

Calculations behind OrbitCom 2014 Access Reduction

Current Rate Is	
Composite Local/End Office	0.006
Less 1/3 the difference between	
Composite terminating end	
office and 0.0007	
.006 -.0007= 0.0053÷3=.0017666	<u>-0.0017666</u>
NEW OrbitCom RATE	0.0042334

The reduction taken by OrbitCom is just under 30%

In the states where we've seen the ILEC CenturyLink filing of its rate reduction, its reduction was made using the two per minute rate elements: Local Switching (from 0.001974 to 0.001391) and Common Port (from 0.000747 to 0.000526). Each rate decreased by approximately 30%.
