July 10, 2013

- 1-1) Why is Long Lines wireless not reporting Interstate Access Support (IAS), Interstate Common Line Support (ICLS) and Connect America Fund Support (ICC) receipts for 2012? Please see attached file for disbursement information for 2012. This was pulled directly from the USAC website.
- 1-2) Why is local switching at a negative number, (\$2862)?
Per information from USAC website the LSS support for South Dakota was \$(2,862). This amount is from April 2012. This negative amount appears to be a true-up for LSS from 2011. All other support was moved to FHCS component.
- 1-3) Please state where, at the wire center level, improvements were made and if there were any unfulfilled project targets pursuant to ARSD 20:10:32:54.02. We updated radios primarily at the Sioux Falls tower locations. Please see attachment for a listing of those towers. All planned projects for 2012 were completed.
- 1-4) Why is Long Lines Wireless expecting Local Switching Support to be negative in 2014? After further review, this amount should probably zero. We don't expect to receive or have any more LSS true-ups.
- 1-5) Why is Long Lines wireless estimating receipts of Interstate Access Support (IAS), Interstate Common Line Support (ICLS) and Connect America Fund Support (ICC) for 2014? We didn't report any amounts for the above component codes in 2014. All support is moving to FHCS.
- 1-6) What "Existing SD sites" are you planning on making improvements on and what are the estimated populations pursuant to ARSD 20:10:32:43.02(3) and (4)? Long Lines Wireless is planning on continuing the maintenance of all existing SD tower sites. There is no current plans by specific site. The current populations of the South Dakota sites is roughly \$185,968 and includes the following locations:
Dakota Dunes
Vermillion
Jefferson
Beresford
Elk Point
Yankon
