

use of federal universal service support will enable the Company to: (1) maintain rates for its local exchange services that are affordable and reasonably comparable to rates being charged for the same services in urban areas; and (2) to upgrade its telecommunications facilities and equipment as necessary to meet evolving service requirements and maintain high quality service. The use of federal universal service support for these purposes is clearly consistent with the federal universal service provisions.

3. In addition to the information included in Exhibit A, the following information is provided to meet the Commission's "Certification requirements" set forth in 20:10:32:54:

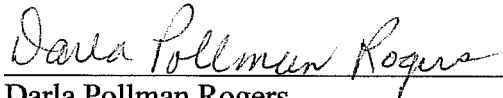

- The Company's service quality improvement plan is to continue to upgrade its telecommunications facilities and equipment as necessary to meet evolving service requirements and maintain high quality service throughout its service area. As an incumbent local exchange carrier and the carrier of last resort in its service area, the Company upgrades and replaces facilities and equipment as necessary. The Company believes that its planned capital additions will improve the reliability of switched calls for its customers, increase the Company's network capacity to serve remote customers and provide customers with state-of-the-art telecommunications service. In furtherance of its service quality improvement plan, the Company will use any High-Cost universal service amounts received by it to offset expenditures incurred as it continues to upgrade and replace facilities and equipment. A progress report on the Company's two-year service quality improvement plan, required under the provisions of ARSD 20:10:32:54, is attached hereto as "Exhibit B."
- During calendar year 2006, the Company did not experience any known service outages affecting at least 10 percent of its end user customers, for a period lasting longer than 30 minutes: The average trouble reports logged each month are approximately 2.8 percent of total access lines.
- The Company was able to provide service to all potential customers that requested service during 2006, and as of December 31, 2006, the Company is not aware of any unfulfilled requests for service.
- During 2006, the Company's customer service department averaged approximately 285 calls from consumers each month for new or additional service requests, billing questions, payment arrangements and reports of technical issues. The majority of calls received are resolved by the customer service representative during the initial contact. When necessary, appropriate Company personnel make a second contact, within 24 hours, to help resolve issues. Few calls require escalation from the customer service department to other management staff for resolution. The Company has no record of complaint(s) received more formally as written complaints or as complaints that needed to be resolved with the involvement of other Company representatives outside of the customer service department.

- Also attached as "Exhibit C" is a document containing other certifications, including those required under the provisions of ARSD §§ 20:10:32:54(5), 20:10:32:54(6), 20:10:32:54(7) and 20:10:32:54(8).

4. Based on all of the foregoing information, including the information provided on Exhibits A, B and C, the Company requests that this Commission issue an appropriate certification to the FCC and USAC indicating that Bridgewater-Canistota Independent Telephone Company is in compliance with 47 U.S.C. § 254(e) and should receive all federal universal service support determined for distribution to the Company in 2008. In order to ensure that this certification is issued to the FCC prior to October 1, 2007, the Company would further ask the Commission to expedite the process that is initiated based on this filing.

Dated this 29th day of May 2007.

Respectfully submitted,

Darla Pollman Rogers
