South Dakota 2020 EOY CAF 2 Enabled & Eligible Areas

ATTACHMENT H

- CAF 2 Enabled CB
- CAF 2 Eligible CB
- Lumen Wire Center

Program Target

15,071

Enabled Locations

13,465 (89.3%)

CAF Eligible CBs are census blocks containing at least 1 location that qualifies for 10/1 as of December 31, 2020. Not all locations in the census block may qualify for broadband or the 10/1 speed. CAF Eligible CBs are census blocks without at least 1 location qualifying for 10/1 as of December 31, 2020. Under the CAF program Lumen has the flexibility to deploy to CAF 2 eligible census blocks identified by the FCC. The identification of an area as CAF 2 eligible does not indicate a commitment to deploy high speed internet to the area. For verification of unique addresses or locations, contact your local Lumen representative.
