

ATTACHMENT 1**Collocation DC Power Measurement****Section 8.0 - COLLOCATION**

8.2.1.30 Optional DC Power Measurement. CLEC will order DC power to meet its needs with a twenty (20) amperes (amp) per feed minimum. If CLEC orders more than sixty (60) amps, CenturyLink typically terminates such feed on a power board. If CLEC orders sixty (60) amps or less, the power feed typically terminates at a battery distribution fuse board (BDFB). No power measurements are performed at a BDFB. Therefore, for sixty (60) amps or less, the power usage rate is based on CLEC ordered amps. For power feeds of greater than sixty (60) amps terminated at the power board, CenturyLink will measure usage on a semi-annual basis if CLEC orders Optional DC Power Measurement. CenturyLink will also take a reading within thirty (30) Days of a written request by CLEC. CenturyLink will perform a maximum of four (4) readings per year for a particular Collocation site. Until the routine semi-annual reading or until such time that CenturyLink makes a reading based on a written request, CenturyLink will bill CLEC based on the amount of power ordered. Based on the reading, CenturyLink will adjust the new monthly usage rate to CLEC's actual usage rate on a going forward basis.

8.3 Rate Elements**8.3.1 Rate Elements - All Collocation**

8.3.1.6 -48 Volt DC Power Usage Charge. Provides -48 volt DC power to CLEC collocated equipment and is fused at one hundred twenty-five percent (125%) of the request. The -48 volt DC Power Usage Charge applies to the quantity of -48 volt capacity specified by CLEC in its order on a per ampere (amp) basis. There is a one (1) amp minimum charge for -48 volt DC power usage.

8.3.1.6.1 Optional -48 Volt DC Power Usage Charge is available for orders of greater than sixty (60) amps. If CLEC orders Optional DC Power Measurement, CenturyLink will initially apply the -48 Volt DC Power Usage Charge from Exhibit A to the quantity of power ordered by CLEC. CenturyLink will determine the actual usage at the power board as described in Section 8.2.1.30. CenturyLink will adjust the monthly usage rate based upon the actual usage on a going forward basis. There is a one (1) amp minimum charge for -48 volt DC power usage.
