Key for Service Area Maps

In Bluepeak's original application, the CLEC map in **Exhibit C** and the larger map in **Exhibit E** (reattached below) each derive from the Federal Communications Commission's Broadband Data Map, accessible at https://broadbandmap.fcc.gov/home?version=dec2024.

Each hexagonal color depicts a different technology type, with the key displayed here:

Selected Providers

	Provider	Technology	Action	
🟥	Clarity Telecom, LLC	Fiber to the Premises	🔵	✕
🟦	Clarity Telecom, LLC	Copper	🔵	✕
🟩	Clarity Telecom, LLC	Cable	🔵	✕

Together, these technologies make up the entire South Dakota service area of Bluepeak. Note, however, that the technologies are overlaid on top of one another, meaning each hexagon may contain multiple technology types. Bluepeak offers this map only to express the boundaries of its current service area in the state.

Further, the ILEC map in **Exhibit C** and the smaller map in **Exhibit E** derive from the ILEC study area boundary, Study Area Code 391652. This map can also be accessed at https://www.fcc.gov/reports-research/maps/study-area-boundaries/.

The map below shows the Bluepeak ILEC service area:

ILEC Boundary Detail
