<u>Five-Year Network Improvement Plan</u> <u>Golden West Telecommunications Cooperative, Inc. – Study Area 391684</u>

In its *USF/ICC Transformation Order* and subsequent Orders, the Federal Communications Commission ("FCC" or "Commission") requires Eligible

Telecommunications Carriers ("ETCs") to submit a five-year build-out plan in a manner consistent with Section 54.202(a)(1)(ii) of the Commission's Rules by July 1, 2014 and to submit annual progress reports thereafter. Section 54.202(a) (1) (ii) states in part that ETCs are to [s]ubmit a five-year plan that describes with specificity proposed improvements or upgrades to the [ETC's] network throughout its proposed service area Each [ETC] shall estimate the area and population that will be served as a result of the improvements"²

In its *March 5, 2013 Order*, the FCC specified that for rate-of-return carriers, the five-year plans "should describe the carrier's network improvement plan, which should provide greater visibility into current plans to extend broadband service to unserved locations in rate-of-return service territories." Golden West Telecommunications

² 47 C.F.R. § 54.202(a) (1) (ii).

³ March 5, 2013 Order at Para. 9 citing Section 54.202(a) (1) (ii).

Cooperative, Inc. ("the Company") is a rate-of-return carrier ETC and hereby submits its five-year network improvement plan for study area 391684.

I. The Challenges Faced by the Company in Providing Voice and Broadband to its Rural Service Area

A. Description of the Company and its Service Area

Golden West Telecommunications provides advanced telecommunication services across a large portion of South Dakota. Golden West's service area spans over 24,500 square miles, or nearly one-third of South Dakota's total land mass. Golden West's service area is sparsely populated, with an average customer density of less than 1.5 customers per square mile. Golden West provides service to over fifty small communities across South Dakota, including portions of five tribal reservations, with the population of the largest community in Golden West's service area being nearly 4,000 residents. Golden West service area includes farm and ranch lands, as well as areas with significant rock and/or forest land. Golden West also works with a variety federal, state and local governmental entities in order to secure right-of-way for the placement of telecommunications facilities, including national parks, national forests, national grasslands, tribal lands and state parks as examples.

B. The Exchanges Contained Within the Company's Study Area Golden West Telecommunications Cooperative, Inc., study area 391684, serves the combined exchange area(s) of:

Hartford, SD 605-528	South Hartford/Wall Lake, SD 605-526

II. The Company Has Used and Will Use Universal Service Support Only For the Intended Purposes

Section 254(e) of the Communications Act of 1934, as amended requires ETCs to use Universal Service support ("USF") "only for the provision, maintenance, and upgrading of facilities and services for which the support is intended." Pursuant to Section 54.314 of the FCC's rules, in order for state-designated ETCs to receive USF for the coming year, states must annually file certifications by October 1 stating that all federal high-cost support provided to such carriers within the state "was used in the preceding calendar year and will be used in the coming calendar year only for the provision, maintenance, and upgrading of facilities and services for which the support is intended." ETCs not designated by a state must file similar certifications with the FCC.6

In its *USF/ICC Transformation Order*, the FCC clarified that prior to making the Section 254(e) certifications, states should conduct a "rigorous examination of the factual information" contained in the annual Section 54.313 reports, of which the five year network improvement plan and annual progress reports are a part, in determining whether they can certify that carriers' support has been used and will be used only for the purpose for which the support was intended.⁷ The FCC said that it would also use the reports to verify certifications filed by ETCs that are not state-designated.⁸ In this context, the Commission stated, "[i]n light of the public interest obligations we adopt in this Order, a

⁴ 47 U.S.C. § 254(e).

⁵ 47 C.F.R. § 54.314(a).

^{6 47} C.F.R. § 54.314(b).

⁷ See USF/ICC Transformation Order at Para. 612.

⁸ *Id*.

key component of this [Section 254(e)] certification will now be that support is being used to <u>maintain and extend</u> modern networks capable of providing voice and broadband service."

Essentially, under the existing rules and processes, the federal USF received by the Company and other incumbent rural telephone companies are, in fact, an integral part of the recovery of expenditures of rural incumbent local exchange carriers incurred in the provision, maintenance and upgrading of their provision of facilities and services for which the USF is intended. Golden West Telecommunications Cooperative, Inc. depends upon its receipt and utilization of federal universal service support to provide rural telephone customers with affordable and quality voice and broadband services.

Accordingly, given the critical role the network improvement plan and the progress reports will have in the annual Section 254(e) certification process, Golden West Telecommunications Cooperative, Inc.'s plan and progress reports will demonstrate not only how the Company has used and will use USF not only for improvements and upgrades, but also for the provision and maintenance of the facilities and services to which the support was intended.

III. The Company's Five-Year Network Improvement Plan

When the Commission adopted its five-year plan requirements for FCC-designated ETCs in its 2005 ETC Order, it set forth the following criteria as to how the ETC is to describe with "specificity" the proposed improvements or upgrades to the ETC's network throughout its service area:

⁹ *Id.* (emphasis supplied).

(1) how signal quality, coverage, or capacity will improve due to the receipt of high-cost support throughout the area for which the ETC seeks designation; (2) the projected start date and completion date for each improvement and the estimated amount of investment for each project that is funded by high-cost support; (3) the specific geographic areas where the improvements will be made; and (4) the estimated population that will be served as a result of the improvements.¹⁰

In that order, the FCC clarified that service quality improvements in the five-year plan "do not necessarily require additional construction of network facilities." Accordingly, the improvements listed in the plan may be projects related to the expansion of the network (one or multiple services), projects related to updating technology to accommodate new services or higher bandwidth or maintenance projects, such as to reduce trouble reports or replace outdated equipment. Additionally, in some cases, the projects may be ones that improve or upgrade the entire network rather than discrete areas within a study area or they may be ones that are ongoing projects that have no specific start and completion dates.

The instructions to the Form 481 state "[r]ecipients may describe where improvements are expected to occur by wire center or census block, as appropriate. To the extent no improvements are planned in specific areas, the five-year plan should so indicate."¹² The instructions also require that in subsequent annual progress reports which must include the total amount of universal support received must provide this information "broken out separately by the amount spent on capital expenses and the

¹⁰ Federal-State Joint Board on Universal Service, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) ("2005 ETC Order").

¹¹ Id.

¹² Instructions for Completing FCC Form 481, OMB Control No. 3060-0986 (High-Cost), OMB Control No. 3060-0819 (Low-Income), July 2013, Line 112

amount spent on operating expenses."¹³ Accordingly, the Company's five-year plan separately provides both capital expenditures and operating expenses.

A. The Company's Major Network Improvement Projects

Based upon this framework, Appendix A reflects Golden West

Telecommunications Cooperative, Inc.'s major network improvement projects for the

five calendar years 2015 through 2019¹⁴ along with the start and completion dates, capital

costs, areas and population associated with those projects.

B. How These Projects Will Improve the Network

As detailed in Appendix A, Golden West Telecommunications Cooperative, Inc. anticipates investing for network improvements in study area 391684 during calendar years 2015 – 2019. There are no major network build-outs or fiber-to-the-home (FTTH) upgrades included for this time-frame, as significant investments were made in 2013 to upgrade the rural portion of the service area to FTTH. The projected investments will rather be directed toward maintaining the existing network, providing for service to new subscribers, and increasing bandwidth to keep up with consumer demand. The projections for years beyond 2015 are based on both actual costs from recent years and current year estimates.

The investments shown for "Other Cable and Wire Additions" will be used to bring broadband and/or voice services to new subscribers and provide for cable maintenance and repairs across the entire service area.

¹³ Instructions for Completing FCC Form 481, OMB Control No. 3060-0986 (High-Cost), OMB Control No. 3060-0819 (Low-Income), July 2013, Line 112

¹⁴ Based upon informal discussions with the FCC, the five-year network improvement plan will start with calendar year 2015 and run through calendar year 2019.

Those investments detailed for "Central Office Transmission" and "Central Office Subscriber Carrier Maintenance and Upgrades" are intended for maintenance and repairs for the existing transport and subscriber carrier facilities throughout the service area.

They will also be used toward the purchase of new equipment to accommodate new subscriber growth and increased bandwidth as consumer demand requires. These investments will improve the quality of both voice and broadband services.

The investments listed for "Building and Maintenance Upgrades", "Vehicle and Work Equipment Replacement", and "Information Technology Services" are intended for the entire service area and will allow for general maintenance and upgrades to central offices, the purchase of outside plant equipment essential for the day to day upkeep of the network, and computers and other telecommunications equipment necessary for the business operations of the Company.

C. Part 32 and Yearly Breakdown of Estimated Capital Expenditures Associated with the Projects and Operating Expenses

Appendix B included herein specifies the projects listed in Appendix A in terms of the Part 32 capital expenditures categories and in terms of the years in which the costs are expected to occur along with depreciation expense associated with the capital expenditures. In a separate section, the projected operating expenses are provided.

Certification of Service Quality Standards & Consumer

Protection Rules Compliance for Voice and Broadband Services

Golden West Telecommunications Cooperative, Inc. (hereinafter "the Company") hereby certifies that it is complying with applicable service quality standards and consumer protection rules.

This document details the processes and procedures that the Company follows to ensure compliance with service quality standards and consumer protection rules as laid out in FCC Form 481 Instructions.

The Company provides voice grade access to the public switched telephone network (PSTN) at a flat rate, thereby enabling access to emergency services provided by local government or other public safety organizations such as 911.

For service quality standards that are affected by plant issues, the Company engineers and installs its plant and other facilities in such a way as to ensure, to the greatest extent possible, safe, adequate, and continuous service at all times.

In addition, employees are periodically trained on service quality standards and consumer protection issues. In particular, if any set of issues appear to be prevalent, employees are given briefings on how to handle such issues, beyond the normal guidelines in place for resolution of customer complaints. A recent example is the call completion problems that have arisen and the customer calls that are generated as a result. Although this is not a service quality problem caused by the Company, it does affect customers of the Company and, therefore, deserves the attention of the Company employees.

The Company also periodically reviews its operating procedures to be sure that those operating procedures are in compliance with service quality standards and that the operating procedures are not in violation of consumer protection rules. Internally a compliance officer ensures annual employee training and dictates disciplinary processes for improper use of consumer information. If concerns arise that cannot be handled by the compliance officer, legal counsel is sought to assist with a resolution.

If complaints are filed with the Company related to service quality standards or consumer protection rules, the complaint is immediately investigated, the matter tracked and any corrective action noted. This process ensures that problems are addressed and corrections made.

The Company advertises the availability of its services and the charges using media of general distribution and on its website.

The Company is subject to consumer protection obligations for broadband services under federal law. These obligations include, but are not limited to, the following: public disclosure of accurate information regarding network management practices, performance, and commercial terms of broadband internet access services; as a means of providing sufficient information for consumers to make informed choices regarding use of such services, and for content, application, service and device providers to develop, market, and maintain internet offerings as specified in F.C.C 47 C.F.R. Part 8 §8.3.

The Company maintains six business offices throughout its service area providing customers with access to a customer service representative either in person or via a local telephone number or toll-free telephone number during normal business hours. Customers also have access to the repair service and internet help desk twenty-four hours a day, seven days a week by calling a toll-free number, or by calling one of the business office numbers, which forward to these services after hours.

Certification of Functionality in Emergency Situation

Golden West Telecommunications Cooperative, Inc. (hereinafter "The Company") hereby certifies that it is able to function in emergency situations as set forth in §54.202(a)(2). The Company's critical network infrastructure is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). The Company can take reasonable steps to reroute traffic around damaged facilities and manage traffic spikes throughout its network, as emergency situations require.

Specifically, each central office building is supplied with standby generators and battery back-up that enable the central office to keep running until power is restored so long as fuel is available and the facility can be safely accessed, or until reasonable system changes are made to reroute traffic.

The capacity of the Company to function in emergency situations encompasses both voice and broadband.

Section 54.202(a)(2) requires ETCs that are designated by the Commission to "demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations."

Lifeline Terms and Conditions

Golden West Telecommunications Cooperative, Inc. offers Lifeline program-supported service to qualified low-income residential consumers for one telephone line per eligible household. The Lifeline program provides discounts to eligible low-income consumers to help them establish and maintain telephone service. Lifeline assistance lowers the cost of basic, monthly local telephone service. Eligible consumers can receive \$9.25 per month in discounts. In addition, the Federal Universal Service Charge is not assessed to consumers participating in Lifeline. Toll Blocking prevents the placement of all long distance calls for which a subscriber would be charged. Toll blocking is available to eligible consumers at no cost.

Lifeline Program Eligibility Information

Program Based Eligibility

Consumers are eligible for Lifeline if they, one of their dependents or their household participate in one of the following qualifying assistance programs:

Low-Income Home Energy Assistance Program (LIHEAP) Federal Public Housing Assistance (Section 8) Supplemental Nutrition Assistance Program (SNAP) Medicaid National School Lunch Program's Free Lunch Program Supplemental Security Income (SSI) Temporary Assistance for Needy Families (TANF)

Lifeline applicants must present documentation demonstrating eligibility either through participation in one of the qualifying federal assistance programs or through income-based means.

Acceptable documentation of program-based eligibility includes: current or prior year's statement of benefits from a qualifying state, federal or Tribal program; notice letter of participation in a qualifying state, federal or Tribal program; program participation documents; or another official document evidencing the consumer's participation in a qualifying state, federal or Tribal program.

Income Based Eligibility

In addition, consumers are eligible for Lifeline if their household income is at or below 135% of the federal poverty guidelines.

2014 Federal Poverty Guidelines - 135%

Household Size	48 Contiguous States and D.C.	Alaska	Hawaii	
1	\$15,755	\$19,683	\$18,117	
2	\$21,236	\$26,541	\$24,422	
3	\$26,717	\$33,399	\$30,726	
4	\$32,198	\$40,257	\$37,031	2-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0
5	\$37,679	\$47,115	\$43,335	
6	\$43,160	\$53,973	\$49,640	
7	\$48,641	\$60,831	\$55,944	
8	\$54,122	\$67,689	\$62,249	
For each additional person, add	\$5,481	\$6,858	\$6,305	

Acceptable documentation of income eligibility includes: prior year's state, federal or Tribal tax return; current income statement from an employer or paycheck stub; social security statement of benefits; Veterans Administration statement of benefits; retirement/pension statement of benefits; unemployment/workmen's compensation statement of benefits; federal or Tribal notice of letter participating in General Assistance; or a divorce decree or child support award or other official document containing income information.

Tribal Eligibility

A subscriber who lives on Tribal lands and is an eligible resident of Tribal lands is eligible for Tribal Lifeline service or Tribal Link Up if the subscriber, one or more of the subscriber's dependents, or the subscriber's household participates in any of the above-listed qualifying assistance programs or one of the following Tribal-specific federal assistance programs: Bureau of Indian Affairs General Assistance; Tribally Administered Temporary Assistance for Needy Families; Head Start (if income eligibility criteria are met); or the Food Distribution Program on Indian Reservations (FDPIR). Tribal subscribers may also qualify if the household income is at or below 135% of the Federal Poverty Guidelines.

Numbers of Minutes-of-Use Provided as Part of Lifeline Program Service

Golden West Telecommunications Cooperative, Inc.'s Voice Lifeline service includes unlimited local minutes-of-use within the toll-free calling area. Golden West Telecommunications Cooperative, Inc.'s Voice Lifeline Plan does not include any free minutes-of-use for toll. Toll is billed at the standard toll rate depending on which interexchange carrier the consumer subscribes to for toll service. As part of the Lifeline service, toll blocking is available to eligible consumers at no cost.

Rates

Subscribers may receive the Lifeline credit on any type or grade of local service, including bundled services that are normally offered by Golden West Telecommunications Cooperative, Inc. Advertised rates do not include any applicable taxes or surcharges.

Recertification of Lifeline Eligibility

Lifeline recipients are required to recertify their eligibility annually. Failure to properly recertify a recipient's continued eligibility for the Lifeline program will result in termination of the Lifeline recipient's monthly Lifeline discount and de-enrollment from the Lifeline Program.

Additional Lifeline Program Information

The Lifeline program is limited to one benefit per household, consisting of either wireline or wireless service. A household is defined, for purposes of the Lifeline program, as an individual or group of individuals who live together at the same address and share income and expenses. Lifeline is a government benefit program, and consumers who willfully make false statements in order to obtain the benefit can be punished by fine or imprisonment or can be barred from the program.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is estimated to average 4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
