WHY CHOOSE HOSTED VOIP

There are many advantages for businesses of all sizes to utilize a Hosted VoIP solution versus managing a traditional premise PBX phone system. With the increasing number of remote workers and portable devices being utilized for communications, hosted voice and cloud communications are becoming the norm.

With a fully-redundant hosted VoIP platform your phone service is always up and running regardless of the conditions in your area such as power outages, flooding, snow storms or other environmental circumstances.

Even if your office is damaged or inaccessible, the Internet control panel allows you to instantly reroute your calls to other available emergency office or cell phones.

HOSTED VOIP BENEFITS

Whether your company is a small growing business or a large corporation, Hosted VoIP allows you to customize your communication needs with ease. You can change or add locations and user lines at anytime, seamlessly connect remote offices and even monitor telecommuter productivity. No expensive on-premise equipment to switch, repair or replace and no IT staff required to maintain your communications.

- Scalability - Pay as you grow for moves, adds, changes and deletes
- Flexibility - Full administrator/user control over system features
- Security - Redundance through business grade connectivity
- Efficiency - Quality of Service and reduction of single point of failures
- Customizable - Features to meet your individual business needs
- Future-proof - Ensures the latest network upgrades and features
- Business continuity - Remote call management can be manual or automated in the event of disaster recovery

A SOLUTION FOR EVERY BUSINESS
