SIMWOOD

AUTHENTIC CARRIER SERVICES

Using our technical mastery and breakaway spirit to champion
a fair and transparent telecoms marketplace.

OUR NETWORK

Unlike many, our network actually exists, ensuring quality and security for all your calls.

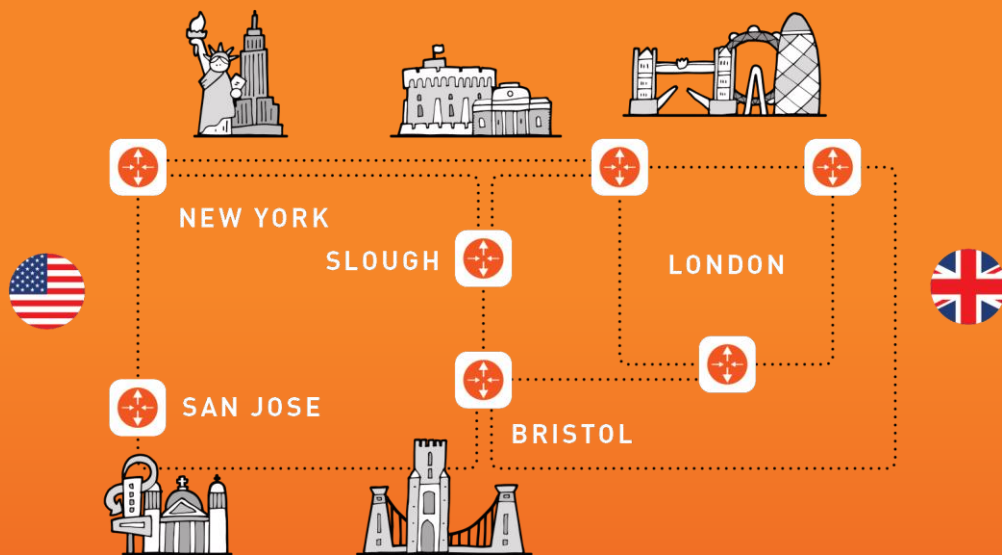

We insist on this level of control to ensure performance and reliability. Over 90% of our traffic flows directly to the destination network over bilateral connections. Very little relies on 'transit'.

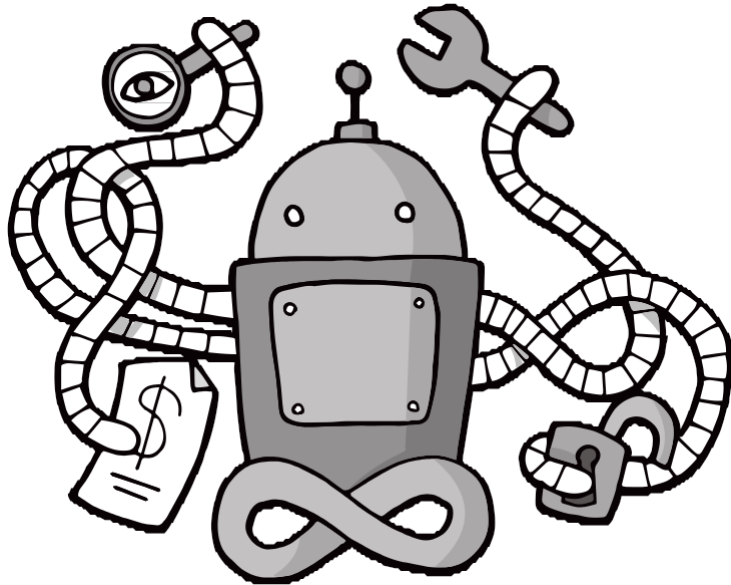

OUR API AND PORTAL

Built on our market-leading API, we designed our portal to allow you, the user, complete control over your carrier services in a user-friendly way.

No more confusing and cumbersome processes slowing your business down! Integrate us with your existing processes to keep your business lean and agile.

MAINTAIN CONTROL

View calls in progress right now (not just those that have already cost you money), check balances, and configure alerts and notifications

Configure fraud mitigation controls [Submit](#)

and manage porting requests [Allocate and](#)

configure inbound numbering

Monitor call costs, traffic, and channel utilization

Manage SIP trunks and set fraud and balance settings per trunk

Download invoices and manage payments

And much more...

SECURITY

We are so passionate about security we wrote a book about it!

The biggest threat to security is apathy and arrogance.
Knowing you need Simwood is the first step to enlightenment!

PREVENTING FRAUD

Our honeypot enables us to view data from real-time attacks and proactively apply that knowledge to keeping you safe. We perform over 200 checks per call yet still manage to have one of the lowest PDD (post-dial delay) in the industry. We put extraordinary efforts in to preventing you from spending money you don't intend to spend. In our view, simply telling you after the event is as wrong as the fraud itself. Backed by 20+ years experience and a global reputation as a thought leader, Simwood is here to help you SIP Carefully!

BUILT FOR VOICE

We are transatlantic! Simwood has crossed the pond and now has operations across the U.K. & U.S.

ABOUT US

OUR GOALS

TO MAKE REAL IMPACT
WITH TANGIBLE INNOVATIONS

TO REMAIN OPEN-MINDED,
FREE THINKING, AND INDEPENDENT

TO CHAMPION FAIRNESS
AND TRANSPARENCY

AND TO REMAIN THE NICEST GUYS
IN THE BUSINESS.

Our team is here to help you with any concerns you may have and get you back on track as quickly and seamlessly as possible.

RECOMMENDATION

When we went to build our hosted cloud PBX offerings in the UK, Simwood was our obvious choice as a partner. Beyond the technical advantages, they're an absolute pleasure to work with as well.

Simwood took the time to understand our business and our unique needs, and then offered suggestions and solutions above and beyond what we've ever received from any other carrier -- even when there wasn't a direct financial motivation for the additional help.

Simwood has a great combination of technical advantages, community focus, and great people. We highly recommend Simwood as more than just a telecommunications vendor, but as an invaluable business partner.
