BCN Telecom consolidates all voice, data and networking needs into one solution, tailored to your business and crafted from progressive technology and best-in-class carrier options. Enjoy flawless customer service with a human touch...be a select customer, regardless of size. Discover the One Bill Solution all while enjoying an average 20% savings.

#### OUR CORE COMPETENCIES INCLUDE:

##### PLANNING

Your engagement with BCN Telecom begins with determining goals and outlining any potential problems. Once our consultants are aware of the landscape the company operates in, we assess all challenges and understand the goals for voice and data. We can then properly assemble a plan for the future—at rates that improve your current budget.

##### IMPLEMENTATION

One of the important principles BCN Telecom lives by is our effective project management skills. A client's first team experience with BCN Telecom is during the implementation process. We have over 15 years experience working with Tier One providers; client equipment vendors and all parts of the supply chain which ensures that we deliver service on time and with minimal challenges.

##### CUSTOM BILLING

Many BCN Telecom customers use their invoice as a tool to properly allocate costs and review usage habits. BCN's flexible billing system allows data presentation in formats that help clients improve processing efficiency. BCN Telecom customers have a choice to receive their bills online, hard-copy or CD. Statements can also be paid online.

##### POST-IMPLEMENTATION SERVICE

BCN Telecom clients are assigned an account representative that understands the dynamics of the client's industry and how they use voice and data to be competitive. These specialists are industry veterans that are trained to deal with high-end voice and data customers. Our specialized escalation ladder allows for an immediate resolution.

---

In order to get started, we will need a copy of your bills for one month. Once we have your bills, our specialists will begin the analysis of your current situation. At that point, our team will contact you with a proposal showing your current model today and then what BCN Telecom is proposing.

From all of us at BCN Telecom, we would like to thank you for the opportunity and look forward to working with you in the near future. For more information please visit us at [www.bcntele.com](http://www.bcntele.com).

## About Us

### WHY BCN TELECOM?

BCN Telecom is a nationwide telecommunications company providing voice, data and cloud services to business customers. At BCN Telecom we know that every customer is different and each product need is unique. That's why our experienced engineers and sales representatives work with clients to help them identify their current network infrastructure, future network needs and the best way to create a cost-effective, integrated system that fulfills the customer's specific Voice, Data and Cloud requirements.

Building cost-effective, integrated Voice, Data and Cloud networks that provide solutions through the application of Best-in-Class technologies.

We enable our clients to meet their business objectives through the application of advanced technologies. Our extensive knowledge of Data Center, TDM/IP Voice, Cloud and IP/MPLS-enabled core networking services, allows our architects to deliver solutions optimized to meet a client's unique requirements as defined by the needs of their business. BCN Telecom creates cost-effective solutions that make sense for our customers while improving their day-to-day business applications.

### DESIGN & IMPLEMENTATION

BCN Telecom is a leading Voice, Data and Cloud network integrator focused on maximizing return for our worldwide clientele. We offer Voice, Data, Cloud, security and storage planning, design, installation and operations services for select enterprise, carrier and government customers.

Partnering with us helps you plan for enhanced voice, data and cloud performance throughout all stages of your business growth.

Our approach utilizes proven tools and methodologies that are founded on extensive technical expertise and real-world deployment experience. Partnering with BCN Telecom can help you plan for optimal network performance at all stages of your growth from pre-deployment and new service introduction, to ongoing expansion and operations.

### SUPPORT SERVICES

BCN Telecom offers expert-level Voice, Data and Cloud consulting. Project management services are available for every phase of the sales cycle. We cover your Voice, Data and Cloud networks at every step, with analysis, design, deployment, operations and life cycle support individually tailored to your business.

BCN Telecom engineering specializes in Data Center, TDM/IP Voice, Cloud and IP core networking for enterprise, government and carrier markets. Our engineers have led multi-national Voice, Data, and Cloud deployments, US government R&D installations, carrier WAN-optimization and disaster recovery planning for major financial services corporations.

BCN Telecom offers the following Services:

- Voice and Data Network Design
- Billing Audits and Carrier Analysis
- Network & Data Center Architecture
- Data Center Interconnect Design
- Testing and TURN UP
- Migration Planning and Implementation
