On November 30, 2018, the South Dakota Public Utilities Commission (Commission) received an Application for Facility Permits (Application) from Deuel Harvest Wind Energy LLC (Deuel Harvest or Applicant), an affiliate of Invenergy LLC. Deuel Harvest proposes to construct a wind energy facility and a 345-kilovolt (kV) transmission line with an associated 345-kV interconnection substation to be located in Deuel County, South Dakota, known as the Deuel Harvest North Wind Farm (Project). The Project would be situated within an approximately 48,730-acre project area, in the townships of Portland, Lowe, Altamont, Glenwood, and Herrick (Project Area). The total installed capacity of the Project would not exceed 310.1 megawatts (MW) of nameplate capacity. The proposed Project includes up to 112 wind turbine generators, access roads to turbines and associated facilities, underground 34.5 kV electrical collector lines, underground fiber-optic cable, a 34.5-kV to 345-kV collection substation, up to four permanent meteorological towers, a 345-kV interconnection substation, an approximately 150-foot long 345-kV transmission line connecting the Project substation and the Interconnection substation, and an operations and maintenance facility. The Project would interconnect to the regional electric grid along the Big Stone to Brookings 345-kV transmission line via a new 345-kV Interconnection Substation located in Glenwood Township and be able to deliver 300 MW of electricity. Deuel Harvest is negotiating a Generator Interconnection Agreement with Otter Tail Power Company and Midcontinent Independent System Operator, Inc. The Project is expected to be completed in 2020. Applicant estimates the total construction cost to be \$400 million.

The Commission has jurisdiction over this matter pursuant to SDCL Chapters 1-26 and 49-41B and ARSD Chapter 20:10:22.
