

Responses to SD PUC Questions related to Request to Partially Relinquish South Dakota ETC status.

Docket TC11-082

Friday, October 14, 2011

1. For each of the wireline centers identified in the petition where relinquishment is being requested, please provide the number of customers currently being served by Long Lines, if any.

Long Lines Wireless currently does not service any customers in the wireline centers where the company has requested relinquishment of ETC status.

2. Describe how these customers have been notified of the pending relinquishment and describe how these customers will continue to be served, as required by ARSD 20:10:32:48(4). Will Long Lines require time to transition these customers to a new provider? If so, please explain.

Since Long Lines Wireless does not provide service to any customers in these areas, notification was not considered necessary. Service to customers in these areas will continue to be provided by the incumbent local exchange carriers in these areas and any CLECs currently providing service in these areas.

3. If any of the above customers are currently on Lifeline rates, please explain how those rates will be seamlessly be maintained when moving to a new provider.

This question is not applicable since there are no customers currently being serviced in these areas.
