SECTION 2 - RULES AND REGULATIONS, (CONT'D)

2.9 Obligations of the Customer (Continued)

2.9.3 Identification and Rating of Toll VoIP-PSTN Traffic (continued)

D. Calculation and Application of Percent-VoIP-PSTN-Usage Factor (T)

The Company will determine the number of Relevant VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under Section 2.9.3.C, above, by applying a Percent VoIP Usage Factor ("PVU") to the total intrastate access minutes of use identified by the Company as being exchanged between the Company and the Customer. The PVU Factor will be derived and applied as follows: (T)

- 1) The Company will apply a PVU Factor furnished by the Customer if and only if the Customer satisfies all of the following requirements: (C)
 - a. Customer furnishes to the Company a PVU Factor at least fourteen (14) days, and no sooner than thirty (30) days, in advance of the first day of each quarter (*i.e.*, January 1, April 1, July 1, and October 1) for application in the subsequent quarter.
 - b. The PVU Factor furnished by the Customer for each given quarter accurately represents the whole number percentage of the total intrastate access MOU that Customer exchanges with Company in the State that is originating access received by Customer from Company and terminates in IP format.
 - c. Concurrent with the furnishing of the PVU Factor for each given quarter, Customer provides auditable data and underlying documentation to the Company (*e.g.*, traffic study data, network usage data, FCC Form 477 Report data) that fully supports the PVU Factor furnished for that quarter.
 - d. Customer clearly indicates the source of all data used to compute Customer's furnished PVU Factor. If a spreadsheet is submitted, each cell must either (a) include the formula used to calculate the data in the cell or (b) be based on an external source for which the underlying documentation is also furnished by the Customer to the Company. The data and documentation submitted in support of the PVU Factor shall not be more than one year older than the date on which the PVU Factor is furnished to the Company. (C)

SECTION 2 - RULES AND REGULATIONS, (CONT'D)

2.9 Obligations of the Customer (Continued)

2.9.3 Identification and Rating of Toll VoIP-PSTN Traffic (continued)

D. Calculation and Application of Percent-VoIP-PSTN-Usage Factor

- 1) The Company will apply a PVU Factor furnished by the Customer if and only if the Customer satisfies all of the following requirements: (continued) (C)
 - e. Upon request of the Company, Customer makes available to Company any and all additional underlying records or other information necessary to verify the PVU Factor and the data and documentation submitted by Customer in support of Customer's furnished PVU Factor. Customer shall retain all data, documentation, call details, work papers, and/or other information used to develop or support each quarterly PVU Factor for a minimum of one year from the date on which the PVU Factor is furnished to the Company.
- 2) If Customer does not furnish Company with a PVU Factor and supporting documentation pursuant to Section 2.9.3.D, above, the Company may apply a PVU Factor equal to the percentage of VoIP subscribers in the state based on the most recent Local Competition Report released by the FCC, calculated based on the total number of incumbent LEC and non-incumbent LEC VoIP subscriptions in the state divided by the sum of the total reported number of VoIP subscriptions plus incumbent LEC and non-incumbent (C)

SECTION 3 - SWITCHED ACCESS SERVICE

3.1 General

- 3.1.1** Switched Access Service, which is available to Customers for their use in furnishing their services to End Users, provides a two-point communications path between a Customer's Premises and an End User's Premises. It provides for the use of common terminating, switching and trunking facilities, and for the use of common subscriber plant of the Company. Switched Access Service provides for the ability to originate calls from an End User's Premises to a Customer's Premises and to terminate calls from a Customer's Premises to an End User's Premises in the LATA where it is provided.
- 3.1.2** When a rate as set forth in this tariff is shown to more than two decimal places, the charges will be determined using the rate shown. The resulting amount will then be rounded to the nearest penny (i.e., rounded to two decimal places).
- 3.1.3** In the absence of an ASR as described in Section 3.4, delivery of calls to, or acceptance of calls from, the Customer's End User location(s) via Company-provided switched access services shall constitute a Constructive Order and an agreement by the Customer to purchase the Company's switched access services as described and priced herein.
