Functionality in Emergency Situations

Back-Up Power

FiberComm has commercial power as our primary source of power for our equipment at our C.O. and all collocations. This is followed up with battery backup systems also at all sites. The minimum power time of the battery systems are suppose to be 14 to 24 hours.

FiberComm is also backed up by a stand-by generator at all locations. The one at our office is set up to run on diesel fuel and has a 250 gallon tank. It can be refueled while operating without shutting down service.

Rerouting of Traffic around Damaged Facilities

Long distance is purchased from INS and is provided over a fiber ring to Des Moines, Iowa. This service is delivered to the INS POP in the Orpheum building in downtown Sioux City, Iowa. FiberComm has 5 diverse routes into this building. FiberComm also has direct fiber access to INS along the route to the Orpheum building.

CenturyLink office Downtown, Morningside, South Sioux City are all served on fiber rings. The Leeds is the only one on a dead end fiber route.

FiberComm assigned a second fiber/s to all entering a building. The second pair never enters any facilities and is looped back on itself at the end of a fiber run. This creates a folded fiber loop to back feed a building should it be cut anywhere along the route. Most routes will be closed by 2014.

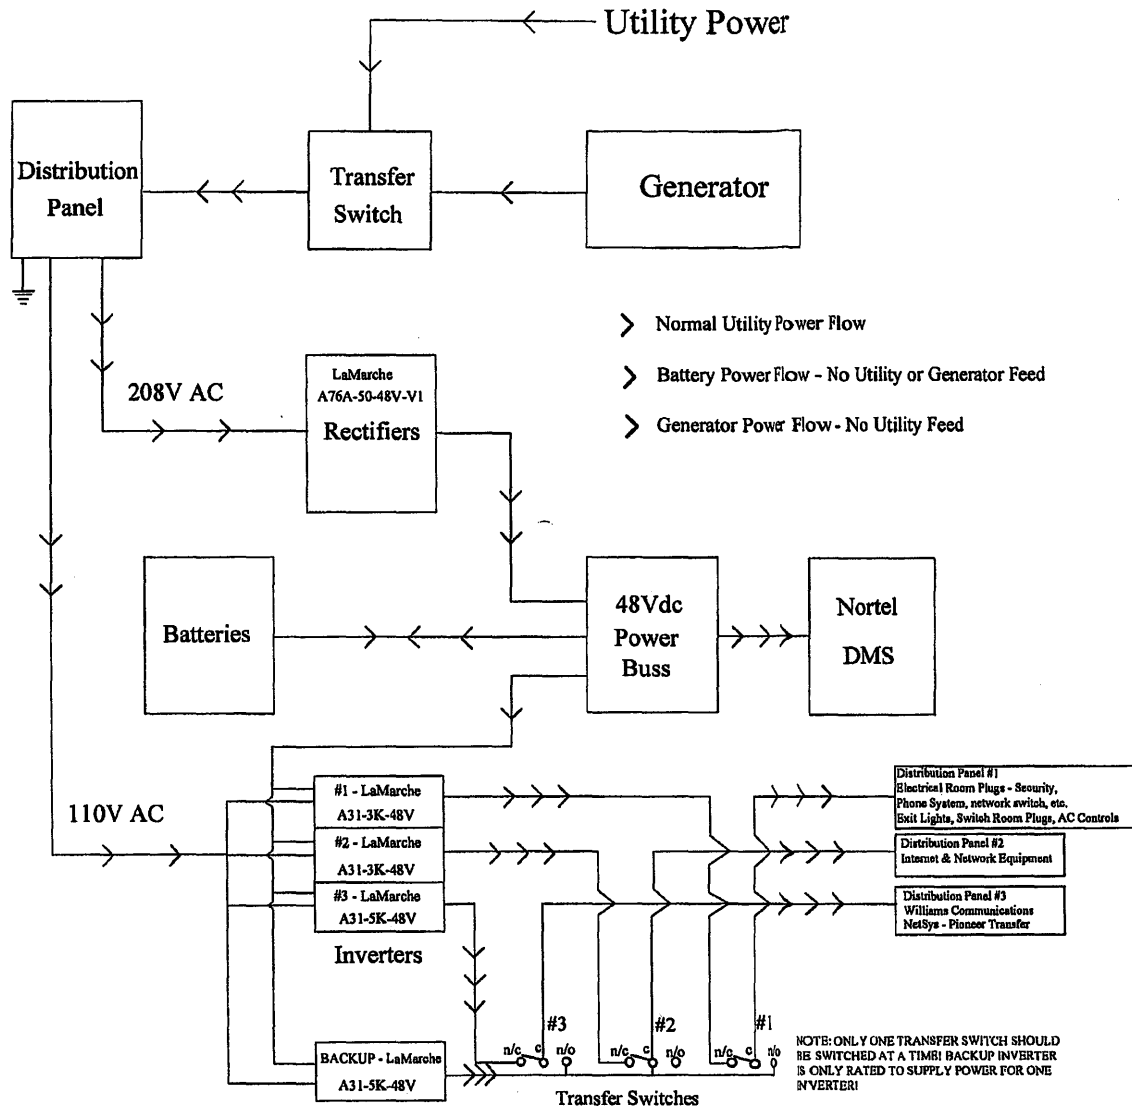

Traffic Spikes

FiberComm presently has dual service for trunks and switching. We have recently purchased a CS1500 Genband soft switch. All trunks – EAS, LD, E911 – were duplicated with what is assigned to the Nortel DMS100.

As we decommission the DMS100, trunks will either be switched to the CS1500 or disconnected.

CenturyLink gives FiberComm a report each month indicating the maximum usage on our trunks between companies. We add additional trunks when we hit spikes of 75% or more. Keep in mind we can also reroute calls through the other switch since each one has its own trunks.

Lifeline Terms and Conditions

FiberComm, L.C. offers Lifeline program-supported service to qualified low-income residential consumers for one telephone line per eligible household. In addition, the Federal Universal Service Charge is not assessed to consumers participating in Lifeline. Toll Blocking prevents the placement of all long distance calls for which a subscriber would be charged. Toll blocking is available to eligible consumers at no cost. Also, by choosing this option, consumers are usually not charged a deposit.
