will be rated as local to the end user. The trunk group may need reconfiguration as two-way a group to accommodate wireless LNP implementation.

Please specify the interval needed for Qwest to modify the trunk groups to accept wireline-to-wireless ported traffic from the following MIC companies:

CARRIER	END OFFICE	ACCESS TANDEM
Home Telephone	GDMDMNXG75G	ROCHMNRO12T
Cannon Valley Tel	MRTWMNXMDS0	OWTNMNOW12T
Cannon Valley Tel	BRCLMNXBDS0	OWTNMNOW12T
Farmers Mutual Tel	BLHMMNXB56G	STCDMNT012T
Federated Tel	CHOKMNXCDS0	STCDMNT012T

If you have any questions regarding the attached please call me at (952)-829-3419.

Sincerely,

Thomas G. Burns

**To:** 'Tom Burns'  
**Cc:** Kampschroer, Sharon; Melichar, Ed  
**Subject:** RE: WLNP Traffic and Qwest Tandem-End Office Trunks

Tom: This is in response to your attached email. Since this is not toll traffic, Qwest would not transit this traffic through a toll tandem. If Qwest were to provide this transit traffic, several issues would need to be addressed: An agreement would need to be developed, trunking established from your clients switch to the appropriate Qwest Switch to terminate traffic to the wireless providers, installation of trunk monitoring equipment to measure this usage, and preparation of a billing system to bill your clients for the transit traffic usage.

I would assume that this is one of the first situations with wireless LNP and would probably suggest that Onvoy establish trunks to wireless providers to terminate this type of transit traffic. I would also assume that your clients and Onvoy have a billing mechanism developed to handle this type of traffic.

**Subject:** RE: WLNP Traffic and Qwest Tandem-End Office Trunks

Dave,

Attached is the original memo sent to Sharon K. A network diagram showing the call flow for ported traffic is also attached. MIC members expect to route this traffic to Qwest's tandems because 1) this is not toll traffic; and 2) wireless carriers are not interconnected to the Onvoy tandem.

Please call me if you have any questions regarding the attached.

Tom,

To make sure Qwest understands your request could you please send a diagram of how the MIC

**Exhibit 4B**

company would send the wireless LNP traffic vs all other traffic and where in the process would the LNP Query occur. Why do the MIC companies want to separate the wireless LNP traffic from all other traffic going to Onvoy? I am going to be out of the office next week so if you would please send the diagram to Dave Hahn so Qwest can get a answer back to you as soon as possible. Dave Hahn's email address is [dave.hahn@qwest.com](mailto:dave.hahn@qwest.com)

**From:** Tom Burns [tgburns@olsen-thielen.com]  
**Sent:** Thursday, March 18, 2004 5:22 PM  
**To:** Hahn, Dave  
**Cc:** Kampschroer, Sharon; Melichar, Ed; rayc@moss-barnett.com; Tom Farm  
**Subject:** RE: WLNP Traffic and Qwest Tandem-End Office Trunks

Dave,  
In response to your email:

**Trunk Groups, Tandems, Routing of WLNP Ported Traffic:**

Qwest terminates CMRS traffic to MIC member end offices via its access tandems and the common trunk group. The trunk groups and tandems that are in place will be used to provide the transit wireline-to-wireless traffic. Directionality on the trunk groups may need to be addressed in some cases, and that is the purpose of my query - how long will it take Qwest to allow two-way traffic for ported traffic due to WLNP?

**Onvoy Tandem vs Qwest Tandem:**

Onvoy's switch is used by MIC members to access the Centralized Equal Access functionality, and is not used for local (non-toll) traffic. Onvoy's switch is not used to exchange non-toll traffic with wireless carriers. I have spoken to Paul Hoff (Onvoy) and there are currently no plans for Onvoy to handle this non-toll traffic. Conversely, QWest switches are currently used for the exchange of wireless traffic.

**Recording, Usage Reports/Data:**

Regarding Qwest's need for usage data, MIC member end offices can record the usage associated with WLNP ported traffic. This end office translations to establish recordings can be set up as when installing LNP in the switch. MIC is willing to discuss the provision of these usage reports to Qwest for billing to the wireless carriers.

Many MIC members have received bona fide requests for LNP and are facing the FCC's May 24, 2004 deadline. To the extent network modifications (changing one-way groups to two-way groups) are needed, please research the time Qwest needs to convert one-way versus two-way capability for the trunk groups identified in my letter.

Thank you,  
Tom B

Hello Tom,

In order to provide transit services Qwest will require each MIC Company to sign an Exhibit as part of the Qwest Infrastructure Sharing Master Services Agreement. As part of providing this transit function, Qwest will be expecting compensation from each one of the MIC companies. All terms and conditions for this transit service will be spelled out in the exhibit.

Let me know if you have any questions.

Tom,

Qwest is in the process of developing the Transit Service to all ILECS in the 14 states, therefore Qwest does not have an exhibit to the Master Services Agreement to send to you at this time. Qwest hopes to finalize the Transit Service and send the exhibit to you by the end of April. Once the exhibit is signed by both Qwest and the MIC Companies, Qwest will be able to give you a date when the network modifications (changing one-way to two-way groups) can be implemented.

**Subject:** RE: MIC Memo re Qwest Tandems and Wireless LNP

Tom:

The obligation to provide wireless LNP has existed for years. The May 24 deadline for completing wireless LNP has been in place since November 10, 2003. Your clients first contacted Qwest about this issue on March 12, 2004. While Qwest is not under an obligation to provide transit service to your clients for this purpose, it would like to provide the service.

The late request from your clients has forced Qwest to move very quickly to develop a product that allows use of the access tandem for such traffic. The economics of providing this service needed to be analyzed. Technical issues need to be addressed, contract language needs to be determined, billing has to be arranged, and pricing needs to be established. This is a lot of work to complete in a short time frame and could have been handled in a more proactive fashion had your clients contacted Qwest earlier.

Nevertheless, Qwest is working diligently to be able to provide the service in time to allow your clients to meet the May 24 deadline. We do not believe, however, that we will be able to provide contract language with all of the appropriate terms as well as pricing before the end of April. We will get the contract language out sooner if at all possible.

I need to correct your inference that Qwest would be responsible for blocking traffic to wireless providers if these arrangements are not completed on time. Your clients have other options for routing this traffic, including reaching agreement for Onvoy to route this traffic or direct connecting with wireless providers.

We hope to work closely with your clients to resolve this issue despite the short time frames you face. We think it will be possible to complete network reconfigurations provided we can sign the contract by May 7.

**Subject:** RE: MIC Memo re Qwest Tandems and Wireless LNP

Tom - following up on our discussion today, please provide me with the following information for the additional ILECs that want this service:

1. The name of the ILEC
2. ILEC end office switch
3. ILEC access tandem
4. ILEC OCN

I would also appreciate a description of services you allege that Qwest is providing to Frontier, Citizens and others others that you claim is the same as the service being requested here. My clients do not understand that contention.

## MEMO

Date: April 23, 2004  
To: Jason Topp  
From: Tom Burns  
cc: Ceclia Ray; Tom Farm  
Subject: Network Reconfiguration Needed to Implement Wireless Local Number Portability

---

As discussed in my prior memo and also on our call on Monday, MIC has asked Qwest to ensure that trunk groups to MIC member offices are two-way and capable of routing ported wireline-to-wireless traffic to wireless carriers.

My preliminary research indicates there are 105 trunk groups which require translations at the Qwest tandem to allow routing of ported wireline to wireless traffic (See Attachment 1). The work can be summarized as follows, provided all groups identified actually require translations.

Tandem	Trunk Groups
DLTHMNME12T	5
FARGNDBC12T	10
GDFRNDBC12T	7
MPLSMNDT12T	13
OWTNMNOW12T	13
ROCHMNRO12T	8
STCDMNTO12T	16
WADNMNWA12T	20
WNDMMNWI12T	13
	<hr/>
	105

While MIC does not agree with some of the issues raised in your email and in our discussions, it is heartening that Qwest wants to provide the transit service identified. MIC asks that Qwest implement the network changes now and work on the contractual and compensation issues later – enabling us to meet the May 24<sup>th</sup> implementation of LNP for MIC members.

It may be appropriate to establish a testing schedule with each of the LECs to ensure wireline-to-wireless traffic can indeed flow through the Qwest tandem.

If you would like to discuss this matter further, please call me at 952.829.3419.

Associated World-Wide with Jeffrey's Henry International (JHI)

Flagship Corporate Center, 775 Prairie Center Drive, Ste. 480, Eden Prairie, Minnesota 55344 952 941 9242 FAX 952 941 0577  
223 Little Canada Road, St. Paul, Minnesota 55117 651 483 4521 FAX 651 483 2467

As requested, below is a listing of MIC members offices which subtend Qwest access tandems as shown. Please ensure the Qwest tandem is capable of accepting 10-digit calls from the MIC member end offices destined for a CMRS which also subtends the access tandem.

Where host-remote configurations exist I have only shown the host offices. Please contact me at 952.829.3419 if there are questions regarding company-specific network configurations.

**Subject:** Qwest provisioning of transit services for wireless LNP and EAS traffic

Tom:

It has come to my attention that you have inquired on behalf of some of your clients about Qwest's ability to provide transit services for wireless LNP applications. Qwest is now ready to offer that service under contract, along with EAS transit service, to your companies if they are interested. The service will be offered as an Exhibit (#5) to the current Master Services Agreement (MSA) which most companies have already signed with Qwest for other Infrastructure Sharing applications.

I am attaching a copy of the Exhibit 5 to the MSA for your review.

If you have companies who have already signed the MSA with Qwest and also wish to sign Exhibit 5, please have them contact me at the address below and I will work with them to get the agreement executed. They will need to sign an amended signature page for their current MSA.

If you have companies who are interested in Exhibit 5, but have not yet signed the Master Services Agreement, they can also contact me and we will work with them to get both the MSA and Exhibit 5 executed.

If you have any questions, or wish to discuss the process, please call me at your convenience at 402-422-5094.

Thank you,  
Ed

Qwest EAS &  
Transit Service Ex...

**Exhibit 4I**

**DRAFT**  
**SERVICE EXHIBIT 5**  
**EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE**  
**INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**1.0 EAS AND TRANSIT SERVICES MINIMUM SERVICE TERM.**

The term of this Service Exhibit 5 shall commence upon the Effective Date of the Agreement (or an amendment hereto, as applicable) and remain in effect for the same period listed in Section 7 of the Qwest Infrastructure Sharing Master Services Agreement. Both parties shall provide the EAS and Transit Services, as further described herein, according to the terms and conditions of this Service Exhibit and the Master Services Agreement.

**OTHER TYPES OF INTERCONNECTION AND SERVICES EXCLUDED.** Nothing in this Agreement will be construed as granting to either party any collocation arrangements through either physical or virtual collocation ("Collocation"), any access to any unbundled network elements ("Unbundled Access"), or access to operational support systems ("OSS Access"), and nothing herein will be construed as waiving or limiting in any way any rights available to either party under the Act with respect to Collocation, Unbundled Access, OSS Access, or other matters, including, but not limited to, ancillary services such as signaling access to call-related databases, directory assistance, white pages directory listings, busy line verify/interrupt, toll and assistance operator services, LIDB, access to poles/ducts/conduits, rights-of-way, 800 and CMDS. The parties reserve the right to negotiate such matters in separate agreements.

This EAS and Transit Services Exhibit is intended solely for the use of ILEC for its operations which are the subject of the Agreement, including the certification that ILEC is a "qualifying carrier" as defined by 47 U.S.C. §259. As such, this Exhibit applies solely to the uses discussed herein, and use of the services in a manner contrary to the restrictions of use in Section 2.0 shall be a material breach of the Exhibit and the Agreement.

Either Party may terminate this EAS and Transit Services Exhibit upon 90 day written notice to the other Party. Upon termination Parties agree that EAS and Transit Services between Parties will be terminated.

**2.0 EAS SERVICES.**

The Parties are incumbent local exchange carriers operating in certain respective communities which are located in adjacent, but not overlapping territories; the Parties do not compete against each other as local exchange carriers in those communities (collectively, the "Communities"), and the Parties are now or have been ordered by the "Insert State" Commission (the "Commission") [compelled by the public interest requirements of the Communities and the demands of their respective customers] to provide Extended Area Service between certain Exchanges of Exchange Carrier and certain Exchanges of QWEST; NOW, THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

The Parties agree to connect their respective networks at mutually agreed upon points so as to furnish Extended Area Service between those Exchanges of Exchange Carrier and those Exchanges of QWEST stated in the Qwest state Exchange and Network Services Tariff, Section 5.1.1. The Parties believe that the traffic exchanged between QWEST and Exchange Carrier will be generally in balance, because they serve the same type of customer base.

Subject to the provisions set forth below, neither Party will charge the other for the transport and termination of EAS Traffic that originated from the end user customers of one Party and terminates to the end user customers of the other Party.

The arrangements that are the subject of this EAS portion of this Exhibit will not be applicable to Exchange Access Service traffic, Telephone Toll Service traffic or to local Traffic not originated by or terminated to the parties in this agreement, e.g., FGA, Wireless, CLEC, and other ILECs. All Exchange Access Service, Telephone Toll Service traffic and local Traffic not originated by or terminated to the parties in the EAS portion of this Exhibit will continue to be governed by the terms and conditions of applicable federal and state tariffs and/or any applicable contractual arrangements made in this Exhibit for transit services.

This Agreement cancels and supersedes all previous settlement and/or compensation terms and rates between the Parties or their respective predecessors relating to the termination of EAS traffic in and/or between the Exchanges set forth in the Qwest state Exchange and Network Services Tariff, Section 5.1.1.

**3.0 TRANSIT SERVICES.**

Transit Service will be provided at each Party's local and access tandem switches, end offices providing local tandem functionality and end offices providing routing due to an unqueried call ported to another local services provider.

The Party originating the traffic acknowledges that it is its responsibility to enter into arrangements with each third party ILEC, ILEC, CLEC, Co-Provider or CMRS for the exchange of transit traffic from such originating party and for the billing to the originating carrier for such exchange.

Each Party originating transit traffic acknowledges that the other Party has no responsibility to pay any third party ILEC, ILEC, CLEC, Co-Provider or CMRS charges for termination of any transit traffic from such originating Party. Neither Party

**DRAFT**  
**SERVICE EXHIBIT 5**  
**EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE**  
**INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

will default bill the other Party for unidentified traffic that neither Party can identify, which terminates on their respective networks, unless otherwise provided for in this Agreement. In the event that one Party can identify the traffic, and the other Party requests the transit records, the Parties will negotiate a separate agreement for the provision of those transit records.

Parties will not pay switched access on local calls in either direction between Parties and any third party LEC, ILEC, CLEC, Co-Provider or CMRS when local calls are routed through an access tandem.

**4.0 NETWORK RESPONSIBILITIES**

**PHYSICAL INTERCONNECTION**

The Parties have interconnected their facilities at the agreed upon meet points within the Exchanges listed and described in the Qwest state Exchange and Network Services Tariff, Section 5.1.1. The Parties agree that meet points within the exchanges listed and described in the Qwest state Exchange and Network Services Tariff, Section 5.1.1 will be limited to the pre-existing meet points within those exchanges. Should either Party request change of existing or add new meet points these meet points will be mutually agreed upon by both Parties. Pre-existing physical interconnection arrangements will remain in place until such time as the Parties mutually agree to convert such physical interconnection arrangements to a type of arrangement other than a meet point. The Qwest state Exchange and Network Services Tariff, Section 5.1.1 may be updated from time to time as additional EAS is ordered by the Commission. The parties intend that, to the greatest extent practicable, all terms, conditions, agreements and arrangements relating to existing physical interconnection, operation, maintenance, methods, practices and provisioning will remain in full force and effect unless and until otherwise agreed to by the Parties.

The Parties will jointly engineer and configure local trunks over the physical interconnection facilities as follows:

Each Party will initially configure a two (2) way trunk group as a direct transmission path between the two Parties.

If the traffic volumes between any two (2) end office switches including other ILEC, CLEC and CMRS switches, at anytime exceeds the centum call second ("CCS") busy hour equivalent of one (1) DS1 (512 CCS), the Parties will, within sixty (60) days of such occurrence, establish a new direct trunk group to the applicable end office(s) consistent with the grades of service and quality parameters set forth in this Exhibit.

Only those valid NXX codes served by an end office may be accessed through a direct connection to that end office.

Each Party will ensure that each tandem connection permits the completion of all traffic to all end offices, which sub-tend that tandem switch.

The provision of additional trunks, if necessary for EAS expansion of EAS voice, will be subject to negotiation between the Parties.

It shall be the responsibility of each Party to program and update its own Switches and network systems pursuant to the Local Exchange Routing Guide (LERG) to recognize and route traffic to the other Party's assigned NXX or NXX-X codes. Neither Party shall impose any fees or charges on the other Party for such activities. The Parties will cooperate to establish procedures to ensure the timely activation of NXX assignments in their respective networks.

Each Party is responsible for administering numbering resources assigned to it. Each Party will cooperate to timely rectify inaccuracies in its LERG data. Each Party is responsible for updating the LERG data for NXX codes assigned to its End Office Switches. Each Party shall use the LERG published by Telcordia or its successor for obtaining routing information and shall provide through an authorized LERG input agent, all required information regarding its network for maintaining the LERG in a timely manner.

Both Parties agree that their network switches involved in the provision of EAS service will be managed in accordance with the applicable Telcordia and other industry standards. The acceptable service levels for local interconnection service and the criteria for applying protective controls in conjunction with EAS service will be administered in the same manner as the network management for Exchange Access Services.

To the extent available, the parties will interconnect their networks using SS7 signaling where technically feasible and available as defined in applicable industry standards including ISDN user part ("ISUP") for trunk signaling and transaction capabilities application part ("TCAP") for common channel signaling based features in the interconnection of their networks.

Each Party will be responsible only for service(s) and facility or facilities which are provided by that Party, its authorized agents, subcontractors, or others retained by such Parties, and neither Party will bear any responsibility for the services and facilities provided by the other Party, its agents, subcontractors, or others retained by such Party.

**DRAFT  
SERVICE EXHIBIT 5  
EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**5.0 OBLIGATIONS OF BOTH PARTIES.**

Parties will provide and maintain the equipment and facilities necessary to permit each other to furnish the services for which the Parties contract.

Parties will provision appropriate trunking to access tandems, local tandems and/or end offices with local tandem functionality, this includes but not limited to provisioning trunking with appropriate traffic use codes.

Parties shall have no obligation to supply a Service where facilities or technical abilities are limited.

Parties will perform Services provided under this Agreement in accordance with operating methods, practices, and standards in effect for each other's End Users.

Parties shall maintain adequate equipment and personnel to reasonably perform the Services. Parties shall connect their End Users to the place(s) where each Party provides the Services and to provide all information and data needed or reasonably requested by each other in order to perform the Services.

**6.0 CHARGES AND PAYMENTS FOR TRANSIT SERVICES.**

The charge for the Transit Services provided by each Party under this Service Exhibit is reciprocal and listed in Schedule A, attached hereto and incorporated herein by reference.

The charges listed in Schedule A shall be subject to adjustment upon sixty (60) days prior written notice by either Party and shall remain reciprocal.

Parties shall be obligated to pay all applicable charges as set forth herein for Transit Services provided by the other Party.

Transit Provider will track usage and bill the originator of the traffic, and the originator of the traffic shall be responsible for and will pay the Transit Provider for all Rates and charges applicable to the calls placed to third party's end users.

Until such time that Qwest has the ability to record the originating traffic, the Parties agree to implement the interim transit charge provisions on Schedule B. When Qwest has actual recordings of originating transit usage available, Qwest will bill transit charges based on Qwest's recording of transit traffic usage.

A completed call shall be computed, calculated and recorded in accordance with the methods and practices of Transit Provider and the operating capacity and ability of Transit Provider's measuring equipment.

The originator of the traffic will pay the Transit Provider for transit traffic at the reciprocal rates specified in Schedule A. It is the responsibility of the originator of the traffic to provide billing information to the third party assuming that recording capabilities exist to obtain that measured data.

If, due to equipment malfunction or other error, Transit Provider does not have available the necessary information to compile an accurate billing statement, Transit Provider may render a reasonably estimated statement, but shall notify originator of the traffic of the methods of such estimate and cooperate in good faith with originator of the traffic to establish a fair, equitable estimate. Transit Provider shall render a statement reflecting actual billable quantities when and if the information necessary for the billing statement becomes available.

Each Party alone and independently establishes all prices it charges its End Users for Services provided by means of this Agreement, and the other Party is not liable or responsible for the collection of any such amounts.

**7.0 DEFINITIONS.**

"Access Services" refers to the tariffed interstate and intrastate switched access and private line transport services offered for the origination and/or termination of interexchange traffic.

"Act", as used in this Exhibit, means the Communications Act of 1934 (47 U.S.C. Section 151 et seq.), as amended by the Telecommunications Act of 1996, and as from time to time interpreted in the duly authorized rules and regulations of the Federal Communications Commission ("FCC") or the Commission.

"Ancillary Traffic", includes all traffic destined for ancillary services, or that may have special billing requirements, including but not limited to the following: Directory assistance, 911/E911, Operator call termination (busy line interrupt and verify), 800/888, LIDB, and Information services requiring special billing.

"Commission", as used in this Exhibit, means the "Insert State" Public Utility Commission of the State of "Insert State".

**DRAFT**  
**SERVICE EXHIBIT 5**  
**EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE**  
**INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

"Co-Provider" means an entity authorized to provide Local Exchange Service that does not otherwise qualify as an incumbent Local Exchange Carrier ("LEC"). "Exchanges", as used in this Agreement, will mean the local telephone exchanges listed in the Qwest state Exchange and Network Services Tariff, Section 5.1.1.

"Extended Area Service" ("EAS"), as used in this Exhibit, means an arrangement for the mutual, reciprocal transport and termination of EAS Traffic between Parties who are not competing with each other, at rates and charges between the Parties established in this Agreement. Calls may be placed between two Exchanges without a Telephone Toll Service charge, to the customers of the Parties.

"Extended Area Service (EAS) Traffic" means traffic (excluding CLEC and CMRS traffic, and information service provider and voice over IP, e.g., competitive local traffic, paging, cellular, PCS) that is originated by an end user of one Party and terminates to an end user of the other Party as defined in accordance with Qwest's then current EAS serving areas, as determined by the Commission.

"Incumbent Local Exchange Carrier" (ILEC), as used in this Exhibit, means with respect to an area, the LEC that: (1) on February 8, 1996, provided Telephone Exchange Service in such area; and (2) (i) on February 8, 1996, was deemed to be a member of the exchange carrier association pursuant to § 69.601 (b) of the FCC's regulations; or (ii) is a person or entity that, on or after February 8, 1996, became a successor or assign of a member described in clause (i) of this paragraph.

"Local Exchange Carrier" (LEC), as used in this Exhibit, means any person that is engaged in the provision of Telephone Exchange Service or Exchange Access Service.

"Telephone Toll Service", as used in this Exhibit, means a type of telecommunication service, commonly known as long-distance service, that is provided on an intrastate or interstate basis between LATAs and within LATAs and that is: (A) not included as a part of basic local exchange service; (B) provided between different exchange areas, and (C) billed to the customer separately from basic local exchange service.

"Termination", as used in this Exhibit, means the switching of EAS Traffic at the terminating carrier's end office switch, or equivalent facility, and delivery of such traffic to the called party's premises.

"Transport", as used in this Exhibit, means the transmission and any necessary tandem switching of EAS Traffic from the interconnection point, or meet point, between the Parties to the terminating carrier's end office switch that directly serves the called party.

"Transit Provider", as used in this Exhibit means the Party that is providing the Transit Service.

"Transit Service" as used in this Exhibit is Transit traffic which is any traffic that originates from one (1) Telecommunications Carrier's network, transits another Telecommunications Carrier's network, and terminates to yet another Telecommunications Carrier's network. For purposes of the Agreement, transit traffic does not include traffic carried by Interexchange Carriers or traffic originated by Qwest when acting as a toll provider. Interexchange Carriers' traffic is defined as Jointly Provided Switched Access. Transit service is provided by Qwest at local and access tandem switches, an end office providing local tandem functionality, as well as end offices providing routing due to an unqueried call ported to another local services provider, to ILEC to enable the completion of calls originated by or terminated to another Telecommunications Carrier (such as a CLEC, an ILEC, an exiting LEC, a co-provider, or a wireless Carrier), which is connected to Qwest's local and access tandem switches, an end office providing local tandem functionality, as well as end offices providing routing due to an unqueried call ported to another local services provider. To the extent that ILEC's Switch functions as a local or Access Tandem Switch, ILEC may also provide transit service to Qwest.

**DRAFT  
SERVICE EXHIBIT 5

INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**SCHEDULE A  
QWEST TRANSIT CHARGE**

TRANSIT RATE	\$.0089 Per MOU
--------------	-----------------

**DRAFT  
SERVICE EXHIBIT 5  
EAS AND TRANSIT SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**Schedule B  
Interim Transit Charge  
MINNESOTA**

Since Qwest currently does not have the recording capability to record ILEC originated traffic transiting through Qwest's network to a third party, Qwest will bill ILEC based on that ILEC's actual transit minutes provided by the originating ILEC to Qwest on a monthly basis. Data is subject to audit by Qwest no more than twice per year. These MOU will then be multiplied by the transit rate shown on Schedule A. Each month Qwest will bill this amount to the ILEC. If the originating ILEC doesn't provide Qwest with data to bill, Qwest will bill a minimum charge of \$300 per month per ILEC in the rural area and a minimum charge of \$6,000 per month per ILEC in the metro area. This interim method will be utilized until Qwest has actual originating transit routed traffic measurements available.

**Subject:** CMRS Transit Service Agreement

Ed,

Please forgive that I am sending this from my home email. Our work server was hit by virus this AM. I ask that you do not respond to this email, rather direct responses to my work email: [tgburns@olsen-thielen.com](mailto:tgburns@olsen-thielen.com).

Since this agreement bears little resemblance to the original EAS document - I have not shown changes in redline. As discussed, the attached draft is to be used as discussion document and has not been reviewed by our attorney.

Tom B

**Exhibit 4J**

*MIC Draft Reply*

**DRAFT  
SERVICE EXHIBIT 5  
CMRS SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**1.0 CMRS TRANSIT SERVICES MINIMUM SERVICE TERM.**

The term of this Service Exhibit 5 shall commence upon the Effective Date of the Agreement (or an amendment hereto, as applicable) and remain in effect for the same period listed in Section 7 of the Qwest Infrastructure Sharing Master Services Agreement. Both parties shall provide CMRS Transit Services, as further described herein, according to the terms and conditions of this Service Exhibit and the Master Services Agreement.

**OTHER TYPES OF INTERCONNECTION AND SERVICES EXCLUDED.** Nothing in this Agreement will be construed as granting to either party any collocation arrangements through either physical or virtual collocation ("Collocation"), any access to any unbundled network elements ("Unbundled Access"), or access to operational support systems ("OSS Access"), and nothing herein will be construed as waiving or limiting in any way any rights available to either party under the Act with respect to Collocation, Unbundled Access, OSS Access, or other matters, including, but not limited to, ancillary services such as signaling access to call-related databases, directory assistance, white pages directory listings, busy line verify/interrupt, toll and assistance operator services, LIDB, access to poles/ducts/conduits, rights-of-way, 800 and CMDS. The parties reserve the right to negotiate such matters in separate agreements.

This CMRS Transit Services Exhibit is intended solely for the use of ILEC for its operations which are the subject of the Agreement, including the certification that ILEC is a "qualifying carrier" as defined by 47 U.S.C. §259. As such, this Exhibit applies solely to the uses discussed herein, and use of the services in a manner contrary to the restrictions of use in Section 2.0 shall be a material breach of the Exhibit and the Agreement. **[We believe §259 agreements, including the MSA and this exhibit, must be filed with the state Commission]**

This agreement is entered into in order to allow ILEC to implement FCC ordered Wireless local number portability and is not intended to change or modify any other joint provisioning of services or provision of transit services by either party. **[How does a CLEC which does not have an ICA with Qwest and which is not an ETC (therefore not eligible for §259) obtain this service?]**

Either Party may terminate this CMRS Transit Services Exhibit upon 90 day written notice to the other Party. Upon termination Parties agree that CMRS Transit Services between Parties will be terminated.

**2.0 CMRS TRANSIT SERVICES IN COMMISSION MANDATED EAS SERVICE AREAS.**

The Parties are incumbent local exchange carriers operating in certain respective communities which are located in adjacent, but not overlapping territories; the Parties do not compete against each other as local exchange carriers in those communities (collectively, the "Communities"), and the Parties are now or have been ordered by Minnesota Public Utilities Commission compelled by the public interest requirements of the Communities and the demands of their respective customers to provide Extended Area Service between certain Exchanges of Exchange Carrier and certain Exchanges of QWEST; NOW, THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

The arrangements that are the subject of this EAS portion of this Exhibit will be applicable only to Transit of Wireless Traffic from ILEC exchanges located in Qwest Commission mandated EAS areas in cases where wireless carriers have local numbering resources in such free calling areas.

This Agreement does not supersede any previous settlement and/or compensation terms and rates between the Parties or their respective predecessors relating to the termination of EAS traffic in and/or between the Exchanges set forth in the Qwest state Exchange and Network Services Tariff, Section 5.1.1. or Commission orders related to the establishment of such EAS service area.

It is agreed by the parties that Qwest will provide such Transit of Wireless traffic from ILEC exchanges located in Qwest Commission mandated EAS areas without charge or compensation other than that contemplated in the Commissions original EAS orders establishing such EAS areas until such time as the Commission modifies such orders.

**3.0 CMRS TRANSIT SERVICES.**

CMRS Transit Service will be provided at each Party's local and access tandem switches, end offices providing local tandem functionality and end offices providing routing due to an unqueried call ported to another local services provider.

The Party originating the traffic acknowledges that it is its responsibility to enter into arrangements with each third party CMRS provider for the exchange of transit traffic from such originating party and for the billing to the originating carrier for such exchange.

Each Party originating CMRS transit traffic acknowledges that the other Party has no responsibility to pay any third party CMRS provider charges for termination of any transit traffic from such originating Party. Neither Party will default bill the other Party for unidentified CMRS traffic that neither Party can identify, which terminates on their respective networks, unless otherwise provided for in this Agreement. In the event that one Party can identify the traffic, and the other Party

**DRAFT**  
**SERVICE EXHIBIT 5**  
**CMRS SERVICES EXHIBIT AND RATE SCHEDULE**  
**INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

requests the transit records, the Parties will negotiate a separate agreement for the provision of those transit records. [The transit records can be provided under pursuant to the MSA usage amendment (modified as necessary)]

**4.0 NETWORK RESPONSIBILITIES.**

**PHYSICAL INTERCONNECTION**

The Parties have interconnected their facilities at the agreed upon meet points. Should either Party request change of existing or add new meet points these meet points will be mutually agreed upon by both Parties. Pre-existing physical interconnection arrangements will remain in place until such time as the Parties mutually agree to convert such physical interconnection arrangements to a type of arrangement other than a meet point. The parties intend that, to the greatest extent practicable, all terms, conditions, agreements and arrangements relating to existing physical interconnection, operation, maintenance, methods, practices and provisioning will remain in full force and effect unless and until otherwise agreed to by the Parties.

CMRS Transit Traffic traverses "common" trunk groups, e.g., tandem-to-end office trunks. The Parties will jointly engineer and configure their networks to utilize the common trunks as follows:

- Only those valid NXX codes served by an end office may be accessed through a tandem connection to that end office.
- Each Party will ensure that each tandem connection permits the completion of all traffic to all end offices, which sub-tend that tandem switch.

The provision of additional trunks, if necessary for CMRS Transit Service will be subject to negotiation between the Parties.

It shall be the responsibility of each Party to program and update its own Switches and network systems pursuant to the Local Exchange Routing Guide (LERG) to recognize and route traffic to the other Party's assigned NXX or NXX-X codes. Neither Party shall impose any fees or charges on the other Party for such activities. The Parties will cooperate to establish procedures to ensure the timely activation of NXX assignments in their respective networks.

Each Party is responsible for administering numbering resources assigned to it. Each Party will cooperate to timely rectify inaccuracies in its LERG data. Each Party is responsible for updating the LERG data for NXX codes assigned to its End Office Switches. Each Party shall use the LERG published by Telcordia or its successor for obtaining routing information and shall provide through an authorized LERG input agent, all required information regarding its network for maintaining the LERG in a timely manner.

Both Parties agree that their network switches involved in the provision of CMRS Transit Service will be managed in accordance with the applicable Telcordia and other industry standards. The acceptable service levels for local interconnection service and the criteria for applying protective controls in conjunction with EAS service will be administered in the same manner as the network management for Exchange Access Services.

To the extent available, the parties will interconnect their networks using SS7 signaling where technically feasible and available as defined in applicable industry standards including ISDN user part ("ISUP") for trunk signaling and transaction capabilities application part ("TCAP") for common channel signaling based features in the interconnection of their networks.

Each Party will be responsible only for service(s) and facility or facilities which are provided by that Party, its authorized agents, subcontractors, or others retained by such Parties, and neither Party will bear any responsibility for the services and facilities provided by the other Party, its agents, subcontractors, or others retained by such Party.

**5.0 OBLIGATIONS OF BOTH PARTIES.**

Parties will provide and maintain the equipment and facilities necessary to permit each other to furnish the services for which the Parties contract.

Parties will provision appropriate trunking to access tandems, local tandems and/or end offices with local tandem functionality.

Parties shall have no obligation to supply a Service where facilities or technical abilities are limited except as required by state law or the Commission rules.

Parties will perform Services provided under this Agreement in accordance with industry standards

**DRAFT  
SERVICE EXHIBIT 5  
CMRS SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**6.0 CHARGES AND PAYMENTS FOR CMRS TRANSIT SERVICES.**

The charge for the Transit Services provided by each Party under this Service Exhibit is reciprocal and listed in Schedule A, attached hereto and incorporated herein by reference.

No CMRS transit service charges shall apply to ILEC traffic transited by Qwest local or tandem switches to CMRS providers with numbering resources in the ILEC /Qwest Commission mandated EAS areas.

Parties shall be obligated to pay all applicable charges as set forth herein for CMRS Transit Services provided by the other Party.

CMRS Transit Provider will track usage and bill the originator of the traffic, and the originator of the traffic shall be responsible for and will pay the Transit Provider for all Rates and charges applicable to the calls placed to third CMRS end users.

Until such time that Qwest has the ability to record the originating traffic, the Parties agree to implement the interim CMRS transit charge provisions on Schedule B. When Qwest has actual recordings of originating transit usage available, Qwest will bill CMRS transit charges based on Qwest's recording of CMRS transit traffic usage.

A completed call shall be computed, calculated and recorded in accordance with industry standards

The originator of traffic to CMRS providers will pay the Transit Provider for CMRS transit traffic at the reciprocal rates specified in Schedule A.

If, due to equipment malfunction or other error, Transit Provider does not have available the necessary information to compile an accurate billing statement, Transit Provider may render a reasonably estimated statement, but shall notify originator of the traffic of the methods of such estimate and cooperate in good faith with originator of the traffic to establish a fair, equitable estimate. Transit Provider shall render a statement reflecting actual billable quantities when and if the information necessary for the billing statement becomes available.

Each Party alone and independently establishes all prices it charges its End Users for Services provided by means of this Agreement, and the other Party is not liable or responsible for the collection of any such amounts.

**7.0 DEFINITIONS.**

"Access Services" refers to the tariffed interstate and intrastate switched access and private line transport services offered for the origination and/or termination of interexchange traffic.

"Act", as used in this Exhibit, means the Communications Act of 1934 (47 U.S.C. Section 151 et seq.), as amended by the Telecommunications Act of 1996, and as from time to time interpreted in the duly authorized rules and regulations of the Federal Communications Commission ("FCC") or the Commission.

"Ancillary Traffic", includes all traffic destined for ancillary services, or that may have special billing requirements, including but not limited to the following: Directory assistance, 911/E911, Operator call termination (busy line interrupt and verify), 800/888, LIDB, and Information services requiring special billing.

"Commission", as used in this Exhibit, means the Public Utility Commission of the State of Minnesota

"Co-Provider" means an entity authorized to provide Local Exchange Service that does not otherwise qualify as an incumbent Local Exchange Carrier ("LEC"). "Exchanges", as used in this Agreement, will mean the local telephone exchanges listed in the Qwest state Exchange and Network Services Tariff, Section 5.1.1.

"CMRS Transit Provider", as used in this Exhibit means the Party that is providing the Transit Service.

"CMRS Transit Service" as used in this Exhibit, is any traffic which originates (or terminates) on a CMRS provider's network, transits one Party's network, and terminates (or originates) on the other Party's network. For purposes of the Agreement, CMRS transit traffic does not include traffic carried by Interexchange Carriers or traffic originated by Qwest when acting as a toll provider. Interexchange Carriers' traffic is defined as Jointly Provided Switched Access. CMRS Transit service is provided by Qwest at Tandem Switches. local and access tandem switches, an end office providing local tandem functionality, as well as end offices providing routing due to an unqueried call ported to another local services provider, to ILEC to enable the completion of calls originated by or terminated CMRS providers, which is connected to Qwest's local and access tandem switches, an end office providing local tandem functionality, as well as end offices providing routing due to an unqueried call ported to a CMRS provider. To the extent that ILEC's Switch functions as a local or Access Tandem Switch, ILEC may also provide CMRS transit service to Qwest.

**DRAFT  
SERVICE EXHIBIT 5  
CMRS SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

"Extended Area Service" ("EAS"), as used in this Exhibit, means an arrangement for the mutual, reciprocal transport and termination of EAS Traffic between Parties who are not competing with each other, at rates and charges between the Parties established in this Agreement. Calls may be placed between two Exchanges without a Telephone Toll Service charge, to the customers of the Parties.

"Extended Area Service (EAS) Traffic" means traffic (including CLEC and CMRS traffic, and information service provider and voice over IP, e.g., competitive local traffic, paging, cellular, PCS) that is originated by an end user of one Party and terminates to an end user of the other Party as defined in accordance with Qwest's then current EAS serving areas, as determined by the Commission.

"Incumbent Local Exchange Carrier" (ILEC), as used in this Exhibit, means with respect to an area, the LEC that: (1) on February 8, 1996, provided Telephone Exchange Service in such area; and (2) (i) on February 8, 1996, was deemed to be a member of the exchange carrier association pursuant to § 69.601 (b) of the FCC's regulations; or (ii) is a person or entity that, on or after February 8, 1996, became a successor or assign of a member described in clause (i) of this paragraph.

"Local Exchange Carrier" (LEC), as used in this Exhibit, means any person that is engaged in the provision of Telephone Exchange Service or Exchange Access Service.

"Tandem Switch" as used in Exhibit, means an access tandem or local tandem which provides switching of traffic between and among end office switches ("trunk-to-trunk switching"). Included as a Tandem Switch are any end office switches which provide such trunk-to-trunk switching functionality for wireless service providers and or competitive local exchange carriers.

"Telephone Toll Service", as used in this Exhibit, means a type of telecommunication service, commonly known as long-distance service, that is provided on an intrastate or interstate basis between LATAs and within LATAs and that is: (A) not included as a part of basic local exchange service; (B) provided between different exchange areas, and (C) billed to the customer separately from basic local exchange service.

"Termination", as used in this Exhibit, means the switching of CMRS Traffic at the terminating carrier's end office switch, or equivalent facility, and delivery of such traffic to the called party's premises.

"Transport", as used in this Exhibit, means the transmission and any necessary tandem switching of CMRS Traffic from the interconnection point, or meet point, between the Parties to the terminating CMRS providers end office switch that directly serves the called party.

**DRAFT  
SERVICE EXHIBIT 5  
CMRS SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**SCHEDULE A  
QWEST TRANSIT CHARGE**

<b>TRANSIT RATE</b>	<b>\$.00164 Per MOU</b>
---------------------	-------------------------

No CMRS transit service charges shall apply to ILEC traffic transited by Qwest end office or local tandem switches to CMRS providers with numbering resources in the ILEC /Qwest Commission mandated EAS areas.

**DRAFT  
SERVICE EXHIBIT 5  
CMRS SERVICES EXHIBIT AND RATE SCHEDULE  
INFRASTRUCTURE SHARING MASTER SERVICES AGREEMENT**

**Schedule B  
Interim Transit Charge  
MINNESOTA**

Since Qwest currently does not have the recording capability to record ILEC originated traffic transiting through Qwest's network to third party CMRS providers, Qwest will bill ILEC based on that ILEC's actual transit minutes provided by the originating ILEC to Qwest on a monthly basis. Data is subject to audit by Qwest no more than twice per year. These MOU will then be multiplied by the transit rate shown on Schedule A. Each month Qwest will bill this amount to the ILEC. If the originating ILEC doesn't provide Qwest with data to bill, Qwest will bill a minimum charge of \$10 per month per ILEC to Qwest access tandem trunk group which transits ILEC to CMRS providers. This interim method will be utilized until Qwest has actual originating transit routed traffic measurements available.

Omaha, NE 68102  
Phone: 402-422-5094  
FAX: 402-422-2162

This letter is to provide an interim measure for Qwest to provide Transit Service to ILECs for Wireless LNP while Qwest and such ILEC are currently negotiating a Transit Service Exhibit under 259 for all transit traffic in Minnesota.

While Qwest believes it is not under an obligation to provide transit service, Qwest is willing to provide such service to ILECs under a Transit Services Exhibit (the "Exhibit"), as part of an Infrastructure Sharing Master Services Agreement under 47 U.S.C. §259 (the "Agreement"). Since Qwest and such ILEC cannot finalize terms and conditions of the Exhibit and the Agreement in a timeframe to allow the ILECs to comply with the Wireless LNP order, Qwest is offering this interim measure for Transit Service for the Wireless LNP transit traffic.

This interim arrangement would begin effective May 7, 2004 and cease in 90 days should ILEC and Qwest not have a signed Agreement and Exhibit. Should ILEC and Qwest agree to and sign an Agreement and Exhibit, this Wireless LNP transit traffic would be included as a part of all transit traffic.

Since Qwest currently does not have the recording capability to record ILEC originated traffic transiting through Qwest's network to a third party, Qwest will bill ILEC based on that ILEC's actual transit minutes for Wireless LNP provided by the originating ILEC to Qwest on a monthly basis. Data are subject to audit by Qwest no more than once during this 90 day timeframe. These MOU will then be multiplied by the transit rate of \$.0089 per MOU. Each month Qwest will bill this amount to the ILEC. If the originating ILEC doesn't provide Qwest with data to bill, Qwest will bill a minimum charge of \$20 per month per ILEC in the rural area and a minimum charge of \$800 per month per ILEC in the Minneapolis/St. Paul metro area this is only for the 90 day timeframe and only for the ILEC originated transit usage related to Wireless LNP transit traffic. This interim method will be utilized until Qwest has actual originating transit routed traffic measurements available.

In order for Qwest to provision network modifications necessary for ILECs to provide Wireless LNP under this interim measure by a May 21, 2004 timeframe, Qwest will need from each ILEC a signed copy of this letter, 2/6 codes and accurate A-Z locations for each trunk group involved as soon as possible, but no later than close of business Tuesday, May 11, 2004 to ensure completion by the above mentioned timeframe. If this information is not sent to Qwest by close of business on Tuesday, May 11, 2004, Qwest will not be able to meet the May 21, 2004 timeframe for Wireless LNP network modifications and will not be in breach of this interim letter.

Subject: Qwest May 7<sup>th</sup> Interim Arrangement Letter re CMRS Transit

---

I have reviewed the proposal you submitted to me last Friday afternoon. To state the obvious, it does take more than two days notice to obtain agreement and signatures from 76 companies on any matter. The MIC has filed a request for suspension of local number portability obligations with the Minnesota Public Utilities Commission until July 30, 2004 or until Qwest enables the transit services requested.

Should Qwest wish to negotiate a narrow agreement which is limited in scope to the request MIC made of Qwest, i.e., enabling wireline-to-wireless traffic routed via Qwest access tandems, the draft agreement sent I sent to can serve as the basis for our negotiations.

To discuss this matter further, please contact me at 952.829.3419.

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

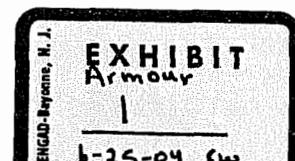

---

IN THE MATTER OF THE PETITION  
OF ARMOUR INDEPENDENT TELE-  
PHONE COMPANY, BRIDGEWATER-  
CANISTOTA INDEPENDENT TELE-  
PHONE COMPANY AND UNION  
TELEPHONE COMPANY FOR SUS-  
PENSION OR MODIFICATION OF §  
251(b)(2) OF THE COMMUNICATIONS  
ACT OF 1934 AS AMENDED

Docket No. 04-046

DIRECT PRE-FILED TESTIMONY OF  
DENNIS LAW

May 14, 2004

1 **Q: Please state your business name and address?**

2 A: My name is Denny Law, Regional Manager of Union Telephone Company, Armour  
3 Independent Telephone Company, Bridgewater-Canistota Independent Telephone  
4 Company. The address is 116 North Main Avenue, Hartford, SD 57033. The  
5 phone number is 605-528-3211.

6 **Q: By whom are you employed and in what capacity?**

7 A: I am the Regional Manager of Union Telephone Company, Armour Independent  
8 Telephone Company and Bridgewater-Canistota Telephone Company. Each of the  
9 companies are rural independent local exchange carriers that provide local  
10 exchange, exchange access and other telecommunications services. Union  
11 Telephone Company serves 1,597 access lines, including 38 lifeline customers.  
12 within its South Dakota service area, which include the exchanges of Hartford and  
13 Wall Lake. Armour Independent Telephone Company serves 583 access lines,  
14 including 33 lifeline customers, within its South Dakota service area, which  
15 includes the Armour exchange. Bridgewater-Canistota Telephone Company serves  
16 873 access lines, including 47 lifeline customers, within its South Dakota service  
17 area, which include the exchanges of Bridgewater and Canistota.

18 **Q: Does your company have any direct points of interconnection with any wireless  
19 carrier and/or does your company provide any blocks of numbers for your  
20 company's rate centers to any wireless carrier.**

21 A. No.

22 **Q: What is the current method of routing calls from your subscriber's landline  
23 phones to wireless phone numbers?**

1 A: If the Telephone Company subscriber is calling a wireless phone number that is  
2 located outside of Telephone Company's local calling area or Extended Area  
3 Service (EAS) area, the customer must dial the full ten-digit (XXX-XXX-XXXX)  
4 number of the wireless phone and the call is routed through the customer's  
5 presubscribed Interexchange carrier. If the subscriber is calling a wireless phone  
6 number that is assigned to an exchange with which the Telephone Company has an  
7 EAS agreement, the customer may dial the wireless phone number as a local call  
8 (XXX-XXXX). Union Telephone Company currently has an EAS agreement with  
9 Qwest Communications (Sioux Falls exchange). Armour Independent Telephone  
10 Company and Bridgewater-Canistota Telephone Company do not have any EAS  
11 agreements.

12 **Q: What is the number of wireless carriers providing service in your company's**  
13 **service area?**

14 A: Wireless carriers believed to be providing service are:

- 15 1. Cellular One/Western Wireless
- 16 2. Verizon Wireless
- 17 3. Nextel
- 18 4. Sprint PCS/Swiftel
- 19 5. Unicef

20 **Q: Have any subscribers requested local number portability (LNP) from your**  
21 **company?**

1 A: There have been no subscriber requests for local number portability to be offered by  
2 Union Telephone Company, Armour Independent Telephone Company or  
3 Bridgewater-Canistota Telephone Company.

4 **Q: Since the passage of the 1996 Telecom Act have any wireline carriers ever**  
5 **requested LNP from your company?**

6 A: No.

7 **Q: Are there further complications to implementation of LNP in these exchanges?**  
8 **If yes, what are they?**

9 A: Yes. The switch manufacturer's discontinuance of support for the switching  
10 platform, effective December 13, 2007, is an additional complication. Said  
11 discontinuance would force the companies to invest significant dollars into a switch  
12 that will become unsupportable in the near future.

13 **Q: Have any wireless carriers requested LNP?**

14 A: Yes.

15 **Q: In your experience as the regional manager of these companies, have you**  
16 **seen increases or additions to the itemized fees on your customer's telephone**  
17 **bills?**

18 A: Yes.

19 **Q: What do you expect your customer's reaction to be to any new LNP fees on**  
20 **their bills?**

21 A: I would expect the reaction to be very negative.

22 **Q: Is the public interest, convenience, and necessity served by requiring your**  
23 **company to implement LNP at this time?**

1 A, No, because Union Telephone Company, Armour Independent Telephone Company  
2 and Bridgewater-Canistota Telephone Company have received no requests from  
3 customers to offer local number portability.

4 **Q: Does this conclude your direct testimony?**

5 A: Yes

6

BEFORE THE PUBLIC UTILITIES COMMISSION

OF THE STATE OF SOUTH DAKOTA

IN THE MATTER OF THE PETITION  
OF ARMOUR INDEPENDENT TELE-  
PHONE COMPANY, BRIDGEWATER-  
CANISTOTA INDEPENDENT TELE-  
PHONE COMPANY AND UNION  
TELEPHONE COMPANY FOR SUS-  
PENSION OR MODIFICATION OF §  
251(b)(2) OF THE COMMUNICATIONS  
ACT OF 1934 AS AMENDED

Docket No. 04-046

REBUTTAL TESTIMONY

OF DENNIS LAW

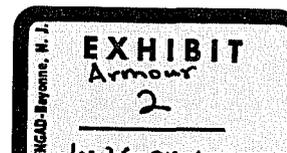

REBUTTAL TESTIMONY OF

DENNIS LAW

ON BEHALF OF

ARMOUR INDEPENDENT TELEPHONE COMPANY,  
BRIDGEWATER-CANISTOTA INDEPENDENT TELEPHONE COMPANY  
AND UNION TELEPHONE COMPANY

June 14, 2004

1 Q. Please state your name, business name and address.

2 A. My name is Dennis Law. I am the General Manager of Armour Independent Tele-  
3 phone Company, 116 North Main Ave., Hartford, South Dakota, 57033; Bridge-  
4 water-Canistota Independent Telephone, 116 North Main Ave., Hartford, South  
5 Dakota 57033; and Union Telephone Company, 116 North Main Ave., Hartford,  
6 South Dakota 57033 (referred to collectively as "Armour").

7 Q. What is the purpose of your testimony?

8 A. I will provide rebuttal testimony to various statements made by Ron Williams in his  
9 testimony filed on May 28, 2004 on behalf of WWC License L.L.C. (Western Wire-  
10 less).

11 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners "waited 4 months to seek  
12 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
13 their legal obligations." How do you respond?

14 A. I dispute Mr. Williams' characterization of events as baseless and inflammatory.  
15 Once the FCC made it clear that wireline carriers would be required to port num-  
16 bers to wireless carriers in areas outside the top 100 MSAs by May 24, 2004, Ar-  
17 mour took immediate steps to investigate the cost and the processes involved with  
18 LNP and to explore its legal options. Because Armour had no experience with LNP,  
19 it took time to gather the pertinent information and to make the decision to seek a  
20 suspension of the requirement from the Commission. Further, the suspension peti-  
21 tion itself took time and effort to prepare because Armour wanted to present as  
22 complete a petition as possible, accompanied by cost information as complete as  
23 possible.

1 Q. Do you agree with Mr. Williams' statement at page 14, lines 19-22, in which he states  
2 that "LECs will need to route a call to a ported number to the serving tandem" and to Mr.  
3 Williams' statement at page 15, lines 1-4 when he discusses the routing of allegedly "lo-  
4 cal calls?"

5 A. I believe that Mr. Williams' statement is not consistent with the interconnection  
6 agreement signed by Armour and Western Wireless. Pursuant to that agreement,  
7 Armour did not agree to route traffic destined for Western Wireless to the serving  
8 tandem. Rather, traffic terminating to Western Wireless is routed to an interex-  
9 change carrier. Therefore, it appears that Western Wireless' argument really is a  
10 bad faith attempt to change the agreement between the parties.

11 Q. At page 19, lines 8-10, Mr. Williams states that it is his belief that "the FCC views that it  
12 is the originating carrier's responsibility to deliver local traffic for termination and that  
13 the costs associated with fulfilling that responsibility are not a number portability cost."  
14 What is your response to this statement?

15 A. Mr. Williams' statements are inconsistent and should be rejected. First he argues  
16 that Armour should be required to install new facilities to deliver ported calls to  
17 Western Wireless and then he argues that the cost of those facilities are not number  
18 portability costs. Further, as discussed at lines 5-15 above, Mr. Williams' suggestion  
19 that it is Armour's responsibility to deliver traffic destined to Western Wireless  
20 through a serving tandem is not consistent with the interconnection agreement be-  
21 tween Armour and Western Wireless.

22 Q. At page 20, lines 13-16, Mr. Williams states that "[t]he routing methods proposed by the  
23 Petitioners are inefficient in that they make little or no utilization of existing equipment

1 and shared facilities currently used to exchange calls with other carriers.” How do you  
2 respond?

3 A. The routing methods reflected in the cost exhibit attached to Armour’s Petition are  
4 based on the current routing arrangements that Armour has in place with other  
5 carriers namely, calls that are dialed on a local 7-digit basis are routed via direct  
6 connections. Therefore, if calls to numbers ported to a carrier are to be dialed on a  
7 local 7-digit basis, a direct connection needs to be established between the carriers.

8 Q. Would Western Wireless’ routing proposal have impacts to Armour beyond LNP?

9 A. Yes. It is my understanding that Western Wireless’ proposal would increase Ar-  
10 mour’s costs. First, Western Wireless’ proposal would require Armour to pay for  
11 new facilities to the tandem provider that it does not need for any purpose other  
12 than to route calls to ported numbers to wireless carriers. Second, Armour would  
13 most likely have to pay transit traffic charges to the tandem provider for transport-  
14 ing the traffic to the wireless carriers.

15 Q. Is there any other impact?

16 A. Yes. It appears that Western Wireless’ proposal would create a regulatory arbi-  
17 trage scenario that could lead to the loss of access revenues. Today, certain calls to  
18 wireless carriers are routed to interexchange carriers. For example, if Armour Cus-  
19 tomer A calls a Western Wireless customer, Armour Customer A incurs a toll  
20 charge. However, under Western Wireless’ proposal, it is my understanding that if  
21 Armour Customer A calls a Western Wireless customer with a number ported from  
22 Armour, Armour Customer A would be charged for a local call. Customers may be  
23 encouraged to “give up” their existing wireless numbers and obtain wireline num-

1           bers for the sole purpose of porting that number to avoid toll charges. This is not  
2           only a bad public policy result, but also simply a bad faith attempt to avoid an im-  
3           portant contract provision upon which Western has already agreed with our com-  
4           pany.

5    Q.    Does this conclude your rebuttal testimony?

6    A.    Yes.

**CERTIFICATE OF SERVICE**

IN THE MATTER OF THE PETITION  
OF ARMOUR INDEPENDENT TELE-  
PHONE COMPANY, BRIDGEWATER  
CANISTOTA TELEPHONE COMPANY  
AND UNION TELEPHONE COMPANY  
FOR SUSPENSION OR MODIFICATION  
OF § 251(b)(2) OF THE COMMUNICA-  
TIONS ACT OF 1934 AS AMENDED

Docket No. TC04-046

**DIRECT TESTIMONY OF TOM BULLOCK ON BEHALF OF ARMOUR INDE-  
PENDENT TELEPHONE COMPANY, BRIDGEWATER CANISTOTA TELE-  
PHONE COMPANY AND UNION TELEPHONE COMPANY  
REGARDING COMPANY-SPECIFIC COST DATA**

May 14, 2004

**DIRECT TESTIMONY OF TOM BULLOCK ON BEHALF OF ARMOUR INDEPENDENT TELEPHONE COMPANY, BRIDGEWATER CANISTOTA TELEPHONE COMPANY AND UNION TELEPHONE COMPANY  
REGARDING COMPANY-SPECIFIC COST DATA**

**Q1. Please State your name, Employer, Business Address and Telephone Number.**

A. My name is Tom Bullock. I am employed with TELEC Consulting Resources Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln Nebraska, 68508. My telephone number is (402) 441-4315.

**Q2. On whose behalf are you testifying?**

A. I am testifying on behalf of the Company identified in the caption of the docket set out above. I will refer to this Company as the "RLEC".

**Q3. Have you provided your background information and an explanation of your role in this Docket in the "companion" testimony that has been offered in this Docket?**

A. Yes, I have.

**Q4. Did you prepare Exhibit 1 to the Petition of the RLEC filed in this Docket?**

A. Yes, in conjunction with members of the professional staff of TELEC, I was responsible for the preparation of Exhibit 1 as was attached to the Petition and I was also responsible for the preparation of supporting information prepared in connection with the responses to the discovery requests of Western Wireless. I was also responsible for the preparation of Exhibit 2 that is attached to this testimony.

**Q5. In your "introductory" testimony you have explained the line items that comprise Exhibit 2 and the process used to compile the data that was used to**

**develop the cost as shown on Exhibit 2. Please discuss where in your “introductory” testimony you describe this process.**

A. The process that was used to compile and develop the cost per line in Exhibit 2 is described on pages six through twenty-one in my “introductory” testimony.

**Q6. What was the source of the data?**

A. The data was derived from the books, financial records and managers of the RLEC. Data was also obtained from switch vendors, engineering consultants, tariffs, service order administration service bureaus, the number portability administration center, a number portability database provider, and my professional experience.

**Q7. What was the purpose of obtaining that particular data?**

A. To assist me in preparing an estimate of the costs to implement LNP for the RLEC.

**Q8. Is this the type of data that experts in your field would ordinarily review in formulating an opinion concerning the costs of LNP?**

A. Yes.

**Q9. What use did you make of the data after you received it from the RLEC?**

A. I have explained the use of the data on pages eleven through twenty-one of my “introductory” testimony.

**Q10. Have you reached an opinion with a reasonable degree of professional certainty as to the total non-recurring costs, excluding transport, to implement LNP that you have calculated for the RLEC that will be recovered over a 5-year recovery period through an end user surcharge?**

A. Yes. My opinion is that the total non-recurring costs, excluding transport, is \$121,277. Such costs were amortized over a recovery period of 60 months using a rate of return of 11.25%. The total nonrecurring costs per month, excluding transport, amortized over five years is \$2,652.

**Q11. Have you reached an opinion with a reasonable degree of professional certainty as to the total recurring costs, excluding transport, to implement LNP that you have calculated for the RLEC and that will be recovered from end users on an ongoing monthly charge basis?**

A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$1,591 per month.

**Q12. Have you reached an opinion with a reasonable degree of professional certainty as to the total cost, excluding transport, per line per month that would be charged to end-users if LNP were to be implemented by the RLEC?**

A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding the total nonrecurring costs per month amortized over five years to the total recurring costs per month, both amounts excluding transport costs, and dividing this sum by the RLEC's total access lines. The resulting cost per line per month was calculated to be \$1.66.

**Q13. Have you reached an opinion with a reasonable degree of professional certainty as to the total LNP costs and the monthly amount recovered from each end-user if the FCC determines that transport costs should be included in the LNP costs recovered from end-users?**

A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring costs, including transport costs, were calculated to be \$27,653 per month. The resulting LNP cost per line, per month, including transport, was calculated to be \$10.79.

**Q14. If FCC determines that transport costs should not be included in the end-user surcharge, will the transport cost still be incurred and who will pay these costs?**

A. Transport costs will have to be incurred to transport calls outside of the RLEC's service area. If the cost is not recovered through an end-user surcharge, and if these costs are not recovered from the wireless carrier, then the only party to pay these costs would be the RLEC.

**Q15. Is it your opinion that the calculations that you have just described fairly and reasonably describe the non-recurring and recurring costs for the RLEC to implement LNP and the end user charges to recover such costs?**

A. Yes.

**Q16. Does this conclude your testimony?**

A. Yes, it does.

DIRECT PRE-FILED TESTIMONY OF  
DENNIS LAW

May 14, 2004

**Direct Pre-Filed Testimony of Dennis Law  
On Behalf of Sioux Valley Telephone Company**

**Q: Please state your business name and address?**

A: My name is Dennis Law. My business address is 525 East Fourth Street, PO Box 98, Dell Rapids, SD 57022. My business telephone is (605) 428-5421.

**Q: By whom are you employed and in what capacity?**

A: I am the General Manager of Sioux Valley Telephone Company (Sioux Valley). Sioux Valley is a rural independent local exchange carrier that provides local exchange, exchange access and other telecommunications services to 6,020 access lines, including 77 lifeline customers, within its South Dakota service area, which include the exchanges of Dell Rapids, Colton, Humboldt/Montrose, Plankinton, Corsica, Valley Springs and North Larchwood.

**Q: Does your company have any direct point of interconnection with any wireless carrier and/or does your company provide any blocks of numbers for your company's rate centers to any wireless carrier?**

A: No.

**Q: What is the current method of routing calls from your subscriber's landline phones to wireless phone numbers?**

A: If the Sioux Valley subscriber is calling a wireless phone number that is located outside of Sioux Valley's local calling area or Extended Area Service (EAS) area, the customer must dial the full ten-digit (XXX-XXX-XXXX) number of the wireless phone and the call is routed through the customer's presubscribed Interexchange carrier. If the subscriber is calling a wireless phone number that is

assigned to an exchange with which Sioux Valley has an EAS agreement, the customer may dial the wireless phone number as a local call (XXX-XXXX). Sioux Valley currently has EAS agreements with Qwest Communications (Sioux Falls exchange) and Midstate Communications (New Holland exchange).

**Q: What is the number of wireless carriers providing service in your company's service area?**

A: Wireless carriers believed to be providing service are:

1. Cellular One/Western Wireless
2. Verizon Wireless
3. Nextel
4. Sprint PCS/Swiftel
5. Unice

**Q: Have any subscribers requested local number portability (LNP) from your company?**

A: There have been no subscriber requests for local number portability.

**Q: Since the passage of the 1996 Telecom Act have any wireline carriers ever requested LNP from your company?**

A: No.

**Q: Have any wireless carriers requested LNP and if so when?**

A: Yes.

**Q: How much time would be required for your company to provide LNP, if order by the Commission?**

A: Sioux Valley has not completed a specific implementation time line yet, but implementation will take a considerable amount of time.

**Q: In your experience as the general manger of Sioux Valley, have you seen increases or additions to the itemized fees on your customer's telephone bills?**

A: Yes.

**Q: What do you expect your customer's reaction to be to any new LNP fees on their bills?**

A. I would expect the reaction to be negative.

**Q: Is the public interest, convenience, and necessity served by requiring your company to implement LNP at this time?**

A, No, due to lack of demand as stated in earlier answer.

**Q: Does this conclude your direct testimony?**

A: Yes

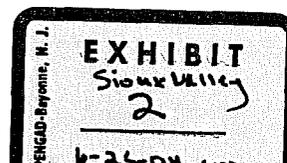

BEFORE THE PUBLIC UTILITIES COMMISSION

REBUTTAL TESTIMONY OF  
DENNIS LAW

REBUTTAL TESTIMONY OF  
DENNIS LAW  
ON BEHALF OF  
SIOUX VALLEY TELEPHONE COMPANY

June 14, 2004

1 Q. Please state your name, business name and address.

2 A. **My name is Dennis Law. I am the General Manager of Sioux Valley Telephone**  
3 **Company (“Sioux Valley”), whose address is 525 East Fourth Street, Dell Rapids,**  
4 **South Dakota 57022.**

5 Q. What is the purpose of your testimony?

6 A. **I will provide rebuttal testimony to various statements made by Ron Williams in his**  
7 **testimony filed on May 28, 2004 on behalf of WWC License L.L.C. (Western Wire-**  
8 **less).**

9 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners “waited 4 months to seek  
10 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
11 their legal obligations.” How do you respond?

12 A. **I dispute Mr. Williams’ characterization of events as baseless and inflammatory.**  
13 **Once the FCC made it clear that wireline carriers would be required to port num-**  
14 **bers to wireless carriers in areas outside the top 100 MSAs by May 24, 2004, Sioux**  
15 **Valley took immediate steps to investigate the cost and the processes involved with**  
16 **LNP and to explore its legal options. Because Sioux Valley had no experience with**  
17 **LNP, it took time to gather the pertinent information and to make the decision to**  
18 **seek a suspension of the requirement from the Commission. Further, the suspension**  
19 **petition itself took time and effort to prepare because Sioux Valley wanted to pre-**  
20 **sent as complete a petition as possible, accompanied by cost information as complete**  
21 **as possible.**

22 Q. Do you agree with Mr. Williams’ statement at page 14, lines 19-22, in which he states  
23 that “LECs will need to route a call to a ported number to the serving tandem” and to Mr.  
24 Williams’ statement at page 15, lines 1-4 when he discusses the routing of allegedly “lo-  
25 cal calls?”

1 A. I believe that Mr. Williams' statement is not consistent with the interconnection  
2 agreement signed by Sioux Valley and Western Wireless. Pursuant to that agree-  
3 ment, Sioux Valley did not agree to route traffic destined for Western Wireless to  
4 the serving tandem. Rather, traffic terminating to Western Wireless is routed to an  
5 interexchange carrier. Therefore, it appears that Western Wireless' argument  
6 really is a bad faith attempt to change the agreement between the parties.

7 Q. At page 19, lines 8-10, Mr. Williams states that it is his belief that "the FCC views that it  
8 is the originating carrier's responsibility to deliver local traffic for termination and that  
9 the costs associated with fulfilling that responsibility are not a number portability cost."  
10 What is your response to this statement?

11 A. Mr. Williams' statements are inconsistent and should be rejected. First he argues  
12 that Sioux Valley should be required to install new facilities to deliver ported calls to  
13 Western Wireless and then he argues that the cost of those facilities are not number  
14 portability costs. Further, as discussed at lines 3-13 above, Mr. Williams' suggestion  
15 that it is Sioux Valley's responsibility to deliver traffic destined to Western Wireless  
16 through a serving tandem is not consistent with the interconnection agreement be-  
17 tween Sioux Valley and Western Wireless.

18 Q. At page 20, lines 13-16, Mr. Williams states that "[t]he routing methods proposed by the  
19 Petitioners are inefficient in that they make little or no utilization of existing equipment  
20 and shared facilities currently used to exchange calls with other carriers." How do you  
21 respond?

22 A. The routing methods reflected in the cost exhibit attached to Sioux Valley's Petition  
23 are based on the current routing arrangements that Sioux Valley has in place with  
24 other carriers namely, calls that are dialed on a local 7-digit basis are routed via di-  
25 rect connections. Therefore, if calls to numbers ported to a carrier are to be dialed

1 on a local 7-digit basis, a direct connection needs to be established between the car-  
2 riers.

3 Q. Would Western Wireless' routing proposal have impacts to Sioux Valley beyond LNP?

4 A. Yes. It is my understanding that Western Wireless' proposal would increase Sioux  
5 Valley's costs. First, Western Wireless' proposal would require Sioux Valley to pay  
6 for new facilities to the tandem provider that it does not need for any purpose other  
7 than to route calls to ported numbers to wireless carriers. Second, Sioux Valley  
8 would most likely have to pay transit traffic charges to the tandem provider for  
9 transporting the traffic to the wireless carriers.

10 Q. Is there any other impact?

11 A. Yes. It appears that Western Wireless' proposal would create a regulatory arbi-  
12 trage scenario that could lead to the loss of access revenues. Today, certain calls to  
13 wireless carriers are routed to interexchange carriers. For example, if Sioux Valley  
14 Customer A calls a Western Wireless customer, Sioux Valley Customer A incurs a  
15 toll charge. However, under Western Wireless' proposal, it is my understanding  
16 that if Sioux Valley Customer A calls a Western Wireless customer with a number  
17 ported from Sioux Valley, Sioux Valley Customer A would be charged for a local  
18 call. Customers may be encouraged to "give up" their existing wireless numbers  
19 and obtain wireline numbers for the sole purpose of porting that number to avoid  
20 toll charges. This is not only a bad public policy result, but also simply a bad faith  
21 attempt to avoid an important contract provision upon which Western has already  
22 agreed with our company.

23 Q. Does this conclude your rebuttal testimony?

24 A. Yes.

ON BEHALF OF SIOUX VALLEY TELEPHONE COMPANY  
REGARDING COMPANY-SPECIFIC COST DATA**

May 14, 2004

**DIRECT TESTIMONY OF TOM BULLOCK  
ON BEHALF OF SIOUX VALLEY TELEPHONE COMPANY  
REGARDING COMPANY-SPECIFIC COST DATA**

**Q1. Please State your name, Employer, Business Address and Telephone Number.**

A. My name is Tom Bullock. I am employed with TELEC Consulting Resources Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln Nebraska, 68508. My telephone number is (402) 441-4315.

**Q2. On whose behalf are you testifying?**

A. I am testifying on behalf of the Company identified in the caption of the docket set out above. I will refer to this Company as the "RLEC".

**Q3. Have you provided your background information and an explanation of your role in this Docket in the "companion" testimony that has been offered in this Docket?**

A. Yes, I have.

**Q4. Did you prepare Exhibit 1 to the Petition of the RLEC filed in this Docket?**

A. Yes, in conjunction with members of the professional staff of TELEC, I was responsible for the preparation of Exhibit 1 as was attached to the Petition and I was also responsible for the preparation of supporting information prepared in connection with the responses to the discovery requests of Western Wireless. I was also responsible for the preparation of Exhibit 2 that is attached to this testimony.

**Q5. In your "introductory" testimony you have explained the line items that comprise Exhibit 2 and the process used to compile the data that was used to develop the cost as shown on Exhibit 2. Please discuss where in your "introductory" testimony you describe this process.**

A. The process that was used to compile and develop the cost per line in Exhibit 2 is described on pages six through twenty-one in my “introductory” testimony.

**Q6. What was the source of the data?**

A. The data was derived from the books, financial records and managers of the RLEC. Data was also obtained from switch vendors, engineering consultants, tariffs, service order administration service bureaus, the number portability administration center, a number portability database provider, and my professional experience.

**Q7. What was the purpose of obtaining that particular data?**

A. To assist me in preparing an estimate of the costs to implement LNP for the RLEC.

**Q8. Is this the type of data that experts in your field would ordinarily review in formulating an opinion concerning the costs of LNP?**

A. Yes.

**Q9. What use did you make of the data after you received it from the RLEC?**

A. I have explained the use of the data on pages eleven through twenty-one of my “introductory” testimony.

**Q10. Have you reached an opinion with a reasonable degree of professional certainty as to the total non-recurring costs, excluding transport, to implement LNP that you have calculated for the RLEC that will be recovered over a 5-year recovery period through an end user surcharge?**

A. Yes. My opinion is that the total non-recurring costs, excluding transport, is \$103,671. Such costs were amortized over a recovery period of 60 months using

a rate of return of 11.25%. The total nonrecurring costs per month, excluding transport, amortized over five years is \$2,267.

**Q11. Have you reached an opinion with a reasonable degree of professional certainty as to the total recurring costs, excluding transport, to implement LNP that you have calculated for the RLEC and that will be recovered from end users on an ongoing monthly charge basis?**

A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$1,933 per month.

**Q12. Have you reached an opinion with a reasonable degree of professional certainty as to the total cost, excluding transport, per line per month that would be charged to end-users if LNP were to be implemented by the RLEC?**

A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding the total nonrecurring costs per month amortized over five years to the total recurring costs per month, both amounts excluding transport costs, and dividing this sum by the RLEC's total access lines. The resulting cost per line per month was calculated to be \$0.81.

**Q13. Have you reached an opinion with a reasonable degree of professional certainty as to the total LNP costs and the monthly amount recovered from each end-user if the FCC determines that transport costs should be included in the LNP costs recovered from end-users?**

A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring costs, including transport costs, were calculated to be \$17,088 per month. The re-

sulting LNP cost per line, per month, including transport, was calculated to be \$3.31.

**Q14. If FCC determines that transport costs should not be included in the end-user surcharge, will the transport cost still be incurred and who will pay these costs?**

A. Transport costs will have to be incurred to transport calls outside of the RLEC's service area. If the cost is not recovered through an end-user surcharge, and if these costs are not recovered from the wireless carrier, then the only party to pay these costs would be the RLEC.

**Q15. Is it your opinion that the calculations that you have just described fairly and reasonably describe the non-recurring and recurring costs for the RLEC to implement LNP and the end user charges to recover such costs?**

A. Yes.

**Q16. Does this conclude your testimony?**

A. Yes, it does.

**Sioux Valley Telephone Company**  
**Total Estimated LNP Non-recurring and Recurring Costs**

**Exhibit 2**

With  
 Surcharges  
 & Taxes

**LNP Non-recurring Costs**

Switch Upgrade Costs	\$ 63,114
Internal Business Procedure Changes	\$ 17,815
Intercarrier Testing	\$ 3,939
Other Internal Costs	\$ 15,065
LNP Query set up	\$ 380
SOA Non-recurring set up charge	\$ 1,000
Customer Notification Costs	\$ 2,358
<b>Total Non-recurring Costs excluding transport</b>	<b>\$ 103,671</b>

Non recurring transport charges \$ 8,403

**Total Non-recurring Costs including transport** **\$ 112,074**

**LNP Monthly Recurring Costs**

SOA Monthly Charge	\$ 400
LNP Query Costs per month	\$ 300
Switch Maintenance Costs per month	\$ -
Other Monthly Costs	\$ 1,233
<b>Total Recurring Monthly Costs excluding Transport</b>	<b>\$ 1,933</b>

Transport \$ 12,704

**Total Recurring Monthly Costs including Transport** **\$ 14,637**

**Monthly Cost Calculations per line**

Total Nonrecurring cost per month excluding transport amortized over five years	\$ 2,267
Total Nonrecurring cost per month including transport amortized over five years	\$ 2,451

Total cost per month excluding transport \$ 4,200

Total cost per month including transport \$ 17,088

Access Lines excluding Lifeline 5,944

LNP cost per line per month excluding transport	\$ 0.71	\$ 0.81
LNP cost per line per month including transport	\$ 2.87	\$ 3.31

INTRODUCTORY TESTIMONY OF TOM BULLOCK  
ON BEHALF OF THE ABOVE-NAMED COMPANIES

May 14, 2004

1  
2 **IDENTIFICATION OF WITNESS, FACTUAL BACKGROUND**  
3 **AND PURPOSE OF TESTIMONY**  
4

5 A. Witness Background  
6

7 Q. **What is your Name, Employer, Business Address and Telephone Number?**

8  
9 A. My name is Tom Bullock. I am employed with TELEC Consulting Resources,  
10 Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln, Nebraska  
11 68508. My telephone number is (402) 441-4315.

12 Q. **On whose behalf are you testifying?**

13  
14 A. I am testifying on behalf of the Companies identified in Exhibit A attached to this  
15 testimony. I will refer to the Companies listed on Exhibit A as the "RLECs."  
16 Each of the RLECs provides local telephone exchange service and exchange ac-  
17 cess services in rural areas of South Dakota. Each of the RLECs is engaged in the  
18 provision of general telecommunications services in the State of South Dakota.

19 Q. **What is your current position?**

20  
21 A. I am a consultant at TELEC Consulting Resources, Inc.  
22

23 Q. **What are your duties and responsibilities at TELEC Consulting Resources?**

24  
25 A. I am responsible for consulting with clients regarding technical and regulatory  
26 issues and for analyzing and modeling various kinds of costs related to telecom-  
27 munications.

28 Q. **What was your professional experience prior to your current position?**

29  
30 A. Prior to my current position I worked in the telecommunications industry for 19  
31 years. I served at Aliant Communications (later merged with ALLTEL) in its En-

1           gineering, Network Operations, Marketing and Information Systems departments,  
2           and held a variety of technical and management positions.

3    Q.    **What is your educational background?**

4  
5    A.    I hold a Master of Science degree in physics from the University of Nebraska-  
6    Lincoln and a Bachelor of Science degree in physics from the University of  
7    Michigan-Ann Arbor. I also attended Nebraska Wesleyan University for two  
8    years prior to transferring to the University of Michigan.

9    Q.    **What is the purpose of your testimony?**

10  
11   A.    The purpose of my testimony is to offer support for the estimate of costs accom-  
12   panying the Petition that each of the RLECs filed pursuant to Section 251(f)(2) of  
13   the Telecommunications Act of 1934 as amended (“the Act”) and South Dakota  
14   Codified Laws SDCL § 49-31-80, amended as shown on Exhibit 2 attached to this  
15   testimony. This cost estimate constitutes the basis for each RLEC’s contention  
16   that a suspension or modification of the Local Number Portability (“LNP”) re-  
17   quirement is necessary, pursuant to Section 251(f)(2)(A)(i) of the Act, to avoid a  
18   significant adverse economic impact on telecommunications users generally or,  
19   pursuant to Section 251(f)(2)(A)(ii), to avoid imposing a requirement that is un-  
20   duly economically burdensome. This cost estimate represents the collection of  
21   those costs that would be incurred in the provision of LNP. I will explain the  
22   manner in which these cost estimates were developed.

23   Q.    **What aspects of your professional experience did you use in preparing your**  
24   **testimony today?**

25  
26   A.    During my career with Aliant Communications, I served with a small group of  
27   individuals responsible for creating and developing a new data communications

1 business unit within the larger corporation. My seven years with this data com-  
2 munications division, during which it grew from three to over fifteen people,  
3 gave me extensive personal experience in conceptualizing, developing and im-  
4 plementing new business procedures for a small organization in which I had direct  
5 management duties. I held the positions of Data Communications Engineer, En-  
6 gineering & Operations Supervisor and Manager within the division. At a later  
7 stage in my career, I assisted Aliant's Engineering and Network Operations de-  
8 partments in adapting several of its information systems to newly designed busi-  
9 ness processes, as part of the company's "Business Process Re-engineering" pro-  
10 gram, intended to streamline Aliant's internal operations. Toward the end of my  
11 career at Aliant, I developed and utilized software to automatically extract data  
12 from one type of telephone switch, convert its format, and load it into a different  
13 type of switch, in connection with a series of major central office conversion pro-  
14 jects the company had undertaken. More recently, as a consultant, I have com-  
15 piled and analyzed the cost data necessary to file tariffs at both the state and fed-  
16 eral levels on behalf of small telephone companies. I participated with other  
17 TELECOM staff in the collection and analysis of data necessary to develop each  
18 RLEC's estimates of the cost of implementing LNP. As part of this analysis, I  
19 developed mathematical functions to model certain categories of costs associated  
20 with LNP implementation.

21 **OVERVIEW OF LNP PROCESSES AND METHODS OF ESTIMATING COSTS**

22 Q. **Can you provide a general overview of the network interconnections re-**  
23 **quired for LNP and some of the processes involved with porting a telephone**  
24 **number?**  
25

1 A. Yes. Exhibit B, attached to this testimony, is a pictorial representation of the  
2 principal network architectural features required for LNP. This sketch shows two  
3 service providers and the LNP-related interfaces each must establish in order to  
4 port a telephone number from one (the “Old SP” - oval on the left) to the other  
5 (the “New SP” – oval on the right). The process of porting a number begins when  
6 a customer of the Old SP, represented by the telephone set near the middle of the  
7 figure, contacts the New SP and asks to have his telephone number ported to the  
8 New SP. (In the case of wireline-to-wireless porting, the customer’s wireline  
9 number would be ported to a wireless handset served by the wireless carrier -  
10 large “TN port” arrow from telephone set to wireless handset). The New SP will  
11 then send a Local Service Request (“LSR”) to the Old SP, typically via fax trans-  
12 mission, requesting that the customer’s number be ported. The Old SP validates  
13 the information on the LSR, responds to the New SP with a Firm Order Confirma-  
14 tion (“FOC”) and executes a transaction with its contracted LNP Service Order  
15 Administrator (“SOA”), who in turn updates the appropriate regional database  
16 operated by the Number Portability Administration Center (“NPAC”), thereby es-  
17 tablishing an initial pending record (called a “subscription version”) in the master  
18 database shared by all carriers in the region. All carriers participating in LNP  
19 must either utilize the services of an NPAC-certified SOA, or establish their own  
20 NPAC-certified SOA function internally. After the New SP receives the FOC, it  
21 will perform a similar function (likely using a SOA different from that used by the  
22 Old SP) to update the same regional NPAC database. If there is any material dis-  
23 crepancy between the records submitted by the two SPs, the NPAC’s Service

1 Management System (“SMS”) will not allow the port to proceed until the discrep-  
2 ancy is resolved. On the due date, the New SP will send another message to the  
3 NPAC to request that the port be “activated.” If no errors or discrepancies exist  
4 among the NPAC records associated with the porting request, the NPAC will ac-  
5 tivate the port by sending a message to all the contracted LNP Query service pro-  
6 viders in the region, causing them to establish a new record in their databases that  
7 associates the ported telephone number with the New SP. More precisely, the  
8 new record in these databases associates the ported number with the Location  
9 Routing Number (“LRN”) of the New SP’s switch that now serves the number,  
10 which may have now become a wireless number. During call processing in a  
11 switch that has been made LNP-capable, the switch must launch LNP queries to  
12 such a database to retrieve the LRN for any ported number. The LRN is used by  
13 all switches in the call train in place of the dialed digits to route the call to the  
14 proper terminating switch. Finally, the diagram on Exhibit B shows trunk links  
15 required to transport such calls from carrier to carrier. Solid lines represent trunks  
16 in place today that carry toll traffic. The dotted line connecting the two ovals  
17 represents a direct trunk link that may or may not be in place between the Old SP  
18 and the New SP.

19 Q. **What process did you use to prepare the cost estimates shown in Exhibit 1 as**  
20 **filed for each of the RLECs and those estimates shown in Exhibit 2, attached**  
21 **to your testimony?**

22  
23 A. There were four stages of activity involved in preparing the cost estimates shown  
24 in Exhibit 1, and a fifth stage involved in preparing the Exhibit 2 estimates. First,  
25 shortly after the FCC released its November 10, 2003 Order on wireline to wire-

1 less LNP, TELEC Consulting staff, together with management personnel of sev-  
2 eral small rural telephone companies, began to analyze the effect that the provi-  
3 sion of wireline to wireless LNP would have on such a company's internal opera-  
4 tions and to identify the kinds of new costs that would arise from LNP implemen-  
5 tation. We specifically discussed and analyzed LNP network architecture issues,  
6 switch software and technical network interface requirements, administrative re-  
7 quirements of the NPAC, SOA service bureau options, internal provisioning proc-  
8 esses, LNP database query services and cost recovery issues including the LNP  
9 End User charge. In addition, we analyzed various call flow scenarios in a num-  
10 ber porting environment and recognized that certain transport facilities must also  
11 be in place to fully support wireline to wireless LNP. Second, TELEC asked rep-  
12 resentatives of this group of telephone companies to estimate their costs for im-  
13 plementing the capabilities and performing the activities required for LNP that we  
14 had identified at that time. Our analysis of the responses suggested that costs in  
15 some categories could be reasonably represented as functions of company size.  
16 Third, using these company-provided estimates as a guide, TELEC developed a  
17 model to calculate estimates for those cost categories, derived from basic com-  
18 pany facts, such as number of customers, number of employees and wage rates,  
19 and using a common set of methods applied to all companies. We also developed  
20 a data request form that could be used as a source of input data for the model. A  
21 paper copy of that form, the Excel workbook **LNPCostDataRequest.xls**, is at-  
22 tached to this testimony as Exhibit C1; its accompanying instructions are attached  
23 as Exhibit C2. Fourth, TELEC obtained from each of the RLECs a copy of the

1           **LNPCostDataRequest.xls** form, filled in with the company’s own data. In those  
2 cases where a group of operating companies elected to jointly file a petition with  
3 this Commission, data from the companies was merged into a single Excel file for  
4 the group. Using this data as input, the output from TELEC’s cost model consti-  
5 tuted the cost estimates shown on Exhibit 1 as filed with the RLECs’ petitions.  
6 Fifth, and following the filing of the petitions, TELEC made several refinements  
7 to our cost estimates in several categories. We investigated the LNP software  
8 pricing policies applied by the vendors of the switches used in the RLECs’ net-  
9 works – namely, the Nortel DMS-10, the Siemens DCO and the Mitel GX-5000.  
10 We adjusted downward our estimates of SOA costs to account for lower cost  
11 SOA options that we investigated after the filing of the petitions. We verified cir-  
12 cuit mileages, applicable tariffs and connectivity requirements in our estimates of  
13 transport costs. We corrected estimates of database query costs. We made ex-  
14 plicit assumptions about the quantity of telephone numbers that each RLEC  
15 would port out each month, based on the number of the RLEC’s access lines,  
16 which led to a specific choice of SOA option and SOA cost estimates for each  
17 RLEC, and to an estimate of monthly expense incurred to port these telephone  
18 numbers to a competing wireless carrier. The results of these adjustments are re-  
19 flected in the cost estimates shown on Exhibit 2, attached to this testimony.

20   Q.   **What information did TELEC collect from each RLEC using the Excel file**  
21           **LNPCostDataRequest.xls?**

22  
23   A.   TELEC asked each RLEC to obtain from its switch vendor or engineering con-  
24 sultant a price quote for LNP capability in each of its switches, and to provide  
25 TELEC with information from that price quote. TELEC asked each company to

1 estimate the increase in annual switch maintenance expense it would incur as a  
2 consequence of having installed LNP capability in its switches. TELEC also  
3 asked each company to also provide the following general information about its  
4 operations and its neighboring wireless competitors. Regarding its own opera-  
5 tions, we asked for:

- 6 1. Number of access lines in service;
- 7 2. Number of Lifeline customers;
- 8 3. Number of employees having certain job titles that would be involved  
9 with LNP implementation;
- 10 4. Average loaded wage rates, including benefits and overheads, for em-  
11 ployees in those job titles.

12 Regarding neighboring wireless competitors, we asked for:

- 13 5. Identity of wireless carriers that have sent the company a request for  
14 LNP;
- 15 6. Identity of other wireless carriers with coverage in the company's ser-  
16 vice area;
- 17 7. Identity of wireless carriers with existing direct trunks connecting to  
18 the company's switching network.

19 And to allow us to estimate transport costs, we asked for:

- 20 8. Airline mileage from the company's switches to the nearest LATA  
21 tandem location.

22 **Q. What is the common set of methods applied to all companies that you re-**  
23 **ferred to earlier?**  
24

1 A. TELEC used two sets of methods: one set for the cost estimates filed with each of  
2 the RLEC's petitions as Exhibit 1, and a different set for the cost estimates at-  
3 tached to this testimony as Exhibit 2. In each case, the methods fall into ten cate-  
4 gories, corresponding to individual line items on Exhibit 1 and Exhibit 2. These  
5 categories are as follows:

- 6 1. Switch Upgrade Costs
- 7 2. Internal Business Procedure Changes
- 8 3. Intercarrier Testing
- 9 4. Other Internal Costs
- 10 5. LNP query services, including:
  - 11 a. LNP Query set up
  - 12 b. LNP Query Costs per month
- 13 6. SOA services, including:
  - 14 a. SOA Non-recurring set up charge
  - 15 b. SOA Monthly Charge
- 16 7. Customer Notification Costs
- 17 8. Switch Maintenance Costs per month
- 18 9. Other Monthly Costs
- 19 10. Transport costs, including:
  - 20 a. Non recurring transport charges
  - 21 b. Transport (i.e. monthly recurring transport charges)

22 **CATEGORIES OF ESTIMATED COSTS**

23 Q. What costs are included in the "Switch Upgrade Costs" category?  
24

1 A. In order for a telephone number to be ported out of one service provider's switch  
2 to a different service provider's switch, both switches must be capable of execut-  
3 ing a number of functions that are essential to the proper routing of calls to ported  
4 numbers. These functions include (1) querying an internal database to determine  
5 whether a locally dialed number belongs to a ported NPA-NXX; (2) launching an  
6 SS7 Transaction Capabilities Application Part ("TCAP") query to a provider of  
7 LNP database query services, to retrieve the LRN of the new service provider's  
8 switch; (3) manipulation of the SS7 ISDN User Part ("ISUP") message, sent to es-  
9 tablish trunking resources for the call - in order that downstream switches are  
10 made aware of the fact that a query has already been performed and so that the  
11 new service provider's switch can properly terminate the call to the originally di-  
12 aled number; and (4) routing the call from the originating switch to the correct  
13 outgoing trunk group for the specific LRN associated with the new service pro-  
14 vider's switch. The first three of these functions are provided through the installa-  
15 tion of LNP software that switch manufacturers have made available to their cus-  
16 tomers, including the RLECs. The fourth function is provided through manual  
17 updates to internal switch translation tables that control the routing of telephone  
18 numbers to outgoing trunk facilities. The "Switch Upgrade Costs" category in-  
19 cludes both the cost of installing the manufacturer's LNP software, and of per-  
20 forming the necessary translation changes, in each RLEC's Host and Stand-Alone  
21 switches. Translations for Remote switches must be performed in the controlling  
22 Host.

23 Q. **What method did TELECOM use to estimate the "Switch Upgrade Costs" cate-**  
24 **gory, for Exhibit 1 and for Exhibit 2?**

1  
2 A. For Exhibit 1, TELECOM obtained from each company an estimate of the cost of  
3 purchasing and installing the necessary hardware and/or software to provide LNP  
4 capability and of performing the necessary switch translation table changes  
5 needed to route calls to ported numbers. We used the data that each company  
6 provided on the **Switch&Transport** sheet of **LNPCostDataRequest.xls**, simply  
7 totaling the dollar amounts in the two columns labeled “Vendor upgrade price for  
8 LNP capability” and “LNP Installation Costs (internal and/or external)” to pro-  
9 duce a total “Switch Upgrade Cost.” For Exhibit 2, we investigated the LNP pric-  
10 ing policy used by the manufacturer of each RLEC’s switches and asked each  
11 company to provide us with the company-specific information needed to apply  
12 those policies, such as a count of equipped lines or switch ports, and whether the  
13 RLEC participates in the manufacturer’s annual-fee software maintenance pro-  
14 gram. We also verified whether or not each RLEC already had LNP capability in  
15 some or all of its switches. We then determined that the Switch Upgrade Cost in-  
16 curred for providing LNP should be the sum of the following items:

- 17 1. Either:
  - 18 a. The amount shown on a vendor price quotation provided to the RLEC,  
19 if that quotation clearly indicated that only LNP capability was being  
20 provided for in the quotation; or, otherwise,
  - 21 b. The result of a straightforward application of the switch manufac-  
22 turer’s LNP pricing policy for the RLEC in question; and
- 23 2. A uniform cost for having switch translations performed by an outside en-  
24 gineering firm; and

1           3. A uniform cost for the company's own technicians' participation in the  
2           translations work.

3 Q.   **What costs are represented by the "Internal Business Procedure Changes"**  
4   **category?**

5  
6 A.   These are the costs associated with modifying an RLEC's internal business pro-  
7   cedures so that the RLEC can respond in a timely and reliable manner to a request  
8   from a competing service provider to port an individual telephone number.

9  
10 Q.   **What method did TELEC use to estimate the "Internal Business Procedure**  
11   **Changes" category, for Exhibit 1 and for Exhibit 2?**

12  
13 A.   TELEC used the same method for Exhibit 1 and Exhibit 2. TELEC organized  
14   these costs into ten subcategories and determined that the costs in each subcate-  
15   gory could be reasonably estimated using mathematical functions of three kinds  
16   of variables: (1) an RLEC's count of access lines, (2) the quantities of personnel  
17   the RLEC employs with certain job titles, and (3) the wage rates of those employ-  
18   ees.

19  
20   TELEC identified four general types of routine activity associated with porting a  
21   number for which an RLEC would need to develop new internal business proce-  
22   dures:

23           1. receiving an LSR from the competing carrier and responding with an

24           FOC;

25           2. interfacing with a SOA for entry of data into the NPAC's regional number

26           portability database;

- 1           3. performing switch updates, such as applying an unconditional 10-digit
- 2           trigger, for the ported number; and
- 3           4. maintaining historical records, such as a database of all numbers that have
- 4           been ported out to other carriers.

5           The costs estimated here are those costs associated with planning for and estab-

6           lishing the procedures to be followed in performing these activities – not the costs

7           of actually performing them on a routine basis.

8           TELEC also identified five types of preparatory activity needed to formulate an

9           overall company plan for LNP implementation, to train personnel in the number

10          porting procedures described above, and to put into place various information

11          management tools. These preparatory activities are:

- 12           1. general initial process planning;
- 13           2. training of technicians;
- 14           3. training of customer service representatives;
- 15           4. modification of the company's billing system to add an LNP End User
- 16           Charge; and
- 17           5. other computer programming.

18           

19           Finally, TELEC recognized that time would be needed to establish procedures for

20           resolution of problems that occur after a port has been completed and tested, such

21           as network routing problems that are unrelated to an individual customer's num-

22           ber porting event, but which affect ported numbers, either predominantly or ex-

23           clusively. We labeled this activity "set up troubleshooting procedures."

24

1  
2 TELEEC associated each of these ten activities with the job titles typically held in a  
3 small telephone company, and estimated the minimum number of hours that a  
4 person holding a specific job title would need to spend working on that activity -  
5 in a very small organization with no overhead costs of supervision or interper-  
6 sonal communications, and with minimum complexity.

7  
8 The job titles TELEEC associated with these activities are: General Manager, Cus-  
9 tomer Service Supervisor, Engineering Supervisor, Operations Supervisor, Office  
10 Manager, Switch Engineer, Switch Technician, Computer Programmer, Customer  
11 Service Representative and Office Assistant. TELEEC requested that each com-  
12 pany provide quantities of employees holding each of these job titles and the av-  
13 erage loaded wage rate for each job title on the **StaffInfo** sheet of **LNPCostDa-**  
14 **taRequest.xls**.

15  
16 We then assigned a logarithmic, “company-size” scale-up coefficient to each ac-  
17 tivity to represent the degree to which employees of a larger company would  
18 spend more time on that activity than employees of a smaller company would  
19 spend. These coefficients account for the additional overhead associated with  
20 management, supervision and interpersonal communications, and the greater ad-  
21 ministrative complexity, associated with larger organizations when implementing  
22 and adapting to new procedures. This coefficient was multiplied by the base-ten  
23 logarithm of the company’s number of access lines to produce a company-specific  
24 scale-up factor for each activity, according to the following formula:

$$F_A = 1 + C_A * \log_{10}(L)$$

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11

21  
22  
23  
24  
25  
26  
27  
28  
29  
30

where:  
     $F_A$  is the scale-up factor for activity A;  
     $C_A$  is the scale-up coefficient for activity A;  
     $\log_{10}(x)$  is the base-ten logarithm of x;  
    L is the number of the company's access lines.

Exhibit D, attached to this testimony, shows, for each activity, the scale-up coefficients and, for each activity and job title, the estimated minimum hours spent on that activity by a person with that job title.

For each activity, the estimated actual time spent on that activity by each person holding a particular job title is the product of the estimated minimum time for that activity and job title with the scale-up factor for that activity. The contribution of a particular job title toward the cost of each activity is the product of the following three factors: the estimated actual time spent per person on that activity, the number of people holding that job title, and that job title's average loaded wage rate. The total cost of each activity is the sum of the contributions of all job titles.

The total cost of Internal Business Procedure Changes is the sum of the costs of all activities.

- Q. **What costs are included in the "Intercarrier Testing" category?**
- A. The costs included in this category are labor costs incurred to test all of the porting processes prior to processing the first porting request and to troubleshoot any problems that may occur during the initial phases of LNP implementation. Dan Davis has described in his testimony the need for intercarrier testing.
- Q. **What method did TELEC use to estimate the "Intercarrier Testing" category, for Exhibit 1 and for Exhibit 2?**

1  
2 A. TELEC estimated, for both Exhibits, that each RLEC would need to devote 120  
3 man-hours to this activity. For most RLECs, we assumed that forty hours would  
4 be spent by the Customer Services Supervisor, forty man-hours by one or more  
5 switch technicians and forty man-hours by one or more Customer Service Repre-  
6 sentatives. For RLECs that lack one or more of these job titles, we assigned this  
7 activity to a different job title that the RLEC does use. We applied the wage rates  
8 that each RLEC reported to us to calculate a total cost for this activity.

9  
10 Q. **What costs are included in the “Other Internal Costs” category?**

11  
12 A. The costs that are included in this category are regulatory, consulting, and legal  
13 costs. These are costs that are incurred to negotiate and establish agreements with  
14 the NPAC, with each RLEC's selected SOA service bureau and LNP Query ser-  
15 vice provider, and with service providers requesting LNP. Also included in this  
16 category are costs associated with completing intercarrier porting forms and trad-  
17 ing partner profile forms with service providers requesting LNP; developing cost  
18 support for, writing and filing with the FCC a tariff for the LNP End User charge;  
19 and general education of the company's management regarding LNP implementa-  
20 tion.

21 Q. **What method did TELEC use to estimate the “Other Internal Costs” cate-**  
22 **gory, for Exhibit 1 and for Exhibit 2?**

23  
24 A. TELEC determined, for both Exhibits, that each RLEC's General Manager would  
25 need to devote a certain number of hours to these activities and that each RLEC  
26 would also hire outside engineers and/or regulatory consultants as well as attor-  
27 neys to assist with this work. The specific number of man-hours we estimated

1 would be required for each activity are summarized in Exhibit E, attached to this  
2 testimony.

3 Q. **What costs are included in the “LNP Query set up” and “LNP Query Costs**  
4 **per month” categories?**

5  
6 A. These are the initial and ongoing monthly fees paid to a provider of LNP Query  
7 services. As I explained earlier, one of the architectural requirements of LNP is  
8 that switches must be able to launch queries over the SS7 network for retrieval of  
9 the LRN of a ported number, in order to properly route a call to such a ported  
10 number to its correct terminating switch.

11 Q. **What method did TELECOM use to estimate the “LNP Query set up” and “LNP**  
12 **Query Costs per month” categories, for Exhibit 1 and for Exhibit 2?**

13  
14 A. TELECOM contacted several providers of LNP Query services to learn about their  
15 pricing policies. In general, LNP Query services include a set-up fee and recur-  
16 ring monthly charges. The recurring charges are priced at a small fraction of a  
17 cent per query, for a unique Originating Point Code, meaning that costs are in-  
18 curred separately for each Host switch and each Stand-Alone switch in an RLEC's  
19 network.. Also typical of LNP Query service pricing is that there is a minimum  
20 monthly charge per Originating Point Code. Rather than try to estimate the quan-  
21 tities of queries that each switch would launch, TELECOM used the monthly mini-  
22 mum charge of a well established service provider to estimate these costs. For  
23 Exhibit 1, we failed to account for the fact that the service provider would charge  
24 this minimum for each switch, assuming that the monthly minimum applied to the  
25 company as a whole. This error was corrected in Exhibit 2.

26

1 Q. **What costs are included in the “SOA Non-recurring set-up charge” and**  
2 **“SOA Monthly Charge” categories?**

3  
4 A. These are the initial and ongoing monthly fees paid to a provider of LNP SOA  
5 services. As I explained earlier, all carriers participating in LNP must either util-  
6 ize the services of an NPAC-certified SOA, or establish their own NPAC-certified  
7 SOA function internally.

8 Q. **What method did TELEC use to estimate the “SOA Non-recurring set-up**  
9 **charge” and “SOA Monthly Charge” categories, for Exhibit 1 and for Ex-**  
10 **hibit 2?**

11  
12 A. TELEC assumed that none of the RLECs would implement its own SOA and  
13 would therefore need to utilize a SOA service bureau. For Exhibit 1, we used the  
14 average of the SOA fees charged by two well established SOA service bureaus.  
15 For Exhibit 2, we used two lower-cost options, referred to below as "SOA Option  
16 A" and "SOA Option B," offered by a third service bureau, designed expressly for  
17 small telephone companies. We assumed that the smallest RLECs would use  
18 SOA Option A and that larger RLECs would use SOA Option B. The monthly  
19 cost of SOA Option A varies with the quantity of number porting transactions  
20 performed each month. We estimated that each number porting event would re-  
21 quire three such transactions to complete the port. We assumed that RLECs with  
22 more access lines would port more numbers each month than would those with  
23 fewer access lines. Our assumptions about which SOA Option - A or B - that an  
24 RLEC would utilize, and the quantity of number porting events it would execute  
25 each month, are summarized in Exhibit F, attached to this testimony.

26 Q. **What costs are included in the “Customer Notification Costs” category?**  
27

1 A. These are costs that will be incurred to notify each customer of the LNP End User  
2 charge that will be assessed on his monthly bill as well as any other line item on  
3 the bill that may increase as the result of LNP implementation.

4 Q. **What method did TELEC use to estimate the “Customer Notification Costs”**  
5 **category, for Exhibit 1 and for Exhibit 2?**

6  
7 A. TELEC determined, for both Exhibits, that this cost could be reasonably esti-  
8 mated using a mathematical function of the quantity of access lines served by the  
9 RLEC. The function that TELEC used to estimate this cost is:

$$10 \quad \quad \quad \$500 + [ \$0.37 \times (\text{Lines}) ] + [ \text{SQRT}(\text{Lines}) \times \$2.50 ]$$

11  
12 Q. **What costs are included in the “Switch Maintenance Costs per month” cate-**  
13 **gory?**

14  
15 A. These are additional fees that a switch manufacturer would charge for software  
16 maintenance and technical support, due to the addition of LNP capability in each  
17 switch.

18 Q. **What method did TELEC use to estimate the “Switch Maintenance Costs per**  
19 **month” category, for Exhibit 1 and for Exhibit 2?**

20  
21 A. For Exhibit 1, TELEC obtained from each company an estimate of the increase in  
22 its switch maintenance costs due to the addition of LNP capability in its switches.  
23 During our discussions with representatives of the three switch manufacturers that  
24 provide the RLECs’ switching equipment, we learned that none of them would  
25 increase the fees charged for software maintenance and technical support as a  
26 consequence of having LNP capability installed. For Exhibit 2, we set these costs  
27 to zero.

28 Q. **What costs are included in the “Other Monthly Costs” category?**  
29

1 A. These are labor costs associated with performing the work necessary to port indi-  
2 vidual telephone numbers on a routine basis.

3 Q. **What method did TELEC use to estimate the “Other Monthly Costs” cate-**  
4 **gory, for Exhibit 1 and for Exhibit 2?**

5  
6 A. For Exhibit 1, TELEC did not include any costs in this category. For Exhibit 2,  
7 we assumed that each RLEC would port a certain quantity of numbers each  
8 month, based on its count of access lines, as explained earlier for the “SOA  
9 Monthly Charge” category. We determined that, for each number porting service  
10 order, five man-hours at the RLEC’s Customer Service Representative wage rate  
11 is a reasonable estimate of these labor costs.

12 Q. **What costs are included in the “Non-recurring transport charges” and**  
13 **“Transport” categories?**

14  
15 A. These are the non-recurring and monthly recurring costs associated with establish-  
16 ing a T1 circuit to carry trunk groups to a point of interconnection (“POI”) in the  
17 RLEC’s LATA of each wireless carrier providing coverage in the RLEC’s service  
18 area. If a wireless carrier has not established a direct connection within an RLEC  
19 exchange in which it requests LNP, and if the FCC would require at some date in  
20 the future that the RLEC is responsible for the costs of such facilities, these facili-  
21 ties would need to be provisioned by the RLEC to ensure that calls to ported  
22 numbers can be properly delivered to the correct terminating switch.

23 Q. **What method did TELEC use to estimate the “Non-recurring transport**  
24 **charges” and “Transport” categories, for Exhibit 1 and for Exhibit 2?**

25  
26 A. For both Exhibits, TELEC estimated that one T1 circuit would be required be-  
27 tween each Host or Stand-Alone switch operated by an RLEC and the nearest POI  
28 of each wireless carrier with coverage in the RLEC’s service area. We assumed

1 that each wireless carrier's nearest POI is at the same location as the LATA tan-  
2 dem nearest to the RLEC's service area. In those few cases where a wireless car-  
3 rier already has a direct connection to an RLEC's switch, we assumed that the ex-  
4 isting connection could carry the traffic generated by local calls to numbers that  
5 have been ported from that RLEC switch to that wireless carrier, and that no new  
6 T1 circuit need be established. As I explained earlier, after Exhibit 1 was submit-  
7 ted with the RLECs' petitions, we verified circuit mileages, applicable tariffs and  
8 connectivity requirements in our estimates of transport costs for Exhibit 2.

9 Q. **Why are these costs included in the cost analysis?**

10  
11 A. Costs to transport local calls to ported numbers to a wireless carrier's POI have  
12 been included in our analyses to demonstrate the potential impact that transport  
13 costs would have on the RLECs' end-users if the RLEC must arrange for the  
14 transport to accommodate LNP.

#### 15 DERIVED MONTHLY COSTS

16  
17 Q. **How are the "Monthly Cost calculations per line" amounts calculated?**

18  
19 A. There are four lines of cost derived under the heading "Monthly Cost Calculations  
20 per line". The first line involves the calculation of the total nonrecurring cost per  
21 line per month excluding the cost of transport. The cost on this line is calculated  
22 by amortizing the amount on the line titled "Total Non-recurring Costs excluding  
23 transport" over a 60-month period at the current rate of return of 11.25% as pre-  
24 scribed pursuant to Part 65 of the FCC rules.

25 The second line involves the calculation of the total nonrecurring cost per line per  
26 month including the cost of transport. The cost on this line is calculated by amor-

1 tizing the amount on the line titled "Total Non-recurring Costs including trans-  
2 port" over a 60-month period at the current rate of return of 11.25% as prescribed  
3 pursuant to Part 65 of the FCC rules.

4 The third line involves the calculation of the total cost per line excluding trans-  
5 port. The cost on this line is calculated by adding the amount as shown on the  
6 "Total Nonrecurring cost per month excluding transport" line with the amount as  
7 shown on the "Total Recurring Monthly Cost excluding Transport" line.

8 The fourth line involves the calculation of the total cost per line including trans-  
9 port. The cost on this line is calculated by adding the amount as shown on the  
10 "Total Nonrecurring cost per month including transport" line with the amount as  
11 shown on the "Total Recurring Monthly Cost including Transport" line.

12 Q. **How is the LNP cost per line per month calculated?**

13 A. The total cost per month excluding transport is divided by the access lines to de-  
14 rive the LNP cost per line per month excluding transport amount. The total cost  
15 per month including transport is divided by the access lines to derive the LNP cost  
16 per line per month including transport amount.

17 Q. **Has the FCC created a mechanism for carriers to recover carrier-specific  
18 costs directly related to providing LNP from end-users?**

19  
20 A. Yes, it has.

21 Q. **Does this conclude your testimony?**

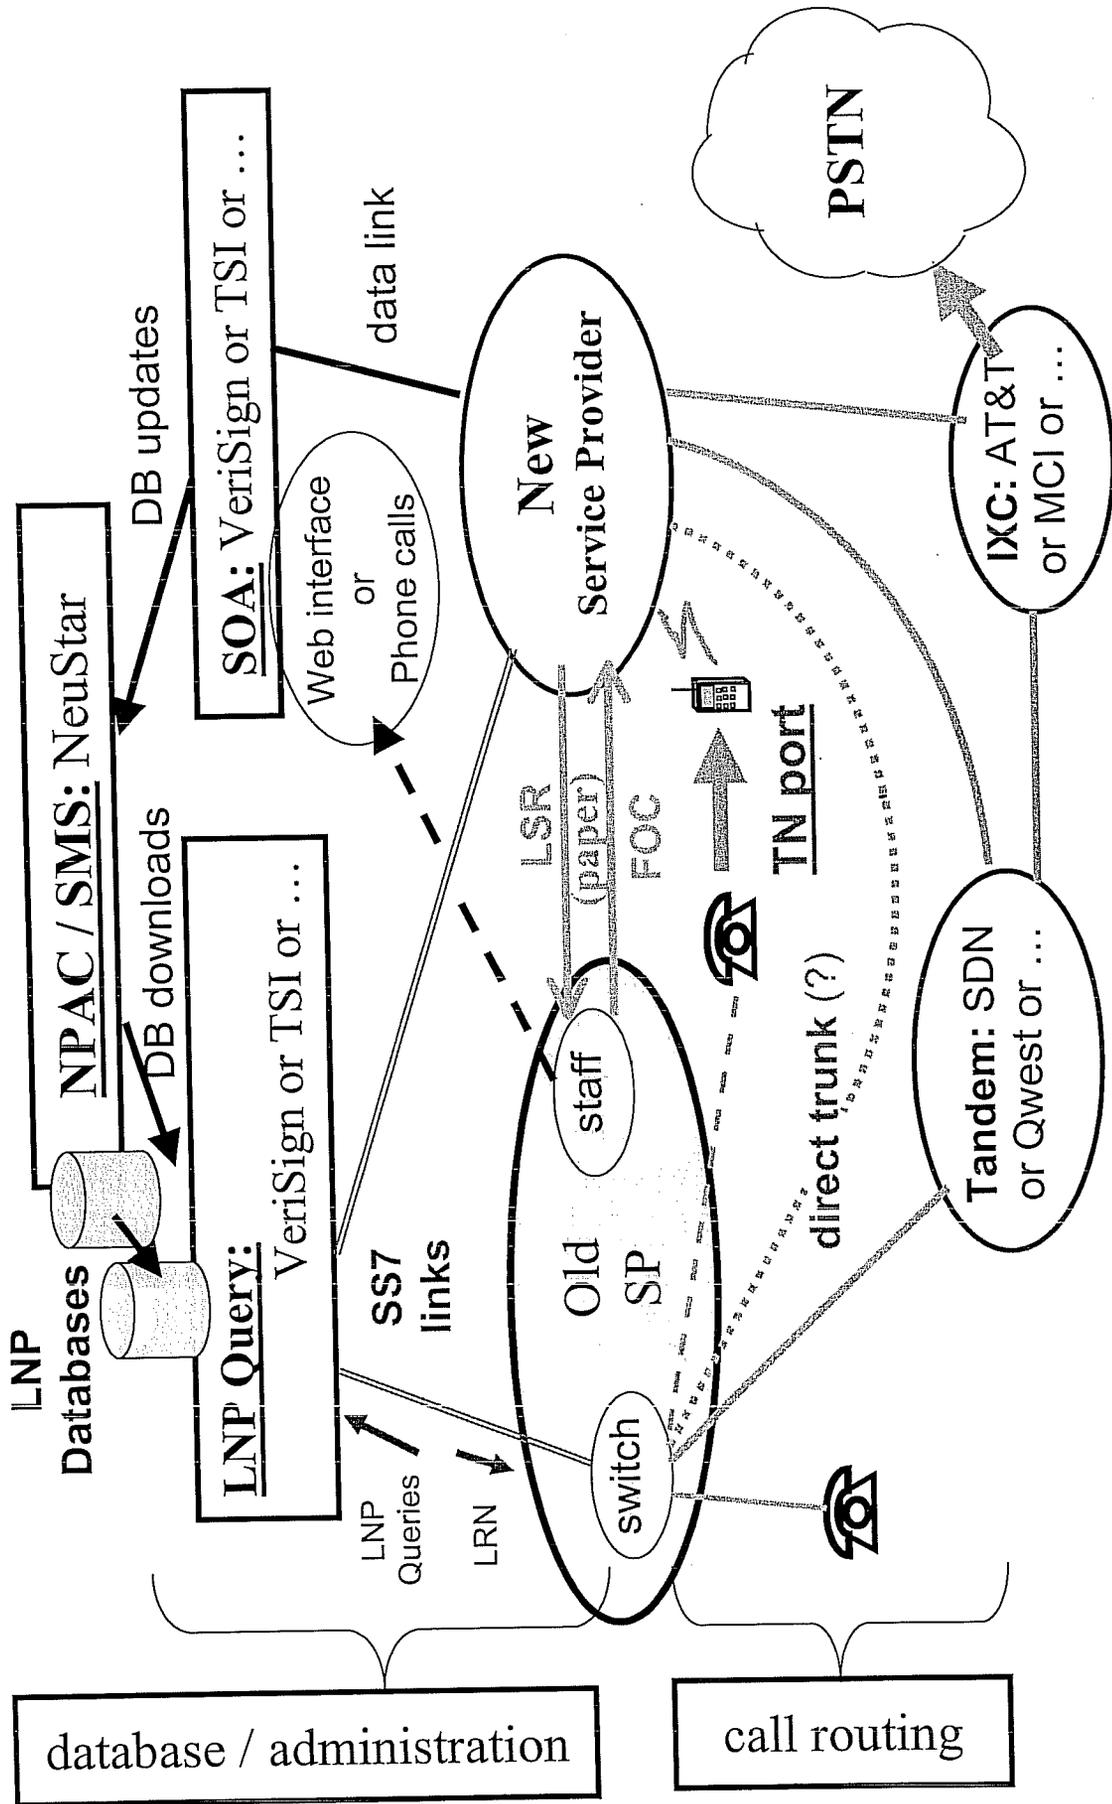

22 A. No, it does not. I will also offer company-specific testimony for each of the  
23 RLECs that will address issues specific to them.

## Exhibit A

# Instructions for LNP Cost Data Request

TELEC Consulting Resources, Inc.

February 10, 2004

This document accompanies an Excel workbook named LNPCostDataRequest.xls. Please rely on these instructions as you fill in the blanks in the Excel workbook. We will schedule a conference call in the near future to discuss any questions or concerns you may have about the workbook. If you have questions following the conference call, you may contact Tom Bullock (tbullock@tele-consulting.com) or Dan Davis (ddavis@teleconsulting.com).

We will use the data you provide, together with some assumptions of our own, to estimate your total cost for implementation of LNP capability and your total ongoing cost of providing LNP. We will also estimate the monthly LNP End User Charge each of your customers (excluding LifeLine customers) would pay over a five-year period, and the additional LNP-related costs - beyond those recoverable through the LNP End User Charge - that you would incur. **If you decide to have TELEEC proceed with a Petition to your state commission for relief from LNP requirements, a summary of this cost information will be filed as an Exhibit accompanying the Petition we will prepare on your behalf for filing with the state commission for suspension of your requirement to provide LNP, pursuant to Section 251(f)(2) of the Telecommunications Act.**

**We tentatively plan to file these Petitions with your state commission by Friday, February 27, 2004. Please provide us with your cost data as early as you possibly can, but no later than Friday, February 20.** Fill in the LNPCostDataRequest.xls workbook, according to the instructions on the following pages, and send it as an email attachment to Charley Ogden (cogden@teleconsulting.com).

Costs of implementing Local Number Portability (LNP) are of several different kinds. For example, your switches must be upgraded with LNP capability; you must develop procedures to handle a variety of new order forms and train staff on LNP processes; you must subscribe to the services of a certified LNP Service Order Administrator (SOA) and an LNP Query Service vendor; you must provide information to, and enter into agreements with, the carriers that request number porting from you; you must test the entire number porting process; you will most likely want to file an FCC tariff, either directly or through NECA, for an LNP End User Charge to recover eligible costs from your end user customers (collectable over a five-year period); you may be required to notify customers of LNP availability and of the End User Charge; and you may need to establish trunking between your switches and the other carriers' switches to handle local calls to ported numbers.

LNP implementation costs in a few of these categories can be estimated with no input from you. Others require basic information such as line counts, or the quantities of your Host, Remote and Stand-Alone switches and mileages from each to the nearest LATA tandem. Some will require that you consult with your engineers to determine switch upgrade costs. And some we will estimate, based on data from you concerning staff size and wage rates.

We emphasize that the cost information that will be filed as an Exhibit with the Petition for suspension forms much of the basis for your case before your state commission. Cost estimates should be neither minimized nor exaggerated, but should be reasonable and able to withstand critical scrutiny in a legal proceeding.

### **LNPCostDataRequest.xls** workbook

If you are providing data for more than one Operating Company, **please make a separate copy of the workbook for each Company.**

When you have completed your workbook(s), send it (or them) as an **email attachment** (or attachments) to **Charley Ogden (cogden@telec-consulting.com)**.

The LNPCostDataRequest workbook contains three sheets, named General, StaffInfo and Switch&Transport.

### **General sheet - General Company Information**

The **General** sheet asks for general company information and for other information that will allow us to estimate certain LNP implementation costs.

Enter your information in the column labeled "Primary Data." For some items, you may want or need to also enter information in the "Supplemental Data" column.

### General Company Information

- |   |   |  |
|---|---|--|
| 1 | Company name                                    | Enter the name of your Operating Company.  |
| 2 | Company OCN                                     | Enter your company's Operating Company Number.   |
| 3 | Contact name                                    | Enter the name, email address and telephone number of the individual we should contact if we have questions about your company's LNP cost information. You may enter data for a second contact person under Supplemental Data.                                 |
| 4 | Contact email address                           |  |
| 5 | Contact telephone number                        |  |
| 6 | Total Number of Access Lines (Dec. 31, 2003)    |  |
| 7 | Number of Lifeline Access Lines (Dec. 31, 2003) | Enter the number of your company's total access lines in service as of Dec. 31, 2003, if that number is available. If that number is not available, enter the number of access lines for a different date, and show that date in the Supplemental Data column. |
| 8 | Number of Lines charged for LNP                 | Number of Lifeline customers as of Dec. 31, 2003. Enter date information as in line 6.   |
| 9 | Number of Employees                             | Do not enter a number here. This is the number of access lines that will be assessed the monthly LNP End User Charge. (Lifeline customers are not charged for LNP.)  |
|   |   | Total number of people employed by your company today. An approximation within 10% is fine.  |

### Wireless Carriers

- |    |   |  |
|----|---|--|
| 10 | Wireless carriers requesting LNP                      | Enter, under Primary Data, the number of wireless carriers from whom you have received requests for LNP. Please name these carriers in the Supplemental Data column.   |
| 11 | <b>Other</b> wireless carriers operating in your area | Enter, under Primary Data, the quantity of <b>other</b> wireless carriers (those <b>not</b> included in line 10) providing service in the area served by your company. Please name them in the Supplemental Data column. |

12	Wireless carriers with direct trunking into your network	Enter, under Primary Data, the number of wireless carriers that have established direct trunking into at least one of your switches. Please name them in the Supplemental Data column.
----	--	--

**Customer Notification**

13	We estimate your cost to be:	This is our estimate of your cost to notify customers about LNP, based on your line counts. (See line 14.)
14	Is the amount shown a reasonable cost estimate? (YES or NO)	If the amount shown in line 13 is a reasonable estimate of your costs to notify customers about LNP, enter "YES." Otherwise, enter "NO" and we will contact you to discuss this item in more detail. You may add comments under Supplemental Data.

**StaffInfo sheet - Company Staff Information**

The **StaffInfo** sheet asks for information about your management, supervisory, technical and clerical staff. We will use this information to estimate costs of various activities your company will need to undertake to implement LNP capability.

These activities include:

- Order Processing - which includes:
  - receipt of Local Service Requests and generation of Firm Order Confirmations, to port individual telephone numbers;
  - submitting database updates to your Service Order Administrator (SOA);
  - switch updates to invoke a temporary "unconditional 10-digit trigger" for a ported number;
  - management of a database of numbers that have been ported out of your switches;
  - resolution of Order conflicts;
- Testing of all LNP processes, including Order Processing, call routing to a ported number, and rating of calls to and from a ported number;
- Investigation and resolution of network routing and rating problems;
- Adding the flat monthly LNP End User Charge to your customers' bills.

We ask you to identify the job classifications (and their fully loaded hourly wage rates) that are involved with *planning for* as well as *performing* these activities. Based on the number of your employees and the staff sizes involved with LNP-related activity, we will calculate estimates of your costs of undertaking these activities.

We have grouped the job titles into three groups - (1) Management & Supervisory, (2) Technical and (3) Clerical.

Although the job titles shown may not match your company's job titles, please do your best to map your job titles into those shown on this sheet. For example, if you have a single individual acting as an "Engineering and Operations Supervisor," enter data for either "Engineering Supervisor" or for "Operations Supervisor" and leave the other blank. If our list of job titles is really not adequate for your company, extra lines are available for you to add more job titles if necessary.

For each job title and wage rate, show the number of employees who have that title and rate.

### **Switch&Transport sheet - Switch and Transport Information**

The **Switch&Transport** sheet asks for information about your switching network and for V&H airline mileages from your Host and Stand-Alone switches to the nearest LATA tandem. These mileages will allow us to determine the cost of trunks you may need to install to handle local calls to numbers that have been ported to wireless carriers. (We are assuming that wireless carriers' Points of Interconnection are at the nearest LATA tandem.)

If you have Host-Remote complexes, for each complex list the Host switch first, then list all its Remotes on the lines immediately below the Host. Since Remote switches do not have trunks, there is no need for you to show mileages for your Remotes. But it is important for us to know how many Remotes "belong to" each Host.

Obtain from your switch vendor a price quote for upgrading each switch for LNP capability and for any installation fees your switch vendor charges for the upgrade. We will estimate additional internal costs, such as engineer and technician wages, associated with these upgrades. Also show the **increase in annual** switch maintenance expense you will incur as a result of the LNP feature in each switch.

Exhibit D

Company Size Coefficients and Estimated Minimum Hours Spent on LNP Procedure Activities

Company Size Coefficient	Estimated Minimum Hours Per Person in Job Title for Each Activity									
	General Manager	Customer Service Supervisor	Engineering Supervisor	Operations Supervisor	Office Manager	Switch Engineer	Switch Technician	Computer Programmer	Customer Service Rep.	Office Assistant

Activity

REBUTTAL TESTIMONY

OF TOM BULLOCK

ON BEHALF OF THE ABOVE-NAMED COMPANIES

June 15, 2004

1 Q. **Please State your Name, Employer, Business Address and Telephone Num-**  
2 **ber.**

3  
4 A. My name is Tom Bullock. I am employed with TELEC Consulting Resources,  
5 Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln, Nebraska  
6 68508. My telephone number is (402) 441-4315.

7 Q. **Did you file direct testimony in the petitions listed above in this proceeding?**

8  
9 A. Yes. I filed introductory testimony on behalf of all the companies listed above,  
10 and filed direct testimony on behalf of each, on May 14, 2004.

11 Q. **Have you read the direct testimony of Mr. Ron Williams on behalf of West-**  
12 **ern Wireless Corporation?**

13  
14 A. Yes, I have.

15  
16 Q. **What is the purpose of your rebuttal testimony?**

17  
18 A. The primary purpose of my rebuttal testimony is to respond to the testimony of  
19 Mr. Williams with respect to cost issues he discussed in his testimony.

20 Q. **Mr. Williams claims, on pages 16 and 17 of his testimony, that the Petitioners**  
21 **grossly overstate the implementation and operational costs of LNP. Has Mr.**  
22 **Williams provided evidence to support his claim?**

23  
24 No, he has not. Mr. Williams's claim is not backed by any supporting evidence or  
25 documentation. Review of Exhibit 5A attached to Mr. Williams' testimony re-  
26 veals that, for his cost estimates, he adjusted the RLECs' non-recurring costs in  
27 the "Other Internal Costs," "SOA Non-recurring set up charge" and "Non-  
28 recurring transport charges" categories, and that he eliminated the RLECs'  
29 monthly recurring costs in all categories. Mr. Williams's proposed changes to  
30 non-recurring and recurring costs appear to have been made without any basis in  
31 fact.

1 A comparison between the cost estimates provided as Exhibit 2 attached to my  
2 May 14, 2004, direct testimony and the estimates Mr. Williams has provided with  
3 his testimony on May 28, 2004, as Exhibit Williams Direct 5, is attached to this  
4 testimony, as Exhibit R-1-TB.

5 Q. **Mr. Williams claims on page 17, lines 8-12 of his testimony, that the costs in-**  
6 **cluded in the category "Other Internal Costs" are overstated. Do you agree**  
7 **with Mr. Williams?**

8  
9 A. No, I do not. Mr. Williams claims that the costs in this category are overstated  
10 because "the Petitioners have included costs to deal with 'porting contracts' and  
11 costs related to the development of 'Inter-carrier Porting Forms'." The RLECs  
12 have included costs for porting contracts because wireless carriers, including  
13 Western Wireless, have sent Local Number Portability Operations Agreements to  
14 the RLECs to govern the porting of telephone numbers between the wireline and  
15 wireless networks. It is, therefore, reasonable to anticipate that such costs will be  
16 incurred if the RLECs were to proceed to implement LNP. Copies of porting  
17 agreements sent to RLECs are attached to this rebuttal testimony, as Exhibit R-2-  
18 TB.

19 Mr. Williams also claims that the costs related to the development of "Inter-carrier  
20 Porting Forms" are also grossly overstated, since porting forms are available to  
21 any carrier for a nominal fee. However, the costs included in this subcategory are  
22 not the costs associated with merely obtaining a porting form and its supporting  
23 documentation. The costs included in this subcategory are associated with inter-  
24 acting with the wireless provider to reach and confirm a common understanding  
25 and interpretation of the form's contents and the processes related to it, and with

1 obtaining the data required to complete the form itself. Based upon the informa-  
2 tion necessary to complete the Trading Partner Profile and porting questionnaires,  
3 an average of ten man-hours per Trading Partner Profile is a reasonable estimation  
4 of time required for this process. Examples of Trading Partner Profile forms and  
5 porting questionnaires are attached to this rebuttal testimony, as Exhibit R-3-TB.

6 Q. **Mr. Williams states that some Petitioners have included non-recurring costs**  
7 **for an automated SOA interface (p. 17: 11-13). What amount of costs did the**  
8 **RLECs use on Exhibit 2 on the line entitled "SOA Non-recurring set up**  
9 **charge" that was attached to Direct Testimony?**

10  
11 A. It appears that Mr. Williams' review of the RLECs' cost analysis was based on  
12 Exhibit 1, which was attached to the RLECs' original Petitions. On Exhibit 2 that  
13 was attached to my direct testimony, most of the RLECs did not include any non-  
14 recurring costs on the line entitled "SOA Non-recurring set-up charge." The only  
15 exceptions are Sioux Valley and the merged operation of Golden West, Vivian  
16 and Kadoka. The estimated porting volumes for these companies led to a choice  
17 of "SOA Option B" for them as being more cost effective, as described on page  
18 19 of my introductory direct testimony and Exhibit F attached thereto.

19 Q. **Mr. Williams has eliminated all costs from the line entitled "Other Monthly**  
20 **Costs." Will you please identify what costs are represented on the line item**  
21 **on Exhibit 2 entitled "Other Monthly Costs"?**

22  
23 A. Yes. These are the internal labor costs associated with the RLEC's personnel  
24 processing a porting order through multiple internal and external processes and  
25 systems. The activity associated with these processes would include receiving the  
26 LSR forms and reviewing the LSR for accuracy against the RLEC's internal re-  
27 cords and verifying that the LSRs are filled out in compliance with the Ordering  
28 and Billing Forum standards. If the LSRs are determined to be accurate and there

1 are no conflicts that the RLEC needs to contact the wireless provider to resolve,  
2 the RLEC personnel can then send the new service provider a Firm Order Con-  
3 firmation. Once the FOC has been sent to the new service provider, the RLEC  
4 will contact the SOA service bureau. Internal work orders will be initiated, proc-  
5 essed and finalized in order to activate the unconditional ten-digit trigger on the  
6 correct date, to test and verify that calls are being properly routed to the ported  
7 number, to disconnect the end-user and ported number from the switch, to verify  
8 that the number cannot be reassigned on the switch and in the customer service  
9 records, and to update billing records.

10 Based upon the multiple manual processes involved, the RLECs estimated that for  
11 each ported number these labor costs would equal five man-hours at the average  
12 loaded wage rate of the company's Customer Service Representative(s).

13 There is one of the Exhibit 2 cost estimates – for Tri-County Telecom – that con-  
14 tains an error in the “Other Monthly Costs” category. This cost was based on 5  
15 ports per month, when it should have been based on 1 port per month, to be con-  
16 sistent with Exhibit F attached to my introductory direct testimony. Exhibit R-1-  
17 TB to this testimony contains a new cost estimate for Tri-County that corrects this  
18 error.

19 **Q. Will you please explain the RLECs' rationale for using DS1 direct connec-**  
20 **tions in the cost estimates for transport?**

21  
22 **A.** Yes, I will. Currently, RLECs do not route local traffic outside of their exchange  
23 boundaries. With intermodal LNP, a call to a number that has been ported to a  
24 wireless carrier will terminate, in most cases, at a point of interconnection or  
25 switch located outside of an RLEC exchange. Today, the RLECs route non-local

1 calls to points outside their exchange boundaries either via EAS trunks or Feature  
2 Group D toll trunks. None of the RLECs have EAS agreements with any wireless  
3 carriers. If an RLEC were to route a call to such a ported number over a Feature  
4 Group D trunk, the customer might receive a recording instructing the customer to  
5 redial the number using one plus the area code. To route the call as a local call  
6 would require the use of direct connections to each wireless provider.

7 Moreover, the agreements now in place between several of the RLECs and West-  
8 ern Wireless that govern reciprocal interconnection, transport and termination  
9 specify that the routing of local traffic from the RLECs to Western Wireless will  
10 be through direct trunk connections.

11 Q. **Mr. Williams states on page 7, lines 24-26 of his testimony, "From the exhib-**  
12 **its provided with the Petitions, it is apparent that most ILEC networks re-**  
13 **quire only switch software upgrades and table translations to make them**  
14 **LNP capable." Is it true that the RLECs require only software upgrades and**  
15 **table translations to make them LNP capable?**

16  
17 A. Some of the RLECs' switches will require hardware upgrades, as well as software  
18 upgrades and table translations, to make them LNP capable. In particular, Faith  
19 Municipal Telephone Company and the "ABU Group" of Golden West companies  
20 - i.e. Amour, Bridgewater Canistota and Union - would all require that new main  
21 controller hardware modules be installed prior to loading LNP software into their  
22 Mitel switches. Mitel's standard product quotation form states product lead times  
23 are 90 business days from receipt of order. Ninety business days are approxi-  
24 mately eighteen weeks, or approximately 4 months. But this delay is not the only  
25 factor involved in determining the amount of time that an RLEC would require to

1 implement LNP. I have attached to this testimony, as Exhibit R-4-TB, LNP im-  
2 plementation timelines for each of the RLECs.

3 **Q. Do you have any other comments on Mr. Williams' cost exhibit attached to**  
4 **his testimony?**

5  
6 A. Yes. Although Mr. Williams provided no information concerning the develop-  
7 ment of his cost exhibit in his testimony, in response to Interrogatories 13.a. and  
8 14, Mr. Williams stated that the SOA recurring cost using a manual SOA inter-  
9 face is \$15 per port, and he provided an Exhibit B indicating at least some porting  
10 activity for all RLECs except Faith Municipal Telephone Company. Further, Mr.  
11 Williams provided a formula to calculate transport charges assuming Petitioners  
12 are required to route traffic to ported calls to the Qwest tandem. (Western Wire-  
13 less' answers to interrogatories are attached to the rebuttal testimony of Steven E.  
14 Watkins.) There appears to be a contradiction between Mr. Williams' testimony  
15 wherein he presents non-zero costs for both SOA services and transport, and the  
16 Exhibit 5 attached to that testimony, in which he does not include any costs in  
17 these categories for the RLECs. In either case, even under Mr. Williams' own  
18 methodology, Western Wireless' calculation of the per-line cost of LNP for the  
19 RLECs is too low.

20 **Q. Do you agree with Mr. Williams that \$15 per port properly reflects the re-**  
21 **curring SOA monthly charge?**

22  
23 A. No. As stated on page 19 of my introductory direct testimony, TELEC assumed  
24 that those RLECs using SOA Option A, which has a charge of \$15 per porting  
25 transaction, would require three such transactions to complete each number port,  
26 meaning that each number port would cost the RLEC \$45 in SOA charges.

1 Q. Do you agree with Mr. Williams that it is correct to assume the RLECs  
2 would route local traffic to ported numbers to the Qwest tandem?  
3

4 A. No. As I stated earlier, the interconnection agreements now in effect between the  
5 RLECs and Western Wireless contain no provisions for the delivery of local traf-  
6 fic from the RLECs to Western Wireless through any means other than a direct  
7 connection. TELECOM has included the non-recurring and monthly recurring costs  
8 of circuits required to support such direct trunk connections as separate “trans-  
9 port” cost categories in its cost estimates for the RLECs.

10 Q. Do you have any other comments?

11 A. Yes. I note that in its answer to Interrogatory 13.f., Western Wireless projects  
12 that it will have zero ports from Faith Municipal Telephone Company for the first  
13 five years after Faith implements LNP. (See Western Wireless Response to Inter-  
14 rogatory 13.f. attached to Rebuttal Testimony of Steven E. Watkins.) Therefore,  
15 it is hard to understand how Western Wireless can conclude that LNP, which it  
16 calculates will impose a monthly cost on Faith’s subscribers in the amount of  
17 \$3.95 per line, is in the public interest.

18 Q. Does this conclude your testimony?

19  
20 A. Yes, it does.  
21

CERTIFICATE OF SERVICE

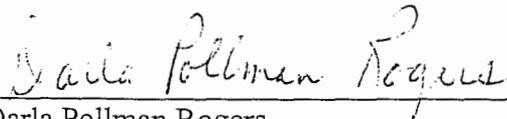

The undersigned hereby certifies that she served a copy of the foregoing **REBUTTAL TESTIMONY** upon the persons herein next designated, on the date below shown, by depositing a copy thereof in the United States mail at Pierre, South Dakota, postage prepaid, in an envelope addressed to each said addressee, to-wit:

Richard D. Coit  
Director of Industry Affairs  
South Dakota Telecommunications Association  
P. O. Box 57  
Pierre, South Dakota 57501

Talbot J. Wiczorek  
Gunderson, Palmer, Goodsell & Nelson, LLP  
P. O. Box 8045

Exhibit R-2-TB

## AGREEMENT

### WIRELESS-WIRELINE NUMBER PORTABILITY

by and between

Verizon Wireless

and

Beresford Municipal Telephone Company

THIS WIRELESS-WIRELINE NUMBER PORTABILITY SERVICE AGREEMENT ("Agreement") by and between Cellco Partnership d/b/a Verizon Wireless (a Delaware general partnership) and the Verizon Wireless Entities (collectively "Verizon Wireless"), each having an office and principal place of business at 180 Washington Valley Road, Bedminster, New Jersey 07921, and **Beresford Municipal Telephone Company**, on behalf of itself and its Affiliates (collectively "Carrier"), with offices located at 101 North 3 Rd Street, Beresford, SD 57004-1796. Verizon Wireless and Carrier may be collectively referred to as the "Parties" and individually as a "Party."

WHEREAS, the above named Parties wish to enter into an Agreement with each other and to be in compliance with the applicable rules and regulations of the Federal Communications Commission ("FCC Rules and Regulations").

WHEREAS, the Parties wish to enter into an Agreement to facilitate the ability of Customers to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement through Local Number Portability.

WHEREAS, the Parties wish to enter into an Agreement to establish practices and procedures to ensure that Customer requests to port numbers are achieved efficiently, with minimal delays, except as required to validate a port request.

THEREFORE, the Parties wish to enter into this Agreement on the following terms and conditions:

#### 1. TERM

This Agreement shall become effective in accordance with Section 34 ("Effective Date") and, except as otherwise provided in this Agreement, shall continue in full force and effect until either Party terminates the Agreement by providing notice of termination in writing to the other Party at least thirty (30) days in advance of such termination pursuant to the Notice provisions set forth in Section 18 of this Agreement. Upon termination, the Parties shall continue to provide Local Number Portability as may be required by Applicable Law.

#### 2. CIRCUMSTANCES OF DEFAULT

A Party shall be in default under this Agreement if such Party:

- 2.1 Becomes insolvent, liquidates, is adjudicated as bankrupt, makes an assignment for the benefit of creditors, invokes any provision of law for the relief of debtors, or initiates any proceeding seeking protection from its creditors; and/or

- 2.2 Violates any applicable laws, statutes, or other legal requirements with respect to this Agreement; and/or
- 2.3 Fails to perform any material term, condition, or covenant of this Agreement and such Party fails to cure such nonperformance within thirty (30) calendar days of receipt of written notice of such default from the non-defaulting Party ("Cure Period"). Upon expiration of said Cure Period, the non-defaulting Party shall have the right to seek applicable remedies under this Agreement. When a default cannot be reasonably cured within the Cure Period, the time for cure may be extended by agreement of the Parties for such period of time as may be reasonably necessary to complete such cure, provided the defaulting Party shall have proceeded promptly to cure such default and shall continue to prosecute such curing with due diligence.
- 2.4 Notices hereunder shall be given to the Notice address set forth in Section 18.

### 3. REMEDIES AND TERMINATION

- 3.1 In the event of default under this Agreement (and with respect to a default under Section 2.3, the Cure Period stated therein), the non-defaulting Party shall have the right, at its option, to suspend performance under this Agreement or to terminate this Agreement without further liability upon providing written notice of such termination to the defaulting party pursuant to the Notice provisions set forth in Section 18.
- 3.2 This Agreement may be affected by changes, modifications, orders, and rulings of regulatory bodies, including the FCC, to the extent competent jurisdiction otherwise exists. Each Party shall promptly notify the other Party in writing of any governmental action that limits, suspends, cancels, withdraws, or otherwise materially affects the notifying Party's ability to perform its obligations under this Agreement. In the event a material modification is made to the obligations of a Party set forth in this Agreement, which materially affects the obligations of a Party hereunder, then either Party may terminate this Agreement pursuant to Section 1 of this Agreement. If neither Party exercises such a right of termination, and any legislative, regulatory, judicial or other governmental decision, order, determination or action, or any change in applicable law, materially affects any material provision of this Agreement, the rights or obligations of a Party hereunder, or the ability of a Party to perform any material provision of this Agreement, the Parties shall promptly renegotiate in good faith and amend in writing this Agreement in order to make such mutually acceptable revisions to this Agreement as may be required in order to conform the Agreement to Applicable Law.
- 3.3 The rights set forth in Sections 2 and 3 of this Agreement are in addition to, and not in limitation of, any other right or remedy that a non-defaulting party may have at law or in equity.
- 3.4 Notices hereunder shall conform to the Notice provisions set forth in Section 18.

### 4. DEFINITIONS

Unless the context clearly indicates otherwise, when a term listed in these Definitions is used in the Agreement, the term shall have the meaning stated in these Definitions. A defined term intended to convey the meaning stated in these Definitions is capitalized

when used. Other terms that are capitalized, and not defined in these Definitions or elsewhere in the Agreement, shall have the meaning stated in the Act.

- 4.1 Act: The Communications Act of 1934 (47 U.S.C. 151 et. seq.), as amended.
- 4.2 Affiliate: Shall have the meaning set forth in the Act.
- 4.3 Agreement: This Agreement including all appendices attached hereto, orders by a Party that have been accepted by the other Party, future amendments, modifications and supplements made in accordance herewith.
- 4.4 Applicable Law: All effective laws, government regulations and government orders, applicable to each Party's performance of its obligations under this Agreement.
- 4.5 Assigned Telephone Number: A telephone number that is assigned to a Customer that can originate and terminate telephone calls through the Public Switched Telephone Network. An Assigned Telephone Number may be a suspended telephone number unless that telephone number was suspended for fraud but, for avoidance of doubt, will not include a telephone number that has been disconnected.
- 4.6 Commercial Mobile Radio Service ("CMRS"): Shall be as defined by the FCC.
- 4.7 Customer Proprietary Network Information ("CPNI"): Shall have the meaning set forth in Section 222 of the Act, 47 U.S.C. Section 222.
- 4.8 Customer: An end user and subscriber to the services provided by either of the Parties.
- 4.9 Customer Information: CPNI of a Customer and any other non-public, individually identifiable information about a Customer or, if applicable, the purchase by a Customer of the services or products of a Party.
- 4.10 Customer Service Records ("CSR"): The records that contain the identity, service address, rate plan or plans, and other information on the Customer.
- 4.11 Electronic Data Interface ("EDI"): A data interface for exchange of information between providers.
- 4.12 End Office: A switching entity used in performing, originating and terminating functions for calls to or from Customers. As used in this Agreement, the term End Office shall be used in reference to End Office Switches used by Carrier and other wireline carriers.
- 4.13 Intercarrier Communications Process ("ICP"): The communication process between the OSP and the NSP, which validates the Customer information and initiates and completes the port request. The ICP includes the exchange of the LSR/LR.
- 4.14 Local Number Portability ("LNP"): Shall have the meaning set forth in the Act.
- 4.15 Local Service Request ("LSR"): Forms containing information about a Customer who desires to port a telephone number to the NSP. A sample LSR and

descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG").

- 4.16 Location Routing Number ("LRN"): Ten-digit number assigned to a switch or point of interconnection used for routing calls.
- 4.17 Metropolitan Statistical Areas ("MSA"): An MSA denotes a large urban population market as designated by the U.S. government.
- 4.18 Mobile Switching Center ("MSC"): A CMRS carrier's switching entity used to perform originating, transit and terminating functions for calls to and from end users, also referred to as Mobile Telecommunications Switching Office or "MTSO."
- 4.19 New Service Provider ("NSP"): The new provider that will provide service to the Customer and to whom the Customer ports its Assigned Telephone Number.
- 4.20 Number Portability Administration Center ("NPAC"): A neutral third party center that processes porting information from and disseminates that information to telecommunication carriers. The NPAC processes the NSP subscriber port request and downloads the LRN associated with the subscriber ported telephone number to local number portability databases.
- 4.21 Old Service Provider ("OSP"): The provider providing service to the Customer at the time the Customer requests porting of the Assigned Telephone Number.
- 4.22 Verizon Wireless Entities: Any FCC-licensed entity doing business as Verizon Wireless and/or directly or indirectly controlled by Cellco Partnership.

## 5. INFORMATION

The Parties acknowledge that Customer Information may be exchanged between the Parties and may be subject to legal restrictions on its use or disclosure, including without limitation laws relating to CPNI. The Parties may only obtain and use such restricted Customer Information in accordance with applicable laws and the restrictions contained in this Agreement. Prior to initiating a port request with the OSP, the NSP shall obtain consent from the Customer that permits the OSP to release to and/or to confirm with the NSP the information about the Customer that was sought by the NSP in the port request process. The NSP shall indemnify, defend, and hold harmless the OSP from and against any liabilities, claims, or demands, including costs, and expenses (including reasonable attorneys' fees) arising from or relating to any failure on the part of the NSP to obtain from the Customer consent for the OSP to release/confirm information about the Customer that was or is sought by the NSP in the port request process.

## 6. NUMBER PORTABILITY

### 6.1 Scope

The Parties shall provide LNP on a reciprocal basis pursuant to this Agreement in accordance with FCC Rules and Regulations as may be prescribed from time to time. "Delay" or "denial" of ports between Parties shall only occur in the event a Party is unable to complete the validation of those validation elements expressly set forth in Appendix A.

### 6.2 Procedures for Providing LNP

The Parties will follow the porting intervals applicable to wireline-wireline porting more specifically described in the North American Numbering Council's Local Number Portability Administration Selection Working Group, dated April 25, 1997, Appendix E, Section 7.1, Figure 1 until such time as the FCC adopts an LNP provisioning process flow and porting intervals for Inter-Service Provider LNP applicable between wireline and wireless carriers, at which time the Parties will follow LNP provisioning process flow and porting intervals established by the FCC. In addition, the Parties agree to follow the LNP ordering procedures established at the OBF for porting of Assigned Telephone Numbers.

- 6.2.1 For purposes of this Section 6, "Party A" refers to a Party whose Customer elects to become a Customer of the other Party ("Party B") and to utilize the original telephone number(s) corresponding to the service(s) it previously received from Party A, in conjunction with the service(s) it will now receive from Party B. Upon Party B receiving authorization from the Customer in accordance with Applicable Law and sending an LNP order to Party A, Parties A and B will work together to port the Customer's telephone number(s) from Party A's network to Party B's network.
- 6.2.2 When a telephone number is ported out of the Carrier network, Carrier will remove all line-based features and calling card(s) associated with the ported number(s) from its Line Information Database ("LIDB"). Reactivation of the line-based calling card in another LIDB, if applicable, is the responsibility of Verizon Wireless or the Customer.
- 6.2.3 When a Customer's number is ported between the Parties, Carrier will follow the 911 Guidelines recommended by the National Emergency Number Association ("NENA") with regard to emergency services databases.
- 6.2.4 When Party A ports telephone numbers of its Customer to Party B and the Customer has previously secured a reservation of line numbers from Party A for possible activation at a future point, these reserved but inactive numbers may be ported along with the active numbers to be ported provided the numbers have been reserved for the Customer. Party B may request that Party A port all reserved numbers assigned to the Customer or that Party A port only those numbers listed by Party B. As long as Party B maintains reserved but inactive numbers ported for the Customer, Party A shall not reassign those numbers. Party B shall not reassign the reserved numbers to another Customer.
- 6.2.5 NXX codes shall be portable in accordance with FCC Rules and Regulations except those permitted to be designated non-portable by the same FCC Rules and Regulations. The Parties, moreover, shall ensure that all switches, whether currently owned or hereafter acquired, are upgraded to facilitate LNP to the extent required by FCC Rules and Regulations.
- 6.2.6 Numbers can be ported to and from carriers whose licensed areas overlap and where the receiving carrier has the ability to provide service, as applicable. Porting numbers under these circumstances does not require modification and/or changes to current transport agreements.

### 6.3 LNP Ordering Procedures

6.3.1 Numbers to be ported from Carrier to Verizon Wireless

6.3.1.1 Orders for LNP shall be submitted by VZW to Carrier using an LSR either via web GUI, FAX or EDI. Verizon Wireless shall submit LSRs to port numbers only on behalf of itself and entities for which it has authority to act.

6.3.1.2 Instructions for submitting an LSR to Carrier are available via [TBD – identify where instructions are found].

6.3.2 Numbers to be ported from Verizon Wireless to Carrier

6.3.2.1 Orders for LNP shall be submitted by Carrier to Verizon Wireless utilizing validation information as required by Verizon Wireless and as applied to all other wireline carriers.

6.3.2.2 Instructions for submitting a validation request to Verizon Wireless will be provided via the Verizon Wireless process agreed to by the Parties.

6.4 Procedures for Providing LNP Through Full NXX Code Migration

When a Party has activated an entire NXX code for a single Customer and such Customer chooses to receive service from the other Party, the Parties shall follow the procedures set forth in the Industry Number Committee ("INC") Guideline 95-0407-0008 Central Office Code (NXX) Assignment Guidelines Section 7.

6.5 Procedures for Providing LNP Using Type 1 Numbers

Upon request of Verizon Wireless, the Parties will work together to migrate telephone numbers assigned to Type 1 trunks to the Verizon Wireless switch.

6.6 Procedures for Requesting LNP Capability

Either Party may submit a written request that the other Party upgrade any of its End Offices/MSCs to become LNP capable.

6.6.1 If either Party desires to have LNP capability deployed in an End Office/MSOC of the other Party that is not currently capable, the requesting Party shall issue an LNP request to the other Party. The Party receiving such request will respond to the requesting Party within ten (10) calendar days of receipt of the request with a date for which LNP will be available in the requested End Office/MSOC. The Party receiving the request shall proceed to provide for LNP in compliance with the procedures and timelines set forth in FCC Rules and Regulations.

6.6.2 The Parties will each be responsible for updating the LERG to reflect the LNP capabilities of their respective End Offices/MSOCs.

6.7 The Parties acknowledge and agree that telecommunications system interruptions or service outages may occur which may delay the processing of port requests. The Parties shall use best reasonable efforts to avoid such interruptions or outages and with respect to scheduled outages or maintenance

activities shall work with each other to schedule them so as to minimize disruptions to subscribers. Scheduled interruptions/maintenance should adhere to standard industry agreed upon maintenance windows for the NPAC.

## 7. TROUBLE, MAINTENANCE AND REPAIR

- 7.1 Both Parties agree to work expeditiously to resolve any issues associated with porting a Customer between the two Parties. Before either Party reports a trouble condition, that Party must first use commercially reasonable efforts to isolate the trouble to the other Party's actions or facilities. In order to facilitate trouble reporting and resolution, the Parties shall provide the trouble reporting contact information, per Section 22 of this Agreement. It is the responsibility of each Party to maintain the accuracy of its contact information and to notify the other Party of changes and modifications.
- 7.2 As part of the commitments set forth in Section 7.1 of this Agreement, each Party shall monitor and perform effective maintenance through testing and the performance of proactive maintenance activities such as routine testing, development of and adherence to appropriate network trouble isolation processes and periodic review of operational elements for translations, routing and network faults.

## 8. DIRECTORY LISTINGS

This Agreement does not govern or authorize the inclusion of listings in directories that may be published by a Party. Verizon Wireless shall not indicate on an LSR to be submitted to Carrier that it seeks for a ported number to be listed in a Carrier directory. Any listings shall be subject to separate agreement.

## 9. FRAUD

The Parties agree to cooperate in good faith with each other to investigate, minimize, and take corrective action in cases of fraud related to number portability. Each Party assumes responsibility for all fraud related to number portability associated with its Customers and accounts. Neither Party shall bear responsibility for, and shall have no obligation to investigate or make adjustments to, the accounts of the other Party in cases of fraud by the other Party's Customers or other third parties.

## 10. COSTS

The Parties to this Agreement will be responsible for their own costs incurred in implementing this Agreement.

## 11. USE OF TRADEMARKS

The Parties agree that they will not use the name, service marks or trademarks of the other Party or any of its affiliated companies in any manner whatsoever without such Party's specific written consent, which consent the other Party may grant or withhold in its sole discretion. Neither Party is licensed hereunder to conduct business under any logo, trademark, service or trade name (or any derivative thereof) of the other Party. Neither Party shall issue any press release or other publicity concerning this Agreement without the prior written consent of the other Party, which consent the other Party may grant or withhold in its sole discretion. Neither Party may imply any direct or indirect affiliation with or sponsorship or endorsement of it or its services or products by the other Party. Any violation of this Section 11 shall be considered a material breach of this Agreement.

**12. COMPLIANCE WITH LAWS**

The Parties shall comply with all federal, state and local laws applicable to their performance hereunder. Neither Party shall be liable for any delay or failure in performance by it that results from requirements of Applicable Law, or acts or failures to act of any governmental entity or official.

**13. FORCE MAJEURE**

Neither Party shall be responsible for any delay or failure in performance of any part of this Agreement to the extent that such delay or failure results from causes beyond its reasonable control ("Conditions"), whether or not foreseeable by such Party. Such Conditions include, but are not limited to, acts of God, wars, revolution, civil commotion, acts of public enemy, embargo, acts of government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing or boycotts. If any such Condition occurs, the Party delayed or unable to perform ("Delayed Party"), upon giving prompt notice to the other Party, shall be excused from such performance on a day-to-day basis during the continuance of such Condition (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis during the same period); provided, however, that the Party so affected shall use commercially reasonable efforts to avoid or remove such Condition and both Parties shall proceed immediately with the performance of their obligations under this Agreement whenever such causes are removed or cease. Nothing in this Agreement shall require the non-performing Party to settle any labor dispute except as the non-performing Party, in its sole discretion, determines appropriate.

**14. ASSIGNMENT**

This Agreement or any right or interest under this Agreement may not be assigned or transferred nor may any obligation under this Agreement be delegated without the prior written consent of the other Party, which consent may not be unreasonably withheld. Any attempted assignment or delegation in violation of this Section 14 shall be void and ineffective and constitute default of this Agreement.

**15. BINDING EFFECT**

This Agreement shall inure to the benefit of, and shall be binding upon the Parties hereto and their respective successors and permitted assigns.

**16. INDEMNIFICATION**

16.1 Each Party ("Indemnifying Party") shall indemnify, defend, and hold harmless the other Party ("Indemnified Party"), the Indemnified Party's Affiliates, (for purposes of this Section 16, Affiliates shall include Verizon Wireless Entities) and the directors, officers and employees of the Indemnified Party and the Indemnified Party's Affiliates, from and against any and all liabilities, claims, demands, suits, actions, settlements, judgments, fines, penalties, injuries, damages, or losses including costs (including court costs) and expenses (including reasonable attorneys' fees) ("Claims") that arise out of bodily injury to or death of any person, or damage to, or destruction or loss of, tangible real and/or personal property of any person to the extent such injury, death, damage, destruction or loss, was proximately caused by the grossly negligent or intentionally wrongful acts or omissions of the Indemnifying Party, the Indemnifying Party's Affiliates, or the directors, officers, employees, agents, or contractors (excluding the Indemnified Party) of the Indemnifying Party or the Indemnifying Party's Affiliates, in relation

to a port request under this Agreement, including a Claim where there is (a) a claim, demand, suit or action by a person who is not a Party, (b) a settlement with, judgment by, or liability to, a person who is not a Party, or (c) a fine or penalty imposed by a person who is not a Party (collectively referred to as a "Third Party Claim").

16.2 A Party seeking to be indemnified hereunder shall follow, and the Indemnifying Party's obligations under Section 16.1 shall be conditioned on following, the Indemnification Process set forth in this Section 16.2.

16.2.1 The Indemnified Party: (a) shall provide the Indemnifying Party with prompt, written notice of any Claim after becoming aware thereof (including a statement of facts known to the Indemnified Party related to the Claim and an estimate of the amount thereof); (b) prior to taking any material action with respect to a Third Party Claim, shall consult with the Indemnifying Party as to the procedure to be followed in defending, settling, or compromising the Claim; (c) shall not consent to any settlement or compromise of a Third Party Claim without the written consent of the Indemnifying Party; (d) shall permit the Indemnifying Party to assume the defense of a Third Party Claim (including, except as provided below, the compromise or settlement thereof) at the Indemnifying Party's own cost and expense, provided, however, that the Indemnified Party shall have the right to approve the Indemnifying Party's choice of legal counsel.

16.2.2 If the Indemnified Party fails to comply with Section 16.2.1 with respect to a Claim, to the extent such failure shall have a material adverse effect upon the Indemnifying Party, the Indemnifying Party shall be relieved of its obligation to indemnify, defend and hold harmless the Indemnified Party with respect to such Claim under this Agreement.

16.2.3 Subject to 16.2.4 and 16.2.5, below, the Indemnifying Party shall have the authority to defend and settle any Third Party Claim.

16.2.4 With respect to any Third Party Claim, the Indemnified Party shall be entitled to participate with the Indemnifying Party in the defense of the Claim if the Claim requests equitable relief or other relief that could affect the rights of the Indemnified Party. In so participating, the Indemnified Party shall be entitled to employ separate counsel for the defense at the Indemnified Party's expense. The Indemnified Party shall also be entitled to participate, at its own expense, in the defense of any Claim, as to any portion of the Claim as to which it is not entitled to be indemnified, defended and held harmless by the Indemnifying Party.

16.2.5 In no event shall the Indemnifying Party settle a Third Party Claim or consent to any judgment with regard to a Third Party Claim without the prior written consent of the Indemnified Party, which shall not be unreasonably withheld, conditioned or delayed. In the event the settlement or judgment requires a contribution from or affects the rights of an Indemnified Party, the Indemnified Party shall have the right to refuse such settlement or judgment with respect to itself and, at its own cost and expense, take over the defense against the Third Party Claim, provided that in such event the Indemnifying Party shall not be responsible for, nor shall it be obligated to indemnify or hold harmless the Indemnified Party against, the Third Party Claim for any amount in excess of such refused settlement or judgment.

16.2.6 The Indemnified Party shall, in all cases, assert any and all provisions in applicable Tariffs and Customer contracts that limit liability to third persons as a bar to, or limitation on, any recovery by a third-person claimant.

16.2.7 The Indemnifying Party and the Indemnified Party shall offer each other all reasonable cooperation and assistance in the defense of any Third Party Claim.

16.3 Each Party agrees that it will not impede or bring any action against the other Party, the other Party's Affiliates, or any of the directors, officers or employees of the other Party or the other Party's Affiliates, based on any claim by any person for personal injury or death that occurs in the course or scope of employment of such person by the other Party or the other Party's Affiliate and that arises out of performance of this Agreement.

16.4 Each Party's obligations under this Section 16 shall survive expiration, cancellation or termination of this Agreement.

## 17. RELATIONSHIP OF THE PARTIES

17.1 Neither Party undertakes by this Agreement or otherwise to perform or discharge any liability or obligation of the other Party, whether regulatory or contractual, or to assume any responsibility whatsoever for the conduct of the business or operations of the other Party. The relationship of the Parties under this Agreement shall be that of independent contractors and is a non-exclusive relationship. Nothing contained in this Agreement is intended to give rise to an employment relationship, partnership or joint venture between the Parties or to impose upon the Parties any of the duties or responsibilities of employers, partners or joint venturers.

17.2 Except for provisions herein expressly authorizing a Party to act for another Party, nothing in this Agreement shall constitute a Party as a legal representative or agent of the other Party, nor shall a Party have the right or authority to assume, create or incur any liability or any obligation of any kind, express or implied, against, in the name or on behalf of the other Party unless otherwise expressly permitted by such other Party in writing, which permission may be granted or withheld by the other Party in its sole discretion.

17.3 Each Party shall have sole authority and responsibility to hire, fire, compensate, supervise, and otherwise control its employees, agents and contractors. Each Party shall be solely responsible for payment of any Social Security or other taxes that it is required by Applicable Law to pay in conjunction with its employees, agents and contractors, and for withholding and remitting to the applicable taxing authorities any taxes that it is required by Applicable Law to collect from its employees.

17.4 A Party may use a contractor of the Party (including, but not limited to, an Affiliate of the Party) to perform the Party's obligations under this Agreement, provided that a Party's use of a contractor shall not release the Party from any duty or liability to fulfill the Party's obligations under this Agreement.

## 18. NOTICES

Unless otherwise specified in this Agreement, all notices required under this Agreement shall be given in writing. All notices shall be given by personal delivery, express delivery service with next Business Day delivery, confirmed facsimile (with copy delivered by personal delivery, express delivery service with next Business Day delivery or certified mail, return receipt requested) or certified mail, return receipt requested to the person(s) specified below or to such other addresses as a Party may designate by written notice to the other Party. If sent by the United States Postal Service mail, such notices shall be deemed received on the earlier of actual receipt or five (5) business days following deposit. For the other forms of notice, notice will be deemed given as of (a) where there is personal delivery of the notice, the date of actual receipt, (b) where the notice is sent via express delivery service for next Business Day delivery, the next Business Day after the notice is sent, and (c) where the notice is sent via facsimile telecopy, if the notice is sent on a Business Day and before 5 PM in the time zone where it is received, on the date set forth on the telecopy confirmation, or if the notice is sent on a non-Business Day or if the notice is sent after 5 PM in the time zone where it is received, the next Business Day after the date set forth on the telecopy confirmation.

Notices shall be sent to:

To Verizon Wireless: Verizon Wireless  
Port Center  
300 River Rock Blvd  
Murfreesboro, TN 37128  
Attn: Port Center Director  
Fax: 1-615-372-2425

With a copy to: Verizon Wireless  
180 Washington Valley Road  
Bedminster, New Jersey 07921  
Attention: Assistant General Counsel – Procurement &  
Technology  
Fax: (908) 306-7766

If to Carrier: [provide carrier notice information]

## 19. WAIVER

The delay or failure of either Party to enforce any of the provisions of this Agreement, or exercise in any respect any right or remedy provided for in this Agreement or at law or in equity, or to require performance of any of the provisions of this Agreement, or to exercise any option which is provided under this Agreement shall not be deemed a waiver of any such provisions, rights, remedies or options under this Agreement.

## 20. SEVERABILITY

If any of the provisions of this Agreement shall be invalid or unenforceable, then such invalidity or unenforceability shall not invalidate or render unenforceable the entire Agreement. The entire Agreement shall be construed as if not containing the particular invalid or unenforceable provision or provisions, and the rights and obligations of the Parties shall be construed and enforced accordingly; provided, that if the invalid or unenforceable provision is a material provision of this Agreement, or the invalidity or unenforceability materially affects the rights or obligations of a Party hereunder or the ability of a Party to perform any material provision of this Agreement, the Parties shall promptly renegotiate in good faith and amend in writing this Agreement in order to make such mutually acceptable revisions to this Agreement as may be required in order to conform the Agreement to Applicable Law.

**21. LIMITATION OF LIABILITY**

Except as otherwise provided in this Agreement, neither Party shall be liable to the other Party, the other Party's Customers or to any other person in connection with the performance or nonperformance under this Agreement, including but not limited to any claims for any indirect, incidental, consequential, special damages, including (without limitation) damages for lost profits, regardless of the form of action, whether in contract, indemnity, warranty, strict liability, or tort.

**22. ESCALATION PROCEDURES**

The Parties agree to provide each other with trouble reporting contacts and procedures via their respective web sites or other means agreed to by the Parties. In addition, the Parties agree to provide each other with escalation contacts and procedures via their respective web sites or other means agreed to by the Parties. Should a Party encounter any problems with respect to compliance with this Agreement that cannot be resolved through the trouble reporting contacts and procedures, then a Party may utilize the escalation contacts set forth in Appendix B ("Trouble Reporting General Contact Information") and the procedures set forth in Appendix C ("Carrier Escalation Procedures") and Appendix D ("Carrier Trouble Ticket Detail"). However, this Section 22 shall not operate in limitation or derogation of Sections 2 or 3 of this Agreement or the notice requirements set forth therein. In the event either Party fails to provide contact and procedures for trouble reporting and escalation, the Parties may utilize the Notice provisions set forth in Section 18.

In addition to the escalation procedures set forth in this Section 22, either Party may seek resolution of a dispute arising under this Agreement by pursuing any remedies available to it under this Agreement, at law, in equity, or otherwise, including, but not limited to, instituting an appropriate proceeding before the FCC or other regulatory body, or a court of competent jurisdiction; provided, however, that a Party pursuing any such remedy shall first notify the other Party of the dispute in writing through the Notice provisions set forth in Section 18 of this Agreement.

**23. ARTICLE HEADINGS**

The headings of the Articles are inserted for convenience of reference only and are not intended to be part of or to affect the meaning or interpretation of this Agreement.

**24. CHOICE OF LAW**

The construction, interpretation and performance of this Agreement shall be governed by and construed in accordance with the laws of the State of New York without regard to any conflicts of law principles that would require the application of the laws of any other jurisdiction.

**25. AMENDMENTS, MODIFICATIONS AND SUPPLEMENTS**

Amendments, modifications and supplements to this Agreement are allowed, provided that (a) all such amendments, modifications and supplements shall be in writing signed by authorized representatives of both Parties; and (b) all such amendments, modifications and supplements shall by reference incorporate this Agreement in its entirety and identify the specific sections or paragraphs contained herein which are amended, modified or supplemented; and (c) all such amendments, modifications and supplements shall not be construed to adversely affect vested rights or causes of action

which have accrued prior to the effective date of such amendment, modification or supplement.

**26. ENTIRE AGREEMENT**

This Agreement together with its appendices constitutes the entire agreement between the Parties and cancels all contemporaneous or prior agreements, whether written or oral, with respect to the subject matter of this Agreement.

**27. RESERVATION OF RIGHTS**

Notwithstanding anything to the contrary in this Agreement, neither Party waives, and each Party hereby expressly reserves, its rights to (a) challenge the lawfulness of this Agreement and any provision of this Agreement; (b) seek changes in this Agreement (including, but not limited to, changes in rates, charges and the porting services that must be offered) through changes in Applicable Law; and (c) challenge the lawfulness and propriety of, and to seek to change, any Applicable Law, including, but not limited to any rule, regulation, order or decision of the FCC, other regulatory body or a court of applicable jurisdiction. Nothing in this Agreement shall be deemed to limit or prejudice any position a Party has taken or may take before the FCC, any other state or federal regulatory or legislative bodies, courts of applicable jurisdiction, or industry fora. The provisions of this Section 27 shall survive the expiration, cancellation or termination of this Agreement.

**28. SURVIVAL**

The rights, liabilities and obligations of a Party for acts or omissions occurring prior to the expiration, cancellation or termination of this Agreement, the rights, liabilities and obligations of a Party under any provision of this Agreement regarding confidential information, indemnification or defense, or limitation or exclusion of liability, and the rights, liabilities and obligations of a Party under any provision of this Agreement which by its terms or nature is intended to continue beyond or to be performed after the expiration, cancellation or termination of this Agreement, shall survive the expiration, cancellation or termination of this Agreement.

**29. TERRITORY**

Verizon Wireless shall include a list of states in which its affiliates or other related entities operate and in which Verizon Wireless seeks to port Assigned Telephone Numbers with Carrier. With respect to Carrier this Agreement shall apply only to the territories in the states listed in Appendix E that are served by the Carrier affiliates listed in Appendix F. The foregoing shall not be construed to require that the porting between the Parties which is contemplated by this Agreement be memorialized by, or otherwise reduced to, an agreement under 47 U.S.C. §251 or otherwise construed to confer jurisdiction on states, including their regulatory agencies, over such porting unless otherwise conferred by Applicable Law.

**30. THIRD PARTY BENEFICIARIES**

Except as expressly set forth in this Agreement, this Agreement is for the sole benefit of the Parties and their permitted assigns, and nothing herein shall create or be construed to provide any third persons (including, but not limited to, Customers or contractors of a Party) with any rights (including, but not limited to, any third-party beneficiary rights) hereunder. Except as expressly set forth in this Agreement, a Party shall have no liability under this Agreement to the Customers of the other Party or to any other third person.

31. WARRANTIES

EXCEPT AS EXPRESSLY STATED IN THIS AGREEMENT, NEITHER PARTY MAKES OR RECEIVES ANY WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE SERVICES PROVIDED, OR TO BE PROVIDED, UNDER THIS AGREEMENT AND THE PARTIES DISCLAIM ANY OTHER WARRANTIES, INCLUDING BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY, WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE WARRANTIES AGAINST INFRINGEMENT, AND WARRANTIES ARISING BY TRADE CUSTOM, TRADE USAGE, COURSE OF DEALING OR PERFORMANCE, OR OTHERWISE.

32. INTELLECTUAL PROPERTY

- 32.1 Except as expressly stated in this Agreement, this Agreement shall not be construed as granting a license with respect to any patent, copyright, trade name, trademark, service mark, trade secret or any other intellectual property, now or hereafter owned, controlled or licensable by either Party. Except as expressly stated in this Agreement, neither Party may use any patent, copyrightable materials, trademark, trade name, trade secret or other intellectual property right, of the other Party except in accordance with the terms of a separate license agreement between the Parties granting such rights.
- 32.2 Except as stated in Section 32.4, neither Party shall have any obligation to defend, indemnify or hold harmless, or acquire any license or right for the benefit of, or owe any other obligation or have any liability to, the other Party or its Affiliates (for purposes of this Section 32.4, Affiliates shall include Verizon Wireless Entities) or Customers based on or arising from any Third Party Claim alleging or asserting that the provision or use of any service, facility, arrangement, or software by either Party under this Agreement, or the performance of any service or method, either alone or in combination with the other Party, constitutes direct, vicarious or contributory infringement or inducement to infringe, or misuse or misappropriation of any patent, copyright, trademark, trade secret, or any other proprietary or intellectual property right of any Party or third person. Each Party, however, shall offer to the other reasonable cooperation and assistance in the defense of any such claim.
- 32.3 NOTWITHSTANDING ANY OTHER PROVISION OF THIS AGREEMENT, THE PARTIES AGREE THAT NEITHER PARTY HAS MADE, AND THAT THERE DOES NOT EXIST, ANY WARRANTY, EXPRESS OR IMPLIED, THAT THE USE BY EACH PARTY OF THE OTHER'S SERVICES PROVIDED UNDER THIS AGREEMENT SHALL NOT GIVE RISE TO A CLAIM OF INFRINGEMENT, MISUSE, OR MISAPPROPRIATION OF ANY INTELLECTUAL PROPERTY RIGHT.
- 32.4 The Parties agree that the services provided hereunder shall be subject to the terms, conditions and restrictions contained in any applicable agreements (including, but not limited to software or other intellectual property license agreements) between the Parties and their respective vendors. The Parties agree to advise each other, directly or through a third party, of any such terms, conditions or restrictions that may limit a Party's use of a service provided by the other Party that is otherwise permitted by this Agreement. Upon written request of a Party, to the extent required by Applicable Law, the Party receiving such request will use its best efforts, as commercially practicable, to obtain intellectual property rights from its vendor to allow the requesting Party to use the service in the same manner as the Party receiving such request that are coextensive with its intellectual property rights, on terms and conditions that are equal in quality to

the terms and conditions under which it has obtained its intellectual property rights. The Party making such request shall reimburse the other Party for the cost of obtaining such rights.

### 33. CONFIDENTIALITY

33.1 As used in this Section 33, "Confidential Information" means the following information that is disclosed by one Party ("Disclosing Party") to the other Party ("Receiving Party") in connection with, or anticipation of, this Agreement:

33.1.1 books, records, documents and other information disclosed pursuant to this Agreement;

33.1.2 any forecasting information provided pursuant to this Agreement;

33.1.3 Customer Information (except to the extent that (a) the Customer information is published in a directory, (b) the Customer information is disclosed through or in the course of furnishing a Telecommunications Service, such as a Directory Assistance Service, Operator Service, Caller ID or similar service, or LIDB service where such disclosure is otherwise authorized by applicable agreements or law, or (c) the Customer to whom the Customer Information is related has authorized the Receiving Party to use and/or disclose the Customer Information);

33.1.4 information related to specific facilities or equipment (including, but not limited to, cable and pair information);

33.1.5 any information that is in written, graphic, electromagnetic, or other tangible form, and marked at the time of disclosure as "Confidential" or "Proprietary"; and

33.1.6 any information that is communicated orally or visually and declared to the Receiving Party at the time of disclosure, and by written notice with a statement of the information given to the Receiving Party within ten (10) days after disclosure, to be "Confidential" or "Proprietary."

Notwithstanding any other provision of this Agreement, a Party shall have the right to refuse to accept receipt of information that the other Party has identified as Confidential Information pursuant to Sections 33.1.5 and 33.1.6.

33.2 Except as otherwise provided in this Agreement, the Receiving Party shall:

33.2.1 use the Confidential Information received from the Disclosing Party only in performance of this Agreement; and

33.2.2 using the same degree of care that it uses with similar confidential information of its own (but in no case a degree of care that is less than commercially reasonable), hold Confidential Information received from the Disclosing Party in confidence and restrict disclosure of the Confidential Information solely to those of the Receiving Party's Affiliates (for purposes of this Section 33, Affiliates shall include Verizon Wireless Entities) and the directors, officers, employees, agents and contractors of the Receiving Party and the Receiving Party's Affiliates, that have a need to receive such Confidential Information in order to perform the Receiving Party's obligations under this Agreement. The Receiving

Party's Affiliates and the directors, officers, employees, agents and contractors of the Receiving Party and the Receiving Party's Affiliates, shall be required by the Receiving Party to comply with the provisions of this Section 33 in the same manner as the Receiving Party. The Receiving Party shall be liable for any failure of the Receiving Party's Affiliates or the directors, officers, employees, agents or contractors of the Receiving Party or the Receiving Party's Affiliates, to comply with the provisions of this Section 33.

- 33.3 The Receiving Party shall return or destroy all Confidential Information received from the Disclosing Party, including any copies made by the Receiving Party, within thirty (30) days after a written request by the Disclosing Party is delivered to the Receiving Party, except for (a) Confidential Information that the Receiving Party reasonably requires to perform its obligations under this Agreement, and (b) one copy for archival purposes only.
- 33.4 Unless otherwise agreed, the obligations of Sections 33.2 do not apply to information that:
- 33.4.1 was, at the time of receipt, already in the possession of or known to the Receiving Party free of any obligation of confidentiality and restriction on use;
  - 33.4.2 is or becomes publicly available or known through no wrongful act of the Receiving Party, the Receiving Party's Affiliates, or the directors, officers, employees, agents or contractors of the Receiving Party or the Receiving Party's Affiliates;
  - 33.4.3 is rightfully received from a third person having no direct or indirect obligation of confidentiality or restriction on use to the Disclosing Party with respect to such information;
  - 33.4.4 is independently developed by the Receiving Party;
  - 33.4.5 is approved for disclosure or use by written authorization of the Disclosing Party (including, but not limited to, in this Agreement); or
  - 33.4.6 is required to be disclosed by the Receiving Party pursuant to Applicable Law, provided that the Receiving Party shall have made commercially reasonable efforts to give adequate notice of the requirement to the Disclosing Party in order to enable the Disclosing Party to seek protective arrangements.
- 33.5 Notwithstanding the provisions of Sections 33.1 through 33.4, the Receiving Party may use and disclose Confidential Information received from the Disclosing Party to the extent necessary to enforce the Receiving Party's rights under this Agreement or Applicable Law. In making any such disclosure, the Receiving Party shall make reasonable efforts to preserve the confidentiality and restrict the use of the Confidential Information while it is in the possession of any person to whom it is disclosed, including, but not limited to, by requesting any governmental entity to whom the Confidential Information is disclosed to treat it as confidential and restrict its use to purposes related to the proceeding pending before it.

33.6 The Disclosing Party shall retain all of the Disclosing Party's right, title and interest in any Confidential Information disclosed by the Disclosing Party to the Receiving Party. Except as otherwise expressly provided in this Agreement, no license is granted by this Agreement with respect to any Confidential Information (including, but not limited to, under any patent, trademark or copyright), nor is any such license to be implied solely by virtue of the disclosure of Confidential Information.

33.7 The provisions of this Section 33 shall be in addition to and not in derogation of any provisions of Applicable Law, including, but not limited to, 47 U.S.C. § 222, and are not intended to constitute a waiver by a Party of any right with regard to the use, or protection of the confidentiality of, CPNI provided by Applicable Law.

33.8 Each Party's obligations under this Section 33 shall survive expiration, cancellation or termination of this Agreement.

**34. SIGNATURES**

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement through their authorized representatives on the date or dates below to be effective when executed by both Parties.

## LOCAL NUMBER PORTABILITY OPERATIONS AGREEMENT

This Local Number Portability Operations Agreement ("Agreement") is entered into by and between Western Wireless Corporation ("Western") and \_\_\_\_\_ ("\_\_\_\_\_"). Western and \_\_\_\_\_ are each individually a "Party" and are together the "Parties" to this Agreement.

WHEREAS, the above named Parties wish to enter into an Agreement with each other in compliance with applicable laws and regulations.

WHEREAS, the Parties wish to enter into an Agreement to facilitate the ability of Customers to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement through Local Number Portability.

WHEREAS, the Parties wish to enter into an Agreement to establish practices and procedures to ensure that Customer requests to port numbers are achieved efficiently and with minimal delays.

THEREFORE, the Parties wish to enter into this Agreement on the following terms and conditions:

### 1. DEFINITIONS

Any term not specifically defined here shall be given the meaning provided for in FCC Orders governing LNP.

- 1.1. Act: Means the Communications Act of 1934 (47 U.S.C. 151 et. seq.), as amended and interpreted in the rules and regulations of the FCC.
- 1.2. Affiliate: Means any entity, directly or indirectly, through one or more intermediaries, controlling, controlled by or under common control with a Party hereto.
- 1.3. Agreement: Means this Local Number Portability Operations Agreement, including all appendices attached hereto, future amendments, modifications and supplements made in accordance herewith.
- 1.4. CORBA is an acronym for: Common Object Request Broker Architecture.
- 1.5. Competitive Local Exchange Carrier ("CLEC") is defined in the Act.
- 1.6. Commercial Mobile Radio Service ("CMRS") is as defined in the Act.
- 1.7. Customer: An active end user and subscriber of the OSP who desires to receive service from the NSP using the same telephone number that is associated with the service(s) the subscriber receives from the OSP.
- 1.8. Customer Service Records ("CSR") are the records that contain the identity, service address, rate plan or plans, and other information on the Customer.

- 1.9. Electronic Data Interface ("EDI") is a data interface for exchange of information between providers.
- 1.10. Federal Communications Commission ("FCC"): Means the regulatory, governing body directing the activities associated with this Agreement.
- 1.11. Inter-carrier Communications Process ("ICP"): The communication process between the OSP and the NSP, which validates the customer information and initiates and completes the port request. The ICP includes the exchange of the LSR/LR.
- 1.12. Local Exchange Routing Guide ("LERG") is a Traffic and Routing Administration maintained industry table identifying switches with their assigned telephone numbers.
- 1.13. Local Number Portability ("LNP"): The ability of a Customer to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement pursuant to FCC Rules.
- 1.14. Local Response ("LR"): A form for responding to an LSR. A sample LR and descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG") of the Ordering and Billing Forum..
- 1.15. Local Service Request ("LSR"): Forms containing information about a Customer who desires to port a telephone number to the NSP. A sample LSR and descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG") of the Ordering and Billing Forum.
- 1.16. Location Routing Number ("LRN"): Ten-digit number assigned to a switch or point of interconnection used for routing calls.
- 1.17. Metropolitan Statistical Areas ("MSA"): An MSA denotes a large urban population market as designated by the U.S. government.
- 1.18. New Service Provider ("NSP"): The new provider that will provide service to Customer and to whom Customer ports its telephone number.
- 1.19. Number Portability Administration Center ("NPAC"): A neutral third party center that processes porting information from and disseminates that information to telecommunications carriers. The NPAC processes the NSP subscriber port request and downloads the LRN associated with the subscriber ported telephone number to local number portability databases.
- 1.20. Old Service Provider ("OSP"): The provider providing service to the customer at the time the customer requests porting of the MDN.
- 1.21. Rate Center: Geographic areas that utilize a common geographical point of reference for distance measurements, called a rating-point, which is defined by Vertical and Horizontal Coordinates.

1.22. Working Telephone Number: A telephone number that is assigned to a Customer that can originate and terminate telephone calls through the Public Switched Telephone Network.

## 2. PURPOSE OF AGREEMENT

The parties desire to enter into this Agreement consistent with all applicable FCC rules and regulations.

## 3. TERM

This Agreement shall become effective May 24, 2004 and, except as otherwise provided in this Agreement, shall continue in full force and effect until either Party terminates the Agreement by providing notice of termination in writing to the other Party at least sixty (60) in advance of such termination pursuant to the Notice provisions set forth in Section 19 of this Agreement. Upon termination, the Parties shall continue to provide LNP if required by applicable laws and regulations.

## 4. NUMBER PORTING

### 4.1. Scope

The Parties shall provide LNP and port Working Telephone Numbers on a reciprocal basis pursuant to this Agreement. The Parties will open all switches and associated NPA-NXXs to support number portability in the serving areas identified in Appendix A.

NXX codes shall be portable in accordance with FCC Rules and Regulations except those permitted to be designated non-portable by the same FCC Rules and Regulations.

### 4.2. Procedures for Providing LNP

4.2.1. The Parties shall ensure that all switches, whether currently owned or hereafter acquired, are upgraded to facilitate LNP to the extent required by FCC Rules and Regulations. The Parties shall, as required by FCC orders, disclose upon request any technical limitations that would prevent LNP in any connecting office.

4.2.2. The Parties will follow the LNP provisioning process flow and porting intervals recommended by the North American Numbering Council (NANC) for Inter-Service Provider LNP between wireline and wireless carriers. This includes the recommendations of the Local Number Portability Administration Work Group to adopt the Inter-Service Provider LNP Operations Flows and the same porting intervals until the FCC provides further confirmation or modification of these processes.

4.2.3. The Parties will follow the LNP ordering procedures established at the OBF for porting of Assigned Telephone numbers.

4.2.4. When a telephone number is ported out of the OSP's network, the OSP will, if applicable, remove all line based features and calling card(s) associated with the ported number(s) from its Line Information Database (LIDB). Reactivation of the line-based calling card in another LIDB, if applicable, is the responsibility of the NSP or the Customer.

- 4.2.5. When a telephone number is ported out of the OSP's network, the OSP will follow the 911 Guidelines recommended by the National Emergency Number Association ("NENA") with regard to emergency services databases.
- 4.2.6. When an OSP ports Customer telephone number(s) to the NSP, the OSP shall implement the ten-digit trigger feature where it is available. When the OSP receives the port request, the unconditional trigger shall be applied to the Customer's telephone number prior to the due date and time identified in the port request. When the unconditional trigger is not available, the Parties shall use standard NPAC concurrence procedures.
- 4.2.7. LNP Software is required to be in place and tested prior to any order submission.
- 4.2.8. Reserved numbers may be ported if there is at least one Working Telephone Number in the group.

## 5. LIMITATIONS OF SERVICE

A telephone number can only be ported to a NSP if the Rate Center associated with the NPA-NXX is within the NSP's license area or authorized service area. A telephone number can be ported from a wireline to CMRS Party if the Rate Center associated with the NPA-NXX is within the CMRS provider's license area. A telephone number can be ported from a CMRS to a wireline Party if the Rate Center associated with the NPA-NXX is within the wireline service provider's authorized service area. The Parties recognize that certain NXXs may be non-portable, including those NXXs assigned for internal testing and official use, and any NXXs required to be designated as non-portable by the rules and regulations of the FCC.

## 6. SERVICE DESCRIPTION

Ordering: Both Parties agree to follow the provisions set forth in Appendix D for the exchange of information required to port a customer and the processing of LNP orders.

- 6.1 Pre-order: The Parties agree that a NSP must obtain the affirmative consent of a Customer to authorize the porting of any Working Telephone Number(s) and the disclosure of such Customer's information between the Parties as necessary to facilitate LNP processing.
- 6.2 After receiving a request from a Customer to port telephone number(s), the New Service Provider may request the CSR of the Customer from the Old Service Provider.
- 6.3 Order: The Parties agree that a NSP must submit an order for LNP to the OSP using a 'Local Service Request' (LSR).
- 6.4 All numbers on a LSR that are requested to be ported must reside within the same LRN within an NPAC region. If a customer is requesting to port numbers from multiple LRNs within an NPAC region, a separate LSR must be submitted for all numbers in each LRN within an NPAC region.
- 6.5 Type 1 Number Porting: The Parties agree to migrate all telephone numbers assigned to Type 1 trunks to the Western Wireless mobile switching center utilizing the LNP process. The entire

port by the time specified herein, the NSP may place the telephone number in Conflict with NPAC. If the port has not been completed during the Conflict timer parameter, the NSP can take the port out of Conflict and Activate the telephone number(s).

Deactivation:

6.9 Deactivation: With respect to all services and features related to the Customer ported telephone number, the OSP shall deactivate them within its Network and Billing Systems by or on the requested due date specified in the associated port request.

Return of Numbers:

6.10 All Working Telephone Numbers that have been ported will be released when the NSP ceases providing service to those ported numbers. Release of telephone numbers will be based on the procedures set forth in the FRS and IIS of the Number Portability Administration Center. Each telephone number will be released only after the number has been aged by the NSP for 90 days from the day that service to the telephone number was terminated. An aging interval includes any announcement treatment period, as well as blank telephone number intercept period. For disconnected numbers, the NSP will comply with the NPAC disconnect and snapback process as described in applicable publications of the North American Numbering Council.

## 7. TROUBLE, MAINTENANCE, AND REPAIR

7.1 Operation Support Systems: Both Parties agree to work expeditiously to resolve any issues associated with porting a customer between the two Parties. Before either Party reports a trouble condition, that Party must first use reasonable efforts to isolate the trouble to the other Party's actions or facilities. In order to facilitate trouble reporting and resolution, the Parties shall provide the trouble reporting contact information, per Appendix C. It is the responsibility of each Party to maintain the accuracy of their contact information and to notify the other Party of changes or modifications.

7.2 Trouble: Both Parties shall use commercially reasonable efforts to resolve and/or isolate trouble within 24 hours for single customer affecting issues. Both Parties shall use commercially reasonable efforts to resolve and/or isolate trouble within 6 hours for multiple customer affecting issues.

7.3 Network Maintenance: Each Party shall monitor and perform effective maintenance through testing and the performance of proactive maintenance activities such as routine testing, development of and adherence to appropriate network trouble isolation processes and periodic review of operational elements for translations, routing and network faults.

7.4 Modifications: Each Party will proactively test their new switch features and service offerings to ensure there are no problems.

9. PRICING/COSTS

The Parties to this Agreement are responsible for their own costs associated with this Agreement or the porting process, unless otherwise specified in this Agreement.

10. TESTING

10.1 Each Party shall designate a single point of contact (SPOC) to schedule and perform required tests. These tests shall be performed during a mutually agreed time frame and must conform to industry portability testing and implementation criteria in force in the NPAC region.

10.2 Both Parties shall be certified by the regional NPAC prior to scheduling inter-company testing of LNP.

10.3 Both Parties shall exchange information identified in Appendix B prior to the commencement of testing.

11. FRAUD

The Parties agree to cooperate in good faith with each other to investigate, minimize, and take corrective action in cases of fraud related to number portability.

12. USE OF TRADEMARKS

The Parties agree that they will not use the name, service marks or trademarks of the other Party or any of its affiliated companies in any manner whatsoever, without such Party's specific written consent. Neither Party is licensed hereunder to conduct business under any logo, trademark, service or trade name (or any derivative thereof) of the other Party. Neither Party shall issue any press release or other publicity concerning this Agreement without the prior consent of the other Party.

13. COMPLIANCE WITH LAWS

The Parties shall comply with all federal, state and local laws applicable to their performance hereunder.

14. FORCE MAJEURE

Neither Party shall be responsible for any delay or failure in performance of any part of this Agreement to the extent that such delay is caused by reason of acts of God, wars, revolution, civil commotion, acts of public enemy, embargo, acts of government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing or boycotts, or any other circumstances beyond the reasonable control and not involving any fault or negligence of the Delayed Party ("Condition"). If any such Condition occurs, the Party delayed or unable to perform ("Delayed Party"), upon giving prompt notice to the other Party, shall be excused from such performance on a day-to-day basis during the continuance of such Condition (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis during the same period); provided, however, that the Party so affected

shall use its best reasonable efforts to avoid or remove such Condition and both Parties shall proceed immediately with the performance of their obligations under this Agreement whenever such causes are removed or cease.

#### 15. ASSIGNMENT

This Agreement may not be assigned or transferred without the prior written consent of the other Party, which consent may not be unreasonably withheld. Notwithstanding the prior sentence, no prior written consent shall be required for a Party to assign or transfer this Agreement to any subsidiary, Affiliate, parent or successor in interest, or to any entity which acquires all or substantially all of its assets and agrees to be bound by the terms and conditions of this Agreement, provided however, that the assigning Party shall notify the other Party of such assignment or transfer as soon as reasonably practical.

#### 16. BINDING EFFECT

This Agreement shall inure to the benefit of, and shall be binding upon the Parties hereto and their respective successors and permitted assigns .

#### 17. INDEMNIFICATION

17.1 Each Party shall indemnify and hold harmless the other from any liabilities, claims, or demands, including costs, expenses and reasonable attorney's fees ("Claims") made by third parties resulting from the negligence and/or willful misconduct of a Party, its employees and agents in the performance of this Agreement.

17.2 A Party seeking to be indemnified hereunder will provide the other Party with prompt, written notice of any Claim covered by this indemnification and will cooperate appropriately with the indemnifying Party in the defense thereof. The indemnifying Party shall not settle or compromise any such Claim or consent to the entry of any judgment without the prior written consent of each indemnified Party, such consent not to be unreasonably withheld or delayed.

#### 18. RELATIONSHIP OF THE PARTIES

Neither Party undertakes by this Agreement or otherwise to perform or discharge any liability or obligation of the other Party, whether regulatory or contractual, or to assume any responsibility whatsoever for the conduct of the business or operations of the other Party. Nothing contained in this Agreement is intended to give rise to an employment relationship, partnership or joint venture between the Parties or to impose upon the Parties any of the duties or responsibilities of employers, partners or joint venturers.

#### 19. NOTICES

Unless otherwise specified in this Agreement, all notices required under this Agreement shall be given in writing. All notices shall be given by personal delivery, overnight courier, confirmed facsimile or

certified mail, return receipt requested to the person(s) specified below or to such other addresses as a Party may designate by written notice to the other Party. If sent by overnight courier or by the United States Postal Service mail, such notices shall be deemed received on the earlier of actual receipt or five (5) business days following deposit.

Notices shall be sent to:

For Western Wireless Corporation:

Regulatory Department  
3650 131<sup>st</sup> Avenue, S.E., Suite 400  
Bellevue, Washington 98006

Email: [Regulatory@wwireless.com](mailto:Regulatory@wwireless.com)

Fax: 425-586-8118

For Carrier B:

(Insert Name & Address)

Email:

Fax:

## 20. WAIVER

The waiver or failure of either Party to exercise in any respect any right provided for in this Agreement shall not be deemed a waiver of any further right under this Agreement.

## 21. SEVERABILITY

This Agreement shall be subject to all applicable federal, state and local laws, court orders, agency orders, rules and regulations of all governmental agencies and authorities. In the event this Agreement, any of the provisions of this Agreement, or any of the activities under this Agreement, are determined to be inconsistent with or contrary to any applicable federal, state or local laws, court orders, agency orders, rules, or regulations, the latter shall control and any inconsistent term or condition of this Agreement shall terminate without any additional liability attaching to either Party. If the Agreement lawfully can be continued, it is commercially practicable to do so, and the intent of the Parties can be effectuated without the stricken provision, then the Agreement shall continue as amended and the Parties agree to negotiate any such necessary amendments. If the Agreement lawfully can be continued, it is commercially practicable to do so, and the intent of the Parties can be effectuated, but only by further modification of the Agreement, the Parties may so modify the Agreement by executing an appropriate amendment to this Agreement; if the Parties choose not to so modify this Agreement, then this Agreement shall terminate without any additional liability attaching to either Party and further performance shall be excused.

## 22. Limitation of Liability

Neither Party shall be liable to the other in connection with the provision or use of services offered under this Agreement for indirect, incidental, consequential, special damages, including (without

limitation) damages for lost profits, regardless of the form of action, whether in contract, indemnity, warranty, strict liability, or tort.

### 23. ESCALATION PROCEDURES

The Parties shall agree to a single point of contact in each company who shall be notified in the event a Party encounters a post-porting issue(s) or a case of suspected breach of this agreement. This action should precede actions by a Party under Section 24 Dispute Resolution. Once a Party institutes Escalation Procedures under this Section, all Parties shall refrain for three (3) days from taking any action under Section 24. The points of contact for each Party are as follows:

For Carrier A:

(Insert Name & Address)

For Carrier B:

(Insert Name & Address)

### 24. DISPUTE RESOLUTION

#### 24.1 General Provisions

- a. Without limitation of the Parties' right to bring a dispute otherwise within the jurisdiction of a regulatory agency before such agency or unless otherwise required by law, the Parties desire to resolve disputes arising out of this Agreement without litigation. Accordingly, in the event of a dispute, claim or controversy arising under this Agreement ("Dispute"), the affected Party shall resolve the Dispute as provided herein.
- b. At the written request of a Party to invoke the procedures hereunder, each Party shall appoint within five (5) days of the request a knowledgeable, responsible representative to meet and negotiate in good faith to resolve a Dispute. Parties may be represented by counsel to assist in and/or conduct such negotiations. The discussions shall be left to the discretion of the representatives. Upon agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence among the representatives for purposes of these negotiations shall be treated as confidential information developed for purposes of settlement, exempt from discovery and production, which shall not be admissible in the arbitration described below or in any lawsuit without the concurrence of all Parties. Documents identified in or provided with such communications, which are not prepared for purposes of the negotiations, are not so exempted and may, if otherwise admissible, be admitted in evidence in the arbitration or lawsuit.
- c. If the foregoing negotiations do not resolve the Dispute within sixty (60) days of the initial written request, either Party may serve upon the other Party by certified mail a written demand that the Dispute be arbitrated, specifying in reasonable detail the nature of the Dispute to be submitted to arbitration in accordance with Section 23.2, below. The demand, effective upon receipt, shall be made within a reasonable time after the Dispute, has arisen. In no event shall

the demand for arbitration be made more than one year after the underlying cause of action arises.

- d. The arbitration hearing shall commence within forty-five days after the demand for arbitration. The arbitrator shall rule on the dispute by issuing a written opinion within thirty (30) days after the close of hearings.
- e. Notwithstanding the Dispute Resolution provisions set forth in Section 23, the provisions in this Agreement addressing Severability as set forth in Section 21 and the provisions allowing for termination as set forth in Section 1.2 take precedence. If the Agreement is terminated any initial negotiations or arbitration in progress shall cease and become moot.

#### 24.2 ARBITRATION.

- a. Agreement to Arbitrate Disputes. Except as set forth in Section 23.1 above, the Parties agree that in the event of any Dispute, such Dispute shall be resolved exclusively by arbitration in accordance with the Commercial Arbitration Rules of the American Arbitration Association, and judgment upon the award rendered by the Arbitrator may be entered in any court having jurisdiction thereof. The Federal Arbitration Act, 9 U.S.C. Secs. 1-15, not state law, shall govern the arbitrability of all Disputes.
- b. Selection of Arbitrator. The Parties further agree that they will ask the American Arbitration Association administrator in the area in which LNP is being provided, to provide to each Party to the Dispute a list of five (5) proposed arbitrators qualified to decide the controversy and who are experienced in telecommunications law. Within seven (7) days of receipt of this list, each Party to the Dispute will cross off names of proposed arbitrators the Party does not wish to use, leaving at least two candidates on the list, will number the remaining names in the order of preference, and will return the annotated list to the administrator. The administrator will select an arbitrator from the modified lists of preferences. The Parties will accept the administrator's selection of the Arbitrator.
- c. Discovery. Discovery shall not be permitted in such arbitration except as allowed by the rules of AAA or such other arbitration agency selected by the Parties pursuant to Section 23.2(a), or as otherwise agreed to by the Parties.
- d. Arbitration Award or Decision. The Parties agree that the arbitrator shall have no power or authority to make awards or issue orders of any kind except as permitted by this Agreement and substantive law, and in no event shall the arbitrator have the authority to make any award that provides for punitive or exemplary damages. The arbitrator's decision shall follow the plain meaning of this Agreement and the relevant documents. The arbitrator's award shall be final and binding and may be enforced in any court of competent jurisdiction. Each Party shall bear its own costs and attorneys' fees, and shall share equally in the fees and expenses of the arbitrator.

#### 25. ARTICLE HEADINGS

The headings of the Articles are inserted for convenience of reference only and are not intended to be part of or to affect the meaning or interpretation of this Agreement.

26. CHOICE OF LAW AND JURISDICTION

The construction, interpretation and performance of this Agreement shall be governed by and construed in accordance with the laws of the state in which LNP is being provided, without regard to any conflicts of law principles that would require the application of the laws of any other jurisdiction.

27. AMENDMENTS

Amendments, modifications and supplements to this Agreement are allowed provided: (a) all such amendments, modifications and supplements shall be in writing signed by authorized representatives of both Parties, and (b) all such amendments, modifications and supplements shall by reference incorporate this Agreement in its entirety and identify the specific sections or paragraphs contained herein which are amended, modified or supplemented, and (c) all such amendments, modifications and supplements shall not be construed to adversely affect vested rights or causes of action which have accrued prior to the Effective Date of such amendment, modification or supplement.

28. ENTIRE AGREEMENT

This Agreement together with its exhibits constitutes the entire agreement between the Parties and cancels all contemporaneous or prior agreements, whether written or oral, with respect to the subject matter of this Agreement. No modifications shall be made to this Agreement unless in writing and signed by authorized representatives of the Parties.

29. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement through their authorized representatives.

## Information Required for Logging Trouble Tickets

### Sprint PCS:

- Customer name and organization.
- Full description of the issue and expected results.
- Steps to reproduce the issue and relevant data.
- All applicable issue, log, and system files.
- Any special circumstances surrounding the discovery of the issue (e.g., first occurrence or occurred after what specific event).
- Customer's business impact of problem and suggested priority for resolution.

### Trading Partner:

- Customer name and organization.
- Full description of the issue and expected results.
- Steps to reproduce the issue and relevant data.
- All applicable issue, log, and system files.
- Any special circumstances surrounding the discovery of the issue (e.g., first occurrence or occurred after what specific event).
- Customer's business impact of problem and suggested priority for resolution.

## Porting Validation Standards

### Information Required for Port Validation:

#### Sprint PCS:

Last Name or Business Name

Zip Code

SSN or Tax ID or Acct. No.

MDN

If corporate liable - a password or pin number.

#### Trading Partner:

## Porting Business Rules

### Exhibit E

#### Sprint PCS:

- Complex Ports – Sprint PCS will accept only single line ports. Multiline ports must be submitted as multiple single line ports.
- Resellers – Sprint PCS will accept port requests on behalf of our resellers, however all validation is based on the resellers' processes.

#### Trading Partner:

- TBD

The carriers agree that information contained in this Part A is operational in nature and subject to change.

The carriers agree to make every effort to give the other carrier thirty (30) days' notice of any changes to its information pursuant to the General Contact Information set forth in Part A.

The carriers' contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.

**Part B – General Contact Information and  
Trouble Reporting Contact Information**

**For Verizon Wireless:**

**General Contact Information**

**Wireless-Wireline Porting:**

**Verizon Wireless Porting Center**

Hours of Operation: 24 x 7 x 365 (open all holiday's, no exceptions)  
Address: 300 River Rock Blvd.  
Murfreesboro, TN 37128  
Phone: 1-800-488-2002

**Porting Center Carrier Relations**

Contact: Associate Director of Inter-Carrier Relations  
Phone: 1-800-711-9300  
Fax: 1-615-372-2411  
Hours: 8:00am to 5:00pm (Central Time)  
E-mail: [PortCenterICR@GL.VerizonWireless.com](mailto:PortCenterICR@GL.VerizonWireless.com)

**Pre-Launch (Pre-11/24/03) Inter-Carrier Test Scheduling**

Contact: Wireline Inter-Carrier Test Coordinator  
Phone: 1-248-915-3430  
Fax: 1-248-915-3799  
E-mail: [Marie.Moore@VerizonWireless.com](mailto:Marie.Moore@VerizonWireless.com)

**Post-Launch (Post-11/24/03) Inter-Carrier Test Scheduling**

Contact: Inter-Carrier Relations  
Phone: 1-800-711-9300  
Fax: 1-615-372-2411  
E-mail: [PortCenterICR@GL.VerizonWireless.com](mailto:PortCenterICR@GL.VerizonWireless.com)

**Trouble Reporting Contact Information**

Process: The Verizon Wireless Porting Center is the initial interface for all trouble resolution activity associated with porting numbers. The Porting Center will refer issues to the appropriate internal Network or provisioning group for resolution within Verizon Wireless.

**Trouble Area:**

ICP/General Trouble Reporting

Phone: 1-800-711-9300  
Fax: 1-615-372-2425

Note: Each carrier shall make available a Porting Administration Group or Trouble Reporting contact on a 24x7x365 basis.

The Trouble Reporting Contacts may be amended from time to time by a carrier upon providing thirty (30) days' written notice to the other at the General Contact Information set forth in this Part A.

The carriers' contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.

## Part C – Trouble Ticket Detail

### For Verizon Wireless:

#### Information Required For Logging Trouble Tickets\*

The following may be required for trouble reports:

- Carrier Name;
- Reporting Carrier organization;
- SPID and associated OCN(s);
- Point of Contact Name;
- Point of Contact Number;
- Porting Telephone Number/MDN;
- LRN;
- Time and Date of Port;
- Associated Error Codes;
- Description of Problem; and
- Other relevant data.

### For Wireline Carrier B:

#### Information Required For Logging Trouble Tickets\*

The following is proposed information for trouble reports:

- Carrier Name;
- Reporting Carrier organization;
- SPID and associated OCN(s);
- Point of Contact Name;
- Point of Contact Number;
- Porting Telephone Number/MDN;
- LRN;
- Time and Date of Port;
- Associated Error Codes;
- Description of Problem; and
- Other relevant data.

\*Each carrier shall make available a Porting Administration Group or Trouble Reporting contact on a 24x7x365 basis.

The carriers contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.

**Part D – Porting Validation Standards**

**For Verizon Wireless:**

Information Required For Post-Paid Port Validation:

1. Billing Last Name
2. Business Name if no information for Billing Name
3. Five Digit Zip Code
4. SSN/Tax ID Number
5. Account Number if no SSN or Tax ID
6. Porting Telephone Number

Information Required for Pre-Paid Port Validation:

1. Porting Telephone Number
2. Password/PIN

**For Wireline Carrier B:**

Information Required For Post-Paid Port Validation:

Information Required for Pre-Paid Port Validation.

Note: Other than those mandatory data items set forth in Section 3.3.1 of the WICIS, the above shall be the only information which may be utilized by a carrier to this Trading Partner Profile to validate a port request for post-paid numbers. “Delay” or “denial” of ports between the carriers shall occur only in the event a carrier is unable to complete the validation of those validation elements expressly set forth above. Once validated, the Carriers shall be obligated to complete the porting transaction. Any variations or proposed changes in the agreed data fields noted above shall be communicated to the other carrier at the information provided in Part B.

2. Name of back up or secondary contact (within your company)
  - a. Phone number
  - b. Fax number
  - c. E mail address
3. Hours of operation
4. Observed holidays
5. Mailing address
6. Please provide the SPID(s) associated with you company.
7. Is your company associated with or a subsidiary of any other companies? If so, which companies and SPIDS
8. How should Verizon Wireless submit a port request or LSR to your company?  
Fax? Email?
9. What is your turnaround for port requests (3,4 or 5 days)?

10. If fax, does the company utilize TSI?

- a. If not, please provide the fax number
- b. If multiple SPID's are involved, do the requests go to the same fax or different numbers?
- c. If multiple fax numbers, please provide a list with SPID and corresponding fax number.
- d. Are different areas (or regions) covered by different SPIDs (i.e. Northeast US covered by SPID 1234, Southeast US covered by SPID 5678, etc)?

11. If E Mail, please provide e-mail address(es).

- a. If multiple SPID's are involved, do the requests go to the same e-mail address or different addresses?
- b. If multiple addresses, please provide a list with SPID and corresponding e-mail addresses.
- c. Are different areas (or regions) covered by different SPIDs (i.e. Northeast US covered by SPID 1234, Southeast US covered by SPID 5678, etc)?

12. If requests are to be sent by any other method, please provide instructions in detail.

13. What LSOG (LSR) version does the company use?

14. Does the company have a template of the LSR, EUI and NP forms showing your required fields and format?

- a. If yes, can the company provide a copy?
- b. If not, can someone go thru a form, line by line, with us to verify properly prepared forms are submitted?

15. Does your company resell numbers to other carriers (type one)?

- a. If yes:

What companies?

What are their SPIDs?

Any specific NPA-NXX?

Do you have any contact information for these companies?

- b. Does your company or has your company purchased numbers from other carriers?

16. Is the company willing to test with Verizon Wireless?

Any additional comments:

Please return completed form and any attachments to me via fax at 615-372-2382 or via e-mail at [Nilda.Penn@verizonwireless.com](mailto:Nilda.Penn@verizonwireless.com)

---

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

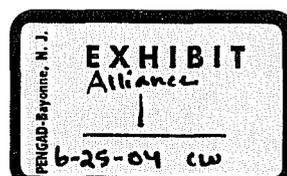

---

IN THE MATTER OF THE PETITION  
OF ALLIANCE COMMUNICATIONS  
COOPERATIVE, INC. AND SPLITROCK  
PROPERTIES, INC. FOR SUSPENSION  
OR MODIFICATION OF § 251(b)(2) OF  
THE COMMUNICATIONS ACT OF 1934  
AS AMENDED

Docket No. TC04-055

**DIRECT PRE-FILED TESTIMONY OF  
DON SNYDERS**

May 14, 2004

**Q: Please state your business name and address?**

A: My name is Don Snyders, General Manager of Alliance Communications Cooperative, Inc. and Splitrock Properties, Inc. My business address is 612 3<sup>rd</sup>, PO Box 349, Garretson, SD 57030. My business phone number is 605-594-3411.

**Q: By whom are you employed and in what capacity?**

A: I am the General Manager of Alliance Communications Cooperative, Inc. (Alliance) and its wholly owned subsidiary company of Splitrock Properties, Inc. (Splitrock). Alliance and Splitrock are rural independent local exchange carriers that provide local exchange, exchange access and other telecommunications services to 9851 access lines within its South Dakota service area, which include the exchanges of Garretson, Brandon, Baltic, Crooks, Alcester, Hudson, Howard and Oldham/Ramona.

**Q: Does your company have any direct points of interconnection with any wireless carrier and/or does your company provide any blocks of numbers for your company's rate centers to any wireless carrier?**

A: No.

**Q: How do the local calling areas of your exchanges compare with those of the wireless carriers operating in your area?**

A: Wireless service areas are much more extensive.

**Q: What is the current method of routing calls from your subscriber's landline phones to wireless phone numbers?**

A: Alliance and Splitrock have points of interconnection (POI) with SDN and Quest. The SDN connection is for toll completion and toll termination for InterLATA and

Intra LATA traffic. The Qwest POI is a terminating trunk, only for Qwest IntraLATA traffic.

**Q: Have any subscribers requested local number portability (LNP) from your company?**

A: There have been no subscriber requests for local number portability to be offered by Alliance Communications and/or Splitrock Properties.

**Q: Since the passage of the 1996 Telecom Act have any wireline carriers ever requested LNP from your company?**

A: No.

**Q: Have any wireless carriers requested LNP?**

A: Yes, from Western Wireless, Verizon, and Midwest Wireless.

**Q: How much time would be required for your company to provide LNP, if ordered by the Commission?**

A: We have not completed a specific implementation time line yet, but implementation will take a considerable amount of time.

**Q: In your experience as the general manager of Alliance and Splitrock, have you seen increases or additions to the itemized fees on your customer's telephone bills?**

A: Yes.

**Q: What do you expect your customer's reaction to be to any new LNP fees on their bills?**

A: I would expect the reaction to be very negative.

**Q: Is the public interest, convenience, and necessity served by requiring your company to implement LNP at this time?**

A, No. The current demand for LNP appears to be non-existent, as no customers have requested LNP and the cost of LNP is significant.

**Q: Does this conclude your direct testimony?**

A: Yes.

BEFORE THE PUBLIC UTILITIES COMMISSION

RECEIVED

OF THE STATE OF SOUTH DAKOTA

JUN 15 2004

IN THE MATTER OF THE PETITION  
OF ALLIANCE COMMUNICATIONS  
COOPERATIVE, INC. AND SPLITROCK  
PROPERTIES, INC. FOR SUSPENSION  
OR MODIFICATION OF § 251(b)(2) OF  
THE COMMUNICATIONS ACT OF 1934  
AS AMENDED

Docket No. TC04-055

SOUTH DAKOTA PUBLIC  
UTILITIES COMMISSION

REBUTTAL TESTIMONY

OF DON SNYDERS

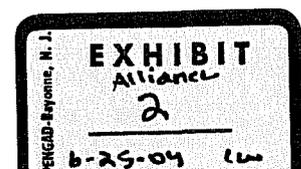

REBUTTAL TESTIMONY OF

DON SNYDERS

ON BEHALF OF

ALLIANCE COMMUNICATIONS COOPERATIVE, INC.  
AND SPLITROCK PROPERTIES, INC.

June 14, 2004

1 Q. Please state your name, business name and address.

2 A. **My name is Don Snyders. I am the General Manager of Alliance Communications**  
3 **Cooperative, Inc. and Splitrock Properties, Inc. (collectively "Alliance"), whose ad-**  
4 **dress is 612 Third Street, Garretson, South Dakota 57030.**

5 Q. What is the purpose of your testimony?

6 A. **I will provide rebuttal testimony to various statements made by Ron Williams in his**  
7 **testimony filed on May 28, 2004 on behalf of WWC License L.L.C. (Western Wire-**  
8 **less).**

9 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners "waited 4 months to seek  
10 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
11 their legal obligations." How do you respond?

12 A. **I dispute Mr. Williams' characterization of events as baseless and inflammatory.**  
13 **Once the FCC made it clear that wireline carriers would be required to port num-**  
14 **bers to wireless carriers in areas outside the top 100 MSAs by May 24, 2004, Alli-**  
15 **ance took immediate steps to investigate the cost and the processes involved with**  
16 **LNP and to explore its legal options. Because Alliance had no experience with LNP,**  
17 **it took time to gather the pertinent information and to make the decision to seek a**  
18 **suspension of the requirement from the Commission. Further, the suspension peti-**  
19 **tion itself took time and effort to prepare because Alliance wanted to present as**  
20 **complete a petition as possible, accompanied by cost information as complete as**  
21 **possible.**

22 Q. Do you agree with Mr. Williams' statement at page 14, lines 19-22, in which he states  
23 that "LECs will need to route a call to a ported number to the serving tandem" and to Mr.  
24 Williams' statement at page 15, lines 1-4 when he discusses the routing of allegedly "lo-  
25 cal calls?"

1 A. In its answer to Interrogatory 4., Western Wireless identifies the “serving tandem”  
2 as the Qwest LATA or local tandem, which is outside of Alliance’s service territory.  
3 (See Western Wireless Response to Interrogatory 4., attached to the Rebuttal Tes-  
4 timony of Steven E. Watkins). Therefore, Mr. Williams’ statement is not consistent  
5 with the interconnection agreement signed by Alliance and Western Wireless. Pur-  
6 suant to that agreement, Alliance did not agree to route traffic destined for Western  
7 Wireless to the serving tandem. Rather, traffic terminating to Western Wireless is  
8 routed to an interexchange carrier. Therefore, it appears that Western Wireless’  
9 argument really is a bad faith attempt to change the agreement between the parties.

10 Q. At page 19, lines 8-10, Mr. Williams states that it is his belief that “the FCC views that it  
11 is the originating carrier’s responsibility to deliver local traffic for termination and that  
12 the costs associated with fulfilling that responsibility are not a number portability cost.”  
13 What is your response to this statement?

14 A. Mr. Williams’ statements are inconsistent and should be rejected. First he argues  
15 that Alliance should be required to install new facilities to deliver ported calls to  
16 Western Wireless and then he argues that the cost of those facilities are not number  
17 portability costs. Further, as discussed at lines 1-10 above, Mr. Williams’ suggestion  
18 that it is Alliance’s responsibility to deliver traffic destined to Western Wireless  
19 through a serving tandem is not consistent with the interconnection agreement be-  
20 tween Alliance and Western Wireless.

21 Q. At page 20, lines 13-16, Mr. Williams states that “[t]he routing methods proposed by the  
22 Petitioners are inefficient in that they make little or no utilization of existing equipment  
23 and shared facilities currently used to exchange calls with other carriers.” How do you  
24 respond?

1 A. The routing methods reflected in the cost exhibit attached to Alliance's Petition are  
2 based on the current routing arrangements that Alliance has in place with other  
3 carriers, namely, calls that are dialed on a local 7-digit basis are routed via direct  
4 connections. Therefore, if calls to numbers ported to a carrier are to be dialed on a  
5 local 7-digit basis, a direct connection needs to be established between the carriers.

6 Q. Would Western Wireless' routing proposal have impacts to Alliance beyond LNP?

7 A. Yes. It is my understanding that Western Wireless' proposal would increase Alli-  
8 ance's costs. First, Western Wireless' proposal would require Alliance to pay for  
9 new facilities to the tandem provider that it does not need for any purpose other  
10 than to route calls to ported numbers to wireless carriers. Second, Alliance would  
11 most likely have to pay transit traffic charges to the tandem provider for transport-  
12 ing the traffic to the wireless carriers. Third, in response to Interrogatory 16.b.,  
13 Western Wireless indicates that Alliance would be required to pay reciprocal com-  
14 pensation on calls to ported numbers, even if Alliance does not pay compensation on  
15 such calls today. (See Western Wireless Response to Interrogatory 16.b. attached to  
16 the Rebuttal Testimony of Steven E. Watkins.)

17 Q. Is there any other impact?

18 A. Yes. It appears that Western Wireless' proposal would create a regulatory arbi-  
19 trage scenario that could lead to the loss of access revenues. Today, certain calls to  
20 wireless carriers are routed to interexchange carriers. For example, if Alliance Cus-  
21 tomer A calls Western Wireless Customer B, Alliance Customer A incurs a toll  
22 charge. However, under Western Wireless' proposal, it is my understanding that if  
23 Alliance Customer A calls Western Wireless Customer B, who now has a number  
24 ported from Alliance, Alliance Customer A would be charged for a local call. Cus-  
25 tomers may be encouraged to "give up" their existing wireless numbers and obtain

1            **wireline numbers for the sole purpose of porting that number to avoid toll charges.**  
2            **This is not only a bad public policy result, but also simply a bad faith attempt to**  
3            **avoid an important contract provision upon which Western Wireless has already**  
4            **agreed with our company.**

5    Q.    Does this conclude your rebuttal testimony?

6    A.    **Yes.**

CERTIFICATE OF SERVICE

The undersigned hereby certifies that she served a copy of the foregoing **REBUTTAL TESTIMONY** upon the persons herein next designated, on the date below shown, by depositing a copy thereof in the United States mail at Pierre, South Dakota, postage prepaid, in an envelope addressed to each said addressee, to-wit:

**DIRECT TESTIMONY OF TOM BULLOCK  
ON BEHALF OF ALLIANCE COMMUNICATIONS COOP., INC.  
AND SPLITROCK PROPERTIES, INC.  
REGARDING COMPANY-SPECIFIC COST DATA**

May 14, 2004

**DIRECT TESTIMONY OF TOM BULLOCK  
ON BEHALF OF ALLIANCE COMMUNICATIONS COOP., INC.  
AND SPLITROCK PROPERTIES, INC.  
REGARDING COMPANY-SPECIFIC COST DATA**

**Q1. Please State your name, Employer, Business Address and Telephone Number.**

A. My name is Tom Bullock. I am employed with TELEC Consulting Resources Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln Nebraska, 68508. My telephone number is (402) 441-4315.

**Q2. On whose behalf are you testifying?**

A. I am testifying on behalf of the Company identified in the caption of the docket set out above. I will refer to this Company as the "RLEC".

**Q3. Have you provided your background information and an explanation of your role in this Docket in the "companion" testimony that has been offered in this Docket?**

A. Yes, I have.

**Q4. Did you prepare Exhibit 1 to the Petition of the RLEC filed in this Docket?**

A. Yes, in conjunction with members of the professional staff of TELEC, I was responsible for the preparation of Exhibit 1 as was attached to the Petition and I was also responsible for the preparation of supporting information prepared in connection with the responses to the discovery requests of Western Wireless. I was also responsible for the preparation of Exhibit 2 that is attached to this testimony.

**Q5. In your "introductory" testimony you have explained the line items that comprise Exhibit 2 and the process used to compile the data that was used to**

**develop the cost as shown on Exhibit 2. Please discuss where in your “introductory” testimony you describe this process.**

A. The process that was used to compile and develop the cost per line in Exhibit 2 is described on pages six through twenty-one in my “introductory” testimony.

**Q6. What was the source of the data?**

A. The data was derived from the books, financial records and managers of the RLEC. Data was also obtained from switch vendors, engineering consultants, tariffs, service order administration service bureaus, the number portability administration center, a number portability database provider, and my professional experience.

**Q7. What was the purpose of obtaining that particular data?**

A. To assist me in preparing an estimate of the costs to implement LNP for the RLEC.

**Q8. Is this the type of data that experts in your field would ordinarily review in formulating an opinion concerning the costs of LNP?**

A. Yes.

**Q9. What use did you make of the data after you received it from the RLEC?**

A. I have explained the use of the data on pages eleven through twenty-one of my “introductory” testimony.

**Q10. Have you reached an opinion with a reasonable degree of professional certainty as to the total non-recurring costs, excluding transport, to implement LNP that you have calculated for the RLEC that will be recovered over a 5-year recovery period through an end user surcharge?**

A. Yes. My opinion is that the total non-recurring costs, excluding transport, is \$186,895. Such costs were amortized over a recovery period of 60 months using a rate of return of 11.25%. The total nonrecurring costs per month, excluding transport, amortized over five years is \$4,087.

**Q11. Have you reached an opinion with a reasonable degree of professional certainty as to the total recurring costs, excluding transport, to implement LNP that you have calculated for the RLEC and that will be recovered from end users on an ongoing monthly charge basis?**

A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$3,668 per month.

**Q12. Have you reached an opinion with a reasonable degree of professional certainty as to the total cost, excluding transport, per line per month that would be charged to end-users if LNP were to be implemented by the RLEC?**

A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding the total nonrecurring costs per month amortized over five years to the total recurring costs per month, both amounts excluding transport costs, and dividing this sum by the RLEC's total access lines. The resulting cost per line per month was calculated to be \$0.91.

**Q13. Have you reached an opinion with a reasonable degree of professional certainty as to the total LNP costs and the monthly amount recovered from each end-user if the FCC determines that transport costs should be included in the LNP costs recovered from end-users?**

A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring costs, including transport costs, were calculated to be \$23,515 per month. The resulting LNP cost per line, per month, including transport, was calculated to be \$2.75.

**Q14. If FCC determines that transport costs should not be included in the end-user surcharge, will the transport cost still be incurred and who will pay these costs?**

A. Transport costs will have to be incurred to transport calls outside of the RLEC's service area. If the cost is not recovered through an end-user surcharge, and if these costs are not recovered from the wireless carrier, then the only party to pay these costs would be the RLEC.

**Q15. Is it your opinion that the calculations that you have just described fairly and reasonably describe the non-recurring and recurring costs for the RLEC to implement LNP and the end user charges to recover such costs?**

A. Yes.

**Q16. Does this conclude your testimony?**

A. Yes, it does.

REGARDING COMPANY-SPECIFIC COST DATA**

May 14, 2004

**DIRECT TESTIMONY OF TOM BULLOCK ON BEHALF OF  
MCCOOK COOPERATIVE TELEPHONE COMPANY  
REGARDING COMPANY-SPECIFIC COST DATA**

**Q1. Please State your name, Employer, Business Address and Telephone Number.**

A. My name is Tom Bullock. I am employed with TELEC Consulting Resources Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln Nebraska, 68508. My telephone number is (402) 441-4315.

**Q2. On whose behalf are you testifying?**

A. I am testifying on behalf of the Company identified in the caption of the docket set out above. I will refer to this Company as the "RLEC".

**Q3. Have you provided your background information and an explanation of your role in this Docket in the "companion" testimony that has been offered in this Docket?**

A. Yes, I have.

**Q4. Did you prepare Exhibit 1 to the Petition of the RLEC filed in this Docket?**

A. Yes, in conjunction with members of the professional staff of TELEC, I was responsible for the preparation of Exhibit 1 as was attached to the Petition and I was also responsible for the preparation of supporting information prepared in connection with the responses to the discovery requests of Western Wireless. I was also responsible for the preparation of Exhibit 2 that is attached to this testimony.

**Q5. In your "introductory" testimony you have explained the line items that comprise Exhibit 2 and the process used to compile the data that was used to develop the cost as shown on Exhibit 2. Please discuss where in your "introductory" testimony you describe this process.**

A. The process that was used to compile and develop the cost per line in Exhibit 2 is described on pages six through twenty-one in my “introductory” testimony.

**Q6. What was the source of the data?**

A. The data was derived from the books, financial records and managers of the RLEC. Data was also obtained from switch vendors, engineering consultants, tariffs, service order administration service bureaus, the number portability administration center, a number portability database provider, and my professional experience.

**Q7. What was the purpose of obtaining that particular data?**

A. To assist me in preparing an estimate of the costs to implement LNP for the RLEC.

**Q8. Is this the type of data that experts in your field would ordinarily review in formulating an opinion concerning the costs of LNP?**

A. Yes.

**Q9. What use did you make of the data after you received it from the RLEC?**

A. I have explained the use of the data on pages eleven through twenty-one of my “introductory” testimony.

**Q10. Have you reached an opinion with a reasonable degree of professional certainty as to the total non-recurring costs, excluding transport, to implement LNP that you have calculated for the RLEC that will be recovered over a 5-year recovery period through an end user surcharge?**

A. Yes. My opinion is that the total non-recurring costs, excluding transport, is \$88,103. Such costs were amortized over a recovery period of 60 months using a

rate of return of 11.25%. The total nonrecurring costs per month, excluding transport, amortized over five years is \$1,927.

**Q11. Have you reached an opinion with a reasonable degree of professional certainty as to the total recurring costs, excluding transport, to implement LNP that you have calculated for the RLEC and that will be recovered from end users on an ongoing monthly charge basis?**

A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$1,502 per month.

**Q12. Have you reached an opinion with a reasonable degree of professional certainty as to the total cost, excluding transport, per line per month that would be charged to end-users if LNP were to be implemented by the RLEC?**

A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding the total nonrecurring costs per month amortized over five years to the total recurring costs per month, both amounts excluding transport costs, and dividing this sum by the RLEC's total access lines. The resulting cost per line per month was calculated to be \$1.91.

**Q13. Have you reached an opinion with a reasonable degree of professional certainty as to the total LNP costs and the monthly amount recovered from each end-user if the FCC determines that transport costs should be included in the LNP costs recovered from end-users?**

A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring costs, including transport costs, were calculated to be \$15,016 per month. The re-

sulting LNP cost per line, per month, including transport, was calculated to be \$8.38.

**Q14. If FCC determines that transport costs should not be included in the end-user surcharge, will the transport cost still be incurred and who will pay these costs?**

A. Transport costs will have to be incurred to transport calls outside of the RLEC's service area. If the cost is not recovered through an end-user surcharge, and if these costs are not recovered from the wireless carrier, then the only party to pay these costs would be the RLEC.

**Q15. Is it your opinion that the calculations that you have just described fairly and reasonably describe the non-recurring and recurring costs for the RLEC to implement LNP and the end user charges to recover such costs?**

A. Yes.

**Q16. Does this conclude your testimony?**

A. Yes, it does.

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

IN THE MATTER OF THE PETITION  
OF McCOOK COOPERATIVE TELE-  
PHONE COMPANY FOR SUSPENSION  
OR MODIFICATION OF § 251(b)(2) OF  
THE COMMUNICATIONS ACT OF 1934  
AS AMENDED

Docket No. TC04-049

**DIRECT PRE-FILED TESTIMONY OF  
BRYAN ROTH**

May 14, 2004

1 **Q: Please state your business name and address?**

2 A: I am Bryan K. Roth, McCook Cooperative Telephone Company, 330 South  
3 Nebraska, Salem, SD 57058

4 **Q: By whom are you employed and in what capacity?**

5 A: I am employed by McCook Cooperative Telephone Company (McCook) as their  
6 General Manager. McCook is a rural independent local exchange carrier that  
7 provides local exchange services and support to our telecommunication customers.  
8 Our local exchange customers number approximately 2131, with approximately 90  
9 of those being lifeline customers in our six exchanges of Alexandria, Canova,  
10 Center, Salem, Spencer and Winfred, all of which are in the state of South Dakota.

11

12 **Q: Does your company have any direct points of interconnection with any**  
13 **wireless carrier and/or does your company provide any blocks of numbers for**  
14 **your company's rate centers to any wireless carrier?**

15 A: Yes, we have a direct point of interconnection with a Wireless carrier. No, we do  
16 not provide any blocks of numbers to any carrier(s).

17 **Q: How do the local calling areas of your exchanges compare with those of the**  
18 **wireless carriers operating in your area?**

19 A: Wireless service areas are much more extensive.

20 **Q: Does your company provide any Extended Area Service (EAS) plans to its**  
21 **subscribers or to a connecting carrier's subscribers?**

22 A: Yes, McCook provides EAS between the exchanges of Canova, Center, Spencer  
23 and Winfred. We also have EAS between our exchanges of Salem/Center and

1 Salem/Spencer. EAS is also available between Canova/Howard and  
2 Winfred/Madison

3 **Q: What is the current method of routing calls from your subscriber's landline**  
4 **phones to wireless phone numbers?**

5 A: Depending on which wireless carrier the call is routed to, the call is treated as a toll  
6 call. Our subscriber will be billed a toll charge by the Inter-exchange carrier of  
7 their choice which terminated the call to the wireless carrier. Landline calls from  
8 our exchanges of Center, Salem and Spencer to a 605-421 Verizon Wireless  
9 customer are treated as a local call and routed thru the established direct  
10 interconnection trunks to Verizon Wireless.

11 **Q: Have any subscribers requested local number portability (LNP) from your**  
12 **company?**

13 A: No.

14 **Q: Since the passage of the 1996 Telecom Act have any wireline carriers ever**  
15 **requested LNP from your company?**

16 A: No.

17 **Q: Have any wireless carriers requested LNP?**

18 A: Yes.

19 **Q: How much time would be required for your company to provide LNP, if**  
20 **ordered by the Commission?**

21 A: We have not completed a specific implementation time line yet, but implementation  
22 will take a considerable amount of time.

23

1 **Q: In your experience as the general manager of McCook have you seen increases**  
2 **or additions to the itemized fees on your customer's telephone bills?**

3 A. Yes

4 **Q: What do you expect your customer's reaction to be to any new LNP fees on**  
5 **their bills?**

6 A. I would expect the reaction to be very negative.

7 **Q: Is the public interest, convenience, and necessity served by requiring your**  
8 **company to implement LNP at this time?**

9 A, No, since we have not received a customer request for LNP

10 **Q: Does this conclude your direct testimony?**

11 A: Yes

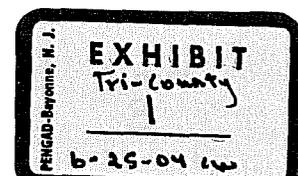

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

IN THE MATTER OF THE PETITION  
OF TRI-COUNTY TELCOM, INC., FOR  
SUSPENSION OR MODIFICATION OF  
§251(b)(2) OF THE COMMUNICA-  
TIONS ACT OF 1934 AS AMENDED

Docket No. TC04-084

DIRECT TESTIMONY OF TOM BULLOCK  
ON BEHALF OF TRI-COUNTY REGARDING  
COMPANY-SPECIFIC COST DATA

May 14, 2004

1 A. The process that was used to compile and develop the cost per line in Exhibit 2 is  
2 described on pages six through twenty-one in my “introductory” testimony.

3 **Q6. What was the source of the data?**

4 A. The data was derived from the books, financial records and managers of the  
5 RLEC. Data was also obtained from switch vendors, engineering consultants, tar-  
6 iffs, service order administration service bureaus, the number portability admini-  
7 stration center, a number portability database provider, and my professional ex-  
8 perience.

9 **Q7. What was the purpose of obtaining that particular data?**

10 A. To assist me in preparing an estimate of the costs to implement LNP for the  
11 RLEC.

12 **Q8. Is this the type of data that experts in your field would ordinarily review in  
13 formulating an opinion concerning the costs of LNP?**

14 A. Yes.

15 **Q9. What use did you make of the data after you received it from the RLEC?**

16 A. I have explained the use of the data on pages eleven through twenty-one of my  
17 “introductory” testimony.

18 **Q10. Have you reached an opinion with a reasonable degree of professional cer-  
19 tainty as to the total non-recurring costs, excluding transport, to implement  
20 LNP that you have calculated for the RLEC that will be recovered over a 5-  
21 year recovery period through an end user surcharge?**

22 A. Yes. My opinion is that the total non-recurring costs, excluding transport, is  
23 \$40,354. Such costs were amortized over a recovery period of 60 months using a

1 rate of return of 11.25%. The total nonrecurring costs per month, excluding trans-  
2 port, amortized over five years is \$882.

3 **Q11. Have you reached an opinion with a reasonable degree of professional cer-**  
4 **tainty as to the total recurring costs, excluding transport, to implement LNP**  
5 **that you have calculated for the RLEC and that will be recovered from end**  
6 **users on an ongoing monthly charge basis?**

7 A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$767 per month.

8 **Q12. Have you reached an opinion with a reasonable degree of professional cer-**  
9 **tainty as to the total cost, excluding transport, per line per month that would**  
10 **be charged to end-users if LNP were to be implemented by the RLEC?**

11 A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding  
12 the total nonrecurring costs per month amortized over five years to the total recur-  
13 ring costs per month, both amounts excluding transport costs, and dividing this  
14 sum by the RLEC's total access lines. Surcharges and taxes were then applied to  
15 this quotient. The resulting cost per line per month was calculated to be \$4.38.

16 **Q13. Have you reached an opinion with a reasonable degree of professional cer-**  
17 **tainty as to the total LNP costs and the monthly amount recovered from each**  
18 **end-user if the FCC determines that transport costs should be included in the**  
19 **LNP costs recovered from end-users?**

20 A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring  
21 costs, including transport costs, were calculated to be \$4,217 per month. The re-  
22 sulting LNP cost per line, per month, including transport, surcharges and taxes,  
23 was calculated to be \$11.20.

1 **Q14. If FCC determines that transport costs should not be included in the end-**  
2 **user surcharge, will the transport cost still be incurred and who will pay**  
3 **these costs?**

4 A. Transport costs will have to be incurred to transport calls outside of the RLEC's  
5 service area. If the cost is not recovered through an end-user surcharge, and if  
6 these costs are not recovered from the wireless carrier, then the only party to pay  
7 these costs would be the RLEC.

8 **Q15. Is it your opinion that the calculations that you have just described fairly and**  
9 **reasonably describe the non-recurring and recurring costs for the RLEC to**  
10 **implement LNP and the end user charges to recover such costs?**

11 A. Yes.

12 **Q16. Does this conclude your testimony?**

13 A. Yes, it does.

**DIRECT TESTIMONY OF DAN DAVIS  
ON BEHALF OF WESTERN TELEPHONE COMPANY  
REGARDING COMPANY-SPECIFIC COST DATA**

**Q1. Please State your name, Employer, Business Address and Telephone Number.**

A. My name is Dan Davis. I am employed with TELEC Consulting Resources Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln Nebraska, 68508.

**Q2. On whose behalf are you testifying?**

A. I am testifying on behalf of the Company identified in the caption of the docket set out above. I will refer to this Company as the "RLEC".

**Q3. Have you provided your background information and an explanation of your role in this Docket in the "companion" testimony that has been offered in this Docket?**

A. Yes, I have.

**Q4. Did you prepare Exhibit 1 to the Petition of the RLEC filed in this Docket?**

A. Yes, in conjunction with members of the professional staff of TELEC, I was responsible for the preparation of Exhibit 1 as was attached to the Petition and I was also responsible for the preparation of supporting information prepared in connection with the responses to the discovery requests of Western Wireless. I was also responsible for the preparation of Exhibit 2 that is attached to this testimony.

**Q5. In your "companion" testimony you have explained the line items that comprise Exhibit 2 and the process used to compile the data that was used to develop the cost as shown on Exhibit 2. Please discuss where in your "companion" testimony you describe this process.**

1 A. The process that was used to compile and develop the cost per line in Exhibit 2 is  
2 described on pages four through six in my “companion” testimony.

3 **Q6. What was the source of the data?**

4 A. The data was derived from the books, financial records and managers of the  
5 RLEC. Data was also obtained from switch vendors, engineering consultants, tar-  
6 iffs, service order administration service bureaus, the number portability admini-  
7 stration center, a number portability database provider, and my professional ex-  
8 perience.

9 **Q7. What was the purpose of obtaining that particular data?**

10 A. To assist me in preparing an estimate of the costs to implement LNP for the  
11 RLEC.

12 **Q8. Is this the type of data that experts in your field would ordinarily review in  
13 formulating an opinion concerning the costs of LNP?**

14 A. Yes.

15 **Q9. What use did you make of the data after you received it from the RLEC?**

16 A. I have explained the use of the data on page six of my “companion” testimony.

17 **Q10. Have you reached an opinion with a reasonable degree of professional cer-  
18 tainty as to the total non-recurring costs, excluding transport, to implement  
19 LNP that you have calculated for the RLEC that will be recovered over a 5-  
20 year recovery period through an end user surcharge?**

21 A. Yes. My opinion is that the total non-recurring costs, excluding transport, is  
22 \$176,780.00. Such costs were amortized over a recovery period of 60 months us-

1 ing a rate of return of 11.25%. The total nonrecurring costs per month, excluding  
2 transport, amortized over five years is \$3,866.00.

3 **Q11. Have you reached an opinion with a reasonable degree of professional cer-**  
4 **tainty as to the total recurring costs, excluding transport, to implement LNP**  
5 **that you have calculated for the RLEC and that will be recovered from end**  
6 **users on an ongoing monthly charge basis?**

7 A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$419.00 per  
8 month.

9 **Q12. Have you reached an opinion with a reasonable degree of professional cer-**  
10 **tainty as to the total cost, excluding transport, per line per month that would**  
11 **be charged to end-users if LNP were to be implemented by the RLEC?**

12 A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding  
13 the total nonrecurring costs per month amortized over five years to the total recur-  
14 ring costs per month, both amounts excluding transport costs, and dividing this  
15 sum by the RLEC's total access lines. Surcharge and taxes were then applied to  
16 this quotient. The resulting cost per line per month was calculated to be \$4.56.

17 **Q13. Have you reached an opinion with a reasonable degree of professional cer-**  
18 **tainty as to the total LNP costs and the monthly amount recovered from each**  
19 **end-user if the FCC determines that transport costs should be included in the**  
20 **LNP costs recovered from end-users?**

21 A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring  
22 costs, including transport costs, were calculated to be \$9,311.00 per month. The

1 resulting LNP cost per line, per month, including transport, surcharges and taxes,  
2 was calculated to be \$9.91.

3 **Q14. If FCC determines that transport costs should not be included in the end-**  
4 **user surcharge, will the transport cost still be incurred and who will pay**  
5 **these costs?**

6 A. Transport costs will have to be incurred to transport calls outside of the RLEC's  
7 service area. If the cost is not recovered through an end-user surcharge, and if  
8 these costs are not recovered from the wireless carrier, then the only party to pay  
9 these costs would be the RLEC.

10 **Q15. Is it your opinion that the calculations that you have just described fairly and**  
11 **reasonably describe the non-recurring and recurring costs for the RLEC to**  
12 **implement LNP and the end user charges to recover such costs?**

13 A. Yes.

14 **Q16. Does this conclude your testimony?**

15 A. Yes, it does.

16

**Western Telephone Company**  
**Total Estimated LNP Non-recurring and Recurring Costs**

		With Surcharges/ Taxes
<b>LNP Non-recurring Costs</b>		
Switch Upgrade Costs	\$ 145,987	
Internal Business Procedure Changes (1)	\$ 8,589	
Intercarrier Testing	\$ 1,970	
Other Internal Costs (2)	\$ 19,062	
LNP Query set up	\$ 190	
SOA Non-recurring set up charge (3)	\$ -	
Customer Notification Costs	\$ 982	
Total Non-recurring Costs excluding transport	<u>\$ 176,780</u>	
Non recurring transport charges (4)	\$ 1,401	
Total Non-recurring Costs including transport	\$ 178,181	
<b>LNP Monthly Recurring Costs</b>		
SOA Monthly Charge	\$ 135	
LNP Query Costs per month	\$ 150	
Other Recurring Costs	\$ 134	
Total Recurring Monthly Costs excluding Transport	\$ 419	
Transport	\$ 4,996	
Total Recurring Monthly Costs including Transport	\$ 5,415	
<b>Monthly Cost Calculations per line</b>		
Total Nonrecurring cost per month excluding transport amortized over five years	\$ 3,866	
Total Nonrecurring cost per month including transport amortized over five years	\$ 3,896	
Total cost per month excluding transport	\$ 4,285	
Total cost per month including transport	\$ 9,311	
Access Lines excluding Lifeline	1,080	
LNP cost per line per month excluding transport (5)	\$ 3.97	\$ 4.56
LNP cost per line per month including transport (5)	\$ 8.62	\$ 9.91

(1) Cost required to analyze and modify existing processes and systems in order to receive and process a request for porting.

(2) Other internal costs include reviewing porting agreements with wireless carriers, completing trading partner profile requests from wireless carriers, completing contracts with the SOA and NPAC, and developing and filing tariffs and documentation for the LNP end-user surcharge and local rate increases.

(3) Service Order Administration (SOA) provides the functionality to interface the LEC's order and provisioning systems in order to update the Number Portability Administration Center (NPAC) for access by all other carriers. Through the use of a SOA, a company is able to submit porting information to the NPAC.

(4) Transport costs will be incurred if the FCC requires LECs to install and absorb the cost of facilities to wireless carriers in order to route calls to ported numbers on a seven-digit dialed basis.

(5) Total costs do not include system changes required to shorten the porting interval or expanding a LEC's local calling area as contemplated by the FCC in its FNPRM.

DIRECT TESTIMONY OF DAN DAVIS  
ON BEHALF OF THE ABOVE-NAMED COMPANIES

May 14, 2004

1 **Introduction**

2  
3 A. Witness Background

4  
5 Q. **Please State your Name, Employer, Business Address and Telephone Num-**  
6 **ber.**

7  
8 A. My name is Dan Davis. I am employed with TELEC Consulting Resources Inc.  
9 My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln, Nebraska,  
10 68508.

11 Q. **On whose behalf are you testifying?**

12  
13 A. I am testifying on behalf of the Companies identified in the caption above which I  
14 will refer to as the "RLECs". Each of the RLECs provides local telephone ex-  
15 change service and exchange access services in rural areas of South Dakota.  
16 Each of the RLECs is engaged in the provision of general telecommunications  
17 services in the State of South Dakota.

18 Q. **What is your current position?**

19  
20 A. I am a senior consultant at TELEC Consulting.

21  
22 Q. **What are your duties and responsibilities at TELEC Consulting Resources?**

23  
24 A. I am responsible for consulting with clients regarding regulatory, financial and  
25 interconnection issues.

26 Q. **What was your professional experience prior to your current position?**

27  
28 A. I have worked in the telecommunications industry for 19 years. Prior to my posi-  
29 tion with TELEC, I worked at Aliant Communications (later merged with ALL-  
30 TEL) as the Regulatory/Financial manager of its Nebraska CLEC operation. Prior

1 to that I worked for Aliant Communications in the areas of Regulatory Policy and  
2 Separations and Access.

3 Q. **What is your educational background?**

4  
5 A. I have a Master's degree in Finance and a Bachelor's degree in Business from the  
6 University of Nebraska.

7 Q. **What is the purpose of your testimony?**

8  
9 A. The purpose of my testimony is to support the applications filed pursuant to Sec-  
10 tion 251(f)(2) of the Telecommunications Act of 1934 as amended ("the Act")  
11 and South Dakota Codified Laws SDCL § 49-31-80, by each of the RLECs. Spe-  
12 cifically, I will address the costs developed by each of the RLECs' personnel and  
13 TELECOM that were identified as costs that would be incurred for the provision of  
14 LNP. These costs serve as support for each of the RLECs' contention that a sus-  
15 pension or modification of the FCC's wireline-to-wireless LNP requirement is  
16 necessary pursuant to Section 251(f)(2)(A)(i) of the Act, to avoid a significant  
17 adverse economic impact on telecommunications users generally, or pursuant to  
18 Section 251(f)(2)(A)(ii) to avoid imposing a requirement that is unduly economi-  
19 cally burdensome.

20 Q. **Will you please explain your professional experience that was used in assist-**  
21 **ing the RLECs to develop their costs?**

22  
23 A. Yes, I will. As I stated earlier, I previously held the position of CLEC Regula-  
24 tory/Finance Manager for Aliant Communications' start-up CLEC operation. As  
25 the CLEC Regulatory/Finance Manager, I was involved in many of the CLEC's  
26 implementation activities, including LNP. Although I was not directly responsi-

1 ble for the implementation of LNP, I was responsible for interfacing with the  
2 Qwest Wholesale Management team on issues relating to LNP. In addition, I had  
3 the responsibility of tracking the costs of the CLEC's customer support operations  
4 and network management, where the direct responsibility for LNP implementa-  
5 tion resided.

6 As part of the CLEC implementation team, I attended a Qwest training session on  
7 LNP. As part of the training session, I toured the Qwest service facilities where  
8 local service request forms ("LSRs") and firm order confirmation forms ("FOCs")  
9 were processed. At that time, the Qwest automated IMA system was in develop-  
10 ment, thus Qwest was processing many LSRs and FOCs through their systems  
11 manually. Many of the RLECs would process LSRs and FOCs through their sys-  
12 tems manually if LNP were required to be implemented.

13 As the regulatory manager and as a consultant, I have negotiated many intercon-  
14 nection agreements and have completed documentation required by service order  
15 administrators ("SOAs") and Neustar. In addition, I have compiled data neces-  
16 sary to file tariffs at both the state and federal levels.

17 Q. **Will you please explain the process used to compile and develop the cost per**  
18 **line in Exhibit 2 as compiled for each of the RLECs?**

19  
20 A. Yes, I will. After the FCC released its November 10, 2003 Order on wireline to  
21 wireless LNP, personnel representing each of the RLECs and TELECOM Consulting  
22 personnel began an in-depth analysis of new processes which would be required  
23 for RLEC's to implement LNP and costs that would have to be incurred to im-  
24 plement LNP. We specifically discussed and analyzed administrative require-

1           ments such as registering with the Number Portability Administration Center  
2           (“NPAC”), SOAs and service bureau options, technical interfaces with the service  
3           bureau, provisioning processes, switch upgrades, query services, cost recovery  
4           and LNP end user charges and tariff filing requirements. In addition, we analyzed  
5           other requirements necessary to implement wireline to wireless LNP based upon  
6           the FCC’s November 10, 2003 Order.

7    **Q.    Will you please explain the information that TELECOM requested the RLECs to**  
8    **review, analyze, and compile regarding the implementation of LNP?**

9  
10   **A.**    Yes, I will. TELECOM specifically requested for each RLEC to obtain a price quote  
11           from its switch vendor for LNP capability (including installation) in each switch.  
12           Estimated costs of implementing LNP, such as switch translation changes and ad-  
13           ditional signaling links, were requested.    In addition, TELECOM requested that each  
14           RLEC analyze in detail the modifications to its internal processes that would be  
15           required as a result of LNP implementation and the costs of those modifications.  
16           Specifically, each RLEC was to analyze the requirements necessary to develop in-  
17           ternal provisioning processes that would allow the company to process an order  
18           for LEC-to-wireless LNP interfaces. TELECOM provided each RLEC with an initial  
19           list of issues and types of costs to consider. TELECOM also requested for each com-  
20           pany to estimate how many hours executive and general management would  
21           spend in reviewing the November 10, 2003 Order, researching the implications of  
22           LNP, and attending seminars and conference calls that specifically addressed or  
23           would address LNP. TELECOM requested that each company also estimate the costs  
24           that would be incurred to notify customers of any LNP end-user surcharge. Fi-

1 nally, TELEEC requested that each RLEC develop the cost that would be required  
2 to transport calls to each wireless provider's point of interconnection within the  
3 LATA in which each end-office is located. I will address each of these compo-  
4 nents in my explanation of Exhibit 2.

5 Q. **Will you please identify the processes for which TELEEC analyzed and devel-**  
6 **oped costs on behalf of the RLECs?**

7  
8 A. Yes, I will. TELEEC reviewed SOA service bureau options and the cost incurred  
9 for connectivity to the service bureau and the estimated monthly costs for each in-  
10 terface option. TELEEC determined the pricing for LNP query service including  
11 the one-time implementation fee and the per query charge based upon pricing  
12 provided by a query service provider. TELEEC provided input on the number of  
13 hours required for negotiating and establishing inter-company porting agreements,  
14 completing trading partner profile requests, establishing and finalizing contracts  
15 with a SOA and with the NPAC, and the time and cost to file tariffs with the FCC.  
16 TELEEC also estimated the time and costs for inter-carrier testing, the monthly  
17 costs of processing porting requests, and customer notification cost if it was not  
18 provided by the company. I will explain each of these components in my expla-  
19 nation of Exhibit 2.

20 Q. **Will you please explain what was done with the information that was com-**  
21 **plied?**

22  
23 A. Yes, I will. After all of the data was compiled, the costs that were developed  
24 were entered onto an Excel spreadsheet under specific non-recurring and recur-  
25 ring cost categories. The total non-recurring costs and the total recurring costs

1 were calculated which were then used to calculate a total cost per access line.  
2 This information formed the basis for Exhibit 1 that was filed with each of the  
3 RLEC's Petitions. Since that time, I have performed a more thorough analysis of  
4 these costs, taking into account, additional data that I received from the RLECs  
5 and from providers of LNP services. This further analysis is reflected in the re-  
6 sults shown on Exhibit 2.

7 Q. **Will you please explain what costs are represented by the line item entitled**  
8 **“Switch Upgrade Costs” on the page titled “Exhibit 2” attached to each of**  
9 **the RLECs’ applications?**

10  
11 A. Yes. In general, switch upgrade costs are those that are incurred that allow a  
12 switch to launch a query to the number portability database over the SS7 network  
13 to determine whether a telephone number has been ported and the Location Rout-  
14 ing Number (“LRN”) for the switch that serves the ported number. Switch up-  
15 grade costs also include any costs that are required to update switch translation  
16 tables that will associate the LRN of the new service provider’s switch or Point of  
17 Interconnection (“POI”) with the trunk group number for outgoing traffic to that  
18 service provider. When the response comes back from the database query with  
19 the LRN, the routing table will cause the call to be routed down the appropriate  
20 trunk group for call completion.

21 Q. **Will you please explain what costs are represented on the line item on Ex-**  
22 **hibit 2 entitled “Internal Business Procedure Changes”?**

23  
24 A. Yes, I will. These are costs associated with modifying the internal processes that  
25 the RLECs, use to enable the processing of a request for porting a number. The  
26 nine slides, obtained from Neustar and EasyPorting.com and attached to this tes-

1 timony as Exhibit A, are useful to review to obtain an understanding of LNP op-  
2 erations flows. Once an understanding of the LNP operations flows had been ac-  
3 quired by the RLECs, each was able to review their current operations flows and  
4 determine the modifications that would be required for LNP.

5 Page N1 shows the main process flow commencing with an end-user contacting  
6 the new service provider. The new service provider contacts the old service pro-  
7 vider by sending an LSR. The old service provider validates the information on  
8 the LSR. The old service provider communicates with the new service provider  
9 by sending an FOC. Both the old service provider and the new service provider  
10 contact their SOA. The old service provider enters data obtained from the LSR  
11 onto a web interface with the SOA. Assuming there are no conflicts or that the  
12 end user does not change his or her mind, on the due date, the Number Portability  
13 Administration Center or "NPAC" downloads all of the information into the  
14 number portability databases and the order should then complete. These obvi-  
15 ously are very complicated processes, particularly for rural companies that have  
16 limited resources.

17 Page N2 shows the detailed LNP flow that most carriers must take into considera-  
18 tion in planning modifications to internal processes. Page N3, which is a subpart  
19 of Page N1, shows the exchange of the LSR and FOC between the wireline and  
20 wireless provider. Page N4, which is a subpart of Page N1, shows the exchange  
21 of information between the wireline provider and wireless provider with the SOA  
22 or with the NPAC. Page N5 demonstrates how a port is activated without the un-

1 conditional 10 digit trigger. Page N6 demonstrates how a port is activated with  
2 the unconditional 10 digit trigger. Page N7 demonstrates the process flow if there  
3 is a conflict between the old service provider and the new service provider. This  
4 conflict may be caused by incomplete or incorrect data entered on the LSR or it  
5 may be caused by inconsistent data provided to the NPAC by either the new or  
6 old service provider. Page N8 demonstrates the process when an end-user  
7 changes his or her mind and requests that the porting order be cancelled. Page N9  
8 is a continuation of Page N8 . This page also demonstrates the process flow when  
9 the order has been cancelled but in this case, a cancellation notification message  
10 was not provided to the NPAC from the new service provider. Both the new ser-  
11 vice provider and the old service provider must take the appropriate actions re-  
12 lated to internal work orders in order in to resolve the conflict and cancel the or-  
13 der.

14 LNP requires the creation or modification of internal business processes or proce-  
15 dures. The costs included on the line entitled "Internal Business Procedure  
16 Changes" captures the cost to create a process to enable the RLEC to process an  
17 LSR and FOC. Additional activities and costs included on this line of Exhibit 2  
18 are costs involved in researching the changes that need to occur to communicate  
19 with the SOA's service bureau and/or the NPAC and the cost of the actual modi-  
20 fications. Additional costs in this category include training customer service per-  
21 sonnel, researching and complying with industry LSR and FOC standards, chang-  
22 ing and adding service order screens, changing and adding plant management sys-

1           tems for disconnects based upon LSR information, and researching methods to  
2           inventory ported numbers. The costs also include those associated with research-  
3           ing possible communications changes to PSAPs, reviewing different porting ap-  
4           plications between simple and complex ports, researching interfaces with regional  
5           databases, establishing reports that may be required by the Commission or FCC,  
6           and costs of putting the end-user charge on the monthly bill. These are other  
7           types of activities and costs that are included in the category.

8       Q.    **Will you please explain what costs are represented on the line item on Ex-**  
9           **hibit 2 entitled “Intercarrier Testing”?**

10  
11       A.    Yes, I will. The costs included with this subcategory are those costs incurred to  
12           test all of the porting processes prior to processing the first porting request and to  
13           trouble shoot any problems that may occur during the initial phases of LNP im-  
14           plementation. As previously demonstrated, LNP involves many new and compli-  
15           cated processes which must be tested prior to implementation to ensure that orders  
16           for porting will be completed either successfully or with a minimal amount of  
17           failures. All of the process flows described in pages N1 through N10 of Exhibit B  
18           must be tested, including canceled orders and orders when the end-user returns to  
19           the original service provider. The West Coast NPAC Region OPI Testing Sub-  
20           committee identified seven key elements associated with inter-company testing  
21           that commence after carriers have developed and tested their internal processes.

22           The key elements identified are :

- 23           1. Contact Test Partner, 60 days prior to test.
- 24           2. Logical Test Planning, 60 days prior to test start.

- 1           3. Physical Test Planning, 45 days prior to test start.
- 2           4. Final test preparation.
- 3           5. Begin testing by exchanging LSR and FOC information.
- 4           6. Evaluate test results.
- 5           7. Commence commercial porting.

6           These process flows have caused problems for even the larger wireless carriers in  
7           implementing wireless-to-wireless LNP. For example, in a letter to the FCC re-  
8           garding LNP implementation<sup>1</sup>, AT&T Wireless stated that “while AWS con-  
9           ducted intercarrier testing, including bilateral and round robin systems testing, the  
10          other carrier’s clearinghouse vendor implemented its systems based on a differing  
11          interpretation of industry guidelines and suffered periodic outages during the  
12          critical last weeks of testing that hampered adequate testing.” AT&T further  
13          stated in the same letter that “Despite all of these efforts to implement and prepare  
14          for a smooth transition to LNP, the implementation of LNP has not been without  
15          problems for AWS as well as the wireless industry as a whole. LNP is a major  
16          undertaking of great complexity that affects nearly every aspect of carriers’ sys-  
17          tems; this complexity is compounded by the fact that various carriers’ systems  
18          need to interface and communicate with each other seamlessly during a com-  
19          pressed period of time for porting to work smoothly.” I believe AT&T’s experi-  
20          ence demonstrates the complexities of LNP and the need for adequate testing

---

<sup>1</sup> Letter from Douglas I. Brandon, Vice President, External Affairs & Law, AT&T Wireless, addressed to John B. Muleta, Chief, Wireless Telecommunications Bureau, Federal Communications Commission, December 10, 2003.

1 weeks prior to the first porting possibility. It should also be noted that given the  
2 size of each of the RLECs, testing and its related costs would be a significant bur-  
3 den.

4 Q. **Will you please explain what costs are represented on the line item on Ex-**  
5 **hibit 2 entitled “Other Internal Costs”?**

6  
7 A. Yes. The costs that are included in this subcategory are regulatory, consulting,  
8 and legal costs. These are costs that are incurred to negotiate and establish  
9 agreements with NPAC and the SOA, query service entities and service providers  
10 requesting LNP. Also included in this sub-category are costs associated with  
11 completing intercarrier porting forms and trading partner profile forms; establish-  
12 ing, writing and filing a tariff with the FCC for the end-user charge; and compa-  
13 nies’ management on LNP implementation.

14 Q. **Will you please explain what costs are represented on the line entitled “LNP**  
15 **Query set up”?**

16  
17 A. Yes, I will. This is a one time charge that a third party data base provider assesses  
18 on a per point code basis in order to obtain connection with the number portability  
19 databases.

20 Q. **Will you please explain what costs are represented on the line item on Ex-**  
21 **hibit 2 entitled “SOA Non-recurring set-up charge”?**

22  
23 A. Yes, I will. This is a charge that is assessed by the SOA service bureau as a one-  
24 time charge that allows the RLEC to set-up and access the SOA service bureau’s  
25 web interface. An RLEC would enter data received from a wireless carrier onto a  
26 screen accessed through the web. The information entered will ultimately be used  
27 to update the master database with information on the ported number. Once the

1 RLEC receives an LSR from a wireless carrier, the RLEC would enter data from  
2 the LSR, such as the customer's name, address, and due date onto the screen. If  
3 all of the data is correct on the LSR and the data has been entered onto the screen  
4 correctly and assuming the customer does not change his or her mind and cancel  
5 the order, the SOA service bureau will send an "activate" message to the NPAC  
6 on the due date, and the master database is updated with the new record.

7 Although TELEC used the low cost provider in calculating the cost on Exhibit 2,  
8 it is important to note that there could be legitimate business reasons why a com-  
9 pany may choose to use a full-scale service bureau.

10 Q. **Will you please explain the costs that are represented by the line item on Ex-**  
11 **hibit 2 entitled "Customer Notification Costs"?**

12  
13 A. Yes. These are costs that will be incurred to notify and educate customers of the  
14 end-user surcharge that will be assessed on their monthly bill as well as any other  
15 line item on the bill that may increase as the result of LNP implementation.

16 Q. **Will you please explain what costs are represented on the line item on Ex-**  
17 **hibit 2 entitled "Non-recurring transport charges"?**

18  
19 A. Yes, I will. These are the non-recurring costs associated with establishing DS1  
20 trunk groups to each wireless provider's POI in each LATA. If a wireless carrier  
21 has not established a direct connection within an RLEC exchange in which it re-  
22 quests LNP the facilities would need to be provisioned to ensure that the proper  
23 routing and completion of calls to ported numbers occur.

24 Q. **Why are these costs included in the cost analysis?**  
25

1 A. Costs to transport ported calls to a wireless carrier's POI have been included in  
2 our analyses to demonstrate the potential impact that transport costs would have  
3 on the RLECs' end-users if the RLEC must arrange for the transport to accom-  
4 modate LNP.

5 Q. **Will you please explain the costs that are represented on the line item on Ex-**  
6 **hibit 2 entitled "Transport"?**

7  
8 A. Yes. This is the monthly cost of DS1s that would be incurred to provision trans-  
9 port facilities to wireless service providers if the RLECs must provide transport  
10 services outside of their exchange areas. DS1 services have previously been de-  
11 scribed under the line item entitled "Non-recurring transport charges".

12 Q. **Will you please explain the costs that are represented on the line item on Ex-**  
13 **hibit 2 entitled "SOA Monthly Charge"?**

14  
15 A. Yes, I will. This is the monthly cost assessed by a SOA service bureau for access-  
16 ing the SOA's web interface to enter the porting information received from a  
17 wireless carrier on an LSR. SOA services were previously described under the  
18 description entitled "SOA non-recurring set-up charge".

19 Q. **Will you please explain the costs that are represented on the line item on Ex-**  
20 **hibit 2 entitled "LNP Query Costs per month"?**

21  
22 A. Yes, I will. This is the cost that would be assessed by a third party database pro-  
23 vider for the RLEC to query its database to determine if the number has been  
24 ported and, if so, the appropriate LRN to which the call should be routed. This  
25 cost is assessed either on a per-query basis, or in a flat monthly amount if the  
26 number of queries does not reach a minimum level each month.

1 Q. **Will you please explain the costs that are represented on the line item on Ex-**  
2 **hibit 2 entitled “Other Recurring Costs”?**

3  
4 A. Yes, I will. These are the costs that are associated with RLEC personnel process-  
5 ing an LNP order and disconnecting the end-user.

6 Q. **Will you please explain how the “Monthly Cost calculations per line”**  
7 **amounts were calculated?**

8  
9 A. Yes I will. There are four lines of cost derived under the heading “Monthly Cost  
10 Calculations per line”. The first line involves the calculation of the total nonrecur-  
11 ring cost per line per month excluding the cost of transport. The cost on this line  
12 is calculated by amortizing the amount on the line titled “Total Non-recurring  
13 Costs excluding transport” over a 60-month period at the current rate of return of  
14 11.25% as prescribed pursuant to Part 65 of the FCC rules.

15 The second line involves the calculation of the total nonrecurring cost per line per  
16 month including the cost of transport. The cost on this line is calculated by amor-  
17 tizing the amount on the line titled “Total Non-recurring Costs including trans-  
18 port” over a 60-month period at the current rate of return of 11.25% as prescribed  
19 pursuant to Part 65 of the FCC rules.

20 The third line involves the calculation of the total cost per line excluding trans-  
21 port. The cost on this line is calculated by adding the amount as shown on the  
22 “Total Nonrecurring cost per month excluding transport” line with the amount as  
23 shown on the “Total Recurring Monthly Cost excluding Transport” line.

24 The fourth line involves the calculation of the total cost per line including trans-  
25 port. The cost on this line is calculated by adding the amount as shown on the

1 “Total Nonrecurring cost per month including transport” line with the amount as  
2 shown on the “Total Recurring Monthly Cost including Transport” line.

3 Q. **Will you please explain how the LNP cost per line per month is calculated?**

4 A. Yes, I will. The total cost per month excluding transport is divided by the access  
5 lines to derive the LNP cost per line per month excluding transport amount. The  
6 total cost per month including transport is divided by the access lines to derive the  
7 LNP cost per line per month including transport amount.

8 Q. **Has the FCC created a mechanism for carriers to recover carrier-specific  
9 costs directly related to providing LNP from end-users?**

10  
11 A. Yes, it has. The FCC in its Third Report and Order on LNP allowed, but did not  
12 require, incumbent LECs to recover their carrier-specific costs directly related to  
13 providing number portability through a federal charge on end-users.<sup>2</sup> The FCC  
14 determined that incumbent LECs should pro rate the monthly LNP charge over  
15 five years by setting a rate at which the present value of the revenue recovered by  
16 the charge equals the present value of the cost being recovered.<sup>3</sup> The FCC found  
17 that carriers should use a discount rate equal to the rate of return on investment  
18 that the FCC has authorized for regulated interstate access services pursuant to  
19 Part 65 of the FCC rules. Any remaining costs must be recovered through existing  
20 mechanisms available for recovery of general costs.<sup>4</sup>

---

<sup>2</sup> *In the Matter of Telephone Number Portability*, CC Docket 95-116, RM 8535, *Third Report and Order*, Released May 12, 1998, at paragraph 135.

<sup>3</sup> *Id.* at paragraph 143.

<sup>4</sup> *Ibid.*

1 In addition, the FCC found that after a carrier establishes its level end-user charge  
2 in the tariff review process, the FCC would not anticipate that the carrier could  
3 raise the charge during the five-year period unless it could show that the end-user  
4 charge was not reasonable based upon the information available at the time it was  
5 initially set.<sup>5</sup>

6 Q. **If carrier is restricted in its ability to change the LNP tariff charge during 5**  
7 **year period, does this impact how carrier implements LNP?**

8  
9 A. Yes, it does. A carrier can not recover any increase in cost it incurs in the future  
10 through the LNP surcharge once the charge has been approved by the FCC. If a  
11 carrier tries to minimize its cost to implement LNP, it risks exposure to any future  
12 increase in cost. Thus, in order to reduce its exposure to this risk, a carrier may  
13 implement LNP using service providers or systems that may not, in all cases, be  
14 the low cost provider or product.

15 Q. **Has the FCC created a standard that carriers must follow in demonstrating**  
16 **that costs are eligible for recovery through the federal charges recovery**  
17 **mechanism?**

18  
19 A. Yes, it has. In a Memorandum Opinion and Order, the FCC's Common Carrier  
20 Bureau adopted a "but for" test used to identify carrier-specific costs directly re-  
21 lated to LNP. Under this test, costs are eligible for recovery in the FCC LNP end-  
22 user surcharge if they satisfy the following two requirements: (1) the costs would

---

<sup>5</sup> Id. at paragraph 144.

1 not have been incurred by the carrier “but for” the implementation of LNP; and  
2 (2) the costs were incurred “for the provision of” LNP.<sup>6</sup>

3 Q. **Do you believe that all of the costs on Exhibit 2, other than transport costs,**  
4 **are recoverable from the FCC’s LNP end-user charge based upon the stan-**  
5 **dard created by the FCC?**

6  
7 A. I believe that all of the costs as represented on Exhibit 2, with the exception of  
8 surcharges and taxes, meet the standard created by the FCC.

9 Q. **Why is the cost of transport included on Exhibit 2 and does the cost for**  
10 **transport meet the standard created by the FCC?**

11  
12 A. Each of the RLECs has included transport costs to provide full accounting of  
13 costs that may be incurred to implement LNP. It is not clear if the transport cost  
14 can be recovered from end-users through the LNP surcharge, pursuant to the  
15 FCC’s rules.

16 Q. **If some of the costs that are incurred as a consequence of LNP but not recov-**  
17 **ered from the FCC’s end-user surcharge, is it reasonable to include any such**  
18 **costs as part of the total cost on Exhibit 2?**

19  
20 A. Yes. In order to determine the economic impact on end-users, all of the potential  
21 increases in cost that may ultimately be passed on to users must be determined.  
22 These potential costs may be passed through to the users in forms that are in addi-  
23 tion to the FCC’s LNP end-user surcharge.

24 Q. **If the total costs are not allowed to be recovered through the FCC’s end user**  
25 **surcharge, how would the costs excluded from the FCC’s end user surcharge**  
26 **be recovered?**

---

<sup>6</sup> *Telephone Number Portability Cost Classification Proceeding*, CC Docket No. 95-116, RM 8535, *Memo-*  
*randum Opinion and Order*, 13 FCC Rcd, 24495, 24500, Adopted December 14, 1998, at paragraph 10.

1 A. Those costs incurred but excluded from the FCC's end-user surcharge would have  
2 to be passed on to end-users, most likely as an increase in the monthly local rate.  
3 If the costs could not be passed onto the end-user, the RLEC would be forced to  
4 absorb these costs.

5 **Q. The FCC has issued a FNPRM seeking comment on whether it should reduce**  
6 **the current four business day porting interval for intermodal porting. What**  
7 **would happen to the costs on Exhibit 2 if the FCC ultimately rules that the**  
8 **porting interval should be shortened?**  
9

10 A. Although none of the RLECs have quantified the costs to shorten the porting in-  
11 terval, there is consensus within the LEC industry that reducing the porting inter-  
12 val for intermodal porting would significantly increase the costs associated with  
13 implementing wireless number portability. USTA informed the FCC that a reduc-  
14 tion in the porting interval for LECs would require LECs to reconfigure their net-  
15 works at a substantial cost. According to USTA, significant changes to ILECs'  
16 operational support systems and other systems would be required at a substantial  
17 cost.<sup>7</sup> According to Qwest, material changes to the current four-day porting inter-  
18 val would require substantial investment, costs and resources, both system and  
19 human, which would ultimately be recovered from consumers.<sup>8</sup> BellSouth con-  
20 tends that shortening the porting timeframe for intermodal porting would increase  
21 the costs associated with implementing number portability. Requiring carriers of

<sup>7</sup> *In the Matter of Telephone Number Portability*, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, Comments of the United States Telecom Association, CC-Docket No. 95-116, January 20, 2004, at page 6.

<sup>8</sup> *In the Matter of Telephone Number Portability*, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, Comments of Qwest Corporation, CC-Docket No. 95-116, January 20, 2004, at pages 7-8.

1 different sizes and utilizing different systems to undergo extensive modifications  
2 to shorten the porting interval would be a significant financial commitment, which  
3 would necessitate appropriate cost recovery

4 Q. **Why is it important for the Commission to take the cost of a shortened port-**  
5 **ing interval into account?**

6  
7 A. The RLECs contend that the cost that would be incurred to reduce the porting in-  
8 terval could be significant. According to the Office of Advocacy, U.S. Small  
9 Business Administration, large wireline carriers estimate that the costs of recon-  
10 figuration could exceed \$100 million and the Office of Advocacy presumes the  
11 costs for small wireline carriers would be proportional.<sup>9</sup> The Commission cannot  
12 assess the potential total economic impact of LNP on end users without knowing  
13 whether the FCC will shorten the porting interval and if it does, what it may cost  
14 for the RLECs to meet the requirements.

15 Q. **Do you believe that the costs as determined in Exhibit 2 will create a signifi-**  
16 **cant adverse economic impact on users of telecommunication services if LNP**  
17 **is implemented?**

18  
19 A. Yes, it would be a very significant impact on customers. I contend that when the  
20 Commission considers the initial and on-going costs of LNP, the Commission will  
21 determine that such costs create a significant adverse economic impact on users of  
22 telecommunications services. FCC rules allow recovery of certain LNP costs  
23 from carriers or from end users through a monthly surcharge imposed over a five-

---

<sup>9</sup> *In the Matter of Telephone Number Portability*, CTIA Petitions for Declaratory Ruling on Wireline-Wireless Porting Issues, Reply Comments of the Office of Advocacy, U.S. Small Business Administration on the Further Notice of Proposed Rulemaking and Initial Regulatory Flexibility Analysis, CC Docket No. 95-116, February 4, 2004, at page 9.

1 year recovery period.<sup>10</sup> Certain costs associated with LNP cannot be recovered  
2 through the end user LNP surcharge or carrier charges. These costs must be re-  
3 covered, if at all, through the LEC's general rates and charges.

4 These costs will be imposed on end-users who have not requested LNP, but not  
5 on the cost causer. This estimated increase in the local service cost do not include  
6 any cost associated with the provision of transporting calls to ported numbers out-  
7 side of RLEC's local service areas. This cost recovery will have a significant ad-  
8 verse economic impact on users of telecommunications service in the RLEC's  
9 service area.

10 Additional unknown costs of LNP could increase the financial burden. The costs  
11 as set forth in Exhibit 2 do not include any cost associated with reducing the port-  
12 ing interval as contemplated by the FCC in its FNPRM. Such reductions of the  
13 porting interval may require the RLECs to make significant changes to its opera-  
14 tions thereby increasing the cost to provide LNP.<sup>11</sup>

15 Q. **Could the implementation of LNP be unduly economically burdensome for**  
16 **the RLECs?**

17  
18 A. Yes, implementation of LNP will be unduly economically burdensome for the  
19 RLECs. Any costs not recovered through the end-user LNP charge or carrier  
20 charge may have to be borne by the RLECs.

---

<sup>10</sup> 47.C.F.R. § 52.33.

<sup>11</sup> FNPRM, para 45.

1 The estimated costs of LNP, set forth in Exhibit 2, are presented on a per-line ba-  
2 sis. However, there is no certainty that all of the LNP costs will be paid by cur-  
3 rent subscribers of each of the RLECs. As discussed previously in my testimony,  
4 there are potential issues concerning which costs will be borne directly by the cus-  
5 tomer and which costs will be borne by the RLECs. Further, based upon the sub-  
6 stantial increase in the cost per line per month caused by LNP, there is no guaran-  
7 tee that all such costs would ultimately be passed on to the end-user in the form of  
8 a rate increase. The potential costs that may be incurred by the RLECs would be  
9 unduly economically burdensome.

10 As shown, LNP implementation could result in the assessment of a new LNP sur-  
11 charge on the RLECs' telephone subscribers and could increase local rates. These  
12 actions would make the RLECs' service offering less competitive with the ser-  
13 vices provided by wireless carriers. Wireless carriers already enjoy a number of  
14 competitive advantages over wireline carriers. For example, because of their FCC  
15 licensed service areas, wireless carriers have larger local calling areas, larger ser-  
16 vice territories, and more potential customers to absorb the cost of LNP. By in-  
17 creasing the cost of service, LNP would make wireline service less competitive  
18 with wireless service.

19 If all of the LNP costs were assigned completely to the RLECs' subscribers, in-  
20 cluding the cost of transport and the cost of systems upgrades to reduce the port-  
21 ing interval, the large size of the surcharge may cause a segment of the RLECs'  
22 customers to discontinue service. The reduction in line count would not allow for

1 the full recovery of LNP costs, causing a negative impact on the RLECs' revenue,  
2 and would lay the foundation for an ever-escalating burden on the remaining  
3 RLEC subscribers to fund common network costs.

4 Q. **Does this conclude your testimony?**

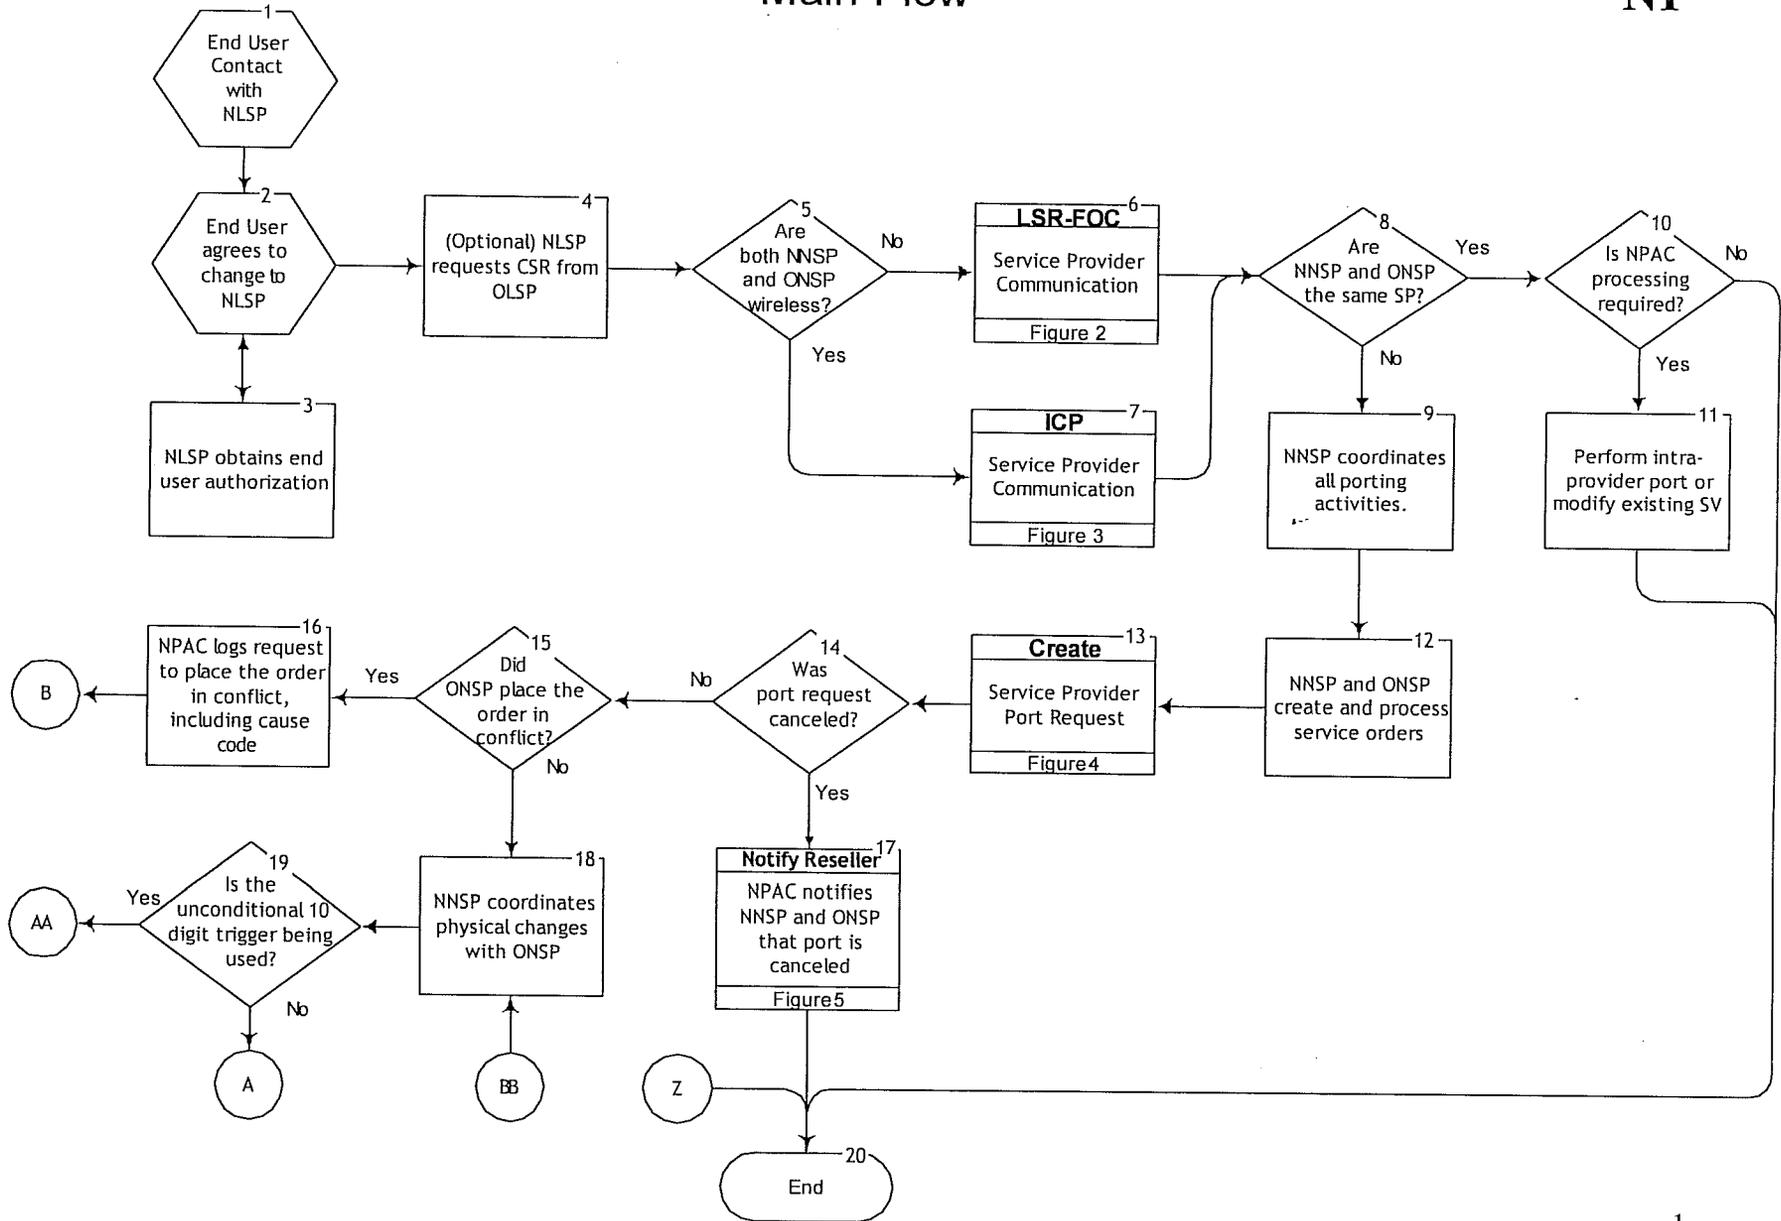

5 A. Yes, it does.

Access Lines excluding Lifeline		2,037
LNP cost per line per month excluding transport (5)	\$ 1.23	\$ 1.41
LNP cost per line per month including transport (5)	\$ 6.15	\$ 7.07

(1) Cost required to analyze and modify existing processes and systems in order to receive and process a request for porting.

(2) Other internal costs include reviewing porting agreements with wireless carriers, completing trading partner profile requests from wireless carriers, completing contracts with the SOA and NPAC, and developing and filing tariffs and documentation for the LNP end-user surcharge and local rate increases.

(3) Service Order Administration (SOA) provides the functionality to interface the LEC's order and provisioning systems in order to update the Number Portability Administration Center (NPAC) for access by all other carriers. Through the use of a SOA, a company is able to submit porting information to the NPAC.

(4) Transport costs will be incurred if the FCC requires LECs to install and absorb the cost of facilities to wireless carriers in order to route calls to ported numbers on a seven-digit dialed basis.

(5) Total costs do not include system changes required to shorten the porting interval or expanding a LEC's local calling area as contemplated by the FCC in its FNPRM.

**Western Telephone Company**  
**Total Estimated LNP Non-recurring and Recurring Costs**

		With Surcharges/ Taxes
<b>LNP Non-recurring Costs</b>

Docket No. TC04-052  
Docket No. TC04-053  
Docket No. TC04-056

**REBUTTAL TESTIMONY OF DAN DAVIS  
ON BEHALF OF THE ABOVE-NAMED COMPANIES**

June 14, 2004

1 I have attached Exhibit R1 to my rebuttal testimony that summarizes and com-  
2 pares the RLECs' cost exhibits that were filed with my May 14, 2004 testimony  
3 with the cost estimates that were filed by Mr. Williams on May 28, 2004.

4 **Q. Mr. Williams claims that the costs included in the category "Other Internal**  
5 **Costs" are overstated. (p.17:5-11) Do you agree with Mr. Williams?**

6  
7 **A.** No, I do not. Mr. Williams claims that the costs in this category are overstated  
8 because "the Petitioners have included costs to deal with 'Contracts for Porting'  
9 and costs related to the development of 'Inter-carrier Porting Forms'." The  
10 RLECs have included costs for porting contracts because wireless carriers, includ-  
11 ing Western Wireless, have sent Local Number Portability Operations Agree-  
12 ments to the RLECs to govern the porting of telephone numbers between the  
13 wireline and wireless networks. I have attached copies of porting agreements sent  
14 to RLECs to this rebuttal testimony marked as Exhibit R2. Thus, these costs are  
15 undeniable.

16 Mr. Williams also claims that the costs related to the development of "Inter-carrier  
17 Porting Forms" are also grossly overstated since porting forms are available to  
18 any carrier for a nominal fee. However, the costs included in this subcategory are  
19 not the costs associated with obtaining a porting form. The costs included in this  
20 subcategory are associated with obtaining the data to complete the form, complet-  
21 ing the form itself, and interacting with the wireless provider to confirm an under-  
22 standing and agreement with the information as compiled on the form. Based  
23 upon the information necessary to complete the Trading Partner Profile and port-  
24 ing questionnaires, an average of ten man-hours per Trading Partner Profile is a  
25 reasonable estimation of time required for this process. I have attached examples

1 of Trading Partner Profile forms and porting questionnaires to this rebuttal testi-  
2 mony marked as Exhibit R3.

3 Q. **Mr. Williams' states that some Petitioners have included non-recurring costs**  
4 **for an automated SOA interface (p. 17:11-13). What amount of costs did the**  
5 **RLECs use on Exhibit 2 on the line entitled "SOA Non-recurring set up**  
6 **charge" that was attached to Direct Testimony?**

7  
8 A. The RLECs did not include any non-recurring costs on the line entitled "SOA  
9 Non-recurring set-up charge" on Exhibit 2 that was attached to my direct testi-  
10 mony.

11 Q. **Mr. Williams states that Beresford has claimed a nonrecurring charge of**  
12 **\$1,800 and a monthly recurring charge of \$1,200 for Service Order Admini-**  
13 **stration. Do you believe Mr. Williams has reviewed Exhibit 2 that was at-**  
14 **tached to your direct testimony?**

15  
16 A. No, I do not. It appears that Mr. Williams' review of the RLECs cost analysis  
17 was using Exhibit 1 attached to discovery. The non-recurring cost as shown on  
18 Exhibit 2 for Beresford is zero. The recurring costs as shown on Exhibit 2 for  
19 Beresford were \$135 per month. In order to show a causal relationship between  
20 demand and costs, Beresford assumed three ports per month at an average cost of  
21 \$45 per port.

22 The RLECs, including Beresford, calculated the average cost per port assuming  
23 each port would require three contacts with the service bureau. Given the low  
24 level of demand and the resulting lack of learning plateau, communications with  
25 the service bureau can be expected to be more cumbersome than in an environ-  
26 ment where routine processing of ports occurs.

27 Q. **Mr. Williams has eliminated all costs from the line entitled "Other Recurring**  
28 **Costs." Will you please identify what costs are represented on the line item**  
29 **on Exhibit 2 entitled "Other Recurring Costs"?**  
30

1 A. Yes. These are the costs associated with the RLEC personnel processing a port-  
2 ing order through multiple internal and external processes and systems. These  
3 costs would include receiving the LSR forms and reviewing the LSR for accuracy  
4 against the RLECs internal records and verifying that the LSRS are filled out in  
5 compliance with the Ordering and Billing Forum standards. If the LSRs are de-  
6 termined to be accurate and there are no conflicts for which the RLEC needs to  
7 contact the wireless provider on, the RLEC personnel can then send the new ser-  
8 vice provider a Firm Order Confirmation. Once the FOC has been sent to the new  
9 service provider, the RLEC will contact the SOA service bureau, the time that is  
10 included in the category. Internal work orders will be initiated, processed and fi-  
11 nalized in order to activate the unconditional ten digit trigger on the correct date,  
12 to test and verify calls are being properly routed to the ported number, to discon-  
13 nect the end-user and ported number from the switch, to verify that the number  
14 can not be reassigned on the switch and in the customer service records, update  
15 billing records, and complete performance measurement analysis.  
16 Based upon the multiple manual processes involved, the RLECs estimated five  
17 hours per port.

18 Q. **Do you have any other comments with regarding Mr. Williams' cost esti-**  
19 **mates?**

20  
21 A. Yes. In its reply to supplemental discovery, Western Wireless projected that each  
22 RLEC would experience porting demand. Yet, in Mr. Williams' cost exhibits, he  
23 fails to include, with the exception of Beresford, any monthly recurring costs as-  
24 sociated with porting activity. I have included porting related costs on the lines  
25 entitled "SOA Monthly Charge" and "Other Recurring Costs." In addition, if

1 Western Wireless' estimates of ports are correct as shown in Response to Inter-  
2 rogatory 13.f., there will be fewer RLEC access lines than are shown on the cost  
3 exhibits, resulting in a higher cost per line per month. (Western Wireless' Re-  
4 sponses to Interrogatories are attached to the Rebuttal Testimony of Steven E.  
5 Watkins.)

6 Q. **Will you please explain the RLECs' rationale for using DS1 direct connec-**  
7 **tions in the cost analysis?**

8  
9 A. Yes, I will. Currently, RLECs do not route local traffic outside of their exchange  
10 boundaries. With intermodal LNP, a call to a number ported to a wireless carrier  
11 will terminate, in most cases, at a point of interconnection or switch located out-  
12 side of an RLEC exchange. If an RLEC routes a call to such a ported number  
13 over current equal access Feature Group D facilities, the customer would receive  
14 a recording instructing the customer to redial the number using one plus the NPA-  
15 NXX. To route the call as a local call would require the use of direct connections  
16 to each wireless provider.

17 In addition, the specified means provided in interconnection agreements between  
18 the RLECs and Western Wireless to route local traffic between the RLECs and  
19 Western Wireless is through the use of direct connections.

20 Q. **Mr. Williams states that it is unclear that any of the costs included in this line**  
21 **item concerning transport costs are recoverable under the FCC's rules per-**  
22 **taining to recovery via a line item surcharge on telecommunications custom-**  
23 **ers. (p. 19: 6-8) Have you addressed this issue in your direct testimony filed**  
24 **on May 14, 2004?**

25  
26 A. Yes, I have addressed transport cost recovery on pages 17 and 18 of my direct tes-  
27 timony.

1 Q. **Did Mr. Williams address whether or not the Commission should grant a**  
2 **suspension or modification of the LNP requirement as implemented by the**  
3 **FCC pursuant to Section 251(f)(2)(A)(i) (significant adverse economic impact**  
4 **on telecommunications users generally) of the Act?**  
5

6 A. No, he did not. This omission from Mr. Williams' testimony is particularly tell-  
7 ing because the costs that are associated with LNP implementation, that would be  
8 passed on to end users in the form of an FCC end user surcharge or an increase in  
9 local rates, would create a significant adverse economic impact on users, and the  
10 public interest, convenience and necessity would not be served by the implemen-  
11 tation of LNP in rural areas of South Dakota.

12 Q. **In Mr. Williams' Testimony (p. 21: 5-7), there is a claim that little or no in-**  
13 **vestment would be avoided by delaying the implementation of number port-**  
14 **ability. Do you agree?**  
15

16 A. No. LNP investment requirements may change based on the outstanding issues  
17 pending at the FCC. For example, the FCC, in its November 10, 2003 "Further  
18 Notice of Proposed Rulemaking," sought input from the North America Number-  
19 ing Council ("NANC") on reducing the porting interval for intermodal porting.  
20 The FCC also requested NANC to provide any recommendations on an appropri-  
21 ate transition period. The Intermodal Porting Interval Issue Management Group  
22 ("IMG") was formed to address these issues for the FCC. Based upon IMG's  
23 analysis, it determined that shortening the porting interval to approximately two  
24 days was the best interval based from a cost/benefit analysis. The IMG also esti-  
25 mated that the industry would need approximately 24 months to implement this  
26 proposal.<sup>1</sup>

---

<sup>1</sup> *NANC Report & Recommendation on Intermodal Porting Intervals*, Prepared for the NANC by the Inter-  
modal Porting Interval Issue Management Group, May 3, 2004, at p. 4.

1 The IMG, in addressing rural telephone company impacts, stated that in order to  
2 support a shorter porting interval, service providers will need to change internal  
3 operating software and business practices and to implement mechanized systems  
4 and automated interfaces with other carriers. Based upon the IMG proposal, the  
5 exchange and approval of information on the local service request forms and the  
6 firm order confirmation forms would need to occur within a five-hour window in-  
7 stead of the current 24-hour window. Forms and processes used to exchange in-  
8 formation between carriers requiring manual intervention would need to be  
9 mechanized and automated to assure the five-hour standard could be met. I note  
10 that the IMG states that the FCC should recognize that this may cause economic  
11 impacts on rural telephone companies that may not be justified considering the  
12 size of the customer base and customer density.<sup>2</sup>

13 Thus, if the RLECs implement LNP before the porting interval and other ques-  
14 tions are resolved, they may utilize systems and interfaces that would have to be  
15 replaced once issues, like the porting interval, are addressed. This would, in ef-  
16 fect, result in a “double” LNP investment.

17 A suspension of the LNP requirement until after the FCC has decided the porting  
18 interval and other issues would allow RLECs to avoid the investment required to  
19 implement and modify systems and processes required under the current industry  
20 porting standard.

21 **Q. What would be the timeframe required for the RLECs to fully implement,**  
22 **test, and place LNP into commercial service, if required to do so?**  
23

---

<sup>2</sup> Id. at p. 25.

1 A. Based upon my analysis of LNP implementation, it would take the RLECs three  
2 to six months to implement LNP depending on the number of switches, whether  
3 additional hardware and/or software needs to be installed, and the availability of  
4 support personnel.

5 Q. **Does this conclude your testimony?**

6

7 A. Yes, it does.

CERTIFICATE OF SERVICE

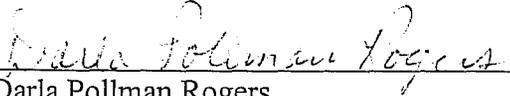

The undersigned hereby certifies that she served a copy of the foregoing **REBUTTAL TESTIMONY** upon the persons herein next designated, on the date below shown, by depositing a copy thereof in the United States mail at Pierre, South Dakota, postage prepaid, in an envelope addressed to each said addressee, to-wit:

## AGREEMENT

### WIRELESS-WIRELINE NUMBER PORTABILITY

by and between

**Verizon Wireless**

and

**Beresford Municipal Telephone Company**

THIS WIRELESS-WIRELINE NUMBER PORTABILITY SERVICE AGREEMENT ("Agreement") by and between Cellco Partnership d/b/a Verizon Wireless (a Delaware general partnership) and the Verizon Wireless Entities (collectively "Verizon Wireless"), each having an office and principal place of business at 180 Washington Valley Road, Bedminster, New Jersey 07921, and **Beresford Municipal Telephone Company**, on behalf of itself and its Affiliates (collectively "Carrier"), with offices located at 101 North 3 Rd Street, Beresford, SD 57004-1796. Verizon Wireless and Carrier may be collectively referred to as the "Parties" and individually as a "Party."

WHEREAS, the above named Parties wish to enter into an Agreement with each other and to be in compliance with the applicable rules and regulations of the Federal Communications Commission ("FCC Rules and Regulations").

WHEREAS, the Parties wish to enter into an Agreement to facilitate the ability of Customers to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement through Local Number Portability.

WHEREAS, the Parties wish to enter into an Agreement to establish practices and procedures to ensure that Customer requests to port numbers are achieved efficiently, with minimal delays, except as required to validate a port request.

THEREFORE, the Parties wish to enter into this Agreement on the following terms and conditions:

#### 1. TERM

This Agreement shall become effective in accordance with Section 34 ("Effective Date") and, except as otherwise provided in this Agreement, shall continue in full force and effect until either Party terminates the Agreement by providing notice of termination in writing to the other Party at least thirty (30) days in advance of such termination pursuant to the Notice provisions set forth in Section 18 of this Agreement. Upon termination, the Parties shall continue to provide Local Number Portability as may be required by Applicable Law.

#### 2. CIRCUMSTANCES OF DEFAULT

A Party shall be in default under this Agreement if such Party:

- 2.1 Becomes insolvent, liquidates, is adjudicated as bankrupt, makes an assignment for the benefit of creditors, invokes any provision of law for the relief of debtors, or initiates any proceeding seeking protection from its creditors; and/or

- 2.2 Violates any applicable laws, statutes, or other legal requirements with respect to this Agreement; and/or
- 2.3 Fails to perform any material term, condition, or covenant of this Agreement and such Party fails to cure such nonperformance within thirty (30) calendar days of receipt of written notice of such default from the non-defaulting Party ("Cure Period"). Upon expiration of said Cure Period, the non-defaulting Party shall have the right to seek applicable remedies under this Agreement. When a default cannot be reasonably cured within the Cure Period, the time for cure may be extended by agreement of the Parties for such period of time as may be reasonably necessary to complete such cure, provided the defaulting Party shall have proceeded promptly to cure such default and shall continue to prosecute such curing with due diligence.
- 2.4 Notices hereunder shall be given to the Notice address set forth in Section 18.

### 3. REMEDIES AND TERMINATION

- 3.1 In the event of default under this Agreement (and with respect to a default under Section 2.3, the Cure Period stated therein), the non-defaulting Party shall have the right, at its option, to suspend performance under this Agreement or to terminate this Agreement without further liability upon providing written notice of such termination to the defaulting party pursuant to the Notice provisions set forth in Section 18.
- 3.2 This Agreement may be affected by changes, modifications, orders, and rulings of regulatory bodies, including the FCC, to the extent competent jurisdiction otherwise exists. Each Party shall promptly notify the other Party in writing of any governmental action that limits, suspends, cancels, withdraws, or otherwise materially affects the notifying Party's ability to perform its obligations under this Agreement. In the event a material modification is made to the obligations of a Party set forth in this Agreement, which materially affects the obligations of a Party hereunder, then either Party may terminate this Agreement pursuant to Section 1 of this Agreement. If neither Party exercises such a right of termination, and any legislative, regulatory, judicial or other governmental decision, order, determination or action, or any change in applicable law, materially affects any material provision of this Agreement, the rights or obligations of a Party hereunder, or the ability of a Party to perform any material provision of this Agreement, the Parties shall promptly renegotiate in good faith and amend in writing this Agreement in order to make such mutually acceptable revisions to this Agreement as may be required in order to conform the Agreement to Applicable Law.
- 3.3 The rights set forth in Sections 2 and 3 of this Agreement are in addition to, and not in limitation of, any other right or remedy that a non-defaulting party may have at law or in equity.
- 3.4 Notices hereunder shall conform to the Notice provisions set forth in Section 18.

### 4. DEFINITIONS

Unless the context clearly indicates otherwise, when a term listed in these Definitions is used in the Agreement, the term shall have the meaning stated in these Definitions. A defined term intended to convey the meaning stated in these Definitions is capitalized

when used. Other terms that are capitalized, and not defined in these Definitions or elsewhere in the Agreement, shall have the meaning stated in the Act.

- 4.1 Act: The Communications Act of 1934 (47 U.S.C. 151 et. seq.), as amended.
- 4.2 Affiliate: Shall have the meaning set forth in the Act.
- 4.3 Agreement: This Agreement including all appendices attached hereto, orders by a Party that have been accepted by the other Party, future amendments, modifications and supplements made in accordance herewith.
- 4.4 Applicable Law: All effective laws, government regulations and government orders, applicable to each Party's performance of its obligations under this Agreement.
- 4.5 Assigned Telephone Number: A telephone number that is assigned to a Customer that can originate and terminate telephone calls through the Public Switched Telephone Network. An Assigned Telephone Number may be a suspended telephone number unless that telephone number was suspended for fraud but, for avoidance of doubt, will not include a telephone number that has been disconnected.
- 4.6 Commercial Mobile Radio Service ("CMRS"): Shall be as defined by the FCC.
- 4.7 Customer Proprietary Network Information ("CPNI"): Shall have the meaning set forth in Section 222 of the Act, 47 U.S.C. Section 222.
- 4.8 Customer: An end user and subscriber to the services provided by either of the Parties.
- 4.9 Customer Information: CPNI of a Customer and any other non-public, individually identifiable information about a Customer or, if applicable, the purchase by a Customer of the services or products of a Party.
- 4.10 Customer Service Records ("CSR"): The records that contain the identity, service address, rate plan or plans, and other information on the Customer.
- 4.11 Electronic Data Interface ("EDI"): A data interface for exchange of information between providers.
- 4.12 End Office: A switching entity used in performing, originating and terminating functions for calls to or from Customers. As used in this Agreement, the term End Office shall be used in reference to End Office Switches used by Carrier and other wireline carriers.
- 4.13 Intercarrier Communications Process ("ICP"): The communication process between the OSP and the NSP, which validates the Customer information and initiates and completes the port request. The ICP includes the exchange of the LSR/LR.
- 4.14 Local Number Portability ("LNP"): Shall have the meaning set forth in the Act.
- 4.15 Local Service Request ("LSR"): Forms containing information about a Customer who desires to port a telephone number to the NSP. A sample LSR and

descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG").

- 4.16 Location Routing Number ("LRN"): Ten-digit number assigned to a switch or point of interconnection used for routing calls.
- 4.17 Metropolitan Statistical Areas ("MSA"): An MSA denotes a large urban population market as designated by the U.S. government.
- 4.18 Mobile Switching Center ("MSC"): A CMRS carrier's switching entity used to perform originating, transit and terminating functions for calls to and from end users, also referred to as Mobile Telecommunications Switching Office or "MTSO."
- 4.19 New Service Provider ("NSP"): The new provider that will provide service to the Customer and to whom the Customer ports its Assigned Telephone Number.
- 4.20 Number Portability Administration Center ("NPAC"): A neutral third party center that processes porting information from and disseminates that information to telecommunication carriers. The NPAC processes the NSP subscriber port request and downloads the LRN associated with the subscriber ported telephone number to local number portability databases.
- 4.21 Old Service Provider ("OSP"): The provider providing service to the Customer at the time the Customer requests porting of the Assigned Telephone Number.
- 4.22 Verizon Wireless Entities: Any FCC-licensed entity doing business as Verizon Wireless and/or directly or indirectly controlled by Cellco Partnership.

## 5. INFORMATION

The Parties acknowledge that Customer Information may be exchanged between the Parties and may be subject to legal restrictions on its use or disclosure, including without limitation laws relating to CPNI. The Parties may only obtain and use such restricted Customer Information in accordance with applicable laws and the restrictions contained in this Agreement. Prior to initiating a port request with the OSP, the NSP shall obtain consent from the Customer that permits the OSP to release to and/or to confirm with the NSP the information about the Customer that was sought by the NSP in the port request process. The NSP shall indemnify, defend, and hold harmless the OSP from and against any liabilities, claims, or demands, including costs, and expenses (including reasonable attorneys' fees) arising from or relating to any failure on the part of the NSP to obtain from the Customer consent for the OSP to release/confirm information about the Customer that was or is sought by the NSP in the port request process.

## 6. NUMBER PORTABILITY

### 6.1 Scope

The Parties shall provide LNP on a reciprocal basis pursuant to this Agreement in accordance with FCC Rules and Regulations as may be prescribed from time to time. "Delay" or "denial" of ports between Parties shall only occur in the event a Party is unable to complete the validation of those validation elements expressly set forth in Appendix A.

### 6.2 Procedures for Providing LNP

The Parties will follow the porting intervals applicable to wireline-wireline porting more specifically described in the North American Numbering Council's Local Number Portability Administration Selection Working Group, dated April 25, 1997, Appendix E, Section 7.1, Figure 1 until such time as the FCC adopts an LNP provisioning process flow and porting intervals for Inter-Service Provider LNP applicable between wireline and wireless carriers, at which time the Parties will follow LNP provisioning process flow and porting intervals established by the FCC. In addition, the Parties agree to follow the LNP ordering procedures established at the OBF for porting of Assigned Telephone Numbers.

- 6.2.1 For purposes of this Section 6, "Party A" refers to a Party whose Customer elects to become a Customer of the other Party ("Party B") and to utilize the original telephone number(s) corresponding to the service(s) it previously received from Party A, in conjunction with the service(s) it will now receive from Party B. Upon Party B receiving authorization from the Customer in accordance with Applicable Law and sending an LNP order to Party A, Parties A and B will work together to port the Customer's telephone number(s) from Party A's network to Party B's network.
- 6.2.2 When a telephone number is ported out of the Carrier network, Carrier will remove all line-based features and calling card(s) associated with the ported number(s) from its Line Information Database ("LIDB"). Reactivation of the line-based calling card in another LIDB, if applicable, is the responsibility of Verizon Wireless or the Customer.
- 6.2.3 When a Customer's number is ported between the Parties, Carrier will follow the 911 Guidelines recommended by the National Emergency Number Association ("NENA") with regard to emergency services databases.
- 6.2.4 When Party A ports telephone numbers of its Customer to Party B and the Customer has previously secured a reservation of line numbers from Party A for possible activation at a future point, these reserved but inactive numbers may be ported along with the active numbers to be ported provided the numbers have been reserved for the Customer. Party B may request that Party A port all reserved numbers assigned to the Customer or that Party A port only those numbers listed by Party B. As long as Party B maintains reserved but inactive numbers ported for the Customer, Party A shall not reassign those numbers. Party B shall not reassign the reserved numbers to another Customer.
- 6.2.5 NXX codes shall be portable in accordance with FCC Rules and Regulations except those permitted to be designated non-portable by the same FCC Rules and Regulations. The Parties, moreover, shall ensure that all switches, whether currently owned or hereafter acquired, are upgraded to facilitate LNP to the extent required by FCC Rules and Regulations.
- 6.2.6 Numbers can be ported to and from carriers whose licensed areas overlap and where the receiving carrier has the ability to provide service, as applicable. Porting numbers under these circumstances does not require modification and/or changes to current transport agreements.

### 6.3 LNP Ordering Procedures

### 6.3.1 Numbers to be ported from Carrier to Verizon Wireless

6.3.1.1 Orders for LNP shall be submitted by VZW to Carrier using an LSR either via web GUI, FAX or EDI. Verizon Wireless shall submit LSRs to port numbers only on behalf of itself and entities for which it has authority to act.

6.3.1.2 Instructions for submitting an LSR to Carrier are available via **[TBD – identify where instructions are found]**.

### 6.3.2 Numbers to be ported from Verizon Wireless to Carrier

6.3.2.1 Orders for LNP shall be submitted by Carrier to Verizon Wireless utilizing validation information as required by Verizon Wireless and as applied to all other wireline carriers.

6.3.2.2 Instructions for submitting a validation request to Verizon Wireless will be provided via the Verizon Wireless process agreed to by the Parties.

### 6.4 Procedures for Providing LNP Through Full NXX Code Migration

When a Party has activated an entire NXX code for a single Customer and such Customer chooses to receive service from the other Party, the Parties shall follow the procedures set forth in the Industry Number Committee ("INC") Guideline 95-0407-0008 Central Office Code (NXX) Assignment Guidelines Section 7.

### 6.5 Procedures for Providing LNP Using Type 1 Numbers

Upon request of Verizon Wireless, the Parties will work together to migrate telephone numbers assigned to Type 1 trunks to the Verizon Wireless switch.

### 6.6 Procedures for Requesting LNP Capability

Either Party may submit a written request that the other Party upgrade any of its End Offices/MSCs to become LNP capable.

6.6.1 If either Party desires to have LNP capability deployed in an End Office/MSC of the other Party that is not currently capable, the requesting Party shall issue an LNP request to the other Party. The Party receiving such request will respond to the requesting Party within ten (10) calendar days of receipt of the request with a date for which LNP will be available in the requested End Office/MSC. The Party receiving the request shall proceed to provide for LNP in compliance with the procedures and timelines set forth in FCC Rules and Regulations.

6.6.2 The Parties will each be responsible for updating the LERG to reflect the LNP capabilities of their respective End Offices/MSCs.

6.7 The Parties acknowledge and agree that telecommunications system interruptions or service outages may occur which may delay the processing of port requests. The Parties shall use best reasonable efforts to avoid such interruptions or outages and with respect to scheduled outages or maintenance

activities shall work with each other to schedule them so as to minimize disruptions to subscribers. Scheduled interruptions/maintenance should adhere to standard industry agreed upon maintenance windows for the NPAC.

## **7. TROUBLE, MAINTENANCE AND REPAIR**

7.1 Both Parties agree to work expeditiously to resolve any issues associated with porting a Customer between the two Parties. Before either Party reports a trouble condition, that Party must first use commercially reasonable efforts to isolate the trouble to the other Party's actions or facilities. In order to facilitate trouble reporting and resolution, the Parties shall provide the trouble reporting contact information, per Section 22 of this Agreement. It is the responsibility of each Party to maintain the accuracy of its contact information and to notify the other Party of changes and modifications.

7.2 As part of the commitments set forth in Section 7.1 of this Agreement, each Party shall monitor and perform effective maintenance through testing and the performance of proactive maintenance activities such as routine testing, development of and adherence to appropriate network trouble isolation processes and periodic review of operational elements for translations, routing and network faults.

## **8. DIRECTORY LISTINGS**

This Agreement does not govern or authorize the inclusion of listings in directories that may be published by a Party. Verizon Wireless shall not indicate on an LSR to be submitted to Carrier that it seeks for a ported number to be listed in a Carrier directory. Any listings shall be subject to separate agreement.

## **9. FRAUD**

The Parties agree to cooperate in good faith with each other to investigate, minimize, and take corrective action in cases of fraud related to number portability. Each Party assumes responsibility for all fraud related to number portability associated with its Customers and accounts. Neither Party shall bear responsibility for, and shall have no obligation to investigate or make adjustments to, the accounts of the other Party in cases of fraud by the other Party's Customers or other third parties.

## **10. COSTS**

The Parties to this Agreement will be responsible for their own costs incurred in implementing this Agreement.

## **11. USE OF TRADEMARKS**

The Parties agree that they will not use the name, service marks or trademarks of the other Party or any of its affiliated companies in any manner whatsoever without such Party's specific written consent, which consent the other Party may grant or withhold in its sole discretion. Neither Party is licensed hereunder to conduct business under any logo, trademark, service or trade name (or any derivative thereof) of the other Party. Neither Party shall issue any press release or other publicity concerning this Agreement without the prior written consent of the other Party, which consent the other Party may grant or withhold in its sole discretion. Neither Party may imply any direct or indirect affiliation with or sponsorship or endorsement of it or its services or products by the other Party. Any violation of this Section 11 shall be considered a material breach of this Agreement.

**12. COMPLIANCE WITH LAWS**

The Parties shall comply with all federal, state and local laws applicable to their performance hereunder. Neither Party shall be liable for any delay or failure in performance by it that results from requirements of Applicable Law, or acts or failures to act of any governmental entity or official.

**13. FORCE MAJEURE**

Neither Party shall be responsible for any delay or failure in performance of any part of this Agreement to the extent that such delay or failure results from causes beyond its reasonable control ("Conditions"), whether or not foreseeable by such Party. Such Conditions include, but are not limited to, acts of God, wars, revolution, civil commotion, acts of public enemy, embargo, acts of government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing or boycotts. If any such Condition occurs, the Party delayed or unable to perform ("Delayed Party"), upon giving prompt notice to the other Party, shall be excused from such performance on a day-to-day basis during the continuance of such Condition (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis during the same period); provided, however, that the Party so affected shall use commercially reasonable efforts to avoid or remove such Condition and both Parties shall proceed immediately with the performance of their obligations under this Agreement whenever such causes are removed or cease. Nothing in this Agreement shall require the non-performing Party to settle any labor dispute except as the non-performing Party, in its sole discretion, determines appropriate.

**14. ASSIGNMENT**

This Agreement or any right or interest under this Agreement may not be assigned or transferred nor may any obligation under this Agreement be delegated without the prior written consent of the other Party, which consent may not be unreasonably withheld. Any attempted assignment or delegation in violation of this Section 14 shall be void and ineffective and constitute default of this Agreement.

**15. BINDING EFFECT**

This Agreement shall inure to the benefit of, and shall be binding upon the Parties hereto and their respective successors and permitted assigns.

**16. INDEMNIFICATION**

16.1 Each Party ("Indemnifying Party") shall indemnify, defend, and hold harmless the other Party ("Indemnified Party"), the Indemnified Party's Affiliates, (for purposes of this Section 16, Affiliates shall include Verizon Wireless Entities) and the directors, officers and employees of the Indemnified Party and the Indemnified Party's Affiliates, from and against any and all liabilities, claims, demands, suits, actions, settlements, judgments, fines, penalties, injuries, damages, or losses including costs (including court costs) and expenses (including reasonable attorneys' fees) ("Claims") that arise out of bodily injury to or death of any person, or damage to, or destruction or loss of, tangible real and/or personal property of any person to the extent such injury, death, damage, destruction or loss, was proximately caused by the grossly negligent or intentionally wrongful acts or omissions of the Indemnifying Party, the Indemnifying Party's Affiliates, or the directors, officers, employees, agents, or contractors (excluding the Indemnified Party) of the Indemnifying Party or the Indemnifying Party's Affiliates, in relation

to a port request under this Agreement, including a Claim where there is (a) a claim, demand, suit or action by a person who is not a Party, (b) a settlement with, judgment by, or liability to, a person who is not a Party, or (c) a fine or penalty imposed by a person who is not a Party (collectively referred to as a "Third Party Claim").

16.2 A Party seeking to be indemnified hereunder shall follow, and the Indemnifying Party's obligations under Section 16.1 shall be conditioned on following, the Indemnification Process set forth in this Section 16.2.

16.2.1 The Indemnified Party: (a) shall provide the Indemnifying Party with prompt, written notice of any Claim after becoming aware thereof (including a statement of facts known to the Indemnified Party related to the Claim and an estimate of the amount thereof); (b) prior to taking any material action with respect to a Third Party Claim, shall consult with the Indemnifying Party as to the procedure to be followed in defending, settling, or compromising the Claim; (c) shall not consent to any settlement or compromise of a Third Party Claim without the written consent of the Indemnifying Party; (d) shall permit the Indemnifying Party to assume the defense of a Third Party Claim (including, except as provided below, the compromise or settlement thereof) at the Indemnifying Party's own cost and expense, provided, however, that the Indemnified Party shall have the right to approve the Indemnifying Party's choice of legal counsel.

16.2.2 If the Indemnified Party fails to comply with Section 16.2.1 with respect to a Claim, to the extent such failure shall have a material adverse effect upon the Indemnifying Party, the Indemnifying Party shall be relieved of its obligation to indemnify, defend and hold harmless the Indemnified Party with respect to such Claim under this Agreement.

16.2.3 Subject to 16.2.4 and 16.2.5, below, the Indemnifying Party shall have the authority to defend and settle any Third Party Claim.

16.2.4 With respect to any Third Party Claim, the Indemnified Party shall be entitled to participate with the Indemnifying Party in the defense of the Claim if the Claim requests equitable relief or other relief that could affect the rights of the Indemnified Party. In so participating, the Indemnified Party shall be entitled to employ separate counsel for the defense at the Indemnified Party's expense. The Indemnified Party shall also be entitled to participate, at its own expense, in the defense of any Claim, as to any portion of the Claim as to which it is not entitled to be indemnified, defended and held harmless by the Indemnifying Party.

16.2.5 In no event shall the Indemnifying Party settle a Third Party Claim or consent to any judgment with regard to a Third Party Claim without the prior written consent of the Indemnified Party, which shall not be unreasonably withheld, conditioned or delayed. In the event the settlement or judgment requires a contribution from or affects the rights of an Indemnified Party, the Indemnified Party shall have the right to refuse such settlement or judgment with respect to itself and, at its own cost and expense, take over the defense against the Third Party Claim, provided that in such event the Indemnifying Party shall not be responsible for, nor shall it be obligated to indemnify or hold harmless the Indemnified Party against, the Third Party Claim for any amount in excess of such refused settlement or judgment.

16.2.6 The Indemnified Party shall, in all cases, assert any and all provisions in applicable Tariffs and Customer contracts that limit liability to third persons as a bar to, or limitation on, any recovery by a third-person claimant.

16.2.7 The Indemnifying Party and the Indemnified Party shall offer each other all reasonable cooperation and assistance in the defense of any Third Party Claim.

16.3 Each Party agrees that it will not impede or bring any action against the other Party, the other Party's Affiliates, or any of the directors, officers or employees of the other Party or the other Party's Affiliates, based on any claim by any person for personal injury or death that occurs in the course or scope of employment of such person by the other Party or the other Party's Affiliate and that arises out of performance of this Agreement.

16.4 Each Party's obligations under this Section 16 shall survive expiration, cancellation or termination of this Agreement.

## 17. RELATIONSHIP OF THE PARTIES

17.1 Neither Party undertakes by this Agreement or otherwise to perform or discharge any liability or obligation of the other Party, whether regulatory or contractual, or to assume any responsibility whatsoever for the conduct of the business or operations of the other Party. The relationship of the Parties under this Agreement shall be that of independent contractors and is a non-exclusive relationship. Nothing contained in this Agreement is intended to give rise to an employment relationship, partnership or joint venture between the Parties or to impose upon the Parties any of the duties or responsibilities of employers, partners or joint venturers.

17.2 Except for provisions herein expressly authorizing a Party to act for another Party, nothing in this Agreement shall constitute a Party as a legal representative or agent of the other Party, nor shall a Party have the right or authority to assume, create or incur any liability or any obligation of any kind, express or implied, against, in the name or on behalf of the other Party unless otherwise expressly permitted by such other Party in writing, which permission may be granted or withheld by the other Party in its sole discretion.

17.3 Each Party shall have sole authority and responsibility to hire, fire, compensate, supervise, and otherwise control its employees, agents and contractors. Each Party shall be solely responsible for payment of any Social Security or other taxes that it is required by Applicable Law to pay in conjunction with its employees, agents and contractors, and for withholding and remitting to the applicable taxing authorities any taxes that it is required by Applicable Law to collect from its employees.

17.4 A Party may use a contractor of the Party (including, but not limited to, an Affiliate of the Party) to perform the Party's obligations under this Agreement, provided that a Party's use of a contractor shall not release the Party from any duty or liability to fulfill the Party's obligations under this Agreement.

## 18. NOTICES

Unless otherwise specified in this Agreement, all notices required under this Agreement shall be given in writing. All notices shall be given by personal delivery, express delivery service with next Business Day delivery, confirmed facsimile (with copy delivered by personal delivery, express delivery service with next Business Day delivery or certified mail, return receipt requested) or certified mail, return receipt requested to the person(s) specified below or to such other addresses as a Party may designate by written notice to the other Party. If sent by the United States Postal Service mail, such notices shall be deemed received on the earlier of actual receipt or five (5) business days following deposit. For the other forms of notice, notice will be deemed given as of (a) where there is personal delivery of the notice, the date of actual receipt, (b) where the notice is sent via express delivery service for next Business Day delivery, the next Business Day after the notice is sent, and (c) where the notice is sent via facsimile telecopy, if the notice is sent on a Business Day and before 5 PM in the time zone where it is received, on the date set forth on the telecopy confirmation, or if the notice is sent on a non-Business Day or if the notice is sent after 5 PM in the time zone where it is received, the next Business Day after the date set forth on the telecopy confirmation.

Notices shall be sent to:

To Verizon Wireless: Verizon Wireless  
Port Center  
300 River Rock Blvd  
Murfreesboro, TN 37128  
Attn: Port Center Director  
Fax: 1-615-372-2425

With a copy to: Verizon Wireless  
180 Washington Valley Road  
Bedminster, New Jersey 07921  
Attention: Assistant General Counsel – Procurement &  
Technology  
Fax: (908) 306-7766

If to Carrier: **[provide carrier notice information]**

#### 19. **WAIVER**

The delay or failure of either Party to enforce any of the provisions of this Agreement, or exercise in any respect any right or remedy provided for in this Agreement or at law or in equity, or to require performance of any of the provisions of this Agreement, or to exercise any option which is provided under this Agreement shall not be deemed a waiver of any such provisions, rights, remedies or options under this Agreement.

#### 20. **SEVERABILITY**

If any of the provisions of this Agreement shall be invalid or unenforceable, then such invalidity or unenforceability shall not invalidate or render unenforceable the entire Agreement. The entire Agreement shall be construed as if not containing the particular invalid or unenforceable provision or provisions, and the rights and obligations of the Parties shall be construed and enforced accordingly; provided, that if the invalid or unenforceable provision is a material provision of this Agreement, or the invalidity or unenforceability materially affects the rights or obligations of a Party hereunder or the ability of a Party to perform any material provision of this Agreement, the Parties shall promptly renegotiate in good faith and amend in writing this Agreement in order to make such mutually acceptable revisions to this Agreement as may be required in order to conform the Agreement to Applicable Law.

**21. LIMITATION OF LIABILITY**

Except as otherwise provided in this Agreement, neither Party shall be liable to the other Party, the other Party's Customers or to any other person in connection with the performance or nonperformance under this Agreement, including but not limited to, any claims for any indirect, incidental, consequential, special damages, including (without limitation) damages for lost profits, regardless of the form of action, whether in contract, indemnity, warranty, strict liability, or tort.

**22. ESCALATION PROCEDURES**

The Parties agree to provide each other with trouble reporting contacts and procedures via their respective web sites or other means agreed to by the Parties. In addition, the Parties agree to provide each other with escalation contacts and procedures via their respective web sites or other means agreed to by the Parties. Should a Party encounter any problems with respect to compliance with this Agreement that cannot be resolved through the trouble reporting contacts and procedures, then a Party may utilize the escalation contacts set forth in Appendix B ("Trouble Reporting General Contact Information") and the procedures set forth in Appendix C ("Carrier Escalation Procedures") and Appendix D ("Carrier Trouble Ticket Detail"). However, this Section 22 shall not operate in limitation or derogation of Sections 2 or 3 of this Agreement or the notice requirements set forth therein. In the event either Party fails to provide contact and procedures for trouble reporting and escalation, the Parties may utilize the Notice provisions set forth in Section 18.

In addition to the escalation procedures set forth in this Section 22, either Party may seek resolution of a dispute arising under this Agreement by pursuing any remedies available to it under this Agreement, at law, in equity, or otherwise, including, but not limited to, instituting an appropriate proceeding before the FCC or other regulatory body, or a court of competent jurisdiction; provided, however, that a Party pursuing any such remedy shall first notify the other Party of the dispute in writing through the Notice provisions set forth in Section 18 of this Agreement.

**23. ARTICLE HEADINGS**

The headings of the Articles are inserted for convenience of reference only and are not intended to be part of or to affect the meaning or interpretation of this Agreement.

**24. CHOICE OF LAW**

The construction, interpretation and performance of this Agreement shall be governed by and construed in accordance with the laws of the State of New York without regard to any conflicts of law principles that would require the application of the laws of any other jurisdiction.

**25. AMENDMENTS, MODIFICATIONS AND SUPPLEMENTS**

Amendments, modifications and supplements to this Agreement are allowed, provided that (a) all such amendments, modifications and supplements shall be in writing signed by authorized representatives of both Parties; and (b) all such amendments, modifications and supplements shall by reference incorporate this Agreement in its entirety and identify the specific sections or paragraphs contained herein which are amended, modified or supplemented; and (c) all such amendments, modifications and supplements shall not be construed to adversely affect vested rights or causes of action

which have accrued prior to the effective date of such amendment, modification or supplement.

**26. ENTIRE AGREEMENT**

This Agreement together with its appendices constitutes the entire agreement between the Parties and cancels all contemporaneous or prior agreements, whether written or oral, with respect to the subject matter of this Agreement.

**27. RESERVATION OF RIGHTS**

Notwithstanding anything to the contrary in this Agreement, neither Party waives, and each Party hereby expressly reserves, its rights to (a) challenge the lawfulness of this Agreement and any provision of this Agreement; (b) seek changes in this Agreement (including, but not limited to, changes in rates, charges and the porting services that must be offered) through changes in Applicable Law; and (c) challenge the lawfulness and propriety of, and to seek to change, any Applicable Law, including, but not limited to any rule, regulation, order or decision of the FCC, other regulatory body or a court of applicable jurisdiction. Nothing in this Agreement shall be deemed to limit or prejudice any position a Party has taken or may take before the FCC, any other state or federal regulatory or legislative bodies, courts of applicable jurisdiction, or industry fora. The provisions of this Section 27 shall survive the expiration, cancellation or termination of this Agreement.

**28. SURVIVAL**

The rights, liabilities and obligations of a Party for acts or omissions occurring prior to the expiration, cancellation or termination of this Agreement, the rights, liabilities and obligations of a Party under any provision of this Agreement regarding confidential information, indemnification or defense, or limitation or exclusion of liability, and the rights, liabilities and obligations of a Party under any provision of this Agreement which by its terms or nature is intended to continue beyond or to be performed after the expiration, cancellation or termination of this Agreement, shall survive the expiration, cancellation or termination of this Agreement.

**29. TERRITORY**

Verizon Wireless shall include a list of states in which its affiliates or other related entities operate and in which Verizon Wireless seeks to port Assigned Telephone Numbers with Carrier. With respect to Carrier this Agreement shall apply only to the territories in the states listed in Appendix E that are served by the Carrier affiliates listed in Appendix F. The foregoing shall not be construed to require that the porting between the Parties which is contemplated by this Agreement be memorialized by, or otherwise reduced to, an agreement under 47 U.S.C. §251 or otherwise construed to confer jurisdiction on states, including their regulatory agencies, over such porting unless otherwise conferred by Applicable Law.

**30. THIRD PARTY BENEFICIARIES**

Except as expressly set forth in this Agreement, this Agreement is for the sole benefit of the Parties and their permitted assigns, and nothing herein shall create or be construed to provide any third persons (including, but not limited to, Customers or contractors of a Party) with any rights (including, but not limited to, any third-party beneficiary rights) hereunder. Except as expressly set forth in this Agreement, a Party shall have no liability under this Agreement to the Customers of the other Party or to any other third person.

### 31. WARRANTIES

EXCEPT AS EXPRESSLY STATED IN THIS AGREEMENT, NEITHER PARTY MAKES OR RECEIVES ANY WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE SERVICES PROVIDED, OR TO BE PROVIDED, UNDER THIS AGREEMENT AND THE PARTIES DISCLAIM ANY OTHER WARRANTIES, INCLUDING BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY, WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE WARRANTIES AGAINST INFRINGEMENT, AND WARRANTIES ARISING BY TRADE CUSTOM, TRADE USAGE, COURSE OF DEALING OR PERFORMANCE, OR OTHERWISE.

### 32. INTELLECTUAL PROPERTY

- 32.1 Except as expressly stated in this Agreement, this Agreement shall not be construed as granting a license with respect to any patent, copyright, trade name, trademark, service mark, trade secret or any other intellectual property, now or hereafter owned, controlled or licensable by either Party. Except as expressly stated in this Agreement, neither Party may use any patent, copyrightable materials, trademark, trade name, trade secret or other intellectual property right, of the other Party except in accordance with the terms of a separate license agreement between the Parties granting such rights.
- 32.2 Except as stated in Section 32.4, neither Party shall have any obligation to defend, indemnify or hold harmless, or acquire any license or right for the benefit of, or owe any other obligation or have any liability to, the other Party or its Affiliates (for purposes of this Section 32.4, Affiliates shall include Verizon Wireless Entities) or Customers based on or arising from any Third Party Claim alleging or asserting that the provision or use of any service, facility, arrangement, or software by either Party under this Agreement, or the performance of any service or method, either alone or in combination with the other Party, constitutes direct, vicarious or contributory infringement or inducement to infringe, or misuse or misappropriation of any patent, copyright, trademark, trade secret, or any other proprietary or intellectual property right of any Party or third person. Each Party, however, shall offer to the other reasonable cooperation and assistance in the defense of any such claim.
- 32.3 NOTWITHSTANDING ANY OTHER PROVISION OF THIS AGREEMENT, THE PARTIES AGREE THAT NEITHER PARTY HAS MADE, AND THAT THERE DOES NOT EXIST, ANY WARRANTY, EXPRESS OR IMPLIED, THAT THE USE BY EACH PARTY OF THE OTHER'S SERVICES PROVIDED UNDER THIS AGREEMENT SHALL NOT GIVE RISE TO A CLAIM OF INFRINGEMENT, MISUSE, OR MISAPPROPRIATION OF ANY INTELLECTUAL PROPERTY RIGHT.
- 32.4 The Parties agree that the services provided hereunder shall be subject to the terms, conditions and restrictions contained in any applicable agreements (including, but not limited to software or other intellectual property license agreements) between the Parties and their respective vendors. The Parties agree to advise each other, directly or through a third party, of any such terms, conditions or restrictions that may limit a Party's use of a service provided by the other Party that is otherwise permitted by this Agreement. Upon written request of a Party, to the extent required by Applicable Law, the Party receiving such request will use its best efforts, as commercially practicable, to obtain intellectual property rights from its vendor to allow the requesting Party to use the service in the same manner as the Party receiving such request that are coextensive with its intellectual property rights, on terms and conditions that are equal in quality to

the terms and conditions under which it has obtained its intellectual property rights. The Party making such request shall reimburse the other Party for the cost of obtaining such rights.

### 33. CONFIDENTIALITY

- 33.1 As used in this Section 33, "Confidential Information" means the following information that is disclosed by one Party ("Disclosing Party") to the other Party ("Receiving Party") in connection with, or anticipation of, this Agreement:
- 33.1.1 books, records, documents and other information disclosed pursuant to this Agreement;
  - 33.1.2 any forecasting information provided pursuant to this Agreement;
  - 33.1.3 Customer Information (except to the extent that (a) the Customer information is published in a directory, (b) the Customer information is disclosed through or in the course of furnishing a Telecommunications Service, such as a Directory Assistance Service, Operator Service, Caller ID or similar service, or LIDB service where such disclosure is otherwise authorized by applicable agreements or law, or (c) the Customer to whom the Customer Information is related has authorized the Receiving Party to use and/or disclose the Customer Information);
  - 33.1.4 information related to specific facilities or equipment (including, but not limited to, cable and pair information);
  - 33.1.5 any information that is in written, graphic, electromagnetic, or other tangible form, and marked at the time of disclosure as "Confidential" or "Proprietary"; and
  - 33.1.6 any information that is communicated orally or visually and declared to the Receiving Party at the time of disclosure, and by written notice with a statement of the information given to the Receiving Party within ten (10) days after disclosure, to be "Confidential or "Proprietary."

Notwithstanding any other provision of this Agreement, a Party shall have the right to refuse to accept receipt of information that the other Party has identified as Confidential Information pursuant to Sections 33.1.5 and 33.1.6.

- 33.2 Except as otherwise provided in this Agreement, the Receiving Party shall:
- 33.2.1 use the Confidential Information received from the Disclosing Party only in performance of this Agreement; and
  - 33.2.2 using the same degree of care that it uses with similar confidential information of its own (but in no case a degree of care that is less than commercially reasonable), hold Confidential Information received from the Disclosing Party in confidence and restrict disclosure of the Confidential Information solely to those of the Receiving Party's Affiliates (for purposes of this Section 33, Affiliates shall include Verizon Wireless Entities) and the directors, officers, employees, agents and contractors of the Receiving Party and the Receiving Party's Affiliates, that have a need to receive such Confidential Information in order to perform the Receiving Party's obligations under this Agreement. The Receiving

Party's Affiliates and the directors, officers, employees, agents and contractors of the Receiving Party and the Receiving Party's Affiliates, shall be required by the Receiving Party to comply with the provisions of this Section 33 in the same manner as the Receiving Party. The Receiving Party shall be liable for any failure of the Receiving Party's Affiliates or the directors, officers, employees, agents or contractors of the Receiving Party or the Receiving Party's Affiliates, to comply with the provisions of this Section 33.

- 33.3 The Receiving Party shall return or destroy all Confidential Information received from the Disclosing Party, including any copies made by the Receiving Party, within thirty (30) days after a written request by the Disclosing Party is delivered to the Receiving Party, except for (a) Confidential Information that the Receiving Party reasonably requires to perform its obligations under this Agreement, and (b) one copy for archival purposes only.
- 33.4 Unless otherwise agreed, the obligations of Sections 33.2 do not apply to information that:
- 33.4.1 was, at the time of receipt, already in the possession of or known to the Receiving Party free of any obligation of confidentiality and restriction on use;
  - 33.4.2 is or becomes publicly available or known through no wrongful act of the Receiving Party, the Receiving Party's Affiliates, or the directors, officers, employees, agents or contractors of the Receiving Party or the Receiving Party's Affiliates;
  - 33.4.3 is rightfully received from a third person having no direct or indirect obligation of confidentiality or restriction on use to the Disclosing Party with respect to such information;
  - 33.4.4 is independently developed by the Receiving Party;
  - 33.4.5 is approved for disclosure or use by written authorization of the Disclosing Party (including, but not limited to, in this Agreement); or
  - 33.4.6 is required to be disclosed by the Receiving Party pursuant to Applicable Law, provided that the Receiving Party shall have made commercially reasonable efforts to give adequate notice of the requirement to the Disclosing Party in order to enable the Disclosing Party to seek protective arrangements.
- 33.5 Notwithstanding the provisions of Sections 33.1 through 33.4, the Receiving Party may use and disclose Confidential Information received from the Disclosing Party to the extent necessary to enforce the Receiving Party's rights under this Agreement or Applicable Law. In making any such disclosure, the Receiving Party shall make reasonable efforts to preserve the confidentiality and restrict the use of the Confidential Information while it is in the possession of any person to whom it is disclosed, including, but not limited to, by requesting any governmental entity to whom the Confidential Information is disclosed to treat it as confidential and restrict its use to purposes related to the proceeding pending before it.

- 33.6 The Disclosing Party shall retain all of the Disclosing Party's right, title and interest in any Confidential Information disclosed by the Disclosing Party to the Receiving Party. Except as otherwise expressly provided in this Agreement, no license is granted by this Agreement with respect to any Confidential Information (including, but not limited to, under any patent, trademark or copyright), nor is any such license to be implied solely by virtue of the disclosure of Confidential Information.
- 33.7 The provisions of this Section 33 shall be in addition to and not in derogation of any provisions of Applicable Law, including, but not limited to, 47 U.S.C. § 222, and are not intended to constitute a waiver by a Party of any right with regard to the use, or protection of the confidentiality of, CPNI provided by Applicable Law.
- 33.8 Each Party's obligations under this Section 33 shall survive expiration, cancellation or termination of this Agreement.

**34. SIGNATURES**

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement through their authorized representatives on the date or dates below to be effective when executed by both Parties.

## LOCAL NUMBER PORTABILITY OPERATIONS AGREEMENT

This Local Number Portability Operations Agreement ("Agreement") is entered into by and between Western Wireless Corporation ("Western") and \_\_\_\_\_ ("\_\_\_\_\_"). Western and \_\_\_\_\_ are each individually a "Party" and are together the "Parties" to this Agreement.

WHEREAS, the above named Parties wish to enter into an Agreement with each other in compliance with applicable laws and regulations.

WHEREAS, the Parties wish to enter into an Agreement to facilitate the ability of Customers to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement through Local Number Portability.

WHEREAS, the Parties wish to enter into an Agreement to establish practices and procedures to ensure that Customer requests to port numbers are achieved efficiently and with minimal delays.

THEREFORE, the Parties wish to enter into this Agreement on the following terms and conditions:

### 1. DEFINITIONS

Any term not specifically defined here shall be given the meaning provided for in FCC Orders governing LNP.

- 1.1. Act: Means the Communications Act of 1934 (47 U.S.C. 151 et. seq.), as amended and interpreted in the rules and regulations of the FCC.
- 1.2. Affiliate: Means any entity, directly or indirectly, through one or more intermediaries, controlling, controlled by or under common control with a Party hereto.
- 1.3. Agreement: Means this Local Number Portability Operations Agreement, including all appendices attached hereto, future amendments, modifications and supplements made in accordance herewith.
- 1.4. CORBA is an acronym for: Common Object Request Broker Architecture.
- 1.5. Competitive Local Exchange Carrier ("CLEC") is defined in the Act.
- 1.6. Commercial Mobile Radio Service ("CMRS") is as defined in the Act.
- 1.7. Customer: An active end user and subscriber of the OSP who desires to receive service from the NSP using the same telephone number that is associated with the service(s) the subscriber receives from the OSP.
- 1.8. Customer Service Records ("CSR") are the records that contain the identity, service address, rate plan or plans, and other information on the Customer.

- 1.9. Electronic Data Interface ("EDI") is a data interface for exchange of information between providers.
- 1.10. Federal Communications Commission ("FCC"): Means the regulatory, governing body directing the activities associated with this Agreement.
- 1.11. Inter-carrier Communications Process ("ICP"): The communication process between the OSP and the NSP, which validates the customer information and initiates and completes the port request. The ICP includes the exchange of the LSR/LR.
- 1.12. Local Exchange Routing Guide ("LERG") is a Traffic and Routing Administration maintained industry table identifying switches with their assigned telephone numbers.
- 1.13. Local Number Portability ("LNP"): The ability of a Customer to retain existing telephone numbers without impairment of quality, reliability, or convenience when switching from one of the Parties to this Agreement to the other Party to this Agreement pursuant to FCC Rules.
- 1.14. Local Response ("LR"): A form for responding to an LSR. A sample LR and descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG") of the Ordering and Billing Forum..
- 1.15. Local Service Request ("LSR"): Forms containing information about a Customer who desires to port a telephone number to the NSP. A sample LSR and descriptions of the fields therein can be found in the Local Service Ordering Guidelines ("LSOG") of the Ordering and Billing Forum.
- 1.16. Location Routing Number ("LRN"): Ten-digit number assigned to a switch or point of interconnection used for routing calls.
- 1.17. Metropolitan Statistical Areas ("MSA"): An MSA denotes a large urban population market as designated by the U.S. government.
- 1.18. New Service Provider ("NSP"): The new provider that will provide service to Customer and to whom Customer ports its telephone number.
- 1.19. Number Portability Administration Center ("NPAC"): A neutral third party center that processes porting information from and disseminates that information to telecommunications carriers. The NPAC processes the NSP subscriber port request and downloads the LRN associated with the subscriber ported telephone number to local number portability databases.
- 1.20. Old Service Provider ("OSP"): The provider providing service to the customer at the time the customer requests porting of the MDN.
- 1.21. Rate Center: Geographic areas that utilize a common geographical point of reference for distance measurements, called a rating-point, which is defined by Vertical and Horizontal Coordinates.

1.22. Working Telephone Number: A telephone number that is assigned to a Customer that can originate and terminate telephone calls through the Public Switched Telephone Network.

## 2. PURPOSE OF AGREEMENT

The parties desire to enter into this Agreement consistent with all applicable FCC rules and regulations.

## 3. TERM

This Agreement shall become effective May 24, 2004 and, except as otherwise provided in this Agreement, shall continue in full force and effect until either Party terminates the Agreement by providing notice of termination in writing to the other Party at least sixty (60) in advance of such termination pursuant to the Notice provisions set forth in Section 19 of this Agreement. Upon termination, the Parties shall continue to provide LNP if required by applicable laws and regulations.

## 4. NUMBER PORTING

### 4.1. Scope

The Parties shall provide LNP and port Working Telephone Numbers on a reciprocal basis pursuant to this Agreement. The Parties will open all switches and associated NPA-NXXs to support number portability in the serving areas identified in Appendix A.

NXX codes shall be portable in accordance with FCC Rules and Regulations except those permitted to be designated non-portable by the same FCC Rules and Regulations.

### 4.2. Procedures for Providing LNP

- 4.2.1. The Parties shall ensure that all switches, whether currently owned or hereafter acquired, are upgraded to facilitate LNP to the extent required by FCC Rules and Regulations. The Parties shall, as required by FCC orders, disclose upon request any technical limitations that would prevent LNP in any connecting office.
- 4.2.2. The Parties will follow the LNP provisioning process flow and porting intervals recommended by the North American Numbering Council (NANC) for Inter-Service Provider LNP between wireline and wireless carriers. This includes the recommendations of the Local Number Portability Administration Work Group to adopt the Inter-Service Provider LNP Operations Flows and the same porting intervals until the FCC provides further confirmation or modification of these processes.
- 4.2.3. The Parties will follow the LNP ordering procedures established at the OBF for porting of Assigned Telephone numbers.
- 4.2.4. When a telephone number is ported out of the OSP's network, the OSP will, if applicable, remove all line based features and calling card(s) associated with the ported number(s) from its Line Information Database (LIDB). Reactivation of the line-based calling card in another LIDB, if applicable, is the responsibility of the NSP or the Customer.

- 4.2.5. When a telephone number is ported out of the OSP's network, the OSP will follow the 911 Guidelines recommended by the National Emergency Number Association ("NENA") with regard to emergency services databases.
- 4.2.6. When an OSP ports Customer telephone number(s) to the NSP, the OSP shall implement the ten-digit trigger feature where it is available. When the OSP receives the port request, the unconditional trigger shall be applied to the Customer's telephone number prior to the due date and time identified in the port request. When the unconditional trigger is not available, the Parties shall use standard NPAC concurrence procedures.
- 4.2.7. LNP Software is required to be in place and tested prior to any order submission.
- 4.2.8. Reserved numbers may be ported if there is at least one Working Telephone Number in the group.

## 5. LIMITATIONS OF SERVICE

A telephone number can only be ported to a NSP if the Rate Center associated with the NPA-NXX is within the NSP's license area or authorized service area. A telephone number can be ported from a wireline to CMRS Party if the Rate Center associated with the NPA-NXX is within the CMRS provider's license area. A telephone number can be ported from a CMRS to a wireline Party if the Rate Center associated with the NPA-NXX is within the wireline service provider's authorized service area. The Parties recognize that certain NXXs may be non-portable, including those NXXs assigned for internal testing and official use, and any NXXs required to be designated as non-portable by the rules and regulations of the FCC.

## 6. SERVICE DESCRIPTION

Ordering: Both Parties agree to follow the provisions set forth in Appendix D for the exchange of information required to port a customer and the processing of LNP orders.

- 6.1 Pre-order: The Parties agree that a NSP must obtain the affirmative consent of a Customer to authorize the porting of any Working Telephone Number(s) and the disclosure of such Customer's information between the Parties as necessary to facilitate LNP processing.
- 6.2 After receiving a request from a Customer to port telephone number(s), the New Service Provider may request the CSR of the Customer from the Old Service Provider.
- 6.3 Order: The Parties agree that a NSP must submit an order for LNP to the OSP using a 'Local Service Request' (LSR).
- 6.4 All numbers on a LSR that are requested to be ported must reside within the same LRN within an NPAC region. If a customer is requesting to port numbers from multiple LRNs within an NPAC region, a separate LSR must be submitted for all numbers in each LRN within an NPAC region.
- 6.5 Type 1 Number Porting: The Parties agree to migrate all telephone numbers assigned to Type 1 trunks to the Western Wireless mobile switching center utilizing the LNP process. The entire

block(s) of numbers associated with each Type 1 trunk will be incorporated as part of a single LSR. The Parties will work together to accomplish the Type 1 number porting within 15 days of the issuance date of the LSR.

#### Port Processing:

- 6.6 After the NSP sends a LSR to the OSP, the OSP shall determine whether Customer's information in the LSR is correct and whether the port can be completed by the requested date and time. The minimum due date and time (DD/T) intervals for all submitted LSRs is identified in Appendix D. The OSP shall, respond within the Port Request Processing intervals identified in Appendix D and shall send a response to the NSP notifying the NSP whether it can or cannot complete the port by the time requested by the NSP. If the information in the LSR is inaccurate or the port cannot be completed in the requested time, the OSP's response message shall notify the NSP that it denies the request and provide the appropriate reason codes from those listed in the Wireless Intercarrier Communications Interface Specification for Number Portability ("WICIS"), Version 2.0. All reason codes and reason code details should be associated with the respective telephone numbers in error, as applicable. The OSP should conduct a full review of each request, identifying all telephone numbers with suspected errors prior to returning an invalid response. Both parties agree to work expeditiously to resolve incorrect or conflicting information. The NSP can then make the necessary changes and send the LSR back to the OSP for verification. This process shall continue until the OSP accepts the port request and sends a confirmation to the NSP or until the OSP determines that it is incapable of completing the port request and populates the remarks field in the port request indicating this determination to the NSP. If the OSP determines that it is incapable of completing the port or if the OSP fails to respond to the WPR sent by the NSP, the NSP may contact the OSP's Porting Administration Group or Trouble Reporting Contact to ascertain the problem and determine if a remedy is possible and/or whether the NPAC process can begin.
- 6.7 The NSP shall not generate a Subscription Version Create (SV-Create) until it receives a Confirmation from the OSP indicating that the porting process may continue.
- 6.8 NPAC Process: After the OSP has confirmed that it can complete a requested port, the OSP and the NSP shall send an SV-Create regarding the port to the regional NPAC covering the Rate Center associated with the ported number's NPA-NXX. Under no circumstances is the SV-Create to be sent to the NPAC prior to receipt of a valid confirmation response unless otherwise agreed to by the Parties to this Agreement. The SV-Create must be sent for all telephone numbers on the WPR and the date and time must match the Due Date and Time on the LSR sent by the OSP. The Parties shall also update translations in their Central Office(s) from which a telephone number has been ported prior to the date on which the LERG changes become effective so that calls to the ported telephone number may be redirected to the switch of the NSP via route indexing. Mutual NPAC concurrence is required prior to completion of the service request.

After the OSP has confirmed that it can complete a requested port, the Parties shall make all reasonable efforts to complete a request within the time specified in Appendix D, or by the NSP's requested date, whichever is later. Request due date and time should be set to allow for at least the minimum processing time allowed under the guidelines. If the OSP fails to complete a

port by the time specified herein, the NSP may place the telephone number in Conflict with NPAC. If the port has not been completed during the Conflict timer parameter, the NSP can take the port out of Conflict and Activate the telephone number(s).

Deactivation:

6.9 Deactivation: With respect to all services and features related to the Customer ported telephone number, the OSP shall deactivate them within its Network and Billing Systems by or on the requested due date specified in the associated port request.

Return of Numbers:

6.10 All Working Telephone Numbers that have been ported will be released when the NSP ceases providing service to those ported numbers. Release of telephone numbers will be based on the procedures set forth in the FRS and IIS of the Number Portability Administration Center. Each telephone number will be released only after the number has been aged by the NSP for 90 days from the day that service to the telephone number was terminated. An aging interval includes any announcement treatment period, as well as blank telephone number intercept period. For disconnected numbers, the NSP will comply with the NPAC disconnect and snapback process as described in applicable publications of the North American Numbering Council.

## 7. TROUBLE, MAINTENANCE, AND REPAIR

7.1 Operation Support Systems: Both Parties agree to work expeditiously to resolve any issues associated with porting a customer between the two Parties. Before either Party reports a trouble condition, that Party must first use reasonable efforts to isolate the trouble to the other Party's actions or facilities. In order to facilitate trouble reporting and resolution, the Parties shall provide the trouble reporting contact information, per Appendix C. It is the responsibility of each Party to maintain the accuracy of their contact information and to notify the other Party of changes or modifications.

7.2 Trouble: Both Parties shall use commercially reasonable efforts to resolve and/or isolate trouble within 24 hours for single customer affecting issues. Both Parties shall use commercially reasonable efforts to resolve and/or isolate trouble within 6 hours for multiple customer affecting issues.

7.3 Network Maintenance: Each Party shall monitor and perform effective maintenance through testing and the performance of proactive maintenance activities such as routine testing, development of and adherence to appropriate network trouble isolation processes and periodic review of operational elements for translations, routing and network faults.

7.4 Modifications: Each Party will proactively test their new switch features and service offerings to ensure there are no problems.

**9. PRICING/COSTS**

The Parties to this Agreement are responsible for their own costs associated with this Agreement or the porting process, unless otherwise specified in this Agreement.

**10. TESTING**

- 10.1 Each Party shall designate a single point of contact (SPOC) to schedule and perform required tests. These tests shall be performed during a mutually agreed time frame and must conform to industry portability testing and implementation criteria in force in the NPAC region.
- 10.2 Both Parties shall be certified by the regional NPAC prior to scheduling inter-company testing of LNP.
- 10.3 Both Parties shall exchange information identified in Appendix B prior to the commencement of testing.

**11. FRAUD**

The Parties agree to cooperate in good faith with each other to investigate, minimize, and take corrective action in cases of fraud related to number portability.

**12. USE OF TRADEMARKS**

The Parties agree that they will not use the name, service marks or trademarks of the other Party or any of its affiliated companies in any manner whatsoever, without such Party's specific written consent. Neither Party is licensed hereunder to conduct business under any logo, trademark, service or trade name (or any derivative thereof) of the other Party. Neither Party shall issue any press release or other publicity concerning this Agreement without the prior consent of the other Party.

**13. COMPLIANCE WITH LAWS**

The Parties shall comply with all federal, state and local laws applicable to their performance hereunder.

**14. FORCE MAJEURE**

Neither Party shall be responsible for any delay or failure in performance of any part of this Agreement to the extent that such delay is caused by reason of acts of God, wars, revolution, civil commotion, acts of public enemy, embargo, acts of government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing or boycotts, or any other circumstances beyond the reasonable control and not involving any fault or negligence of the Delayed Party ("Condition"). If any such Condition occurs, the Party delayed or unable to perform ("Delayed Party"), upon giving prompt notice to the other Party, shall be excused from such performance on a day-to-day basis during the continuance of such Condition (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis during the same period); provided, however, that the Party so affected

shall use its best reasonable efforts to avoid or remove such Condition and both Parties shall proceed immediately with the performance of their obligations under this Agreement whenever such causes are removed or cease.

**15. ASSIGNMENT**

This Agreement may not be assigned or transferred without the prior written consent of the other Party, which consent may not be unreasonably withheld. Notwithstanding the prior sentence, no prior written consent shall be required for a Party to assign or transfer this Agreement to any subsidiary, Affiliate, parent or successor in interest, or to any entity which acquires all or substantially all of its assets and agrees to be bound by the terms and conditions of this Agreement, provided however, that the assigning Party shall notify the other Party of such assignment or transfer as soon as reasonably practical.

**16. BINDING EFFECT**

This Agreement shall inure to the benefit of, and shall be binding upon the Parties hereto and their respective successors and permitted assigns .

**17. INDEMNIFICATION**

17.1 Each Party shall indemnify and hold harmless the other from any liabilities, claims, or demands, including costs, expenses and reasonable attorney's fees ("Claims") made by third parties resulting from the negligence and/or willful misconduct of a Party, its employees and agents in the performance of this Agreement.

17.2 A Party seeking to be indemnified hereunder will provide the other Party with prompt, written notice of any Claim covered by this indemnification and will cooperate appropriately with the indemnifying Party in the defense thereof. The indemnifying Party shall not settle or compromise any such Claim or consent to the entry of any judgment without the prior written consent of each indemnified Party, such consent not to be unreasonably withheld or delayed.

**18. RELATIONSHIP OF THE PARTIES**

Neither Party undertakes by this Agreement or otherwise to perform or discharge any liability or obligation of the other Party, whether regulatory or contractual, or to assume any responsibility whatsoever for the conduct of the business or operations of the other Party. Nothing contained in this Agreement is intended to give rise to an employment relationship, partnership or joint venture between the Parties or to impose upon the Parties any of the duties or responsibilities of employers, partners or joint venturers.

**19. NOTICES**

Unless otherwise specified in this Agreement, all notices required under this Agreement shall be given in writing. All notices shall be given by personal delivery, overnight courier, confirmed facsimile or

certified mail, return receipt requested to the person(s) specified below or to such other addresses as a Party may designate by written notice to the other Party. If sent by overnight courier or by the United States Postal Service mail, such notices shall be deemed received on the earlier of actual receipt or five (5) business days following deposit.

Notices shall be sent to:

Fax:

**20. WAIVER**

The waiver or failure of either Party to exercise in any respect any right provided for in this Agreement shall not be deemed a waiver of any further right under this Agreement.

**21. SEVERABILITY**

This Agreement shall be subject to all applicable federal, state and local laws, court orders, agency orders, rules and regulations of all governmental agencies and authorities. In the event this Agreement, any of the provisions of this Agreement, or any of the activities under this Agreement, are determined to be inconsistent with or contrary to any applicable federal, state or local laws, court orders, agency orders, rules, or regulations, the latter shall control and any inconsistent term or condition of this Agreement shall terminate without any additional liability attaching to either Party. If the Agreement lawfully can be continued, it is commercially practicable to do so, and the intent of the Parties can be effectuated without the stricken provision, then the Agreement shall continue as amended and the Parties agree to negotiate any such necessary amendments. If the Agreement lawfully can be continued, it is commercially practicable to do so, and the intent of the Parties can be effectuated, but only by further modification of the Agreement, the Parties may so modify the Agreement by executing an appropriate amendment to this Agreement; if the Parties choose not to so modify this Agreement, then this Agreement shall terminate without any additional liability attaching to either Party and further performance shall be excused.

**22. Limitation of Liability**

Neither Party shall be liable to the other in connection with the provision or use of services offered under this Agreement for indirect, incidental, consequential, special damages, including (without

limitation) damages for lost profits, regardless of the form of action, whether in contract, indemnity, warranty, strict liability, or tort.

## 23. ESCALATION PROCEDURES

The Parties shall agree to a single point of contact in each company who shall be notified in the event a Party encounters a post-porting issue(s) or a case of suspected breach of this agreement. This action should precede actions by a Party under Section 24 Dispute Resolution. Once a Party institutes Escalation Procedures under this Section, all Parties shall refrain for three (3) days from taking any action under Section 24. The points of contact for each Party are as follows:

For Carrier A:

(Insert Name & Address)

For Carrier B:

(Insert Name & Address)

## 24. DISPUTE RESOLUTION

### 24.1 General Provisions

- a. Without limitation of the Parties' right to bring a dispute otherwise within the jurisdiction of a regulatory agency before such agency or unless otherwise required by law, the Parties desire to resolve disputes arising out of this Agreement without litigation. Accordingly, in the event of a dispute, claim or controversy arising under this Agreement ("Dispute"), the affected Party shall resolve the Dispute as provided herein.
- b. At the written request of a Party to invoke the procedures hereunder, each Party shall appoint within five (5) days of the request a knowledgeable, responsible representative to meet and negotiate in good faith to resolve a Dispute. Parties may be represented by counsel to assist in and/or conduct such negotiations. The discussions shall be left to the discretion of the representatives. Upon agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence among the representatives for purposes of these negotiations shall be treated as confidential information developed for purposes of settlement, exempt from discovery and production, which shall not be admissible in the arbitration described below or in any lawsuit without the concurrence of all Parties. Documents identified in or provided with such communications, which are not prepared for purposes of the negotiations, are not so exempted and may, if otherwise admissible, be admitted in evidence in the arbitration or lawsuit.
- c. If the foregoing negotiations do not resolve the Dispute within sixty (60) days of the initial written request, either Party may serve upon the other Party by certified mail a written demand that the Dispute be arbitrated, specifying in reasonable detail the nature of the Dispute to be submitted to arbitration in accordance with Section 23.2, below. The demand, effective upon receipt, shall be made within a reasonable time after the Dispute, has arisen. In no event shall

the demand for arbitration be made more than one year after the underlying cause of action arises.

- d. The arbitration hearing shall commence within forty-five days after the demand for arbitration. The arbitrator shall rule on the dispute by issuing a written opinion within thirty (30) days after the close of hearings.
- e. Notwithstanding the Dispute Resolution provisions set forth in Section 23, the provisions in this Agreement addressing Severability as set forth in Section 21 and the provisions allowing for termination as set forth in Section 1.2 take precedence. If the Agreement is terminated any initial negotiations or arbitration in progress shall cease and become moot.

#### 24.2 ARBITRATION.

- a. Agreement to Arbitrate Disputes. Except as set forth in Section 23.1 above, the Parties agree that in the event of any Dispute, such Dispute shall be resolved exclusively by arbitration in accordance with the Commercial Arbitration Rules of the American Arbitration Association, and judgment upon the award rendered by the Arbitrator may be entered in any court having jurisdiction thereof. The Federal Arbitration Act, 9 U.S.C. Secs. 1-15, not state law, shall govern the arbitrability of all Disputes.
- b. Selection of Arbitrator. The Parties further agree that they will ask the American Arbitration Association administrator in the area in which LNP is being provided, to provide to each Party to the Dispute a list of five (5) proposed arbitrators qualified to decide the controversy and who are experienced in telecommunications law. Within seven (7) days of receipt of this list, each Party to the Dispute will cross off names of proposed arbitrators the Party does not wish to use, leaving at least two candidates on the list, will number the remaining names in the order of preference, and will return the annotated list to the administrator. The administrator will select an arbitrator from the modified lists of preferences. The Parties will accept the administrator's selection of the Arbitrator.
- c. Discovery. Discovery shall not be permitted in such arbitration except as allowed by the rules of AAA or such other arbitration agency selected by the Parties pursuant to Section 23.2(a), or as otherwise agreed to by the Parties.
- d. Arbitration Award or Decision. The Parties agree that the arbitrator shall have no power or authority to make awards or issue orders of any kind except as permitted by this Agreement and substantive law, and in no event shall the arbitrator have the authority to make any award that provides for punitive or exemplary damages. The arbitrator's decision shall follow the plain meaning of this Agreement and the relevant documents. The arbitrator's award shall be final and binding and may be enforced in any court of competent jurisdiction. Each Party shall bear its own costs and attorneys' fees, and shall share equally in the fees and expenses of the arbitrator.

#### 25. ARTICLE HEADINGS

The headings of the Articles are inserted for convenience of reference only and are not intended to be part of or to affect the meaning or interpretation of this Agreement.

**26. CHOICE OF LAW AND JURISDICTION**

The construction, interpretation and performance of this Agreement shall be governed by and construed in accordance with the laws of the state in which LNP is being provided, without regard to any conflicts of law principles that would require the application of the laws of any other jurisdiction.

**27. AMENDMENTS**

Amendments, modifications and supplements to this Agreement are allowed provided: (a) all such amendments, modifications and supplements shall be in writing signed by authorized representatives of both Parties, and (b) all such amendments, modifications and supplements shall by reference incorporate this Agreement in its entirety and identify the specific sections or paragraphs contained herein which are amended, modified or supplemented, and (c) all such amendments, modifications and supplements shall not be construed to adversely affect vested rights or causes of action which have accrued prior to the Effective Date of such amendment, modification or supplement.

**28. ENTIRE AGREEMENT**

This Agreement together with its exhibits constitutes the entire agreement between the Parties and cancels all contemporaneous or prior agreements, whether written or oral, with respect to the subject matter of this Agreement. No modifications shall be made to this Agreement unless in writing and signed by authorized representatives of the Parties.

**29. SIGNATURES**

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement through their authorized representatives.

## Information Required for Logging Trouble Tickets

### Sprint PCS:

- Customer name and organization.
- Full description of the issue and expected results.
- Steps to reproduce the issue and relevant data.
- All applicable issue, log, and system files.
- Any special circumstances surrounding the discovery of the issue (e.g., first occurrence or occurred after what specific event).
- Customer's business impact of problem and suggested priority for resolution.

### Trading Partner:

- Customer name and organization.
- Full description of the issue and expected results.
- Steps to reproduce the issue and relevant data.
- All applicable issue, log, and system files.
- Any special circumstances surrounding the discovery of the issue (e.g., first occurrence or occurred after what specific event).
- Customer's business impact of problem and suggested priority for resolution.

## Porting Validation Standards

### Information Required for Port Validation:

#### Sprint PCS:

Last Name or Business Name  
Zip Code  
SSN or Tax ID or Acct. No.  
MDN  
If corporate liable - a password or pin number.

#### Trading Partner:

## Porting Business Rules Exhibit E

#### Sprint PCS:

- Complex Ports – Sprint PCS will accept only single line ports. Multiline ports must be submitted as multiple single line ports.
- Resellers – Sprint PCS will accept port requests on behalf of our resellers, however all validation is based on the resellers' processes.

#### Trading Partner:

The carriers agree that information contained in this Part A is operational in nature and subject to change.

The carriers agree to make every effort to give the other carrier thirty (30) days' notice of any changes to its information pursuant to the General Contact Information set forth in Part A.

**The carriers' contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.**

**Part B – General Contact Information and  
Trouble Reporting Contact Information**

**For Verizon Wireless:**

**General Contact Information**

**Wireless-Wireline Porting:**

Verizon Wireless Porting Center

Hours of Operation: 24 x 7 x 365 (open all holiday's, no exceptions)  
Address: 300 River Rock Blvd.  
Murfreesboro, TN 37128  
Phone: 1-800-488-2002

**Porting Center Carrier Relations**

Contact: Associate Director of Inter-Carrier Relations  
Phone: 1-800-711-9300  
Fax: 1-615-372-2411  
Hours: 8:00am to 5:00pm (Central Time)  
E-mail: [PortCenterICR@GL.VerizonWireless.com](mailto:PortCenterICR@GL.VerizonWireless.com)

**Pre-Launch (Pre-11/24/03) Inter-Carrier Test Scheduling**

Contact: Wireline Inter-Carrier Test Coordinator  
Phone: 1-248-915-3430  
Fax: 1-248-915-3799  
E-mail: [Marie.Moore@VerizonWireless.com](mailto:Marie.Moore@VerizonWireless.com)

**Post-Launch (Post-11/24/03) Inter-Carrier Test Scheduling**

Contact: Inter-Carrier Relations  
Phone: 1-800-711-9300  
Fax: 1-615-372-2411  
E-mail: [PortCenterICR@GL.VerizonWireless.com](mailto:PortCenterICR@GL.VerizonWireless.com)

**Trouble Reporting Contact Information**

Process: The Verizon Wireless Porting Center is the initial interface for all trouble resolution activity associated with porting numbers. The Porting Center will refer issues to the appropriate internal Network or provisioning group for resolution within Verizon Wireless.

**Trouble Area:**

ICP/General Trouble Reporting

Phone: 1-800-711-9300

Note: Each carrier shall make available a Porting Administration Group or Trouble Reporting contact on a 24x7x365 basis.

The Trouble Reporting Contacts may be amended from time to time by a carrier upon providing thirty (30) days' written notice to the other at the General Contact Information set forth in this Part A.

**The carriers' contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.**

## Part C – Trouble Ticket Detail

### For Verizon Wireless:

#### Information Required For Logging Trouble Tickets\*

The following may be required for trouble reports:

- Carrier Name;
- Reporting Carrier organization;
- SPID and associated OCN(s);
- Point of Contact Name;
- Point of Contact Number;
- Porting Telephone Number/MDN;
- LRN;
- Time and Date of Port;
- Associated Error Codes;
- Description of Problem; and
- Other relevant data.

### For Wireline Carrier B:

#### Information Required For Logging Trouble Tickets\*

The following is proposed information for trouble reports:

- Carrier Name;
- Reporting Carrier organization;
- SPID and associated OCN(s);
- Point of Contact Name;
- Point of Contact Number;
- Porting Telephone Number/MDN;
- LRN;
- Time and Date of Port;
- Associated Error Codes;
- Description of Problem; and
- Other relevant data.

\*Each carrier shall make available a Porting Administration Group or Trouble Reporting contact on a 24x7x365 basis.

**The carriers contact information contained in this Trading Partner Profile is for the sole purpose of carrier-to-carrier communication and not for distribution to customers and/or end users.**

## Part D – Porting Validation Standards

### For Verizon Wireless:

#### Information Required For Post-Paid Port Validation:

1. Billing Last Name
2. Business Name if no information for Billing Name
3. Five Digit Zip Code
4. SSN/Tax ID Number
5. Account Number if no SSN or Tax ID
6. Porting Telephone Number

#### Information Required for Pre-Paid Port Validation:

1. Porting Telephone Number
2. Password/PIN

### For Wireline Carrier B:

#### Information Required For Post-Paid Port Validation:

#### Information Required for Pre-Paid Port Validation:

Note: Other than those mandatory data items set forth in Section 3.3.1 of the WICIS, the above shall be the only information which may be utilized by a carrier to this Trading Partner Profile to validate a port request for post-paid numbers. "Delay" or "denial" of ports between the carriers shall occur only in the event a carrier is unable to complete the validation of those validation elements expressly set forth above. Once validated, the Carriers shall be obligated to complete the porting transaction. Any variations or proposed changes in the agreed data fields noted above shall be communicated to the other carrier at the information provided in Part B.

## Porting Questionnaire with Verizon Wireless

**Carrier Name:**

**Completed by:**

**Date:**

1. Name of point of contact (within your company)
  - a. Phone number
  - b. Fax number
  - c. E mail address
2. Name of back up or secondary contact (within your company)
  - a. Phone number
  - b. Fax number
  - c. E mail address
3. Hours of operation
4. Observed holidays
5. Mailing address
6. Please provide the SPID(s) associated with you company.
7. Is your company associated with or a subsidiary of any other companies? If so, which companies and SPIDS
8. How should Verizon Wireless submit a port request or LSR to your company?  
Fax? Email?
9. What is your turnaround for port requests (3,4 or 5 days)?

10. If fax, does the company utilize TSP?
  - a. If not, please provide the fax number
  - b. If multiple SPID's are involved, do the requests go to the same fax or different numbers?
  - c. If multiple fax numbers, please provide a list with SPID and corresponding fax number.
  - d. Are different areas (or regions) covered by different SPIDs (i.e. Northeast US covered by SPID 1234, Southeast US covered by SPID 5678, etc)?
  
11. If E Mail, please provide e-mail address(es).
  - a. If multiple SPID's are involved, do the requests go to the same e-mail address or different addresses?
  - b. If multiple addresses, please provide a list with SPID and corresponding e-mail addresses.
  - c. Are different areas (or regions) covered by different SPIDs (i.e. Northeast US covered by SPID 1234, Southeast US covered by SPID 5678, etc)?
  
12. If requests are to be sent by any other method, please provide instructions in detail.
  
13. What LSOG (LSR) version does the company use?
  
14. Does the company have a template of the LSR, EUI and NP forms showing your required fields and format?
  - a. If yes, can the company provide a copy?
  - b. If not, can someone go thru a form, line by line, with us to verify properly prepared forms are submitted?
  
15. Does your company resell numbers to other carriers (type one)?
  - a. If yes:

What companies?

What are their SPIDs?

Any specific NPA-NXX?

Do you have any contact information for these companies?

- b. Does your company or has your company purchased numbers from other carriers?

16. Is the company willing to test with Verizon Wireless?

Any additional comments:

Please return completed form and any attachments to me via fax at 615-372-2382 or via e-mail at [Nilda.Penn@verizonwireless.com](mailto:Nilda.Penn@verizonwireless.com)

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

IN THE MATTER OF THE PETITION  
OF MIDSTATE COMMUNICATIONS,  
INC. FOR SUSPENSION OR MODIFI-  
CATION OF § 251(b)(2) OF THE COM-  
MUNICATIONS ACT OF 1934 AS  
AMENDED

Docket No. TC04-052

DIRECT PRE-FILED TESTIMONY OF  
MARK BENTON

May 14, 2004

**Q: Please state your business name and address?**

A: My name is Mark D. Benton, General Manager of Midstate Communications, Inc. My business address is 120 East First, Kimball, SD 54355. My business telephone number is 605-778-6221.

**Q: By whom are you employed and in what capacity?**

A: I am the General Manager of Midstate Communications, Inc. (Midstate). Midstate is a rural independent local exchange carrier that provides local exchange, exchange access and other telecommunications services to 4896 access lines, of which 307 have lifeline service. Midstate's service area includes the exchanges of Academy, Delmont, Fort Thompson, Gann Valley, Geddes, Kimball, New Holland, Platte, Pukwana, Stickney, and White Lake.

**Q: Does your company have any direct points of interconnection with any wireless carrier and/or does your company provide any blocks of numbers for your company's rate centers to any wireless carrier?**

A: Yes.

**Q: What is the current method of routing calls from your subscriber's landline phones to wireless phone numbers?**

A: Midstate has points of interconnection (POI) with SDN and Quest. The SDN connection is for toll completion and toll termination for InterLATA and IntraLATA traffic. The Qwest POI is a terminating trunk, only for Qwest IntraLATA traffic.

**Q: Have any subscribers requested local number portability (LNP) from your company?**

A: To the best of my knowledge, no subscribers have requested LNP.

**Q: Since the passage of the 1996 Telecom Act have any wireline carriers ever requested LNP from your company?**

A: No.

**Q: Have any wireless carriers requested LNP?**

A: Yes.

**Q: How much time would be required for your company to provide LNP, if ordered by the Commission?**

A: We have not completed a specific implementation time line yet, but implementation will take a considerable amount of time.

**Q: In your experience as the general manager of Midstate have you seen increases or additions to the itemized fees on your customer's telephone bills?**

A: Yes.

**Q: What do you expect your customer's reaction to be to any new LNP fees on their bills?**

A: I would expect the reaction to be very negative.

**Q: Is the public interest, convenience, and necessity served by requiring your company to implement LNP at this time?**

A: No. The current demand for LNP appears to be non-existent, as no customers have requested LNP and the cost of LNP is significant.

**Q: Does this conclude your direct testimony?**

A: Yes.

CATION OF § 251(b)(2) OF THE COM-  
MUNICATIONS ACT OF 1934 AS  
AMENDED

Docket No. TC04-052  
REBUTTAL TESTIMONY OF  
MARK BENTON

---

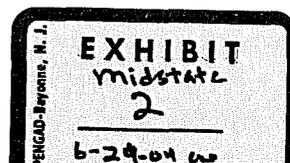

REBUTTAL TESTIMONY OF

MARK BENTON

ON BEHALF OF

MIDSTATE COMMUNICATIONS, INC.

June 14, 2004

1 Q. Please state your name, business name and address.

2 A. **My name is Mark Benton. I am the General Manager of Midstate Communications,**  
3 **Inc. (“Midstate”), of 120 East 1<sup>st</sup> Street, Kimball, South Dakota 57355.**

4 Q. What is the purpose of your testimony?

5 A. **I will provide rebuttal testimony to various statements made by Ron Williams in his**  
6 **testimony filed on May 28, 2004, on behalf of WWC License L.L.C. (Western Wire-**  
7 **less).**

8 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners “waited 4 months to seek  
9 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
10 their legal obligations.” How do you respond?

11 A. **I dispute Mr. Williams’ characterization of events as baseless and inflammatory.**  
12 **Once the FCC made it clear that wireline carriers would be required to port num-**  
13 **bers to wireless carriers in areas outside the top 100 MSAs by May 24, 2004, Mid-**  
14 **state took immediate steps to investigate the cost and the processes involved with**  
15 **LNP and to explore its legal options. Because Midstate had no experience with**  
16 **LNP, it took time to gather the pertinent information and to make the decision to**  
17 **seek a suspension of the requirement from the Commission. Further, the suspension**  
18 **petition itself took time and effort to prepare because Midstate wanted to present as**  
19 **complete a petition as possible, accompanied by cost information as complete as**  
20 **possible.**

21 Q. Do you agree with Mr. Williams’ statement at page 14, lines 19-22, in which he states  
22 that “LECs will need to route a call to a ported number to the serving tandem” and to Mr.

1 Williams' statement at page 15, lines 1-4 when he discusses the routing of allegedly "lo-  
2 cal calls?"

3 A. In its answer to Interrogatory 4., Western Wireless identifies the "serving tandem"  
4 as the Qwest LATA or local tandem, which is outside of Midstate's service territory.  
5 (See Western Wireless Response to Interrogatory 4., attached to the Rebuttal Tes-  
6 timony of Steven E. Watkins). Therefore, Mr. Williams' statement is not consistent  
7 with Midstate's current call routing practices, because it would require Midstate to  
8 route calls to a point outside of its service territory (other than via an EAS ar-  
9 rangement) as local. I note that in its answer to Interrogatory 7., Western Wireless  
10 admits that there is no requirement for Midstate to route calls to the Qwest tandem.  
11 (See Western Wireless Response to Interrogatory 7 attached to the Rebuttal Testi-  
12 mony of Steven E. Watkins.) Rather, calls that terminate outside Midstate's service  
13 territory, including calls to Western Wireless within the Midstate exchanges where  
14 Western Wireless does not have a direct connection, are routed to interexchange  
15 carriers for termination. Only traffic routed to Western Wireless via a direct con-  
16 nection within a Midstate exchange is routed as "local traffic." Therefore, it ap-  
17 pears that Western Wireless' argument really is a bad faith attempt to change the  
18 agreement between the parties.

19 Q. At page 19, lines 8-10, Mr. Williams states that it is his belief that "the FCC views that it  
20 is the originating carrier's responsibility to deliver local traffic for termination and that  
21 the costs associated with fulfilling that responsibility are not a number portability cost."  
22 What is your response to this statement?

1 A. Mr. Williams' statements are inconsistent and should be rejected. First he argues  
2 that Midstate should be required to install new facilities to deliver ported calls to  
3 Western Wireless and then he argues that the cost of those facilities are not number  
4 portability costs.

5 Q. At page 20, lines 13-16, Mr. Williams states that "[t]he routing methods proposed by the  
6 Petitioners are inefficient in that they make little or no utilization of existing equipment  
7 and shared facilities currently used to exchange calls with other carriers." How do you  
8 respond?

9 A. The routing methods reflected in the cost exhibit attached to Midstate's Petition are  
10 based on the current routing arrangements that Midstate has in place with other  
11 carriers, namely, calls that are dialed on a local 7-digit basis are routed via direct  
12 connections. For example, where there is a direct connection between Midstate and  
13 Western Wireless, customers in that exchange can call a Western Wireless customer  
14 on a local 7-digit basis. Therefore, if calls to numbers ported to a carrier are to be  
15 dialed on a local 7-digit basis, a direct connection needs to be established between  
16 the carriers.

17 Q. Would Western Wireless' routing proposal have impacts to Midstate beyond LNP?

18 A. Yes. It is my understanding that Western Wireless' proposal would increase Mid-  
19 state's costs. First, Western Wireless' proposal would require Midstate to pay for  
20 new facilities to the tandem provider that it does not need for any purpose other  
21 than to route calls to ported numbers to wireless carriers. Second, Midstate would  
22 most likely have to pay transit traffic charges to the tandem provider for transport-  
23 ing the traffic to the wireless carriers. Third, in response to Interrogatory 16.b.,

1 Western Wireless indicates that Midstate would be required to pay reciprocal com-  
2 pensation on calls to ported numbers, even if Midstate does not pay compensation  
3 on such calls today. (See Western Wireless Response to Interrogatory 16.b. at-  
4 tached to the Rebuttal Testimony of Steven E. Watkins.)

5 Q. Is there any other impact?

6 A. Yes. It appears that Western Wireless' proposal would create a regulatory arbi-  
7 trage scenario that could lead to the loss of access revenues. Today, certain calls to  
8 wireless carriers are routed to interexchange carriers. For example, if Midstate  
9 Customer A calls Western Wireless Customer B in an exchange where there is no  
10 direct connection and no EAS arrangement, Midstate Customer A incurs a toll  
11 charge. However, under Western Wireless' proposal, it is my understanding that if  
12 Midstate Customer A calls Western Wireless Customer B, who now has a number  
13 ported from Midstate, Midstate Customer A would be charged for a local call. Cus-  
14 tomers may be encouraged to "give up" their existing wireless numbers and obtain  
15 wireline numbers for the sole purpose of porting that number to avoid toll charges.  
16 This is not only a bad public policy result, but also simply a bad faith attempt to  
17 avoid an important contract provision upon which Western Wireless has already  
18 agreed with our company.

19 Q. Does this conclude your rebuttal testimony?

20 A. Yes.

CERTIFICATE OF SERVICE

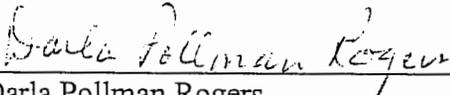

The undersigned hereby certifies that she served a copy of the foregoing **REBUTTAL TESTIMONY** upon the persons herein next designated, on the date below shown, by depositing a copy thereof in the United States mail at Pierre, South Dakota, postage prepaid, in an envelope addressed to each said addressee, to-wit:

**Q: Please state your name and business address.**

A: My name is Rod Bowar, and my business address is P.O. Box 158, 220 South Main, Kennebec, SD 57544. My business telephone number is (605) 869-2220.

**Q. By whom are you employed and in what capacity?**

A. I am the General Manager of Kennebec Telephone Company (“Kennebec”). Kennebec is a rural independent local exchange carrier that provides local exchange, exchange access and other telecommunications services to subscribers within its South Dakota service area, which includes the exchanges of Kennebec and Presho. As of December 31, 2003, Kennebec provided service to 751 total access lines, 31 of which receive Lifeline service.

**Q: On whose behalf are you presenting testimony?**

A: I am presenting testimony on behalf of Kennebec.

**Q: What is the purpose of your testimony in this proceeding?**

A. The purpose of my testimony is to explain how the implementation of wireline-to-wireless local number portability (“LNP”) would impact the consumers of Kennebec. Specifically, I will review the results of a survey that was conducted for Kennebec, which indicates that the overwhelming majority of our customers do not want wireline-to-wireless LNP at any price. I will also provide demographic information on Kennebec’s customers such as age and income distributions. This information further indicates the adverse economic impact that would occur on Kennebec’s customers if wireline-to-wireless LNP were to be implemented.

1 **Q. Please describe how you gathered information regarding the opinions of**  
2 **Kennebec's consumers about the implementation of wireline-to-wireless**  
3 **LNP.**

4 A. Kennebec commissioned TELEC Consulting Resources, Inc. to conduct a survey  
5 of its consumers. The survey was developed, administered, and analyzed by Ms.  
6 Sue Vanicek. Ms. Vanicek has conducted numerous surveys on telecommunica-  
7 tions issues in her position as a Senior Consultant at TELEC Consulting Re-  
8 sources, Inc., as well as in her previous employment at Lincoln Telephone/Aliant  
9 Communications. I worked with Ms. Vanicek throughout the process, including  
10 discussing the information we would want to collect in a survey, and approving  
11 the questionnaire prior to its distribution.

12 **Q. How was the survey conducted?**

13 A. A questionnaire was mailed to each of Kennebec's residential and business cus-  
14 tomers during January, 2004. A total of 575 surveys were mailed, and 208 sur-  
15 veys were returned, for a response rate of 36 percent. A postage-paid return enve-  
16 lope was included with the questionnaire, so that consumers would incur no costs  
17 in completing the survey. The survey explained how wireline-to-wireless LNP  
18 would function, and that consumers would pay a monthly surcharge for five years  
19 so that Kennebec could recover the costs of LNP implementation if it were of-  
20 fered.

21 **Q. How reliable is the survey?**

22 A. Ms. Vanicek indicated that based on the number of returned surveys out of the to-  
23 tal mailed, the margin of error for this survey is  $\pm 4.3$  percent at the 95 percent

1 level of confidence. This means that if the survey were conducted 100 times, 95  
2 out of 100 times the results would be within  $\pm$  4.3 percent of the results generated  
3 by this survey.

4 **Q. How willing are consumers to pay an LNP surcharge in order to have wire-**  
5 **line-to-wireless LNP available to them?**

6 A. Only about one-fifth of Kennebec's customers (21.4 percent) said that they would  
7 be willing to pay a surcharge of \$0.50 per month for LNP. When asked if they  
8 would be willing to pay a surcharge of \$1.00 per month, the proportion dropped to  
9 11.8 percent, or about one in ten customers. When asked if they would be willing  
10 to pay a surcharge of \$2.00 per month, the proportion dropped to 2.6 percent, or  
11 about one in forty customers. Only 1.6 percent of Kennebec's customers said  
12 they would be willing to pay a surcharge of \$3.00 per month for LNP.

13 **Q. What other information did the survey reveal?**

14 A. About three-quarters of the survey respondents (73.4 percent) said they have a  
15 wireless telephone. Therefore, if the South Dakota Public Utilities Commission  
16 ("Commission") ordered Kennebec to provide wireline-to-wireless LNP, about  
17 one-fourth of Kennebec's customers would be paying a charge for a feature they  
18 would never use, because they do not own a wireless phone to which they could  
19 port their landline telephone number.

20 **Q. What types of comments did Kennebec's consumers make on wireline-to-**  
21 **wireless LNP?**

22 A. At the end of the survey we asked consumers to provide any written comments  
23 they wished to make on wireline-to-wireless LNP. There were three common

1 themes in the responses. One theme was that Kennebec's customers do not want  
2 to pay for a service that they would not use. A second common theme was that  
3 wireless service was poor or nonexistent in many of the areas served by Kenne-  
4 bec. A third theme contained in the comments was that customers thought rates  
5 were high enough and did not want to see any rate increases.

6 **Q. Do you have any other observations on the comments you received from**  
7 **Kennebec's consumers?**

8 A. Yes. I understand that the Federal Communications Commission ("FCC") has  
9 stated that wireline-to-wireless LNP is a benefit to consumers. However, com-  
10 ments we received included responses such as "THIS IS GOV. SHORTSIGHT-  
11 EDNESS" and "stupid." I think these comments indicate that not all consumers  
12 agree with the FCC that wireline-to-wireless LNP is beneficial.

13 **Q. Have any subscribers requested LNP from your company?**

14 A. No, we have had no subscriber requests for LNP.

15 **Q. Have any wireline carriers requested LNP from your company?**

16 A. No, we have received no requests for LNP from wireline carriers.

17 **Q. Have any wireless carriers submitted requests for LNP?**

18 A. Yes.

19 **Q. How much time would be required for your company to provide LNP,**  
20 **if ordered by the Commission?**

21 A. Kennebec has not completed a specific implementation time line yet, but  
22 Implementation takes a considerable amount of time.

1 **Q. Please describe what demographic information reveals about Kennebec's**  
2 **customers.**

3 A. The areas served by Kennebec are composed of consumers who are older and  
4 have lower incomes than the nation as a whole. For example, one in five resi-  
5 dents (20.4 percent) of Kennebec and Presheo are 65 or older as of the 2000 Cen-  
6 sus of Population. This compares to about one in eight people (12.4 percent) in  
7 the United States in that same age group. About three in ten households (28.3  
8 percent) in Kennebec and Presheo have incomes of less than \$20,000 per year, ac-  
9 cording to the 2000 Census. This compares with about two in ten households  
10 (22.1 percent) in the United States in that same range of income.

11 **Q. What does this demographic data indicate in terms of the impact of a possi-**  
12 **ble LNP surcharge and/or other rate increases to recover the cost of LNP**  
13 **implementation on Kennebec's customers?**

14 A. Many elderly households are on fixed incomes. Because Kennebec serves a  
15 greater proportion of elderly than the national average, an LNP surcharge or other  
16 rate increases to recover the cost of LNP implementation could cause a greater  
17 burden on Kennebec's customers than occurs in the nation as a whole. This same  
18 statement regarding the burden on Kennebec's customers is also true with regard  
19 to income. Because Kennebec serves a greater proportion of households with low  
20 incomes than the nation as a whole, the burden imposed by an LNP surcharge or  
21 other rate increases related to LNP implementation will cause a greater burden on  
22 Kennebec's consumers.

1 **Q. Based on the survey results, the lack of requests for LNP, and the demo-**  
2 **graphic data for Kennebec, what do you expect your customer's reaction**  
3 **would be to any new LNP fees that might be added to their bills?**

4 A. Based on the combination of the vast majority of customers stating they do not  
5 want to pay an LNP surcharge, the customer comments indicating that they do not  
6 want to pay for a service that they will not use, the lack of customer requests for  
7 LNP, and the data demonstrating that Kennebec serves more elderly and low-  
8 income customers than the nationwide average, I would expect a very negative  
9 reaction from customers to the addition of charges on their bill to pay for LNP.

10 **Q. Based on the survey data and demographic data, what is your conclusion**  
11 **generally about the impact of the implementation of wireline-to-wireless**  
12 **LNP on Kennebec's customers.**

13 A. I believe that requiring Kennebec to implement wireline-to-wireless LNP would  
14 result in an adverse economic impact on Kennebec's customers. This is one of  
15 the factors to be considered in a petition for a suspension or modification of Sec-  
16 tion 251(b)(2) of the Telecommunications Act of 1996, as discussed in Mr. Wat-  
17 kins' testimony. As I explained, the vast majority of consumers in Kennebec's  
18 service area do not want to pay an LNP surcharge of \$0.50 or more. Further-  
19 more, Kennebec serves a greater proportion of the population that is older and  
20 has lower incomes than the national average, making any LNP surcharge and  
21 other costs that may be passed on to consumers an even greater burden.

22 **Q. How should the Commission proceed in this matter?**

1 A. As demonstrated in my testimony and the testimony of Messrs. Watkins, Davis,  
2 and Bullock, Kennebec has met the criteria set forth in 47 U.S.C. Section  
3 251(f)(2)(A). In addition, the suspension requested in this proceeding is consis-  
4 tent with the public interest, convenience and necessity requirement set forth in 47  
5 U.S.C. Section 251(f)(2)(B) as is more specifically addressed in Mr. Watkins' tes-  
6 timony. Therefore, I believe Kennebec has met its burden of proof under 47  
7 U.S.C. Section 251(f)(2), and the Commission should grant Kennebec's petition  
8 for suspension or modification.

9 Kennebec requests suspension of the LNP requirement until there is evidence of  
10 reasonable demand for LNP, and until the per-line cost of LNP is reduced. At a  
11 minimum suspension should be granted until six months following the FCC's full  
12 and final disposition of the issues associated with the porting interval and the  
13 routing of calls between wireline and wireless providers, at which time Kennebec  
14 may need to seek further Section 251(f)(2) relief based upon the economic impact  
15 of these decisions.

16 **Q. Does this conclude your testimony?**

17 A. Yes, it does.

**RECEIVED**

BEFORE THE PUBLIC UTILITIES COMMISSION

**KENNEBEC TELEPHONE COMPANY**

**June 14, 2004**

1 Q. Please state your name, business name and address.

2 A. **My name is Rod Bowar. I am the General Manager of Kennebec Telephone Com-**  
3 **pany ("Kennebec"), whose address is 209 South Main, Kennebec, South Dakota**  
4 **57544.**

5 Q. What is the purpose of your testimony?

6 A. **I will provide rebuttal testimony to various statements made by Ron Williams in his**  
7 **testimony filed on May 28, 2004 on behalf of WWC License L.L.C. (Western Wire-**  
8 **less).**

9 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners "waited 4 months to seek  
10 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
11 their legal obligations." How do you respond?

12 A. **I dispute Mr. Williams' characterization of events as baseless and inflammatory.**  
13 **Once the FCC made it clear that wireline carriers would be required to port num-**  
14 **bers to wireless carriers in areas outside the top 100 MSAs by May 24, 2004, Ken-**  
15 **nebec took immediate steps to investigate the cost and the processes involved with**  
16 **LNP and to explore its legal options. Because Kennebec had no experience with**  
17 **LNP, it took time to gather the pertinent information and to make the decision to**  
18 **seek a suspension of the requirement from the Commission. Further, the suspension**  
19 **petition itself took time and effort to prepare because Kennebec wanted to present**  
20 **as complete a petition as possible, accompanied by cost information as complete as**  
21 **possible.**

22 Q. Do you agree with Mr. Williams' statement at page 14, lines 19-22, in which he states  
23 that "LECs will need to route a call to a ported number to the serving tandem" and to Mr.  
24 Williams' statement at page 15, lines 1-4 when he discusses the routing of allegedly "lo-  
25 cal calls?"

1 A. I believe that Mr. Williams' statement is not consistent with the interconnection  
2 agreement signed by Kennebec and Western Wireless. Pursuant to that agreement,  
3 Kennebec did not agree to route traffic destined for Western Wireless to the serving  
4 tandem. Rather, traffic terminating to Western Wireless is routed to an interex-  
5 change carrier. Therefore, it appears that Western Wireless' argument really is a  
6 bad faith attempt to change the agreement between the parties.

7 Q. At page 19, lines 8-10, Mr. Williams states that it is his belief that "the FCC views that it  
8 is the originating carrier's responsibility to deliver local traffic for termination and that  
9 the costs associated with fulfilling that responsibility are not a number portability cost."  
10 What is your response to this statement?

11 A. Mr. Williams' statements are inconsistent and should be rejected. First he argues  
12 that Kennebec should be required to install new facilities to deliver ported calls to  
13 Western Wireless and then he argues that the cost of those facilities are not number  
14 portability costs. Further, as discussed at lines 1-6 above, Mr. Williams' suggestion  
15 that it is Kennebec's responsibility to deliver traffic destined to Western Wireless  
16 through a serving tandem is not consistent with the interconnection agreement be-  
17 tween Kennebec and Western Wireless.

18 Q. At page 20, lines 13-16, Mr. Williams states that "[t]he routing methods proposed by the  
19 Petitioners are inefficient in that they make little or no utilization of existing equipment  
20 and shared facilities currently used to exchange calls with other carriers." How do you  
21 respond?

22 A. The routing methods reflected in the cost exhibit attached to Kennebec's Petition  
23 are based on the current routing arrangements that Kennebec has in place with  
24 other carriers, namely, calls that are dialed on a local 7-digit basis are routed via di-  
25 rect connections. Therefore, if calls to numbers ported to a carrier are to be dialed

1 on a local 7-digit basis, a direct connection needs to be established between the car-  
2 riers.

3 Q. Would Western Wireless' routing proposal have impacts to Kennebec beyond LNP?

4 A. Yes. It is my understanding that Western Wireless' proposal would increase Ken-  
5 nebec's costs. First, Western Wireless' proposal would require Kennebec to pay for  
6 new facilities to the tandem provider that it does not need for any purpose other  
7 than to route calls to ported numbers to wireless carriers. Second, Kennebec would  
8 most likely have to pay transit traffic charges to the tandem provider for transport-  
9 ing the traffic to the wireless carriers.

10 Q. Is there any other impact?

11 A. Yes. It appears that Western Wireless' proposal would create a regulatory arbi-  
12 trage scenario that could lead to the loss of access revenues. Today, certain calls to  
13 wireless carriers are routed to interexchange carriers. For example, if Kennebec  
14 Customer A calls Western Wireless Customer B, Kennebec Customer A incurs a toll  
15 charge. However, under Western Wireless' proposal, it is my understanding that if  
16 Kennebec Customer A calls Western Wireless Customer B who now has a number  
17 ported from Kennebec, Kennebec Customer A would be charged for a local call.  
18 Customers may be encouraged to "give up" their existing wireless numbers and ob-  
19 tain wireline numbers for the sole purpose of porting that number to avoid toll  
20 charges. This is not only a bad public policy result, but also simply a bad faith at-  
21 tempt to avoid an important contract provision upon which Western Wireless has  
22 already agreed with our company.

23 Q. Does this conclude your rebuttal testimony?

24 A. Yes.

**DIRECT TESTIMONY OF DAN DAVIS  
ON BEHALF OF MIDSTATE COMMUNICATIONS, INC.  
REGARDING COMPANY-SPECIFIC COST DATA**

**Q1. Please State your name, Employer, Business Address and Telephone Number.**

A. My name is Dan Davis. I am employed with TELEC Consulting Resources Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln Nebraska, 68508.

**Q2. On whose behalf are you testifying?**

A. I am testifying on behalf of the Company identified in the caption of the docket set out above. I will refer to this Company as the "RLEC".

**Q3. Have you provided your background information and an explanation of your role in this Docket in the "companion" testimony that has been offered in this Docket?**

A. Yes, I have.

**Q4. Did you prepare Exhibit 1 to the Petition of the RLEC filed in this Docket?**

A. Yes, in conjunction with members of the professional staff of TELEC, I was responsible for the preparation of Exhibit 1 as was attached to the Petition and I was also responsible for the preparation of supporting information prepared in connection with the responses to the discovery requests of Western Wireless. I was also responsible for the preparation of Exhibit 2 that is attached to this testimony.

**Q5. In your "companion" testimony you have explained the line items that comprise Exhibit 2 and the process used to compile the data that was used to develop the cost as shown on Exhibit 2. Please discuss where in your "companion" testimony you describe this process.**

1 A. The process that was used to compile and develop the cost per line in Exhibit 2 is  
2 described on pages four through six in my “companion” testimony.

3 **Q6. What was the source of the data?**

4 A. The data was derived from the books, financial records and managers of the  
5 RLEC. Data was also obtained from switch vendors, engineering consultants, tar-  
6 iffs, service order administration service bureaus, the number portability admini-  
7 stration center, a number portability database provider, and my professional ex-  
8 perience.

9 **Q7. What was the purpose of obtaining that particular data?**

10 A. To assist me in preparing an estimate of the costs to implement LNP for the  
11 RLEC.

12 **Q8. Is this the type of data that experts in your field would ordinarily review in  
13 formulating an opinion concerning the costs of LNP?**

14 A. Yes.

15 **Q9. What use did you make of the data after you received it from the RLEC?**

16 A. I have explained the use of the data on page six of my “companion” testimony.

17 **Q10. Have you reached an opinion with a reasonable degree of professional cer-  
18 tainty as to the total non-recurring costs, excluding transport, to implement  
19 LNP that you have calculated for the RLEC that will be recovered over a 5-  
20 year recovery period through an end user surcharge?**

21 A. Yes. My opinion is that the total non-recurring costs, excluding transport, is  
22 \$113,394.00. Such costs were amortized over a recovery period of 60 months us-

1 ing a rate of return of 11.25%. The total nonrecurring costs per month, excluding  
2 transport, amortized over five years is \$2,480.00.

3 **Q11. Have you reached an opinion with a reasonable degree of professional cer-**  
4 **tainty as to the total recurring costs, excluding transport, to implement LNP**  
5 **that you have calculated for the RLEC and that will be recovered from end**  
6 **users on an ongoing monthly charge basis?**

7 A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$2,288.00 per  
8 month.

9 **Q12. Have you reached an opinion with a reasonable degree of professional cer-**  
10 **tainty as to the total cost, excluding transport, per line per month that would**  
11 **be charged to end-users if LNP were to be implemented by the RLEC?**

12 A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding  
13 the total nonrecurring costs per month amortized over five years to the total recur-  
14 ring costs per month, both amounts excluding transport costs, and dividing this  
15 sum by the RLEC's total access lines. Surcharge and taxes were then applied to  
16 this quotient. The resulting cost per line per month was calculated to be \$1.15.

17 **Q13. Have you reached an opinion with a reasonable degree of professional cer-**  
18 **tainty as to the total LNP costs and the monthly amount recovered from each**  
19 **end-user if the FCC determines that transport costs should be included in the**  
20 **LNP costs recovered from end-users?**

21 A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring  
22 costs, including transport costs, were calculated to be \$12,601.00 per month. The

1 resulting LNP cost per line, per month, including transport, surcharges and taxes,  
2 was calculated to be \$3.04.

3 **Q14. If FCC determines that transport costs should not be included in the end-**  
4 **user surcharge, will the transport cost still be incurred and who will pay**  
5 **these costs?**

6 A. Transport costs will have to be incurred to transport calls outside of the RLEC's  
7 service area. If the cost is not recovered through an end-user surcharge, and if  
8 these costs are not recovered from the wireless carrier, then the only party to pay  
9 these costs would be the RLEC.

10 **Q15. Is it your opinion that the calculations that you have just described fairly and**  
11 **reasonably describe the non-recurring and recurring costs for the RLEC to**  
12 **implement LNP and the end user charges to recover such costs?**

13 A. Yes.

14 **Q16. Does this conclude your testimony?**

15 A. Yes, it does.

16

**Midstate Communications, Inc.**  
**Total Estimated LNP Non-recurring and Recurring Costs**

		With Surcharges/ Taxes
<b>LNP Non-recurring Costs</b>		
Switch Upgrade Costs	\$ 82,110	
Internal Business Procedure Changes (1)	\$ 3,229	
Inter-carrier Testing	\$ 4,247	
Other Internal Costs (2)	\$ 19,474	
LNP Query set up	\$ 1,900	
SOA Non-recurring set up charge (3)	\$ -	
Customer Notification Costs	\$ 2,434	
Total Non-recurring Costs excluding transport	\$ 113,394	
Non recurring transport charges (4)	\$ 3,870	
Total Non-recurring Costs including transport	\$ 117,264	
<b>LNP Monthly Recurring Costs</b>		
SOA Monthly Charge	\$ -	
LNP Query Costs per month	\$ 1,500	
Other Recurring Costs	\$ 788	
Total Recurring Monthly Costs excluding Transport	\$ 2,288	
Transport	\$ 7,749	
Total Recurring Monthly Costs including Transport	\$ 10,037	
<b>Monthly Cost Calculations per line</b>		
Total Nonrecurring cost per month excluding transport amortized over five years	\$ 2,480	
Total Nonrecurring cost per month including transport amortized over five years	\$ 2,564	
Total cost per month excluding transport	\$ 4,768	
Total cost per month including transport	\$ 12,601	
Access Lines excluding Lifeline	4,762	
LNP cost per line per month excluding transport (5)	\$ 1.00	\$ 1.15
LNP cost per line per month including transport (5)	\$ 2.65	\$ 3.04

(1) Cost required to analyze and modify existing processes and systems in order to receive and process a request for porting.

(2) Other internal costs include reviewing porting agreements with wireless carriers, completing trading partner profile requests from wireless carriers, completing contracts with the SOA and NPAC, and developing and filing tariffs and documentation for the LNP end-user surcharge and local rate increases.

(3) Service Order Administration (SOA) provides the functionality to interface the LEC's order and provisioning systems in order to update the Number Portability Administration Center (NPAC) for access by all other carriers. Through the use of a SOA, a company is able to submit porting information to the NPAC.

(4) Local Trunking between sutending end-offices and Midstate's tandem location

(5) Total costs do not include system changes required to shorten the porting interval or expanding a LEC's local calling area as contemplated by the FCC in its FNPRM.

IN THE MATTER OF THE PETITION  
OF BERESFORD MUNICIPAL TELE-  
PHONE COMPANY FOR SUSPENSION  
OR MODIFICATION OF § 251(b)(2) OF  
THE COMMUNICATIONS ACT OF 1934  
AS AMENDED

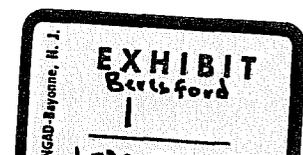

Docket No. TC04-048

---

**DIRECT PRE-FILED TESTIMONY OF**

**TODD HANSEN**

May 14, 2004

1 **Q: Please state your business name and address?**

2 A: I am Todd Hansen, General Manager, of Beresford Municipal Telephone Company.  
3 My address is 101 North 3<sup>rd</sup> Street, Beresford SD, 57004.

4 **Q: By whom are you employed and in what capacity?**

5 A: I am the General Manager of Beresford Municipal Telephone Company  
6 (Beresford). The Company is a rural independent local exchange carrier that  
7 provides local exchange, exchange access and other telecommunications services to  
8 1463 access lines within its South Dakota service area.

9 **Q: Does your company have any direct points of interconnection with any wireless  
10 carrier and/or does your company provide any blocks of numbers for your  
11 company's rate centers to any wireless carrier?**

12 A: No.

13 **Q: How do the local calling areas of your exchanges compare with those of the  
14 wireless carriers operating in your area?**

15 A: Wireless service areas are much more extensive.

16 **Q: What is the current method of routing calls from your subscriber's landline  
17 phones to wireless phone numbers?**

18 A: Beresford has points of interconnection (POI) with SDN and Qwest. The SDN  
19 connection is for toll completion and toll termination for InterLATA and Intra  
20 LATA traffic. The Qwest POI is a terminating trunk, only for Qwest IntraLATA  
21 traffic.

22 **Q: Have any subscribers requested local number portability (LNP) from your  
23 company?**

1 A: To the best of my knowledge, we have received no requests for local number  
2 portability from any subscriber of Beresford Municipal Telephone Company.

3 **Q: Since the passage of the 1996 Telecom Act have any wireline carriers ever**  
4 **requested LNP from your company?**

5 A: To the best of my knowledge, we have never received any requests for local number  
6 portability from any wireline carrier.

7 **Q: Have any wireless carriers requested LNP?**

8 A. Yes.

9 **Q: How much time would be required for your company to provide LNP, if ordered**  
10 **by the Commission?**

11 A We have not completed a specific implementation time line yet, but implementation  
12 will take a considerable amount of time.

13 **Q: In your experience as the general manager of Beresford Municipal Telephone**  
14 **Company have you seen increases or additions to the itemized fees on your**  
15 **customer's telephone bills?**

16 A. Yes

17 **Q: What do you expect your customer's reaction to be to any new LNP fees on their**  
18 **bills?**

19 A. I would expect the reaction to be very negative.

20 **Q: Is the public interest, convenience, and necessity served by requiring your**  
21 **company to implement LNP at this time?**

22 A: Since we have received no customer requests for LNP, it would seem that there is  
23 little interest, necessity or customer demand for the convenience of LNP. As such it

1            would seem to be in conflict with public interest to require the implementing of  
2            LNP at this time.

3    **Q: Does this conclude your direct testimony?**

4    A: Yes.

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

IN THE MATTER OF THE PETITION  
OF BERESFORD MUNICIPAL TELE-  
PHONE COMPANY FOR SUSPENSION  
OR MODIFICATION OF § 251(b)(2) OF  
THE COMMUNICATIONS ACT OF 1934  
AS AMENDED

Docket No. TC04-048  
REBUTTAL TESTIMONY OF  
TODD HANSEN

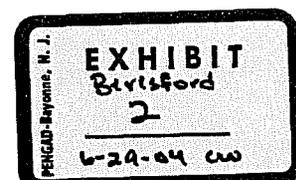

REBUTTAL TESTIMONY OF

TODD HANSEN

ON BEHALF OF

BERESFORD MUNICIPAL TELEPHONE COMPANY

June 14, 2004

1 Q. Please state your name, business name and address.

2 A. **My name is Todd Hansen. I am the General Manager of Beresford Municipal Tele-**  
3 **phone Company (“Beresford”), whose address is 101 North Third Street, Beresford,**  
4 **South Dakota 57004.**

5 Q. What is the purpose of your testimony?

6 A. **I will provide rebuttal testimony to various statements made by Ron Williams in his**  
7 **testimony filed on May 28, 2004 on behalf of WWC License L.L.C. (Western Wire-**  
8 **less).**

9 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners “waited 4 months to seek  
10 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
11 their legal obligations.” How do you respond?

12 A. **I dispute Mr. Williams’ characterization of events. To the best of my knowledge,**  
13 **Beresford took appropriate steps to investigate the cost and the processes involved**  
14 **with LNP and to explore its legal options.**

15 Q. Do you agree with Mr. Williams’ statement at page 14, lines 19-22, in which he states  
16 that “LECs will need to route a call to a ported number to the serving tandem” and to Mr.  
17 Williams’ statement at page 15, lines 1-4 when he discusses the routing of allegedly “lo-  
18 cal calls?”

19 A. **In its answer to Interrogatory 4., Western Wireless identifies the “serving tandem”**  
20 **as the Qwest LATA or local tandem, which is outside of Beresford’s service terri-**  
21 **tory. (See Western Wireless Response to Interrogatory 4., attached to the Rebuttal**  
22 **Testimony of Steven E. Watkins). Therefore, Mr. Williams’ statement is not consis-**  
23 **tent with Beresford’s current call routing practices, because it would require Beres-**

1           ford to route calls to a point outside of its service territory, other than via an EAS  
2           arrangement, as local. I note that in its answer to Interrogatory 7., Western Wire-  
3           less admits that there is no requirement for Beresford to route calls to the Qwest  
4           tandem and currently, Beresford does not do so. (See Western Wireless Response to  
5           Interrogatory 7 attached to the Rebuttal Testimony of Steven E. Watkins.) Further,  
6           Western Wireless admits that its interconnection agreement with Beresford does not  
7           require Beresford to route calls to the Qwest tandem. Rather, calls that terminate  
8           outside of Beresford's service territory, including calls to Western Wireless other  
9           than via EAS arrangements, are routed to interexchange carriers for termination.  
10          Pursuant to the interconnection agreement, traffic terminating to Western Wireless  
11          is routed to either an interexchange carrier or PrairieWave through an EAS ar-  
12          rangement. Therefore, it appears that Western Wireless' argument really is a bad  
13          faith attempt to change the agreement between the parties.

14    Q.    At page 19, lines 8-10, Mr. Williams states that it is his belief that "the FCC views that it  
15          is the originating carrier's responsibility to deliver local traffic for termination and that  
16          the costs associated with fulfilling that responsibility are not a number portability cost."

17          What is your response to this statement?

18    A.    Mr. Williams' statements are inconsistent and should be rejected. First he argues  
19          that Beresford should be required to install new facilities to deliver ported calls to  
20          Western Wireless and then he argues that the cost of those facilities are not number  
21          portability costs. Further, as discussed at lines 19-23, page 1, and lines 1-13, page 2,  
22          Mr. Williams' suggestion that it is Beresford's responsibility to deliver traffic des-

1           tined to Western Wireless through a serving tandem is not consistent with the inter-  
2           connection agreement between Beresford and Western Wireless.

3    Q.    Would Western Wireless' routing proposal have impacts to Beresford beyond LNP?

4    A.    Yes. It is my understanding that Western Wireless' proposal would increase Beres-  
5           ford's costs. First, Western Wireless' proposal would require Beresford to pay for  
6           new facilities to the tandem provider that it does not need for any purpose other  
7           than to route calls to ported numbers to wireless carriers. Second, Beresford would  
8           most likely have to pay transit traffic charges to the tandem provider for transport-  
9           ing the traffic to the wireless carriers. Third, in response to Interrogatory 16.b.,  
10          Western Wireless indicates that Beresford would be required to pay reciprocal  
11          compensation on calls to ported numbers, even if Beresford does not pay compensa-  
12          tion on such calls today. (See Western Wireless Response to Interrogatory 16.b. at-  
13          tached to the Rebuttal Testimony of Steven E. Watkins.)

14   Q.    Is there any other impact?

15   A.    Yes. It appears that Western Wireless' proposal would create a regulatory arbi-  
16          trage scenario that could lead to the loss of access revenues. Today, certain calls to  
17          wireless carriers are routed to interexchange carriers. For example, if Beresford  
18          Customer A calls Western Wireless Customer B in an exchange where there is no  
19          direct connection and no EAS arrangement, Beresford Customer A incurs a toll  
20          charge. However, under Western Wireless' proposal, it is my understanding that if  
21          Beresford Customer A calls Western Wireless Customer B, who now has a number  
22          ported from Beresford, Beresford Customer A would be charged for a local call.  
23          Customers may be encouraged to "give up" their existing wireless numbers and ob-

1        **tain wireline numbers for the sole purpose of porting that number to avoid toll**  
2        **charges. This is not only a bad public policy result, but also simply a bad faith at-**  
3        **tempt to avoid an important contract provision upon which Western Wireless has**  
4        **already agreed with our company.**

5    Q.    Does this conclude your rebuttal testimony?

6    A.    Yes.

**DIRECT TESTIMONY OF DAN DAVIS  
ON BEHALF OF BERESFORD MUNICIPAL TELEPHONE  
REGARDING COMPANY-SPECIFIC COST DATA**

Q1. **Please State your name, Employer, Business Address and Telephone Number.**

A. My name is Dan Davis. I am employed with TELEC Consulting Resources Inc. My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln Nebraska, 68508.

Q2. **On whose behalf are you testifying?**

A. I am testifying on behalf of the Company identified in the caption of the docket set out above. I will refer to this Company as the "RLEC".

Q3. **Have you provided your background information and an explanation of your role in this Docket in the "companion" testimony that has been offered in this Docket?**

A. Yes, I have.

Q4. **Did you prepare Exhibit 1 to the Petition of the RLEC filed in this Docket?**

A. Yes, in conjunction with members of the professional staff of TELEC, I was responsible for the preparation of Exhibit 1 as was attached to the Petition and I was also responsible for the preparation of supporting information prepared in connection with the responses to the discovery requests of Western Wireless. I was also responsible for the preparation of Exhibit 2 that is attached to this testimony.

Q5. **In your "companion" testimony you have explained the line items that comprise Exhibit 2 and the process used to compile the data that was used to de-**

1           **velop the cost as shown on Exhibit 2. Please discuss where in your “compan-**  
2           **ion” testimony you describe this process.**

3    A.     The process that was used to compile and develop the cost per line in Exhibit 2 is  
4           described on pages four through six in my “companion” testimony.

5    **Q6.    What was the source of the data?**

6    A.     The data was derived from the books, financial records and managers of the  
7           RLEC. Data was also obtained from switch vendors, engineering consultants, tar-  
8           iffs, service order administration service bureaus, the number portability admini-  
9           stration center, a number portability database provider, and my professional ex-  
10          perience.

11   **Q7.    What was the purpose of obtaining that particular data?**

12   A.     To assist me in preparing an estimate of the costs to implement LNP for the  
13          RLEC.

14   **Q8.    Is this the type of data that experts in your field would ordinarily review in**  
15          **formulating an opinion concerning the costs of LNP?**

16   A.     Yes.

17   **Q9.    What use did you make of the data after you received it from the RLEC?**

18   A.     I have explained the use of the data on page six of my “companion” testimony.

19   **Q10.   Have you reached an opinion with a reasonable degree of professional cer-**  
20          **tainty as to the total non-recurring costs, excluding transport, to implement**  
21          **LNP that you have calculated for the RLEC that will be recovered over a 5-**  
22          **year recovery period through an end user surcharge?**

1 A. Yes. My opinion is that the total non-recurring costs, excluding transport, is  
2 \$55,905.00. Such costs were amortized over a recovery period of 60 months us-  
3 ing a rate of return of 11.25%. The total nonrecurring costs per month, excluding  
4 transport, amortized over five years is \$1,222.00.

5 **Q11. Have you reached an opinion with a reasonable degree of professional cer-**  
6 **tainty as to the total recurring costs, excluding transport, to implement LNP**  
7 **that you have calculated for the RLEC and that will be recovered from end**  
8 **users on an ongoing monthly charge basis?**

9 A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$578.00 per  
10 month.

11 **Q12. Have you reached an opinion with a reasonable degree of professional cer-**  
12 **tainty as to the total cost, excluding transport, per line per month that would**  
13 **be charged to end-users if LNP were to be implemented by the RLEC?**

14 A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding  
15 the total nonrecurring costs per month amortized over five years to the total recur-  
16 ring costs per month, both amounts excluding transport costs, and dividing this  
17 sum by the RLEC's total access lines. Surcharge and taxes were then applied to  
18 this quotient. The resulting cost per line per month was calculated to be \$1.46.

19 **Q13. Have you reached an opinion with a reasonable degree of professional cer-**  
20 **tainty as to the total LNP costs and the monthly amount recovered from each**  
21 **end-user if the FCC determines that transport costs should be included in the**  
22 **LNP costs recovered from end-users?**

1 A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring  
2 costs, including transport costs, were calculated to be \$3,757.00 per month. The  
3 resulting LNP cost per line, per month, including transport, surcharges and taxes,  
4 was calculated to be \$3.05.

5 **Q14. If FCC determines that transport costs should not be included in the end-**  
6 **user surcharge, will the transport cost still be incurred and who will pay**  
7 **these costs?**

8 A. Transport costs will have to be incurred to transport calls outside of the RLEC's  
9 service area. If the cost is not recovered through an end-user surcharge, and if  
10 these costs are not recovered from the wireless carrier, then the only party to pay  
11 these costs would be the RLEC.

12 **Q15. Is it your opinion that the calculations that you have just described fairly and**  
13 **reasonably describe the non-recurring and recurring costs for the RLEC to**  
14 **implement LNP and the end user charges to recover such costs?**

15 A. Yes.

16 **Q16. Does this conclude your testimony?**

17 A. Yes, it does.

18

**Beresford Municipal Telephone Company  
Total Estimated LNP Non-recurring and Recurring Costs**

		With Surcharges/ Taxes
<b>LNP Non-recurring Costs</b>		
Switch Upgrade Costs	\$ 16,612	
Internal Business Procedure Changes (1)	\$ 11,962	
Intercarrier Testing	\$ 5,299	
Other Internal Costs (2)	\$ 20,723	
LNP Query set up	\$ 190	
SOA Non-recurring set up charge (3)	\$ -	
Customer Notification Costs	\$ 1,119	
Total Non-recurring Costs excluding transport	<u>\$ 55,905</u>	
Non recurring transport charges (4)	\$ 1,401	
Total Non-recurring Costs including transport	\$ 57,306	
<b>LNP Monthly Recurring Costs</b>		
SOA Monthly Charge	\$ 135	
LNP Query Costs per month	\$ 150	
Other Recurring Costs	\$ 293	
Total Recurring Monthly Costs excluding Transport	\$ 578	
Transport	\$ 1,926	
Total Recurring Monthly Costs including Transport	\$ 2,504	
<b>Monthly Cost Calculations per line</b>		
Total Nonrecurring cost per month excluding transport amortized over five years	\$ 1,222	
Total Nonrecurring cost per month including transport amortized over five years	\$ 1,253	
Total cost per month excluding transport	\$ 1,800	
Total cost per month including transport	\$ 3,757	
Access Lines excluding Lifeline		1,418
LNP cost per line per month excluding transport (5)	\$ 1.27	\$ 1.46
LNP cost per line per month including transport (5)	\$ 2.65	\$ 3.05

(1) Cost required to analyze and modify existing processes and systems in order to receive and process a request for porting.

(2) Other internal costs include reviewing porting agreements with wireless carriers, completing trading partner profile requests from wireless carriers, completing contracts with the SOA and NPAC, and developing and filing tariffs and documentation for the LNP end-user surcharge and local rate increases.

(3) Service Order Administration (SOA) provides the functionality to interface the LEC's order and provisioning systems in order to update the Number Portability Administration Center (NPAC) for access by all other carriers. Through the use of a SOA, a company is able to submit porting information to the NPAC.

(4) Transport costs will be incurred if the FCC requires LECs to install and absorb the cost of facilities to wireless carriers in order to route calls to ported numbers on a seven-digit dialed basis.

(5) Total costs do not include system changes required to shorten the porting interval or expanding a LEC's local calling area as contemplated by the FCC in its FNPRM.

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

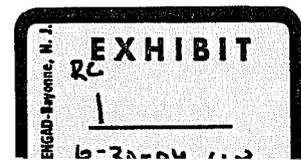

---

IN THE MATTER OF THE PETITION  
OF RC COMMUNICATIONS, INC., AND  
ROBERTS COUNTY TELEPHONE CO-  
OPERATIVE ASSN. FOR SUSPENSION  
OR MODIFICATION OF § 251(b)(2) OF  
THE COMMUNICATIONS ACT OF 1934  
AS AMENDED

Docket No. TC04-056

**DIRECT PRE-FILED TESTIMONY OF  
PAMELA HARRINGTON**

May 14, 2004

1 **Q: Please state your business, name, and address?**

2 A: I am Pamela Harrington, General Manager ROBERTS COUNTY TELEPHONE  
3 COOPERATIVE ASSOICIATION, PO Box 197, 205 Main Street, New Effington  
4 SD 57255 Phone (605) 637-5211 Fax (605) 637-5302  
5 RC COMMUNICATIONS, INC, 205 Main Street, PO Box 196 New Effington SD  
6 57255, same phone number and fax number as mentioned before.

7 **Q: By whom are you employed and in what capacity?**

8 A: I am General Manager of Roberts County Telephone Cooperative (Roberts County)  
9 and RC Communications, Inc. Both companies are rural independent local  
10 exchange carriers that provide local exchange access and other telecommunications  
11 services to a total of 2165 access lines within their South Dakota service areas.  
12 which include the exchanges of New Effington, Claire City, Veblen. Peever.  
13 Wilmot and Summit. Of the total 2165 access lines 110 are lifeline customers.

14 **Q: Does your company have any direct points of interconnection with any wireless  
15 carrier and/or does your company provide any blocks of numbers for your  
16 company's rate centers to any wireless carrier?**

17 A: No

18 **Q: How do the local calling areas of your exchanges compare with those of the  
19 wireless carriers operating in your area?**

20 A: Wireless service areas are much more extensive.

21 **Q: Does your company provide any Extended Area Service (EAS) plans to its  
22 subscribers or to a connecting carrier's subscribers?**

23 A: Yes, to our own subscribers.

1 **Q: What is the current method of routing calls from your subscriber's landline**  
2 **phones to wireless phone numbers?**

3 A: Roberts County has points of interconnection (POI) with SDN and Qwest. The  
4 SDN connection is for toll completion and toll termination for InterLATA and Intra  
5 LATA traffic. The Qwest POI is a terminating trunk, only for Qwest IntraLATA  
6 traffic.

7 **Q: What is the number of wireless carriers authorized to serve in your company's**  
8 **service area?**

9 A: To the best of my knowledge, four.

10 **Q: Have any subscribers requested local number portability (LNP) from your**  
11 **company?**

12 A: To the best of my knowledge there has been none.

13 **Q: Since the passage of the 1996 Telecom Act have any wireline carriers ever**  
14 **requested LNP from your company?**

15 A: No.

16 **Q: Have any wireless carriers requested LNP?**

17 A: Western Wireless.

18 **Q: How much time would be required for your company to provide LNP, if**  
19 **ordered by the Commission?**

20 A: Roberts County has not completed a specific implementation time line yet, but  
21 implementation will take a considerable amount of time.

1 Q: In your experience as the general manager of Roberts County Telephone  
2 Coop. and RC Communications, have you seen increases or additions to the  
3 itemized fees on your customer's telephone bills?

4 A. Yes.

5 Q: What do you expect your customer's reaction to be to any new LNP fees on  
6 their bills?

7 A. I would expect the reaction to be very negative.

8 Q: Is the public interest, convenience, and necessity served by requiring your  
9 company to implement LNP at this time?

10 A, No. The current demand for LNP appears to be non-existent, as no Roberts County  
11 or RC Communications customers have requested LNP and the cost of LNP is  
12 significant.

13 Q: Does this conclude your direct testimony?

14 A: Yes.

IN THE MATTER OF THE PETITION  
OF RC COMMUNICATIONS, INC., AND  
ROBERTS COUNTY TELEPHONE CO-  
OPERATIVE ASSN. FOR SUSPENSION  
OR MODIFICATION OF § 251(b)(2) OF  
THE COMMUNICATIONS ACT OF 1934  
AS AMENDED

Docket No. TC04-056  
REBUTTAL TESTIMONY OF  
PAM HARRINGTON

REBUTTAL TESTIMONY OF

PAM HARRINGTON

ON BEHALF OF

RC COMMUNICATIONS, INC. AND  
ROBERTS COUNTY TELEPHONE COOPERATIVE ASSN.

June 14, 2004

1 Q. Please state your name, business name and address.

2 A. My name is Pamela Harrington. I am the General Manager of RC Communica-  
3 tions, Inc., and Roberts County Telephone Cooperative Assn. (collectively "Roberts  
4 County"), whose address is Main Street, New Effington, South Dakota 57255.

5 Q. What is the purpose of your testimony?

6 A. I will provide rebuttal testimony to various statements made by Ron Williams in his  
7 testimony filed on May 28, 2004 on behalf of WWC License L.L.C. (Western Wire-  
8 less).

9 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners "waited 4 months to seek  
10 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
11 their legal obligations." How do you respond?

12 A. I dispute Mr. Williams' characterization of events as baseless and inflammatory.  
13 Once the FCC made it clear that wireline carriers would be required to port num-  
14 bers to wireless carriers in areas outside the top 100 MSAs by May 24, 2004, Rob-  
15 erts County took immediate steps to investigate the cost and the processes involved  
16 with LNP and to explore its legal options. Because Roberts County had no experi-  
17 ence with LNP, it took time to gather the pertinent information and to make the de-  
18 cision to seek a suspension of the requirement from the Commission. Further, the  
19 suspension petition itself took time and effort to prepare because Roberts County  
20 wanted to present as complete a petition as possible, accompanied by cost informa-  
21 tion as complete as possible.

22 Q. Do you agree with Mr. Williams' statement at page 14, lines 19-22, in which he states  
23 that "LECs will need to route a call to a ported number to the serving tandem" and to Mr.

1 Williams' statement at page 15, lines 1-4 when he discusses the routing of allegedly "lo-  
2 cal calls?"

3 A. In its answer to Interrogatory 4., Western Wireless identifies the "serving tandem"  
4 as the Qwest LATA or local tandem, which is outside of Roberts County's service  
5 territory. (See Western Wireless Response to Interrogatory 4., attached to the Re-  
6 buttal Testimony of Steven E. Watkins). Therefore, Mr. Williams' statement is not  
7 consistent with Roberts County's current routing practices, because it would re-  
8 quire Roberts County to route calls to a point outside of its service territory as local.  
9 I note that in its answer to Interrogatory 7., Western Wireless admits that there is  
10 no requirement for Roberts County to route calls to the Qwest tandem. (See West-  
11 ern Wireless Response to Interrogatory 7 attached to the Rebuttal Testimony of  
12 Steven E. Watkins.) Rather, calls that terminate outside Roberts County's service  
13 territory, including calls to Western Wireless, are routed to interexchange carriers  
14 for termination. Therefore, it appears that Western Wireless' argument really is a  
15 bad faith attempt to change the agreement between the parties.

16 Q. At page 19, lines 8-10, Mr. Williams states that it is his belief that "the FCC views that it  
17 is the originating carrier's responsibility to deliver local traffic for termination and that  
18 the costs associated with fulfilling that responsibility are not a number portability cost."  
19 What is your response to this statement?

20 A. Mr. Williams' statements are inconsistent and should be rejected. First he argues  
21 that Roberts County should be required to install new facilities to deliver ported  
22 calls to Western Wireless and then he argues that the cost of those facilities are not  
23 number portability costs.

1 Q. At page 20, lines 13-16, Mr. Williams states that “[t]he routing methods proposed by the  
2 Petitioners are inefficient in that they make little or no utilization of existing equipment  
3 and shared facilities currently used to exchange calls with other carriers.” How do you  
4 respond?

5 A. The routing methods reflected in the cost exhibit attached to Roberts County’s Peti-  
6 tion are based on the current routing arrangements that Roberts County has in  
7 place with other carriers, namely, calls that are dialed on a local 7-digit basis are  
8 routed via direct connections. Therefore, if calls to numbers ported to a carrier are  
9 to be dialed on a local 7-digit basis, a direct connection needs to be established be-  
10 tween the carriers.

11 Q. Would Western Wireless’ routing proposal have impacts to Roberts County beyond  
12 LNP?

13 A. Yes. It is my understanding that Western Wireless’ proposal would increase Rob-  
14 erts County’s costs. First, Western Wireless’ proposal would require Roberts  
15 County to pay for new facilities to the tandem provider that it does not need for any  
16 purpose other than to route calls to ported numbers to wireless carriers. Second,  
17 Roberts County would most likely have to pay transit traffic charges to the tandem  
18 provider for transporting the traffic to the wireless carriers. Third, in response to  
19 Interrogatory 16.b., Western Wireless indicates that Roberts County would be re-  
20 quired to pay reciprocal compensation on calls to ported numbers, even if Roberts  
21 County does not pay compensation on such calls today. (See Western Wireless Re-  
22 sponse to Interrogatory 16.b. attached to the Rebuttal Testimony of Steven E. Wat-  
23 kins.)

1 Q. Is there any other impact?

2 A. Yes. It appears that Western Wireless' proposal would create a regulatory arbi-  
3 trage scenario that could lead to the loss of access revenues. Today, certain calls to  
4 wireless carriers are routed to interexchange carriers. For example, if Roberts  
5 County Customer A calls Western Wireless Customer B, Roberts County Customer  
6 A incurs a toll charge. However, under Western Wireless' proposal, it is my under-  
7 standing that if Roberts County Customer A calls Western Wireless Customer B,  
8 who now has a number ported from Roberts County, Roberts County Customer A  
9 would be charged for a local call. Customers may be encouraged to "give up" their  
10 existing wireless numbers and obtain wireline numbers for the sole purpose of port-  
11 ing that number to avoid toll charges. This is not only a bad public policy result,  
12 but also simply a bad faith attempt to avoid an important contract provision upon  
13 which Western Wireless has already agreed with our company.

14 Q. Does this conclude your rebuttal testimony?

15 A. Yes.

CERTIFICATE OF SERVICE

The undersigned hereby certifies that she served a copy of the foregoing **REBUTTAL TESTIMONY** upon the persons herein next designated, on the date below shown, by depositing a copy thereof in the United States mail at Pierre, South Dakota, postage prepaid, in an envelope addressed to each said addressee, to-wit:

Docket No. TC04-056

**DIRECT TESTIMONY OF DAN DAVIS ON BEHALF OF  
RC COMMUNICATIONS, INC., AND ROBERTS COUNTY  
TELEPHONE COOPERATIVE ASSN. REGARDING  
COMPANY-SPECIFIC COST DATA**

May 14, 2004

1                   **DIRECT TESTIMONY OF DAN DAVIS ON BEHALF OF**  
2                   **RC COMMUNICATIONS, INC., AND ROBERTS COUNTY**  
3                   **TELEPHONE COOPERATIVE ASSN. REGARDING**  
4                   **COMPANY-SPECIFIC COST DATA**  
5

6 **Q1. Please State your name, Employer, Business Address and Telephone Num-**  
7 **ber.**

8  
9 A. My name is Dan Davis. I am employed with TELEC Consulting Resources Inc.  
10 My business address is 233 South 13<sup>th</sup> Street, Suite 1225, Lincoln Nebraska,  
11 68508.

12 **Q2. On whose behalf are you testifying?**

13  
14 A. I am testifying on behalf of the Company identified in the caption of the docket  
15 set out above. I will refer to this Company as the "RLEC".

16 **Q3. Have you provided your background information and an explanation of your**  
17 **role in this Docket in the "companion" testimony that has been offered in this**  
18 **Docket?**

19 A. Yes, I have.

20 **Q4. Did you prepare Exhibit 1 to the Petition of the RLEC filed in this Docket?**

21 A. Yes, in conjunction with members of the professional staff of TELEC, I was re-  
22 sponsible for the preparation of Exhibit 1 as was attached to the Petition and I was  
23 also responsible for the preparation of supporting information prepared in connec-  
24 tion with the responses to the discovery requests of Western Wireless. I was also  
25 responsible for the preparation of Exhibit 2 that is attached to this testimony.

26 **Q5. In your "companion" testimony you have explained the line items that com-**  
27 **prise Exhibit 2 and the process used to compile the data that was used to de-**

1           **velop the cost as shown on Exhibit 2. Please discuss where in your “compan-**  
2           **ion” testimony you describe this process.**

3    A.     The process that was used to compile and develop the cost per line in Exhibit 2 is  
4           described on pages four through six in my “companion” testimony.

5    **Q6.    What was the source of the data?**

6    A.     The data was derived from the books, financial records and managers of the  
7           RLEC. Data was also obtained from switch vendors, engineering consultants, tar-  
8           iffs, service order administration service bureaus, the number portability admini-  
9           stration center, a number portability database provider, and my professional ex-  
10          perience.

11   **Q7.    What was the purpose of obtaining that particular data?**

12   A.     To assist me in preparing an estimate of the costs to implement LNP for the  
13          RLEC.

14   **Q8.    Is this the type of data that experts in your field would ordinarily review in**  
15          **formulating an opinion concerning the costs of LNP?**

16   A.     Yes.

17   **Q9.    What use did you make of the data after you received it from the RLEC?**

18   A.     I have explained the use of the data on page six of my “companion” testimony.

19   **Q10.   Have you reached an opinion with a reasonable degree of professional cer-**  
20          **tainty as to the total non-recurring costs, excluding transport, to implement**  
21          **LNP that you have calculated for the RLEC that will be recovered over a 5-**  
22          **year recovery period through an end user surcharge?**

1 A. Yes. My opinion is that the total non-recurring costs, excluding transport, is  
2 \$74,199.00. Such costs were amortized over a recovery period of 60 months us-  
3 ing a rate of return of 11.25%. The total nonrecurring costs per month, excluding  
4 transport, amortized over five years is \$1,623.00.

5 **Q11. Have you reached an opinion with a reasonable degree of professional cer-**  
6 **tainty as to the total recurring costs, excluding transport, to implement LNP**  
7 **that you have calculated for the RLEC and that will be recovered from end**  
8 **users on an ongoing monthly charge basis?**

9 A. Yes. The amount is shown on Exhibit 2, and is calculated to be \$880.00 per  
10 month.

11 **Q12. Have you reached an opinion with a reasonable degree of professional cer-**  
12 **tainty as to the total cost, excluding transport, per line per month that would**  
13 **be charged to end-users if LNP were to be implemented by the RLEC?**

14 A. Yes, The amount is shown on Exhibit 2. This amount was calculated by adding  
15 the total nonrecurring costs per month amortized over five years to the total recur-  
16 ring costs per month, both amounts excluding transport costs, and dividing this  
17 sum by the RLEC's total access lines. Surcharge and taxes were then applied to  
18 this quotient. The resulting cost per line per month was calculated to be \$1.41.

19 **Q13. Have you reached an opinion with a reasonable degree of professional cer-**  
20 **tainty as to the total LNP costs and the monthly amount recovered from each**  
21 **end-user if the FCC determines that transport costs should be included in the**  
22 **LNP costs recovered from end-users?**

1 A. Yes, These amounts are shown on Exhibit 2. The total nonrecurring and recurring  
2 costs, including transport costs, were calculated to be \$12,531.00 per month. The  
3 resulting LNP cost per line, per month, including transport, surcharges and taxes,  
4 was calculated to be \$7.07.

5 **Q14. If FCC determines that transport costs should not be included in the end-**  
6 **user surcharge, will the transport cost still be incurred and who will pay**  
7 **these costs?**

8 A. Transport costs will have to be incurred to transport calls outside of the RLEC's  
9 service area. If the cost is not recovered through an end-user surcharge, and if  
10 these costs are not recovered from the wireless carrier, then the only party to pay  
11 these costs would be the RLEC.

12 **Q15. Is it your opinion that the calculations that you have just described fairly and**  
13 **reasonably describe the non-recurring and recurring costs for the RLEC to**  
14 **implement LNP and the end user charges to recover such costs?**

15 A. Yes.

16 **Q16. Does this conclude your testimony?**

17 A. Yes, it does.

18

**RC Communications Inc./Roberts County Telephone  
Total Estimated LNP Non-recurring and Recurring Costs**

		With Surcharges/ Taxes
<b>LNP Non-recurring Costs</b>		
Switch Upgrade Costs	\$ 29,900	
Internal Business Procedure Changes (1)	\$ 15,318	
Intercarrier Testing	\$ 4,915	
Other Internal Costs (2)	\$ 22,319	
LNP Query set up	\$ 380	
SOA Non-recurring set up charge (3)	\$ -	
Customer Notification Costs	\$ 1,367	
Total Non-recurring Costs excluding transport	<u>\$ 74,199</u>	
Non recurring transport charges (4)	\$ 2,801	
Total Non-recurring Costs including transport	\$ 77,000	
<b>LNP Monthly Recurring Costs</b>		
SOA Monthly Charge	\$ 180	
LNP Query Costs per month	\$ 300	
Other Recurring Costs	\$ 400	
Total Recurring Monthly Costs excluding Transport	\$ 880	
Transport	\$ 9,967	
Total Recurring Monthly Costs including Transport	\$ 10,847	
<b>Monthly Cost Calculations per line</b>		
Total Nonrecurring cost per month excluding transport amortized over five years	\$ 1,623	
Total Nonrecurring cost per month including transport amortized over five years	\$ 1,684	
Total cost per month excluding transport	\$ 2,503	
Total cost per month including transport	\$ 12,531	
Access Lines excluding Lifeline	2,037	
LNP cost per line per month excluding transport (5)	\$ 1.23	\$ 1.41
LNP cost per line per month including transport (5)	\$ 6.15	\$ 7.07

(1) Cost required to analyze and modify existing processes and systems in order to receive and process a request for porting.

(2) Other internal costs include reviewing porting agreements with wireless carriers, completing trading partner profile requests from wireless carriers, completing contracts with the SOA and NPAC, and developing and filing tariffs and documentation for the LNP end-user surcharge and local rate increases.

(3) Service Order Administration (SOA) provides the functionality to interface the LEC's order and provisioning systems in order to update the Number Portability Administration Center (NPAC) for access by all other carriers. Through the use of a SOA, a company is able to submit porting information to the NPAC.

(4) Transport costs will be incurred if the FCC requires LECs to install and absorb the cost of facilities to wireless carriers in order to route calls to ported numbers on a seven-digit dialed basis.

(5) Total costs do not include system changes required to shorten the porting interval or expanding a LEC's local calling area as contemplated by the FCC in its FNPRM.

---

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

---

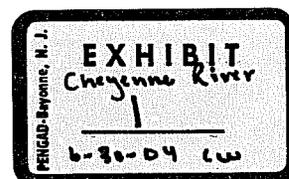

IN THE MATTER OF THE PETITION OF  
CHEYENNE RIVER SIOUX TRIBE  
TELEPHONE AUTHORITY FOR SUS-  
PENSION OR MODIFICATION OF 47  
U.S.C § 251(b)(2) OF THE COM-  
MUNICATIONS ACT OF 1934 AS  
AMENDED

Docket No. TC04-085

**DIRECT PRE-FILED TESTIMONY OF**

**J.D. WILLIAMS**

**May 17, 2004**

1 A: No. To the best of my knowledge, there have not been any subscribers that have re-  
2 quested LNP.

3 **Q: Are there any existing capital investments for broadband that will be diverted if**  
4 **your company must deploy LNP?**

5 A: Yes. Any amount of capital investment that is diverted to the implementation of LNP  
6 will reduce needed capital from broadband investments.

7 **Q: How much time would be required for CRST to provide LNP?**

8 A: If the Commission denies the LNP petition, CRST believes that it will need approxi-  
9 mately ten weeks to implement LNP.

10 **Q: In your experience as the general manager of CRST have you seen increases or ad-**  
11 **ditions to the itemized fees on your customer's telephone bills?**

12 A: Yes. Many customers tell me that there have been too many new fees or fee increases in  
13 the past few years.

14 **Q: What do you expect your customer's reaction to be to any new LNP fees on their**  
15 **bills?**

16 A: We expect the reaction to be very negative. The fees would make CRST's service offer-  
17 ing less competitive with the services provided by wireless carriers and, therefore, sub-  
18 scribership may fall.

19 **Q: Is the public interest, convenience, and necessity served by requiring CRST to im-**  
20 **plement LNP at this time?**

21 A: No. The current demand for LNP appears to be non-existent, as no CRST customer has  
22 ever made an inquiry to CRST regarding LNP or a request for LNP, and the cost of LNP  
23 is significant.

1 **Q: Does this conclude your direct testimony?**

2 A: Yes. I also reserve the opportunity to revise or modify this pre-filed direct testimony at  
3 or before the hearing if I receive additional information pertaining to the issues I pre-  
4 sented herein.

BEFORE THE PUBLIC UTILITIES COMMISSION  
OF THE STATE OF SOUTH DAKOTA

IN THE MATTER OF THE PETITION  
OF CHEYENNE RIVER SIOUX TRIBE  
TELEPHONE AUTHORITY FOR SUS-  
PENSION OR MODIFICATION OF  
§ 251(b)(2) OF THE COMMUNICA-  
TIONS ACT OF 1934 AS AMENDED

Docket No. TC04-085  
REBUTTAL TESTIMONY OF  
J. D. WILLIAMS

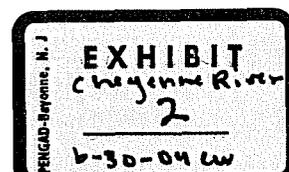

REBUTTAL TESTIMONY OF

J. D. WILLIAMS

ON BEHALF OF

CHEYENNE RIVER SIOUX TRIBE TELEPHONE AUTHORITY

June 15, 2004

1 Q. Please state your name, business name and address.

2 A. **My name is J. D. Williams. I am the General Manager of Cheyenne River Sioux**  
3 **Tribe Telephone Authority (“CRSTTA”), whose address is P. O. Box 810, Eagle**  
4 **Butte, South Dakota 57625.**

5 Q. What is the purpose of your testimony?

6 A. **I will provide rebuttal testimony to various statements made by Ron Williams in his**  
7 **testimony filed on May 28, 2004 on behalf of WWC License L.L.C. (Western Wire-**  
8 **less).**

9 Q. At page 6, lines 8-10, Mr. Williams alleges that the Petitioners “waited 4 months to seek  
10 a suspension of their LNP obligations, hopeful that this tactic would result in delay of  
11 their legal obligations.” How do you respond?

12 A. **I dispute Mr. Williams’ characterization of events as baseless and inflammatory.**  
13 **Once the FCC made it clear that wireline carriers would be required to port num-**  
14 **bers to wireless carriers in areas outside the top 100 MSAs by May 24, 2004,**  
15 **CRSTTA took immediate steps to investigate the cost and the processes involved**  
16 **with LNP and to explore its legal options. Because CRSTTA had no experience with**  
17 **LNP, it took time to gather the pertinent information and to make the decision to**  
18 **seek a suspension of the requirement from the Commission. Further, the suspension**  
19 **petition itself took time and effort to prepare because CRSTTA wanted to present as**  
20 **complete a petition as possible, accompanied by cost information as complete as**  
21 **possible.**

22 Q. Do you agree with Mr. Williams’ statement at page 14, lines 19-22, in which he states  
23 that “LECs will need to route a call to a ported number to the serving tandem” and to Mr.

1 Williams' statement at page 15, lines 1-4 when he discusses the routing of allegedly "lo-  
2 cal calls?"

3 **A. In its answer to Interrogatory 4., Western Wireless identifies the "serving tandem"**  
4 **as the Qwest LATA or local tandem, which is outside of CRSTTA's service terri-**  
5 **tory. (See Western Wireless Response to Interrogatory 4., attached to the Rebuttal**  
6 **Testimony of Steven E. Watkins). Therefore, Mr. Williams' statement is not consis-**  
7 **tent with CRSTTA's current call routing practices, because it would require**  
8 **CRSTTA to route calls to a point outside of its service territory as local. Further,**  
9 **Western Wireless admits that its interconnection agreement with CRSTTA does not**  
10 **require CRSTTA to route calls to the Qwest tandem. Rather, calls that terminate**  
11 **outside CRSTTA's service territory, including calls to Western Wireless within the**  
12 **CRSTTA exchange(s) where Western Wireless does not have a direct connection,**  
13 **are routed to interexchange carriers for termination. Only traffic routed to West-**  
14 **ern Wireless via a direct connection within a CRSTTA exchange is routed as "local**  
15 **traffic." Therefore, it appears that Western Wireless' argument really is a bad faith**  
16 **attempt to change the agreement between the parties.**

17 **Q. At page 19, lines 8-10, Mr. Williams states that it is his belief that "the FCC views that it**  
18 **is the originating carrier's responsibility to deliver local traffic for termination and that**  
19 **the costs associated with fulfilling that responsibility are not a number portability cost."**  
20 **What is your response to this statement?**

21 **A. Mr. Williams' statements are inconsistent and should be rejected. First he argues**  
22 **that CRSTTA should be required to install new facilities to deliver ported calls to**  
23 **Western Wireless and then he argues that the cost of those facilities are not number**

1 portability costs. Further, as discussed at lines 3-16 above, Mr. Williams' suggestion  
2 that it is CRSTTA's responsibility to deliver traffic destined to Western Wireless  
3 through a serving tandem is not consistent with the interconnection agreement be-  
4 tween CRSTTA and Western Wireless.

5 Q. At page 20, lines 13-16, Mr. Williams states that "[t]he routing methods proposed by the  
6 Petitioners are inefficient in that they make little or no utilization of existing equipment  
7 and shared facilities currently used to exchange calls with other carriers." How do you  
8 respond?

9 A. The routing methods reflected in the cost exhibit attached to CRSTTA's Petition are  
10 based on the current routing arrangements that CRSTTA has in place with other  
11 carriers, namely, calls that are dialed on a local 7-digit basis are routed via direct  
12 connections. For example, where there is a direct connection between CRSTTA and  
13 Western Wireless, customers in that exchange can call a Western Wireless customer  
14 on a local 7-digit basis. Therefore, if calls to numbers ported to a carrier are to be  
15 dialed on a local 7-digit basis, a direct connection needs to be established between  
16 the carriers.

17 Q. Would Western Wireless' routing proposal have impacts to CRSTTA beyond LNP?

18 A. Yes. It is my understanding that Western Wireless' proposal would increase  
19 CRSTTA's costs. First, Western Wireless' proposal would require CRSTTA to pay  
20 for new facilities to the tandem provider that it does not need for any purpose other  
21 than to route calls to ported numbers to wireless carriers. Second, CRSTTA would  
22 most likely have to pay transit traffic charges to the tandem provider for transport-  
23 ing the traffic to the wireless carriers. Third, in response to Interrogatory 16.b.,

1 Western Wireless indicates that CRSTTA would be required to pay reciprocal com-  
2 pensation on calls to ported numbers, even if CRSTTA does not pay compensation  
3 on such calls today. (See Western Wireless Response to Interrogatory 16.b. at-  
4 tached to the Rebuttal Testimony of Steven E. Watkins.)

5 Q. Is there any other impact?

6 A. Yes. It appears that Western Wireless' proposal would create a regulatory arbi-  
7 trage scenario that could lead to the loss of access revenues. Today, certain calls to  
8 wireless carriers are routed to interexchange carriers. For example, if CRSTTA  
9 Customer A calls Western Wireless Customer B in an exchange where there is no  
10 direct connection and no EAS arrangement, CRSTTA Customer A incurs a toll  
11 charge. However, under Western Wireless' proposal, it is my understanding that if  
12 CRSTTA Customer A calls Western Wireless Customer B, who now has a number  
13 ported from CRSTTA, CRSTTA Customer A would be charged for a local call.  
14 Customers may be encouraged to "give up" their existing wireless numbers and ob-  
15 tain wireline numbers for the sole purpose of porting that number to avoid toll  
16 charges. This is not only a bad public policy result, but also simply a bad faith at-  
17 tempt to avoid an important contract provision upon which Western Wireless has  
18 already agreed with our company.

19 Q. Does this conclude your rebuttal testimony?

20 A. Yes.

CERTIFICATE OF SERVICE

The undersigned hereby certifies that she served a copy of the foregoing **REBUTTAL TESTIMONY** upon the persons herein next designated, on the date below shown, by depositing a copy thereof in the United States mail at Pierre, South Dakota, postage prepaid, in an envelope addressed to each said addressee, to-wit:

**DIRECT PRE-FILED TESTIMONY OF  
DOUGLAS J. NEFF**

May 17, 2004

**DIRECT PRE-FILED TESTIMONY OF  
DOUGLAS J. NEFF**

1  
2  
3  
4  
5 **Q: What is your name and address?**

6 A: My name is Douglas J. Neff. My business address is 1501 Regents Blvd., Suite  
7 100, Fircrest, WA 98466. My business phone number is (253) 566-7070.

8 **Q: By whom are you employed and in what capacity?**

9 A: I am the shareholder in charge of the telecommunications services for the Certi-  
10 fied Public Accounting firm of Johnson, Stone & Pagano, P.S. My duties and re-  
11 sponsibilities at Johnson, Stone & Pagano, P.S. include accounting and consulting  
12 services to smaller local exchange carriers in primarily rural areas. My work in-  
13 volves preparation of cost separations studies, analysis of industry matters and  
14 regulatory requirements and reporting, and preparation of financial statements and  
15 tax returns.

16 **Q: What is your educational and business background?**

17 A: I received a Bachelor of Arts Degree in Business Administration from the Univer-  
18 sity of Puget Sound in Tacoma, Washington. I am a Certified Public Accountant,  
19 licensed in South Dakota and Washington. I have been active in the telecommu-  
20 nications industry since 1986, providing consulting and accounting services to  
21 small local exchange carriers in primarily rural areas.

22 **Q: On what behalf are you testifying in the proceeding?**

23 A: My direct profiled testimony is submitted on behalf of the Cheyenne River Sioux  
24 Tribe Telephone Authority ("Telephone Authority").

25 **Q: What is the purpose of your testimony?**

1 A: I will provide testimony on cost issues of implementing Local Number Portability  
2 (“LNP”) that is pertinent to the Telephone Authority’s cost exhibit.

3 **Q: What are the anticipated costs of implementing LNP?**

4 A: The anticipated costs of implementing LNP are categorized in two areas, nonre-  
5 curring and recurring costs. I have also further provided anticipated costs for
