ACCESS SERVICE

14. Toll VoIP-PSTN

14.1 General

Toll VoIP-PSTN traffic is defined as traffic exchanged between a Sprint Communications Company, L.P. end user and the customer in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. This section governs the identification of Toll VoIP-PSTN traffic that is required to be compensated at interstate access rates (unless the parties have agreed otherwise) by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov. 18, 2011) as modified by its Second Order on Reconsideration, FCC Release No. 12-47 (April 25, 2012), and as codified in 47 C.F.R. 51.319 ("Reconsideration Order"), and unless Sprint and the Customer have agreed otherwise. Specifically, this section establishes the method of separating such traffic (referred to in this tariff as "Relevant VoIP-PSTN Traffic") from the customer's traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC Orders.

(D)

(D)

If a Toll Free Database Access Query charge is assessed on a Toll Free 8YY Traffic call, it will be rated at the charges as set forth in the appropriate section of this tariff.

(C) (C)

(C)

14.1.1 Rating of Toll VoIP-PSTN Traffic

The Relevant VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Company's tariffed interstate switched access rates as provided in Sprint's Tariff F.C.C. No. 13, unless intrastate rates are lower in which case they will be rated at the intrastate charges. Intrastate VoIP-PSTN not required to be billed at the interstate rates pursuant to this Section will be billed in accordance with the intrastate rate provisions of this Tariff (absent an agreement between the company and the customer).

14. <u>Toll VoIP-PSTN</u> (Continued)

(N)

- 14.2 <u>Calculation and Application of Percent-VoIP-Usage Factor</u> * (Continued)
 - (4) Sprint will apply the PVU factor to the total intrastate access MOU exchanged with the customer to determine the number of Relevant VoIP-PSTN Traffic MOUs.

Example 1: The PVU-S is 10% and the PVU-C is 40%. The PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. The Company will bill 46% of the customer's intrastate access MOU at the Company's applicable tariffed interstate or intrastate switched access rates, whichever is lower.

Example 2: The PVU-S is 10% and the PVU-C is 0%. The PVU factor is $0\% + (10\% \times 100\%) = 10\%$. The Company will bill 10% of the customer's intrastate access MOU at the Company's applicable tariffed interstate or intrastate switched access rates, whichever is lower.

Example 3: The PVU-C is 100%. No matter what the PVU-S factor is, the PVU is 100%. The Company will bill 100% of the customer's intrastate access MOU at the Company's applicable tariffed interstate or intrastate switched access rates, whichever is lower.

(5) If the customer does not furnish the Company with a PVU-C pursuant to the preceding paragraph 1, the Company will utilize a customer PVU-C of 0%.

14.3 Initial PVU Factor

In calculating the initial PVU, Sprint will take the customer-specified PVU-C into account retroactively to December 29, 2011, provided that the customer provides the factor to Sprint no later than August 31, 2012; otherwise, it will set the initial PVU equal to the PVU-S, as specified in subsection 14.2 (2) above.

On April 25, 2012, the FCC released its Second Oder of Reconsideration in WC Docket No. 10-90, etc., FCC Release No. 12-47 ("Reconsideration Order") which affected the compensation of originating VoIP-PSTN traffic. In compliance with the Reconsideration Order, applicable interstate access rates will apply to originating VoIP-PSTN traffic for the period of December 29, 2011 through July 12, 2012, using the PVU factors. Beginning July 13, 2012 through June 30, 2014 originating VoIP-PSTN traffic will be rated at the applicable intrastate rates. Effective July 1, 2014 originating VoIP-PSTN traffic will be rated at interstate access rates, using the PVU factors.

14.7 Rates and Charges for Toll VoIP-PSTN Traffic

Local Switching and Toll Free 8YY Transit Traffic service rates below are equal to the Company's applicable tariffed intrastate (for Originating) as located elsewhere in this tariff and interstate switched access rates as provided in Sprint's Tariff F.C.C. No. 13, unless the applicable intrastate rates are lower.

(1) Local Switching

	Direct Connect Rate Per Access Minute	Indirect Connect Rate Per Access Minute
Originating	\$0.0517110	\$0.0521640
Terminating	\$0.0027210	\$0.0032970

(2) Toll Free 8YY Transit Traffic Service

	Direct Connect Rate	Indirect Connect Rate	
	Per Access Minute	Per Access Minute	
Originating	\$0.0078550	\$0.0081530	
Terminating	\$0.0024200	\$0.0028280	(N)
