KADOKA

Intrastate Access Services Tariff

Purpose and Description of Filing

Introduction

The intent of this document is to explain the overall purpose of the Kadoka filing and provide an explanation of the methodology used to calculate the rate impacts to Kadoka. The filing also includes a copy of the revised Kadoka Intrastate Access Services Tariff.

I. Purpose of Filing

This filing is being made to comply with the FCC's Report and Order and Further Notice of Proposed Rulemaking, FCC 11-161, adopted October 27, 2011 and released on November 18, 2011, (Report and Order). The Report and Order outlines significant reform of intrastate and interstate intercarrier compensation (ICC) rates and charges. The FCC took the following immediate steps to establish a transition to bill-and-keep as the ultimate uniform, national ICC methodology for the exchange of telecommunications traffic.

- Capped originating and terminating interstate access rates and reciprocal compensation rates at the December 29, 2011 rate levels.
- Capped all intrastate terminating access rates, originating and terminating dedicated transport rates, and reciprocal compensation rates at the December 29, 2011 rate levels.
- Effective July 1, 2012 rate-of-return companies begin a nine-year transition of terminating end office switching rates to bill-and-keep.
- Effective July 1, 2012 allows incumbent local exchange carriers (ILECs) to begin charging a Transitional Intrastate Access Rate calculated in accordance with FCC 51.909. The application of this section will be discussed below.
- By July 1, 2013 intrastate and interstate switched access rates should be in parity.
- The FCC developed a Recovery Mechanism (RM) that allows the rate-of-return ILECs to recover a portion of the lost revenues from a combination of a new end user charge and the Connect America Fund (CAF). Although the RM allows the ILECs to recover a portion of their lost revenues, it is an interstate recovery mechanism described in 51.915 of the FCC rules and will not be discussed in this filing.

- Other ICC reforms relate to Access Stimulation, Phantom Traffic, rules for wireless intraMTA traffic and interconnected VoIP traffic. These issues are not addressed in this filing.
- The FCC also issued a Further Notice of Proposed Rulemaking to examine originating access reform.

Through this filing, Kadoka files revisions to its intrastate access services tariff to comply with the changes listed above. The Report and Order states that it is the FCC's desire for the States to continue to oversee the tariffing of intrastate rates and reductions during the transition period. The Kadoka Intrastate Access Services Tariff is being revised to reflect the terminating access rate changes ordered by the FCC.

The Kadoka Intrastate Access Services Tariff revisions do not make changes to the current originating intrastate access rates, rate structure, or services provided by Kadoka. The FCC's Report and Order does not propose reform to originating access rates at this time.

II. Description of Filing

Attached to this filing, you will find:

- The revised Kadoka Intrastate Access Services Tariff Section 17 shows the Transitional Intrastate Access Rate for Kadoka.
- A Confidential Filing of a Worksheet listing Kadoka's Intrastate terminating revenues for the fiscal year test period, terminating intrastate access minutes-of-use (MOU), terminating intrastate access revenues based upon the interstate rates and rate structure as of December 29, 2011, the calculated Transitional Intrastate Access Rate, and the revenues resulting from the Transitional Access Rate.

III. Methodology Used to Calculate the Transitional Intrastate Access Rate

Kadoka calculated its Transitional Intrastate Access rate in accordance with 51.909(2). Kadoka elects the option outlined in 51.909(2)(v) which applies the December 29, 2011 interstate access rates and rate structure to calculate the Transitional Intrastate Access Rate. Kadoka is an issuing carrier of the National Exchange Carrier Association's Access Tariff No. 5 filed at the FCC. The revisions are being filed with an effective date of July 1, 2012, in accordance with the FCC's Report and Order. Tariff pages reflect the July 1, 2012 effective date for the Transitional Intrastate Access Rate for a one-year period.

Attached is a worksheet that provides the information to calculate the Transitional Intrastate Access rate. The following methodology was used to calculate the revised rates:

- Line 3 of the Confidential Transitional Rate Calculation worksheet attached to this filing identifies the billed and collected terminating access revenues based on the FCC's defined Fiscal Year of October 2010 through September 2011.
- Lines 7-36 of the Confidential Worksheet develop revenues, by rate element, by applying intrastate terminating MOU (fiscal year 2011 intrastate terminating MOU, by rate element) to the interstate rates and rate structure as of December 29, 2011.
- Line 39 of the Confidential Worksheet is a total of fiscal year 2011 terminating revenues at the interstate rates and rate structure.
- Line 41 of the Confidential Worksheet is the difference in Line 3 less Line 39.
- Line 44 of the Confidential Worksheet represents 50% of the difference shown on Line 41. The 50% factor is based on 51.909(2)(iii) provisions.
- Line 46 of the Confidential Worksheet represents the calculation of the Transitional Access Rate based upon MOU on Line 45, which is the same End Office MOU from Line 7.
